Congressional Record

PROCEEDINGS AND DEBATES OF THE 99th CONGRESS, FIRST SESSION

SENATE—*Wednesday, October 2, 1985*

(Legislative day of Monday, September 30, 1985)

The Senate met at 11 a.m., on the expiration of the recess, and was called to order by the Honorable ALFONSE M. D'AMATO, a Senator from the State of New York.

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray.

Almighty God, sovereign of history, we pray for our leaders, Senators DOLE and BYRD. They have the whole picture and bear the burden of Senate business in its totality as well as responsibility for party solidarity. Thou knowest their concerns, their expectations, and their desire to get the business of the Senate done efficiently, productively and equitably. Grant to them a special dispensation of grace and patience when controversy stalls legislation, when colleagues seem something less than cooperative, and when tension builds between House or White House. May their relationship with each other be strong and enduring as they seek commonality of purpose while they honor their differences. Bless them and their loved ones and help us all to be supportive of them in their heavy duties. In the name of Him who was the servant of servants.Amen.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore [Mr. THURMOND].

The legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, DC, October 2, 1985.

To the Senate:

Under the provisions of Rule I, Section 3, of the Standing Rules of the Senate, I hereby appoint the Honorable ALFONSE M. D'AMATO, a Senator from the State of New York, to perform the duties of the Chair.

STROM THURMOND,
President pro tempore.

Mr. D'AMATO thereupon assumed the chair as Acting President pro tempore.

RECOGNITION OF THE ACTING MAJORITY LEADER

The ACTING PRESIDENT pro tempore. The acting majority leader is recognized.

SCHEDULE

Mr. GOLDWATER. Mr. President, under the standing orders, both leaders are recognized for 10 minutes, and the acting majority leader will yield his 10 minutes to the minority leader.

We have special orders in favor of Senators GOLDWATER, NUNN, BINGAMAN, and PROXMIRE. I believe everything else has been mentioned. There will be rollcall votes throughout today, and we may turn to any legislative or executive items which have been cleared for action, with possible items being House Joint Resolution 393, temporary extension of certain housing programs, and H.R. 3453, a 45-day extension of the Superfund bill.

RECOGNITION OF THE MINORITY LEADER

The ACTING PRESIDENT pro tempore. The Democratic leader is recognized.

Mr. BYRD. Mr. President, I thank the distinguished Senator from Arizona [Mr. GOLDWATER] the acting Republican leader, for his offer of the time. I do not have the feeling I will need any of it at this point.

Mr. President, I ask unanimous consent that I may reserve the remainder of my time.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. BYRD. I yield the floor.

RECOGNITION OF SENATOR GOLDWATER

The ACTING PRESIDENT pro tempore. Under the previous order, the Senator from Arizona [Mr. GOLDWATER] is recognized for a period not to exceed 15 minutes.

DOD ORGANIZATION—A HISTORICAL PERSPECTIVE

Mr. GOLDWATER. Mr. President, yesterday Senator NUNN and I began a series of speeches about the very serious problems in the organization of our national defense establishment. We addressed Congress' role in helping to create and perpetuate some of these problems. Today, we will discuss specific examples in our military history where the military services' inability, or unwillingness, to work together has led this Nation to military disaster or near disaster. This has happened not once, or twice, but repeatedly since our military services were first required to coordinate their efforts. And the sad fact is that these problems persist. Our statements today show that problems in the U.S. military establishment did not emerge just recently, they have plagued our defense efforts for much of this century.

The inability of the military services to work together effectively has not gone unnoticed. Attempts have been made in the past to correct this problem, but it is still with us. It is still extremely detrimental to our Nation's ability to adequately defend ourselves. As someone who has devoted his entire life to the military, I am saddened that the services are still unable to put national interest above parochial interest.

The problem is twofold; first, there is the lack of true unity of command, and second, there is inadequate cooperation among U.S. military services when called upon to perform joint operations. As I indicated, this is not a new problem; in fact, it dates back at least as far as the Spanish-American War. The admiral and general in

charge of the Navy and Army forces in the Cuban campaign were on such bad terms that the general refused to let the admiral's representative sign the surrender agreement. Why? Because the commanders couldn't agree on a plan for the one major joint operation of the war, the seizure of Santiago. Since a compromise proved impossible, the Army was obliged to capture the city with only minimal support from the Navy, and with much greater risk to American lives.

Although it created unnecessary problems and risks, the presence of two independent commanders did not affect the ultimate outcome of the Santiago campaign. Perhaps this is why no lessons were learned from the experience, for there were two independent commanders at Pearl Harbor, too.

PEARL HARBOR

At Pearl Harbor, the Army and Navy commanders were not feuding; they were just not talking to each other. The fact that there were two commanders and two separate chains of command running back to Washington was a major factor in the devastating success of Japan's surprise attack. No one below President Roosevelt had unified command authority. Consequently, no one had access to all the intelligence information on Japan's plans, and even if they had, they would not have had the authority to order both the Army and Navy to act. On the scene at Pearl Harbor, the divided command authority also contributed to the lack of preparation and warning. General Short and Admiral Kimmel commanded by mutual cooperation—but neither inquired into the plans or operations of the other. General Short assumed that the Navy was conducting long-range air reconnaissance, while Admiral Kimmel assumed that the Army's radar was fully operational. Both assumptions were wrong—tragically wrong. At Pearl Harbor, poor service cooperation was no substitute for unified command.

Recognizing that the lack of unity of command was a fundamental ingredient of the disaster at Pearl Harbor, the "Report of the Joint Committee on the Investigation of the Pearl Harbor Attack" listed as its first recommendation:

That immediate action be taken to ensure that unity of command is imposed at all military and naval outposts.

Despite this specific congressional direction in 1946, we are still struggling with unity of command problems.

LEYTE GULF

Incredibly, the painful lesson of Pearl Harbor was not fully heeded—during World War II. The war in the Pacific was divided into two separate theaters with two separate commanders: General MacArthur was in charge of the southwest Pacific region, which included Australia and the Philippines, while Admiral Nimitz was responsible for the rest of the Pacific Ocean. Each received orders from his own service chief acting for the Joint Chiefs of Staff. Nowhere below the Joint Chiefs was there an authority to make decisions for the entire Pacific theater. Simple common sense dictates that this arrangement would lead to a lack of unity of effort, inconsistencies, duplication, and lack of understanding. And it did.

This arrangement almost turned the crucial battle of Leyte Gulf, on which the liberation of the Philippines depended, into the greatest American Naval defeat since Pearl Harbor. The naval forces supporting the landing at Leyte were divided, one fleet under MacArthur's jurisdiction commanded by Admiral Kinkaid and the other commanded by Admiral Halsey who reported to Admiral Nimitz in Hawaii. Kinkaid expected Halsey to guard the San Bernardino Strait, one of the two entrances into Leyte Gulf. However, Halsey's orders stated that, should he find the Japanese force on the high seas, destroying that force was his top priority. When Halsey fell for the decoy battle group that the Japanese had deployed for just this purpose, he steamed away from Leyte Gulf. And he took with him the ships of Task Force 34, which Kinkaid assumed were still guarding the strait, until he learned the Japanese were already on their way through. Kinkaid was powerless to summon Halsey back. He sent frantic, desperate messages but Halsey ignored all pleas for help until he received the famous message from Nimitz in Hawaii, "Where is Task Force 34, the whole world wants to know?" Only then did Halsey turn back, but by the time he arrived the U.S. forces on the scene had already won the battle by the dint of heroic effort and timely Japanese blunders. But the outcome could have been disasterous due to the intolerable weaknessses of divided command.

NATIONAL SECURITY ACT OF 1947

After World War II, the lessons did not go unheeded. We did learn. Congress tried to correct the problem of fractured command authority and poor service cooperation by means of the National Security Act of 1947 which provided for unified commands in strategic areas. As declared in the law, Congress' intent was to provide for the "strategic direction of the Armed Forces and for their operation under unified control and for their integration into an efficient team of land, naval, and air forces." But the responsibility to serve as executive agents for the unified commands remained the province of individual services. And as a result true unity was never achieved. Moreover, service forces in unified commands were given substantial autonomy. We still have situations today where a unified commander cannot tell forces under his command where to store ammunition for war—even if it is in the wrong place. Without true unity, we remain vulnerable to military disasters. A weak unified command structure means our ability to defend ourselves and protect our interests in regions vital to our national security are still held hostage to the will of the individual services. Tomorrow, we will discuss the problems which have resulted from this situation.

THE 1958 AMENDMENTS

In 1958 President Eisenhower proposed changes to the 1947 act to strengthen the unity of the Armed Forces and their ability to conduct joint operations, In the message he sent to Congress, Eisenhower declared:

> Separate ground, sea, and air warfare is gone forever. If ever again we should be involved in war, we will fight it in all elements, with all services, as one single concentrated effort. Peacetime preparatory and organizational activitity must conform to this fact. Strategic and tactical planning must be completely unified, combat forces organized into unified commands, each equipped with the most efficient weapons systems that science can develop, singly led and prepared to fight as one, regardless of service.

But unfortunately, the influence of the individual services remained too strong. Although Congress approved Eisenhower's proposals, the concept of unified command that Ike articulated has not been adequately implemented by the Department of Defense at any time over the last 27 years. They should have listened to Ike.

President Eisenhower's proposals remain the last serious attempt in this century to correct these serious flaws in our unified command system; 1958 was a long time ago, but the problems Ike identified have not been corrected. And it is clear that the Department of Defense won't make the necessary changes. It is going to be up to the U.S. Congress. This is our challenge; this is our responsibility under the Constitution.

I have said on many occasions that if we can straighten out the Department of Defense, it may be the most significant contribution to this country that many of us will make in our lifetimes. I feel that strongly about it. Congress has a responsibility to properly oversee the Department of Defense, and it is now time for us to act.

Thus the problems that General, and later President, Eisenhower identified persist.

VIETNAM

In Vietnam, we never had unity of command. Unity of command is one of the fundamental principles of any military operation. Every West Point plebe knows that. It means that there's only one commander. It means

there is only one chief and he's over all the Indians—no matter what tribe. In his "Maxims of War," Napoleon said: "Nothing is so important in war as an undivided command." Too many cooks mean spoiled broth, and too many commanders mean lost battles. General Westmoreland never had command over all the forces in the Vietnam theater. Single service interests continued to block and frustrate unity of command and joint operations. For example, Gen. David Jones, a former Chairman of the Joint Chiefs, has observed:

> Each service, instead of integrating efforts with the others, considered Vietnam its own war and sought to carve out a large mission for itself. For example, each fought its own air war, agreeing only to limited measures for a coordinated effort. "Body count" and "tons dropped" became the measures of merit. Lack of integration persisted right through the 1975 evacuation of Saigon—when responsibility was split between two separate commands, one on land and one at sea; each of these set a different "H-hour," which caused confusion and delays.

I don't need to dwell on the outcome of our more than 10-year military commitment in Vietnam.

SEIZURE OF THE "PUEBLO"

There are other smaller scale, military operations which also serve as useful examples of this problem: Seizure of the *Pueblo* in 1968, the disasterous Iranian hostage rescue mission of 1980, and even the successful 1983 invasion of Grenada.

The *Pueblo* was a virtually unarmed intelligence-gathering ship which was seized in international waters by the North Koreans on January 23, 1968. Since its mission had been evaluated by the military as being of "minimal risk," no forces were specifically dedicated to its support. Consequently, when the *Pueblo* was seized no single commander in the vicinity had adequate forces to come to her rescue. The *Pueblo* was under operational control of the commander, Naval Forces Japan, who had to request forces from other commands in the region. When the *Pueblo* was seized, the commander, Naval Forces Japan requested air support forces from the commander of the 5th Air Force in Japan, who had none available since he had not been asked to provide contingency forces prior to the crisis. The commander of Naval Forces Japan could have asked for help from the aircraft carrier *Enterprise* which was on maneuvers 500 miles from the *Pueblo*. But since the *Enterprise* was under the command of the commander of the 7th Fleet, the commander in Japan assumed the 7th Fleet would receive direct notification from Washington to go to the *Pueblo's* aid. So he didn't directly contact the 7th Fleet. As a result, it took almost 3 hours for the *Enterprise* to receive orders from Washington to change course. By that time, the *Pueblo* was firmly in the North Koreans' grasp.

So because there was no real unification in the Pacific below the Commander in Chief, Pacific Command—no command with an integrated understanding of the status of service forces in the vicinity or capable of effective, multiservice communications—the ship's crew spent 11 months in brutal captivity, and the United States suffered a major international embarrassment. As Senator GOLDWATER so aptly stated, the weakness in the unified command structure means we may not be able to protect our vital interests.

Mr. President, this is the second in a series of speeches that Senator NUNN and I will make on these matters, which have been fully brought to the attention of our committee by a task force which has spent more than 3 years studying the problems of our defense.

I must remind my colleagues that we have the constitutional responsibility not just to raise the Army and the Navy, but also to oversee their operations. That is something we have not done since 1958.

I am very happy now to yield to the distinguished Senator from Georgia [Mr. NUNN].

Mr. NUNN. I thank the Senator.

The ACTING PRESIDENT pro tempore. The Senator from Georgia is recognized.

Mr. NUNN. I thank the President.

Mr. President, first, let me say that I hope all of our colleagues who are not able to be here in the Chamber personally this morning will take a look at the RECORD, be briefed by their staff, or listen in from their offices as these speeches are made, because Senator GOLDWATER has given an extraordinarily important recitation of the history of our military forces going back to the Spanish-American War, going through Pearl Harbor, Leyte Gulf, Vietnam, and the *Pueblo*.

I think he has made a very, very strong and convincing case of why problems that have existed for many, many years through both Democratic and Republican administrations have to be addressed, and they have to be addressed by Congress, certainly hopefully with the cooperation of the executive branch.

He discussed the history of this problem going back to the Spanish-American War, and I think it is evident that this problem or these problems certainly transcend any one administration or any one political party.

We have had problems for a long time. Senator GOLDWATER was speaking about problems that are still with us today.

Many people do not remember and have not read the history of the Spanish-American War. Pearl Harbor, though very vivid as a symbolic event, is really not remembered by many people, in terms of the details of what transpired.

The Vietnam era is much fresher in our minds, although the problems of unity of command, in my opinion, were never thoroughly discussed and never thoroughly understood by the media, the general public, or Congress.

And the *Pueblo*, though in the headlines for a few months, was never examined, at least in the public dialog, from the point of view of what really went wrong.

We all remember the disaster of Desert One, when the daring and extremely dangerous plan to rescue the American hostages from the American Embassy in Iran failed probably before the forces reached a landing strip in the Iranian desert. As risky as it was, it might have worked. But it did not get that chance, and the reason can be traced to the planning stages of the mission, when all the military services insisted on being involved regardless of whether or not their participation was appropriate. Both the Holloway Commission and our committee's investigation strongly suggest that interservice rivalry and the incompatibility of equipment and training were at the root of the decision to use Marine pilots instead of the Air Force pilots who were experienced and trained for precisely the long-distance, low-altitude flying required by the hostage rescue mission. Furthermore, the postmission investigations revealed that the Joint Chiefs of Staff plans for this kind of contingency were disregarded in favor of ad hoc arrangements, indicating that the contingency plans were of no practical use when it actually came time to stage the mission. Finally, in the aftermath of the disaster, it became apparent that the joint training for such operations had been very poorly coordinated. There were numerous "lessons learned" from Desert One. Unfortunately, the services are still quibbling over special operations roles and missions. The most likely contingencies in these areas are still receiving inadequate attention in joint planning and in budget deliberations.

Lest we think, Mr. President, that these inadequacies are limited to highly specialized operations such as hostage rescues, let us look at another type operation, the invasion of Grenada. Grenada has been touted as a victory, and it was a victory. It was successful. I underscore that. But it is sobering to look at how much went wrong and at how many failures of coordination and communication there were. One cannot help but wonder what would have happened if the opposition on the island had been better armed, organized, or larger.

We have all enjoyed the story of the Army officer who used his AT&T calling card to phone his office in North

Carolina in an effort to coordinate Navy fire support for his position. He was forced to use Ma Bell because the Army units on the ground could not talk to the Navy ships who were supposed to be providing fire support.

Let me emphasize again. He was forced to use Ma Bell because the Army units on the ground could not talk to the Navy ships who were supposed to be providing fire support.

Their radios were incompatible. One officer from the 82d Airborne Division even went to the flagship, the *Guam*, and borrowed a Marine radio. But that still did not work because he did not know the Navy codes and procedures. Moreover, the Marine and Army units on the ground were not under a unified commander. They each reported directly to the commander of the joint task force who was offshore. This decreased their effectiveness and increased the danger to each force where they operated in proximity. In summary, the invasion was plagued by the forces' inability to communicate, a problem caused by the services' continued practice of buying radios which are not compatible.

We have a major problem with our allies in Europe. We have been trying for years to get compatible equipment so we can communicate with our allies, and I would venture to say in a conventional war in Europe if it ever occurs, and God forbid, that we would have a mammoth problem in communicating with our allies. But how in the world do we expect to solve that problem between different countries, different languages, if our Navy here in this country cannot even talk to our Army, and vice versa.

Another instance of failed communications could have ended in tragedy. As you may recall, one of our purposes in going into Grenada, in fact the major purpose, was to rescue American medical students. The planners of the invasion were aware of only one campus on Grenada where American students were located. But in fact there were two. Washington learned of this error very late in the planning and sent a message to the Army commander on the ground in Grenada. But he never received it. The 82d Airborne learned of the second campus only when the students there telephoned to report they were surrounded by Cuban soldiers and asked to be rescued. If the enemy forces had behaved differently, this failure in communication could have cost the lives of the 224 Americans at the second campus. We were saved again by Ma Bell.

I had the great privilege of going down and welcoming back the 82nd Airborne that came out of Fort Stewart, GA. I had the honor of talking to these young people. I talked at length with the commander of the forces who made the decision to go in and to bail out at a very low altitude because they wanted to avoid the possibility of being shot down as they floated in from high altitude. That is a very dangerous procedure, paratroopers bailing out at low altitude. They did it. They did it well. They were very brave and they were very successful.

But I will never forget the shock when I was told by that commander that he went to the first dormitory after they secured it, the only dormitory he had been told about—and this was the man in charge—he went to that dormitory and a few minutes later he received a telephone call from the second dormitory located several miles away on the beach which he had never been informed about. The caller said to him:

> We are surrounded by Cuban and Grenadian forces. They are not inside our dormitory but they are outside surrounding us with guns. We need your help.

It took until the following day for those people to be rescued, during which time had the Cubans or Grenadian forces decided to do so they could have executed them, executed every one of them before they were rescued. This was not the fault of the military on the ground. They did everything they could do, but it was a very direct fault of the proposition we are talking about, the inability to communicate and lack of unit coordination and unit of command.

In sum, reports and analyses conducted after the invasion reveal a woeful lack of interservice coordination in planning the operation. Planning sessions were held separately, and service counterparts were not invited to attend. Furthermore, the services demonstrated a remarkable lack of knowledge about how each other operates. Finally, it is most telling that the Joint Deployment Agency, which was established specifically to coordinate this kind of mission, was completely shut out of the planning and execution of the Grenada operation. A logical question: Why create an agency that you do not use in this situation?

A close look at the Grenada operation can only lead to the conclusion that, despite our victory and success, despite the performance of the individual troops who fought bravely, the U.S. Armed Forces have serious problems conducting joint operations. We were lucky in Grenada; we may not be so fortunate the next time.

I say we were lucky. We also had—and I emphasize this—some very dedicated and courageous individuals and leaders who conducted the operation. Again, I underscore their courage, their bravery, and the effectiveness with which they fought, but the organization itself, the overall chain of command, and the ability to communicate made their mission much more dangerous than it otherwise would have been.

Mr. President, today we have seen, from the lessons of history recited by Senator GOLDWATER and the more recent examples that I have talked about, how the inability of the services to effectively conduct joint operations has severely hampered, and, in some cases seriously crippled past military missions. We have seen the dangers posed by the lack of truly unified commands. As we will see in the coming days, the root causes of these problems are still firmly imbedded in the current organizational structure of the Department of Defense. In our speeches, we will discuss specific entities—the Joint Chiefs of Staff, the unified and specified commands, the Office of the Secretary of Defense and the military departments. We will explore aspects of their organization and their operation which manifest these problems. And we will see how much needs desperately to be changed.

As we said yesterday, these problems are not the fault of the current, or any previous administration. But the time is long past when we can tolerant these failings. President Eisenhower was right in 1958 when he said that modern wars will be fought as joint operations. If we want to be able to defend ourselves in any future war, we must act now to correct these very serious problems.

We must act promptly and I think we need to take a close look at the history. Our staff will be revealing within the next week or two their very thorough study in this whole area. I think it is the most thorough study that has ever been conducted in this area under the guidance and leadership of Jim Locher, who has accompanied Senator GOLDWATER on the floor this morning; Jeff Smith and Collen Getz of my staff, who have been assigned to this task; and Rick Finn, who has done a tremendous job himself in working with Jim; plus a lot of other capable staff who have worked on this. Their study is not endorsed and has not been endorsed in terms of recommendations by either Senator GOLDWATER or myself. We do endorse their effort, though, and we endorse the thoroughness with which they prepared their study.

The recommendations will be the subject, probably, of a great deal of discussion, as they should be. A great deal of difference of opinion is inevitable and a great deal of controversy as well. But these recommendations need to be paid careful heed to by the news media, by our colleagues in this body, by the House of Representatives, and, certainly, by the executive branch.

We have started a series of meetings with the Packard Commission. We hope to coordinate as best we can with them. I believe they are moving

toward the same purpose. They have the same goals in mind in trying to deal with this problem.

I believe it is also important to point out that, while procurement will be discussed, and we are addressing that subject also, many of these problems exist separate and apart from our procurement problems. We are not talking here about how to prevent $500 hammers from being purchased and $600 monkey wrenches and $10,000 toilet seats, and that sort of thing. We are talking about the survival of our Nation. Waste, fraud, and inefficiency are very important problems. We are addressing that in the committee. We will talk some about planning and budgeting in this presentation, but no one should confuse the two. We are talking about here whether this country indeed can fight and fight effectively and, therefore, whether we can prevent war, whether we can deter war. And that is, after all, the major mission of our military forces. The ability to fight and the way this ability is perceived around the world is all-important in preserving the peace.

So, again, I emphasize that I am totally in accord with the chairman's efforts. I hope that we can continue to get the attention of our colleagues on this very important subject as we proceed to talk about the problems. We are not identifying the solutions in this series of speeches. That will come later. But we do think it is very important for our colleagues, for the news media of the country, and also for the American public to understand the scope of the problems, the depth of the problems, the significance of the problems, and the history of the problems that we will be proposing legislation on in the coming months.

Mr. President, I do not know whether the chairman has further remarks. I yield the floor.

Mr. GOLDWATER. Mr. President, I have no further remarks of any great extent. I just wish to thank my friend from Georgia, not just for his effort this morning, because his has been a continuing effort in the interest of our country.

I wish to remind my colleagues in this body and my friends around America, the American citizens, that nobody has ever attacked a stronger person. No country has ever gone to war with a country that had the dominant force. That is what the Armed Services Committee is attempting to accomplish.

Eisenhower always said, "Get more bang for the buck." Both Senator NUNN and I and our staffs and our whole committee are dedicated to the idea that strength keeps peace. And we intend to keep the peace.

Mr. President, I see no other Senator on the floor to speak, so I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BINGAMAN. Mr President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

RECOGNITION OF SENATOR BINGAMAN

The ACTING PRESIDENT pro tempore. Under the previous order, the Senator from New Mexico [Mr. BINGAMAN] is recognized for not to exceed 15 minutes.

S. 1727—FEDERAL SCIENCE AND TECHNOLOGY REVITALIZATION ACT OF 1985

Mr. BINGAMAN. Mr. President, I send a bill to the desk and ask that it be referred to the appropriate committee.

Mr. President, today, along with Senators GOLDWATER, NUNN, QUAYLE, CHILES, WILSON, GORE, and ROCKEFELLER, I am introducing the Federal Science and Technology Revitalization Act of 1985, a bill to authorize a more flexible personnel management system for scientific and technical personnel in the Federal Government.

This legislation responds to an urgent problem facing the Federal agencies: their inability to compete with the private sector in the recruitment and retention of civilian scientists and engineers. I have worked closely with Mr. David Packard and his staff in formulating this legislation. Three years ago, the President's Science Adviser, Dr. George A. Keyworth, asked Mr. Packard to head a review of the health of the Federal scientific laboratories. The White House Science Council's Federal Laboratory Review Panel reported its findings in May 1983. Let me quote the panel's central findings:

> The panel is convinced that the Federal laboratories have great potential and are an essential part of the American institutions where R&D is performed and scientists and engineers receive training. At the same time, the panel has observed a number of serious deficiencies in the Federal laboratories. These deficiencies limit both the quality and the cost-effectiveness of research done by the Federal laboratories. The negative effects of these deficiencies have increased to serious levels during the past decade.

In the personnel area, the panel found "that almost all of the Federal laboratories * * * suffer serious disadvantages in their inabilities to attract, retain, and motivate scientific and technical personnel required to fulfill their missions." They went on to find that "the principal disadvantage is the inability of the Federal laboratories, particularly those under the civil service system, to provide scientists and engineers with competitive compensation at entry and top senior levels."

They recommended that "administrative and legislative actions should be initiated now to create, at Government-operated laboratories. A scientific/technical personnel system independent of current civil service personnel systems." They pointed to the experimental system for managing scientific and technical personnel at the Naval Weapons Center and the Naval Ocean Systems Center as an example of how this can be approached. I will speak more about this experiment, carried out under the authority of the Civil Service Reform Act of 1978, in a moment.

Mr. President, this was a seminal report that the Packard panel did. Numerous other reports had reached a similar conclusion regarding the Federal agencies' ability to attract, retain, and motivate scientists and engineers. But this report finally raised the issue to the White House level. The President was briefed on the report in July 1983, and in August 1983, the President directed the Office of Science and Technology Policy and the Office of Management and Budget to lead an interagency effort to respond to the central thrust of the report. As part of that interagency effort, the legislation which I am introducing today was developed.

Unfortunately, the interagency deliberations have dragged on and have been disrupted by the departure of key players from Government service. As I understand it, the key difference in the interagency community is whether the authority for alternate personnel management systems should be limited to scientists and engineers, or whether agencies should be given authority to expand to other occupational groups in future years. I have chosen the narrower scope for this legislation because I believe that Mr. Packard's panel. The Grace Commission, and numerous other studies have made a compelling case for the urgent problems we face with our Federal scientific and technical personnel. I am not opposed to broadening the authority in the future, for example to those with specialized management skills, once an equally compelling case is made. I place this legislation before the Senate, and Congressman FUQUA is introducing almost identical legislation today in the House of Representatives, because I hope that the 99th Congress can pass this bill before we conclude our work 1 year from now.

It is urgent that we do so, for the problem of inadequate compensation to attract and retain first-rate scientific and technical, personnel, especially at the entry and senior levels, has rapidly been growing worse. For example,

the acceptance rate for NASA's offers to recent engineering graduates has dropped from 62 percent in 1981 to 46 percent in 1984. The number of Air Force civilian scientists and engineers who resigned from Federal service has doubled from 1981 to 1984. Resignations of the Air Force civilian scientists now account for 50 percent of attrition compared to 35 percent in 1981. In a recent survey of problems in recruiting at the Naval Research Laboratory, 93 of 102 unsuccessful recruiting actions were found to be due to low Federal salaries. In 1984, a GAO report indicated that Federal agencies employing engineers experienced a pay disparity of 47 percent below the private sector at entry level and 25 percent at the experienced GS-11 level.

A particularly disturbing report on the quality of our scientific and technical work force comes from the Defense Department whose data show declining aptitude test scores of scientist and engineer new-hires as compared to national norms. The National Bureau of Standards has found in recent recruiting actions that the top Federal salary offers to Ph.D, scientists, engineers, and applied mathematicians in high-technology fields are averaging about $10,000 per year less than industry and university salaries. The Agricultural Research Service is having difficulty recruiting Ph.D. agricultural engineers, molecular biologists, and other specialists in job categories where there is high demand in the private sector. Industry and universities are making higher offers and also are hiring away technical staff from Federal agricultural laboratories. Salary differentials as high as 40 percent have been reported.

Mr. President, in my view, this situation cannot be allowed to continue. The role that the Government-operated laboratories play in our national scientific enterprise is simply too important. For example, the 72 DOD in-house laboratories employ some 27,500 scientists and engineers and spend over $6 billion annually in research and development. We simply must try to get the very best people we can to manage those R&D resources. As the Packard panel observed in its report, "The key to a laboratory's success is a high-quality and properly motivated scientific staff."

The legislation which my colleagues and I are introducing today attempts to ensure that we can attract such staff in the Federal agencies. Let me summarize the key features of the bill.

The legislation would permit agencies to establish alternative systems for managing scientific and technical personnel based upon guidelines established by the Office of Personnel Management.

These guidelines make performance the primary determinant of pay in lieu of longevity. They provide for equal pay for substantially equal work. They simplify job classification and performance evaluation and create broad pay bands in lieu of the civil service General Schedule grade structure. They create a Senior Scientific and Technical Personnel Service analogous to the Senior Executive Service.

The legislation would allow up to 5 percent of scientific and technical personnel in the alternative systems to be paid salaries above the executive level V pay cap, but not to exceed the maximum base pay of the director of a Government-owned contractor-operated laboratory. The bill would remove bonuses from pay cap limits. It would establish a 3-year probationary period for new employees coming under the alternative systems. It would permit the establishment of a special retirement program for employees coming under the alternative system. Finally, it would specify that GAO will evaluate the implementation of the legislation within 5 years of its enactment.

The bill is intended to allow each Federal agency a great deal of flexibility to design an alternative personnel management system or systems which best serve its needs. Instead of prescribing a single acceptable alternative system, the bill defines a general framework which each such system must possess. The legislation provides the opportunity to straightforwardly connect the job classification process for Federal scientific and technical personnel to the marketplace. This connection is cumbersome, if it exists at all, in the current system. The legislation also recognizes that the viability of the Federal laboratory system depends on the employment of a small number of highly talented, highly marketable, prestigious scientific and technical personnel. These individuals, although their numbers are small, are of extreme importance to creative enterprises.

This legislation would essentially allow the Federal agencies to manage their scientific and technical personnel more like the way the Department of Energy allows its contractors to operate its government-owned contractor-operated [GOCO] laboratories. The GOCO Laboratories, such as Los Alamos, Sandia, Lawrence Berkeley, Lawrence Livermore, and Argonne, all have much more flexible personnel management systems than the Federal civil service system. The principles on which these management systems operate are the same as those included in the proposed bill. And these more flexible management systems work. The result is evident in the achievements and the excellence of these GOCO laboratories.

Let me cite one example. The five Department of Energy laboratories I named earlier—Los Alamos, Sandia, Lawrence Berkeley, Lawrence Livermore, and Argonne—spend about 2.5 percent of our national R&D resources. Yet, in survey conducted by Science Digest about 1 year ago of the 100 top young scientists in America under age 40, 21 of those 100 scientists were employed at those five laboratories. Over 20 percent. In contrast, only two scientists were employed at government-owned government-operated [GOGO] laboratories, one at the Uniformed Services University of the Health Sciences and the other at the Centers for Disease Control. And I note that doctors at these laboratories are among the few Federal scientific personnel drawing special pay today. We should be proud of the contractor-operated [GOCO] laboratories' ability to attract, retain, and motivate their scientists and engineers. I believe we must try through this legislation to allow our Federal agencies, and especially their in-house laboratories, to achieve similar quality and excellence.

Let me note that the Federal agencies are not without some experience with more flexible personnel systems. Unfortunately that experience is limited to two Navy laboratories, the Naval Ocean Systems Center [NOSC], San Diego, and the Naval Weapons Center [NWC], China Lake, CA, and a much smaller project at the Federal Aviation Administration. These were the only demonstration projects carried out under the authority of the Civil Services Reform Act of 1978. Last year, in testimony before the Civil Service Subcommittee of the Governmental Affairs Committee, the architect of the Navy's demonstration projects, Mr. Robert M. Hillyer, reported that these projects had produced outstanding results in the view of both management and employees. Morale was high at the two laboratories, with 82 percent of the employees preferring the alternative system. The labs had experienced an improvement in the quality of their entry-level recruits. Retention had improved at more senior levels.

Just as we have seen a revitalization of these laboratories, I believe that the legislation which we are introducing today could revitalize our entire Federal science and technology enterprise.

The legislation could potentially affect up to some 169,000 scientists and engineers employed by the Federal agencies. The definition of "scientific and technical personnel" included in the bill is restricted to the hard sciences and engineering, corresponding essentially with series 400, 800, 1300, and 1500 found in OPM's Position Classification Standards of May 1983. We excluded personnel in the medical sciences because they are covered by separate special pay provisions, and apparently wanted to continue to work within that system. We excluded the

social sciences because evidence was not available that the Federal agencies faced similar recruitment and retention problems in those fields.

We did consider other options for both broader and narrower application of the authority granted in this bill. As I mentioned earlier, there are some in the executive branch who would like the authority to extend the alternative systems to other occupational groups, subject to OPM approval. We have instead kept the proposed legislation focused on the problem area with which we are familiar, the recruitment and retention of quality scientists and engineers. the congressional committees of jurisdiction will be in a better position to judge whether other occupational groups should be included now or in the future. Consideration was also given to restricting the legislation to scientists and engineers in the Federal laboratories. This would have significantly reduced the number of personnel covered by alternative personnel systems but would have created significant mobility problems within Federal agencies. A topnotch scientist in a covered laboratory would have been reluctant to take on management assignments outside the laboratory system.

It would be up to the agencies to decide how broadly to use the authority granted to them in this proposed legislation. At a minimum, my hope would be that the bulk of the Federal laboratories would be brought under the legislation as soon as possible. In the case of the Department of Defense, other key scientific and technical personnel, for instance, in the acquisition and logistics commands should, in my opinion, also be brought under this system. For one of the key problems in the defense procurement area, which has been highlighted in hearings before the Senate Armed Services Committee's Acquisition Subcommittee, is retention and recruitment of qualified technical personnel by these commands.

I should make very clear at this point, however, that the goal of this legislation is to provide flexibility in personnel management, not to simply give an across-the-board pay raise to Federal civilian scientists and engineers. The cost of giving 169,000 people even a modest pay raise would quickly run afoul of the budget resolution's constraints. The problem which Mr. Packard and others have identified is more a question of the quality than of the quantity of scientific and technical personnel in the Federal agencies and the in-house laboratories. I intend that this legislation be implemented at no additional cost to the Government. To the extent that pay is increased to attract and retain top quality scientists and engineers, the number of scientists and engineers employed will have to be decreased through attrition or pay of less productive scientists and engineers will have to be frozen. I do not see this as a hardship for the Federal agencies because science and engineering are inherently elitist professions. The productivity of the very best scientists and engineers is many times that of their less talented colleagues. The productivity of a whole laboratory can be increased by the presence of a single gifted individual.

Perhaps finally I should add a disclaimer about the legislation I am proposing. This legislation aims at implementing just one recommendation of the Packard report and other similar reports. It is, in my view, the most urgent recommendation and, if passed and implemented, this legislation will improve the quality of our Federal laboratories and the overall ability of the Government to perform its scientific and technical work. But there are other reasons that scientists and engineers choose not to work for the Federal Government. Modern research facilities, equipment, and instrumentation are also required to attract, retain, and motivate the best scientists and engineers. Unfortunately, these facilities in our in-house laboratories often do not compete well with the facilities available in the private sector, in our best universities, and in the Government-owned contractor-operated laboratories. Another area of serious concern is the contracting for technology support at the laboratories. The laboratories are embedded in the overall Federal procurement system with all of its long delays and bureaucratic obstacles. Frustration can build when a Federal scientist sees how much more flexible the procurement system is for his colleagues at a university or in industry. If we are to make the very best use of the Federal in-house laboratories, we are going to have to address the facilities and contracting issues also at some point. But we have to start somewhere and I believe the Packard panel has correctly pointed toward the personnel issue as the most critical issue requiring our attention here in the Congress. Providing the finest facilities without first establishing a personnel system capable of attracting, retaining, and motivating a quality scientific work force would make little sense.

I call upon my colleagues to look very carefully at this legislation and to give it their support.

Mr. President, I ask unanimous consent that a copy of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1727

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Federal Science and Technology Revitalization Act of 1985".

SEC. 2. (a)(1) Title 5, United States Code, is amended by inserting after chapter 55 the following new chapter:

"CHAPTER 56—ALTERNATIVE SCIENTIFIC AND TECHNICAL PERSONNEL MANAGEMENT SYSTEMS

"Sec.
"5601. Purposes.
"5602. Definitions.
"5603. Requirements for alternative scientific and technical personnel management systems.
"5604. Authority to establish alternative scientific and technical personnel management systems.
"5605. Special provisions relating to employment authority.
"5606. Special provisions relating to compensation.
"5607. Special retirement provisions.
"5608. Regulations, systems approval, and oversight.
"5609. Transition provisions.

"§ 5601. Purposes

"The purpose of this chapter are—

"(1) to enable the Federal Government to attract, retain, motivate, and improve the quality of Federal scientific and technical employees;

"(2) to improve the quality of laboratories operated by the Federal Government in order that the laboratories may fulfill efficiently and effectively their agency-assigned missions and become and remain centers of scientific excellence; and

"(3) to improve the overall ability of the Federal Government to perform scientific and technical work.

"§ 5602. Definitions

"For the purposes of this chapter—

"(1) 'agency' has the same meaning as provided in section 5721(1) of this title, except that the term does not include the government of the District of Columbia;

"(2) 'alternative personnel management system' means an alternative personnel management system established under section 5604 of this title;

"(3) 'career category' means a grouping of occupations or professions which are sufficiently similar that similar treatment of such positions in personnel and pay administration is appropriate;

"(4) 'compensation' means all pay, awards, differentials, and benefits, except for compensation payable for work injuries as authorized in chapter 81 of this title and benefits payable under subchapter III of chapter 83 of this title;

"(5) 'employee' has the same meaning as provided in section 2105 of this title, but does not include a prevailing rate employee (as defined in section 5342(a)(2) of this title);

"(6) 'Office' means the Office of Personnel Management;

"(7) 'performance' means how well an employee accomplishes assigned duties and responsibilities as measured by such factors as quality, quantity, timeliness, and manner of performance;

"(8) 'salary structure' means a range of basic pay consisting of minimum and maximum rates;

"(9) 'scientific and technical employee' means an employee of an agency, including a manager and a supervisor—

"(A) who—

"(i) is required to have an advanced level of knowledge in one of the mathematical,

computer, physical, or natural sciences or in chemical, electrical, mechanical, or other engineering and is customarily expected to have acquired such advanced level of knowledge in a prolonged program of specialized intellectual instruction and study in an institution of higher education (rather than in a program of general academic education, a program of apprenticeship, or a program of training in the performance of routine mental, manual, mechanical, or physical activities); and

"(ii) is engaged in the performance of work which consistently requires the exercise of discretion and judgment and is of such character that the output or other result of such work cannot be standardized in relation to any period of time; or

"(B) who has completed a prolonged program of specialized intellectual instruction and study described in subparagraph (A)(i) of this paragraph and is performing related work under appropriate direction or guidance to qualify the employee as a scientific and technical employee described in subparagraph (A) of this paragraph;

"(10) 'senior scientific and technical employee' means a scientific and technical employee who is covered by an alternative personnel management system and is serving in a position equivalent to a position in the Senior Executive Service, but does not include an employee whose position is required to be filled by an appointment by the President by and with the advice and consent of the Senate; and

"(11) 'special award' means a nonmonetary award or a lump-sum payment based on tangible savings or intangible benefits to the Federal Government and given to reward special acts or services outside normal job responsibilities, including suggestions and inventions, a scientific achievement, or an act of heroism.

"§ 5603. Requirements for alternative scientific and technical personnel management systems

"(a) The Office shall prescribe, in regulations, requirements for agency alternative personnel management systems for scientific and technical employees in accordance with the purposes set out in section 5601 of this title.

"(b) In prescribing regulations under subsection (a) of this section, the Office shall take into account the principles that—

"(1) equal rates of pay should be paid for substantially equal work; and

"(2) pay distinctions should be based on (A) substantial differences in skills, effort, responsibilities, and working conditions, and (B) performance appraisals.

"(c) The regulations prescribed by the Office for agency alternative personnel management systems under subsection (a) of this section shall—

"(1) require the establishment of job evaluation plans which reflect internal job alignment that is based upon the level of skill, effort, responsibility, and working conditions required to perform the work;

"(2) include procedures for the Office—

"(A) to establish, for position of scientific and technical employees, salary structures which (i) are competitive with salary structures applicable to similar positions outside the Federal Government, and (ii) reflect job evaluations made under an internal job evaluation system which recognizes labor market factors as the primary basis for setting pay; and

"(B) to adjust such salary structures annually to enable agencies to implement sections 5604(b)(3) and 5606(a) of this title;

"(3) include methods for determining appropriate compensation for an employee, including basic pay, which are consistent with the purposes of this chapter and provide for consideration of such factors as the employee's level of experience and achievement, labor market factors, and job responsibilities; and

"(4) establish a Senior Scientific and Technical Personnel Service and authorize agencies to include in such service senior scientific and technical employees.

"(d)(1) The Office shall include in the regulations prescribed under subsection (a) of this section provisions for the following matters under alternative personnel management systems:

"(A) Utilization of compensation surveys.

"(B) Interrupted service.

"(C) Overtime pay.

"(D) Compensatory time.

"(E) Sunday pay.

"(F) Holiday pay.

"(G) Standby or on-call pay.

"(H) Night differential pay.

"(I) Hazardous pay.

"(J) Environmental pay.

"(K) The conversion of a position from and to the General Schedule, the performance management and recognition system under chapter 54 of this title, the Senior Executive Service, or another system as appropriate upon the establishment or disestablishment of an alternative personnel management system.

"(L) The transfer of an individual to, from, or between alternative personnel management systems.

"(2) The Office may include in the regulations issued under subsection (a) of this section provisions to limit the cost and amount of pay, differentials, and benefits and provisions for retirement plans authorized by section 5607 of this title.

"(e) The regulations relating to the Senior Scientific and Technical Personnel Service prescribe under subsection (c)(5) of this section shall authorize—

"(1) accumulation of annual leave in the same manner as is authorized for members of the Senior Executive Service under section 6304 of this title;

"(2) sabbaticals in the same manner as is authorized for career appointees of the Senior Executive Service under section 3396(c) of this title;

"(3) presidential rank awards in the same manner as is authorized for career appointees in the Senior Executive Service under section 4507 of this title;

"(4) the payment of the travel expenses of a Senior Scientific and Technical Personnel Service appointee to the appointee's first post of duty in the same manner as is authorized for the members of the Senior Executive Service under section 5723 of this title;

"(5) the payment of travel expenses of Senior Scientific and Technical Personnel Service candidates for preemployment interviews requested by an agency in the same manner as is authorized for candidates for Senior Executive Service positions under section 5752 of this title; and

"(6) the retention of Senior Scientific and Technical Personnel Service pay and benefits by an employee in such Service who receives a Presidential appointment in the same manner as is authorized for career appointees in the Senior Executive Service under section 3392(c) of this title.

"§ 5604. Authority to establish alternative scientific and technical personnel management systems

"(a) Under regulations prescribed by the Office pursuant to section 5603 of this title, the head of each agency may establish alternative personnel systems for scientific and technical employees of the agency.

"(b) An alternative personnel management system established by an agency under subsection (a) of this section—

"(1) may identify separate career categories for employees in positions which are subject to the system;

"(2) shall include a performance appraisal system which (A) provides for peer comparison and ranking when considered appropriate by the head of the agency, and (B) is otherwise in accordance with section 4302 of this title;

"(3) shall provide for the rate of basic pay of an employee to be set and adjusted within salary structures based on such factors as the experience and achievement of the employee, labor market factors, position in a pay range, job responsibilities, rates of pay for similar jobs outside the Federal Government, and (consistent with section 5334 of this title) changes in positions or types of appointments;

"(4) shall provide supervisory and managerial pay differentials (which shall be considered a part of basic pay only for the purposes of chapters 81 and 87 of this title and subchapter III of chapter 83 of this title);

"(5) may authorize special awards under this chaper (which shall not be considered a part of basic pay for any purpose);

"(6) shall authorize performance recognition in the form of—

"(A) a lump-sum payment (which shall not be considered a part of basic pay for any purpose);

"(B) an increase of an employee's rate of basic pay within a pay range or to a higher pay range; or

"(C) nonmonetary recognition;

"(7) shall provide special procedures for recruitment for an appointment to positions of employment;

"(8) shall provide an employee development program which may include provisions for sabbaticals; and

"(9) shall provide for job evaluations.

"(c)(1) Under an alternative personnel management system of an agency, the head of the agency may designate certain scientific and technical positions in the agency (including managerial and supervisory positions) as positions which require specially qualified scientific and technical employees. The head of an agency shall exercise the authority prescribed in this paragraph primarily in the case of positions in Federal Government laboratories which are under the jurisdiction of the agency.

"(2) The number of positions in an agency which are designated for the purpose of paragraph (1) of this subsection may not exceed the number equal to 5 percent of the total number of positions covered by alternative personnel management systems of the agency.

"§ 5605. Special provisions relating to employment authority

"(a) Except as otherwise provided in this section, the provisions relating to employment authority included in an alternative personnel management system shall be consistent with civil service laws relating to employment authority.

"(b) The head of an agency may employ scientific and technical employees in posi-

tions which are under an alternative personnel management system without regard to section 3101 of this title.

"(c)(1) Notwithstanding any other provision of law, except as provided in paragraph (2) of this subsection, an individual's examination under an alternative personnel management system shall be complete and selection for appointment to a position covered by the system shall become final only after the individual has satisfactorily completed a probationary period of service of 3 years in accordance with regulations prescribed by the Office.

"(2) An employee who has satisfactorily completed a probationary or trial period of service and a total of 3 years of service in the competitive service, excepted service, or Senior Executive Service is not required by paragraph (1) of this subsection to complete an additional probationary period of service under an alternative personnel management system.

"(d) The head of an agency may make an appointment to a position designated under section 5604(c) of this title as requiring a specially qualified scientific and technical employee without regard to provisions of law requiring competitive examinations.

"§ 5606. Special provisions relating to compensation

"(a) The head of an agency may, pursuant to the provisions of an alternative personnel management system of the agency (1) classify the positions of scientific and technical employees covered by the system, and (2) set and annually adjust the compensation of such employees to be competitive with compensation practices for personnel employed in positions outside the Federal Government which are similar to the positions of such employees.

"(b) Except as provided in subsection (c) of this section, the rate of basic pay of an individual employed under an alternative personnel management system may not exceed the rate of basic pay for level IV of the Executive Schedule under section 5315 of this title.

"(c)(1) The head of an agency designating a position under section 5604(c) of this title as a position which requires a specially qualified scientific and technical employee may set the maximum rate of basic pay for such position at a level which is competitive with rates of pay of scientific and technical personnel for work performed in similar positions outside the Federal Government, including the rates of pay of scientific and technical personnel at national laboratories owned by the Federal Government and operated by a contractor.

"(2) A maximum rate of pay set under paragraph (1) of this subsection shall not be less than the rate of basic pay for level IV of the Executive Schedule under section 5315 of this title and, if higher, not more than the maximum rate of basic pay of the head of any laboratory referred to in such paragraph.

"(d) Notwithstanding sections 1341, 1342, 1349 through 1351 of title 31 and the provisions of subchapter II of chapter 15 of such title, whenever the rate of basic pay for level IV of the Executive Schedule is increased pursuant to section 5318 of this title, the rates of basic pay of scientific and technical employees serving in positions covered by an alternative personnel management system in an agency may be adjusted by the head of the agency if appropriate to maintain rates of basic pay of such employees at levels which are competitive with rates of basic pay of scientific and technical personnel in similar positions outside the Federal Government.

"(e) For the purpose of section 5941 of this title, rates of basic pay fixed under this chapter shall be considered to be fixed by statute.

"(f) The rate of basic pay set for a scientific and technical employee under an alternative personnel management system may not be increased solely by reason of an increase, authorized under this chapter, in the minimum rate of basic pay set for the pay range of the employee's position. If such minimum rate of basic pay, after the increase, exceeds the rate of basic pay of such employee, the employee's position may be placed in the next lower pay range.

"(g) A lump-sum performance or a special award may be paid under this chapter to an employee without regard to any other provision of law limiting either the amount or the rate of basic pay that an employee may receive in a single year.

"§ 5607. Special retirement provisions

"(a) The head of an agency may, under an alternative personnel management system, establish a special retirement program for scientific and technical employees covered by the agency. Enrollment of any such employee shall be voluntary.

"(b)(1) Under a retirement program established under subsection (a) of the section, an agency employing a scientific and technical employee enrolled in the program may deduct and withhold from the basic pay of the employee such amount not exceeding 10 percent of the employee's rate of basic pay as the employee elects. Amounts deducted and withheld under the program shall be deposited in interest-earning accounts. The agencies may contribute for the benefit of the employee, for deposit in like manner, an amount not exceeding one-half of the amount of the employee's contribution.

"(2) For purposes of the Internal Revenue Code of 1954—

"(A) the amount of an employee's pay which is deducted and withheld as provided in paragraph (1) of this subsection and the amount of the employing agency's contributions for the benefit of the employee under such paragraph shall not be included in the gross income of the employee; and

"(B) the accounts in which such amounts are deposited under such paragraph shall be treated, for purposes of determining when such amounts and the interest earned on such amounts are included in the income of the employee, as described in section 401(a) of such Code.

"§ 5608. Regulations, system approval, and oversight

"(a) The Office may prescribe such additional regulations as the Office considers appropriate to carry out this chapter.

"(b) The Office shall review each alternative personnel management system proposed to be established by an agency under section 5604 of this title to determine whether the system meets the requirements of law and the regulations issued under this chapter.

"(c) The Office shall monitor the Department of alternative personnel management systems and evaluate such systems to ensure compliance with the provisions of this chapter, other applicable provisions of law, and the regulations prescribed by the Office under this chapter.

"(d) The Office may require an agency, with appropriate notice, to make changes in any alternative personnel management system of the agency and, if the agency does not comply with such requirement and the system is not administered in accordance with the purposes set out in section 5601 of this title, as determined by the Office, may terminate or modify all or part of the system.

"§ 5609. Transition provisions

"(a) Each employee serving in a position at the time the position is designated to become subject to an alternative personnel management system shall be given written notice of the designation in accordance with procedures prescribed by the agency establishing the system. The rate of basic pay of such employee may not be reduced by reason of the establishment of the system.

"(b)(1) Each employee referred to in subsection (a) of this section shall be paid—

"(A) in the case of an employee serving in a position under the General Schedule on the date the position becomes subject to an alternative personnel management system, a lump-sum pro rata share of the equivalent of any within-grade increase which would have been due the employee under section 5335 of this title, computed as provided in paragraph (2) of this subsection, and

"(B) in the case of an employee serving in a position subject to chapter 54 of this title on such date, a lump-sum pro rata share of the equivalent of an employee's merit increase which would have been due under such chapter, computed as provided in paragraph (2) of this subsection,

taking into account the performance requirements applicable to such increase.

"(2) for the purposes of paragraph (1) of this subsection, the pro rata share of the equivalent of an increase referred to in such paragraph shall be computed through the day before the date referred to in such paragraph.

"(3) The amount of a lump-sum payment made under paragraph (1) of this subsection shall not be considered part of basic pay for any purpose.

"(c) Any increases authorized under section 5305(a) of this title which occur before conversion of a position to a position covered by an alternative personnel management system shall be given to the employee serving in such position.

"(d)(1) Pursuant to regulations prescribed by the Office, each agency which establishes an alternative personnel management system shall prescribe procedures to convert employees to the system.

"(2) Pursuant to regulations prescribed by the Office, each agency which establishes an alternative personnel management system shall prescribe procedures to convert employees to the General Schedule, the performance management and recognition system under chapter 54 of this title, the Senior Executive Service, or another appropriate system in the event the alternative personnel management system is terminated.".

(2) The table of chapters at the beginning of part III of such title is amended by inserting after the item relating to chapter 55 the following new item:

"56. Alternative Scientific and Technical Personnel Management Systems ..... 5601.".

(b) The Office of Personnel Management shall issue regulations under chapter 56 of title 5, United States Code (as added by subsection (a)(1) of this section), not later than 6 months after the date of enactment of this Act.

CONFORMING AMENDMENTS

SEC. 3. (a) Section 2102(a)(1) of title 5, United States Code, is amended—

(1) by striking out "and" at the end of subparagraph (B);

(2) by inserting "and" at the end of subparagraph (C); and

(3) by inserting after subparagraph (C) the following new subparagraph:

"(D) positions designated under section 5604(c) of this title as requiring the services of specially qualified scientific and technical employees.".

(b) Section 2108(3) of such title is amended by striking out "or the General Accounting Office" and inserting in lieu thereof "the General Accounting Office, or the Senior Scientific and Technical Personnel Service referred to in section 5603(c)(5) of this title".

(c) Section 3104(a)(2) of such title is amended to read as follows:

"(2) The provisions of paragraph (1) of this subsection shall not apply to any Senior Executive Service position (as defined in section 3132(a) of this title) or to any position designated under section 5604(c) of this title as requiring a specially qualified scientific and technical employee.".

(d) Subsection (a) of section 3132 of such title is amended—

(1) by striking out "or" at the end of paragraph (2)(ii);

(2) by inserting "or" at the end of paragraph (2)(iii); and

(3) by adding at the end thereof the following:

"(iv) any position included in an alternative personnel management system established under section 5604 of this title:".

(e) Subsection (f) of section 4303 of such title is amended—

(1) by striking out "or" at the end of paragraph (2);

(2) by striking out the period at the end of paragraph (3) and inserting in lieu thereof: ", or"; and

(3) by adding at the end thereof the following new paragraph:

"(4) the reduction in pay, the reduction from one pay range to another, or the removal of an employee who, pursuant to section 5605(c) of this title, is serving a probationary or trial period under an initial appointment to a position covered by an alternative personnel management system established under section 5604 of this title.".

(f) Section 4501(2) of such title is amended—

(1) by striking out "and" at the end of subparagraph (A);

(2) by inserting after subparagraph (B) the following:

"(C) an individual employed in a scientific and technical position covered by an alternative personnel management system established under section 5604 of this title; and".

(g) Subsection (c) of section 5102 of such title is amended—

(1) by striking out "or" at the end of paragraph (26);

(2) by striking out the period at the end of paragraph (27) and inserting in lieu thereof "; or";

(3) by adding at the end thereof the following new paragraph:

"(28) Employees covered by alternative personnel management systems established under section 5604 of this title.".

(h) Section 5363 of such title is amended by adding at the end thereof the following new subsection:

"(b) The pay retention rights applicable to an employee covered by an alternative personnel management system established under section 5604 of this title shall be the pay retention rights prescribed by the Office of Personnel Management in regulations issued under chapter 56 of this title.".

(i) Section 5373 of such title is amended—

(1) by striking out "or" at the end of paragraph (3);

(2) by striking out the period at the end of paragraph (4) and inserting in lieu thereof "; or"; and

(3) by adding at the end thereof the following new paragraph:

"(5) chapter 56 of this title.".

(j) Section 7501(1) of such title is amended to read as follows:

"(1) 'employee' means an individual in the competitive service who is not serving a probationary or trial period under an initial appointment or who, in the case of an individual other than one serving in a position in an alternative personnel management system established under section 5604 of this title, has completed 1 year of current continuous employment in the same or similar position or positions under other than a temporary appointment limited to 1 year or less; and".

(k)(1) Subsection (a)(1)(B) of section 7511 of such title is amended by striking out the semicolon at the end thereof and inserting in lieu thereof: "or who has completed a probationary period of service as provided in section 5605(c) of this title in a position that is covered by an alternative personnel management system established under section 5604 of this title;".

(2) Subsection (b) of such section is amended—

(A) by striking out the period at the end of paragraph (2) and inserting in lieu thereof: "; or"; and

(B) by adding at the end thereof the following new paragraph:

"(3) who is serving a probationary period pursuant to section 5605(c)(1) of this title in a position that is covered by an alternative personnel management system established under section 5604 of this title.".

GENERAL ACCOUNTING OFFICE REVIEW AND EVALUATION

SEC. 4. (a) The Comptroller General of the United States shall review and evaluate alternative scientific and technical personnel management systems established under section 5604 of title 5, United States Code (as added by section 2 of this Act).

(b)(1) Not later than 5 years after the date of enactment of this Act, the Comptroller General shall transmit to the Congress and to the Office of Personnel Management a report on the review and evaluation carried out under subsection (a).

(2) The report required by paragraph (1) shall include an evaluation of the implementation and operation of the alternative personnel management systems referred to in subsection (a), a comparison of the cost of the systems with the cost of the classification and pay systems which would otherwise be applicable to employees of the Federal Government covered by such systems as provided by law, an assessment of the acceptability of the systems to employees and managers of the Federal Government, and such recommendations for changes or improvements in the systems as the Comptroller General considers appropriate.

RECOGNITION OF SENATOR PROXMIRE

The PRESIDING OFFICER (Mr. HUMPHREY). Under the previous order, the Senator from Wisconsin [Mr. PROXMIRE] is recognized for not to exceed 15 minutes.

LET'S USE THE SCC TO MAKE ARMS CONTROL WORK

Mr. PROXMIRE. Mr. President, in June of this year, a group of obscure Americans and Russians successfully negotiated two important arms control agreements. Those arms control successes passed almost unnoticed. One settled concerns our Government has had since 1973 that the Soviets are testing their radars for use as a defensive shield against ballistic missiles. The other would help prevent terrorist attacks from setting off a superpower nuclear war. What agency achieved these agreements? It is known as the Standing Consultative Commission or SCC. It consists of some 20 persons—half American and half Russian. It was established in 1972 in the SALT I Treaty. The superpowers established the agency to help resolve compliance charges by either side on arms control matters. When it has been called on to act, it has successfully resolved differences between the two superpowers. It has allayed our suspicions of Soviet violations or persuaded the Soviets to desist from violations in some cases.

Why haven't we heard more about this agency? Answer: Because it operates in secrecy. It rarely reports its accomplishments. When it does, the accomplishments are reported in very brief press releases with no elaboration and no background or documentation provided. Also, Assistant Secretary of Defense Richard Perle, who has been a dominant and critical voice on arms control in the administration, has belittled the SCC. Perle says the overall record of the SCC does not amount to much. He contends we might as well forget it. If you share Perle's consistently negative view of arms control, you may share his contempt for the SCC.

On the other hand, if you believe that arms control represents our best passage to survival in this nuclear world, then you may feel we should give the SCC far more of a chance to do its job. In fact, this country should insist that the SCC consider in detail every responsible charge against the Soviet Union of Arms Control Treaty violation. We should welcome its consideration of every charge against the United States of treaty violation. We should also insist on far more comprehensive reports from the SCC on their findings and on the resolution of charges of treaty violations by either side.

In a recent article in Science magazine, Jeffrey Smith points out how deliberately obscure has been our handling of the successes of the SCC. For instance, the only notice of the success of the SCC in persuading the Soviets to desist from testing of their radar defenses against antiballistic missiles was in a press release from Geneva, Switzerland. Here was the statement. It was a great achievement in winning compliance with the treaty, but they certainly played it down in the announcement. All they said was: "During this [SCC] session, the parties signed a common understanding intended to further enhance the viability of the ABM Treaty." That was it. There was no more.

As Jeffrey Smith writes:

No mention was made of the fact that a loophole in the treaty, which permitted the Soviets to operate certain air defense radars during missile tests from a site at Sary Shagan, has now been closed. (In the future, the radars may not be operated during missile tests unless potentially hostile aircraft are clearly in the vicinity, and their operation then must be fully explained, according to the agreement). The radar operation had figured prominently in the administration's most recent report on Soviet treaty compliance, where it was cited as evidence "that the U.S.S.R. may be preparing an ABM defense of its national territory."

Mr. President, this Senator does not argue that the SCC represents the complete answer to the threat of future violations of arms control agreements with the Soviet Union. But I firmly believe that the SCC does constitute a useful enforcement tool that we have neglected. No question about it. The SCC is a technical group. It is competent to make technical findings. But it cannot resolve issues when both of the superpowers do not want them resolved. Nevertheless, in the long run both the United States and the Soviet Union have everything to gain by successful arms control and everything to lose by its failure. What does that mean? That means we have everything to gain from pushing the SCC process to the utmost. We can measure the true commitment of an administration to arms control by the extent to which it uses the SCC. And this Congress can play a vital part, too. As we know, a number of our colleagues have persistently pressed the administration to reveal Soviet violations of arms control agreements. No American who believes in the security of our country can object to that. But at the same time, should we in the Congress not also insist that we receive a full account of the arms control issues the SCC has resolved? We need to know the successes of arms control as well as its failures. This Senator fully appreciates that much of the discussion of these matters in the SCC must continue to be secret. The SCC is not and cannot be a public debating society airing wild charges and propaganda if it is to be successful.

Finally, Mr. President, let's be clear about it. The difference of opinion this Senator has expressed in this statement with Mr. Perle and the administration is more fundamentally a difference of opinion with the Soviets. They live by secrecy. They regularly attack the disclosure of SCC activities of any kind. The SCC disclosures have and will continue to expose Soviet cheating as well as Soviet proof that the cheating charges may, in some cases, have been mistaken. Adequate SCC reports will also disclose the Soviets changing their policies to stop cheating and comply with the particular arms control treaty under discussion. That, of course, is embarrassing to the Soviets. But it represents an accomplishment of arms control.

Mr. President, I ask unanimous consent that a copy of the article to which I referred from Science magazine by Jeffrey Smith be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

ARMS AGREEMENT BREATHES NEW LIFE INTO SCC

Two months ago, the United States and the Soviet Union signed two little-known but important arms control agreements. One resolved U.S. concerns, dating back to 1973, that the Soviets are secretly practicing to use their air defense radars in a comprehensive shield against ballistic missiles. The other was drafted in hopes of preventing World War III from being ignited by a nuclear explosion caused by terrorists.

The reason that neither of these agreements has been widely publicized is that they were negotiated and signed by a group that deliberately seeks obscurity—a group of nine or so Russians and ten Americans that compose the Standing Consultative Commission (SCC). The group, established under the provisions of the SALT I treaty in 1972, serves as the sole existing forum for the resolution of U.S.-Soviet treaty compliance disputes. As such, it lies at the heart of a growing controversy over a long list of Soviet treaty infractions, such as construction of a new phased-array radar at Abalakova and testing of the SS25 intercontinental ballistic missile (*Science*, 22 March, p. 1442; 12 April, p. 155), as well as a variety of Soviet allegations about illegal U.S. radars and missile defense research.

Critics such as Richard Perle, an assistant secretary of defense, say that the overall negotiating record of the SCC is poor, and charge that it has long outlived its usefulness. But supporters, including a number of former SCC officials, insist that its capabilities have not been fully exploited by the Reagan Administration, and that in any event its effectiveness could be vastly improved by fine-tuning its operation.

Fueling the debate is a general sense that the United States will soon be at an arms control crossroads—a point at which an irrevocable decision could be made either to resolve the major compliance disputes or to abandon diplomacy and retaliate against Soviet infractions by formally abrogating major treaties. Many expected such a decision in June, when President Reagan was scheduled to resolve a long-running dispute among his appointees over continued U.S. adherence to the unratified SALT II treaty. But the decision was instead postponed, and will be taken up either in December, the original SALT II expiration date, or in the spring, when the deployment of a new submarine could push the United States over the treaty's limits.

Informed public debate about the SCC is hampered by the fact that its detailed proceedings as well as the fruit of its negotiations are considered privileged information, available only to select officials in the executive branch, interested congressmen, and a handful of congressional aides with the appropriate security clearance. State Department officials explain that the purpose of this secrecy is to foster uninhibited debate the twice-yearly SCC negotiating sessions, as well as to avert any reluctance by the participants to compromise for fear of public embarrassment.

Many supporters of the SCC say that in practice the veil of secrecy surrounding the panel's activities is often lifted, but in the context of a diplomatic stalemate rather than a successful resolution. Specifically, they note that the Reagan Administration has released three detailed reports listing Soviet treaty infractions that the SCC has failed to resolve (*Science*, 8 March, p. 1180). But the only official U.S. notice of the recent agreement on radars was given in a press release from Geneva, Switzerland, for example. "During this [SCC] session, the parties signed a Common Understanding intended to further enhance the viability of the ABM treaty," the relevant passage states in entirety.

No mention was made of the fact that a loophole in the treaty, which permitted the Soviets to operate certain air defense radars during missile tests from a site at Sary Shagan, has now been closed. (In the future, the radars may not be operated during missile tests unless potentially hostile aircraft are clearly in the vicinity, and their operation must then be fully explained, according to the agreement.) The radar operation had figured prominently in the Administration's most recent report on Soviet treaty compliance, where it was cited as evidence "that the U.S.S.R. may be preparing an ABM defense of its national territory."

A second recent SCC agreement, involving potential nuclear terrorism, has also received little notice. Mentioned only briefly in the official press release, it actually calls for joint preparation of messages on nuclear terrorist acts that would be transmitted on the Hot Line in order to prevent potentially catastrophic U.S.-Soviet misunderstandings. It is classified "Secret," along with seven older SCC agreements on such esoteric matters as the dismantling of ballistic missiles and the use of shelters over missile silos.

Supporters of the SCC acknowledge that its performance has not been sterling in recent years and that even more important disputes remain unresolved. But they blame the Administration for avoiding the forum and undermining its effectiveness. Former SALT negotiator Paul Warnke, for example, is critical of Reagan's past reluctance to make formal, detailed complaints at the SCC about a variety of apparent SALT II infractions as soon as they were detected. He also faults the frequent public criticism of Soviet activities. "It never pays to paint someone into a corner," he says. "Public comments tend to choke off resolutions."

Several high-level State and Defense Department officials, most of whom decline to be identified because of the formal pledge of SCC confidentiality, respond that SALT II issues were indeed raised quickly at the SCC, although they were not earnestly pursued at first because of the Reagan Administration's uncertain commitment to the treaty. They also note that the Administration sought a special SCC session to discuss the illegal Soviet radar at Abalakova as soon as it was detected by reconnaissance satellites in mid-1983, and the Soviets refused. But they also acknowledge that for awhile the Administration was primarily interested in raising such issues outside the SCC—in direct demarchers with senior Soviet officials—so as to avoid the forum's strictures on publicity.

Indeed, some officials still favor this policy. "In my judgment, the SCC has failed to produce results," says Perle. "It is hardly surprising. It is simply a forum where American technicians and Soviet technicians are able to talk to one another. Neither side in my judgment has significant authority to alter the practices of its national authorities, and because there exist no clear incentives to comply, I think it would be unreasonable to expect a forum like the SCC to produce compliance. . . . The assignment of these compliance issues to the SCC for years at a time has in my judgment conveyed to the Soviets the signal that we are not serious about resolving the issues." As evidence of the usefulness of waging a campaign against Soviet treaty violations in public, rather than through the SCC, Perle cites "the affirmative Soviet response" to U.S. complaints about chemical weapons attacks in southeast Asia.

SCC supporters, in contrast, argue that the panel's low rate of success in recent years could be improved if the Administration invested more authority in the U.S. delegation and more energy in the proceedings. Sidney Graybeal, a former U.S. commissioner of the SCC, and Michael Krepon, an expert on treaty compliance at the Carnegie Endowment, argue in a forthcoming issue of International Security, for example, that so-called "back channel" approaches by high-level officials outside the SCC undermine its effectiveness, divert those who have less time and technical expertise than the SCC staff, "and result in a hardening of positions, making ultimate resolution more difficult."

They are also critical of the fact that the SCC commissioner is "nominated by unanimous consent of many different bureaucracies . . . and has no single patron." As a result, according to various officials, the commissioner's instructions are sometimes changed in the middle of negotiations, as one part of the bureaucracy temporarily displaces another as White House favorite. This happened to Richard Ellis, a lawyer and former commander in chief of the Strategic Air Command who serves as the present commissioner, during negotiations on the radar agreement, forcing him to withdraw a demand at one point that the Soviets had already accepted. Graybeal and Krepon recommend that a clear line of authority should be established between the principal SCC commissioner and the President's national security adviser, and that the commissioner's office "should be located with the national security council staff."

Finally, there is an "emerging consensus," as former SALT I legal adviser John Rhinelander puts it, that the fruits of SCC negotiations should be disclosed. "Clearly, the effectiveness of the panel depends of the process remaining secret," he says. "But we must obtain an agreement that the results be made public." Krepon and Graybeal agree. "Popular misconceptions about the role and record of the SCC as well as public concern over unresolved compliance problems have reached the point at which constructive factual reports would be useful." Since Congress has recently been demanding annual reports on Soviet transgressions, it should also be interested in open accounts of those issues that the SCC has resolved.

The major obstacle to such a reform will clearly be resistance by the Soviets. They routinely attack unauthorized U.S. disclosures about SCC proceedings as major treaty violations in and of themselves. "An approach devoid of elementary decency," is the way they described the first Administration compliance report. "This is impermissible and must be stopped." But Mark Lowenthal, a national defense specialist with the Congressional Research Service, suggests that "this is the price the Soviets have to pay for dealing with a democracy."

One Administration official, who is highly critical of Soviet noncompliance yet supportive of the SCC process, argues that no matter what reforms are made, "it is still a technical group, buffeted by politics, with insufficient clout to resolve issues like the radar at Abalakova. Its ability to resolve issues will always be limited in periods of real tension. In the end, it will only be as successful as the overall political relationship." The fact that few agreements have been reached at the SCC over the past 4 years is emblematic of how seriously U.S.-Soviet relations have deteriorated. But the fact that two were signed last month may be cause for hope.

MYTH OF THE DAY: PRESIDENT REAGAN WIELDS THE VETO KNIFE

Mr. PROXMIRE. Mr. President, Ronald Reagan likes to give the impression that he wields the veto knife to kill off what he considers to be bad bills. How about it? Is the President playing Rambo with his veto pen? Or is this a myth pure and simple?

Let's look at the facts. President Gerald R. Ford, during the 93d and 94th Congresses, vetoed a total of 66 bills in only 3 years. How about Jimmy Carter? During the 95th and 96th Congresses, President Carter used his veto power a total of 31 times in 4 years. And President Reagan. About the same pace as President Carter, far behind President Ford. President Reagan has vetoed measures sent to him by the Congress only 39 times during the 97th and 98th Congresses.

Mr. President, President Reagan should match his rhetoric with performance when it comes to exercising the veto power He is considered to be strong in all the polls when it comes to leadership qualities. What better test of leadership could there be than a firm and consistent display of the veto power, especially when it comes to spending measures that are excessive or misconceived?

Ronald Reagan talks a good game when it comes to vetoing bills sent to him by the Congress. Unfortunately, the record shows that he has not, in fact, been a tough wielder of the veto pen. It is high time he began to match promises with performance.

Now would be an especially good time for President Reagan to begin living up to his self-anointed "veto king" label. As the appropriations bills start to reach his desk, Mr. Reagan should put the veto stamp on each and everyone one that exceeds his budget recommendations. Let the veto myth become the economy reality.

THE PERSISTENCE OF DOCTOR CHARLES KREMER

Mr. PROXMIRE. Mr. President, the National Association of Jewish Legislators, in conjunction with the Institute for the Study of Genocide, recently commemorated the installation of Dr. Charles Kremer's archives at John Jay College in Manhattan. This inclusion pays tribute to Dr. Kremer's persistent pursuit of Nazi criminals living in the United States.

The most notorious of these criminals is Valerian Trifa, a leader of the Romanian Iron Guard during World War II. I have spoken about Trifa before and now wish to mention the man responsible for his deportation.

Dr. Charles Kremer remembers well hearing of the destruction of the Bucharest Jewish quarter in February of 1941. Though living in New York, Kremer was very concerned about the welfare of his family back in Romania. Ultimately, he ended up losing 77 family members to the Nazis. Dr. Kremer carefully studied the names of the men responsible for ordering the February massacre, and when 10 years later he came across the name Valerian Trifa, he recognized it immediately.

A three-decade struggle began in 1951 in which Charles Kremer devoted his life to gathering documents, writing letters, and making telephone calls. Charles Kremer tirelessly hounded various Government agencies in his pursuit of justice.

After 20 years and hundreds of letters and calls, Dr. Kremer finally received word of Justice Department action. Proceedings against Trifa began in 1975, and after many appeals and postponements, he finally agreed to leave the United States. Thanks to Dr. Kremer's undying persistence, Trifa was finally deported in 1984.

Charles Kremer is an inspiring individual whose tenacity and devotion have remained steadfast through nearly three decades of frustration. Dr. Kremer embodies the eternal spirit of those affected by the Holocaust, and should serve as an example that it is never too late to pursue what is right.

Mr. President, as Senators know, I have been involved in my own fight to

achieve what is right. I have discussed the merits of the Genocide Convention on every day of every session since 1967. I am inspired by Dr. Charles Kremer and am determined to see the Genocide Treaty brought before this body. After almost 40 years, it is time to take action and outlaw genocide. It is time to end this struggle and do what is right. It is time to ratify the Genocide Convention.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. Under the previous order, there will now be a period for the transaction of routine morning business, not to extend beyond 1 p.m., with statements therein limited to 5 minutes each.

BILLIE SCHNEIDER

Mr. BUMPERS. Mr. President, Arkansas has recently lost one of its treasures with the death of Mrs. Billie Schneider of Fayetteville. She was a key force in Democratic Party circles in northwest Arkansas for many years. She was loved by all who had the privilege to meet and know her. One of her last wishes was that Senator PRYOR give the eulogy at her funeral. I am certain it was the most difficult constituent requests DAVID ever received. I also know he was pleased to do it and most flattered that Billie wanted him to do it. It is one of the most beautiful eulogies I have ever read or heard about a truly unique and remarkable woman and altogether appropriate that it be placed in the RECORD. So, Mr. President, I ask unanimous consent that Senator PRYOR's eulogy be printed in the RECORD.

There being no objection, the eulogy was ordered to be printed in the RECORD, as follows:

EULOGY FOR BILLIE SCHNEIDER

(By David Pryor)

Billie, we hope you can hear us today. You can't fool us. You're sitting up there with that big smile across your face and the big, red flower in your hair.

Now you're laughing because for once you don't have to cook the hot dogs, move the chairs, pass out the cards, or clean up the place.

We know what you told us—no tears, no long faces, no sermons. In fact, if you'd planned this event, it'd be posters, balloons, flags and "Happy Days are Here Again."

Billie, along with Mother, Leroy, Dorris and family, what you'd call your "Ole Gang" are here—people you've known and touched. Every one of us—and they've asked me, of all people, to say a few words.

Today is the celebration of a life of a most remarkable and unselfish human being. To compare her to anyone we've ever known is an exercise in futility. She was Billie. She was "Mamma". We were her "family", and she was ours.

For a stray dog or a homeless cat or a forgotten human, Billie was friend and shelter.

In all of us, she saw the best and forgot the worst. In victory and defeat, her friendship was changeless—and loyalty was fierce.

When we did wrong and knew we'd not done our best, the phone would ring and you'd hear her voice, "Well, I guess you're proud of yourself" (expletives deleted).

Billie refused to accept the idea that any of us were ever any better or worse than the rest. We were all the same—rich, poor, black, white. But we all had a duty—to be intolerant of injustice.

Yes, Billie Schneider loved us all in spite of ourselves—but on even numbered-election years, one might detect a slight preference if you were a yellow dog Democrat!

"I only want one thing on my tombstone," Billie told someone last week, "Yellow Dog Democrat". Billie was a walking, talking, living campaign rally. She cared about politics because she cared about people. At the end of one election, she started getting ready for the next one. If we won, she put us in our place. If we lost, she gave us hope. If we got too serious, she made us laugh at ourselves. If we got too big, she whittled us down. But when we hurt, she nursed our wounds. Old, forgotten or lonely—on Thanksgiving, Billie brought the turkey. Young, down or lost—Billie became a rock. Always there. Always giving. Always a friend.

Each one of us here today has a special memory of Billie, a particular recollection that swells in us.

The truth is, she probably knew all of us better than we know ourselves.

Billie knew exactly when to suggest, advise, listen, nudge, threaten, or frontally assault.

All of us at one time or another became her students. To learn from Billie was to learn from the best. For Billie, it was not so much that each vote counted—it was that every person counted.

No riches. She didn't leave a will. She gave everything to everyone else. No office. No degree. But oh how she knew things. She knew people. The joys and sorrows of life. But above all, there was a nerve ending flow of warmth and compassion that touched us all. Today, we celebrate her life and honor. This beautiful and legendary character who was our best pal.

Can't you imagine her first few days up there? Certainly by now she's accosted Herbert Hoover about causing The Depression.

Surely she's registering people to vote and figuring out some way to vote absentee.

Yes, on election night she'll do like always—find out about the boxes from West Fork, Prairie Grove and Madison County. And if it doesn't come out the way she wants—she'll simply say, "There'll be another day" (expletives deleted).

Some day when Diane Blair or Steve Smith or other political historians write the account of modern day Northwest Arkansas politics, there should be a special section devoted to this special friend, who had ingenious political instincts, we all knew as a legend. Hopefully, it will embody her creed:

1. Go the extra mile;
2. Hard work;
3. Tell it like it is;
4. Be honest; and
5. Fight injustice.

In a few moments, those she carried so many miles will now carry Billie to her final resting place.

It is so fitting that Billie's body will be laid to rest in the Hills of the Ozarks—where she knew and loved every rock, crevice, tree and human being.

Lord, please show kindness to our pal Billie. And in behalf of all her "gang" thank you, Lord, for letting her come our way.

SOME POSITIVE SIGNS ON THE POW-MIA ISSUE

Mr. DOLE. Mr. President, I would like to insert into the RECORD at this time a letter I received from Richard L. Armitage, Assistant Secretary of Defense for International Security Affairs, detailing a U.S. delegation's recent meetings in Hanoi and Vietiane on POW-MIA issues.

I recommend my colleagues read his letter. You will find it both thorough and comprehensive.

Those Americans still missing as a result of the Vietnam conflict, fought in the deep conviction that they were helping to preserve liberty for their families and for their countrymen. They fought with a deep determination to do their duty to their country. And they fought with a valor that reflects the highest ideals of our history.

We owe them something in return. Whatever our other national problems and priorities, we owe them a firm determination to persist in our efforts to get a full accounting for them from the Communist authorities of Southeast Asia. There can be no higher priority in our dealings with those countries. We can talk all we want about national interests, but none is more important than caring for and about our own citizens.

It is my hope, as a result of this delegation's visit, that some progress can now be made. Again, Mr. President, I urge my colleagues to read Secretary Armitage's letter.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

ASSISTANT SECRETARY OF DEFENSE,
Washington, DC, September 25, 1985.

Hon. ROBERT DOLE,
U.S. Senate,
Washington, DC.

DEAR SENATOR: I am writing to provide you with specific information regarding the recent meetings in Hanoi and Vientiane on POW/MIA matters. We accepted the Vietnamese offer to meet in Hanoi in late August. A stop in Vientiane was planned before our arrival in Hanoi to discuss further steps with the Laotian government to resolve the fate of 556 Americans still missing in that country. The results were the most productive yet and have given us cause for optimism that the POW/MIA question has taken on new seriousness in both capitals.

The Hanoi talks took place on August 28 and 29. Because of the absence from Hanoi of Foreign Minister Nguyen Co Thach, Assistant Secretary of State Wolfowitz and I did not participate in them as we had originally anticipated. The delegation which did go was headed by Richard Childress of the National Security Council staff and included Mrs. Ann Griffiths, Executive Director of the League of Families; Lyall Breckon, Director of State Department's Office of Vietnam, Laos and Cambodian Affairs; and Lt.

Col. Paul Mather, the Joint Casualty Resolution Center's liaison officer in Bangkok.

Our delegation met with Vietnam's Acting Foreign Minister Vo Dong Giang. The discussions were businesslike, substantive and free of polemics. The Vietnamese did not raise any non-POW/MIA issues such as normalization of relations or a political settlement in Cambodia. We had previously given the Vietnamese our proposal for achieving the fullest possible resolution of the POW/MIA question in Vietnam in two years, the time period specified when they proposed these talks. They outlined their own plan at the meeting. There were many similarities between the two plans. We agreed to hold frequent technical meetings with them to facilitate the process by increasing significantly the data available to the Vietnamese on specific cases. We expect a technical level meeting to take place later this month.

Acting Foreign Minister Giang stated that the SRV will not ask for compensation, but in difficult cases requiring special equipment, such as powerful cranes or water pumps, the SRV would request this from us and that "voluntary contributions" from the U.S. would be welcome.

We are encouraged by the Vietnamese outline plan, their apparently flexible approach and their commitment to complete the work in two years, though they acknowledged that some cases might remain unresolved and require further work. Although the Vietnamese reiterated that they hold no Americans captive, they indicated that they receive occasional live sighting reports and investigate them, something they pledged to continue to do.

The lack of rhetoric during the visit and the absence of linkage to any other issues suggests we are seeing a government-wide policy decision in Hanoi to attempt to resolve this issue.

In Vientiane, a productive atmosphere similar to that in Hanoi prevailed. The Lao reiterated their agreement to conduct another joint excavation during the upcoming dry season (December-April). They also emphasized their ongoing, unilateral effort and indicated we would be seeing the results of this in 1986. The presence during the talks in Vientiane of a senior Laotian Ministry of Defense official is a promising development in getting greater cooperation from that key ministry.

The Lao also agreed to visit the Joint Casualty Resolution Center and the Central Identification Laboratory in Hawaii September 15-19. I believe that such a visit will add impetus to cooperative efforts with the Lao on the POW/MIA issue.

These steps, along with the previous excavation at Pakse, constitute a pattern of progress that has prompted the Administration to request the removal of Laos from the list of enemy countries concerning developmental aid. It has been emphasized that such a step is separate from an actual aid program and the Lao government understands this.

In short, we are pleased with what has been accomplished and are hopeful that follow-up steps in the near term will continue the momentum.

Sincerely,

RICHARD L. ARMITAGE.

RETIREMENT OF SENATOR MATHIAS

Mr. DOLE. Mr. President, Senator "MAC" MATHIAS' announcement on September 27 that he would not seek reelection in 1986 means that the Senate will lose a unique voice of reason and compassion.

My congressional career and MAC's have paralleled each other's. We both entered the House in 1961, and each of us was elected to the Senate in 1968. During these years, we worked together on many issues—especially those dealing with civil rights, such as the Voting Rights Act. And MAC's commitment to ensuring opportunity and hope to every American has been instrumental in achieving many of the civil rights gains over the past 20 years.

Although MAC will be sincerely missed, I understand his desire to return to private life. And I know we all wish him well in his future endeavors.

On October 2, the Baltimore Sun ran a piece entitled, "Mac Mathias: Not Really Like a Death in the Family," which sums up the way many of us in the Senate feel about MAC.

Mr. President, I ask unanimous consent, that the article be printed in the RECORD.

[From the Baltimore Sun, Oct. 2, 1985]

MAC MATHIAS: NOT REALLY 'LIKE A DEATH IN THE FAMILY'

(By Ernest B. Furgurson)

WASHINGTON.—The first time I focused on the freshman from Frederick was when he stood in the House of Delegates and delivered a quiet homily about Abraham Lincoln on the great man's 150th birthday.

Almost everything Mac Mathias has done since then, in Washington and the world, has reminded me of that moment in Annapolis more than a quarter-century ago.

The simple fact of that little eulogy testified to his quaint, lingering notion that the Republican Party remains the party of Lincoln. It demonstrated his devotion to American history, his acute consciousness that public men today have giants from long before looking over their shoulders.

When he announced the other day that he was retiring from the Senate after next year, the lonely band of Republicans who still consider it Lincoln's party thought ahead about how they would miss him. "This is like a death in the family," said one of them from Maryland.

I thought back over the 26 years and realized his friends had much to be grateful for. It has been a full career, in which Mac Mathias was out in front of his party on the most fundamental issue of our time, civil rights.

Early on, he put himself on what proved to be the right side about Vietnam. He recalls the day when a friend named Daniel Ellsberg "dropped off a large pack of papers, wrapped in brown paper, and said here was some material on the war we ought to read.

"Well, there's never any lack of reading material on the Hill, so we put that on the shelf until we got to it. Some days later the story broke about the Pentagon papers. We looked at each other and wondered out loud what was in that Ellsberg package. Sure enough, there it was, super top-secret stuff.

"I took it immediately to Hugh Scott and Mike Mansfield [GOP and Democratic leaders in the Senate], and we locked it up in the Foreign Relations Committee safe. We had a huge hoopla with [Nixon attorney general] John Mitchell about whose it was. He said it belonged to the executive, but we kept it, saying it had been entrusted to the legislative."

To say that his beliefs did not mesh neatly with Nixon-Mitchell philosophy is a massive understatement. He stood against their flawed nominees to the Supreme Court, as he has stood against some of Mr. Reagan's choices for other offices. He was among the first Republicans to see and say what was wrong in the Watergate episode.

But he believes his most important contribution in the long run may be pushing through the Emergency Powers Act, a major blow for the legislative branch against usurpation of power by the executive. Passed in the aftermath of Watergate, it ended hundreds of official emergencies unilaterally declared by presidents over more than four decades, and set rules for future crises.

When he came to Washington, the Capitol was home to legendary figures. He reveres departed colleagues like John Sherman Cooper, Jacob Javits, Clifford Case, Mike Mansfield, George Aliken, Philip Hart and William Fullbright. And there are those who will revere him when he is gone.

Richard Lugar, chairman of the Foreign Relations Committee, is not his ideological soulmate. But he says he will "deeply regret" Mr. Mathias's departure because of his "friendship, counsel, his enormous experience."

Those are the standard cliches, but Mr. Lugar quickly recalls an instance that gives them flesh.

When his committee was moving the foreign aid bill, Alan Cranston threatened to bring up a south African amendment. "But Mac trumped it with one of his own," the chairman says—"and then he had the good grace to suggest that since he had a 9-8 margin, we could separate it from foreign aid.

"He has a sense of the possible. Not to do that might have killed the foreign aid bill." Mr. Lugar did not have to add that some of the committee's zealots would never have been so accommodating.

Mr. Mathias' agenda is not complete. In his remaining year, he hopes to improve fair housing laws, deal with unitary taxation, open the way for televising Senate proceedings, reform election financing, and (he smiles) get back the $200,000 his home town of Frederick paid as ranson in the Civil War.

In all his reminiscing, he betrays no bitterness over one of the things that helped him decide to retire. It was his right-wing GOP colleagues' shifting about to deny him the chairmanship of the Judiciary Committee. That spot would have been the culmination of his long love affair with the U.S. Constitution.

But they still show no willingness to clear it for him and now his leaving increases the chance that the Democrats will win a Senate majority next year. So instead of Republican liberal Mathias, the mossbacks can deal with Democratic liberal Joe Biden as chairman instead.

The fact of that Lincoln's birthday speech long ago said much about the ideals of the young, slim delegate just beginning his political career. None of us listening then could realize how pertinent its content would be.

"I prefer to think it was not his genius but his principles that raised Lincoln so far above his own day and generation," Mac Mathias said. "And this may be the lesson

of Lincoln—that each of us must live by and for our principles, however they may be shaped by our individual philosophies. Not very one of us can be born a prodigy, but every man and woman in this chamber can live a life true to his or her convictions. . . ."

A REMARKABLE LADY—JODY BALDWIN RETIRES FROM SENATE DUTIES

Mr. HELMS. Mr. President, this week Jody Baldwin, a valuable member of the Republican Policy Committee staff, will retire. She will be missed by all of us who have relied on her expert counsel over the years. Mrs. Baldwin has been a fixture on the Republican side of the aisle for most of the last 25 years. Her service has been truly remarkable.

During her distinguished career, Mrs. Baldwin has served on the personal staff of Senators, and served for 2 years as an official in the old Department of Health, Education, and Welfare. But most of her time has been spent as a legislative analyst on the Republican Policy Committee. It was she who established the practice of providing the legislative notices, so valuable to Republican Members of the Senate.

While carrying a full load in her various duties here, she has managed to be a loving wife and caring mother to her family. She has long been a trusted friend and a totally unselfish worker in the vineyards of the U.S. Senate.

Mr. President, I am pleased that Jody will continue to make available to us her many talents and that her legislative analysis will still be available to us, although now as a private citizen.

I will miss her pleasant presence and her reliable counsel and I wish her every happiness in her retirement.

SOLIDARITY WITH SOVIET JEWRY RALLY

Mr. TRIBLE. Mr. President, last Friday, the Jewish Community Council of Greater Washington held a solidarity with Soviet Jewry rally to condemn the continuing abuses of human rights in the Soviet Union.

The effort to combat the persecution of all believers in the Soviet Union deserves the support of every American. I was privileged to participate in the rally. I ask unanimous consent that my remarks be inserted in the RECORD.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

SOLIDARITY WITH SOVIET JEWRY RALLY, REMARKS OF SENATOR PAUL TRIBLE

We are here today to bear witness to one of the most sustained, systematic, and severe acts of repression in history—the continuing persecution of Jews in the Soviet Union.

To be a Jew in the Soviet Union is to suffer harassment and mistreatment because of your faith.

To be a Jew in the Soviet Union is to be imprisoned within its borders with only faint hope of release.

To be a Jew in the Soviet Union is to be forbidden access to the Torah and the Talmud—the touchstones of your faith.

To be a Jew in the Soviet Union is to be denied the opportunity to teach your children about God's wisdom and his righteousness.

To be a Jew in the Soviet Union is to face each day knowing that it can hold beatings or imprisonment.

To be a Jew in the Soviet Union is to understand that your faith—a faith that has endured for more than 5,700 years—is threatened.

My friends, that harsh reality demands a response from all of us!

Today and in the days ahead, the United States and the Soviet will meet to discuss their differences. There is no difference more profound than the freedom we enjoy and the sustained persecution of Jews by the Soviet Union.

Recently, I wrote to President Reagan urging that the Soviets' oppression of Jews, Christians, and other religious believers be raised at the forthcoming summit meeting. I am encouraged to learn that this will indeed occur.

We must not let our vigilance lapse. The Soviets would like nothing more.

Today's gathering is an encouraging sign that we will remain vigilant. It is a welcome indication of America's belief that the spirit of God and hope can pierce the walls of the Soviet's prisons, and give support to the Jews imprisoned there and in the Soviet Union at large.

You see, my friends, freedom in this world is indivisible. When the freedom of Jews in the Soviet Union is curtailed, our own liberty is diminished. We must pray and work for the day when the storm of repression will pass and the sweet light of freedom will shine in the Soviet Union and around the world.

THE LADY MARION

Mr. WILSON. Mr. President, there is a matter that causes me concern with regard to the Compact of Free Association.

On May 22, 1985, the Federated States of Micronesia [FSM] filed charges in the Supreme Court of the FSM against the tuna fishing vessel "*Lady Marion*, her gear, equipment, engines, cargo, provisions, and supplies; Ralston Purina Co., her owner, and John Doe No. 1, her master or captain," for fishing within its 200-mile Exclusive Economic Zone [EEZ]. In fact, Ralston Purina Co. is not the owner, but the *Lady Marion* does fish for the company.

In filing the charges, the FSM is seeking forfeiture of the vessel and all its gear and cargo, forfeiture of all the fish caught by the vessel and $2 million in civil penalties. The assistant attorney general of FSM also informed Ralston Purina Co. that the government of FSM could seek extradition of the vessel's captain regarding criminal charges. Potentially, total penalties exceed $10 million.

The charges were the result of a sighting by an aircraft chartered by the FSM for fisheries surveillance. On May 18, 1985, the aircraft twice flew closely alongside the tuna fishing vessel *Lady Marion*.

At the time of the sighting, the *Lady Marion's* position was reported to be 0°16′ N. and 154°17′ E., which is a high seas area far from land.

U.S. POSITION

Mr. President, the United States has had a consistent position for many years regarding fishing rights for highly migratory species of fish, specifically tuna. The U.S. position is, and has been, that fishing for such species outside the recognized territorial sea of any nation is a high seas right, and that coastal states lack the competence to assert jurisdiction unilaterally over such species. The FSM has taken a different position.

As a trust territory, the Federated States of Micronesia are subject to U.S. law and U.S. policy. Until such time as the Compact of Free Association is approved by all parties, and the FSM ceases to be a trust territory, U.S. law and policy continue to govern the fishing for tuna in FSM waters.

As a trust territory of the United States, the Federated States of Micronesia had no legal authority to file the illegal fishing charges against the tuna boat *Lady Marion*.

I am aware that extensive communications have taken place between the governments of the FSM and the United States in an attempt by the United States to resolve the matter. However, the FSM is continuing with its legal proceedings.

The obvious concern that arises here is that if the FSM acts in this manner as a trust territory, how will it act as a freely associated state? Reasonably, we might ask if the FSM will abide by its agreement under the compact.

The compact, if enacted, will be mutually beneficial both to the FSM and to the United States. It is in the interest of both parties to conduct themselves in a harmonious and orderly fashion.

In addition, all parties including the U.S. Government, the FSM, and the tuna industry, support establishment of a multilateral regional licensing agreement to govern the fishing for tuna. Under such an agreement, the FSM and other governments in the region would be compensated for the fish harvested in their waters.

In recent years, a multilateral licensing agreement with the FSM and other states in the region has been in existence. This has been a voluntary agreement between the governments of the area and the American Tunaboat Association [ATA]. Millions of

dollars in licensing fees have been paid through these arrangements. More recent attempts by the ATA to renew the agreements, at least on an interim basis, have so far failed. Consequently, establishment of a regional licensing agreement, now being negotiated, becomes all the more important. This agreement will be between the United States and the interested nations of the south and western Pacific.

It is important that the Federated States of Micronesia and the United States move forward into the relationship under the Compact of Free Association without disputes and without tension between the two governments and the two countries.

Accordingly, it is my sincere hope that the government of FSM will drop the charges against the *Lady Marion* and refrain from taking similar actions against other U.S. tuna boats. I would urge all appropriate U.S. agencies to make every effort toward achieving this goal so that this continuing source of aggravation will be removed from the Regional Licensing Agreement negotiations and from the relations between the two countries.

Mr. PROXMIRE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, I have been asked by the distinguished minority leader, Senator BYRD, that we might stand in recess until 2 p.m. because they have an important meeting, and I am perfectly willing to do that.

DEBT LIMIT EXTENSION

Mr. DOLE. Mr. President, I shall include in the RECORD at this point a second letter from Treasury Secretary James A. Baker indicating the necessity of acting very quickly on the debt ceiling extension. He points out that the cash balance will be virtually exhausted by October 7 and the situation will deteriorate sharply thereafter. It is imperative that the Senate act on the debt limit bill by October 7.

Also, as we informed you earlier, as of yesterday we have been unable to comply with the statutory requirements to fully invest several trust funds, thus costing them interest earnings.

There is some indication they could use the Federal Financing Bank because the Federal Financing Bank Act of 1973 might permit them to borrow a certain amount of money if we did not complete action by October 7.

Mr. President, I ask unanimous consent to have printed in the RECORD the letter to which I have referred.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

THE SECRETARY OF THE TREASURY,
Washington, October 1, 1985.

Hon. ROBERT DOLE,
Majority Leader, U.S. Senate, Washington, DC.

DEAR BOB: As I promised in my letter to you of September 25, this letter will update you on our current cash and debt estimates and thus our need for action by the Senate on legislation to increase the public debt limit.

Our current estimates still show that Treasury's cash balance will be virtually exhausted by October 7, and the situation will deteriorate sharply thereafter. Consequently, it is imperative that the Senate act on the debt limit bill by October 7. Also, as we informed you earlier, as of yesterday we have been unable to comply with statutory requirements to fully invest several trust funds, thus costing them interest earnings.

Congressional staff have inquired as to the possibility of having the Federal Financing Bank issue its own securities directly in the market as a means of raising cash while avoiding direct Treasury issues subject to the debt limit. I believe this approach presents two significant problems.

First, the legislative history of the Federal Financing Bank Act of 1973 raises questions as to whether such action would be contrary to the intent of Congress that the FFB not be used to evade the purpose of the debt limit statute. Second, it is clear that an FFB issue in the market would be a very costly means of financing, compared to Treasury borrowing, especially if such an FFB issue were required to be done on short notice without adequate market preparation. Thus a failure to act by October 7 would cost the taxpayers just as our inability to fully invest the trust funds is costing these funds right now. Hence, I believe we should avoid using the Federal Financing Bank borrowing authority for this purpose.

Accordingly, I continue to urge the Senate to act on the debt limit by October 7.

Sincerely,

JAMES A. BAKER III.

Mr. DOLE. Mr. President, with that in mind, we hope to be able to start on the debt limit extension either late today or tomorrow.

We have received from the House of Representatives a temporary extension of certain housing programs and also a 45-day extension of the Superfund Program. I would encourage the House of Representatives to pass the Superfund bill as quickly as possible so a final resolution can be reached on the future of this program. The Senate passed its bill. Maybe they could pass theirs.

We have still not decided on a strategy on the debt ceiling. We would hope there would be a limited number of amendments. It is my hope that maybe amendments on our side will be limited to one and maybe that could be the case on the other side. But again that is up to the individual Members.

But I am convinced now that the Treasury is being realistic when they say October 7 is short of the drop dead date. So we will make an effort to complete action by October 7.

RECESS UNTIL 2 P.M.

Mr. DOLE. Mr. President, I move that the Senate stand in recess until 2 p.m.

The motion was agreed to, and at 12:27 p.m., the Senate took a recess.

The Senate reassembled at 2 p.m., when called to order by the Presiding Officer [Mr. GARN].

ORDER OF PROCEDURE

Mr. DOLE. Mr. President, it is my hope that we will be able to turn to Senate Joint Resolution 77 very soon. It is a matter that should have been completed prior to October 1. There is still some hope we can complete action today. But I will indicate that if we cannot complete action today, it is my intention tomorrow to turn to the debt ceiling and that might take tomorrow and Friday. There will not be a Saturday session, as I have indicated earlier. The Treasury Secretary advised me that October 7 is the critical day; that they would very much like to complete action by that time.

Mr. McCLURE. Will the Senator yield?

Mr. DOLE. I will be happy to yield to the Senator from Idaho.

Mr. McCLURE. I thank the Senator for yielding, and I thank him for notifying Members that we hope to move to the resolution on the compact of free association with Micronesia as soon as possible. The Senator is correct in suggesting that it should have been passed prior to October 1.

For those who may be listening, to illustrate just briefly the reasons for the time-sensitive nature of that question, our Western Pacific test range is based at two ends, one in southern California and the other in Kwajalein, and that agreement has expired October 1. It would be extended by the terms of the compact.

Second, we have claims that are pending for compensation to the natives of Bikini as a result of the nuclear tests conducted by our country, and those claims pending in the Court will be adjudicated if we do not get a settlement. Those claims are settled as a matter of one of the compact terms as negotiated between our Government and the Government of the people of the Marshall Islands.

So I am hopeful that for both of those reasons we will be able to get this compact approved and proceed with the business of trying to negotiate with the other body on the final resolution of the terms of the tax and trade provisions.

Finally, Mr. President, I say to the majority leader that all of this is a matter of some sensitivity in terms of foreign relations and the responsibility that we have under the terms of the trusteeship agreed to by the United Nations many years ago, and whatever we do is subject to the approval of the United Nations. There is some critical need to get that matter to the United Nations so it can be resolved there in a favorable manner.

I hope all Members understand the urgency and the need to get on with this legislation and that there will be no objection to us moving forward.

Mr. DOLE. Mr. President, until I make contact with the distinguished minority leader, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

SCHEDULE

Mr. DOLE. Mr. President, let me indicate again—because there are other Members present and others may be listening in their offices—that I would like to ask unanimous consent that we proceed to the consideration of Calendar No. 257, Senate Joint Resolution 77, the Compact of Free Association measure. The distinguished Senator from Idaho has just indicated how important that legislation is. In fact, we probably should have done it even earlier.

I am not unmindful of amendments that could be offered to that legislation. I know that the distinguished Senator from Utah [Mr. HATCH] has an amendment. I understand that one or both Senators from South Carolina may have an amendment on textile legislation, and I understand that Senator HART has an amendment. The Senator from Oklahoma has one relating to Micronesia.

Mr. BOREN. It refers to political action. It has some reference to Micronesia.

Mr. DOLE. Do they have a PAC?

Mr. BOREN. I do not know.

Mr. DOLE. In any event, I have a feeling that, after some discussion of the textile amendment, there may be efforts to table that amendment or efforts to amend it or discuss it at length.

If that should develop, I would then turn to the consideration of House Joint Resolution 372, the debt limit, either late this afternoon or early tomorrow. The rights of everyone who has an interest will be protected. It is imperative that we take final action on the debt limit extension by sometime Monday, October 7.

Mr. BYRD. Mr. President, we on this side of the aisle are ready to proceed on the debt limit any time the Senator wishes to proceed to it today. We would waive the 3-day rule for the remainder of the day, or tomorrow, whichever the majority leader wishes.

Mr. DOLE. I thank the distinguished minority leader for his cooperation.

I must inform my colleagues that there probably will be a full day on Friday if we are on the debt ceiling, because we need to have an abbreviated day tomorrow in order to accommodate about 15 or 16 Senators who made commitments some time ago. Those commitments will begin about 3 p.m. tomorrow.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. MATTINGLY). The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BUMPERS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE DEBT LIMIT MEASURE

Mr. BUMPERS. Mr. President, I will only speak for 2 or 3 minutes and will be happy to yield the floor when the majority leader is ready to bring up the Compact of Free Association.

As we all know, there are at least two or three proposals being circulated which deal with the national debt and the deficits for the coming years. One or more of these proposals apparently are going to be offered as amendments to the debt ceiling bill. It seems to me that we have a great opportunity to do something very dramatic on the debt and deficits which would reassure the people of this country that Congress is prepared to take a leadership role in reducing these deficits in a sensible and dramatic way.

I hope we are not rushing to judgment on these proposals. These are very dramatic proposals that are about to be offered here, raising important issues about the budget process and congressional powers. We should all be devoting a good part of our time studying the proposal that Senator GRAMM and Senator HOLLINGS are going to make and the proposal that Senator CHILES and Senator BYRD are going to make.

They each have much to be said for them. They each have some provisions that trouble me considerably. I am not going to get into the substance of those proposals now. I would suspect that many Members are going to vote for one or both of those proposals.

But there is one thing that I just want to point out to my colleagues which I think they should bear in mind as we debate these proposals, and it deals with the status of education in this country.

I made a speech about 3 weeks ago to a group of educators and did some research on the status of education in this country, I uncovered some really alarming statistics. Thomas Jefferson would unequivocably be whirling in his grave if he heard them.

First, about 45 percent of the youngsters who start in the first grade in this country do not finish high school. In my State that figure is almost 50 percent.

Second, we have roughly 165 million adults in this country, over the age of 21; 20 million of that 165 million are functionally illiterate.

There are definitions in this country that are used to define illiteracy. One is that the person either does not read at all or he reads with great difficulty.

A second definition is that the person is not capable of making such simple transactions as a bank deposit. The person is incapable of writing a check and keeping up with their balances in the bank.

Then there are, in addition to the 20 million people in this category, 25 million more adults in the country who are defined or described as marginally illiterate. That is a separate definition that is just slightly higher than illiteracy.

In this second category, for example, are people who are not able to look at an 8-ounce package on a grocery shelf and a 12-ounce package and determine which is the better buy on a pure quantitative basis.

I recommend to all of you that you look at some of these statistics and these definitions for illiteracy and marginal literacy.

Here is what I really want to say; one of the reasons I hope that we can fully debate these budget proposals in the next 2 or 3 days is that I know some people will say you cannot exempt anything from the spending cuts. But I am hoping that we will be able to exempt funds in the budget for education because we are the only developed nation on Earth where the illiteracy rate is on the increase. It is a staggering indictment of a nation that prides itself on being the strongest militarily and the strongest economically and that is allowing its illiteracy rate to go up almost at an exponential rate. This is more than benign neglect. Here is the final statistic that I want to bring to your attention. It was given to me by Senator SIMON, who probably knows more about education than anyone else in this body. There are 158 nations on Earth and we are 49th in literacy.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. McCLURE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMPACT OF FREE ASSOCIATION

Mr. McCLURE. Mr. President, I ask unanimous consent that the Senate now turn to the consideration of Calendar Order No. 257, Senate Joint Resolution 77, the compact of free association.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

A joint resolution (S.J. Res. 77) to approve the "compact of free association," and for other purposes.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Idaho?

There being no objection, the Senate proceeded to consider the joint resolution, which had been reported from the Committee on Energy and Natural Resources, with amendments, as follows:

(The parts of the bill intended to be stricken are shown in boldface brackets, and the parts of the bill intended to be inserted are shown in italics.)

Whereas the United States is the administering authority of the Trust Territory of the Pacific Islands under the terms of the Trusteeship Agreement for the former Japanese Mandated Islands entered into by the United States with the Security Council of the United Nations on April 2, 1947, and approved by the United States on July 18, 1947; and

Whereas the United States, in accordance with the Trusteeship Agreement, the Charter of the United Nations and the objectives of the international trusteeship system, has promoted the development of the peoples of the Trust Territory toward self-government or independence as appropriate to the particular circumstances of the Trust Territory and its peoples and the freely expressed wishes of the peoples concerned; and

Whereas the United States, in response to the desires of the peoples of the Federated States of Micronesia and the Marshall Islands expressed through their freely-elected representatives and by the official pronouncements and enactments of their lawfully constituted governments, and in consideration of its own obligations under the Trusteeship Agreement to promote self-determination, entered into political status negotiations with representatives of the peoples of the Federated States of Micronesia, and the Marshall Islands; and

Whereas these negotiations resulted in the "Compact of Free Association" which, together with its related agreements, was signed by the United States and by the Federated States of Micronesia and the Republic of the Marshall Islands on October 1, 1982 and June 25, 1983, respectively; and

Whereas the Compact of Free Association was approved by majorities of the peoples of the Federated States of Micronesia and the Marshall Islands in United Nations-observed plebiscites conducted on June 21, 1983 and September 7, 1983, respectively; and

Whereas the Compact of Free Association has been approved by the Governments of the Federated States of Micronesia and the Marshall Islands in accordance with their respective constitutional processes, thus completing fully for the Federated States of Micronesia and the Marshall Islands their domestic approval processes with respect to the Compact as contemplated in Compact Section 411: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the Compact of Free Association, the text of which follows, is hereby approved and the President is authorized to agree to an effective date for and thereafter to implement the Compact of Free [Association, having] *Association, subject to the provisions of section 4, having* taken into account any procedures with respect to the United Nations for termination of the Trusteeship Agreement:

COMPACT OF FREE ASSOCIATION

PREAMBLE

THE GOVERNMENT OF THE UNITED STATES OF AMERICA AND THE GOVERNMENTS OF THE MARSHALL ISLANDS AND THE FEDERATED STATES OF MICRONESIA

Affirming that their Governments and their relationships as Governments are founded upon respect for human rights and fundamental freedoms for all, and that the peoples of the Trust Territory of the Pacific Islands have the right to enjoy self-government; and

Affirming the common interests of the United States of America and the peoples of the Trust Territory of the Pacific Islands in creating close and mutually beneficial relationships through two free and voluntary associations of their respective Governments; and

Affirming the interest of the Government of the United States in promoting the economic advancement and self-sufficiency of the peoples of the Trust Territory of the Pacific Islands; and

Recognizing that their previous relationship has been based upon the International Trusteeship System of the United Nations Charter, and in particular Article 76 of the Charter; and that pursuant to Article 76 of the Charter, the peoples of the Trust Territory have progressively developed their institutions of self-government, and that in the exercise of their sovereign right to self-determination they have, through their freely-expressed wishes, adopted Constitutions appropriate to their particular circumstances; and

Recognizing their common desire to terminate the Trusteeship and establish two new government-to-government relationships each of which is in accordance with a new political status based on the freely-expressed wishes of peoples of the Trust Territory of the Pacific Islands and appropriate to their particular circumstances; and

Recognizing that the peoples of the Trust Territory of the Pacific Islands have and retain their sovereignty and their sovereign right to self-determination and the inherent right to adopt and amend their own Constitutions and forms of government and that the approval of the entry of their respective Governments into this Compact of Free Association by the peoples of the Trust Territory of the Pacific Islands constitutes an exercise of their sovereign right to self-determination;

NOW, THEREFORE, AGREE to enter into relationships of free association which provide a full measure of self-government for the peoples of the Marshall Islands and the Federated States of Micronesia; and

FURTHER AGREE that the relationships of free association derive from and are as set forth in this Compact; and that, during such relationships of free association, the respective rights and responsibilities of the Government of the United States and the Governments of the freely associated states of the Marshall Islands and the Federated States of Micronesia in regard to these relationships of free association derive from and are as set forth in this Compact.

TITLE ONE

GOVERNMENTAL RELATIONS

Article I

Self-Government

Section 111

The peoples of the Marshall Islands and the Federated States of Micronesia, acting through the Governments established under their respective Constitutions, are self-governing.

Article II

Foreign Affairs

Section 121

(a) The Governments of the Marshall Islands and the Federated States of Micronesia have the capacity to conduct foreign affairs and shall do so in their own name and right, except as otherwise provided in this Compact.

(b) The foreign affairs capacity of the Governments of the Marshall Islands and the Federated States of Micronesia includes:

(1) the conduct of foreign affairs relating to law of the sea and marine resources matters, including the harvesting, conservation, exploration or exploitation of living and non-living resources from the sea, seabed or subsoil to the full extent recognized under international law;

(2) the conduct of their commercial, diplomatic, consular, economic, trade, banking, postal, civil aviation, communications, and cultural relations, including negotiations for the receipt of developmental loans and grants and the conclusion of arrangements with other governments and international and intergovernmental organizations, including any matters specially benefiting their individual citizens.

(c) The Government of the United States recognizes that the Governments of the Marshall Islands and the Federated States of Micronesia have the capacity to enter into, in their own name and right, treaties and other international agreements with governments and regional and international organizations.

(d) In the conduct of their foreign affairs, the Governments of the Marshall Islands and the Federated States of Micronesia confirm that they shall act in accordance with principles of international law and shall settle their international disputes by peaceful means.

Section 122

The Government of the United States shall support applications by the Governments of the Marshall Islands and the Federated States of Micronesia for membership or other participation in regional or interna-

tional organizations as may be mutually agreed. The Government of the United States agrees to accept for training and instruction at the Foreign Service Institute, established under 22 U.S.C. 4021, citizens of the Marshall Islands and the Federated States of Micronesia. The qualifications of candidates for such training and instruction and all other terms and conditions of participation by citizens of the Marshall Islands and the Federated States of Micronesia in Foreign Service Institute programs shall be as mutually agreed between the Government of the United States and the Governments of the Marshall Islands and the Federated States of Micronesia.

Section 123

(a) In recognition of the authority and responsibility of the Government of the United States under Title Three, the Governments of the Marshall Islands and the Federated States of Micronesia shall consult, in the conduct of their foreign affairs, with the Government of the United States.

(b) In recognition of the respective foreign affairs capacities of the Governments of the Marshall Islands and the Federated States of Micronesia, the Government of the United States, in the conduct of its foreign affairs, shall consult with the Government of the Marshall Islands or the Federated States of Micronesia on matters which the Government of the United States regards as relating to or affecting any such Government.

Section 124

The Government of the United States may assist or act on behalf of the Government of the Marshall Islands or the Federated States of Micronesia in the area of foreign affairs as may be requested and mutually agreed from time to time. The Government of the United States shall not be responsible to third parties for the actions of the Government of the Marshall Islands or the Federated States of Micronesia undertaken with the assistance or through the agency of the Government of the United States pursuant to this Section unless expressly agreed.

Section 125

The Government of the United States shall not be responsible for nor obligated by any actions taken by the Government of the Marshall Islands or the Federated States of Micronesia in the area of foreign affairs, except as may from time to time be expressly agreed.

Section 126

At the request of the Government of the Marshall Islands or the Federated States of Micronesia and subject to the consent of the receiving state, the Government of the United States shall extend consular assistance on the same basis as for citizens of the United States to citizens of the Marshall Islands and the Federated States of Micronesia for travel outside the Marshall Islands and the Federated States of Micronesia, the United States and its territories and possessions.

Section 127

Except as otherwise provided in this Compact or its related agreements, all obligations, responsibilities, rights and benefits of the Government of the United States as Administering Authority which have resulted from the application pursuant to the Trusteeship Agreement of any treaty or other international agreement to the Trust Territory of the Pacific Islands on the day preceding the effective date of this Compact are no longer assumed and enjoyed by the Government of the United States.

Article III

Communications

Section 131

(a) The Governments of the Marshall Islands and the Federated States of Micronesia have full authority and responsibility to regulate their respective domestic and foreign communications, and the Government of the United States shall provide communications assistance in accordance with the terms of a separate agreemcnt which shall come into effect simultaneously with this Compact, and such agreement shall remain in effect until such time as any election is made pursuant to Section 131(b) and which shall provide for the following:

(1) the Government of the United States remains the sole administration entitled to make notification to the International Frequency Registration Board of the International Telecommunications Union of frequency assignments to radio communications stations respectively in the Marshall Islands and the Federated States of Micronesia; and to submit to the International Frequency Registration Board seasonal schedules for the broadcasting stations respectively in the Marshall Islands and the Federated States of Micronesia in the bands allocated exclusively to the broadcasting service between 5,950 and 26,100 kHz and in any other additional frequency bands that may be allocated to use by high frequency broadcasting stations; and

(2) the United States Federal Communications Commission has jurisdiction, pursuant to the Communications Act of 1934, 47 U.S.C. 151 *et seq.*, and the Communications Satellite Act of 1962, 47 U.S.C. 721 *et seq.*, over all domestic and foreign communications services furnished by means of satellite earth terminal stations where such stations are owned or operated by United States common carriers and are located in the Marshall Islands or the Federated States of Micronesia.

(b) The Government of the Marshall Islands or the Federated States of Micronesia may elect at any time to undertake the functions enumerated in Section 131(a) and previously performed by the Government of the United States. Upon such election, the Government of the United States shall so notify the International Frequency Registration Board and shall take such other actions as may be necessary to transfer to the electing Government the notification authority referred to in Section 131(a) and all rights deriving from the previous exercise of any such notification authority by the Government of the United States.

Section 132

The Governments of the Marshall Islands and the Federated States of Micronesia shall permit the Government of the United States to operate telecommunications services in the Marshall Islands and the Federated States of Micronesia to the extent necessary to fulfill the obligations of the Government of the United States under this Compact in accordance with the terms of separate agreements which shall come into effect simultaneously with this Compact.

ARTICLE IV

Immigration

Section 141

(a) Any person in the following categories may enter into, lawfully engage in occupations, and establish residence as a nonimmigrant in the United States and its territories and possessions without regard to paragraphs (14), (20), and (26) of section 212(a) of the Immigration and Nationality Act, 8 U.S.C. 1182(a) (14), (20), and (26):

(1) a person who, on the day preceding the effective date of this Compact, is a citizen of the Trust Territory of the Pacific Islands, as defined in Title 53 of the Trust Territory Code in force on Janaury 1, 1979, and has become a citizen of the Marshall Islands or the Federated States of Micronesia.

(2) a person who acquires the citizenship of the Marshall Islands or the Federated States of Micronesia at birth, on or after the effective date of the respective Constitution;

(3) a naturalized citizen of the Marshall Islands or the Federated States of Micronesia who has been an actual resident there for not less than five years after attaining such naturalization and who holds a certificate of actual residence; or

(4) a person entitled to citizenship in the Marshall Islands by lineal descent whose name is included in a list to be furnished by the Government of the Marshall Islands to the United States Immigration and Naturalization Service and any descendants of such persons, provided that such person holds a certificate of lineal descent issued by the Government of the Marshall Islands.

Such persons shall be considered to have the permission of the Attorney General of the United States to accept employment in the United States.

(b) The right of such persons to establish habitual residence in a territory or possession of the United States may, however, be subjected to non-discriminatory limitations provided for:

(1) in statutes or regulations of the United States; or

(2) in those statutes or regulations of the territory or possession concerned which are authorized by the laws of the United States.

(c) Section 141(a) does not confer on a citizen of the Marshall Islands or the Federated States of Micronesia the right to establish the residence necessary for naturalization under the Immigration and Nationality Act, or to petition for benefits for alien relatives under that Act. Section 141(a), however, shall not prevent a citizen of the Marshall Islands or the Federated States of Micronesia from otherwise acquiring such rights or lawful permanent resident alien status in the United States.

Section 142

(a) Any citizen or national of the United States may enter into, lawfully engage in occupations, and reside in the Marshall Islands or the Federated States of Micronesia, subject to the rights of those Governments to deny entry to or deport any such citizen or national as an undesirable alien. A citizen or national of the United States may establish habitual residence or domicile in the Marshall Islands or the Federated States of Micronesia only in accordance with the laws of the jurisdiction in which habitual residence or domicile is sought.

(b) With respect to the subject matter of this Section, the Government of the Marshall Islands or the Federated States of Micronesia shall accord to citizens and nationals of the United States treatment no less favorable than that accorded to citizens of other countries; any denial of entry to or deportation of a citizen or national of the United States as an undesirable alien must be pursuant to reasonable statutory grounds.

Section 143

(a) The privileges set forth in Sections 141 and 142 shall not apply to any person who takes an affirmative step to preserve or acquire a citizenship or nationality other than that of the Marshall Islands, the Federated States of Micronesia or the United States.

(b) Every person having the privileges set forth in Sections 141 and 142 who possesses a citizenship or nationality other than that of the Marshall Islands, the Federated States of Micronesia or the United States ceases to have these privileges two years after the effective date of this Compact, or within six months after becoming 21 years of age, whichever comes later, unless such person executes an oath of renunciation of that other citizenship or nationality.

Section 144

(a) A citizen or national of the United States who, after notification to the Government of the United States of an intention to employ such person by the Government of the Marshall Islands or the Federated States of Micronesia, commences employment with such Government shall not be deprived of his United States nationality pursuant to Section 349(a)(2) and (a)(4) of the Immigration and Nationality Act, 8 U.S.C. 1481 (a)(2) and (a)(4).

(b) Upon such notification by the Government of the Marshall Islands or the Federated States of Micronesia, the Government of the United States may consult with or provide information to the notifying Government concerning the prospective employee, subject to the provisions of the Privacy Act, 5 U.S.C. 552a.

(c) The requirement of prior notification shall not apply to those citizens or nationals of the United States who are employed by the Government of the Marshall Islands or the Federated States of Micronesia on the effective date of this Compact with respect to the positions held by them at that time.

Article V

Representation

Section 151

The Government of the United States and the Government of the Marshall Islands or the Federated States of Micronesia may establish and maintain representative offices in the capital of the other for the purpose of maintaining close and regular consultations on matters arising in the course of the relationship of free association and conducting other government business. The Governments may establish and maintain additional offices on terms and in locations as may be mutually agreed.

Section 152

(a) The premises of such representative offices, and their archives wherever located, shall be inviolable. The property and assets of such representative offices shall be immune from search, requisition, attachment and any form of seizure unless such immunity is expressly waived. Official communications in transit shall be inviolable and accorded the freedom and protections accorded by recognized principles of international law to official communications of a diplomatic mission.

(b) persons designated by the sending Government may serve in the capacity of its resident representatives with the consent of the receiving Government. Such designated persons shall be immune from civil and criminal process relating to words spoken or written and all acts performed by them in their official capacity and falling within their functions as such representatives, except insofar as such immunity may be expressly waived by the sending Government. While serving in a resident representative capacity, such designated persons shall not be liable to arrest or detention pending trial, except in the case of a grave crime and pursuant to a decision by a competent judicial authority, and such persons shall enjoy immunity from seizure of personal property, immigration restrictions, and laws relating to alien registration, fingerprinting, and the registration of foreign agents.

(c) The sending Governments and their respective assets, income and other property shall be exempt from all direct taxes, except those direct taxes representing payment for specific goods and services, and shall be exempt from all customs duties and restrictions on the import or export of articles required for the official functions and personal use of their representatives and representative offices.

(d) Persons designated by the sending Government to serve in the capacity of its resident representatives shall enjoy the same taxation exemptions as are set forth in Article 34 of the Vienna Convention on Diplomatic Relations.

(e) The privileges, exemptions and immunities accorded under this Section are not for the personal benefit of the individuals concerned but are to safeguard the independent exercise of their official functions. Without prejudice to those privileges, exemptions and immunities, it is the duty of all such persons to respect the laws and regulations of the Government to which they are assigned.

Section 153

(a) Any citizen or national of the United States who, after consultation between the designating Government and the Government of the United States, is designated by the Government of the Marshall Islands or the Federated States of Micronesia as its agent, shall enjoy exemption from the requirements of the laws of the United States relating to the registration of foreign agents. The Government of the United States shall promptly comply with a request for consultation made by the prospective designating Government. During the course of the consultation, the Government of the United States may, in its discretion, and subject to the provisions of the Privacy Act, 5 U.S.C. 552a, transmit such information concerning the prospective designee as may be available to it to the prospective designating Government.

(b) Any citizen or national of the United States may be employed by the Government of the Marshall Islands or the Federated States of Micronesia to represent to foreign governments, officers or agents thereof the positions of the Government of the Marshall Islands or the Federated States of Micronesia, without regard to the provisions of 18 U.S.C. 953.

Article VI

Environmental Protection

Section 161

The Governments of the United States, the Marshall Islands and the Federated States of Micronesia declare that it is their policy to promote efforts to prevent or eliminate damage to the environment and biosphere and to enrich understanding of the natural resources of the Marshall Islands and the Federated States of Micronesia. In order to carry out this policy, the Government of the United States and the Governments of the Marshall Islands and the Federated States of Micronesia agree to the following mutual and reciprocal undertakings.

(a) The Government of the United States:

(1) shall continue to apply the environmental controls in effect on the day preceding the effective date of this Compact to those of its continuing activities subject to Section 161(a)(2), unless and until those controls are modified under Sections 161(a)(3) and 161(a)(4);

(2) shall apply the National Environmental Policy Act of 1969, 83 Stat. 852, 42 U.S.C. 4321 *et seq.*, to its activities under the Compact and its related agreements as if the Marshall Islands and the Federated States of Micronesia were the United States;

(3) shall comply also, in the conduct of any activity requiring the preparation of an Environmental Impact Statement under Section 161(a)(2), with standards substantively similar to those required by the following laws of the United States, taking into account the particular environments of the Marshall Islands and the Federated States of Micronesia: the Endangered Species Act of 1973, 87 Stat. 884, 16 U.S.C. 1531 *et seq.*; the Clean Air Act, 77 Stat. 392, 42 U.S.C. Supp. 7401 *et seq.*; the Clean Water Act (Federal Water Pollution Control Act), 86 Stat. 896, 33 U.S.C. 1251 *et seq.*; the Ocean Dumping Act (Title I of the Marine Protection, Research and Sanctuaries Act of 1972), 86 Stat. 1053, 33 U.S.C. 1411 *et seq.*; the Toxic Substances Control Act, 90 Stat. 2003, 15 U.S.C. 2601 *et seq.*; the Resources Conservation and Recovery Act of 1976, 90 Stat. 2796, 42 U.S.C. 6901 *et seq.*; and such other environmental protection laws of the United States as may be mutually agreed from time to time with the Government of the Marshall Islands or the Federated States of Micronesia; and

(4) shall develop, prior to conducting any activity requiring the preparation of an Environmental Impact Statement under Section 161(a)(2), appropriate mechanisms, including regulations or other judicially reviewable standards and procedures, to regulate its activities governed by Section 161(a)(3) in the Marshall Islands and the Federated States of Micronesia in a manner appropriate to the special governmental relationship set forth in this Compact. The agencies of the Government of the United States designated by law to administer the laws set forth in Section 161(a)(3) shall participate as appropriate in the development of any regulation, standard or procedure under this Section, and the Government of the United States shall provide the affected Government of the Marshall Islands or the Federated States of Micronesia with the opportunity to comment during such development.

(b) The Governments of the Marshall Islands and the Federated States of Micronesia shall develop standards and procedures to protect their environments. As a reciprocal obligation to the undertakings of the Government of the United States under this Article, the Governments of the Marshall Islands and the Federated States of Micronesia, taking into account their particular environments, shall develop standards for environmental protection substantively similar to those required of the Government of the United States by Section 161(a)(3) prior to their conducting activities in the Marshall Islands and the Federated States of Micronesia, respectively, substantively equivalent to activities conducted there by the Government of the United States and, as a further reciprocal obligation, shall enforce those standards.

(c) Section 161(a), including any standard or procedure applicable thereunder, and Section 161(b) may be modified or superseded in whole or in part by agreement of the Government of the United States and the Government of the Marshall Islands or the Federated States of Micronesia.

(d) In the event that an Environmental Impact Statement is no longer required under the laws of the United States for major federal actions significantly affecting the quality of the human environment, the regulatory regime established under Sections 161(a)(3) and 161(a)(4) shall continue to apply to such activities of the Government of the United States until amended by mutual agreement.

(e) The President of the United States may exempt any of the activities of the Government of the United States under this Compact and its related agreements from any environmental standard or procedure which may be applicable under Sections 161(a)(3) and 161(a)(4) if the President determines it to be in the paramount interest of the Government of the United States to do so, consistent with Title Three of this Compact and the obligations of the Government of the United States under international law. Prior to any decision pursuant to this subsection, the views of the affected Government of the Marshall Islands or the Federated States of Micronesia shall be sought and considered to the extent practicable. If the President grants such an exemption, to the extent practicable, a report with his reasons for granting such exemption shall be given promptly to the affected Government.

(f) The laws of the United States referred to in Section 161(a)(3) shall apply to the activities of the Government of the United States under this Compact and its related agreements only to the extent provided for in this Section.

Section 162

The Government of the Marshall Islands or the Federated States of Micronesia may bring an action for judicial review of any administrative agency action or any activity of the Government of the United States pursuant to Sections 161(a), 161(d) or 161(e) or for enforcement of the obligations of the Government of the United States arising thereunder. The United States District Court for the District of Hawaii and the United States District Court for the District of Columbia shall have jurisdiction over such action or activity, and over actions brought under Section 172(b) which relate to the activities of the Government of the United States and its officers and employees, governed by Section 161, provided that:

(a) Such actions may only be civil actions for any appropriate civil relief other than punitive damages against the Government of the United States or, where required by law, its officers in their official capacity; no criminal actions may arise under this Section;

(b) Actions brought pursuant to this Section may be initiated only by the Government concerned;

(c) Administrative agency actions arising under Section 161 shall be reviewed pursuant to the standard of judicial review set forth in 5 U.S.C. 706;

(d) The District Court shall have jurisdiction to issue all necessary processes, and the Government of the United States agrees to submit itself to the jurisdiction of the court; decisions of the District Court shall be reviewable in the United States Court of Appeals for the Ninth Circuit or the United States Court of Appeals for the District of Columbia, respectively, or in the United States Supreme Court as provided by the laws of the United States;

(e) The judicial remedy provided for in this Section shall be the exclusive remedy for the judicial review or enforcement of the obligations of the Government of the United States under this Article and actions brought under Section 172(b) which relate to the activities of the Government of the United States and its officers and employees governed by Section 161; and

(f) In actions pursuant to this Section, the Governments of the Marshall Islands and the Federated States of Micronesia shall be treated as if they were United States citizens.

Section 163

(a) For the purpose of gathering data necessary to study the environmental effects of activities of the Government of the United States subject to the requirements of this Article, the Governments of the Marshall Islands and the Federated States of Micronesia shall be granted access to facilities operated by the Government of the United States in the Marshall Islands and the Federated States of Micronesia, to the extent necessary for this purpose, except to the extent such access would unreasonably interfere with the exercise of the authority and responsibility of the Government of the United States under Title Three.

(b) The Government of the United States, in turn, shall be granted access to the Marshall Islands or the Federated States of Micronesia for the purpose of gathering data necessary to discharge its obligations under this Article, except to the extent such access would unreasonably interfere with the exercise of the authority and responsibility of the Government of the Marshall Islands or the Federated States of Micronesia under Title One, and to the extent necessary for this purpose shall be granted access to documents and other information to the same extent similar access is provided those Governments under the Freedom of Information Act, 5 U.S.C. 552.

(c) The Governments of the Marshall Islands and the Federated States of Micronesia shall not impede efforts by the Government of the United States to comply with applicable standards and procedures.

Article VII

General Legal Provisions

Section 171

Except as provided in this Compact or its related agreements, the application of the laws of the United States to the Trust Territory of the Pacific Islands by virtue of the Trusteeship Agreement ceases with respect to the Marshall Islands and the Federated States of Micronesia as of the effective date of this Compact.

Section 172

(a) Every citizen of the Marshall Islands or the Federated States of Micronesia who is not a resident of the United States shall enjoy the rights and remedies under the laws of the United States enjoyed by any non-resident alien.

(b) The Governments of the Marshall Islands and the Federated States of Micronesia and every citizen of the Marshall Islands or the Federated States of Micronesia shall be considered a "person" within the meaning of the Freedom of Information Act, 5 U.S.C. 552, and of the judicial review provisions of the Administrative Procedure Act, 5 U.S.C. 701-706, except that only the Government of the Marshall Islands or the Federated States of Micronesia may seek judicial review under the Administrative Procedure Act or judicial enforcement under the Freedom of Information Act when such judicial review or enforcement relates to the activities of the Government of the United States governed by Sections 161 and 162.

Section 173

The Governments of the United States, the Marshall Islands and the Federated States of Micronesia agree to adopt and enforce such measures, consistent with this Compact and its related agreements, as may be necessary to protect the personnel, property, installations, services, programs and official archives and documents maintained by the Government of the United States in the Marshall Islands and the Federated States of Micronesia pursuant to this Compact and its related agreements and by those Governments in the United States pursuant to this Compact and its related agreements.

Section 174

Except as otherwise provided in this Compact and its related agreements:

(a) The Governments of the Marshall Islands and the Federated States of Micronesia shall be immune from the jurisdiction of the courts of the United States, and the Government of the United States shall be immune from the jurisdiction of the courts of the Marshall Islands and the Federated States of Micronesia.

(b) The Government of the United States accepts responsibility for and shall pay:

(1) any unpaid money judgment rendered by the High Court of the Trust Territory of the Pacific Islands against the Government of the Trust Territory of the Pacific Islands or the Government of the United States with regard to any cause of action arising as a result of acts or omissions of the Government of the Trust Territory of the Pacific Islands or the Government of the United States prior to the effective date of this Compact;

(2) any claim settled by the claimant and the Government of the Trust Territory of the Pacific Islands but not paid as of the effective date of this Compact; and

(3) settlement of any administrative claim or of any action before a court of the Trust Territory of the Pacific Islands, pending as of the effective date of this Compact, against the Government of the Trust Territory of the Pacific Islands or the Government of the United States, arising as a result of acts or omissions of the Government of the Trust Territory of the Pacific Islands or the Government of the United States.

(c) Any claim not referred to in Section 174(b) and arising from an act or omission of the Government of the Trust Territory of the Pacific Islands or the Government of the United States prior to the effective date of this Compact shall be adjudicated in the same manner as a claim adjudicated according to Section 174(d). In any claim against the Government of the Trust Territory of the Pacific Islands, the Government of the United States shall stand in the place of the Government of the Trust Territory of the Pacific Islands. A judgment on any claim referred to in Section 174(b) or this subsection, not otherwise satisfied by the Government of the United States, may be presented for certification to the United States Court of Appeals for the Federal Circuit, or its successor court, which shall have jurisdiction therefor, notwithstanding the provi-

sions of 28 U.S.C. 1502, and which court's decisions shall be reviewable as provided by the laws of the United States. The United States Court of Appeals for the Federal Circuit shall certify such judgment, and order payment thereof, unless it finds, after a hearing, that such judgment is manifestly erroneous as to law or fact, or manifestly excessive. In either of such cases the United States Court of Appeals for the Federal Circuit shall have jurisdiction to modify such judgment.

(d) The Governments of the Marshall Islands and the Federated States of Micronesia shall not be immune from the jurisdiction of the courts of the United States, and the Government of the United States shall not be immune from the jurisdiction of the courts of the Marshall Islands and the Federated States of Micronesia in any case in which the action is based on a commercial activity of the defendant Government where the action is brought, or in a case in which damages are sought for personal injury or death or damage to or loss of property occurring where the action is brought.

Section 175

A separate agreement, which shall come into effect simultaneously with this Compact, shall be concluded between the Government of the United States and the Governments of the Marshall Islands and the Federated States of Micronesia regarding mutual assistance and cooperation in law enforcement matters including the pursuit, capture, imprisonment and extradition of fugitives from justice and the transfer of prisoners. The separate agreement shall have the force of law. In the United States, the laws of the United States governing international extradition, including 18 U.S.C. 3184, 3186 and 3188–3195, shall be applicable to the extradition of fugitives under the separate agreement, and the laws of the United States governing the transfer of prisoners, including 18 U.S.C. 4100–4115, shall be applicable to the transfer of prisoners under the separate agreement.

Section 176

The Governments of the Marshall Islands and the Federated States of Micronesia confirm that final judgments in civil cases rendered by any court of the Trust Territory of the Pacific Islands shall continue in full force and effect, subject to the constitutional power of the courts of the Marshall Islands and the Federated States of Micronesia to grant relief from judgments in appropriate cases.

Section 177

(a) The Government of the United States accepts the responsibility for compensation owing to citizens of the Marshall Islands, or the Federated States of Micronesia (or Palau) for loss or damage to property and person of the citizens of the Marshall Islands, or the Federated States of Micronesia or resulting from the nuclear testing program which the Government of the United States conducted in the Northern Marshall Islands between June 30, 1946, and August 18, 1958.

(b) The Government of the United States and the Government of the Marshall Islands shall set forth in a separate agreement provisions for the just and adequate settlement of all such claims which have arisen in regard to the Marshall Islands and its citizens and which have not as yet been compensated or which in the future may arise, for the continued administration by the Government of the United States of direct radiation related medical surveillance and treatment programs and radiological monitoring activities and for such additional programs and activities as may be mutually agreed, and for the assumption by the Government of the Marshall Islands of responsibility for enforcement of limitations on the utilization of affected areas developed in cooperation with the Government of the United States and for the assistance by the Government of the United States in the exercise of such responsibility as may be mutually agreed. This separate agreement shall come into effect simultaneously with this Compact and shall remain in effect in accordance with its own terms.

(c) The Government of the United States shall provide to the Government of the Marshall Islands, on a grant basis, the amount of $150 million to be paid and distributed in accordance with the separate agreement referred to in this Section, and shall provide the services and programs set forth in this separate agreement, the language of which is incorporated into this Compact.

Section 178

(a) The federal agencies of the Government of the United States which provide the services and related programs in the Marshall Islands or the Federated States of Micronesia pursuant to Articles II and III of Title Two are authorized to settle and pay tort claims arising in the Marshall Islands or the Federated States of Micronesia from the activities of such agencies or from the acts or omissions of the employees of such agencies. Except as provided in Section 178(b), the provisions of 28 U.S.C. 2672 and 31 U.S.C. 1304 shall apply exclusively to such administrative settlements and payments.

(b) Claims under Section 178(a) which cannot be settled under Section 178(a) shall be disposed of exclusively in accordance with Article II of Title Four. Arbitration awards rendered pursuant to this subsection shall be paid out of funds under 31 U.S.C. 1304.

(c) The Government of the United States and the Government of the Marshall Islands or the Federated States of Micronesia shall, in the separate agreements referred to in Section 232, provide for:

(1) the administrative settlement of claims referred to in Section 178(a), including designation of local agents in the Marshall Islands and each State of the Federated States of Micronesia; such agents to be empowered to accept, investigate and settle such claims, in a timely manner, as provided in such separate agreements; and

(2) arbitration, referred to in Section 178(b), in a timely manner, at a site convenient to the claimant, in the event a claim is not otherwise settled pursuant to Section 178(a).

(d) The provisions of Section 174(d) shall not apply to claims covered by this Section.

TITLE TWO

ECONOMIC RELATIONS

Article I

Grant Assistance

Section 211

(a) In order to assist the Governments of the Marshall Islands and the Federated States of Micronesia in their efforts to advance the economic self-sufficiency of their peoples and in recognition of the special relationship that exists between them and the United States, the Government of the United States shall provide on a grant basis the following amounts:

(1) to the Government of the Marshall Islands, $26.1 million annually for five years commencing on the effective date of this Compact, $22.1 million annually for five years commencing on the fifth anniversary of the effective date of this Compact, and $19.1 million annually for five years commencing on the tenth anniversary of this Compact. Over this fifteen-year period, the Government of the Marshall Islands shall dedicate an average of no less than 40 percent of these amounts to the capital account subject to provision for revision of this percentage incorporated into the plan referred to in Section 211(b).

(2) to the Government of the Federated States of Micronesia, $60 million annually for five years commencing on the effective date of this Compact, $51 million annually for five years commencing on the fifth anniversary of the effective date of this Compact, and $40 million annually for five years commencing on the tenth anniversary of the effective date of this Compact. Over this fifteen-year period, the Government of the Federated States of Micronesia shall dedicate an average of no less than 40 percent of these amounts annually to the capital account subject to provision for revision of this percentage incorporated into the plan referred to in Section 211(b). To take into account the special nature of the assistance, to be provided under this paragraph and Sections 212(b), 213(c), 214(c), 215(a)(3), 215(b)(3), 216(a), 216(b), 221(a), and 221(b), the division of these amounts among the national and state governments of the Federated States of Micronesia shall be certified to the Government of the United States by the Government of the Federated States of Micronesia.

(b) The annual expenditure of the grant amounts specified for the capital account in Section 211(a) by the Governments of the Marshall Islands and the Federated States of Micronesia shall be in accordance with official overall economic development plans provided by those Governments and concurred in by the Government of the United States prior to the effective date of this Compact. These plans may be amended from time to time by the Government of the Marshall Islands or the Federated States of Micronesia.

(c) The Government of the United States and the Governments of the Marshall Islands and the Federated States of Micronesia recognize that the achievement of the goals of the plans referred to in Section 211(b) depends upon the availability of adequate internal revenue as well as economic assistance from sources outside of the Marshall Islands and the Federated States of Micronesia, including the Government of the United States, and may, in addition, be affected by the impact of exceptional economically adverse circumstances. Each of the Governments of the Marshall Islands and the Federated States of Micronesia shall therefore report annually to the President of the United States and to the Congress of the United States on the implementation of the plans and on their use of the funds specified in this Article. These reports shall outline the achievements of the plans to date and the need, if any, for an additional authorization and appropriation of economic assistance for that year to account for any exceptional, economically adverse circumstances. It is understood that the Government of the United States cannot be committed by this Section to seek or support such additional economic assistance.

Section 212

In recognition of the special development needs of the Federated States of Micronesia, the Government of the United States shall provide to the Government of the Federated States of Micronesia $1 million annually for fourteen years commencing on the first anniversary of the effective date of this Compact. This amount may be used by the Government of the Federated States of Micronesia to defray current account expenditures attendant to the operation of the United States military Civic Action Teams made available in accordance with the separate agreement referred to in Section 227.

Section 213

(a) The Government of the United States shall provide on a grant basis $1.9 million annually to the Government of the Marshall Islands in conjunction with Section 321(a). The Government of the Marshall Islands, in its use of such funds, shall take into account the impact of the activities of the Government of the United States in the Kwajalein Atoll area of the Marshall Islands.

(b) The Government of the United States shall provide on a grant basis to the Government of the Federated States of Micronesia the sum of $160,000 in conjunction with Section 321(a). This sum shall be made available concurrently with the grant assistance provided pursuant to this Article during the first year after the effective date of this Compact. The Government of the Federated States of Micronesia, in its use of such funds, shall take into account the impact of the activities of the Government of the United States in Yap State, Federated States of Micronesia.

Section 214

As a contribution to efforts aimed at achieving increased self-sufficiency in energy production, the Government of the United States shall provide on a current account grant basis for fourteen years commencing on the first anniversary of the effective date of this Compact the following amounts:

(a) To the Government of the Marshall Islands, $2 million annually; and

(b) To the Government of the Federated States of Micronesia, $3 million annually.

Section 215

(a) As a contribution to the current account operations and maintenance of communications systems, the Government of the United States shall provide on a grant basis for fifteen years commencing on the effective date of this Compact the following amounts:

(1) to the Government of the Marshall Islands, $300,000 annually; and

(2) to the Government of the Federated States of Micronesia, $600,000 annually.

(b) For the purpose of acquiring such communications hardware as may be located within the Marshall Islands and the Federated States of Micronesia or for such other current or capital account activity as may be selected, the Government of the United States shall provide, concurrently with the grant assistance provided pursuant to this Article during the first year after the effective date of this Compact, the sum of $9 million to be allocated as follows:

(1) to the Government of the Marshall Islands, $3 million; and

(2) to the Government of the Federated States of Micronesia, $6 million.

Section 216

(a) The Government of the United States shall provide on a current account basis an annual grant of $5.369 million for fifteen years commencing on the effective date of this Compact for the purposes set forth below:

(1) $890,000 annually for the surveillance and enforcement by the Governments of the Marshall Islands and the Federated States of Micronesia of their respective maritime zones;

(2) $1.791 million annually for health and medical programs, including referrals to hospital and treatment centers; and

(3) $2.687 million annually for a scholarship fund or funds to support the post-secondary education of citizens of the Marshall Islands and the Federated States of Micronesia attending United States accredited, post-secondary institutions in the United States, its territories and possessions, the Marshall Islands or the Federated States of Micronesia. The curricula criteria for the award of scholarships shall be designed to advance the purposes of the plans referred to in Section 211(b).

(b) The Government of the United States shall provide the sum of $1.333 million as a contribution to the commencement of activities pursuant to Section 216(a)(1).

(c) The annual grants referred to in Section 216(a) and the sum referred to in Section 216(b) shall be made available by the Government of the United States promptly after it receives instruction for their distribution agreed upon by the Governments of the Marshall Islands and the Federated States of Micronesia.

Section 217

Except as otherwise provided, the amounts stated in Sections 211, 212, 214, 215 and 231 shall be adjusted for each Fiscal Year by the percent which equals two-thirds of the percentage change in the United States Gross National Product Implicit Price Deflator, or seven percent, whichever is less in any one year, using the beginning of Fiscal Year 1981 as the base.

Section 218

If in any year the funds made available by the Government of the United States for that year pursuant to this Article or Section 231 are not completely obligated by the recipient Government, the unobligated balances shall remain available in addition to the funds to be provided in subsequent years.

Section 219

All funds previously appropriated to the Trust Territory of the Pacific Islands which are unobligated by the Government of the Trust Territory of the Pacific Islands as of the effective date of this Compact shall accrue to the Governments of the Marshall Islands and the Federated States of Micronesia for the purposes for which such funds were originally appropriated as determined by the Government of the United States.

Article II

Program Assistance

Section 221

(a) The Government of the United States shall make available to the Marshall Islands and the Federated States of Micronesia, in accordance with and to the extent provided in the separate agreements referred to in section 232, without compensation and at the levels equivalent to those available to the Trust Territory of the Pacific Islands during the year prior to the effective date of this Compact, the services and related programs:

(1) of the United States Weather Service;

(2) of the United States Federal Emergency Management Agency;

(3) provided pursuant to the Postal Reorganization Act, 39 U.S.C. 101 *et seq.*;

(4) of the United States Federal Aviation Administration; and

(5) of the United States Civil Aeronautics Board or its successor agencies which has the authority to implement the provisions of paragraph 5 of Article IX of such separate agreements, the language of which is incorporated into this Compact.

(b) The Government of the United States, recognizing the special needs of the Marshall Islands and the Federated States of Micronesia particularly in the fields of education and health care, shall make available, as provided by the laws of the United States, the annual amount of $10 million which shall be allocated in accordance with the provisions of the separate agreement referred to in Section 232.

(c) The Government of the United States shall make available to the Marshall Islands and the Federated States of Micronesia such alternate energy development projects, studies and conservation measures as are applicable to the Trust Territory of the Pacific Islands on the day preceding the effective date of this Compact, for the purposes and duration provided in the laws of the United States.

(d) The Government of the United States shall have and exercise such authority as is necessary for the purposes of this Article and as is set forth in the separate agreements referred to in Section 232, which shall also set forth the extent to which services and programs shall be provided to the Marshall Islands and the Federated States of Micronesia.

Section 222

The Government of the United States and the Government of the Marshall Islands or the Federated States of Micronesia shall consult regularly or upon request regarding:

(a) The economic development of the Marshall Islands or the Federated States of Micronesia; or

(b) The services and programs referred to in this Article. These services and programs shall continue to be provided by the Government of the United States unless their modification is provided by mutual agreement or their termination in whole or in part is requested by any recipient Government.

Section 223

The citizens of the Marshall Islands and the Federated States of Micronesia who are receiving post-secondary educational assistance from the Government of the United States on the day preceding the effective date of this Compact shall continue to be eligible, if otherwise qualified, to receive such assistance to complete their academic programs for a maximum of four years after the effective date of this Compact.

Section 224

The Government of the United States and the Government of the Marshall Islands or the Federated States of Micronesia may agree from time to time to the extension of additional United States grant assistance, services and programs as provided by the Laws of the United States, to the Marshall Islands or the Federated States of Micronesia, respectively.

Section 225

The Governments of the Marshall Islands and the Federated States of Micronesia shall make available to the Government of the United States at no cost such land as may be necessary for the operations of the services and programs provided pursuant to this Article, and such facilities as are provided by the Government of the Marshall Islands or the Federated States of Micronesia at no cost to the Government of the United States as of the effective date of this Compact or as may be mutually agreed thereafter.

Section 226

The Governments of the Marshall Islands and the Federated States of Micronesia may request, from time to time, technical assistance from the federal agencies and institutions of the Government of the United States, which are authorized to grant such technical assistance in accordance with its laws and which shall grant such technical assistance in a manner which gives priority consideration to the Marshall Islands and the Federated States of Micronesia over other recipients not a part of the United States, its territories or possessions. The Government of the United States shall coordinate the provision of such technical assistance in consultation with the respective recipient Government.

Section 227

In recognition of the special development needs of the Federated States of Micronesia, the Government of the United States shall make available United States military Civic Action Teams for use in the Federated States of Micronesia under terms and conditions specified in a separate agreement which shall come into effect simultaneously with this Compact.

Article III

Administrative Provisions

Section 231

Upon the thirteenth anniversary of the effective date of this Compact, the Government of the United States and the Governments of the Marshall Islands and the Federated States of Micronesia shall commence negotiations regarding those provisions of this Compact which expire on the fifteenth anniversary of its effective date. If these negotiations are not concluded by the fifteenth anniversary of the effective date of this Compact, the period of negotiations shall extend for not more than two additional years, during which time the provisions of this Compact including Title Three shall remain in full force and effect. During this additional period of negotiations, the Government of the United States shall continue its assistance to the Governments with which it is negotiating pursuant to this Section at a level which is the average of the annual amounts granted pursuant to Sections 211, 212, 213, 214, 215 and 216 during the first fifteen years of this Compact. The average annual amount paid pursuant to Sections 211, 212, 214 and 215 shall be adjusted pursuant to Section 217.

Section 232

The specific nature, extent and contractual arrangements of the services and programs provided for in Section 221 as well as the legal status of agencies of the Government of the United States, their civilian employees and contractors, and the dependents of such personnel while present in the Marshall Islands or the Federated States of Micronesia, and other arrangements in connection with a service or program furnished by the Government of the United States, are set forth in separate agreements which shall come into effect simultaneously with this Compact.

Section 233

The Government of the United States, in consultation with the Governments of the Marshall Islands and the Federated States of Micronesia, shall determine and implement procedures for the periodic audit of all grants and other assistance made under Article I of this Title and of all funds expended for the services and programs provided under Article II of this Title. Such audits shall be conducted on an annual basis during the first five years following the effective date of this Compact and shall be at no cost to the Government of the Marshall Islands or the Federated States of Micronesia.

Section 234

Title to the property of the Government of the United States situated in the Trust Territory of the Pacific Islands or acquired for or used by the Government of the Trust Territory of the Pacific Islands on or before the day preceding the effective date of this Compact shall, without reimbursement or transfer of funds, vest in the Government of the Marshall Islands and the Federated States of Micronesia as set forth in a separate agreement which shall come into effect simultaneously with this Compact. The provisions of this Section shall not apply to the property of the Government of the United States for which the Government of the United States determines a continuing requirement.

Section 235

(a) Funds held in trust by the High Commissioner of the Trust Territory of the Pacific Islands, in his official capacity, as of the effective date of this Compact shall remain available as trust funds to their designated beneficiaries. The Government of the United States, in consultation with the Government of the Marshall Islands or the Federated States of Micronesia, shall appoint a new trustee who shall exercise the functions formerly exercised by the High Commissioner of the Trust Territory of the Pacific Islands.

(b) To provide for the continuity of administration, and to assure the Governments of the Marshall Islands and the Federated States of Micronesia that the purposes of the laws of the United States are carried out and that the funds of any other trust fund in which the High Commissioner of the Trust Territory of the Pacific Islands has authority of a statutory or customary nature shall remain available as trust funds to their designated beneficiaries, the Government of the United States agrees to assume the authority formerly vested in the High Commissioner of the Trust Territory of the Pacific Islands.

Section 236

Except as otherwise provided, approval of this Compact by the Government of the United States shall constitute a pledge of the full faith and credit of the United States for the full payment of the sums and amounts specified in Articles I and III of this Title. The obligation of the United States under Articles I and III of this Title shall be enforceable in the United States Claims Court, or its successor court, which shall have jurisdiction in cases arising under this Section, notwithstanding the provisions of 28 U.S.C. 1502, and which court's decisions shall be reviewable as provided by the laws of the United States.

Article IV

Trade

Section 241

The Marshall Islands and the Federated States of Micronesia are not included in the customs territory of the United States.

Section 242

For the purpose of assessing duties on their products imported into the customs territory of the United States, the Marshall Islands and the Federated States of Micronesia shall be treated as if they were insular possessions of the United States within the meaning of General Headnote 3(a) of the Tariff Schedules of the United States. The exceptions, valuation procedures and all other provisions of General Headnote 3(a) shall apply to any product deriving from the Marshall Islands or the Federated States of Micronesia.

Section 243

All products of the Marshall Islands or the Federated States of Micronesia imported into the customs territory of the United States which are not accorded the treatment set forth in Section 242 and all products of the United States imported into the Marshall Islands or the Federated States of Micronesia shall receive treatment no less favorable than that accorded like products of any foreign country with respect to customs duties or charges of a similar nature and with respect to laws and regulations relating to importation, exportation, taxation, sale, distribution, storage or use.

Article V

Finance and Taxation

Section 251

The currency of the United States is the official circulating legal tender of the Marshall Islands and the Federated States of Micronesia. Should the Government of the Marshall Islands or the Federated States of Micronesia act to institute another currency, the terms of an appropriate currency transitional period shall be as agreed with the Government of the United States.

Section 252

The Government of the Marshall Islands or the Federated States of Micronesia may, with respect to United States persons, tax income derived from sources within its respective jurisdiction, property situated therein, including transfers of such property by gift or at death, and products consumed therein, in such manner as such Government deems appropriate. The determination of the source of any income, or the situs of any property, shall for purposes of this Compact be made according to the United States Internal Revenue Code.

Section 253

A citizen of the Marshall Islands or the Federated States of Micronesia, domiciled therein, shall be exempt from:

(a) Income taxes imposed by the Government of the United States upon fixed or determinable annual income; and

(b) Estate, gift, and generation-skipping transfer taxes imposed by the Government of the United States.

Section 254

(a) In determining any income tax imposed by the Government of the Marshall Islands or the Federated States of Micronesia, those Governments shall have authority to impose tax upon income derived by a resident of the Marshall Islands or the Federated States of Micronesia from sources with-

out the Marshall Islands and the Federated States of Micronesia, in the same manner and to the same extent as those Governments impose tax upon income derived from within their respective jurisdictions. If the Government of the Marshall Islands or the Federated States of Micronesia exercises such authority as provided in this subsection, any individual resident of the Marshall Islands or the Federated States of Micronesia who is subject to tax by the Government of the United States on income which is also taxed by the Government of the Marshall Islands or the Federated States of Micronesia shall be relieved of liability to the Government of the United States for the tax which, but for this subsection, would otherwise be imposed by the Government of the United States on such income. For purposes of this Section, the term "resident of the Marshall Islands or the Federated States of Micronesia" shall be deemed to include any person who was physically present in the Marshall Islands or the Federated States of Micronesia for a period of 183 or more days during any taxable year; provided, that as between the Government of the Marshall Islands and the Federated States of Micronesia, the authority to tax an individual resident of the Marshall Islands or the Federated States of Micronesia in respect of income from sources without the Marshall Islands and the Federated States of Micronesia as provided in this subsection may be exercised only by the Government in whose jurisdiction such individual was physically present for the greatest number of days during the taxable year.

(b) If the Government of the Marshall Islands or the Federated States of Micronesia subjects income to taxation substantially similar to that imposed by the Trust Territory Code in effect on January 1, 1980, such Government shall be deemed to have exercised the authority described in Section 254(a).

Section 255

Where not otherwise manifestly inconsistent with the intent of this Compact, provisions in the United States Internal Revenue Code that are applicable to possessions of the United States as of January 1, 1980 shall be treated as applying to the Marshall Islands and the Federated States of Micronesia. If such provisions of the Internal Revenue Code are amended, modified or repealed after that date, such provisions shall continue in effect as to the Marshall Islands and the Federated States of Micronesia for a period of two years during which time the Government of the United States and the Governments of the Marshall Islands and the Federated States of Micronesia shall negotiate an agreement which shall provide benefits substantially equivalent to those which obtained under such provisions.

TITLE THREE

SECURITY AND DEFENSE RELATIONS

Article I

Authority and Responsibility

Section 311

(a) The Government of the United States has full authority and responsibility for security and defense matters in or relating to the Marshall Islands and the Federated States of Micronesia.

(b) This authority and responsibility includes:

(1) the obligation to defend the Marshall Islands and the Federated States of Micronesia and their peoples from attack or threats thereof as the United States and its citizens are defended;

(2) the option to foreclose access to or use of the Marshall Islands and the Federated States of Micronesia by military personnel or for the military purposes of any third country; and

(3) the option to establish and use military areas and facilities in the Marshall Islands and the Federated States of Micronesia, subject to the terms of the separate agreements referred to in Sections 321 and 323.

(c) The Government of the United States confirms that it shall act in accordance with the principles of international law and the Charter of the United Nations in the exercise of this authority and responsibility.

Section 312

Subject to the terms of any agreements negotiated in accordance with Sections 321 and 323, the Government of the United States may conduct within the lands, waters and airspace of the Marshall Islands and the Federated States of Micronesia the activities and operations necessary for the exercise of its authority and responsibility under this Title.

Section 313

(a) The Governments of the Marshall Islands and the Federated States of Micronesia shall refrain from actions which the Government of the United States determines, after appropriate consultation with those Governments, to be incompatible with its authority and responsibility for security and defense matters in or relating to the Marshall Islands and the Federated States of Micronesia.

(b) The consultations referred to in this Section shall be conducted expeditiously at senior levels of the Governments concerned, and the subsequent determination by the Government of the United States referred to in this Section shall be made only at senior interagency levels of the Government of the United States.

(c) The Government of the Marshall Islands or the Federated States of Micronesia shall be afforded, on an expeditious basis, an opportunity to raise its concerns with the United States Secretary of State personally and the United States Secretary of Defense personally regarding any determination made in accordance with this Section.

Section 314

(a) Unless otherwise agreed, the Government of the United States shall not, in the Marshall Islands or the Federated States of Micronesia:

(1) test by detonation or dispose of any nuclear weapon, nor test, dispose of, or discharge any toxic chemical or biological weapon; or

(2) test, dispose of, or discharge any other radioactive, toxic chemical or biological materials in an amount or manner which would be hazardous to public health or safety.

(b) Unless otherwise agreed, other than for transit or over flight purposes or during time of a national emergency declared by the President of the United States, a state of war declared by the Congress of the United States or as necessary to defend against an actual or impending armed attack on the United States, the Marshall Islands or the Federated States of Micronesia, the Government of the United States shall not store in the Marshall Islands or the Federated States of Micronesia any toxic chemical weapon, nor any radioactive materials nor any toxic chemical materials intended for weapons use.

(c) Radioactive, toxic chemical, or biological materials not intended for weapons use shall not be affected by Section 314(b).

(d) No material or substance referred to in this Section shall be stored in the Marshall Islands or the Federated States of Micronesia except in an amount and manner which would not be hazardous to public health or safety. In determining what shall be an amount or manner which would be hazardous to public health or safety under this Section, the Government of the United States shall comply with any applicable mutual agreement, international guidelines accepted by the Government of the United States, and the laws of the United States and their implementing regulations.

(e) Any exercise of the exemption authority set forth in Section 161(e) shall have no effect on the obligations of the Government of the United States under this Section or on the application of this subsection.

(f) The provisions of this Section shall apply in the areas in which the Government of the Marshall Islands or the Federated States of Micronesia exercises jurisdiction over the living resources of the seabed, subsoil or water column adjacent to its coasts.

Section 315

The Government of the United States may invite members of the armed forces of other countries to use military areas and facilities in the Marshall Islands or the Federated States of Micronesia, in conjunction with and under the control of United States Armed Forces. Use by units of the armed forces of other countries of such military areas and facilities, other than for transit and overflight purposes, shall be subject to consultation with and, in the case of major units, approval by the Government of the Marshall Islands or the Federated States of Micronesia.

Section 316

The authority and responsibility of the Government of the United States under this Title may not be transferred or otherwise assigned.

Article II

Defense Facilities and Operating Rights

Section 321

(a) Specific arrangements for the establishment and use by the Government of the United States of military areas and facilities in the Marshall Islands or the Federated States of Micronesia are set forth in separate agreements which shall come into effect simultaneously with this Compact.

(b) If, in the exercise of its authority and responsibility under this Title, the Government of the United States requires the use of areas within the Marshall Islands or the Federated States of Micronesia in addition to those for which specific arrangements are concluded pursuant to Section 321(a), it may request the Government concerned to satisfy those requirements through leases or other arrangements. The Government of the Marshall Islands or the Federated States of Micronesia shall sympathetically consider any such request and shall establish suitable procedures to discuss it with and provide a prompt response to the Government of the United States.

(c) The Government of the United States recognizes and respects the scarcity and special importance of land in the Marshall Islands and the Federated States of Micronesia. In making any requests pursuant to Section 321(b), the Government of the United States shall follow the policy of requesting the minimum area necessary to accomplish

the required security and defense purpose, of requesting only the minimum interest in real property necessary to support such purpose, and of requesting first to satisfy its requirement through public real property, where available, rather than through private real property.

Section 322

The Government of the United States shall provide and maintain fixed and floating aids to navigation in the Marshall Islands and the Federated States of Micronesia at least to the extent necessary for the exercise of its authority and responsibility under this Title.

Section 323

The military operating rights of the Government of the United States and the legal status and contractual arrangements of the United States Armed Forces, their members, and associated civilians, while present in the Marshall Islands or the Federated States of Micronesia, are set forth in separate agreements which shall come into effect simultaneously with this Compact.

Article III

Defense Treaties and International Security Agreements

Section 331

Subject to the terms of this Compact and its related agreements, the Government of the United States, exclusively, shall assume and enjoy, as to the Marshall Islands and the Federated States of Micronesia, all obligations, responsibilities, rights and benefits of:

(a) Any defense treaty or other international security agreement applied by the Government of the United States as Administering Authority of the Trust Territory of the Pacific Islands as of the day preceding the effective date of this Compact; and

(b) Any defense treaty or other international security agreement to which the Government of the United States is or may become a party which it determines to be applicable in the Marshall Islands and the Federated States of Micronesia. Such a determination by the Government of the United States shall be preceded by appropriate consultation with the Government of the Marshall Islands or the Federated States of Micronesia.

Article IV

Service in Armed Forces of the United States

Section 341

Any person entitled to the privileges set forth in Section 141 shall be eligible to volunteer for service in the Armed Forces of the United States, but shall not be subject to involuntary induction into military service of the United States so long as such person does not establish habitual residence in the United States, its territories or possessions.

Section 342

The Government of the United States shall have enrolled, at any one time, at least two qualified students, one each from the Marshall Islands and the Federated States of Micronesia, as may be nominated by their respective Governments, in each of:

(a) The United States Coast Guard Academy pursuant to 14 U.S.C. 195; and

(b) The United States Merchant Marine Academy pursuant to 46 U.S.C. 1295b(b)(6), provided that the provisions of 46 U.S.C. 1295b(b)(6)(C) shall not apply to the enrollment of students pursuant to Section 342(b) of this Compact.

Article V

General Provisions

Section 351

(a) The Government of the United States and the Government of the Marshall Islands or the Federated States of Micronesia shall establish two Joint Committees empowered to consider disputes under the implementation of this Title and its related agreements.

(b) The membership of each Joint Committee shall comprise selected senior officials of each of the two participating Governments. The senior United States military commander in the Pacific area shall be the senior United States member of each Joint Committee. For the meetings of each Joint Committee, each of the two participating Governments may designate additional or alternate representatives as appropriate for the subject matter under consideration.

(c) Unless otherwise mutually agreed, each Joint Committee shall meet semi-annually at a time and place to be designated, after appropriate consultation, by the Government of the United States. A Joint Committee also shall meet promptly upon request of either of its members. Upon notification by the Government of the United States, the Joint Committees so notified shall meet promptly in a combined session to consider matters within the jurisdiction of more than one Joint Committee. Each Joint Committee shall follow such procedures, including the establishment of functional subcommittees, as the members may from time to time agree.

(d) Unresolved issues in each Joint Committee shall be referred to the Governments concerned for resolution, and the Government of the Marshall Islands or the Federated States of Micronesia shall be afforded, on an expeditious basis, an opportunity to raise its concerns with the United States Secretary of Defense personally regarding any unresolved issue which threatens its continued association with the Government of the United States.

Section 352

In the exercise of its authority and responsibility under Title Three, the Government of the United States shall accord due respect to the authority and responsibility of the Governments of the Marshall Islands and the Federated States of Micronesia under Titles One, Two and Four and to their responsibility to assure the well-being of their peoples.

Section 353

(a) The Government of the United States shall not include any of the Governments of the Marshall Islands and the Federated States of Micronesia as named parties to a formal declaration of war, without their respective consent.

(b) Absent such consent, this Compact is without prejudice, on the ground of belligerence or the existence of a state of war, to any claims for damages which are advanced by the citizens, nationals or Government of the Marshall Islands or the Federated States of Micronesia, which arise out of armed conflict subsequent to the effective date of this Compact and which are:

(1) petitions to the Government of the United States for redress; or

(2) claims in any manner against the government, citizens, nationals or entities of any third country.

(c) Petitions under Section 353(b)(1) shall be treated as if they were made by citizens of the United States.

Section 354

(a) Notwithstanding any other provision of this Compact, the provisions of this Title are binding from the effective date of this Compact for a period of fifteen years between the Government of the United States and the Governments of the Marshall Islands and the Federated States of Micronesia and thereafter as mutually agreed or in accordance with Section 231, unless earlier terminated by mutual agreement pursuant to Section 441, or amended pursuant to Article III of Title Four.

(b) The Government of the United States recognizes, in view of the special relationship between the Government of the United States and the Governments of the Marshall Islands and the Federated States of Micronesia, and in view of the existence of separate agreements with each of them pursuant to Sections 321 and 323, that, even if this Title should terminate, any attack on the Marshall Islands or the Federated States of Micronesia during the period in which such separate agreements are in effect, would constitute a threat to the peace and security of the entire region and a danger to the United States. In the event of such an attack, the Government of the United States would take action to meet the danger to the United States and to the Marshall Islands and the Federated States of Micronesia in accordance with its constitutional processes.

TITLE FOUR

GENERAL PROVISIONS

Article I

Approval and Effective Date

Section 411

This Compact shall come into effect upon mutual agreement between the Government of the United States, acting in fulfillment of its responsibilities as Administering Authority of the Trust Territory of the Pacific Islands, and the Government of the Marshall Islands or the Federated States of Micronesia and subsequent to completion of the following:

(a) Approval by the Government of the Marshall Islands or the Federated States of Micronesia in accordance with its constitutional processes;

(b) Conduct of the plebiscite referred to in Section 412; and

(c) Approval by the Government of the United States in accordance with its constitutional processes.

Section 412

A plebiscite shall be conducted in each of the Marshall Islands and the Federated States of Micronesia for the free and voluntary choice by the peoples of the Trust Territory of the Pacific Islands of their future political status through informed and democratic processes. The Marshall Islands and the Federated States of Micronesia shall each be considered a voting jurisdiction, and the plebiscite shall be conducted under fair and equitable standards in each voting jurisdiction. The Administering Authority of the Trust Territory of the Pacific Islands, after consultation with the Governments of the Marshall Islands and the Federated States of Micronesia, shall fix the date on which the plebiscite shall be called in each voting jurisdiction. The plebiscite shall be called jointly by the Administering Authority of the Trust Territory of the Pacific Islands and the other Signatory Government concerned. The results of the plebiscite in each voting jurisdiction shall be determined by a majority of the valid ballots cast in that voting jurisdiction.

Article II

Conference and Dispute Resolution

Section 421

The Government of the United States shall confer promptly at the request of the Government of the Marshall Islands or the Federated States of Micronesia and any of those Governments shall confer promptly at the request of the Government of the United States on matters relating to the provisions of this Compact or of its related agreements.

Section 422

In the event the Government of the United States, or the Government of the Marshall Islands or the Federated States of Micronesia, after conferring pursuant to Section 421, determines that there is a dispute and gives written notice thereof, the Governments which are parties to the dispute shall make a good faith effort to resolve the dispute among themselves.

Section 423

If a dispute between the Government of the United States and the Government of the Marshall Islands or the Federated States of Micronesia cannot be resolved within 90 days of written notification in the manner provided in Section 422, either party to the dispute may refer it to arbitration in accordance with Section 424.

Section 424

Should a dispute be referred to arbitration as provided for in Section 423, an Arbitration Board shall be established for the purpose of hearing the dispute and rendering a decision which shall be binding upon the two parties to the dispute unless the two parties mutually agree that the decision shall be advisory. Arbitration shall occur according to the following terms:

(a) An Arbitration Board shall consist of a Chairman and two other members, each of whom shall be a citizen of a party to the dispute. Each of the two Governments which is a party to the dispute shall appoint one member to the Arbitration Board. If either party to the dispute does not fulfill the appointment requirements of this Section within 30 days of referral of the dispute to arbitration pursuant to Section 423, its member on the Arbitration Board shall be selected from its own standing list by the other party to the dispute. Each Government shall maintain a standing list of 10 candidates. The parties to the dispute shall jointly appoint a Chairman within 15 days after selection of the other members of the Arbitration Board. Failing agreement on a Chairman, the Chairman shall be chosen by lot from the standing lists of the parties to the dispute within 5 days after such failure.

(b) The Arbitration Board shall have jurisdiction to hear and render its final determination on all disputes arising exclusively under Articles I, II, III, IV and V of Title One, Title Two, Title Four and their related agreements.

(c) Each member of the Arbitration Board shall have one vote. Each decision of the Arbitration Board shall be reached by majority vote.

(d) In determining any legal issue, the Arbitration Board may have reference to international law and, in such reference, shall apply as guidelines the provisions set forth in Article 38 of the Statute of the International Court of Justice.

(e) The Arbitration Board shall adopt such rules for its proceedings as it may deem appropriate and necessary, but such rules shall not contravene the provisions of this Compact. Unless the parties provide otherwise by mutual agreement, the Arbitration Board shall endeavor to render its decision within 30 days after the conclusion of arguments. The Arbitration Board shall make findings of fact and conclusions of law and its members may issue dissenting or individual opinions. Except as may be otherwise decided by the Arbitration Board, one-half of all costs of the arbitration shall be borne by the Government of the United States and the remainder shall be borne by the other party to the dispute.

Article III

Amendment

Section 431

The provisions of this Compact may be amended as to the Governments of the Marshall Islands and the Federated States of Micronesia and as to the Government of the United States at any time by mutual agreement.

Section 432

The provisions of this Compact may be amended as to any one of the Governments of the Marshall Islands or the Federated States of Micronesia and as to the Government of the United States at any time by mutual agreement. The effect of any amendment made pursuant to this Section shall be restricted to the relationship between the Governments agreeing to such amendment, but the other Governments signatory to this Compact shall be notified promptly by the Government of the United States of any such amendment.

Article IV

Termination

Section 441

This Compact may be terminated as to any one of the Governments of the Marshall Islands or the Federated States of Micronesia and as to the Government of the United States by mutual agreement and subject to Section 451.

Section 442

This Compact may be terminated by the Goverment of the United States as to the Government of the Marshall Islands or the Federated States of Micronesia subject to Section 452, such termination to be effective on the date specified in the notice of termination by the Government of the United States but not earlier than six months following delivery of such notice. The time specified in the notice of termination may be extended.

Section 443

This Compact shall be terminated, pursuant to their respective constitutional processes, by the Government of the Marshall Islands or the Federated States of Micronesia subject to Section 453 if the people represented by such Government vote in a plebiscite to terminate. Such Government shall notify the Government of the United States of its intention to call such a plebiscite which shall take place not earlier than three months after delivery of such notice. The plebiscite shall be administered by such Government in accordance with its constitutional and legislative processes, but the Government of the United States may send its own observers and invite observers from a mutually agreed party. If a majority of the valid ballots cast in the plebiscite favors termination, such Government shall, upon certification of the results of the plebiscite, give notice of termination to the Government of the United States, such termination to be effective on the date specified in such notice but not earlier than three months following the date of delivery of such notice. The time specified in the notice of termination may be extended.

Article V

Survivability

Section 451

Should termination occur pursuant to Section 441, economic assistance by the Government of the United States shall continue on mutually agreed terms.

Section 452

(a) Should termination occur pursuant to Section 442, the following provisions of this Compact shall remain in full force and effect until the fifteenth anniversary of the effective date of this Compact between the Government of the United States and the Government of the Marshall Islands or the Federated States of Micronesia and thereafter as mutually agreed:

(1) Article VI and Sections 172, 173, 176 and 177 of Title One;

(2) Article I and Section 233 of Title Two;

(3) Title Three; and

(4) Articles II, III, V and VI of Title Four.

(b) The Government of the United States shall also provide the Government as to which termination occurs pursuant to Section 442 with either the programs or services provided pursuant to Article II of Title Two as the time of termination, or their equivalent, as determined by the Government of the United States. Such assistance shall continue until the fifteenth anniversary of the effective date of this Compact, and thereafter as mutually agreed.

Section 453

(a) Should termination occur pursuant to Section 443, the following provisions of this Compact shall remain in full force and effect until the fifteenth anniversary of the effective date of this Compact between the Government of the United States and the Government of the Marshall Islands or the Federated States of Micronesia and thereafter as mutually agreed:

(1) Article VI and Sections 172, 173, 176 and 177 of Title One;

(2) Title Three; and

(3) Articles II, III, V and VI of Title Four.

(b) Upon receipt of notice of termination pursuant to Section 443, the Government of the United States and the Government so terminating shall promptly consult with regard to their future relationship. These consultations shall determine the level of economic assistance which the Government of the United States shall provide to the Government so terminating for the period ending on the fifteenth anniversary of the effective date of this Compact provided that the annual amounts specified in Sections 211, 212, 214, 215 and 216 shall continue without diminution. Such amounts, with the exception of those specified in Section 216, shall be adjusted according to the formula set forth in Section 217.

Section 454

Notwithstanding any other provision of this Compact:

(a) The Government of the United States reaffirms its continuing interest in promoting the long-term economic advancement and self-sufficiency of the peoples of the Marshall Islands and the Federated States of Micronesia; and

(b) The separate agreements referred to in Article II of the Title Three shall remain in effect in accordance with their terms which

shall also determine the duration of Section 213.

Article VI

Definition of Terms

Section 461

For the purpose of this Compact only and without prejudice to the views of the Government of the United States or the Government of the Marshall Islands or the Federated States of Micronesia as to the nature and extent of the jurisdiction under international law of any of them, the following terms shall have the following meanings:

(a) "Trust Territory of the Pacific Islands" means the area established in the Trusteeship Agreement consisting of the administrative districts of Kosrae, Yap, Ponape, the Marshall Islands and Truk as described in Title One, Trust Territory Code, Section 1, in force on Jaunary 1, 1979. This term does not include the area of Palau or the Northern Mariana Islands.

(b) "Trusteeship Agreement" means the agreement setting forth the terms of trusteeship for the Trust Territory of the Pacific Islands, approved by the Security Council of the United Nations April 2, 1947, and by the United States July 18, 1947, entered into force July 18, 1947, 61 Stat. 3301, T.I.A.S. 1665, 8 U.N.T.S. 189.

(c) "The Marshall Islands" and "the Federated States of Micronesia" are used in a geographic sense and include the land and water areas to the outer limits of the territorial sea and the air space above such areas as now or hereafter recognized by the Government of the United States.

(d) "Government of the Marshall Islands" means the Government established and organized by the Constitution of the Marshall Islands including all the political subdivisions and entities comprising that Government.

"Government of the Federated States of Micronesia" means the Government established and organized by the Constitution of the Federated States of Micronesia including all the political subdivisions and entities comprising that Government.

(e) The following terms shall be defined consistent with the 1976 Edition of the Radio Regulations of the International Telecommunications Union (ISBN 92-61-0081-5) as follows:

(1) "Radio Communications" means telecommunication by means of radio waves.

(2) "Station" means one or more transmitters or receivers or a combination of transmitters and receivers, including the accessory equipment, necessary at one location for carrying on a radio communication service; each station shall be classified by the service in which it operates permanently or temporarily.

(3) "Broadcasting Service" means a radio communication service in which the transmissions are intended for direct reception by the general public, and which may include sound transmissions, television transmissions or other types of transmissions.

(4) "Broadcasting Station" means a station in the broadcasting service.

(f) "Frequency Assignment" means the same as 'Frequency Assignment' means in the 1976 Edition of the Radio Regulations of the International Telecommunications Union (ISBN 92-61-0081-5).

(g) "Habitual Residence" means a place of general abode or a principal, actual dwelling place of a continuing or lasting nature; provided, however, that this term shall not apply to the residence of any person who entered the United States for the purpose of full-time studies as long as such person maintains that status, or who has been physically present in the United States, the Marshall Islands, or the Federated States of Micronesia for less than one year, or who is a dependent of a resident representative, as described in Section 152.

(h) For the purposes of Article IV of Title One of this Compact:

(1) "Actual Residence" means physical presence in the Marshall Islands or the Federated States of Micronesia during eighty-five percent of the period of residency required by Section 141(a)(3); and

(2) "Certificate of Actual Residence" means a certificate issued to a naturalized citizen by the Government which has naturalized him stating that the citizen has complied with the actual residence requirement of Section 141(a)(3).

(i) "Military Areas and Facilities" means those areas and facilities in the Marshall Islands or the Federated States of Micronesia reserved or acquired by the Government of the Marshall Islands or the Federated States of Micronesia for use by the Government of the United States, as set forth in the separate agreements referred to in Section 321.

(j) "Capital Account" means, for each year of the Compact, those portions of the total grant assistance provided in Article I of Title Two, adjusted by Section 217, which are to be obligated for:

(1) the construction or major repair of capital infrastructure; or

(2) public and private sector projects identified in the official overall economic development plan.

(k) "Current Account" means, for each year of the Compact, those portions of the total grant assistance provided in Article I of Title Two, adjusted by Section 217, which are to be obligated for recurring operational activities including infrastructure maintenance as identified in the annual budget justifications submitted yearly to the Government of the United States.

(l) "Official Overall Economic Development Plan" means the documented program of annual development which identifies the specific policy and project activities necessary to achieve a specified set of economic goals and objectives during the period of free association, consistent with the economic assistance authority in Title Two. Such a document should include an analysis of population trends, manpower requirements, social needs, gross national product estimates, resource utilization, infrastructure needs and expenditures, and the specific private sector projects required to develop the local economy of the Marshall Islands or the Federated States of Micronesia. Project identification should include initial cost estimates, with project purposes related to specific development goals and objectives.

(m) "Tariff Schedules of the United States" means the Tariff Schedules of the United States as amended from time to time and as promulgated pursuant to United States law and includes the Tariff Schedules of the United States Annotated (TSUSA), as amended.

(n) "Vienna Convention on Diplomatic Relations" means the Vienna Convention on Diplomatic Relations, done April 18, 1961, 23 U.S.T. 3227, T.I.A.S. 7502, 500 U.N.T.S. 95.

Section 462

The Government of the United States and the Government of the Marshall Islands or the Federated States of Micronesia, as appropriate, shall conclude related agreements which shall come into effect and shall survive in accordance with their terms, as follows:

(a) Agreement Regarding the Provision of Telecommunication Services by the Government of the United States to the Marshall Islands and the Federated States of Micronesia Concluded Pursuant to Section 131 of the Compact of Free Association;

(b) Agreement Regarding the Operation of Telecommunication Services of the Government of the United States in the Marshall Islands and the Federated States of Micronesia Concluded Pursuant to Section 132 of the Compact of Free Association;

(c) Agreement on Extradition, Mutual Assistance in Law Enforcement Matters and Penal Sanctions Concluded Pursuant to Section 175 of the Compact of Free Association;

(d) Agreement Between the Government of the United States and the Government of the Marshall Islands for the Implementation of Section 177 of the Compact of Free Association;

(e) Federal Programs and Services Agreement Concluded Pursuant to Article II of Title Two and Section 232 of the Compact of Free Association;

(f) Agreement Concluded Pursuant to Section 234 of the Compact of Free Association;

(g) Agreement Regarding the Military Use and Operating Rights of the Government of the United States in the Marshall Islands Concluded Pursuant to Sections 321 and 323 of the Compact of Free Association;

(h) Agreement Regarding the Military Use and Operating Rights of the Government of the United States in the Federated States of Micronesia Concluded Pursuant to Sections 227, 321 and 323 of the Compact of Free Association;

(i) Status of Forces Agreement Concluded Pursuant to Section 323 of the Compact of Free Association;

(j) Agreement Between the Government of the United States and the Government of the Federated States of Micronesia Regarding Friendship, Cooperation and Mutual Security Concluded Pursuant to Sections 321 and 323 of the Compact of Free Association; and

(k) Agreement Between the Government of the United States and the Government of the Marshall Islands Regarding Mutual Security Concluded Pursuant to Sections 321 and 323 of the Compact of Free Association.

Section 463

(a) Except as set forth in Section 463(b), any reference in this Compact to a provision of the United States Code or the Statutes at Large of the United States constitutes the incorporation of the language of such provision into this Compact, as such provision was in force on January 1, 1980.

(b) Any reference in Article VI of Title One and Sections 131, 174, 175, 178 and 342 to a provision of the United States Code or the Statutes at Large of the United States or to the Privacy Act, the Freedom of Information Act or the Administrative Procedure Act constitutes the incorporation of the language of such provision into this Compact as such provision is in force on the effective date of this Compact or as it may be amended thereafter on a non-discriminatory basis according to the constitutional processes of the United States.

Article VII

Concluding Provisions

Section 471

(a) The Government of the United States and the Governments of the Marshall Is-

lands and the Federated States of Micronesia agree that they have full authority under their respective Constitutions to enter into this Compact and its related agreements and to fulfill all of their respective responsibilities in accordance with the terms of this Compact and its related agreements. The Governments pledge that they are so committed.

(b) Each of the Governments of the United States, the Marshall Islands and the Federated States of Micronesia shall take all necessary steps, of a general or particular character, to ensure, not later than the effective date of this Compact, the conformity of its laws, regulations and administrative procedures with the provisions of this Compact.

(c) Without prejudice to the effects of this Compact under international law, this Compact has the force and effect of a statute under the laws of the United States.

Section 472

This Compact may be accepted, by signature or otherwise, by the Government of the United States, the Government of the Marshall Islands, and the Government of the Federated States of Micronesia. Each Government accepting this Compact shall possess an original English language version.

IN WITNESS WHEREOF, the undersigned, duly authorized, have signed this Compact of Free Association which shall come into effect in accordance with its terms between the Government of the United States and each of the other Governments signatory to this Compact.

CHAIRMAN, COMMISSION ON FUTURE
POLITICAL STATUS AND TRANSITION

DONE AT MAJURO, MARSHALL ISLANDS, THIS 25TH DAY OF JUNE, ONE THOUSAND, NINE HUNDRED, EIGHTY-THREE

FOR THE GOVERNMENT
OF
THE UNITED STATES OF AMERICA

AMBASSADOR FRED M. ZEDER, II
PRESIDENT'S PERSONAL REPRESENTATIVE
FOR MICRONESIAN STATUS NEGOTIATIONS

DONE AT MAJURO, MARSHALL ISLANDS, THIS 25TH DAY OF JUNE, ONE THOUSAND, NINE HUNDRED EIGHTY-THREE

FOR THE GOVERNMENT
OF
THE MARSHALL ISLANDS

PRESIDENT AMATA KABUA

PRESIDENT OF THE REPUBLIC
OF THE MARSHALL ISLANDS

SEC. 2. (a) With respect to section 321 of the Compact of Free Association and its related agreements, the jurisdictional provisions set forth in subsection (b) of this section shall apply only to the citizens and nationals of the United States and aliens lawfully admitted to the United States for permanent residence who are in the Marshall Islands or the Federated States of Micronesia.

(b)(1) The defense sites of the United States established in the Marshall Islands or the Federated States of Micronesia in accordance with the Compact of Free Association and its related agreements are within the special maritime and territorial jurisdiction of the United States as set forth in section 7, title 18, United States Code.

(2) Any person referred to in subsection (a) of this section who within or upon such defense sites is guilty of any act or omission which, although not made punishable by any enactment of Congress, would be punishable if committed or omitted within the jurisdiction of the State of Hawaii by the laws thereof, in force at the time of such act or omission, shall be guilty of a like offense and subject to a like punishment.

(3) The United States District Court for the District of Hawaii shall have jurisdiction to try all criminal offenses against the United States, including the laws of the State of Hawaii made applicable to the defense sites in the Marshall Islands or the Federated States of Micronesia by virtue of paragraph (2) of this subsection, committed by any person referred to in subsection (a) of this section.

(4) The United States District Court for the District of Hawaii may appoint one or more magistrates for the defense sites in the Marshall Islands. Such Magistrates shall have the power and the status of Magistrates appointed pursuant to chapter 43, title 28, United States Code, provided, however that such Magistrates shall have the power to try persons accused of and sentence persons convicted of petty offenses, as defined in section 1(3), title 18, United States Code, including violations of regulations for the maintenance of peace, order, and health issued by the Commanding Officer on such defense sites, without being subject to the restrictions provided for in section 3401(b), title 18, United States Code.

SEC. 3. Upon the effective date of the Compact of Free Association, the laws of the United States generally applicable to the Trust Territory of the Pacific Islands shall continue to apply to the Republic of Palau and the Republic of Palau shall be eligible for such proportion of Federal assistance as it would otherwise have been eligible to receive under such laws prior to the effective date of the [Compact, as determined by the Government of the United States.] *Compact, as provided in appropriation acts.*

SEC. 4. (a) Mutual agreement by the Government of the United States as provided in the Compact which results in amendment, change, or termination of all or any part thereof, shall be effected only by Act of Congress and no unilateral action by the Government of the United States provided for in the Compact, and having such result, may be effected other than by Act of Congress.

(b) The provisions of subsection (a) shall apply to all actions of the Government of the United States under the Compact including, but not limited to, actions taken pursuant to sections 431, 432, 441 or 442 and shall also apply to any amendment, change, or termination in the Agreement between the Government of the United States and the Government of the Federated States of Micronesia Regarding Friendship, Cooperation and Mutual Security Concluded Pursuant to Sections 321 and 323 of the Compact of Free Association referred to in section 462(j) of the Compact and the Agreement Between the Government of the United States and the Government of the Marshall Islands Regarding Mutual Security Concluded Pursuant to Sections 321 and 323 of the Compact of Free Association referred to in section 462(k) of the Compact and shall apply to the amendment, change, or termination of any agreement the terms of which are incorporated by reference into the Compact.

(c) The determination by the Government of the United States under section 219 of the Compact shall be as provided in appropriation acts.

SEC. 5. (a) The authorization provided by the Act of June 30, 1954 (68 Stat. 330) shall remain available after the effective date of the Compact with respect to the Federated States of Micronesia and the Republic of the Marshall Islands for the following purposes: (1) prior to October 1, 1986 for any purpose authorized by the Compact and (2) transition, including, but not limited to, completion of projects and fulfillment of commitments or obligations; termination of the Trust Territory Government and the operation of the High Court; health and education as a result of exceptional circumstances; ex gratia contributions to or for the populations of Bikini, Enewetak, Rongelap, and Utrik; and technical assistance and training in financial management, program administration, and maintenance of infrastructure.

(b) Technical assistance may be provided pursuant to section 226 of the Compact by Federal agencies and institutions of the Government of the United States to the extent such assistance may be provided to States, territories, or units of local government, or to the Trust Territory of the Pacific Islands prior to the effective date of the Compact.

(c) In addition to the programs and services set forth in section 221 and pursuant to section 224, the programs and services of the following agencies shall be made available as on the day prior to the effective date of the Compact:

(1) to the Federated States of Micronesia—

(A) Farmers Home Administration: Provided, That, in lieu of continuation of the program, the President may transfer to the Government of the Federated States of Micronesia, without cost, the portfolio of the Farmers Home Loan Administration applicable to the Federated States of Micronesia and provide such technical assistance in management of the portfolio as may be requested;

(B) Legal Services Corporation

(C) Public Health Service

(2) to the Republic of the Marshall Islands—

(A) Legal Services Corporation

(B) Public Health Service

(d) Upon the request of the government of the Federated States of Micronesia or the Republic of the Marshall Islands, pursuant to section 224 of the Compact the President may, by proclamation, continue any Federal program which has been extended to the Trust Territory of the Pacific Islands to such government for a transition period of not to exceed three years from the effective date of the Compact if he determines that

such a temporary continuation of the program would assist the requesting government in its transition.

SEC. 6. (a) Appropriations made pursuant to the Compact of Free Association or any other provision of this Act may be made only to the Secretary of the Interior who shall have authority over any program or activity provided to the Federated States of Micronesia or the Republic of the Marshall Islands by the United States pursuant to the Compact of Free Association or pursuant to any other authorization except for the provisions of sections 161(e), 313, and 351 of the Compact of Free Association and the authorization of the President to agree to an effective date contained in section 1 of this Act. The resident representatives of the United States to the Federated States of Micronesia and to the Republic of the Marshall Islands pursuant to Article V of Title I of the Compact of Free Association shall be appointed by the Secretary of the Interior.

(b) All programs and services provided to the Federated States of Micronesia or the Republic of the Marshall Islands by Federal agencies may be provided only after consultation with, approval by, and under the supervision of the Secretary of the Interior, and the head of each Federal agency is directed to cooperate with the Secretary of the Interior and to make such personnel and services available as the Secretary of the Interior may request.

and from the Committee on Finance, with an amendment, on page 91, after line 23, insert the following:

SEC. 7. (a) Sections 242 and 243 of the Compact shall be construed and applied as if they read as follows:

"Sections 242 and 243

"For such time as the Federated States of Micronesia or the Marshall Islands are designated by the President as beneficiary developing countries under title V of the Trade Act of 1974 (relating to Generalized System of Preferences)—

"(1) if the cost or value of materials produced in the customs territory of the United States is included with respect to an eligible article which is a product of the Federated States of Micronesia or the Marshall Islands, an amount not to exceed 15 percent of the appraised value of the article at the time it is entered that is attributable to such United States cost or value may be applied toward determining the percentage referred to in section 503(b)(2) of such title; and

"(2) canned tuna that is the product of such States or Islands may not be treated as an eligible article under such title.".

(b)(1) Subsection (a) of section 253 of the Compact shall not apply.

(2) Subsection (b) of section 253 of the Compact shall apply only to individuals who are nonresidents and not citizens of the United States.

(c) The relief from liability referred to in the second sentence of section 254(a) of the Compact means only—

(1) relief in the form of the foreign tax credit (or deduction in lieu thereof) available with respect to the income taxes of a possession of the United States, and

(2) relief in the form of the exclusion under section 911 of the Internal Revenue Code of 1954.

(d) Section 255 of the Compact shall be construed and applied as if it read as follows:

"Section 255

"(a) EXTENSION OF SECTION 936 TO THE MARSHALL ISLANDS AND THE FEDERATED STATES OF MICRONESIA.—For purposes of section 936 of the Internal Revenue Code of 1954, the Marshall Islands and the Federated States of Micronesia shall be treated as if they were possessions of the United States.

"(b) EXCHANGE OF INFORMATION.—Subsection (a) shall not apply to the Marshall Islands and the Federated States of Micronesia (as the case may be) for any period after December 31, 1986, during which there is not in effect between the appropriate government and the United States an exchange of information agreement of the kind described in section 274(h)(6)(C) (other than clause (ii) thereof) of the Internal Revenue Code of 1954.

"(c) PROCEDURE IF SECTION 936 INCENTIVES REDUCED.—If the tax incentives extended to the Marshall Islands and the Federated States of Micronesia under subsection (a) are, at any time during which the Compact is in effect, reduced, the Secretary of the Treasury shall negotiate an agreement with the Marshall Islands and the Federated States of Micronesia under which, when such agreement is approved by law, they will be provided with benefits substantially equivalent to such reduction in benefits. If, within the 1-year period after the date of the enactment of the Act making the reduction in benefits, an agreement negotiated under the preceding sentence is not approved by law, the matter shall be submitted to the Arbitration Board established pursuant to section 424 of the Compact. For purposes of article V of title two of the Compact, the Secretary of the Treasury or his delegate shall be the member of such Board representing the Government of the United States. Any decision of such Board in the matter when approved by law shall be binding on the United States.

"(d) THE MARSHALL ISLANDS AND THE FEDERATED STATES OF MICRONESIA TREATED AS NORTH AMERICAN AREA.—For purposes of section 274(h)(3)(A) of the Internal Revenue Code of 1954, the term 'North American area' shall include the Marshall Islands and the Federated States of Micronesia.".

(e) Nothing in any provision of this joint resolution (other than this section) which is inconsistent with any provision of this section shall have any force or effect.

(f) This section shall apply to income earned, and transactions occurring, after September 30, 1985, in taxable years ending after such date.

(g) The Secretary of the Treasury or his delegate—

(1) shall conduct a study of the effects of the tax provisions of the Compact (as clarified by the foregoing provisions of this section), and

(2) shall report the results of such study before October 1, 1987, to the Committee on Ways and Means of the House of Representatives and the Committee on Finance of the Senate.

Mr. McCLURE. Mr. President, I ask unanimous consent that the committee amendments be considered en bloc and agreed to en bloc, and that the text as amended be considered as original text for further amendment.

The PRESIDING OFFICER. Is there objection?

Mr. BYRD. Mr. President, reserving the right to object, I wish the Senator would not make that request at this moment.

Mr. McCLURE. Mr. President, I will withhold that request. I will proceed with my opening statement and then make the request. As everyone knows, we have other amendments to be offered. The question is whether they will be offered as second-degree amendments to the committee amendments or whether they will be offered as first-degree amendments to the amended text. I will withhold that request for the moment.

Mr. President, I rise in strong support of Senate Joint Resolution 77 as reported by the Committee on Energy and Natural Resources. Senate Joint Resolution 77 was transmitted to the Congress by the President with his strong endorsement and would approve the Compact of Free Association between the United States and the Federated States of Micronesia and the Republic of the Marshall Islands, two of the four governments of the Trust Territory of the Pacific Islands. Approval of the compact will lay the basis for termination of the trusteeship and the achievement of sovereignty and self-government by the Federated States and the Marshalls.

Congress has previously provided its approval to the covenant with the Northern Marianas Islands under the terms of which the Northern Marianas will become a part of the United States upon the termination of the trusteeship. Identical legislation, Senate Joint Resolution 286, was unanimously reported by the committee late last year.

The compact is the product of 13 years of negotiations beginning in 1969 under President Nixon and continuing through succeeding administrations. Its origins lie in the original decision after World War II to place under the United Nations trusteeship system the islands formerly entrusted to Japan by the League of Nations under a class C mandate. Micronesia is the last remaining trusteeship and the only one designated as a strategic trust.

The trusteeship agreement with the United Nations, under which the United States is the administering authority requires that the United States "foster the development of such political institutions as are suited to the trust territory and shall promote the development of the inhabitants of the trust territory toward self-government or independence as may be appropriate to the particular circumstances of the trust territory and its peoples and the freely expressed wishes of the peoples concerned."

The backgound and history of Micronesia and the negotiations are fully covered in the hearings which the committee conducted in 1975 on the covenant for the Northern Marianas and the committee's report in 1975 to accompany House Joint Resolution 549, the resolution to approve the cov-

enant with the Northern Marianas, the hearings which the committee conducted in May of last year on Senate Joint Resolution 286, the report accompanying Senate Joint Resolution 286 and in the report to accompany Senate Joint Resolution 77.

I will not go into extensive detail on that history, however, I think it is important to note that the compact which the President has requested the Congress to approve has already been approved by both the peoples and the governments of both the Federated States of Micronesia and the Marshall Islands. In separate plebescites conducted by the governments of the Federated States and the Marshall Islands and observed by a visiting mission from the United Nations Trusteeship Council, the Federated States of Micronesia approved the compact by 79 percent on June 21, 1983, and later on September 7, 1983, the Marshall Islands similarly approved the compact by a vote of 58 percent.

The desires of the peoples of both the Federated States and the Marshalls to have the compact approved and their understandings and expectations with respect to the compact were eloquently stated by their elected representatives who testified at the committee hearing. I ask unanimous consent that the statements of Tosiwo Nakayama, president of the Federated States of Micronesia, and Amata Kabua, president of the Republic of the Marshall Islands before the Committee on Energy and Natural Resources be made a part of the RECORD.

There being no objection, the statements were ordered to be printed in the RECORD, as follows:

STATEMENT OF PRESIDENT AMATA KABUA, REPUBLIC OF THE MARSHALL ISLANDS, TO THE COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. Chairman and distinguished members of this Committee:

On behalf of the Government and the people of the Marshall Islands, I would like to thank this Committee for the opportunity to testify on the Compact of Free Association (the Compact). We are here today to tell you what the Compact means to us, and to seek expeditious approval of the Compact.

However, before I go further, I would like to introduce the other members of the Marshall Islands delegation: Philip Muller, Minister in Assistance; Oscar de Brum, Chief Secretary; and Carl B. Ingram, Advisor to the President.

THE POLITICAL STATUS NEGOTIATIONS

Mr. Chairman, it has taken us 15 years of sometimes difficult negotiations with the United States to conclude the Compact of Free Association. Progress was often made slowly, if at all. On at least one occasion, intervention from this Committee was necessary to move the process forward.

Also, as divergent views within the Marshall Islands came to the forefront, they were examined and were often incorporated into the negotiating process. In recognition of the special interests of the people of Bikini, Enewetak, Rongelap and Utrik, the Government of the Republic of the Marshall Islands included their representatives within its delegation to the nuclear claims negotiations. Similarly, in recognition of the special interest of the Kwajalein people, the Government included their representatives in negotiations on the military land use agreement. As a result, the nuclear claims agreement and the military land use agreement, as concluded, incorporate input from those Marshallese most directly affected.

Through this whole process, the Marshall Islands has consistently sought a "free association" with the United States which included—

Recognition of the right of our people to adopt and amend their own constitution;

Recognition that sovereignty over the Marshall Islands resides in the people of the Marshall Islands and their duly constituted government;

Recognition that the people of the Marshall Islands possess the right of self-determination and may therefore choose independence or self-government in free association; and

Recognition that the Marshall Islands may unilaterally terminate free association.

Under the Compact, as negotiated, these objectives have been met. That is not to say the Compact is a perfect document. The Compact by its very nature is a document of compromises. However, the people of the Marshall Islands believe free association under the Compact is a fair and equitable relationship. On 7 September 1983, the people of the Marshall Islands by a 58 percent majority approved the Compact, and its related agreements, and in October of 1983, the Government of the Marshall Islands approved the Compact, and its related agreements, pursuant to its constitutional processes.

THE COMPACT OF FREE ASSOCIATION

Mr. Chairman, if I may, I would like to share with you, in general terms, what the Compact means to the people of the Marshall Islands.

First, and foremost, the Compact recognizes that through the exercise of our sovereign right to self-determination we have created a constitutional government, approved the Compact, and have authority and responsibility over our internal and foreign affairs. This sir, is very important to us. We are a free and sovereign people.

Under the economic provisions of the Compact, we have for the first time a dependable stream of funds for the implementation of income generating development projects. With these funds, we can begin to plan for the future, instead of only getting by for today. We can also provide our outer islands with the infrastructure they need, such as loading ramps for landing craft type vessels, and improvements to the air service we now provide.

Under the security and defense provisions of the Compact, we have the guarantee of a stable environment in which our economy can grow, and our government can mature.

Further, in recognition of the special relationship that exists between the people of the Marshall Islands and the United States, the United States has affirmed in a separate agreement, the Mutual Security Agreement, that in the event the security and defense provisions of the Compact expire or are terminated, the United States will treat an attack on the Marshall Islands as a danger to the United States, and will take action to meet the danger. Under this agreement, the United States will also have the authority to deny access to the Marshall Islands by the military forces of third countries. This agreement also reaffirms the commitment of the United States to assist the Marshall Islands to achieve long term economic advancement and self-sufficiency. These provisions of the Mutual Security Agreement will remain in effect until mutually terminated or modified.

Mr. Chairman, this is how we view the Compact, and this is why we seek its expeditious approval.

THE MILITARY USE AND OPERATING RIGHTS AGREEMENT [MUORA]

Mr. Chairman, as I mentioned above, the nuclear claims agreement and the military land use agreement are of great interest and significance to many Marshallese. For this reason, I would like to discuss these agreements in greater detail.

The main features of the MUORA are as follows:

1. For the sum of $9.0 million annually ($7.1 million from Section 211 funds and $1.9 million from Section 213 funds), the United States for an initial term of 15 years will have free access to and unrestricted control of designated defense sites within Kwajalein Atoll, and the United States will control entry and movement of people within the mid-corridor as described in the MUORA.

2. At the option of the United States, its use rights on Kwajalein Atoll can be extended another 15 years. Annual payments of $9.0 million would continue, and there would be a one time payment of $2.5 million. Under an earlier version of this agreement, the United States could extend its use rights 35 years. The option term was shortened at the request of Kwajalein landowners.

3. In the exercise of its use rights, the United States must use its best efforts to avoid harm to the people, environment and commerce of the Marshall Islands.

4. Should the United States need additional land within the Marshall Islands, the United States may request of the Government of the Marshall Islands that it provide such land by lease or other arrangements. The Government of the Marshall Islands will sympathetically consider any such request and shall provide a prompt response.

5. There shall continue to be a Community Relations Council (CRC) with representatives from the Government of the United States, the Government of the Marshall Islands, and the Kwajalein Atoll community. The CRC shall identify and consider all matters affecting relations between the defense site and the Kwajalein community, and shall recommend action as appropriate.

6. Those Marshallese now working on the defense site will continue to be employed at United States pay scales, and all Marshallese employees, including new hires, shall receive equal pay for work.

The sums received by the Government of the Marshall Islands under the MUORA shall, by a separate agreement entered into between the Government of the Marshall Islands and the Kwajalein landowners, be passed through to the landowners. Under that agreement, the Kwajalein landowners must during the first fifteen years dedicate $2.84 million annually to development projects. The remainder will be available for use payments to the landowners. Should the United States decide to extend its use of Kwajalein an additional 15 years, the Kwajalein landowners must dedicate $1.9 million of the $9 million they will receive annually to development projects. The remaining $7.1

million will be available for use payments. Over 30, years, this will result in $71.1 millions for development projects for Kwajalein Atoll alone, and $198.9 million in land use payments for the landowners. Both sums will, in part, be adjusted for inflation.

THE NUCLEAR CLAIMS AGREEMENT

Mr. Chairman, between 1947 and 1958 the United States detonated 66 nuclear weapons at Bikini Atoll and Enewetak Atoll, contaminating to some extent all of the atolls in the northern Marshall Islands, causing the dislocation of 167 Bikinians and 134 Enewetakese, and subjecting other Marshallese, including 253 Rongelapese and Utrikese, to dangerously high levels of radiation.

On 25 June 1983, we were able to renegotiate an agreement with the Reagan administration to settle claims arising out of the United States Nuclear Testing Program. This agreement was renegotiated when an earlier version, concluded in May of 1982, had proven to be unacceptable to the people. The main features of the renegotiated nuclear claims agreement are as follows—

1. On the effective date of the Compact, the United States will pay to the Marshall Islands $150 million. This sum will be invested by the Marshall Islands in a perpetual fund that will yield $18 million per year for each of the first 15 years. The fund and its earnings can not, without the consent of the Governments of the United States and the Marshall Islands, be used or pledged for any purpose other than to address the unique needs of the people of the Marshall Islands as a result of the nuclear testing program.

2. From fund earnings in the first 15 years, the Government of the Republic of the Marshall Islands shall receive $2 million annually to purchase from the United States services to assist the government to include, in its health-care system, health-care programs and services related to consequences of the nuclear testing program and contemplated in United States Public Law 95-134 and United States Public Law 96-205.

3. During the first 15 years of the fund, the people of Bikini, Enewetak, Rongelap and Utrik will receive a guaranteed total of $183,750,000 in quarterly payments allocated as follows:

To the people of Bikini: $75 million;

To the people of Enewetak: $48.75 million;

To the people of Rongelap: $37.5 million; and

To the people of Utrik: $22.5 million.

4. The local government council for each of the above atolls will be the distribution authority for the sums allocated to its people. These funds are to be used to compensate the people for loss or damage to property and person as a result of the nuclear testing program, and can be used for projects such as supplemental feeding programs, rehabilitation of contaminated lands, resettlement, education and the like. Pursuant to an agreed minute, the people of Enewetak intend to set aside $5.0 million of the funds they shall receive to provide continuing funding for the agricultural and food supplement programs they now receive from the United States.

5. Under the provisions of the nuclear claims agreement, the Government of the Marshall Islands can contract with the United States for the continuation of the Enewetak agriculture and food supplement programs and for the continuation of the Bikini food supplement program. Should the people of Enewetak or Bikini decide they wish to dedicate a portion of their claims funds for the continuation of such programs, it is the intent of the Government of the Marshall Islands to enter into the necessary contractual arrangements with the United States on a reimburseable basis.

6. Also during the first 15 years of the Fund, a Claims Tribunal will be established for the adjudication of uncompensated claims. A total of $45.75 million will be available to the Tribunal for payment of any such claims of the people of the abovementioned atolls or any other Marshallese. The Tribunal will be established by the Government of the Marshall Islands, but will be independent of its executive and legislative branches.

7. After the first 15 years, it is contemplated that the original sum of $150 million will remain intact and that up to 75% of the interest earned by the fund will be available to the Claims Tribunal to pay uncompensated claims, if any. Interest earned by the fund, but not required to make the abovementioned payments, shall be made part of the fund or used by the Government of the Marshall Islands for other programs and services for the people of the Marshall Islands as their unique needs and circumstances resulting from the nuclear testing program may require, including the continuation of health and radiological monitoring programs.

8. The agreement will settle all claims of the Marshallese people against the United States as a result of the nuclear testing program, and no United States court will have jurisdiction to entertain such claims. Claims now pending in the United States courts will be dismissed.

The present nuclear claims agreement is a significant improvement over the earlier one which provided only $150 million over 15 years. The new agreement provides $420 million over the same period of time. For those 554 plus Marshallese and their descendants who suffered loss or damage to property and person as a result of the United States Nuclear Testing Program, this settlement compares very favorably to the settlement obtained by United States servicemen claiming injuries as a result of exposure to agent orange, and it compares favorably to a court judgment obtained by families of those exposed to radiation from nuclear tests within the United States. According to the 21 May 1984 issue of Time Magazine, a $180 million trust fund will be used to compensate an estimated 50,000 to 60,000 servicemen exposed to agent orange. According to that same issue of Time Magazine, the families of 10 now deceased leukemia victims shall receive $2.66 million for the death of their family member as a result of the Nevada nuclear testing program.

A segment of those Marshallese affected by the nuclear testing program contends that the level of compensation under the revised nuclear claims agreement is not sufficient. We ask that you consider these claims, although we believe that the revised agreement is not only comparatively a good settlement, it is fair, and the best we could negotiate with the Administration.

With conclusion of the nuclear claims agreement in June of 1983, the Compact of Free Association and its related agreements were put to a plebiscite of the people on 7 September 1983.

THE PLEBISCITE

The plebiscite was preceeded by an extensive education program which included frequent radio broadcasts and 129 community meetings sponsored by a non-partisan plebiscite task force. These meetings were attended by 4,495 Marshallese, about 30 percent of the estimated number of eligible voters. The task force teams visited almost all of the populated centers in the Marshall Islands, as well as five cities in the United States.

During the plebiscite program pro-compact and anti-compact forces also made radio broadcasts, issued newspaper advertisements and held rallies throughout the Marshall Islands. The Government of the Marshall Islands can say with confidence that everyone who wanted to learn about the Compact of Free Association and its related agreements had an opportunity to do so, and many did.

On 7 September 1983, over 10,000 Marshallese, or 60 percent of the eligible voters, participated in the plebiscite. In response to Part 1 of the plebiscite ballot, the Compact and its related agreements were approved by a 58 percent majority. The results represent a free and informed sovereign act of self-determination by the people of the Marshall Islands, and provide the basis for termination of the Trusteeship and implementation of the Compact. In response to Part 2 of the plebiscite ballot, less than 30 percent of the voters indicated a preference for any political status other than free association (in the event free association was not approved). Moreover, less than five percent of the voters indicated a preference for either independence or commonwealth. Those who now advocate commonwealth or independence for the Marshall Islands do not have the support of the people. The people of the Marshall Islands have spoken, and they have chosen free association as set forth in the Compact.

TRANSITION MATTERS

Although the Compact adequately provides for our future relationship with the United States, there are certain transition matters in respect to which we seek this Committee's assistance, including—

Funds for pre-1982 deficits, approximately $17 million for The Trust Territory;

Funds to retire medical referral debts, $4.5 million;

Funding of prior service benefits for those who worked for the Navy and the Trust Territory Government prior to 1968, $15 million;

Funds to construct a new facility for the College of Micronesia Nursing School in the Marshall Islands, $3 million;

Funds for the construction of a new capitol building for the Marshall Islands, $7.0 million; and

Funding for war claim awards, $12.5 million.

These items represent unfinished business of the United States as the Administering Authority under the Trusteeship Agreement.

We also believe that during, at least, the initial stages of free association we will be in need of technical assistance from the United States in many areas, including financial management, management of our medical referral program, and law enforcement.

In this regard, we seek the assistance of this Committee in obtaining funds for these projects. We believe these projects to be worthwhile and cost effective.

CONCLUSION

Mr. Chairman, with approval of the Compact by the people of the Marshall Islands on 7 September 1983, and with final acceptance of the Compact as a treaty by the Government of the Republic of the Marshall Is-

lands in October of 1983, the Marshall Islands has done its part and is ready to move forward into free association with the United States During the 37 year history of the Trusteeship Agreement, we have, with the assistance of the Government of the United States and this Committee, reached a point of political, economic and social maturity which provides the basis for termination of the Trusteeship Agreement and implementation of the Compact. It remains now for the United States to approve the Compact.

On 30 March 1984, President Reagan submitted the Compact to the Congress for approval after a five month delay. Hearings are now being held in the House of Representatives as well as here in the Senate.

After you have thoroughly reviewed the Compact as we have, and if you find it to be fair and equitable as we have, we ask that you seek expeditious approval of the Compact. Komoltata.

STATEMENT OF HON. TOISWO NAKAYAMA, PRESIDENT OF THE FEDERATED STATES OF MICRONESIA TO THE COMMITTEE ON ENERGY AND NATURAL RESOURCES OF THE U.S. SENATE

Mr. Chairman and distinguished members, I am honored to appear before you today to offer testimony on behalf of the people of the Federated States of Micronesia. I am here to urge the U.S. Congress to take prompt and favorable action on Senate Joint Resolution No. 286. By that action, you would approve the Compact of Free Association between our two countries and set the stage for termination of the 1947 U.N. Trusteeship Agreement.

With me today are: from the FSM National Government, Mr. Bethwel Henry who is the Speaker of the Congress of the Federated States of Micronesia and Mr. Andon Amaraich, Chairman of the Commission on the Future Political Status and Transition. From the State governments are Governors John Mangefel of Yap State and Resio Moses of Ponape State. State legislature Speakers Kisande Sos of Truk, Gaius Nedlic of Kosrae, Salter Etse and Vice Speaker Joannes Edmond of Ponape. Also with me today are: Senator Kasiano Joseph of Ponape, High Chief Kenmed of Yap and Chief Magistrate Damian Primo of Ponape.

Following approval of the Compact last year in a plebiscite, our people anxiously awaited consideration of this historic document by the Congress of the United States. It is my hope in coming here to impress upon you the strong hopes of my people that you will approve the Compact, and do so in this congressional session. Mr. Chairman, we in the Federated States of Micronesia deeply desire to terminate the United Nations Trusteeship under which we have lived for 37 years and become freely associated with the United States.

The occurrence of this hearing today marks one of the final steps in a long and complex process of political development in Micronesia. Remarkably, the document before you is the product of the longest unbroken series of political negotiations in your great nation's history.

I am especially privileged to have been associated with the long struggle toward free association since its very inception in the mid-1960's. At that time, Micronesia's newly elected congress members initiated a careful study of possible future status options. I served in its first Congress of Micronesia and as a member of the original Micronesian status negotiating team. Thus, I speak from firsthand knowledge in applauding the consistent dedication and untiring effort of the United States under successive administrations both Republican and Democrat. This steady commitment has reassured Micronesians at every stage of our journey that the United States was adhering to its basic trusteeship responsibility. That is, to foster the advancement of the territory toward self-government or independence, according to the wishes of the Micronesian people.

The people of my country take great pride in their new constitution and look forward to their post-trusteeship association with the United States. I feel that every American citizen today, can and should take pride in the Compact of Free Association. The Compact reflects the continued validity of the same democratic principles and ideals that set the United States on its own course over 200 years ago.

When one stops to think about it, there are a number of striking parallels between the Federated States of Micronesia today and the new nation that evolved from the 13 original United States colonies. We are, as you were, a diverse people separated by relatively great distances and lacking effective means to communicate with one another. Just as it was with you, our sense of a need to deal effectively as one nation with an outside world which we can no longer ignore led us to adopt a constitution, uniting our states in a federation with a central government. This institution is entirely new to us and in some ways contrary to our traditions. The only thing that makes it possible for that government to work, and it has worked well, is the thing that also made your constitution work. In spite of our local differences, we all share a common belief in the freedom and dignity of the individual, and in the need to work together to protect, nurture and enjoy that individual freedom.

To many Americans, our Pacific islands are a very long distance away and must seem unknown and even mysterious. But, as you consider the Compact and the proposed new relationship of free association, it is extremely important for you to realize that a strong natural affinity exists between my people and yours which transcends even the close working relationships that have grown up between us during the trusteeship. The fact is that we Micronesians are and always have been very "American" in spirit. While we are intrigued to think of entering into a formal association with a great nation such as the United States, this does not strike us as an odd or unnatural result of the years of trusteeship. Quite the contrary. The relationship of free association as embodied in the Compact serves our people's sense of need for identity. It meets our ambition after so long a colonial period to take a real place in the community of nations. But at the same time, our free choice of association with the United States allows us to accept your considerable generosity with a sense of dignity. We make our contribution toward the relationship and toward the maintenance of world peace and security by entrusting the defense of our vast area to the United States. Again, given your country's and our mutual dedication to the principles of democracy, and especially our common respect for individual freedoms, the prospect of free association with the United States is a natural alliance.

At this point, Mr. Chairman, I refer to the genuine enthusiasm that is felt by our people throughout the Federated States of Micronesia for the Compact of Free Association. I speak of our individual citizens, who charged their first elected leaders to define that political status which would best ensure a stable and beneficial environment for themselves and future generations.

A variety of options for our political future were discussed widely in Micronesia throughout the mid-1960's. Finally, in 1969, our Joint Committee on Future Political Status informed the United States that the Micronesian people wished to develop a relationship of free association with the United States, based on four fundamental principles; namely.

(1) that sovereignty in Micronesia resides in the people of Micronesia and their duty constituted government;

(2) that the people of Micronesia possess the right of self-determination and, may, therefore, choose independence or self-government in free association with any nation or organization of nations;

(3) that the people of Micronesia have the right to adopt their own constitution and to amend, change or revoke any constitution or government plan at any time; and

(4) that free association should be in the form of a revocable compact terminable unilaterally by either party.

I cannot take time here to describe in detail the lengthy Compact negotiations. Suffice to say, that all parties concerned were aware that we were working on a relationship which would be unique in international law. While the term, "free association" has found other forms of expression, free association for Micronesia and the United States was to involve a unique blending of principles and arrangements tailored to the needs of the parties involved. However unique the relationship may be, it has the support of the people of the Federated States of Micronesia. It has that support largely because the basic principles of the free association relationship embodied in the Compact are consistent with each of the four original charges given to our negotiators.

It is also noteworthy that the negotiations did not take place in static circumstances. The political status of the Micronesian parties evolved in quite significant ways, even while the negotiations on free association proceeded. In fact, one of the original fundamental goals was realized when in 1979 the Micronesian parties with assistance of the United States installed governments pursuant to constitutions drafted and freely chosen by the Micronesian peoples themselves. Thus, the people have witnessed and participated in an ongoing process of self-determination throughout the period from 1965 till this very day.

I do not speak lightly of the process of participation. Our leaders and negotiators have taken conscious steps over the past years to inform the people of the various twists and turns in the negotiations and to develop an accurate sense of their preference on a multitude of issues as we went along. Partly because of the necessity for that ongoing consultation, some have criticized the resultant slow pace of negotiations and even at times accused the Federated States of Micronesia of lacking the resolve to complete the task. Mr. Chairman, we have never lacked that resolve, and I might add that neither we, the leaders, nor the people have ever put aside our dedication to the original goal.

We Micronesians are a thoughtful people. We have a strong traditional sense of consensus. We know that these qualities lend strength and soundness to our efforts. We

have formed our institutions of government and negotiated the free association relationship with meticulous care. For that reason, I am able to appear before you today and state with utter confidence that the people of the Federated States of Micronesia embrace the Compact of Free Association.

I am also able to state with equal confidence that we stand ready to meet the obligations and expectations arising from the Compact. Thanks to the dedication of our people, and thanks also to the unflagging support of the United States, we have not had to wait for the termination of the trusteeship to become self-governing.

The United States has wisely fostered our political development in recent years. As a consequence, you are not asked to approve the considerable undertakings in the Compact absent the knowledge that the Micronesian people can and will successfully shoulder their responsibilities.

We are both proud and grateful that in a world where the evolution of so many former colonies into nationhood has been fraught with difficulty, instability and dissolutionment, our transition out of trusteeship is occurring in an atmosphere of well-founded optimism for the future. Frankly, Mr. Chairman, we in the Federated States of Micronesia would have had it no other way.

This statement would be seriously deficient were I not to lay stress on the gratitude of my people specifically for the willingness of the United States to make strong financial commitments to our country, long after your trusteeship obligations have ceased. For our part, let me say that in a broad sense, the obligation of "full faith and credit" will flow in both directions under the Compact. For us, it will be an obligation of stewardship, to apply your assistance wisely and effectively. We are by no means oblivious to the burdens placed on your budgets in future years, and we are determined to see that your investment is amply rewarded.

In closing, I wish to reiterate that it has been and remains my people's wish to have a close relationship with the United States. While the Compact is commonly viewed from a fifteen-year perspective, given our common principles and ideals, we cannot foresee that the closeness between our countries would ever dissipate. I firmly believe you can share your pride in this document as a carefully crafted instrument which will protect freedom and democracy in the western Pacific for many years to come. I thank you for this opportunity to address you, and I hope that you will see fit to act favorably on Senate Joint Resolution No. 286 during this session.

Mr. McCLURE. Mr. President, the compact which we are approving is not a simple document. It represents the efforts by several administrations and representatives of the Micronesian governments to achieve a basis under which the peace and security of the region could be maintained and the peoples of Micronesia can enjoy full self-government for the first time in 400 years.

The compact acknowledges that each of the two governments are self-governing and competent to conduct their own foreign affairs. The compact also makes available to these governments various levels of financial and program assistance to enable them to develop their economies and provide for the health and education of their residents. The compact also guarantees the security of the area so that these countries may develop in peace.

In recommending that the Senate approve the compact of free association, the Committee on Energy and Natural Resources has adopted several amendments. The committee amendments would clarify that the allocation of funds among the various governments of the trust territory will be as provided for in appropriation acts in order to insure that the intent expressed by the Congress in appropriating funds is fully achieved. The committee has also recommended clarifying language as a condition of congressional approval that any change, alteration, amendment or termination of the compact or any of its provisions by the Government of the United States may be done only through the enactment of legislation. While the compact carries with it international obligations, it is also a domestic law of the United States, and should not be subject to any unilateral action by any administration. The proposed new section 4 makes it clear that not only the compact but those subsidiary agreements the terms of which are incorporated by reference into the compact as well as the two mutual security agreements will remain unaltered unless the Congress acts specifically to change their provisions.

The committee has also recommended the addition of a new section which would continue the current authorization for the Trust Territory of the Pacific Islands for a variety of purposes including the completion of ongoing projects and the fulfillment of commitments or obligations which the United States has to the trust territory but which are not specifically addressed in the compact. I believe it is important in entering into this new relationship that the United States fulfills its obligations and I think it is unfortunate that budgetary considerations have delayed the completion of the infrastructure program in the trust territory well beyond the 5-year program which the Congress first approved. The authorization also will permit the appropriation of necessary funds to wind down the activities of the trust territory government including the activities of the high court as well as any necessary health and education assistance as a result of exceptional circumstances. When the compact was under negotiation, the parties did not contemplate either the cholera epidemic in Truk nor the growth of leprosy within the federated states. The essence of free association is that the United States will be in a position, at the request of the governments of the federated states or the Marshall Islands, to render assistance in this and other areas as circumstances may warrant. The committee strongly supports the continuance of the authorization for this purpose.

The section would also authorize ex gratia contributions to or for the populations of Bikini, Enewetak, Rongelap, and Utrik. Section 177 of the compact addresses and resolves the legal issues surrounding the nuclear testing program in the northern Marshalls, but the committee believes that the United States has and will continue to have a strong humanitarian interest in the welfare of the populations of the four affected atolls. This authorization is not intended in any way to indicate any dissatisfaction with the terms of the subsidiary agreement to section 177 or the adequacy of the compensation contained therein. The authorization is designed to afford the government of the Marshall Islands and the populations of the fourth affected atolls access to the Congress in the event that needs arise for which we can be of assistance.

The section also provides for the continuation of technical assistance and training in financial management, program administration, and maintenance of infrastructure. It is clear from the results of both inspector general reports and studies by the General Accounting Office that these three areas are the ones which pose the greatest difficulties for both the federated states and the Marshall Islands in the years to come. The achievement of self-government in both these areas requires more than just the devolution of political control, it also requires the development of management capability and the experience of administration. The experience of the Northern Mariana Islands serves as an important and useful measure of the potential of these governments to exercise self-government. In the few short years since the Northern Marianas has enjoyed constitutional self-government, its experience and capability in managing its own affairs and preparing and implementing budget and fiscal responsibility has been remarkable. Three years ago, during the appropriations process, I noted that the budget justifications submitted by the Northern Mariana Islands were better than several submitted by Federal agencies which had far more experience in preparing such material. While there are still deficiencies in the Marianas, their progress has far exceeded expectations. The provision of this technical assistance is, I believe, essential and should not in any way be interpreted as a disparagement of the ability of either the federated states or the Marshalls, but rather as a firm belief in their capability to fully assume the responsibilities of self-government.

The committee has also proposed the continuation of three programs to

the Federated States of Micronesia and two to the Republic of the Marshall Islands during the posttrusteeship period. To the Federated States of Micronesia, the committee is recommending the continuation of the programs of the Farmers Home Administration, the Legal Services Corporation, and the Public Health Service. The federated states recommended the continuation of these programs and the committee believes that their continuation would be of benefit. The importance of the Public Health Service in light of both the cholera and leprosy problems in the federated states should not be underestimated. To the Republic of the Marshall Islands, the committee has recommended the continuation of the programs of both the Legal Services Corporation and the Public Health Service at the request of that government. Since it is unclear when the compact will actually go into effect and when the trusteeship will terminate, the committee believes it is advisable to confer upon the President the authority to continue for a period of not to exceed 3 years the programs and services of any other Federal agency operating within the area as a matter of transition. It may be that the effective date will occur in the middle of a fiscal year and that the orderly conclusion and winding down of programmatic assistance can best be achieved by delaying the termination of individual programs to the end of the fiscal year or later as the circumstances warrant.

The final amendment recommended by the committee addresses a matter of considerable concern to the committee and that is the commitment of the United States to assist these two governments in their future development and the ability of the executive branch to provide the financial and programmatic assistance which is integral in the relationship. There seems to be a persistent inability or unwillingness within the administration to recognize there is a distinction and a difference between recognition of self-government and the provision of assistance. In opening the hearings on the compact I stated:

> I am very concerned over the attitude of the administration not only with respect to past commitments and undertakings but also with respect to the commitments and promises both explicit and implicit in the compact. The compact proposes a close and continuing relationship between these countries and the United States. The United States agrees to undertake certain responsibilities to assist these countries. There is no reason why these commitments cannot be implemented in a way which fully recognizes the sovereignty of these countries, respects their right to self-government and control over their internal and external affairs, and that at the same time makes available the resources and assistance which they will need in order to develop.
>
> I want to make it as clear as necessary that the United States will fulfill its obligations, both those of the past and the promises of the future. This committee has repeatedly offered to work with the administration to develop a format to do this and I simply want to caution the administration that it will be done with or without your support. The undertakings in this compact will not be allowed to become empty promises as a result of budget and organizational maneuvering by the Office of Management and Budget or other agencies.

Mr. President, this is not simply my personal view but has represented the views of all those directly involved with the trust territory and the process of the negotiations. In 1980, this issue came before the committee during confirmation hearings and the chairman of the committee at that time, Senator Jackson, eloquently pointed out the mistake which would be involved in the designation of the Department of State as the lead agency for the provision of assistance. Senator Jackson at that time correctly pointed out that such a designation would be damaging to the basic mission of the State Department in requiring them to undertake. responsibilities for which they were neither equipped or trained and would be disastrous as far as the intended beneficiaries of the assistance were concerned. There are certain responsibilities provided for under the compact for which the Department of State is the agency best qualified, such as the provision of consular assistance for the Micronesian governments in other countries. That is a role which they presently perform and which they should perform in the posttrusteeship as requested by the Micronesian governments. However, those limited and well identified ministerial roles should not overshadow nor dictate the internal United States-free associated state relationship with respect to the provision of financial, programmatic, or technical assistance. The compact does not provide for foreign aid assistance in the traditional sense but rather a series of financial and programmatic as well as technical assistance to be provided on a government to government basis in many of the same areas and for similar purposes as such assistance is currently provided to American Samoa, Guam, and the Northern Mariana Islands. The nature of such assistance does not in any fashion detract from the sovereign and self-governing status of either the federated states nor the Marshall Islands but represents a commitment by the United States to these two governments and their peoples who have chosen to enter into a close relationship of free association with the United States. I would point out that the compact itself in articles IV and V of title II treats the freely associated states in much the same manner as the territories. Section 242 actually uses the language "the Marshall Islands and the Federated States of Micronesia shall be treated as if they were insular possessions of the United States * * *" without diminishing or limiting either their sovereignty or self-government. To subordinate the ability of the United States to fulfill its obligations and its promises in the provision of such assistance to jurisdictional empire building should not and will not be permitted. While the committee remains agreeable to discussing with the administration organizational options to coordinate and consolidate U.S. responsibilities in the area, we are not prepared to support an arrangement which would undermine the basic relationship which this compact is designed to achieve.

To those who might think that the Department of State would be more sensitive to the needs of these areas than the Department of the Interior has been, I suggest that a review of recent history would be enlightening. In 1979 the committee was forced to hold hearings and propose legislation, which was later enacted, to ensure that the peoples of the territories and the trust territory would be aware of any proposal to use a Pacific island to store spent nuclear fuel. The hearing record demonstrates that when the Department of State embarked on the proposed study they did not inform the Department of the Interior which had administrative responsibility for the areas, and when it became clear that the names of the islands under consideration should be disclosed, they resisted the Department of the Interior informing the territorial and trust territory governments at the same time the Department of State was informing foreign governments. More recently, the administration issued interim regulations regarding textiles, and, without any consultation with Interior or analysis of the effect on the territorial economies, included the territories. While I am pleased that Secretary Clark raised his concerns within the administration as Secretary Andrus previously did with respect to the spent fuel proposal, the committee amendment directly addresses this problem by requiring agencies to consult with and obtain the approval of the Secretary of the Interior with respect to actions taken or proposed under the compact.

Mr. President, I believe that the compact lays a good foundation for the termination of the trusteeship and, with the committee amendments, the United States will be in a position to fulfill its obligations and promises to these governments. I offer my congratulations to the peoples of both the Federated States of Micronesia and the Republic of the Marshall Islands and my commitment to the continued friendship and mutual respect which we have. I urge the adoption of the committee amendments and the pas-

sage of Senate Joint Resolution 77, as amended.

Mr. President, I ask unanimous consent that the committee amendments be considered en bloc and agreed to en bloc.

The PRESIDING OFFICER. Is there objection?

Mr. DANFORTH. Mr. President, reserving the right to object, is it my understanding that the committee amendments referred to by the Senator from Idaho would include the amendment of the Finance Committee?

Mr. McCLURE. The committee amendment of the Finance Committee would be separately considered. This request covers only the committee amendments of the Committee on Energy and Natural Resources.

Mr. DANFORTH. I thank the Senator.

Mr. BYRD. I was going to ask the same question, Mr. President. Now it has been asked and answered.

The PRESIDING OFFICER. Is there objection?

The amendments of the Committee on Energy and Natural Resources were considered and agreed to en bloc.

AMENDMENT NO. 719

(Purpose: To achieve the objectives of the Multi-Fiber Arrangement, to promote the economic recovery of the United States textile and apparel industry and its workers, to reduce unemployment, and for other purposes)

Mr. THURMOND. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from South Carolina [Mr. THURMOND], for himself, Mr. HOLLINGS, Mr. MOYNIHAN, Mr. HELMS, Mr. HEFLIN, Mr. HEINZ, Mr. COHEN, Mr. WARNER, Mr. KENNEDY, Mr. MITCHELL, Mr. EAGLETON, Mr. SPECTER, Mr. EAST, Mr. COCHRAN, Mr. TRIBLE, Mr. DENTON, Mr. D'AMATO, Mr. SASSER, Mr. HATCH, Mr. PELL, Mr. MATTINGLY, Mr. GARN, Mr. LAXALT, Mr. ROCKEFELLER, Mrs. HAWKINS, Mr. GORE, Mr. DIXON, Mr. DODD, Mr. SIMON, Mr. FORD, Mr. DECONCINI, Mr. PRYOR, Mr. MATHIAS, Mr. LONG, Mr. LEAHY, Mr. METZENBAUM, Mr. RIEGLE, Mr. WEICKER, Mr. MCCONNELL, Mr. KASTEN, Mr. GLENN, Mr. BUMPERS, Mr. NUNN, and Mr. BYRD, proposes an amendment numbered 719.

Mr. THURMOND. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

TITLE II—TEXTILE AND APPAREL TRADE ENFORCEMENT

SEC. 201. SHORT TITLE.

This title may be cited as the 'Textile and Apparel Trade Enforcement Act of 1985'.

SEC. 202. POLICY.

The policy of the title is—

Mr. HELMS. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Until the Committee on Finance amendments have been acted on, no other amendments are in order.

Mr. McCLURE. Mr. President, I ask unanimous consent that the amendments of the Committee on Finance be temporarily set aside and that the amendment of the Senator from South Carolina be in order.

Mr. BYRD. Mr. President, reserving the right to object.

The PRESIDING OFFICER. The Senator from West Virginia.

Mr. BYRD. Mr. President, I have no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HELMS. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

AMENDMENT NO. 720 TO AMENDMENT NO. 719

(Purpose: To achieve the objectives of the Multi-Fiber Arrangement, to promote the economic recovery of the United States textile and apparel industry and its workers, to provide for orderly trade in nonrubber footwear, to reduce unemployment, and for other purposes)

Mr. THURMOND. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

Mr. BYRD. Mr. President, the amendment is not at the desk yet, is it?

The PRESIDING OFFICER. Yes; it is.

Mr. BYRD. This is not the one the Senator from South Carolina asked for the yeas and nays on?

Mr. HELMS. That is correct.

The PRESIDING OFFICER. The yeas and nays were ordered on the first-degree amendment, not the amendment just submitted.

The clerk will state the amendment.

The assistant legislative clerk read as follows:

The Senator from South Carolina [Mr. THURMOND] for himself, and Mr. MOYNIHAN, Mr. HELMS, Mr. HEFLIN, Mr. HEINZ, Mr. COHEN, Mr. WARNER, Mr. KENNEDY, Mr. MITCHELL, Mr. EAGLETON, Mr. SPECTER, Mr. EAST, Mr. COCHRAN, Mr. TRIBLE, Mr. DENTON, Mr. D'AMATO, Mr. SASSER, Mr. HATCH, Mr. PELL, Mr. MATTINGLY, Mr. GARN, Mr. LAXALT, Mr. ROCKEFELLER, Mrs. HAWKINS, Mr. GORE, Mr. DIXON, Mr. DODD, Mr. SIMON, Mr. FORD, Mr. DECONCINI, Mr. PRYOR, Mr. MATHIAS, Mr. LONG, Mr. LEAHY, Mr. METZENBAUM, Mr. RIEGLE, Mr. WEICKER, Mr. MCCONNELL, Mr. KASTEN, Mr. GLENN, Mr. BUMPERS, Mr. NUNN, and Mr. BYRD, proposes an amendment numbered 720 to amendment No. 719.

Mr. THURMOND. Mr. President, I ask unanimous consent that further reading be dispensed with.

Mr. BRADLEY. Mr. President, I object.

The PRESIDING OFFICER. Objection is heard.

The assistant legislative clerk resumed the reading of the amendment.

Mr. THURMOND. Mr. President, I ask unanimous consent that further reading be dispensed with.

Mr. BRADLEY. Mr. President, I object.

The PRESIDING OFFICER. Objection is heard.

The assistant legislative clerk resumed the reading of the amendment.

Mr. THURMOND. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

The amendment is as follows:

At the end of the matter proposed to be inserted, insert the following:

(1) to prevent further disruption of the United States textiles and textile products markets, damage to United States textile and apparel manufacturers, and loss of jobs by United States workers by providing for orderly and nondisruptive growth of imports of textiles and textile products; and

(2) to implement the objectives of the Multi-Fiber Arrangement by requiring the effective enforcement of import levels of textiles and textile products contemplated by the Multi-Fiber Arrangement.

SEC. 203. FINDINGS.

The Congress finds that—

(1) the United States and most major textile producing countries are parties to the Multi-Fiber Arrangement, the purpose of which is to ensure the orderly growth of imports of textiles and textile products and to avoid disruption of the markets for textiles and textile products in importing nations;

(2) the Multi-Fiber Arrangement, which first entered into force on January 1, 1974, and which was most recently extended in December, 1981, through July 1986, contemplates a 6 per centum annual rate of growth for imports for most producing countries and provides for a lower rate of growth for imports from significant producing countries;

(3) since 1980, the objective of orderly growth of imports of textiles and textile products provided for in the Multi-Fiber Arrangement has not been achieved; from 1981 through 1984 imports of textiles and textile products into the United States have grown at an annual rate of 19 per centum, far in excess of the 1 per centum growth rate of the United States market for textiles and textile products during the same period and far in excess of the annual rate of import growth of less than 2 per centum that prevailed during the period 1974 through 1980;

(4) the disruptive surge in imports of textiles and textile products which occurred from 1981 through 1984 resulted from the failure of the United States to enforce adequately its rights under the Multi-Fiber Arrangement and to extend coverage of the Multi-Fiber Arrangement to imports made of competing fibers;

(5) import growth of apparel products has substantially outstripped the growth of the domestic market so that import penetration of the domestic market has more than doubled in the last six years, reaching a level of 50 per centum in 1984;

(6) based on a nationwide audit of major retail outlets, the import penetration of

such major items of apparel as trousers, blouses, shirts, suits, skirts and sweaters exceeds 50 per centum of domestic consumption;

(7) since the most recent extension of the Multi-Fiber Arrangement, certain producing countries have sharply increased their exports of textiles and textile products made in whole or in part from fibers not subject to the Multi-Fiber Arrangement with the effect of circumventing restraints agreed to under the Arrangement; the increased imports of these textiles and textile products have caused disruption of the United States market for textiles and textile products and have seriously undercut the effectiveness of the Multi-Fiber Arrangement;

(8) imports of textiles and textile products into the United States are predominantly the product of significant producing countries, with five large producing countries now accounting for more than 50 per centum of all imports of textiles and textile products;

(9) the domination of import trade by producers in the significant producing countries has limited participation in the United States market by other producing countries, many of which share important trade and other national interests, and encourage mutually beneficial trade and investment, with the United States;

(10) a change in United States textile trade policy to afford the smaller producing countries and countries in the Caribbean region a relatively greater share of imports of textiles and textile products would promote the national economic interests of the United States;

(11) the textile and apparel trade deficit of the United States was more than $16,200,000,000 in 1984, an increase of 53 per centum over 1983, and accounted for 13 per centum of the Nation's overall merchandise trade deficit;

(12) the current level of imports of textiles and textile products, ten billion square yard equivalents in 1984, represents over one million job opportunities lost to United States workers;

(13) imported textiles and textile products now account for 38 per centum (the equivalent of three million two hundred thousand bales of cotton) of the annual cotton consumption in the United States; only one of five of the bale equivalents included in imported textiles and textile products is grown in the United States; the result of the massive increases in cotton textile and apparel imports has been a declining market share for, and a $1,000,000,000 loss to, domestic cotton producers in 1983 alone, which was only partially offset by Federal cotton program benefits; another result is that United States cotton producers, who are spending about $20,000,000 annually in research and promotion efforts, have built markets not for themselves but for foreign growers;

(14) imports of wool products have doubled since 1980, creating major disruptions among domestic wool products producers and seriously depressing the price of United States produced raw wool; the Multi-Fiber Arrangement recognizes that imports of certain products, such as wool products, in certain countries, including the United States, pose particular problems for certain industries, such as, the wool products industries in those countries and import growth rates of 1 per centum or less have been permitted in such cases;

(15) as a result of this increased penetration and the very limited growth of the domestic market, the United States companies producing textiles and textile products identical, or similar, to those imported have been seriously damaged, many of them have been forced out of business, many have closed plants or curtailed operations, workers in such companies have lost employment and have been otherwise materially and adversely affected, and serious hardship has been inflicted on hundreds of impacted communities causing a substantial reduction in economic activity and lost revenues to local governments;

(16) the increase in imports and increased import penetration of the United States domestic market have occurred notwithstanding the fact that, through extensive modernization programs and investment in more modern equipment, productivity, as measured by output per man hour, in the textile mill products sector has increased in the last ten years at the average annual rate of 4.2 per centum and in the apparel sector at the average annual rate of 3.4 per centum, as compared with the lower productivity growth of all manufacturing in the same period of 1.9 per centum;

(17) the factors described above are causing serious damage, or the actual threat thereof, to domestic producers of textiles and textile products; as a result, market disruption exists in the United States requiring the new measures established under this Act;

(18) based on experience during the past ten years and on other factors, the growth of the United States market for textiles and textile products is unlikely to exceed an average annual rate of 1 per centum during the next several years;

(19) if the rate of growth of imports of textiles and textile products into the United States that occurred since 1980 continues, plant closings will continue to accelerate, leaving the United States market with reduced domestic competition for imported products;

(20) in order to avoid further market disruption and deterioration of the situation confronting the United States industry producing textiles and textile products, which is already seriously damaged, it is essential—

(A) to require the establishment of import levels for textiles and textile products supplied by major producing countries that reflect—

(i) the import level that would have occurred had imports from these countries grown since 1980 by the 6 per centum annual growth rate contemplated by the Multi-Fiber Arrangement, or 1 per centum in the case of wool products, or

(ii) the actual import level resulting from restraints under a bilateral agreement with the United States providing for an annual import growth rate of less than 6 per centum,

whichever is the lesser,

(B) to require the establishment of import levels for textiles and textile products supplied by producing countries that reflect their 1984 import levels,

(C) to require the establishment of import levels for textiles and textile products supplied by small producing countries that provide a significant increase in their market shares to meet their development needs and to permit future growth in such shares consistent with the Multi-Fiber Arrangement, and

(D) to limit the future growth rate of imports of textiles and textile products into the United States to levels which reflect orderly growth as provided for in the Multi-Fiber Arrangement and the most recent Protocol extending the Multi-Fiber Arrangement;

(21) the establishment of import levels, and limitation on future import growth to levels, that reflect effective enforcement of the Multi-Fiber Arrangement and that also reflect the expected growth rate of the United States market for textiles and textile products will fulfill announced policy objectives of the United States regarding trade in textiles and apparel;

(22) as the Department of Defense has long recognized, a strong, viable and efficient domestic textiles and textile products industry is essential in order to avoid impairment of the national security of the United States;

(23) the developments that have led to the sharp increase in imports of textiles and textile products since 1980 may not have been foreseeable; nevertheless, the rights of the United States under international agreements should have been invoked in order to prevent increased quantities of textiles and textile products from being imported under such conditions as to cause or threaten serious damage to domestic producers of textiles and textile products in the United States; and

(24) the sharp increase in imports of textiles and textile products since 1980, and the effect of this increase on the United States textiles and apparel industry and its workers, constitutes exceptional circumstances within the meaning of the Multi-Fiber Arrangement and its Protocol.

SEC. 204. DEFINITIONS.

For purposes of this title—

(1) The term "textiles and textile products" includes, but is not limited to, all man-made fibers, tops, yarns, piece goods, made-up articles, apparel, and other textile manufactured products (which derive their chief characteristics from their textile components) made in whole or in part from any natural or manmade fiber, or blend thereof, that are classified under schedule 3, part 6 of schedule 6, part 1, 4, 5 (except subpart E), 7, or 13 of schedule 7, or part 1 of schedule 8 of the Tariff Schedules of the United States or part 1 of the Appendix to the Tariff Schedules of the United States;

(2) The term "category" means, with respect to textiles and textile products that are the product of a country, each of the following—

(A) each category of textiles and textile products identified by a three-digit textile category number in the Department of Commerce publication "Correlation: Textile and Apparel Categories with Tariff Schedules of the United States Annotated", dated January 1985 and, subsequently, in the first edition of such document that is revised to reflect the adoption by the United States of the Nomenclature Structure of the Harmonized System;

(B) with respect to each country with which the United States has (i) an agreement on the date of enactment of this title limiting exports of textiles and textile products to the United States that includes specific limitations on subdivisions of a category described in subparagraph (A), or (ii) taken unilateral action to limit products entered under such a subdivision, each such subdivision;

(C) a category consisting of the man-made fiber products classified under subpart E of part 1 of schedule 3 to the Tariff Schedules of the United States; and

(D) each category consisting of each of the following products when, because of any

fiber content, that product is not subject to the Multi-Fiber Arrangement:

(i) yarn,

(ii) fabric,

(iii) apparel, and

(iv) other textile products;

(3) The term "import sensitive category" means—

(A) a category (other than a category applicable to textiles and textile products that are a product of a country in the Caribbean region) for which the ratio of imports to domestic production, as reported in the Department of Commerce publication "U.S. Production, Imports and Import/Production Ratios for Cotton, Wool and Man-Made Fiber Textiles and Apparel", equals or exceeds 40.0 for the preceding calendar year; and

(B) a category covering wool products;

(4) The term "country" means a foreign country (other than Canada and the Member States of the European Economic Community as constituted on January 1, 1985), a foreign territory, an insular possession of the United States, or any other territory, possession, colony, trusteeship or political entity, whether affiliated with the United States or not, that is outside the customs territory of the United States;

(5) The term "major producing country" means a country the annual aggregate quantity of textiles and textile products of which that entered under the categories referred to in paragraph (2)(A) during calendar year 1984 equalled or exceeded 10 percent of all textiles and textile products under such categories that entered from all countries and from Canada and the Member States of the European Economic Community during calendar year 1984;

(6) The term "producing country" means a country (other than a major producing country and a country in the Caribbean region) the annual aggregate quantity of textiles and textile products of which that entered under the categories referred to in paragraph (2)(A) during calendar year 1984 equalled or exceeded 1.25 per centum of all textiles and textile products under such categories that entered from all countries and from Canada and the Member States of the European Economic Community during calendar year 1984;

(7) The term "small producing country" means a country other than a major producing country and a producing country;

(8) The term "country in the Caribbean region" means Mexico and a country eligible for designation as a beneficiary country under section 212 of the Caribbean Basin Economic Recovery Act (19 U.S.C. 2702);

(9) The term "wool product" means an article containing over 17 per centum by weight of wool;

(10) The term "cotton, wool and man-made fiber sweaters" means articles classified under categories 345, 445, 446, 645 or 646 as defined in the Department of Commerce publication "Correlation Textile and Apparel Categories with Tariff Schedules of the United States Annotated," dated January 1985;

(11) The term "entered" means entered, or withdrawn from warehouse, for consumption in the customs territory of the United States;

(12) The term "imported" means entered; and

(13) The term "Multi-Fiber Arrangement" means the Arrangement Regarding International Trade in Textiles, as extended by the Protocol done at Geneva, December 22, 1981.

SEC. 205. LIMITS ON TEXTILE AND APPAREL IMPORTS.

(a) CALENDAR YEAR 1985.—Notwithstanding any other provision of law, the aggregate quantity of textiles and textile products classified under a category that is entered during calendar year 1985 shall not exceed—

(1) in the case of textiles and textile products that are a product of a major producing country other than textile luggage and textile flat goods subject (as of the date of enactment of this Act) to a specific limitation under an agreement with a major producing country, the lesser of an amount equal to 101 per centum—

(A) of the aggregate quantity of such products of such country classified under such category that would have entered during calendar year 1984 if the aggregate quantity of such products of such country classified under such category entered during calendar year 1980 had increased by 6 per centum annually, or 1 per centum annually in the case of a category covering a wool product, during calendar years 1981, 1982, 1983, and 1984, or

(B) if the United States has an agreement with such country providing for an annual growth rate for such category of less than 6 per centum, of the aggregate quantity of such products of such country classified under such category that entered during calendar year 1984;

(2) in the case of textile luggage and textile flat goods subject (as of the date of enactment of this Act) to specific limitation under an agreement with a major producing country, the specific limitation quantity in effect as of the date of enactment of the Act;

(3) in the case of textiles and textile products that are a product of a producing country, an amount equal to the aggregate quantity of—

(A) such products from such country classified under such category that entered during calendar year 1984, or

(B) in the case of textile luggage and textile flat goods subject (as of the date of enactment of this Act) to specific limitation under an agreement with a producing country, the specific limitation quantity in effect as of the date of enactment of this Act;

(4) in the case of textiles and textile products that are a product of a small producing country (other than cotton, wool, and man-made fiber sweaters described in paragraph (5)), an amount equal to the sum of—

(A) the aggregate quantity of such products of such country classified under such category that entered during calendar year 1984, plus

(B) an amount equal to—

(i) 15 per centum of such quantity, in the case of a category that is not an import sensitive category, or

(ii) 1 per centum of such quantity, in the case of a category that is an import sensitive category; and

(5) in the case of cotton, wool and man-made fiber sweaters that are—

(A) the product of substantial assembly operations in Guam from otherwise completed knit-to-shape component parts, an aggregate amount equal to 160,000 dozen; and

(B) the product of substantial assembly operations in the Commonwealth of the Northern Mariana Islands from otherwise completed knit-to-shape component parts, an aggregate amount equal to 70,000 dozen.

If application of paragraph (1) would result in the aggregate quantity of textiles and textile products of a major producing country classified under all categories permitted to enter during calendar year 1985 to be less than 70 per centum of the aggregate quantity of such products of such country that entered during calendar year 1984, then, notwithstanding paragraph (1), the aggregate quantity of textiles and textile products of such country that may be entered under each category during calendar year 1985 shall not be less than 40 per centum of the aggregate quantity of such products of such country that entered under such category during calendar year 1984.

(b) GROWTH ADJUSTMENT.—For calendar years after 1985, the aggregate quantity of textiles and textile products classified under each category that may be entered during each such calendar year shall—

(1) in the case of such products that are a product of a major producing country or of a producing country, be increased by an amount equal to 1 per centum of the aggregate quantity that could be entered under such category during the preceding calendar year; and

(2) in the case of such products that are a product of a small producing country, be increased by an amount equal to—

(A) in the case of a category (other than an import sensitive category), 6 per centum of the aggregate quantity that could be entered under that category during the preceding calendar year, and

(B) in the case of an import sensitive category, 1 per centum of the aggregate quantity that could be entered under that category during the preceding calendar year.

If the aggregate quantity that could be entered under a category for a calendar year after 1985 is reduced under section 210(b), than in the first calendar year in which there is no such reduction, this subsection shall be applied as if there had been no reduction under section 210(b) in previous calendar years.

(c) MINIMUM QUANTITIES.—If, under subsection (a) or (b), the aggregate quantity of textiles and textile products of a country that may be entered during a calendar year under a category is—

(1) less than one million square yard equivalents, in the case of a category covering yarn, fabric, made-ups, and miscellaneous products, other than wool products;

(2) less than seven hundred thousand square yard equivalents, in the case of a category covering apparel, other than wool products apparel; or

(3) less than one hundred thousand square yard equivalents, in the case of a category covering wool products,

then, notwithstanding subsection (a) or (b), the aggregate quantity of textiles and textile products that may be entered from such country under such category during the calendar year shall be one million, seven hundred thousand, or one hundred thousand square yard equivalents, respectively. The amount prescribed in the preceding sentence shall be accorded growth subject to the provisions of subsection (b) beginning the first calendar year after the aggregate quantity of imports from such country under such category equals the minimum quantity prescribed under this subsection.

(d) SPECIAL RULE.— For purposes of this section, if during any calendar year after 1984, the aggregate quantity of textiles and textile products that are the product of a small producing country, other than a country in the Caribbean region, and that are entered under the categories referred to in

paragraph (2)(A) of section 204 equals or exceeds 1.25 per centum of all textiles and textile products entered under such categories from all countries and from Canada and the Member States of the European Economic Community during such calendar year, then such small producing country shall be considered to be a producing country for all succeeding calendar years.

(e) ENFORCEMENT.—The Secretary of Commerce shall prescribe such regulations governing the entry, or withdrawal from warehouse, for consumption of textiles and textile products as may be necessary to carry out this title.

SEC. 206. IMPORT LICENSING.

In order to ensure the equitable and efficient administration of section 205 of this title, the Secretary of Commerce shall, within six months after the date of enactment of this title, establish and administer an import licensing system under which an importer of any textiles and textile products from any country and from Canada and the Member States of the European Economic Community, will be required to present an import permit as a condition of entry. The Secretary shall charge a fee for import licenses in such amount as may be necessary to cover the cost of administration of the system.

SEC. 207. ANNUAL REPORT.

Not later than March 15, 1986, and March 15 of each calendar year thereafter, the President shall submit to the Congress a report on the administration of this title during the preceding calendar year. Such report shall include detailed information about the implementation and operation of the limitations established under section 205. All departments and agencies shall cooperate in preparation of this report, as requested by the President.

SEC. 208. REVIEW.

The Secretary of Commerce shall commence ten years after the date of enactment of this title a formal review of the operation of the Textile Import Control Program under the provisions of this title. The Secretary shall consult members and committees of Congress, representatives of the labor unions and the industries affected by the program, and appropriate government agencies. Within six months after the commencement of the study, the Secretary shall submit to Congress his findings as well as his recommendations for the future conduct of the program.

SEC. 209. DUTY FREE ENTRY OF CERTAIN SWEATERS FROM GUAM AND THE NORTHERN MARIANAS.

Subpart A of part 7, schedule 3 of the Tariff Schedules of the United States (19 U.S.C. 1202) is amended by adding at the end thereof the following new item:

" 385.97	Cotton, wool and man-made fiber sweaters that are entitled to enter under the quotas established under section 205(a)(5) of the Textile and Apparel Trade Enforcement Act of 1985 or the increased quotas under section 205(b) of such Act that adjust the quotas under such section 205(a)(5) and that do not contain foreign materials to the value of more than 50 percent of their total value as this standard is applied pursuant to Headnote 3(a) of the General Headnotes and Rules of Interpretation.	Free."

SEC. 210. EFFECTIVE DATE.

(a) IN GENERAL.—Subject to the provisions of subsection (b), the provisions of this title shall apply to textiles and textile products entered, or withdrawn from warehouse, for consumption on or after the date of enactment of this Act.

(b) CALENDAR YEARS 1985 AND 1986.—The Secretary of Commerce shall determine, and publish in the Federal Register, the aggregate quantity, if any, of textiles and textile products that may be entered under section 205 (a) or (c) of this title from each country under each category during the period beginning on the date of enactment of this title and ending December 31, 1985. Notwithstanding subsection (a), to the extent that the aggregate quantity of imports of textiles and textile products from a country under a category entered after December 31, 1984, and before the date of enactment of this title exceeds the quantity permitted entry for such country and such category during calendar year 1985 under subsection (a) or (c) of section 205, then the limit that would otherwise apply under section 205(b) for such category for such country for calendar year 1986 shall be reduced by the amount of such excess quantity. If such excess quantity exceeds the limit that would otherwise apply under section 205(b) for such category for such country for calendar year 1986, then the limit for such category and country for calendar years after 1986 shall be reduced until such excess is accounted for.

TITLE III—FOOTWEAR

SEC. 301. SHORT TITLE.

This title may be cited as the "American Footwear Industry Recovery Act of 1985".

SEC. 302. FINDINGS AND PURPOSE.

(a) The Congress finds that—

(1) The domestic nonrubber footwear industry is important to the national economy, and footwear firms are vital to the economic health of small towns throughout the United States.

(2) The domestic nonrubber footwear industry is highly labor intensive, and low capital requirements for entry into footwear production make it a primary target for industrializing or newly industrialized countries. As a consequence, footwear is produced in virtually every footwear consuming country in the world.

(3) Tremendous competitive pressure has been created in the world footwear market in the last decade as a result of rapidly growing production and capacity in numerous developing and developed countries. This development has resulted in the widespread erection of tariff and nontariff barriers by foreign countries designed to protect their domestic footwear industries.

(4) The United States has historically resisted the protectionist trends of other producing nations and has instead maintained a market distinguished by its accessibility. As a result, the United States market has become a focal point for world trade in nonrubber footwear.

(5) The diversion of international trade to the United States market has resulted in serious injury to domestic producers as manifested by—

(A) the loss of 155,000 footwear jobs since 1968,

(B) a decline in domestic production and production capacity, and

(C) the permanent closure of over 500 plants during the same period.

(6) The serious injury to domestic producers poses a significant danger to the industry's supplier base as well.

(7) The domestic nonrubber footwear producers have made a significant commitment to the future of the industry through substantial capital investment.

(8) Since the termination of temporary import relief in 1981, capital investment in the domestic nonrubber footwear industry has declined as the industry struggled to battle the massive surge in imports which increased the percentage share of imported footwear in the United States market from, 51 percent in 1981 to 77 percent in 1985.

(9) Without the restriction of import levels, capital investment in this domestic industry will continue to decrease.

(10) The domestic nonrubber footwear industry has thrice been judged by the International Trade Commission, as recently as May 1985, to be seriously injured by imports.

(11) Since the termination of the two, four-year orderly marketing agreements in 1981, the harm to the domestic industry is even more critical then the serious injury which triggered the Commission's unanimous findings in 1976 and 1977.

(12) The domestic nonrubber footwear industry has not been afforded adequate and appropriate relief from imports; therefore, the Congress concludes that—

(A) the administrative process under sections 201, 202, and 203 of the Trade Act of 1974 has proven inadequate; and

(B) in the absence of and effective remedy under such process, legislative relief is essential.

(b)(1) It is the purpose of Congress in enacting this section to—

(A) promote and expend the economic health of the United States nonrubber footwear industry,

(B) preserve the jobs of American workers, and

(C) prevent the further decline of this important domestic industry.

(2) It is declared to be the policy of Congress that access to the United States market for foreign-produced nonrubber footwear should be on an equitable basis to ensure orderly trade in nonrubber footwear, reduce unfair trade in nonrubber footwear, and address United States balance-of-payments problems, of which footwear is the seventh largest component. In order to accomplish these objectives, it is deemed necessary and appropriate to limit imports of nonrubber footwear into the United States market.

SEC. 303. DEFINITIONS.

For purposes of this title—

(1) The term "entered" means entered, or withdrawn from warehouse, for consumption in the customs territory of the United States.

(2) The term "Secretary" means Secretary of Commerce.

(3) The term "nonrubber footwear" means the following categories of nonrubber footwear products, identified by reference to the following item numbers of the Tariff Schedules of the United States (as in effect on January 1, 1985): 700.05 through 700.45; 700.56; 700.72 through 700.83; and 700.95.

(4) The term "apparent domestic consumption" means, with respect to any 1-year period, the sum of imports plus domestic production less exports.

SEC. 304. QUANTITATIVE LIMITATION ON NONRUBBER FOOTWEAR.

(a)(1) During the 8-year period beginning on the date of enactment of this title, the aggregate number of pairs of nonrubber footwear which may be entered during any 1-year period shall not exceed 60 percent of the estimated apparent domestic consumption of nonrubber footwear for such period.

(2) The quantitative limitation imposed by paragraph (1) for any 1-year period shall be distributed among the following categories of nonrubber footwear so that the aggregate

number of pairs of nonrubber footwear in such category which may be entered during any 1-year period shall not exceed the quantity equal to—

(A) in the case of nonrubber footwear with a customs value that does not exceed $1.25 per pair, 10 percent of apparent domestic consumption of nonrubber footwear for such period,

(B) in the case of nonrubber footwear with a customs value that exceeds $1.25 per pair but does not exceed $2.50 per pair, 5.4 percent of apparent domestic consumption of nonrubber footwear for such period, and

(C) in the case of nonrubber footwear with a customs value that exceeds $2.50 per pair, 44.6 percent of apparent domestic consumption of nonrubber footwear for such period.

(b) Within sixty days after the effective date of this title, and on the first day of the fourth quarter of each 1 year period thereafter, the Secretary shall determine on the basis of the best information available, including his own or independent forecasts, the expected apparent domestic consumption of nonrubber footwear for, in the case of the initial determination, the remainder of the current 1 year period and in the case of the first day of the fourth quarter of each 1 year period thereafter, the next succeeding 1 year period. On each such date, the Secretary shall determine and publish in the Federal Register the allocation for the next succeeding 1 year period of permissible imports of nonrubber footwear as required by this section.

(c) On the first days of the first, second, and third quarters of each 1 year period, the Secretary shall revise the determinations of expected apparent domestic consumption made under subsection (b) for the current 1 year period on the basis of the best information then available and shall make such adjustments in the quantity of nonrubber footwear permitted to be imported under this section as indicated by the revision. All revisions and adjustments made under this subsection shall be published in the Federal Register.

(d) If the revised determination of expected apparent domestic consumption published in the Federal Register under subsection (c) on the first day of the third quarter in any 1 year period for nonrubber footwear varies from the actual apparent domestic consumption of nonrubber footwear for such 1 year period, the Secretary shall publish in the Federal Register on the first day of the second quarter of such succeeding 1 year period a revision to the determination of expected apparent domestic consumption for such 1 year period made under subsection (c) of this section. The revision shall be in the amount of such variance and shall be in addition to any other revision that would be made on any such first day of the second quarter under subsection (c) of this section.

(e)(1) The Secretary and the Secretary of the Treasury shall take such actions within their respective jurisdictions as may be necessary or appropriate to enforce the provisions of this section, including without limitation, the issuance of orders to customs officers to bar entry to merchandise if the entry of such merchandise would cause the limitations established under this section to be exceeded.

(2)(A) The Secretary and the Secretary of the Treasury are each authorized to issue such implementing regulations, including the issuance of import licenses, as may be necessary or appropriate to effect the purposes of this section and to enforce the provisions of this section.

(B) Before prescribing any regulations under subparagraph (A), the Secretary or the Secretary of the Treasury, as the case may be, shall—

(i) consult with interested domestic parties,

(ii) afford an opportunity for such parties to comment on the proposed regulations, and

(iii) consider all such comments before prescribing final regulations.

SEC. 305. COMPENSATION AUTHORITY.

For purposes of section 123 of the Trade Act of 1974 (19 U.S.C. 2133), the imposition of the quantitative limitation under section 204 shall be treated as action taken under section 203 of the Trade Act of 1974 (19 U.S.C. 2253).

Mr. THURMOND. Mr. President, I ask for the yeas and nays on this amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The Senator from South Carolina.

Mr. HOLLINGS. Mr. President, will the distinguished Senator yield for a question?

Mr. THURMOND. I shall be pleased to yield. The amendment I sent up was in behalf of Senator HOLLINGS and other Senators.

Mr. HOLLINGS. Is this not the same amendment the Senator put in in behalf of himself and me on September 25 on Senate Joint Resolution 77, where we had a copy made, but it was not printed?

Mr. THURMOND. Mr. President, my response is that, in essence, it is the same amendment.

The PRESIDING OFFICER. The Senator from South Carolina.

Mr. EVANS. Mr. President, will the Senator from South Carolina yield for a question?

Mr. THURMOND. I shall be very pleased to yield to the distinguished Senator from Washington.

Mr. EVANS. The senior Senator from South Carolina responded in answer to the junior Senator from South Carolina that the amendment was in essence the same or close to the same. Would he elaborate more so we could be more explicit as to what those differences are? I have learned in my short stay here that "almost the same" and "generally alike" can hide a good deal of truth.

Mr. THURMOND. This Senator, in response to the Senator from Washington, will say that the major exporting countries are now called producing countries. I think that is the main difference, that instead of exporting countries they are called producing countries.

Mr. EVANS. Mr. President, is that merely a change in designation, or is that a significantly different meaning as far as major exporting countries or producing countries?

Mr. THURMOND. The producing countries are the ones that are sending the imports.

Mr. EVANS. I understand that. So are exporting countries. I just want to understand what changes there are in the proposal as put in the CONGRESSIONAL RECORD from the proposal he is now introducing.

Mr. THURMOND. Mr. President, in response, I say there are no substantive changes. That is the main change.

Mr. EVANS. I thank the Senator.

Mr. THURMOND. Mr. President, this amendment would significantly strengthen and promote the future enforcement of our trade laws and agreements. It would add to the pending measure a modified version of S. 680, the Textile and Apparel Trade Enforcement Act of 1985.

Mr. President, S. 680 was the end result of months of work by a bipartisan coalition of agriculture, textile, apparel, and manmade fiber industry and labor leaders, as well as Members of Congress. It has attracted strong bipartisan support in the Congress. The modification embodies in this amendment, many of which are only technical, were recommended by this same broad-based coalition.

Mr. President, this amendment is designed to promote the orderly, nondisruptive future growth of world trade in fibers, textiles, and apparel products. This would be accomplished through the establishment of import growth rates, providing for the orderly growth of future textile/apparel imports into the United States.

Under the provisions of this amendment, textile/apparel exporting nations, except for Canada and European Economic Community member nations, which are exempted from coverage, would be classified as either "major exporting countries," "exporting countries," or "small exporting countries,"—that terminology has now been changed to "major producer"—depending upon the relative share of total U.S. imports represented by the exports of a particular exporting nation. Major exporting countries would be defined as countries whose exports to the United States account for 10 percent—approximately 1 billion square yards—or more of the total U.S. textile/apparel imports. Those countries whose exports represent 1.25 percent or more of our total imports, but less than 10 percent, would be classified as "exporting countries." All other countries, including Mexico and those nations eligible for assistance under the Caribbean Basin Economic Recovery Act (19 U.S.C. 2702) would be defined as small exporting countries.

Imports from major exporting countries in 1985 would, on a product category basis, be limited to the aggregate amounts exported to the United

States in 1980 increased by a 6-percent compounded rate for each year 1981-84, plus 1 percent. Imports from exporting countries would, on a product category basis, be limited this year to their 1984 levels. Thereafter, imports from those countries could grow by 1 percent per year. With regard to small exporting countries, imports in 1985 could grow as high—again on a product category basis—as 115 percent of the 1984 levels, except in categories defined as import sensitive. Thereafter, imports from these countries could grow by 6 percent per year. In the import-sensitive categories, which are defined as categories containing wool products or categories in which imports equal 40 percent or more of our domestic production, 1985 import levels would be 101 percent of 1984 levels, and could increase by 1 percent per year thereafter.

Additionally, the Secretary of Commerce would be responsible for issuing regulations governing the entry of textile/apparel imports, and also for establishing an import licensing system to facilitate and ensure efficient, effective enforcement of the act.

This amendment also contains a title relating to imports of shoes, which will be discussed and explained by other cosponsors of the amendment.

IMPORTANCE OF TEXTILE/APPAREL INDUSTRY

Mr. President, a viable textile/apparel industry is absolutely essential to the economy and national security of this Nation. Although seriously threatened, and already heavily impacted by massive imports, this vital industry still provides employment nationwide for 2 million Americans. One out of every 10 manufacturing jobs is a textile/apparel-created job. More people, and more families, depend upon the textile/apparel industry for their livelihoods than steel and auto industries combined.

If the current trends in job losses due to import penetration are allowed to continue, massive economic hardships will result for those who depend on this industry for their livelihoods. However, the repercussions will extend far beyond the boundaries of this industry. Continued decline of the textile/apparel industry will be felt throughout our entire economy as related and supporting industries, which account for another 2 million jobs, also begin to fail. Those who lose their jobs will inevitably reduce their consumption of goods, draw against whatever savings they may have accumulated, and turn to unemployment compensation for their subsistence.

In this regard, Mr. President, newspapers in my home State of South Carolina and other States report textile plant closings and layoffs on an almost daily basis. The same is also true with regard to apparel plants which are located in virtually every State.

In addition to its economic importance, the textile/apparel industry is critical to the defense and security of this Nation. In fact, previous testimony before the Senate established that the textile industry ranks second only to steel in its importance to national defense.

We simply cannot allow ourselves to become dependent upon foreign nations for the basic defense requirements of our Armed Forces. While the production of military apparel may come to mind first, the contributions of our domestic textile/apparel industry toward defense go far beyond fulfilling the basic necessity of clothing our fighting men. In World War I, for example, the struggle to produce a manmade fiber, which we know today as rayon, resulted in the discovery of a lacquer coating that proved useful in the production of warplanes.

The textile/apparel industry also greatly assisted in the successful effort to achieve victory during World War II, when over 70 percent of its capacity turned toward production of items essential to the war effort. When the United States supply of Japanese silk was cut off, we turned to the textile/apparel industry for a substitute, and the industry responded with a wide range of products—from parachutes to tires—manufactured from a newly developed synthetic fiber, nylon. The contributions continue today as this industry continually strives to produce new, better, and more durable textile/apparel products that are so essential and necessary to a strong military.

MAGNITUDE OF PROBLEM

Mr. President, having outlined the importance of the textile/apparel industry to this country, I believe it appropriate now to discuss the magnitude of the crisis confronting this vitally important industry today.

About one-half of all textile/apparel goods sold in the United States today are made abroad. In certain product categories, imports have captured 80 percent of the domestic market. Although imports have adversely impacted almost all of our domestic industries, the situation is particularly acute with regard to the textile/apparel industry. Import penetration in the auto and steel industries is only 25 percent, or about one-half the rate experienced by the textile/apparel industry.

During the past 5 years, textile/apparel imports have increased at an average rate of 19 percent per year, displacing over 350,000 American workers in the process. Incredibly, imports last year rose by 32 percent over the level of the previous year, resulting in a textile/apparel trade deficit of $16.5 billion, or 13 percent of the record $123 billion total U.S. trade deficit for 1984.

For the first 7 months of this year the textile/apparel deficit climbed to $10.3 billion, which is a 10-percent rise over the first 7 months of last year. It looks like the textile/apparel deficit is headed for another record-breaking year. In fact, if recent trends continue and nothing is done to provide for the smooth and orderly flow of imports into our country, we may see our domestic textile/apparel industry completely closed down. Yet imports are allowed to continue to surge unrestrained into our country.

INDUSTRY EFFORTS

Mr. President, the phenomenal growth in textile/apparel imports experienced during the last 4 years has not come about due to any laxity on the part of our domestic industry. In fact, the American textile/apparel industry is the most modern and productive of any in the world.

Management and labor have made every effort to modernize, compete, and survive. Productivity gains greatly exceeding the national average have been achieved. Wage rates have been held to only about 75 percent of the national average. Nevertheless, imports have continued to grow.

WHY HAS THE IMPORT RATE CONTINUED TO INCREASE?

Mr. President, the reason imports have been capturing larger and larger percentages of our domestic market is because foreign manufacturer do not compete with our domestic textile/apparel producers on a level playing field. If they did, then the U.S. textile/apparel industry, the most modern in the world, could confidently compete with that of any other nation. However, this domestic industry cannot, nor should it be expected to, compete with foreign industries subsidized by their governments.

Many foreign governments have artificially bolstered their textile/apparel industries in order to fulfill the threefold purposes of creating jobs for their workers, acquiring U.S. dollars, and achieving a more favorable balance of trade. These governments have been creative, innovative, and remarkably successful in these efforts as, unfortunately for our domestic industries, the import statistics too well illustrate.

A myriad of means have been employed by those countries to subsidize and promote their own textile/apparel industries, and all at the expense of the American industry. Typically, developing countries have provided low-interest, subsidized loans for capital formation and expansion within their textile and apparel sectors. They have created tax and other incentives for exporting textile/apparel products. They have fostered and protected their own industries and markets through currency manipulation and trade restrictions. In many cases, formal partnerships have even been arranged between foreign textile firms and their governments.

In addition to the conscious, calculated efforts of foreign governments to unfairly enhance the competitive position of their own textile/apparel industries, other factors have also contributed to the erosion of our domestic markets. Chief among these factors is the relative wage rates. For example, Chinese textile workers are paid only about $0.16 per hour—many times less than their American counterparts. Although wage rates in the other major textile/apparel exporting countries are slightly higher, they fall far short of American standards and minimum wage laws.

Furthermore, much of the foreign textile/apparel industry operates free of the health and environmental regulatios we believe eassential to the protection of our own workers and environment. While I do not question the necessity or wisdom of having such reasonable regulations, I merely wish to emphasize that the large expenditures required for compliance by our domestic manufacturers are not imposed on foreign manufacturers, thus further lessening their relative cost of production.

Also contributing to the massive import growth of textile/apparel products, of course, is the continual strong valuation of the U.S. dollar in world monetary markets. As the value of the dollar has grown, the relative cost of imported textile/apparel products has declined.

Mr. President, the limits this amendment would set on future growth rates are essential to the survival of one of the most important industries in our Nation. It is imperative that we maintain a strong, viable, domestic textile and apparel industry. I urge my colleagues to support adoption of the amendment.

Mr. President, I ask unanimous consent that the name of the distinguished Senator from West Virginia [Mr. BYRD] be added as a cosponsor of this amendment.

The PRESIDING OFFICER (Mr. PRESSLER). Without objection, it is so ordered.

Mr. THURMOND. Mr. President, I now yield to the distinguished Senator from North Carolina [Mr. HELMS] for the purpose of inserting a statement in the RECORD.

Mr. HELMS. I thank the distinguished Senator from South Carolina.

Mr. President, I am pleased to be a cosponsor of this amendment, which essentially embodies S. 680, the Textile and Apparel Trade Enforcement Act of 1985.

The purpose of this amendment is to require effective enforcement of the Multi-Fiber Arrangement, to limit the growth of textile and apparel imports, to prevent further disruption of textile and apparel markets by imports, to permit the economic recovery of the U.S. textile and apparel industry, to protect American textile and apparel workers against further job loss due to imports, and to provide for orderly trade in nonrubber footwear.

The amendment, Mr. President, would impose import growth rates on the major low-wage Far Eastern producers of textiles and apparel—countries that have been flooding the U.S. market with their products. These growth rates would be consistent with the MFA and the protocol extending the MFA. At the same time, less developed countries such as our neighbors in the Caribbean Basin would be allowed to increase their share of the U.S. textile and apparel market. No new restrictions would be placed on United States trading partners such as Mexico, Canada, and countries in Western Europe.

Mr. President, problems in the textile and apparel industry in this country continue to worsen daily as imports pour into this country at record levels from countries such as Hong Kong, Taiwan, Korea, and the People's Republic of China—many of which pay essentially slave wages.

Over the past several years, with the help of other Members of Congress and the administration, I have sought fair play for the domestic textile and apparel industry. We have toughened enforcement of existing trade agreements by establishing country-of-origin regulations and by increasing the number of Customs Service officers to police the illegal entry of textile and apparel products into our borders. Congress has enacted legislation requiring textile and apparel goods manufactured in the United States to be so labeled.

But the underlying problem persists. The textile industry is headed for disaster. What does it take to convince the decisionmakers of our country that an entire industry is going down the drain?

Since 1982 textile and apparel imports have increased 64.9 percent. In 1984 imports were up 31.7 percent over 1983; and in 1983, up 25 percent over 1982. At these rates import growth has far outstripped the growth of the domestic market. Import growth is well above the 6-percent annual increases anticipated in the Multi-Fiber Arrangement.

According to one survey, imports of such major items of apparel as trousers, blouses, shirts, suits, skirts, and sweaters exceed 50 percent of domestic consumption.

The textile and apparel trade deficit is a significant contributor to the total record-high trade deficit of all products, which reached $123 billion in 1984. Textiles and apparel accounted for 13 percent, or $16.5 billion of this trade deficit.

The rise in imports has deeply affected the textile industry's labor force nationally. The textile industry is part of the fiber/textile/apparel complex, which is one of the Nation's largest industrial employers. One of every nine manufacturing jobs nationwide is held by a fiber/textile/apparel worker.

Since 1980, roughly 300,000 textile and apparel workers lost their jobs nationwide. In North Carolina alone, during the same period, 26,300 textile workers lost their jobs; 198 plants have closed in North Carolina since 1982.

Whenever a textile mill closes, the impact is felt by an entire community. In many places in North Carolina the textile mill is a town's major employer. When that employer shuts down, the entire community suffers.

The domestic textile and apparel industry is in trouble despite record levels of productivity. I'll put the American textile worker up against his or her counterpart anywhere in the world. Domestic manufacturers have given their workers the tools to do the job, having invested significant sums for new plants and facilities. As a result, productivity has increased 4.2 percent in textiles and 3.9 percent in apparel in each of the past 10 years. Compare this with the productivity gains for all manufacturing—1.9 percent for the same period.

This amendment would reduce the level of textile and apparel import penetration supplied by the major exporting countries to levels consistent with our international agreements. It would also reduce the overall growth of imports to the United States to the level of the long-term rate of growth of the domestic market. Finally, the amendment would roll back imports from the so-called Big Three—Hong Kong, Korea, and Taiwan. This additional action is necessary to bring import levels from these countries more in line with levels of growth anticipated in the 1981 renewal of the MFA.

Effective enforcement of the guidelines set forth in this amendment is essential to providing orderly growth of textile imports. The amendment stipulates that the Secretary of Commerce shall establish and administer an import licensing system to insure effective enforcement of this act. In 1985 and 1986 the Secretary of Commerce shall dictate by regulation the amount of textiles and textile products that may enter the United States from each country under each category.

The President shall report annually detailing the information regarding the operation of the limitations. This yearly review should be of great value to the industry, as the import situation is kept under constant surveillance.

Mr. President, this amendment includes a section limiting footwear im-

ports to reasonable levels. The International Trade Commission [ITC] recommended earlier this year the imposition of quotas on nonrubber footwear imports after finding that the domestic industry had been injured by imports. Unfortunately, the administration did not implement the recommendation. Congress must therefore take action to stem the flood of nonrubber footwear imports.

Mr. President, U.S. textile and apparel and shoe workers are not competing on a level playing field with their counterparts around the world, and I intend to do whatever possible to bring this situation back into balance. The enforcement of these limitations cannot be implemented until this act is in place.

Mr. President, the textile apparel and shoe industries need our help now: 2.4 million Americans depend on textile and apparel for their jobs. Countless others depend on shoes. Hesitation will result in continued unemployment and the possible end to some of the Nation's most efficient and competitive industries.

Mr. President, I urge adoption of the amendment.

(By request of Mr. HELMS, the following statement was ordered to be printed in the RECORD:)

● Mr. EAST. Mr. President, as indicated by my cosponsorship of the Textile and Apparel Trade Enforcement Act, I support this amendment placing realistic limits on textile product imports. I favor this amendment and am anxious that it be adopted today.

The amendment before us strongly recommends itself by its carefully crafted equity and prescribed import growth provisions. While appropriately restraining import growth in the major low wage, Far Eastern countries from flooding the U.S. marketplace, it allows less developed countries to develop further their industry through increased imports to the United States. And, it places no new restrictions on imports from Canada, Mexico, and Western European countries.

Mr. President, I want to be perfectly understood as to the motives which prompt my wholehearted support of this amendment. I believe it will preserve the manufacturing interest which is working hard to compete with foreign made goods. Much of the textile industry has invested extensively in modernizing plant and equipment.

Despite this massive effort, imports have soared 32 percent over record levels set in 1983. The upward trend continues over the most recent period, and it threatens tens of thousands of jobs and millions of dollars of American investment.

The textile industry is suffering greatly. Its economic well being is at stake. We are talking about nationwide impact. There are more payroll jobs in textile manufacturing than in automobile and steel manufacturing combined. There is no reason to write the industry off and give away gainful, productive employment. A measure of relief is necessary.

Mr. President, I urge my colleagues to join in this effort to bring textile trade under control. Many American families are depending on Congress to take fair trade action. I commend this legislation and ask it be accepted.●

Mr. THURMOND. Mr. President, I now yield to my distinguished colleague from South Carolina [Mr. HOLLINGS].

Mr. HOLLINGS. I thank my distinguished senior colleague.

Mr. President, the distinguished Senator from Maine [Mr. MITCHELL] wished to be recognized. I only note that because the floor leader on this Micronesia compact measure indicated that he might take some action or make a motion later, and I hope we will grant this courtesy to the Senator from Maine when he returns to the floor.

Mr. McCLURE. Mr. President, will the Senator yield on that point?

Mr. HOLLINGS. I yield

Mr. McCLURE. I am glad to know of his desire to speak. It will not be my desire to cut off the opportunity for any Member to speak.

Obviously, the distinguished majority leader has given us a timeframe in which to complete the action on this measure; and in view of the number of amendments, I cannot say that I will be persuaded to let this go on into the night.

Mr. HOLLINGS. On that point, could the Senator assure us that we could get an up-and-down vote on the amendent?

Mr. McCLURE. I rather suspect that at some point I will make a motion to table.

Mr. HOLLINGS. And if that does not succeed?

Mr. McCLURE. If that does not succeed, I have lost control of the situation, and I cannot make any assurances to anyone as to what will happen.

Mr. EVANS. Mr. President, will the Senator from South Carolina yield?

Mr. HOLLINGS. I yield for a question.

Mr. EVANS. Maybe this is an answer to the Senator's question to the Senator from Idaho: If a motion to table fails, I expect that there will be extended debate.

Mr. HOLLINGS. I am sorry to see that development, but that is the way things occur.

Mr. President, perhaps in order for this amendment to be offered, we should understand the procedure, because I am sure that later we will hear much about putting an amendment of this kind on the Compact of Free Association, the Micronesia Compact.

What really occurred is that the distinguished Senator from Missouri, the chairman of the Commerce Committee, Senator DANFORTH, who also serves as the chairman of the Subcommittee on Trade of the Committee on Finance, informed me that this textile bill would never get out of the Senate Finance Committee.

In July, knowing that, I then searched around, not in a secretive way but trying to take what bills would appear, and I filed the textile bill as an amendment on the Micronesia Compact, both the House version and the Senate version of our own Interior Committee, and I also filed it on Senator DANFORTH's trade bill, S. 1404.

I informed the distinguished Senator from Missouri that I was filing it on his trade bill, and I also informed the distinguished majority leader, Senator DOLE, I was trying to play the game on top of the table and not mislead anybody. We are ending the session, and now I am more active than ever. We are in October, and we are still having hearings.

So this is the recourse we have for a measure cosponsored by a majority of the U.S. Senate, as well as more than 300 Members on the House side. I think that, for the moment, that is sufficient explanation for this procedure.

We are not disrupting. It is October and we are facing up to a real problem. The problem, in one sentence, is the lack of enforcement of our 34 bilateral agreements.

I hope my colleagues will please take notice that it is not protectionism, not unilateral action, not tariffs, not quotas, not subsidies, but just enforcing the law, and our agreements with some 34 different countries. If any Senator has a question about a particular country, I will do my best, to give the name of the signer on behalf of that particular country.

For example, we have the agreement between the United States and Thailand: A bilateral agreement, signed on July 27, 1983. It has been signed by the official representatives of the Thai Government and our Government. Similarly, Hong Kong, Taiwan, Indonesia, Korea, People's Republic of China, and on down the list.

It is not my intent to belabor or lose the attention of the Members, but to emphasize that you are going to hear a lot of nonsensical talk—there is no better way to describe it politely—about protectionism. There will be talk of quotas and disrupting free trade; when, in essence, what has occurred has occurred over a 30-year period and we have obtained these bilateral agreements between nations. This is not the beginning. This is nearing the end of a particular chapter in international trade when the U.S.

Government, in my opinion, will definitely start formulating a trade policy.

True, it is the textile question that is bringing it to the fore. We have the strongest case possible. There is nothing better than sitting down around the table with individual countries and saying "Now, let's see what we can agree on, what categories, what classes, what amounts," and then signing a formal agreement and adhering to it. When I talk about adhering to it, by way of illustration, I have a table we will put in the RECORD that shows that Japan has enforced their agreements under the multifiber arrangement. The European Economic Community has enforced their agreements under the multifiber arrangement.

Mr. President, due to lack of enforcement we are trying to bring us to where we are at the particular moment and hold fast at what was agreed to. Specifically, rollbacks. You will hear inaccurate references to this measure as rolling back. It reminds me of Willie Sutton stealing $100,000 out of the bank and then we take the hundred grand from him and say, "Oh, my Heavens, you are going to rollback really $100,000."

We have Thailand, the first agreement on top of the deck, in 1984 shipping 20 million square yards in violation of that particular agreement. When we object to that, that is not protectionism; that is objecting to a lack of enforcement. I heard the distinguished Senator from Washington say earlier say that textiles was the most protected industry. It is absolutely false. On the contrary, we have agreements between nations that are not being enforced by this administration. There is no better reference to that than the remarks of the distinguished Senator from South Carolina, Senator THURMOND, who said in the RECORD earlier this year had we had the enforcement of our laws and of these agreements, had this administration kept its commitment to the people of America to hold import growth to the growth of the domestic market, there would be no need for textile legislation.

What we are asking for here, in essence, is enforcement and the only way we can get this administration's attention is to introduce a measure of this kind. It is not a rampage of protectionism running through the U.S. Senate. It is not a partisan initiative, whereby the Democrats have finally found a particular initiative to whipsaw the Republicans, assuming, of course, the Republicans do not filibuster. If the Republicans are going to start a filibuster, then I am going to have to respond to their particular filibuster in character.

But Senator THURMOND and I have worked closely over the months. We have had discussions about the recent changes made in this measure. But we have ironed out some differences and we are 100 percent going in this direction. I have implored this side of the aisle not to have a filibuster, but to give a fair chance for a vote on something that is important to the American people. I am pleased that I have a majority of the Members on this side of the aisle as cosponsors of this amendment.

It is not a question of protectionism, it is not a question of free trade, and it is not a question of fair trade. It is a question of competitive trade.

I am glad my distinguished colleague, the Senator from New Jersey, is on the floor, because he has been very concerned about free trade and he cites a article that appeared in the Washington Post last Sunday, written by the distinguished columnist, Michael Barone. I will include it in the RECORD during my remarks here this afternoon. I ask unanimous consent that the article by Mr. Barone be printed in the RECORD. Mr. President, if you read that article it is, in essence, a sort of partisan jambalaya of some trade facts not historically accurate and other political points admonishing and warning the Democrats that we are heading down a blind alley, and that we have picked out a particular issue that we are not going to be able to live with.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Sept. 29, 1985]

DEMOCRAT PROTECTIONISM: IT WON'T WIN ELECTIONS OR HELP THE ECONOMY

(By Michael Barone)

For more than 100 years the one issue that distinguished the two major parties more consistently than any other was trade. The Democratic Party from the time of Andrew Jackson tended to favor low tariffs and was hostile to trade barriers. The Republican Party from the time of Abraham Lincoln favored high tariffs and protection for American producers.

One of the first things the Republicans did when they got into power in 1861, even as war was swirling around them, was to raise the tariff. One of the first things the Democrats did when they got a majority in Congress was move to lower trade barriers. Fights over trade were central issues in American politics. Smoot-Hawley was passed by a Republican Congress in 1930; the architects of the low tariff free trade policies after World War II were Democrats such as Cordell Hull and Dean Acheson.

Now the issue is on the front pages again, but turned upside down. The leading proponent of free trade is the Republican president, Ronald Reagan; you could almost say that support of free-trade principles is one constant that connects the young New Dealer movie star with the cheerful conservative president. And the leading fighters for trade barriers are the Democrats.

In the last campaign Walter Mondale called for a tougher trade policy, and this year leading congressional Democrats—Sen. Lloyd Bentsen, Reps. Dan Rostenkowski and Richard Gephardt—have sponsored a bill that would put a 25 percent surcharge on imports from Japan, Korea, Taiwan and Brazil, unless they lower trade barriers or cut their trade surpluses. Most Democrats supported domestic content legislation for autos and are now supporting the textile measure sponsored by Rep. Ed Jenkins (D-Ga.). Not all Democrats are going in that direction; the Democratic Leadership Council is about to announce a policy package aimed at increasing American competitiveness. But if there is a protectionist party today, it's the Democrats.

In a special congressional election this summer in rural Texas, Democrat Jim Chapman's tough talk on trade—and his Republican opponent's gaffe when he said that he couldn't see how trade affected east Texas—helped the Democrats hold a Deep South seat they had feared they would lose. Democratic congressional campaign chief Tony Coelho thinks the trade issue—truculent protectionism—will work like gangbusters for the Democrats next year.

Cordell Hull, who as a young congressman voted against the Payne-Aldrich tariff and as an elderly secretary of state helped put together the postwar free trading system, must be turning over in his grave.

What gives? Why have the Democrats switched from free trade to protectionism? There are two answers. One relates to the Democrats' short-term campaign needs. The other relates to their long-term policy prescriptions. Neither casts much credit on the Democrats or augurs particularly well for their future. In the short term, protectionism is not likely to do as much for the Democrats as some of them think. In the long term, it is not a viable formula for a sustainable policy.

Start with the short term. Imagine yourself a Democratic campaign strategist. You have commissioned a poll, and one of the quesitons asks voters which party will do a better job on a couple of dozen different issues. On some the Republicans have a huge advantage: maintaining a strong defense and asserting American interests abroad, holding down inflation, even—despite the Reagan deficits—restraining government spending. The old Democratic issue of maintaining prosperity now works for the Republicans. A lot of other issues are washes.

What works for the Democrats? Social Security, for one, and your guys are already milking that for maximum advantage. But it's not going to help you do better than you did in 1982 or 1984. Then there's reducing unemployment. But the Democratic edge is not what it used to be (see maintaining prosperity, above), and anyway there may not be a spurt of unemployment in 1986. Tip O'Neill, who foresaw the high unemployment of 1982, isn't so sure this time.

So what does a Democrat campaign on? You look down the list and don't see anything. You ask the people around the table if they can think of something. You get a few blank stares. Then someone says trade.

That begins to look very good when you think of a couple of other problems your candidates have. They've been losing white male votes in droves: Kennedy had over half the white male vote in 1960, Mondale had about one-third in 1984.

White males see the Democrats as too soft and too critical of America, as undermining American defense and American social mores. "They always," in the words of that favorite of white male voters, Jeane Kirkpatrick, "blame America first."

Protectionism puts a Democrat in a different posture. For once he or she sounds aggressive and nationalistic. None of that

Andrew Young talk about how Americans must accept a new order in the world. Instead, we're telling the Japanese to take their Toyotas and . . . let them rot on the docks in Yokohama.

In one sense, the Democrats' protectionist initiative is a logical step in their own development. Once they were the party of laissez-faire economics. While Henry Clay's Whigs wanted the government to build canals and charter banks, Andrew Jackson wanted it to leave the field clear for individuals. Democrat Grover Cleveland in the 1890s declined to take action against a depression except to send federal troops in to suppress the Pullman strike. His Republican successors—McKinley, Roosevelt and Taft—backed a more active federal government and established a Republican majority that won most elections up through 1930.

Even Woodrow Wilson justified activist government on the ground that it kept the field free for individuals: The Federal Reserve would preserve the independence of local bankers and the Federal Trade Commission the ability of little businessmen to compete on an even basis against the giants. It was the Republicans, from their anti-slavery days, who were the meddlers and interveners. It was the Democrats up through the 1930s who were hostile to busybody government interference in the form of Prohibition or enforcement of civil rights.

In this context, free trade was consistent with the Democrats' bias against government interference. It was something of an anomaly that the Democrats, having abandoned in the New Deal years their unwillingness to intervene in the economy generally, nonetheless remained unwilling to intervene in foreign trade. The anomaly was attributable, arguably, to the enthusiastic efforts of well-placed free traders such as Hull and Acheson (who were also skeptical about government interference in the economy generally; the only reason Acheson supported FDR in 1936 was Hull's trade policy) and to the fact that free trade policies helped the pre-1930s Democrats' core constituencies of poor Southern and Western farmers and big city immigrants who produced low-priced commodities and wanted access to low-priced products in return.

In this view, it was just a matter of time before the Democrats would favor government intervention in trade. And now that many of the Democrats' core constituencies—auto and steel union members most notably—see themselves in need of trade protection, that time has finally come.

The problem with that view is that the Democrats have lost their faith generally in the efficacy of government intervention and planning in the economy. If the lesson of the 1930s, drawn in the time by most Republicans as well as almost all Democrats, was that government works better than markets, the lesson of the 1970s, drawn by most Democrats as well as almost all Republicans, is that markets work better than government. You must look pretty hard for a Democrat who has a macroeconomic policy that he believes will bring inflationless prosperity and economic growth.

Keynesian demand management, they all agree, doesn't work too well in a world Keynes never imagined. The no-growth and "era of limits" politics popularized by the likes of Jerry Brown in the 1970s—the notion that economic growth is icky and who wants it anyway?—is not a view that you'll find many practical politicians embracing these days, outside of Colorado or Vermont.

Nonetheless, the reflex for government action is there. The reflex of Democrats, when they see a problem, is to call for the government to do something. The reflex may point toward such goals as the practical steps of raising taxes to cut the deficit or, as Bill Bradley and Dick Gephardt were urging in 1983, lowering tax rates in recognition and ratification of the erosion of the progressivity of the income tax. But they still wonder whether government can do something.

That wondering, when directed where the polls suggest, rouses such proposals as energy price controls in the 1970s, industrial policy in the early 1980s and trade protectionism now. All have the advantages of giving government a lot to do and of giving politicians the chance to say they'll do something themselves.

The problem is that trade policy is no longer a choice between the government doing something (trade barriers) and the government doing nothing (free trade). In a complicated economic world a complicated set of laws, economic regulations and customs has grown up which influence trade.

Politicians as sophisticated as Bentsen and Gephardt undoubtedly see themselves not as the equivalents of Britain's Joseph Chamberlain, who sought in the 1890s to replace free trade with what was quaintly called Imperial Preference, but as players in a complicated game who are changing the odds a bit.

They don't really want their 25 percent import barriers imposed; they are trying to put pressure on the Japanese and others to change the system in various ways. "We need a stick in the closet," Gephardt says. At the same time, they're playing quite a different domestic political game. Bentsen, in particular, when he advanced his initiative, surely had an eye on the special election in Texas. His political base is the rural counties, fundamentalist in cultural values and often rebellious against elites on the economic issues.

Trade lets Democrats say they're populists again—populist in the sense that the word is usually used, which is to say, opposed to what the elites say is responsible. It's always fun to campaign, and to tell reporters you're campaigning, as a populist.

But like most populist appeals made by elite politicians, the Democrats' trade ploy is cynical and therefore not likely in the long run to work. Doubly cynical: first, because its supporters know it's not likely to have the intended effect on trade and second, because, as they sooner or later will become aware, it's not likely to have the desired political effect.

Even its eager initiators see that it is dangerous, as well. Elevating the trade issue even for a moment to the top of the political agenda invites retaliation by the Republicans and a bidding war between the two parties to court protectionist interest. The result could be a kind of feeding frenzy, with every lobbyist thrashing to the surface in wild pursuit of sustenance before everyone else gets his and the feeding period is over. The Democrats stimulated this kind of frenzy in 1981, when they tried to outflank the Republicans by offering bigger business tax cuts. We're still paying the price in the form of huge deficits.

The Republicans who championed protectionism for almost 100 years after Lincoln at least had a theory of how their policy would produce economic growth. So did the Democrats who championed free trade. The Republicans believed that infant industries, built up behind walls of protectionism, would grow so rapidly in a rapidly growing nation that they would come to be competitive by themselves, at least in the American market; and so for the most part they did. The Democrats believed that the increase in international economic growth that would be spurred by free trade would in turn build a stronger American economy; and so it did in the 25 years after World War II.

Doomsayers note that the United States accounted for half the world's gross national product in 1950 and a far smaller national product in 1950 and a far smaller percentage today. But of course the absolute size of the American GNP today would be much smaller if the U.S. still accounted for 50 percent of world GNP. The growth of other countries—first Europe, then Latin America and East Asia—has helped the United States grow more than it would have alone as a Fortress America.

What vision of economic growth is there behind the Democrats' trade initiative? Not surely the vision of a world in which America has half the GNP again; we'd all be poorer. Not the vision of an America in which steel and autos again lead the economy; no one believes it can be revived. At best it is a vision in which politicians and officeholders tinker with the workings of a complex welfare and regulatory state, in the hope of getting it to work a little better. But that's not very inspiring stuff for a party that once promised to cure the ills of the one-third of a nation ill-clothed, ill-housed and ill-fed.

To see what's likely to happen to the trade initiative—unless the Democrats and Republicans work together to inspire a feeding frenzy—think back to what happened to their other recent policy initiative, industrial policy. This was never very clearly defined, but the idea was that government was going to work together with business and labor to (take your pick) revive industries in trouble or start industries with a potenital for growth. It sounded appealing. It gave the Democrats, who had finally decided that Keynesian fine-tuning didn't produce economic growth, another recipe for it. But not for long.

Charles Schultze wrote a devastating column on industrial policy in The Washington Post in October 1983. "One thing the American political system cannot do well at all," he argues, "is to choose among particular firms, industries and regions, coldbloodedly determining, on grounds of economic efficiency, which shall prosper and which shall wither." Officeholders were quickly drained of confidence that government had the ability to manage an industrial policy well, and politicians quickly began to think an industrial policy plank would be attacked as a boondoggle. You heard almost nothing of the issue in 1984.

Protectionism, like industrial policy, can also be undercut by events. The rapid economic growth of 1983-84 made industrial policy seem unnecessary. The appeal of protectionism rests in large part on the trade deficit, which results more from the high value of the dollar than from foreign trade barriers. But the dollar may fall in value. The administration is already taking steps with other major economic powers to see that it does, and for all I know they may succeed. If so, the appeal of the trade issue will diminish greatly.

The protectionist initiative may continue to work locally for the Democrats where there are particular distressed industries: Of the five million-plus metro areas Mondale

carried in 1984 two, Pittsburgh and Buffalo, were in steel country. (The others were Minneapolis-St. Paul, Washington and San Francisco, where Mondale grew up, worked for 20 years and was nominated, respectively.)

It will hurt in areas that identify themselves with growing industries in no need of protectionism. And it will simply miss the target in most of the rest of the country. It's just not possible for a party to win votes on an initiative which most of its politicians believe is a futile gesture.

As for 1988, a Democratic presidential candidate campaigning on protectionism will have to answer some uncomfortable questions. He will be asked why he is campaigning on an issue of economic interest to particular unions and local areas—the "special interests" that dogged Mondale in 1984. He will be asked whether he wants Americans to pay more for videotape machines and stereos. He will be asked whether he had confidence in Americans' ability to work and produce and grow, or whether he is a doomsayer who concentrates only on a few isolated losers.

And he will be asked whether he has an actual plan for action, or just an attractive-sounding campaign slogan. Walter Mondale, a smart and for the moment underestimated politician, had as good a set of answers to these questions as anyone could come up with. But even he, with not a whole lot of other strong issues to choose from, talked less and less about trade as the campaign went on, and more about other things.

Democratic strategists, once they get over their glee at seeing how well their off-year tirades on trade play with friendly audiences, will need to give some thought again to how their protectionist initiatives can be made to work in election years.

Mr. HOLLINGS. On the contrary, Mr. President, this particular amendment is an initiative that not only we are going to live with, whether adopted or not, but it is going to continue to grow and have an impact on other categories of trade so that we in the United States understand the real world of international competition.

I, in offering for the Presidency, sat down with the best brain trusts that you can find on various issues. In foreign policy we had the best of minds, the best of Soviet experts, whether they were liberal or conservative, whether they were confrontational or detentish.

Since I have been in this trading game, having worked as a customs attorney in private life, having testified almost 27 years ago before the old U.S. Tariff Commission when Tom Dewey represented the Japanese Government and chased me around the hearing room all day long, and having finally reached the conclusion in my own mind that this was really not a parochial South Carolina textile jobs problem, but rather a national crisis and a national issue, I then went to all the different people that I could find—economists, financiers, business leaders, and others, and now I am more persuaded than ever that this is a national crisis and a national issue.

I have been to the Harvard campus with the economists and sat around for 2 hours with the economists and argued my point and I did not expect to win any arguments. But when I started winning the arguments and hearing these shibboleths about "Smoot-Hawley" protectionism, then I realized I am probably a little bit better read and more experienced than some of these economists who, when they find something in practice, wonder whether it will work in theory.

More recently, our good friend, Martin Feldstein, whom I respect most highly, one of the most able economists you will ever find, said, on the program, "Face the Nation," "Of course, if I were the Senator from South Carolina, then I would, of course, offer this amendment,". That means, in translation, "What you are doing is a partisan thing, for local consumption back home, and this, too, will pass, so let him have his day."

No; that is not the case at all. The textile bill, as I pointed out, has some 55 cosponsors and will receive even more votes from Senators representing States all over the country, North, South, East, and West.

This not only affects the textile workers; it affects the cotton grower, the wool grower, and the sheep herder. It affects the minorities in America, which comprise 27 percent of the employment in textiles, and it affects women, with 67 percent of the work force in this industry.

This is a national industry joined together, both labor and management, and everyone that you can find concerned.

What about free trade?

Mr. President, there is not now, there never was, nor will there ever be free trade. There is not now, there never was, nor will there ever be free trade.

What we have, in essence, is when the Phoenicians invented money, they invented protectionism, and they started competitive trade.

Rather than belabor my colleagues on the history of so-called free trade, protectionism, and trade wars, I go back to the historic beginning days of this great republic and remember the struggle that they went through.

If you go back to those days, we had 96 percent, of our people on the farm and only 4 percent in industry. So, our distinguished forefather, Alexander Hamilton, came up with his report on manufacturing, and we recommended and installed protective tariffs so that the great United States of America, then just a fledgling republic, could build up its industrial base. We started with protective tariffs. Of course, we had a struggle over this over 100 years ago, in 1860.

There is a provision in the Constitution, Article I, Section 8, that the Congress shall regulate commerce with foreign nations. That is the constitutional charge that we have in this body.

Now, we southerners were rather illiterate. We could not read that provision. But you northerners taught us how to read. So we now, having read, go to a great southerner, by the name of Cordell Hull from Tennessee. Cordell Hull is the father of reciprocal free trade and emphasizes reciprocity. I know all Senators have a word-synonym finder. If they would please check they will see reciprocal means retaliation and retaliation means reciprocity. "So it is necessarily a retaliatory kind of trade," said Cordell Hull. The lesser the barriers, the better off we are. No one disputes that, because, in competitive trade you know exactly what the tradeoff is. No one wants to start any kind of trade war or tariff war. That would necessarily be noncompetitive and frustrate our own designs.

Cordell Hull came in with reciprocal free trade, and the very same Congress provided protectionism for those in the agricultural sector. We had import quotas to protect the price supports. That started the famous American agriculture story of the highest productivity in the entire world, one that we all take pride in, whereby we not only feed ourselves but many other countries of the world. The Soviets have tried to emulate it, and the Chinese are trying now. They have changed from communes to a little bit of incentive, hoping they will begin to produce. After putting in those protective quotas to protect our price supports, we then put in subsidies 50 years ago, in 1935, for the Export-Import Bank, to subsidize our grain shipments to the Soviets at a reduced interest cost.

I will jump quickly now to President Eisenhower. I am giving you this historical information because the President took a pledge in the rotunda in January: "I hereby pledge to preserve, protect, and defend." If you walk a few feet down into this Senate Chamber and mention the word "protect," people say, "Protectionism. We can't have that. You are going to ruin free trade." Free trade—something we have never had and never will have.

But, in essence, President Eisenhower said, "We ought to protect our oil production." He put in oil import quotas in 1955. And we can come right on down the line and at every particular turn we have had it.

Now, what happens to the Japanese? Hobart Rowan talks about "bashing" the Japanese. We are not going to do that. We are not anti-Japanese. I am trying to bash Washington. The Japanese did what I would do, or what you would do, or what any competitive country arising from the ashes after World War II would do. They looked at the American example of productivity—and saw success. And they came

along and put in these protective measures, subsidies, and the like, and they have worked. The Japanese have now given us the state-of-the-art model, updated protectionism, real protection, starting with money for research, protecting their domestic market for the sale of particular products to enable it to build its market, and then hitting on a targeted basis, the international market, not only with subsidies for the international market on a value-added tax price differential, but going even further.

And we run around, hollering, "Fair trade. fair trade. You have got to be fair. You have got to be fair."

I saw the Japanese back under the Kennedy administration 25 years ago. They came to what we called then the fish room. We would sit around and they would jawbone. We ought to make them our arms control advisers. They do not give up anything. They are totally successful.

They sat around and worried and cajoled and everything else. Then they just continued doing what is required to be done to keep their competitive position, their ascendancy, and predomination. The Japanese know exactly what they are doing, using their Government at every turn to subsidize, financing, licensing, inspection practices, and so on.

But, having done those things, they have now not just emulated our protected trade, not free trade, but they have improved upon it. And, in order to sustain and compete, other countries have followed, and we have a dynamic situation, a real, red-hot trade war.

Some say we are starting something. Wake up. We are about 20 years late; definitely 10 years late. We should have moved long, long ago. That war is out there. I go into the automobile factories in Detroit and I find that there is a Japanese robot assembling foreign parts. We do not make American cars. That Chrysler has a Mitsubishi engine. I thought I was smart. I got me a Pontiac. I was buying American. I found out the other day that it came from Canada.

You could not get a discussion on trade in the Presidential campaign. You could not get a reporter to ask you a sensible question about trade. They would just ask you about the domestic content bill and move on.

It was more than just a little bill. The clutch, the gears, the drive shaft, the engine, of our American cars are foreign parts.

When I saw a Japanese robot, having worked with the folks at Giddings and Lewis and Cincinnati Milacron, I said, "Of course, we make a better robot." They said, "Quite true, Senator, but the Japanese finance it."

So they are in there not only financing that robot, just a few years ago they financed the State of Michigan. That is how competitive they are. They put up a line of credit.

The country of Japan came in and put a line of credit up in the New York finance market of $500 million so they could borrow at a triple A credit rating. That is a competitive crowd. We are not bashing Japan, we are bashing Washington. This is a competitive world we are living in. There is not any free trade. There is not any fair trade. It is competitive trade.

After World War II, Mr. President, we rebuilt Europe and Japan with the Marshall plan and it worked. We are not complaining about it. It did exactly what we wanted done.

We sent the best of America's blue-chip corporations overseas and we said, "Look, if we can invest and teach these countries the capitalistic free-enterprise system, these disparate countries would become capitalistic, competitive, democratic societies."

And it worked. I can cite Singapore, Taiwan, and many others.

Having emulated the Amerian example, they have built up and now international competition has turned into what you might call government-to-government enterprise, with the particular government being the decisive factor.

We are constantly berating businessmen. "You have to speak the language." I have a fellow in Roanoke, VA, with a shoe factory. He speaks the language. They told him, "You have to get a partner and work on it." He has a partner. He has been trying for 7 years but cannot get a license.

I went on a television program with Vic Kiam. He owns Clairol. He tried and tried and finally got permission to sell Clairol in Japan. But what has happened? They have now classified Clairol as a medical product requiring a doctor's certificate for shipment. "Well, there isn't any Clairol in Japan."

Cigarettes? Sure, you can advertise them, so long as you do not advertise them in the Japanese language.

I just had breakfast with one fellow who has been there for 25 years who surreptitiously built up a competitor. They will spot you, though, and they will stop you. They will do everything in the world to keep moving and jawboning that Government in Washington. As long as they continue to jawbone and we continue to talk with meaningless phrases about free trade, when it is competitive trade, and say a trade war may start when it has been underway for 20 years, they are going to continue to win and our companies are going to continue to go out of business.

After these Governments came in, like Japan, with Government-to-Government enterprise, the European Economic Community and others emulated it and it has gotten very competitive out there.

I have numerous examples. They land Porsche automobiles in the afternoon in my backyard in Charleston. They are given an inspection, a free inspection. In many instances, owners can pick up the automobiles that same afternoon.

Once you get an American car on the dock in Japan, it takes 4 months to inspect it. Then they will put in a new regulation about the battery cable, the carburetor, or some other part, and they will bureaucratize you to death. They would be good Washington administrators. They know the game.

If you think that 4 months is bad for Japan, in France it takes 1 year to inspect a Toyota.

You cannot buy, in Paris, France, this afternoon, a 1985 model. They start inspecting it in January and they complete their inspection in January of next year.

But if you think that is bad, in Italy they will allow in only 2,000 Japanese automobiles, period. It does not matter what kind.

Why do we put up with this nonsense? Because there is a perception in this land that we have free trade when we do not have. It has been an intentional perception fostered in order to keep the richest market open for products, fostered by these blue-chip corporations of America.

I said they went off at our behest and it worked.

They found that rather than paying the stipulated wage in the United States, they could produce much more economically, cheaper, without all of the particular requirements that Senators and Congressmen put on their backs.

What happens is that these multinationals started investing and moving offshore. One does it, the next one does it, and then the next one does it. In this post-World War II period, they gradually began moving offshore so that about 10 years ago—they became truly multinationals. Business is business: it is not fair; it is not free; it is competitive.

If I am on the board of directors of Exxon, if I am on the board of General Electric, I know I am living in an international competition. I am not thinking of the vote in South Carolina or the job in Arkansas. I am thinking about making a greater profit than Westinghouse or GTE or anybody else in my particular business.

The multinationals then begin to organize.

In the distinguished hometown of the Senator from New York I have gone to the Foreign Policy Association and listen to the distinguished Mr. Wriston.

Running for President is a wonderful education. You have to go to the Trilateral Commission. You have to

meet the big bankers such as Chase Manhattan, our good friend David Rockefeller. They will tell you that Japan is our most important ally.

Mr. MOYNIHAN. Will the Senator yield for a question?

Mr. HOLLINGS. No. I want to save the time of my colleagues. I want to continue on. I am sure we will save time.

But with the multinationals in the Trilateral Commission, what they do——

Mr. MOYNIHAN. Will the Senator yield for a point of personal privilege?

Mr. HOLLINGS. Certainly.

Mr. MOYNIHAN. Mr. President, is it appropriate for the Senator to speak in such a manner of the Deputy Secretary of State, Walter Wriston, and David Rockefeller, who have been distinguished citizens of this country for many years.

Mr. HOLLINGS. The Senator did not make a characterization, but I did say distinguished.

The PRESIDING OFFICER. The only restriction as it applies to other persons is the restriction as it applies to Members of the Senate.

Mr. MOYNIHAN. I thank the Chair.

Mr. HOLLINGS. What we do is we say to the distinguished Walter Wriston and the distinguished David Rockefeller, they organize this Trilateral Commission. These banks make the majority of their profit outside the United States and it is of interest to them.

You may not like that statement, but I am going to make it time and time again. I am going to look out for this country and I am going to look out for the standard of living of this country and I am going to look out for our capacity to maintain ourselves as a world power. That is really what is at issue.

But these gentlemen come and organize and spew out editorials. The editorials come out and they are about free trade, bashing Japan, with economists commenting. They will not say anything about the fact that we have lost 1.5 million manufacturing jobs since 1981.

They will say anything but how we have lost 1.5 million jobs. They will say we've created jobs, but they will not say those are service jobs, making hamburgers. We have lost 24,000 textile jobs just in the State of South Carolina, but they would have us praise each other for our wonderful success because we are maintaining free trade. Utter nonsense.

One Senator is not going to do it in one speech in one afternoon. We are beginning, you might say, a re-education process. We are seeing that the founders of this country knew how to compete. It was the Yankee trader, the American businessman. I will elaborate about that American businessman and how competitive he is.

I can go to different industries or specifically, the textile industry. I shall be glad to do that this afternoon.

We still have—that is one thing I learned in my 3 years of travel to some 50 States—out there in America, the human ingenuity, the scientific imagination, the industrial muscle, the financial resources, and the zeal to compete. Whenever we sacrifice and work together, there is no force on Earth that can stop this country. We have the most productive workers in the United States of America. I ask unanimous consent that a table comparing international productivity be inserted in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

INTERNATIONAL PRODUCTIVITY COMPARISONS—GROSS DOMESTIC PRODUCT PER EMPLOYED PERSON

	1983	1981
United States	100.0	100.0
Netherlands	96.7	94.0
France	94.3	92.8
Germany	93.8	91.2
Belgium	92.5	90.8
Canada	92.0	92.8
Japan	73.7	72.1
Italy	66.3	68.0
United Kingdom	56.0	62.4

Source: Bureau of Labor Statistics, January 1985.

Mr. HOLLINGS. Mr. President, we have had the Japanese come to my great State of South Carolina. We have had them in South Carolina and they are not sending our workers back to Japan to learn how to sing company songs. What we have in the United States of America is the most productive worker and the most competitive business leaders you can find. It is the Government in Washington which is not producing and not competing.

They laugh. We had a meeting the other day of Senators from all over the country and when I used the phrase "this nonsense about free trade," there was a giggle, a titter because I am from the southland and know not of what I speak. I have worked in the vineyard on this. I have read a lot. Over the years, I have had much, much to learn about it. But I would not yield in my objectivity on this particular score. I told the industry that they had to modernize 25 years ago, and now that they have spent almost $8 billion in the last 5 years and have the most competitive industry there is, and I am going to speak the truth and tell about it.

What we have is an unreal situation. We must change the premise of free trade if we are going to discuss this problem intelligently. It is not a matter of free trade, it is not a matter of fair trade. It is a matter of competitive trade.

The Smoot-Hawley tariff should be brought into perspective. It is best to start with the account put in the record over 5 years ago by our distinguished colleague, Senator HEINZ of Pennsylvania. I have talked to the distinguished Congressman on the other side, Representative KEMP. He said, "Smoot-Hawley passed before the crash." It actually passed the House, and we shall put the schedule in the record, in May 1929. The crash was on October 29, 1929. Smoot-Hawley passed the Senate in March, then was signed after a conference in June 1930, 8 months after the crash. I ask unanimous consent that a chronological schedule of the consideration Smoot-Hawley be included in the RECORD.

Mr. President, if anyone thinks that Smoot-Hawley caused the crash or the crash caused Smoot-Hawley, look and see that we had an increase in trade in 1929 over 1928 and a diminution trade after the crash for both dutiable and duty-tariff and nontariff—free goods.

There being no objection, the chronology was ordered to be printed in the RECORD, as follows:

HISTORY OF SMOOT-HAWLEY

January 29, 1929—Hearings began in House Ways & Means.

May 7, 1929—Rep. Hawley (R, Ore.) introduced a tariff bill.

May 24, 1929—House passed the bill 264-147.

October 29, 1929—Crash.

March 24, 1930—Senator Smoot (R, Utah) guides the bill to passage in the Senate 53-31.

June 13, 1930—Senate passes the conference report.

June 14, 1930—House passes the conference report.

June 17, 1930—President Hoover signed the bill (eight months after the Crash.

Mr. HOLLINGS. Smoot-Hawley only referred to one-third of our imports. Only 1.5 percent of our GNP. All we are talking about is $231 million. And today we face a $150 billion trade deficit. When you go to Smoot-Hawley, it occurred after the crash and it was the crash that caused our decline in trade.

Under Smoot-Hawley in 1933, we find trade swinging back up and increasing after we passed the Cordell Hull's Reciprocal Trade Act in 1934.

Only one-third of our imports were affected by Smoot-Hawley, but both our dutiable and duty-free imports declined. No one now can logically argue that on the one hand, Smoot-Hawley caused the crash and the Depression.

As for the retailers opposed to this amendment, they were putting out this stuff before we could get to this particular amendment, the senior Senator from South Carolina and myself; you received three letters in the early part of the year on trade, noting what a terrible thing this would do to consumers and everything else. But Smoot-Hawley did not cause the crash.

And let us, for the purpose of argument, say it did. We live in a far more complex world. This is not 55 years ago. Trade was a rather minimal thing in the economy and GNP at that par-

ticular time. It is just as relevant to talk about a tariff wall of Smoot-Hawley as it is to talk about the Maginot Line. President James Earl Carter learned it. He embargoed grain. He put up an embargo wall up and our customers went straight around it to Argentina or Canada.

If we want to try to be obstructionist, if we want to try to be what they characterize as protectionist, in this dynamic situation, that is impossible. It is literally impossible. You can produce anything anywhere in the world. I remember about 30 years ago, when, at that time, representatives against us on a textile measure said, "Senator, that textile industry is filthy and arcane, low-skilled, low wages, dirty air, noisy, sweatshops. Get rid of it. Give it to the third world countries."

Well, I immediately began correcting that impression. I will go into it in a second. But the truth of the matter is that at that time in the 1950's, you could not produce anything anywhere in the world. But now, in the mid-1980's, you can. You have Atari going to Taiwan, Tandy going to Singapore, Digital and others going to Mexico. As for automobiles, Fiat has a factory on the Ivory Coast, Peugeot in Algeria. You have semiconductors in Brazil, high technology in Mexico.

If the Senator from Arkansas and I were going to open up a business here today and we went down to our friend, Luther Hodges, the banker, and said, "Luther, we have been good old buddies, you remember, and we want to borrow $10 million over a 3-year period to produce this gadget," he would study the matter and say, "Wait a minute, I think I see you have been studying your market and you think you can make it in about 3 years," and we say, "That is right."

He would say, "Anybody can go across the line from El Paso into Juarez, Mexico, and for about 30 cents an hour, can produce in that market and capture your market, so we had better make it a 5-year loan." And the Senator would look at me and say, "We cannot get anything out of this in 10 years." I would say, "Don't sweat it, we will not build this plant in Little Rock or Charleston. We will go down to Juarez and get ahead of the curve."

This is American business. There are over 200 blue-chip American corporations operating in Mexico. There are five General Electrics, five General Motors. RCA has its biggest factory there, due to the lack of a trade policy in this Government. And those who run around talking about free trade are forcing industry, in order to sustain in the international competition, to move overseas.

As you look around at these industries, for example. Pratt-Reed—they make pianos—we brought them to Liberty, SC. They increased their productivity. More than that, they had to move to Mexico to exist within this international competition. We can fill up the RECORD with all kinds of examples. This is not just a problem in October 1985 of Democrat and Republican politics or the President's vetoing or not vetoing a particular bill. What is going to happen is we are just beginning a debate that will go past the 1986 race and into the 1988 race and on because it is impossible, in essence, to correct this situation in a 1-, 2- or 3-year period.

You would say, Mr. President, "How do you correct it?" I can tell you immediately how to correct it, and that is the same way we did with the problem of foreign policy at the end of World War II. We had a tremendous difficulty, then, in correlating the Department of State and the Department of Defense, and so what we finally did in the late forties was to institute what we call a National Security Council to get them together and have a coordinated foreign policy.

Now we are running pellmell. I have heard that there are some 300 bills—I have not bothered to count them—a shoe bill, a steel bill, a textile bill, a communications bill, a Japanese bill, a Canadian bill, a wood bill, a pork bill, coming out of the woodwork. What really has occurred is Congress has been responding, responding, responding, responding. And over the last several years we passed not only the 1979 Trade Act which provided for licensing, which this administration does not do, but we have countervailing duty, escape clause, and antidumping laws. Last year, in the heat of the campaign they said we needed customs agents. Don Regan wanted 500 more customs agents. We put in the money. He did not hire one.

The election is over. They treat this as a political problem. This is a problem of our standard of living and our capacity as a world power, but this is also a problem really of correlation, coordination, and enforcement. There are 25 departments and agencies involved in trade, and we have the Roth bill, the Hollings bill, and many other bills and we all keep knocking at the door. We really do not need any of these bills, including this textile bill, if we had enforcement. The solution to this problem is to take some balanced, objective, erudite leader, put him in and say, "Now you are the trade czar." We need to have a national trade council that will coordinate, orchestrate, and begin to enforce our laws, not any new laws. Let us use the laws already on the books for dumping, countervailing duties, escape clause, trigger price, and the rest, and systematically put the Japanese and everybody else on notice that we are going to coordinate our agencies—State, Defense, Commerce, Agriculture, Labor, Special Trade Representative, 25 in all. When you catch them over here, they go over there. When you go over there, they get out over here. It is quicksilver in the palm of your hands. I believe President Reagan, and I feel the same way about competing, but he has been told by the best of his financial advisers, "Mr. President, you are going the way of President Carter with 18 percent interest rates unless you let the imports flow. And what's going to happen is if you don't let these imports flow, you are going to high inflation and 18 percent interest rates." You cannot sustain with these deficits in excess of $200 billion anymore.

Go to a timber State. The Canadians have taken over a third of the market and we cannot get anything done. I go down to Florida and try to get a little bit of Florida orange juice. They say, "No, Senator, this is from Brazil." I go out to see my nephew, and he and another enterprising group are taking over a floral operation—big, beautiful thing. They are shipping in all kinds of plants. I said, "That plant there, nice ivy." They said, "No, that's not from here. That's from Guatemala." I said, "Guatemala?" They said, "Yes. It cost us 2.8 cents down here in Monk's Corner to put that sprig in a very small pot, whereas we bring them in from Guatemala to Miami to the airport at Charleston cheaper and we pick them up there.

This is international competition. I move into the office in the Customs house and there are all the long faces of the cement producers. I said, "Heavens, if you can't grow flowers or oranges, textiles or timber, at least we can make cement. Oh, no, Senator, the feedstock is natural gas and they are shipping cement up to the State of Washington as well as to South Carolina. They have got 10 percent of the market. They will have near 30 percent of the market at the end of this year." And the giant Portland plant in South Carolina and the other plants that we have will have to close.

This is not textiles. This is not shoes. This is not Republican or Democrat. This is not a momentary political issue that these narrow-minded, shielded Washington writers want to get rid of and move on. They are going to have to live with this one, and they are going to have to understand it because what do we do? We are the ones that run up the cost, and we believe in it. It is a bipartisan runup of cost.

But you and I, Mr. President, at the congressional level have established a high standard of living, the highest in the world. And we tell the manufacturer, "Look, you have to provide a minimum wage. You are going to have to have clean air and water. You are going to have to have Social Security. You are going to have to have unemployment compensation. You are

going to have to provide a safe place to work. You are going to have to have safe machinery with which to work." And recently we added another $7.5 billion and told our manufacturers, "You have got to clean up your toxic waste."

Now, we believe in those things. We vote for those things, but do not heap all of those costs on America's productivity and yell about free trade. You cannot have the highest standard of living in the world with the lowest cost.

This is not a welfare Congress just to take care of cheap prices and consumers. You have to be producers before you can be consumers. We are not looking for retraining and trade adjustment assistance. We are looking for a job. I have all the technical training I can handle. I am looking for a job. We set that standard of living and then sit around here totally ignoring it, like it does not have any relation at all to this issue.

Our manufacturers are paying a 30-percent penalty because the Government can't pay its bills.

Now, that is something that many of us on both sides of the aisle are trying to treat with the Gramm-Hollings amendment. We are going to try to enforce the discipline on an impartial basis, so we say what we mean, we mean what we say, and we have truth in the budget. Yes; I will agree, the economists try to overdescribe that particular effect. That is the effect when we compete with relative equal standards of living in Europe and Canada.

(Mr. ABDNOR assumed the chair.)

Mr. HOLLINGS. Mr. President, this particular amendment, Senate amendment 720, does not relate to Canada or the European Economic Community because we have similar standards, and the only difference is the overvalued dollar. It is not a "white man's" bill. We are going out to the Far East because we are going after the violators. We are going where the competition requires. Protection. Why has protection taken on such a pejorative sense? We have the Army to protect us from enemies without, the FBI to protect us from enemies within, unemployment compensation to protect us from the loss of a job, Social Security to protect us from the ravages of old age, environmental laws to protect the air we breathe, the water we drink. The fundamental of Government is to protect. These people cannot pronounce it, except when they take the oath of office, and then forget it. That is in the oath, and we will continue to take it. Let us look at it seriously, because there is the competition out there. In essence, we have put that standard of living there, so we need some kind of balance.

I have asked the best economists and financial minds, "What would you do?" They said: "What you really have to do is to have a cutoff point to protect your industrial base." They say 15 percent. Let us say 20 percent. We will not argue over 5 percent. Not allowing more than 20 percent import penetration of your domestic market in this country.

You can look down the list of where we are, and it is time to talk of textiles and shoes. That ought to wake them up and tell them something really is wrong. That should tell them something. What it is trying to tell them is that you cannot buy a VCR or a black-and-white television that is made in the United States. Well, the world is not going to end on that.

I had occasion to have breakfast with a gentleman from Elgin, IL. I went up there to carpetbag Illinois. Put it on record, I say to the Senator from Illinois [Mr. SIMON]. I was trying to get the glorious opportunity that he has in his magnificent State. I went to Elgin, IL. I got to the Elgin Watch Co., and I brought them down to Blaney, SC, and I renamed the town Elgin, SC, so you can now go to Elgin.

They increased their productivity and the craftsmanship to the tune of 35 percent. But they do not make an Elgin watch in the United States of America, nor, I am told advisedly, do they even make a watch. I know that in Arkansas they repair them and do a little assembling. My understanding is that we do not make watches.

You can go down the list: Every other garment in this Chamber and in the gallery is imported. That is 50 percent. Look down at your feet. Seventy-seven percent of the shoes are imported. The distinguished economist, Mr. Martin Feldstein, said on "Face The Nation," "Get rid of the shoe industry." He is wrong. I have seen the shoe industry, and the two distinguished Senators from Maine are going to talk about that.

What they do not want to acknowledge is our wages and our standard of living. They want to jump you mentally to a service economy.

They told that to Great Britain at the end of World War II. They said, "As you withdraw from the colonies, don't worry. You will be a nation of brains rather than brawn, and instead of producing products, you will provide services. Instead of creating wealth, you will handle it. You will be a financial center."

England has gone down, sadly, to a second-rate nation. They are not investing in Great Britain. It is "small Britain" and "great Japan," because they did not learn how to compete.

That is the one objection I have to the London economists I read regularly. They have their bit in their teeth, and they are in an ivory tower. I hope to bring the London writers down on the floor to the real world, because we do not want to go, like England, to a service economy, taking in each other's wash.

In addition to that standard of living, we have to have productive capacity as a world power. We are not a Third World nation. We act like it, as a government. You and I know that when you talk about retaliation, they just fight to get into the richest market, and they should be worried about us retaliating. But we are sitting around and talking about a nonproblem when we have a $150 billion trade deficit. They are not going to come back at us. They have already retaliated.

We act like a Third World government and do not understand that to maintain as a world power, you have to produce.

As the distinguished senior Senator from South Carolina pointed out, I brought the witnesses to that particular hearing. Hickman Price of Michigan conducted the hearings. There was the Under Secretary of Commerce, Arthur Goldberg's outfit, George Ball, and Mr. Dillon of the Treasury.

We had all these departments in a crash hearing program in the first part of the Kennedy administration, because he believed in carrying out his commitments. Believing in carrying out his commitment, President Jack Kennedy had these hearings and found that, next to steel, textiles was the second most important to our national security. It was under the old Office of Civilian Defense Mobilization. We had to show that the national security was impaired in order to get the seven-point program that Kennedy instituted. We made that showing.

You have to have textiles. You cannot send our troops to war in a Japanese uniform. In Vietnam, it was an embarrassment that they were running up. At one end of a plant in Canada, we were getting a woolen product because we could not produce it in the United States, and we got another out of the other end of the mill in Canada.

Glass, rubber, aluminum, what have you—the necessities to produce the weaponry of war and to maintain a world economy. We are not a Third World nation. We have a tremendous responsibility not only for the freedom of ourselves but also the freedom of people around the world.

We are trying our dead-level best to maintain this productive capacity on the one hand, and we are trying to maintain that standard of living on the other hand; and then we hear a totally unrealistic and irrelevant charge about free trade.

With respect to the matter of costing consumers, you will hear all kinds of different examples about consumerism. I think that if we had to make a

choice, we would have to make the choice as the world's most powerful nation, and responsible for freedom, on the side of productivity rather than consumerism. I wish we were getting a bargain. I know that in textiles we are not.

We know that last year, for example, a shirt bought in Hong Kong cost $5.92, and in the United States the price was $7.50. Both shirts were sold for $18. I ask unanimous consent that the table be placed in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

Even when foreign workers are paid as little as $0.16 per hour, the *savings are not passed along to consumers.* A leading national retailer sells a shirt which may be made in any of four countries, with different base costs, all for the same price to consumers:

Country of origin	Cost to—	
	Retailer	Consumer
Hong Kong	$5.92	$18.00
Guyana	5.43	18.00
Colombia	6.35	18.00
United States	7.50	18.00

Mr. HOLLINGS. Mr. President, we can go to children's and women's clothing, and where the U.S. product was $7.65, the U.S. imported product was $7.72.

So what they are doing is coming up and playing a good game, and I do not blame them for it. What they are trying to say is: "We're working here for a cheap price. We're working up here to maintain as a world power. We are trying to maintain a standard of living. We are trying to maintain a productivity." And, in essence, they are trying to talk about consumerism, consumerism.

They have given a false impression and are getting a free ride on this particular score.

The whole thing is that we must have some kind of understanding on the subject of world trade. It is a dynamic.

We try to get an agreement and come back and everybody is in violation of it.

Now, in the public relations department, you can go on national TV, and say you are going to put up $300 million for export subsidies. That is no good. That does not help us. We have been through all of this stuff. We are not just nibbling around. We are dead serious.

I hope we succeed on this particular initiative because it is well considered. We are not asking for tariffs. We are not asking for any of these other things that they talk about with respect to free trade.

All we are asking for is that the agreements made be properly enforced. This has been going on a long, long time in this country and our textile trade deficit is now excess of some $16.2 billion.

We started with President Carter—let us be politically impartial on this one. I took my distinguished colleague from Louisiana who was then chairman of the Finance Committee; I took Bob Strauss, the Special Trade Ambassador; and I took your President and my President, Jimmy Carter, and we had this same free trade and protectionism nonsense and we finally debated it. We debated it all Friday night, all day Saturday. We debated it Saturday night. We debated it Sunday. We went around the clock and we finally got a bill passed that President Carter vetoed.

But at the time of the veto he assured us of his commitment to enforcement of the Multi-fiber Arrangement and our trade agreements.

We had a bit of stability then in 1979 for the remainder of that year and in 1980.

At that particular time, Senator THURMOND went to candidate Reagan, and I will put that letter in the RECORD, and he committed to relating import growth to the growth of the domestic market. I ask unanimous consent that that letter be inserted in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

SEPTEMBER 3, 1980.

The Honorable STROM THURMOND,
Russell Senate Office Building,
Washington, DC.

DEAR STROM: The fiber/textile/apparel manufacturing complex provides 2.3 million vitally needed American jobs, including a high percentage of female and minority employees. As President, I shall make sure that these jobs remain in this country.

The Multifiber Arrangement (MFA), which is supposed to provide orderly international trade in fibers, textiles, and apparels, was first negotiated under a Republican Administration. The MFA expires at the end of 1981 and needs to be strengthened by relating import growth from all sources to domestic market growth. I shall work to achieve that goal.

Sincerely,

RONALD REAGAN.

Mr. HOLLINGS. Mr. President, we never asked for rollbacks. We are not asking for rollbacks in this particular measure. We just asked for stability so we can sustain an industry fundamental to the American economy that is not one of the highest wage industries. People talk when we get in here that they want jobs for minorities. We employ 27 percent minorities. They want jobs for women; we employ at least 67 percent women. We are talking about jobs all over the country. It affects all 50 of the States. It is a national industry.

Every time we go over there they tell us, "Oh, we will study it, we can't have protectionism" and they get on the radio and on the TV more, and then you have these narrow-minded little southern Senators who only have a little local problem back there in South Carolina and that is how they get elected; and that is nonsense.

This is a national concern, a national crisis. This has gone from textiles all the way to steel.

But right to the point, with respect to Brazil, if they are dumping it, you are giving them all these modern steel plants. I know the gentleman who built them all named William Koff. He built one in Georgetown. He is from Germany. And now he comes around and by gosh the word is out that business is way down.

So we have an overcapacity in steel and it is dumped here at less than cost from Brazil.

You find as a result, United States Steel buys Marathon Oil. You see, the businessmen are way ahead of you and me, we politicians. We have had a problem. We have been disregarding it. They are responding to it. They now are soliciting business for the islands offshore. They have moved there.

I can give you industry after industry that has gradually closed down, and here when we get to the matter of jobs for minorities and women, we have the biggest employer of minorities, we have the biggest employer of women, we have management, we have organized labor and we are trying to work together and get the attention of the people.

It is surprising to me the lack of understanding that so-called protectionism. We are living in a one-world productivity.

I can move my plant, like the one Allied just moved to Pakistan. They are doing well. They are making good money. And I have talked to them. They keep on moving. We are going out of business. We are not going to maintain as a world power. This is America and we are talking about our national security. And in order for us to be the world power that we expect, we have to be productive. We are not protectionist. We do not mind perhaps giving up in this 20 percent of our market to imports. But semiconductor imports now have jumped to 42 percent.

We are losing the productive capacity of the United States of America. It is a national crisis. It is not a momentary problem to be smoothed over, over at the White House. This thing is coming through from the people and they are asking us as their representatives, "Heavens above, we are working, we are producing, we are the most productive worker in the world, and we need your help." I have shown that the American industrial worker is the most productive in the world. The Japanese are seventh on the list.

But we have in the United States the most productive worker, according

to the Bureau of Labor. The United States is the most productive, then the Netherlands, France, Germany, Belgium, Canada, Japan, Italy, and then the United Kingdom. Now Japan is No. 7 down that list.

I visited some 41 plants in August and September and it would amaze you to see how they had modernized.

I used to go through those plants when I was running for the legislature and when I was running for Lieutenant Governor.

Mr. McCLURE. Mr. President, will the Senator yield?

Mr. HOLLINGS. Without losing the floor, I yield for a question.

Mr. McCLURE. I hate to interrupt the Senator but I just want to know if I could, to get an indication as to what I will tell other Members. They asked me earlier if I would withhold the motion to table until some other Senators had the opportunity to be heard. Some Senators are now asking me if indeed they are going to have the opportunity to be heard.

Mr. HOLLINGS. Yes.

Mr. McCLURE. So I will be able to respond to them.

Mr. HOLLINGS. Most respectfully I understand the pressures the Senator is under. He has some on his side prepared, after he makes the motion to table, to filibuster, but they are in a very small minority and he is prepared, as he has indicated to me, to move to table. The Senator is courteous and he is a very courteous gentleman and I respect him for it, trying to give those an opportunity to talk, to allow them to talk and then make his motion. Then if it is not carried, I will ask the Senator then if we could get his help on a time limit to get a final vote and he said, "Oh, no, I would have done my best at that particular time and then it would be out of my control."

So with that record having been made, most respectfully, I understand the pressures, I am going to give up here. I am not trying to hold the floor. I am not giving up, but I will be ready to speak on this this evening, all night, tomorrow and beyond, because we have no more important a measure come before us, and I want to share the time. I am not the authority. There are others who are the authorities. But we are not going to treat this as a casual amendment to be brought up to satisfy a political objective and get a vote and then when they cannot do it move onto important business in the Senate, to pass the debt limit, or to pass this particular bill or that particular bill.

There is nothing, nothing more important than this particular measure we are discussing now because this is going to set our policy and the way we proceed in this government.

So I will continue on and yield the floor in just a little while. I am trying to give the Senator an honest indication.

Mr. McCLURE. I thank the Senator for answering.

Mr. HOLLINGS. I am most respectful to the Senator because the Senator has been very indulgent of me and I do not like to make long talks, but we have to have an opportunity here for the people to understand exactly what is involved.

What is involved here is that over many years the United States has increased our productivity. And where in the midfifties I used to go in the plants with the dust and the fuzz and everything in my eyes and I would rub them and it was in my ears and everything else. This industry, in a 5-year period, has invested $7.91 billion. They are not cheap. They are modernized.

I could hear that Mr. Gilman now, the Trade Representative, saying: "Senator, you have a cheap, old industry. You don't want it. They are just a cheap bunch. They are just a bunch of Republicans. Why don't you get rid of them?"

They are everybody. This is America, "crafted with pride." We are going to continue to debate this issue. The industry had modernized—they have all this new machinery where, without the touch of a hand, that bale of cotton is put on that roller track and it goes right in through the cart without touching a human hand and the next thing you know it is into the spinner. And they have these spinning machines, not at 100 or 150 picks, but 550 picks. They have the most modern of machinery there.

When I used to go into that weave room, we would have 135 people in that weave room. There are 15 now. They have streamlined. People have lost jobs in the streamlining process. They are all honest, productive, hard-working people.

In addition to that, they have a particular mechanization that is computerized for the dyeing. We used to have anywhere—we thought we were big shots if we had 20 or 30 dyes. They go in for over 600 different shades. It is the most competitive of industries I have ever seen.

Then they go into the cutting of that cloth, electronically done by a pattern. Incidentally, I saw that happen and they were throwing that pattern up on a satellite into the country of Australia, taken down by an industry that was buying it and copying that pattern for the Australians.

So do not talk to me about a run-down, third-rate industry. I have heard that in debates over the last 30 years.

We have the most modernized, mechanized, computerized, electronically controlled industry that you have ever seen.

If you go into the sewing room, they have machinery there that stamps on the pockets, stamps on the buttons, the collars on the shirt. I used to go through factories where they had 3,000 women. I would spend the whole afternoon there. I could cover it now in 2 hours, because they have only 1,500. They have cut it in half with mechanization.

We have the ILGWU and the Amalgamated Clothing & Textile Workers Union, working hand in glove with Mr. Roger Milliken. And when they are working hand in glove with Roger Milliken, you know you have got a national crisis. When they work with Roger Milliken, you have national opportunity and the opportunity ends right here as to whether or not we take it at the flood, as old Shakespeare would say. Because you can go into that particular sewing room and see what they are producing. And it is the most amazing thing in the entire world. It is the most mechanized, computerized, competitive industry that you can find.

I do not take a back seat for this industry. I used to have to talk at one time 30 years ago with tongue-in-cheek. This is not a local problem. This is a problem with a very modernized, competitive industry.

I can give you examples where we are selling, in some instances, in Hong Kong, where we are accepted. We sell on the fashion and we sell on style. Our American industry is competitive as can be.

But they cannot compete and maintain our standard of living against clothes made by workers paid 18 cents an hour in downtown Shanghai. Two months ago, they dropped on the docks a shipload of corn from Shanghai. And corn farmers from Nebraska and South Carolina rushed in and said, "They are getting into wheat, they are getting into corn. Before long, we will be uncompetitive," because, of course, China is not free trade or a free society. They have no unemployment. Everybody is employed. It takes 12 people to hang a picture on the wall, but they all have jobs. That is the full-employment system of communism.

We have an increase in productivity in the textile industry of 5 percent each year for the last 5 years. It is the most productive, competitive industry in this country. So do not tell them to speak Japanese or get a Japanese counterpart.

We have been into this thing for 30 years now. Most of them are Republican, so I am not making a particular impression on them. But I hope to make an impression on you, my colleagues in this Congress.

This is not, I say to Senator McCLURE, the chairman of the Energy Committee, most respectfully, an afternoon problem to let three or four Senators talk and then have a vote and then if it does not go your way,

then have the leader come in and set it aside. We would oppose that. I want that understood. We are ready to stay. This is that kind of a problem. I have been through more kinds of little problems around here.

We have been knocking on the door. Senator THURMOND and I have been told and the cosponsors have been told, "You will not get it out of committee." There are over 300 cosponsors that have gotten it out over on the House side. We have it moving here on this side.

We need a national policy with respect to enforcing our bilaterals. This is the only way we know of to get hold of it. We have been the indulgent, we have been the understanding, we have been the tolerant. But we cannot go back to see the best of the best, these women workers and minority workers, working their hearts out with tremendous pride not for the highest wage as in automobiles and steel, but around the clock, sending their kids to college and tell them, "Well, you know, let the Third World countries have it because it is a semiskilled industry."

This is a highly skilled, highly mechanized machinery-intensified industry now. Over the past 25 years we have lost thousands and thousands of jobs. Since 1981, we have lost 1,500,000 manufacturing jobs. We have lost 300,000 textile jobs nationwide and 24,000 in the State of South Carolina over the last 5 years. We continue to close good plants and lose good, competitive people, who have dedicated their lives to this industry. And all we can tell them is that we will give them trade adjustment assistance. "Trade adjustment assistance." Do not put the good, hard-working people of America on welfare. We need not if we pass this amendment. At the same time we can give the foreign competitors production. If you want to produce in the Third World, and what we propose is tilted that way.

We have given special treatment to the Caribbean Basin Initiative countries. We want to help Mexico and Guatemala and we have gone into Panama trying to help in this particular hemisphere to build up competitive, dynamic economies. We are willing to help it along there.

But I cannot compete with 18 cents an hour in downtown Shanghai with 1 billion Chinese.

I do not know where we are, literally. I say that most respectfully. I have been in your States. I have met with the industry leaders, the labor leaders there. I have had their support. I am grateful for it.

But let us not let them down now with cliches and phrases and say now, with an important problem of this kind, that what we want is three or four Senators to just put a few speeches in the RECORD and then have a vote on a motion to table and then, if you cannot win that, go from there.

Let me say, I do not know whether I will be able to get this floor again. I am going to try my dead level best, because I want to talk a little longer and find out where we stand.

But, I hope Senators will look at our amendment. What we have done, in essence, in this particular amendment is update 680.

We have included shoes. Shoes have a real case. If you want to go to New Hampshire, I will take you to the Timberland shoe factory. They are producers of a unique product that sells the world around. But generally speaking, you are back to a wage scale problem with other countries which have none of the environmental laws, safety rules of OSHA, and everything else that we work under in our shoe industry.

As a result, we are losing. We are competitive. We are productive. We have to look out for our friends in the shoe industry. We do not want to try to make this a Christmas tree, but they have a real case and we will go along with it.

Let me address the People's Republic of China and answer that question, if I am not asked. I want to be honest with my colleagues. I resisted for a solid week the change from S. 680 to this amendment—720. The reason I resisted is that when you have 55 cosponsors, why give in to the People's Republic of China?

There is a simple answer. There was a meeting of the leadership in the White House and I have been told responsibly, and I believe my friend because he was there, that he was told by Senator DOLE and the Vice President of the United States, Vice President BUSH, that the President would have the disposition to sign it if we could take care. I do not want to misrepresent. That was the expression used. I do not say the President is committed.

But I said with that kind of representation, I do not want to hold up any more. I hate to give in 480 million square yards to the People's Republic of China. My problem is to develop Mexico. My problem is to develop El Salvador. My problem is to develop Panama. My problem is to develop many of the nations here under the Monroe Doctrine.

My problem is not to develop Russia and the People's Republic of China. I know that is where the business opportunities are. I know that is where you can make some money momentarily. Momentarily, a lot of our American businessmen have gone to Japan and made themselves rich. Now they are being squeezed out. Like my friend I had breakfast with today, he is being squeezed out.

Now they are making airplanes and building ships over there with government subsidies.

In the olden days, we said, "We will make the airplanes and computers and let others make the semiskilled textiles."

They are making the Airbus in Europe and they are making computers and semiconductors, to the tune of 44 percent of our market, in Japan. So we are not competing there.

But we are trying to maintain and do our duty here to maintain our standard of living and our capacity to continue as a world power.

Do not tell me about rollback. A lot of you were not on the floor. I used the example of Willie Sutton stealing that $100,000. We bring him into court and when we say we want the $100,000 back, he said, "Don't roll me back a $100,000."

These amounts, when they say they will roll back 50 or 68 percent, is a bunch of nonsense. Ours is a measured approach designed to meet the problems created by a lack of enforcement of the agreements we have with our trading partners. The 34 bilaterals set out the terms. They were entered into in good faith by both parties. We want enforcement. This amendment provides that, taking into account the terms of the agreements, and provides for orderly growth in the future—the goal of the MFA.

We did not roll back the People's Republic of China as I described. We do with Korea, Taiwan, and Hong Kong. We did not with Europe and Canada because they are affected by the overvalued dollar.

Do not say we all ought to do our duty, pay our bills, and get rid of the budget deficit.

You can get rid of five deficits, Senator, and I can tell you right now that in Malaysia the value of the dollar has gone up, over the 4-year period, 1.7 percent, with textile imports from Malaysia to the United States having gone up 227 percent.

As for Thailand, value in the dollar has gone up 7.1 percent, but the increase in textile imports from Thailand, in violation of the agreement, has gone up 167 percent.

I can go to Taiwan and, yes; there the dollar has gone up 7.3 percent, but imports have increased 43 percent. That is a big productive operation.

We have the answers, if you give us time. That is why I am telling our distinguished Senator from Idaho that there are all kinds of alleys they chase us up and try to say we do not know what we are talking about, that there should be reciprocal free trade.

It is dynamic; it is competitive. We competed. We sat down and made these agreements. We are only asking for a holding of the line and a guaranteed increase—holding the line and a

guaranteed increase. That is our textile bill. Do not let them tell you differently.

I yield the floor.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from Maine.

Mr. COHEN. Mr. President, I rise in support of the amendment offered by my distinguished colleagues. As the section of this amendment covering the textile issue has already been addressed, I will limit my comments to title 2, the American Footwear Industry Recovery Act of 1985.

I have come before this body many times over the past 2 years with the warning that the American footwear industry is being systematically decimated by a flood of cheap foreign imports. Since 1981, imports of nonrubber footwear have risen from 50 percent of the U.S. market to an astonishing 77 percent. Unemployment in the footwear industry has risen to 21 percent. Over 125 plants across the country shut their doors in the past 1½ years. Some 100,000 Americans have lost their jobs since the late 1960's. In my own State of Maine, over 6,000 workers have lost their jobs since 1981. Sadly, it has become commonplace to read in the Maine newspapers that yet another factory has shut its doors. Just last week, a major manufacturer in Bangor closed a factory, and a major shoe company in Hallowell recently announced that it was laying off 300 workers.

As my colleagues are aware, there exists a mechanism for the objective hearing of an industry's trade grievances and the means to provide assistance to that industry when it can prove that it has been injured by imports. Section 201 of the Trade Act, which is fully consistent with our obligations under GATT, the General Agreement of Tariffs and Trade, was designed by the Congress to address precisely the crisis faced by the American shoe industry. All major trading nations have similar laws because they recognize that situations will arise where the injury and suffering are so severe that a government must act to alleviate the injury and facilitate the process of adjustment to competition.

The domestic shoe industry pursued relief under this law. The International Trade Commission unanimously determined that this industry had been injured by imports and recommended that temporary import quotas be implemented. Only 3 weeks ago, the President told the American shoe industry that despite the recommendation of the trade experts of the ITC, despite the staggering 77 percent import penetration, and despite all of the factual evidence of injury, that he had simply decided to write off this industry and let it die.

I heard the Senator from South Carolina talk about trade adjustment assistance. It will not work for this industry because most of the plants are located in rural areas. Most of the people who are employed are between the ages of 45 and 60. Many of them have less than a high school education. Most of them cannot be retrained and if they could be retrained, there are no other jobs available. Trade adjustment assistance really is not a viable option.

Second, I point out the absolute hypocrisy of this administration in recommending trade adjustment assistance as another form of relief when in fact the administration has called for the termination of this program.

As my colleague, JACK DANFORTH, the distinguished chairman of the Trade Subcommittee has so succinctly stated.

> The President's decision makes a mockery of U.S. trade law. The law is now a dead letter. The President has said that playing by the rules is for suckers. If the shoe industry cannot secure relief under section 201, then no industry—I repeat, no industry can expect help from section 201.

With this decision, the President has confirmed in my mind that his administration has no coherent international trade policy and no idea about how to even use the existing authority.

I have been left with no alternative but to support legislation implementing the temporary quotas that the President refused to provide under the administrative section 201 process. The American Footwear Industry Recovery Act of 1985 embodies the main tenets of the ITC's recommendation to the President. Specifically, the legislation would do the following.

It would provide an 8-year, global, market share quota for nonrubber footwear;

Imports would retain 60 percent of the U.S. Market, leaving only 40 percent for the domestic industry;

To prevent upgrading by importers, and to ensure an adequate supply of low-price footwear, this legislation allows imports of shoes with a customs value of $2.50 and under at the 1984 record-high level of 15.4 percent of the U.S. apparent domestic consumption as reported by the Department of Commerce;

Imported footwear with a customs validation of $2.50 and over will be allocated 44.6 percent of the U.S. market;

To ensure that this legislation is consistent with the GATT, language has been included which refers to the injury finding of the ITC, and authority is granted to the President to grant compensation to any trading partner disadvantaged by these temporary quotas; and

Finally, the Department of Commerce and the Department of the Treasury are authorized to implement a licensing system to fairly allocate the 60-percent import market share among the various footwear importers.

Let me emphasize that this legislative remedy is entirely consistently with U.S. obligations under the GATT. Retaliation by our trading partners is simply not warranted. This relief measure is recognized by our trading partners as a necessary tool when a surge in imports threatens to injure a domestic industry. This is not a protectionist measure, as it merely provides for a period of temporary relief from imports so that this beleaguered industry will have the opportunity to recapitalize and adjust to the current competition in the marketplace.

The American footwear and textile industries deserve our attention and support during this difficult period, and I strongly urge my colleagues to join us in this effort.

Senator BRADLEY, Senator GRAMM, and Senator DANFORTH addressed the Chair.

The PRESIDING OFFICER. The Senator from Texas.

Mr. GRAMM. I thank the Chair.

Mr. President, I rise in opposition to the amendment and in opposition to protectionism.

Protectionism is as old as America. We have had protectionist legislation almost forever. Wherever producer and labor groups were organized or wherever people were producing in one area and selling in another, there has always been political support for protectionism. We adopted a protective tariff under the new Constitution before we adopted the Bill of Rights.

Protectionism has contributed to sectionalism. In fact, the part of the country that the two sponsors of this amendment are from has suffered more from protectionism than any part of the country.

Protectionism was the primary cause of the Civil War and protectionism dominated the American political scene until the end of World War II.

At the end of World War II, we saw a growth of economic enlightenment on the protectionist issue which really culminated under President Kennedy in the GATT negotiations that opened up trade and markets and produced an economic blooming of the Western World. Much of the progress that we have enjoyed, millions of jobs all over the Earth, were created as part of that movement. During the postwar period, until the last couple of years, the promotion of trade and growth in jobs and movement toward free trade, was supported by both political parties. In the last year or so, we have seen a wave of protectionism sweep the country and we have not heard before today, a discussion of this new protectionism.

Mr. President, let me say to my colleagues in the Senate that if you are a

protectionist, you ought to vote for this bill. If you are willing to stand up and say "I want to protect the textile industry and the people who work in that industry and the people who own that industry and I am willing to do it at everybody else's expense, at America's expense, at the world's expense," you ought to vote for this bill. But if you are not a protectionist, there is not a reason to vote for this bill.

If you are a protectionist, vote for it. I would like to go through it as briefly as an ex-schoolteacher can be brief and outline all the new elements of this new protectionism.

What is new here is not that the voice of protectionism is loud in the Senate. It has always been loud. What is new is that it has been wrapped in this cloak of Americanism. It is being wrapped in this cloak of jobs. We hear all over the country, "We are exporting jobs." I shall give some quotes that we read in the newspaper every day: "We export not goods but jobs." "Every billion dollars in deficit in United States trade represents 25,000 jobs the United States has lost."

That statement is made so often that it is verified by repetition. We are told now that we are losing 3,500,000 jobs because of exports. What is remarkable, Mr. President, is that despite all these assertions, nobody has apparently looked at the facts.

What are the facts? In the last 3 years, as the trade deficit has grown from $43 billion to a projected $150 billion, what has happened to jobs in America? If you listen to the protectionists, employment has collapsed; we are exporting jobs; we have lost 3½ million jobs to those countries with bigger surpluses.

The truth is, Mr. President, we have created 8 million jobs in the most spectacular economic recovery in the postwar period.

What about these nations with the big trade surpluses, these places that jobs are going to? In the last 3 years, Europe has gone from a deficit to a surplus; Japan has had a mounting surplus. What has happened there? Europe has not created a job in 10 years. We have created more jobs than Europe and Japan combined, in the last 3 years. We have created more jobs than they have created, combined, for the last 15 years.

While our unemployment rate has declined over the last 3 years, the unemployment rate in Japan has risen by 13 percent and the unemployment rate in Europe has risen by 17 percent.

As I have listened to my colleagues talk about textiles and shoes in speaking of the massive unemployment in the States, my reaction is, obviously, there must be a problem. So I decided, Mr. President, when coming to the floor for this debate, to do something that apparently nobody is doing in this body and around the country. That is, look at the facts.

So I looked up what the top producing States in the country were which are producing textiles and apparel. I looked up the top States in producton of shoes.

Now, Mr. President, if you listen to this debate on the floor—and let me say, the debate is being carried out by people I greatly respect and admire. Here we have a difference of opinion. But let us look at textiles. The five largest textile-producing States in the country are North Carolina, Georgia, New York, South Carolina, and Pennsylvania. In listening to this tale of woe, we would assume that employment is collapsing in these States. It is not so.

In North Carolina, the unemployment rate has declined from 9 percent in 1982 to 5.5 percent in June of this year. Do I not wish Texas had that problem.

In Georgia, the unemployment rate has fallen from 7.8 percent in 1982 down to 7 percent.

In New York, the unemployment rate has declined from 8.6 percent down to 6.6 percent. In South Carolina, the unemployment rate was 10.8 in 1982, 10 percent in 1983, 7.1 percent in 1984, and in June 1985 it is 6.1 percent. In Pennsylvania, the unemployment rate has fallen from 10.9 to 9.1. In fact, of the top five textile-producing States, only one of them has above the national average in unemployment, and that is Pennsylvania. If you look at the average of the top five, in June it was 10 percent below the national average. So our colleagues ask us to impose a quota that will clearly raise the price of textiles on the people of all the States because they have an unemployment problem.

Granted, there is an unemployment problem in textiles. Textiles face tough competition. But I cannot justify imposing quotas when the unemployment rate in the top textile States is below the national average, not above it.

In shoes, the picture is even clearer. Maine is the largest shoe-producing State in the country. Unemployment there was 9 percent in 1983. In June 1985, it was 4.9 percent; in Missouri, from 9.9 percent in 1983 down to 6.6 percent; in Tennessee, 11.5 percent in 1983 down to 8 percent; Massachusetts, 6.9 percent down to 3.9 percent; New York, 8.6 to 6.6. In fact, the unemployment rate in the States that are being decimated by the importation of shoes is 25 percent below the national average today.

Granted, in Maine people are losing jobs in shoes, but they are clearly gaining jobs in other areas.

Now, we hear this cry from textiles for protection. Let me remind my colleagues that we have implemented 300 quotas in textiles since 1981. The average protection level in tariffs for textiles is 22 percent, the average for all manufacturing is less than 5 percent. We are already talking about the most protected industry in America.

Mr. President, let me talk about quotas and tariffs and about the deficit. Again, if you are for protectionism, you ought to vote for this amendment, but if you are concerned about the deficit you ought not. And let me explain why. We have an exchange rate, Mr. President, that is determined on the free market. It is determined by the supply and demand for dollars in terms of every foreign currency. It is a complicated system, but when you get right down to it, it is pretty simple. The value of the dollar relative to every foreign currency is determined by the supply and demand for those currencies. It is a perfect market—$150 billion a day go through this market. The idea that Government could come in and set the value of the dollar is laughable. We are talking about a market with tremendous volume, a tremendous amount of information and homogeneous products. The bottom line is that the value of the dollar on the world market is set with the amount that Americans want to spend or invest or use to pay debt in each foreign country. The number of dollars that Americans want to convert into that currency to spend or to invest or to pay debt is equal to the number of dollars that people in that country want to get by converting their currency into dollars. If Americans decide, for example, to buy more Japanese goods, that represents an increase in the demand for the yen and the value of the yen goes up. And vice versa; if people in Japan want to buy dollars, the value of the dollar goes up.

Now, all over the world today these exchange rates are set on a free market. If we impose this quota, what we are going to do is say, "You can't buy textiles from these countries. We are going to roll back on some countries, we are going to limit the penetration of others." There may be people here who are tempted to say, "Well, I want to vote for that. I am not a protectionist, but I am going to vote for it because I want to do something about this terrible deficit."

But let me explain why it will not happen, why the deficit will not go down. What this is going to mean is a reduction in the number of Americans who are trying to convert dollars into foreign currency because they are not buying the textiles. That means the value of the dollar goes up and not down. That means that every industry which is exporting finds the price of its product goes up. So what happens is we protect some jobs in textiles. But the value of the dollar goes up and we lose jobs in those areas where we are competitive on the world market. In

fact, there will be no reduction in the trade deficit by the implementation of this quota or by any tariff. What will happen is the value of the dollar will rise, the American export industry, where we are competitive, will suffer, the areas where we are not affected in competing will gain, America will become less competitive, and we all lose.

Mr. President, let me say—and I am not going to dwell on the prices—I assume that all of my colleagues have taken a look at studies which have been done by everybody from the Federal Trade Commission to various economic firms around the country. I once was an expert so I never claimed too much from expertise, but whether you are looking at the Federal Trade Commission or the International Business and Economic Research Corporation, the data is uniform in telling us one thing—the cost of protectionism is exceedingly high. The estimates, for example, on jobs saved through voluntary restraint on automobiles is $241,000 per job.

Now, that is assuming no retaliation, and it is assuming no real change in the exchange rate as I outlined before. That is not counting the jobs we lost. That is what we paid to protect the job.

On the tuna tariff, we are talking about roughly the same price, $240,000 per job; in textile quotas of Hong Kong, about $43,000 per job; on steel quotas, we are talking about $114,000.

I could go on and on, but my point is, forgetting retaliation, forgetting the change in the exchange rate, protectionism is a very expensive, very inefficient way to create jobs.

Let me talk about several other issues and then I will let my colleagues have their opportunity, Mr. President. The second point I will go into has to do with debt. We have heard colleagues talk about the big banks and their lending and their interest, but I should like to make a point that seems to be lost in all of this talk about the trade deficit. We have a major piece of legislation introduced in the House and the Senate which would impose a 25-percent tariff against Brazil and South Korea, for example, because their surplus is too big; our deficit with them is too big. Now, Brazil has a $5.6 billion trade surplus with the United States, and South Korea has a $4.1 billion surplus. We have proposals—not this one, but others, but I want to address the general issue here as well as the specific—that would impose a 25-percent tariff against those two countries because their trade surplus is too big. In the aggregate, not just looking at the United States but at every country, Brazil has had over the last 3 years about a $12 billion surplus, and South Korea, though they have a surplus with us, has had a deficit.

But the truth is that Brazil has a $102 billion foreign debt. They have to generate $11 billion of trade surplus to pay interest on that debt, much less pay it off. South Korea has about a $45 billion debt, much of it to the United States, and they have to have about $5 billion to service that debt.

The truth is that the only way nations can service debt, the only way you can make an interest payment, is to have a trade surplus. So if you are going to take a position that every country with a trade surplus is somehow a villain, we are going to force the Third World into bankruptcy, and we are going to produce a financial crisis such as this world has never known.

Finally, Mr. President, let me say that what we are talking about here is a problem that really has one origin. We hear that the dollar is overvalued and that as a result of the dollar being overvalued, we have a trade deficit. That is true in the sense that the dollar is about 40 percent overvalued in terms of the goods and services it will buy relative to the goods and services of foreign currencies. But the question is, why? Why are foreigners willing to pay this premium for a dollar? The reason is that they want to invest in the United States.

We have the highest real interest rates in the world. We have the most rapid, promising economic recovery on Earth. As a result, billions of dollars of foreign capital are flowing into the United States and inflating the value of the dollar.

We cannot deal with that problem by raising tariffs. That will raise the value of the dollar and will not deal with that problem. The way to deal with that problem is to deal with its cause.

Why do we have the highest interest rates on Earth? We have the highest rates because we have a deficit of $200 billion, because the Federal Government is competing against the private sector for available capital; and, as a result, we have interest rates that have inflated the value of the dollar and have generated the trade deficit for us, a surplus for our trading partners.

There are those who say this is a crisis. We have become a debtor nation. I have not heard that today, but I have heard it on the floor as I have presided here, as Members have spoken during general orders. We are becoming a debtor nation—as if this is somehow a crisis, as if somehow there is a stigma involved.

I remind my colleagues that the last time we were a debtor nation between 1867 and 1914, we grew more rapidly than any other nation on Earth has grown in terms of real productive capacity. The last time we were a debtor nation, we had a more rapid, sustained period of economic growth than any other nation before or since has had—20 milion immigrants came to this country in search of opportunity and freedom, and they found both.

The truth is, to summarize—I have spoken longer than I intended to, and I apologize to my colleagues—that trade deficits and trade surpluses, being a debtor nation or a creditor nation, in and of themselves are not good or bad. The important point is, why is it happening? We could become a creditor nation again by just making more bad loans to South America, but our banks have stopped that.

With our high interest rates, we have become a magnet, drawing capital to this country. The only way we can reverse that process and bring the value of the dollar down is by dealing with the deficit, and that is our deficit—the deficit in the Federal budget.

I urge my colleagues to look at this measure very closely. I urge my colleagues to reject this amendment and to get on with the real job of dealing with the deficit that matters, the deficit in the Federal budget.

I am concerned, Mr. President, that if we go down this road toward protectionism, if we respond to the special interests and not the public interest, we are going to repeat a sad experience that this country has seen before.

I think it is especially true when you look at what this amendment does and to whom it does it. We do not roll back Communist China. They retaliated against us the last time we imposed a quota. But we zapped Taiwan. Where is the logic in that? Do we protect a new-found friend and zap an old friend?

We roll back Korea—the bastion of our defense in Northeast Asia—in terms of their ability to sell. We decimate their No. 1 industry. Here in a nation that is the real success story in America. We rebuilt Europe and Japan with the Marshall plan, but they have already been rebuilt. Korea is the American miracle of the postwar period. They are spending a larger percentage on defense than we are. But in this measure, we are going to decimate their economy—all in the name of protecting jobs, when we are not protecting jobs at all.

Finally, Hong Kong: I wish I had a dollar for everybody I have heard say, "We want free trade, but we want fair trade." Tell me how it is fair to impose a quota against the only place on Earth that has no quotas. How can it possibly be fair to impose a quota against the one place on Earth that does trade fairly?

I argue that it is not fair, that it is not in the interest of world development, and it is not in the interest of America to do that to the only place that is doing what we claim we want everybody else to do.

So, I think that with respect to this amendment, while the objective in

moving from the initial bill was to make it more politically palatable, the truth is that it shows the dirty underwear of the whole process. We protect Communist China and we zap Taiwan. We hit Korea and we impose very heavy limitations on the ability of the only place on Earth that is a free-trader to sell to America. It makes absolutely no sense.

So we are going to debate this today. There is going to be a motion to table. My guess is that it will fail. My guess is that the forces of protectionism are still strong on this floor. But I am convinced that the tide is turning in this country, that we are not going to go back on the policy of John Kennedy, the policy that brought us to world development.

I am convinced that every day we delay the passage of a protectionist bill is a day that the American people get the facts; and when they get the facts, they are going to reject protectionism.

Finally—and I am closing with this statement—there are those who say that I should be for this bill because Texas is a textile State, and it is in the top 10 in textiles. But something cannot be good for Texas if it is bad for America, and this bill is bad for America. It is the wrong thing to do.

I urge my colleagues who might have cosponsored this bill out of friendship to somebody else, or because they thought it was a good thing to say you are for fair trade, to look at this bill and measure what it really does.

I wonder how may people voted for the Smoot-Hawley tariff, thinking that it would never become law, that the other body would never adopt it, that it would never come up for final passage.

We do not know what is going to happen here. We may be shooting with real bullets. I urge Senators to look at the facts, because I believe that in looking at the facts, they will be convinced that this is a bad bill and a bill that is not good for America.

Several SENATORS addressed the Chair.

The PRESIDING OFFICER (Mr. MCCONNELL). The Senator from Missouri.

Mr. DANFORTH. Mr. President, the pending amendment is based on S. 680, the textile-apparel quota bill. It is terrible legislation. It would cost American consumers nearly $14 billion per year. It would increase employment in the domestic textile and apparel industries by no more than 4 percent at a cost of almost $140,000 per job. It would risk retaliation against $33 billion of U.S. exports, including soybeans, corn, wheat, aircraft, and chemicals. It would strengthen the value of the dollar, further punishing other import sensitive industries. It would save some textile and apparel jobs and it would cost the jobs of countless other Americans.

The amendment, which as I say is based on S. 680, violates the General Agreement on Tariffs and Trade. It violates the Multifiber Arrangement. It violates 32 bilateral agreements with other countries covering textile and apparel. Advocates of the bill say that loopholes in the Multifiber Arrangement have created unanticipated imports. Yet most of the loopholes complained about were expressly insisted upon by the textile and apparel industries when bilateral agreements with Hong Kong, Korea, and Taiwan under the Multifiber Arrangement were negotiated in 1982.

The bill excludes from its coverage textile and apparel producers in Europe and Canada, despite the fact that the European Economic Community is the second largest supplier of textile and apparel to the United States. Imports of textile and apparel from the European Economic Community increased 80 percent in 1984 and have already increased 22 percent through August 1985. Yet the EEC is not covered by this legislation. By contrast, other countries are clobbered by S. 680. Bangladesh would be cutback 66 percent; Turkey, 30 percent; Korea and Taiwan, over 17 percent. This exclusion of the European Community, coupled with draconian cutbacks on imports from the Orient, have caused this amendment to be labeled "racist" legislation.

During the past few weeks, I have discussed this amendment with a number of my colleagues in the Senate. Many Senators have said they will vote for the bill. Few have expressed any enthusiasm for it. Most Senators who told me they would support this legislation went on to express their chagrin about their positions. They told me that they really did not like the bill. They stated their understanding of its effect on the trading system. They recognized that this is special interest legislation in the extreme, that it would save some people's jobs at the expense of the jobs of others and at the expense of the cost of living of everyone. Yet, this amendment will probably be agreed to by the Senate, will be passed by the Congress of the United States, and the reason for this state of affairs is the total exasperation of Members of Congress, Republicans and Democrats, with the trade policies of the administration.

The President has brought this situation upon himself. This textile and apparel bill stands a good chance of enactment because many Members of Congress feel that cooperation with the administration is impossible. They feel, and for good reason, the trade remedies provided for by our international agreements are not available to the American people. Therefore, when the trading system has broken down, when standard remedies are no longer available, quota legislation appears irresistibly tempting.

The specific incident that brought this state of affairs to existence was the President's determination to ignore the recommendation of the International Trade Commission and to refuse import relief to our beleaguered shoe industry.

The shoe industry had played by the rules. It brought its case before the International Trade Commission. It presented its evidence and it convinced a unanimous International Trade Commission to find injury and a strong majority of the Commission to recommend relief.

The procedure followed by the shoe industry is set out in section 201 of the Trade Act of 1974. Under the law, industries in this country that have been affected by imports are not entitled to automatic relief. Nor is it a basis of relief that they flex political muscle in Congress. Rather, under the legal system they must bring their cases before the ITC, meet the criteria of the statute, and prove injury. The shoe industry made its case and proved its case. It showed import penetration of 78 percent. Then, when it came time for the President to act, he did nothing. The elaborate procedure provided in the law was all for naught. Section 201 was a dead-end street. The shoe industry expended years of its time and countless dollars on a path that led to nowhere. They came out of the entire laborious process with absolutely nothing to show for it. It was a total waste of time.

The shoe decision by the President was also a clear sign that, during this administration, section 201 of the Trade Act will no longer be available to any industry. I would submit to the Senate that if 78 percent import penetration does not warrant relief, then no case will ever warrant relief in this administration. In effect, section 201 has been repealed, de facto, by the President. He has blue penciled the provision out of the statute.

Relief under section 201 has been branded by the President as "protectionist." The President has made the decision that the United States unilaterally will not avail itself of rights provided for under article XIX of the General Agreement of Tariff and Trade. Safeguard relief for injured industries is available to all other members of GATT. It is available to the Europeans, but it is not available to Americans. It is available to Canadians, but it is not available to Americans. It is available to Japanese and Koreans, and people in Taiwan, but it is not available to Americans.

So, when section 201 is not available, Members of Congress do what they would rather not be doing. They pass quota legislation.

Mr. President, the details of American trade policy should not be administered on the floor of the U.S. Senate. Yet, that is exactly what we are doing in this bill. We are determining in this legislation that imported sweaters from Guam should not exceed 160,000 dozen. Who in the Senate of the United States can tell us that the precise figure for imported sweaters from Guam should be 160,000 dozen. The fact of the matter is that no one in the Senate can come up with that figure. The figure was produced by industry lobbyists. They dictated those numbers to their dutiful scribes in Congress. Congress has gotten into the act of micromanaging trade policy because the basic provisions of the trade laws were rendered unavailable by the President's decision on shoes.

Mr. President, I have wrestled long and hard on whether to support this legislation. I have spent a great part of my last 5 years working on the problems of the shoe industry, which is so important to my State. I have also done my share of work on behalf of the textile people. I have been sorely tempted to support this legislation simply to do my part for these beleaguered industries. I share completely the utterances of exasperation with an administration that will not make international agreements operate to the benefit of our people. It is very tempting to vote for this amendment in order to send the President a message. In fact, many of my colleagues have given that reason for their support for the textile bill.

But, Mr. President, in good conscience, I cannot support this legislation. It is just too damaging to too many people. It is bad trade policy. It would send shock waves throughout the world trading system. It would hurt many, many more Americans than it would help.

What, then, do I suggest should be done? I would suggest to the President that he undertake a renegotiation of the Multifiber Arrangement, using as negotiating objectives the concerns addressed in S. 680. I would make that suggestion had I not long since given up on the administration's willingness to provide any relief for import affected industries. Therefore, I have a different suggestion. It is a suggestion which does not depend on sending the President a message. It is a suggestion that does not require the President to have a change of heart and it is a suggestion that does not put Congress in the business of writing detailed product specific quota legislation. It is, instead, a suggestion to revitalize the relief available under section 201 so that safeguard remedies from imports can be returned to the forum of the International Trade Commission without fear that the President can totally undo the ITC's recommendations.

Mr. President, I am reasonably sure that this amendment is not going to be tabled. I am going to vote to table the amendment because I believe that it is bad trade legislation, and at the appropriate time, it would be my intention to offer a substitute for the pending amendment.

The substitute would require the International Trade Commission to institute a section 201 case on textile and apparel imports and would require the President to put in place remedies that are substantially equivalent to those recommendations by the ITC.

This substitute amendment would also cover the shoe case by requiring the President to institute remedies for the shoe industry substantially equivalent to those recommended by the ITC in June. The President would retain discretion to fashion the exact nature of the remedy but he would no longer have the discretion to provide no relief at all.

Mr. President, it is my position that this matter should be taken out of the congressional forum. I believe that if we were to pass this quota legislation a whole parade of industries would be following the textile industry—not only shoes, but steel, lumber, and a host of others.

I think we should take this out of the hands of Congress and put it into the hands of the ITC. However, under the present set of circumstances, where the administration has made it clear that section 210 is a dead-end street, I think that it is necessary that, at the same time, we remove some of the discretion from the hands of the President so that the recommendations of the ITC will mean something.

That is the suggestion that I will make. That is the substitute amendment that I intend to offer at the appropriate time.

Mr. KASTEN. Mr. President, I rise today as a cosponsor of Senator THURMOND's amendment regarding imports of footwear and textiles.

Mr. President, American jobs are the issue here. Thousands of jobs have already been lost because we have allowed the flow of cheap imported goods to go unchecked.

Jobs are being lost because we have refused to get tough with our trading partners. Free trade is still our goal—but free trade cannot be a oneway street.

Consider the fact that Spain will not accept imported shoes from Italy. Italy won't accept imported shoes from Brazil. And Brazil won't allow shoe imports from Spain. None of theses countries will accept imported shoes from the United States. But all of these nations can easily dump their shoes on the American market, and they do.

Brazil isn't losing jobs because of foreign imports. Neither are Spain or Italy. But with the imbalance of trade which we have allowed, American factories have continued to close. Thousands of jobs have been lost.

Mr. President, it's time for the U.S. Government to get tough on trade. When the import penetration growth of textiles grows an average of 65 percent 2 years in a row to account for over 50 percent of the American market, and when the import penetration of shoes goes from 41 percent in 1975 to 80 percent—and rising—in 1985, it is obvious that we need to rethink our trade policies.

More than 18,000 workers are employed by the textile and footwear industries in Wisconsin alone. Eighteen thousand Wisconsinites and their families rely on these industries for their livelihoods. Nationally, hundreds of thousands are still employed in these industries. We cannot afford to pull the rug on these people. Congress needs to act immediately.

There are two things we in Congress have the responsibility to do.

First, we must enact preventative measures to guarantee that we do not lose any more industries or jobs. To do this, we must pass Senator THURMOND's amendment which will place new restrictions on the imports from our partners in unfair trade.

Second, we must work together for a new trade policy which will take us into the 21st century. This policy should incorporate the idealism of free trade with the realism of trade imbalance.

We should never lower our sights from someday having truly free trade. However, to accomplish this goal, our trading partners need to be educated on the virtues of free trade.

Our trading partners need to understand that we will not allow our Nation to be the dumping ground for the world's cheap imports. Once they realize the effects that trade restrictions can have on their own economies, they just may see how important free trade is to the global economy.

Only then will American workers be truly free to compete.

Mr. President, again, I am very pleased to join Senator THURMOND in cosponsoring this very important and necessary amendment that is so vital to the future of the American worker.

Mr. MATTINGLY. Mr. President, I rise as an original cosponsor of amendment No. 720 to Senate Joint Resolution 77. My esteemed colleague, the senior Senator from South Carolina, has given a thorough and excellent summary of his amendment so there is no need for me to discuss the details of the provision. However, I would like to add to my colleague's remarks my thoughts on the broader issue at hand.

If we take this amendment literally, it addresses the impact of trade inequities on two very important U.S. industries. However, I urge my colleagues to

think in broader terms. The issue here is not just textiles and footwear, but what course of action and policy direction we, as a country, need to take to correct blatant trade inequities. These trade inequities are affecting virtually every economic sector of our country. We have tried closing legal loopholes that have allowed imports to flood our markets unfairly. We have attempted to eliminate foreign trading practices that unfairly close our exports out of overseas markets. We have attempted to impose the use of existing trade laws to keep out unfairly subsidized or other illegal imports. We have tried to negotiate with our trading partners in an effort to promote open and fair trading practices and policies. We have been unsuccessful.

It is critical that Congress send a clear and forceful signal of our unity and determination that we will not allow the illegal or discriminatory policies of our trading partners to persist; we will insist on reciprocity, one way or another. We must have a rejuvenation of an open and fair world trade order.

TEXTILES AND AGRICULTURAL TRADE

Mr. BOREN. Mr. President, though I am most sympathetic to the problems confronting the textile industry, I cannot support the amendment offered by my distinguished colleague, Senator THURMOND. The impact this would have on our agricultural exports to many Asian countries would be devastating.

I am well aware that over 300,000 textile/apparel/fiber jobs have been lost in this country over the past 5 years. I, too, am concerned about the impact on the industrial productivity of this Nation that the 100-percent increase in textile/apparel imports since 1980 will have.

I am very strongly committed to retaining the industrial base in our Nation. And, I am quite willing to support legislation which will preserve this base. However, I am not willing to do so at the expense of the agricultural sector of our country.

Unlike the agricultural economy, the textile/apparel industry is among the most heavily protected industries in the United States. The average tariff rate for textile/apparel is 18.2 percent, compared with 4.3 percent for the all-industrial average (excluding petroleum). An estimated $4.1 billion will be collected in 1985 from textile/apparel tariffs.

The textile/apparel industry has experienced profits slightly higher than the all-manufacturing average. This, too, is just the opposite of what has been happening in the agricultural sector.

I do not, in any way, want to imply that I believe the textile industry does not need any assistance. In fact, I, too, fear that without some form of assistance the textile industry could be severely devastated in the next 5 years. There is, additionally, a distinct possibility that there will not be a domestic textile industry in the future in our country. I am well aware that something must be done. However, I do not believe this method is the proper one. I cannot, in good conscience, support a measure that will prop up the textile industry while devastating agricultural exports.

Over the past 5 years, agricultural exports have declined dramatically. In 1980, agricultural exports were valued at $43.78 billion. This year, agricultural exports will decline to $32 billion, representing a drop of $11.78 billion. Because of the decline in agricultural exports, 353,400 jobs have been lost during the past 5 years. Any further reduction in agricultural exports will put more people on the unemployment roles.

The amendment now pending will result in retaliation by some of our most important agricultural customers. The Chinese have made it perfectly clear that if this amendment is enacted, they will stop buying U.S. agricultural products. In 1982, unilateral restrictions of Chinese textile apparel imports resulted in a boycott of U.S. wheat, soybeans, cotton—raw product, and chemical fibers. This boycott presented a loss of nearly $700 million to U.S. wheat producers alone. A total agricultural boycott from China, at 1983–84 levels, would be a loss of over half a billion dollars.

The fiscal year 1985 estimate of agricultural exports to China is $5.8 billion, representing approximately 174,000 jobs. The fiscal year 1985 estimate for East Asia—which includes Korea, Hong Kong and Taiwan—is $3.2 billion, representing approximately 96,000 jobs. Just these two regions alone would mean the loss of 270,000 jobs, almost as much as the textile industry has lost over the past 5 years.

My colleagues have stated that this amendment is important for the 300,000 textile workers. It is also important for the 270,000 persons employed due to agricultural exports to the countries most affected by this amendment. Regretfully, to save 300,000 textile workers we are being asked to sacrifice 270,000 jobs relative to agricultural exports.

Mr. President, I wish my colleagues would go back to the drawing table and design a proposal to aid the textile industry which would not sacrifice American agricultural exports. The loss of agricultural exports does not just affect 270,000 people. It will directly affect the 2.4 million farm families dependent upon agriculture for a living by reducing their income, by reducing the price they receive for their products.

I urge the Senator from South Carolina to modify his proposal in a way that will not only benefit the textile industry but will not impair the future of our agricultural export market. I would be quite willing to work with the proponents of this amendment to devise a program which would provide aid to the textile industry. I believe we are acting too hastily if we adopt this amendment. There are certainly ways to help the textile industry without jeopardizing agricultural exports. I would be glad to support legislation which would do this.

Mr. CHAFEE. Mr. President, I cannot support this amendment because of the restrictions it proposes on footwear imports. Before this footwear proposal was included, I had every intention of supporting this measure.

The textile and apparel industries are very important to this Nation. This industry employs 2 million people nationwide. That's more than employment in automobiles and steel combined. Textile employment comprises a substantial percentage of workers in my State of Rhode Island.

Jobs are being lost and factories are being closed. Although much of this can be blamed on the dollar, which can be linked to our budget deficits, clearly the multifiber arrangement, the worldwide framework for controlling textile trade, is not working as expected.

This point has been made repeatedly in hearings in the Finance Committee. Bilateral commitments made under the MFA are simply not being adequately enforced by this administration. In the upcoming renegotiation of this multilateral agreement the administration must be tough and must make it clear that we will no longer accept noncompliance with these bilateral arrangements.

Mr. President, I do not support legislated quotas and prefer to observe our trading obligations. The original version of S. 680 was designed to help just the textile industry by enforcing the agreements under the MFA. S. 680 was intended to deal with loopholes in our international textile agreements which have allowed exporting countries to boost their shipments of goods beyond expected levels, costing jobs throughout our Nation, including, in Rhode Island.

However I cannot support this amendment, because it now contains a proposal for extensive quotas for the footwear industry. President Reagan rejected footwear protection on August 28 of this year. The President was absolutely right in deciding what was right for the national economy and for the consumer. These quotas would cost consumers $2.3 billion in added shoe prices, would hit low-income consumers the hardest, and would cost up to $70,000 per year for each job saved.

Such action does not make sense. The real losers would be American

consumers, including Rhode Islanders who are struggling to make ends meet.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from New Jersey.

Mr. BRADLEY. Mr. President, I call for regular order and send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The regular order is the excepted committee amendment.

The clerk will report the amendment.

Mr. McCLURE. Parliamentary inquiry, Mr. President.

The PRESIDING OFFICER. The clerk will report the amendment.

Mr. McCLURE. Mr. President, parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. McCLURE. The committee amendments were adopted en bloc, am I not correct?

The PRESIDING OFFICER. One committee amendment was excluded from the en bloc agreement.

Mr. McCLURE. The amendment of the Committee on Finance was set aside by unanimous consent so that the amendment of the Senator from South Carolina could be entertained, am I not correct?

The PRESIDING OFFICER. The Senator is correct.

Mr. McCLURE. And the pending business is the amendment offered by the Senator from South Carolina?

The PRESIDING OFFICER. The pending business was the amendment of the Senator from South Carolina. Under the Senate's precedents, a call for the regular order returns the Senate to the amendment that was set aside by unanimous consent.

Mr. McCLURE. Mr. President, may I be heard on the question of the ruling of the Chair?

Mr. President, that is certainly true if indeed the pending amendment was not set aside by unanimous consent, but the action taken by the Senate in granting unanimous consent to set it aside requires unanimous consent to bring it back. When the pending amendment is disposed of, the regular order calls back the amendment which was set aside.

The PRESIDING OFFICER. The day of the precedent is May 22, 1985. When one amendment is set aside by unanimous consent to consider another amendment, a call for a regular order brings back the original amendment.

Mr. McCLURE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. McCLURE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BRADLEY addressed the Chair.

The PRESIDING OFFICER. The Senator from New Jersey.

AMENDMENT NO. 723 TO COMMITTEE AMENDMENT ON PAGE 92

(Purpose: To provide a substitute)

Mr. BRADLEY. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from New Jersey [Mr. BRADLEY] proposes an amendment numbered 723 to committee amendment on page 92.

Mr. BRADLEY. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

In lieu of the matter proposed to be inserted, insert the following: Strike all after section 7, page 92, line one, and insert in lieu of the following:

SEC. . TEXTILE AND APPAREL TRADE ENFORCEMENT.

(a) The Congress finds that—

(1) the United States and most major textile producing countries are parties to the Multi-Fiber Arrangement, the purpose of which is to ensure the orderly growth of imports of textiles and textile products and to avoid disruption of the markets for textiles and textile products in importing nations;

(2) The Multi-Fiber Arrangement, which first entered into force on January 1, 1974, and which was most recently extended in December 1981 through July 1986, contemplates a 6-percent annual rate of growth for imports for most exporting countries and providers for a lower rate of growth for imports from major exporting countries:

(3) Since 1980, the objective of orderly growth of imports of textiles and textile products provided for in the Multi-Fiber Arrangement has not been achieved; from 1981 through 1984, imports of textiles and textile products into the United States have grown at an annual rate of 19 percent, far in excess of the 1 percent growth rate of the United States market for textile and textile products during the same period and far in excess of the annual rate of import growth of less than 2 percent that prevailed during the period 1974 through 1980;

(4) the disruptive surge in imports of textiles and textile products which occurred from 1981 through 1984 resulted from the failure of the United States to enforce adequately its rights under the Multi-Fiber Arrangement and to extend coverage of the Multi-Fiber Arrangement to imports made of competing fibers;

(5) import growth of apparel products has substantially outstripped the growth of the domestic market so that import penetration of the domestic market has more than doubled in the last 6 years, reaching a level of 50 percent in 1984;

(6) based on a nationwide audit of major retail outlets, the import penetration of such major items of apparel as trousers, blouses, shirts, suits, skirts, and sweaters exceeds 50 percent of domestic consumption;

(7) since the most recent extension of the Multi-Fiber Arrangement, certain exporting countries have sharply increased their exports of textiles and textile products made in whole or in part from fibers not subject to the Multi-Fiber Arrangement with the effect of circumventing restraints agreed to under the Arrangement; the increased imports of these textiles and textile products have caused disruption of the United States market for textiles and textile products and have seriously undercut the effectiveness of the Multi-Fiber Arrangement;

(8) imports of textiles and textile products into the United States are predominantly the product of major exporting countries, with 5 large exporting countries now accounting for more than 50 percent of all imports of textiles and textile products;

(9) the domination of import trade by producers in the major exporting countries has limited participation in the United States market by other exporting countries, many of which share important trade and other national interests, and encourage mutually beneficial trade and investment, with the United States;

(10) a change in United States textile trade policy to afford the smaller exporting countries and countries in the caribbean region a relatively greater share of imports of textiles and textile products would promote the national economic interests of the United States;

(11) the textile and apparel trade deficit of the United States was more than $16,200,000,000 in 1984, an increase of 53 percent over 1983, and accounted for 13 percent of the Nation's overall merchandise trade deficit;

(12) the current level of imports of textiles and textile products, 9,800,000,000 square yard equivalents in 1984, represents over 1,000,000 job opportunities lost to United States workers;

(13) imported textiles and textile products now account for 38 percent (the equivalent of 3.2 million bales of cotton) of the annual cotton consumption in the United States, only one of five of the bale equivalents included in imported textiles and textile products is grown in the United States;

(14) the massive increase in cotton textile and apparel imports has resulted in a declining market share for, and a $1,000,000,000 loss to, domestic cotton producers in 1983 alone which was only partially offset by Federal cotton program benefits.

(15) United States cotton producers, who are spending about $20,000,000 annually in research and promotion efforts, have built markets not for themselves but for foreign growers;

(16) imports of wool products have doubled since 1980, creating major disruptions among domestic wool products producers and seriously depressing the price of United States produced raw wool;

(17) the Multi-Fiber Arrangement recognizes that imports of certain products, such as wool products, in certain countries, including the United States, pose particular problems for certain industries, such as, the wool products industries, in those countries and import growth rates of 1 percent or less have been permitted in such cases;

(18) as a result of this increased penetration and the very limited growth of the domestic market, the United States companies producing textiles and textile products identical, or similar, to those imported have been seriously damaged, many of them have

been forced out of business, many have closed plants or curtailed operations, workers in such companies have lost employment and have been otherwise materially and adversely affected, and serious hardship has been inflicted on hundreds of impacted communities causing a substantial reduction in economic activity and lost revenues to local governments;

(19) the increase in imports and increased import penetration of the United States domestic market have occurred notwithstanding the fact that, through extensive modernization programs and investment in more modern equipment, productivity (as measured by output per man-hour) in the textile mill products sector has increased in the last 10 years at the average annual rate of 4.2 percent and in the apparel sector at the average annual rate of 3.4 percent, as compared with the lower productivity growth of all manufacturing in the same period of 1.9 percent;

(20) the factors described in the preceding paragraphs are causing serious damage, or the actual threat thereof, to domestic producers of textiles and textile products; as a result, market disruption exists in the United States requiring the new measures established under this Act;

(21) bsaed on experience during the past 10 years and on other factors, the growth of the United States market for textile and textile products is unlikely to exceed an average annual rate of 1 percent during the next several years;

(22) if the rate of growth of imports of textiles and textile products into the United States that occurred since 1980 continues, plant closings will continue to accelerate, leaving the United States market with reduced domestic competition for imported products;

(23) in order to avoid further market disruption and deterioration of the situation confronting the United States industry producing textiles and textile products, which is already seriously damaged, it is essential—

(A) to require the establishment of import levels for textiles and textile products supplied by major exporting countries that reflect the lesser of—

(i) the import level that would have occurred had imports from these countries grown since 1980 by the 6 percent annual growth rate contemplated by the Multi-Fiber Arrangement, or

(ii) the actual import level resulting from restraints under a bilateral agreement with the United States providing for an annual import growth rate of less than 6 percent.

(B) to require the establishment of import levels for textiles and textile products supplied by smaller exporting countries that provide a significant increase in their market shares to meet their development needs and to permit future growth in such shares consistent with the Multi-Fiber Arrangement, and

(C) to limit the future growth rate of imports of textiles and textile products into the United States to levels which reflect orderly growth as provided for in the Multi-Fiber Arrangement and the most recent Protocol extending the Multi-Fiber Arrangement;

(24) the establishment of import levels, and limitation of future import growth to levels, that reflect effective enforcement of the Multi-Fiber Arrangement and that also reflect the expected growth rate of the United States market for textiles and textile products will fulfill announced policy objectives of the United States regarding trade in textiles and apparel;

(25) as the Department of Defense has long recognized, a strong, viable, and efficient domestic textiles and textile products industry is essential in order to avoid impairment of the national security of the United States;

(26) the developments that have led to the sharp increase in imports of textiles and textile products since 1980 may not have been foreseeable; nevertheless, the rights of the United States under international agreements should have been invoked in order to prevent increased quantities of textiles and textile products from being imported under such conditions as to cause or threaten serious damage to domestic producers of textiles and textile products in the United States; and

(27) the sharp increase in imports of textiles and textile products since 1980, and the effect of this increase on the United States textile and apparel industry and its workers, constitutes exceptional circumstances within the meaning of the Multi-Fiber Arrangement and its Protocol.

(b) The purpose of this section is—

(1) to prevent further—

(A) disruption of the United States textiles and textile products markets,

(B) damage to United States textile and apparel manufacturers, and

(C) loss of jobs by United States workers,

by providing for orderly and nondisruptive growth of imports of textile and textile products;

(2) to provide temporary relief in order to provide an opportunity for adjustment to import competition; and

(3) to implement the objectives of the Multi-Fiber Arrangement by requiring the effective enforcement of import levels of textiles and textile products contemplated by the Multi-Fiber Arrangement.

(c) For purposes of this section—

(1) The term "textiles and textile products" includes, but is not limited to—

(A) all man-made fibers, and

(B) all—

(i) tops,

(ii) yarns,

(iii) piece goods,

(iv) made-up articles,

(v) garments, and

(vi) other textile manufactured products which derive their chief characteristics from their textile components,

made in whole or in part from any natural or man-made fiber, or blend thereof,

that are classified under schedule 3, part 6 of schedule 6, part 1, 4, 5, 7, or 13 of schedule 7, or part 1 of schedule B of the Tariff Schedules of the United States or part 1 of the Appendix to such Schedules.

(2)(A) The term "category" means, with respect to any textile or textile product, the category into which such textile or textile product is classified under subparagraph (B).

(B) The Secretary of the Treasury shall classify all textiles and textile products according to a system which uses the following categories:

(i) each of the categories of textiles and textile products identified by a 3-digit textile category number in the Department of Commerce publication of January 1985 entitled "Correlation: Textile and Apparel Categories with Tariff Schedules of the United States Annotated";

(ii) a separate category for man-made fiber articles classified under subpart E of part 1 of schedule 3 of the Tariff Schedules of the United States; and

(iii) a separate category for each of the following articles which, because of fiber content, are not subject to the Multi-Fiber Arrangement:

(I) yarn,

(II) fabric,

(III) apparel, and

(IV) other textile products.

(3) The term "foreign country" includes any foreign territory or insular possession of the United States.

(4) The term "entered" means entered, or withdrawn from warehouse, for consumption in the customs territory of the United States.

(5) The term "Mutli-Fiber Arrangement" means the Arrangement Regarding International Trade in Textiles, as extended by the Protocol done at Geneva on December 22, 1981.

(6) The term "Commission" means the United States International Trade Commission.

(d)(1) The Commission shall conduct an investigation for the purpose of—

(A) determining—

(i) the extent to which the domestic textile industry has been seriously injured, and is threatened with serious injury by reason of imports of textiles, and

(ii) the extent to which domestic apparel industry has been seriously injured, and is threatened with serious injury, by reason of imports of apparel, and

(B) recommending—

(i) the amount of any increase in, or imposition of, a duty or other import restriction on textiles which is necessary to prevent or remedy such injury to the domestic textile industry, and

(ii) the amount of any increase in, or imposition of, a duty or other import restriction on apparel which is necessary to prevent or remedy such injury to the domestic apparel industry.

(2) By no later than the date that is 90 days after the date of enactment of this Act, the Commission shall—

(A) submit to the President a report on the determinations and recommendations made by the Commission under paragraph (1), and

(B) publish a summary of such report in the Federal Register.

(3)(A) By no later than the date that is 15 days after the date on which the report is submitted to the President under paragraph (2), the President shall issue a proclamation implementing the recommendations of the Commission set forth in such report.

(B) Any increase in, or imposition of, any duty or other import restriction which is proclaimed under subparagraph (A) shall apply with respect to articles entered after July 31, 1985, and before August 1, 1986.

(e)(1) Except as otherwise provided in this Act and notwithstanding any other provision of law, the aggregate quantity of textiles and textile products of any foreign country classified under the same category that may be entered during the 1-year period beginning on August 1, 1986, shall not exceed the sum of—

(A) the aggregate quantity of textiles and textile products of such country classified under such category that was entered during the 1-year period beginning on August 1, 1985, plus

(B)(6) percent of the aggregate quantity described in subparagraph (A).

(2) Except as otherwise provided in this Act and notwithstanding any other provision of law, the aggregate quantity of textiles and textile products of any foreign

country classified under the same category that may be entered during the 1-year period beginning on August 1, 1987, and during any succeeding 1-year period, shall not exceed the sum of—

(A) the aggregate quantity of textiles and textile products of such country classified under such category that could have been entered under this subsection (determined without regard to paragraph (3)) during the year preceding such 1-year period, plus

(B) 6 percent of the aggregate quantity described in subparagraph (A).

(3) If the aggregate quantity of textiles and textile products of a foreign country classified under the same category that enter after August 1, 1985, and before the date on which a proclamation is issued under subsection (d)(3) exceeds any limitation imposed by such proclamation on the quantity of textiles and textile products of such country classified under such category that may be entered during the 1-year period beginning on August 1, 1985, the limitation imposed under paragraph (1) on the quantity of textiles and textile products of such country classified under such category that may otherwise be entered during the 1-year period beginning on August 1, 1986, shall be reduced by the amount of such excess.

(f) For purposes of applying section 123 of the Trade Act of 1974 (19 U.S.C. 2133), the issuance of a proclamation under subsection (d)(3), and the imposition of a quantitative limitation under subsection (e), shall be treated as action taken under section 203 of the Trade Act of 1974 (19 U.S.C. 2253).

(g)(1) The Secretary of the Treasury shall take such actions and issue such regulations as may be necessary or appropriate to enforce the provisions of this section, including, without limitation, the issuance of orders to Customs officers to bar entry to any article if the entry of such article would cause any quantitative limitations imposed under this section to be exceeded.

(2) In order to ensure the equitable and efficient administration of subsection (e), the Secretary of Commerce shall establish and administer an import licensing system under which an importer of any textiles and textile products from any foreign country will be required, during the 10-year period beginning on August 1, 1986, to present an import license as a condition of entry for such textiles or textile products. The Secretary of Commerce shall charge a fee for such import licenses in such amount as may be necessary to cover the cost of administrating such system.

(3) During the 1-year period beginning on August 1, 1986, and during each succeeding 1-year period, the Secretary of Commerce shall, at least once during every quarter within each of such 1-year periods, provide written notice to each foreign country which states the aggregate quantity of each category of textiles and textile products of such country that may be entered during the remaining portion of such 1-year period.

(h)(1) By no later than October 15 of 1987, and of each calendar year thereafter, the President shall submit to the Congress an annual report on the administration of this section during the preceding year. Such report shall include detailed information about the implementation and operation of the quantitative limitations imposed by this section. All departments and agencies shall cooperate in the preparation of such report.

(2)(A) The Comptroller General of the United States shall submit an annual report to the Congress on—

(i) the allocation of United States Customs Service personnel in the import specialist and inspector functions necessary to fully enforce this section, and

(ii) the impact of computerization on trade law enforcement.

(B) The Secretary of the Treasury shall cooperate with the Comptroller General of the United States in the preparation of the report required under subparagraph (A).

(3)(A) The Secretary of the Treasury shall conduct a study of the categories of textiles and textile products to determine whether the quantitative limitations imposed by this section could be specified in terms of the weight of such textiles or textile products in order to simplify administration of such limitations through use of shipping weight. In conducting such study, the Secretary of the Treasury shall consult with recognized unions and groups representing workers in the textiles and textile products industry.

(B) The Secretary of the Treasury shall submit to the Congress a report on the study conducted under subparagraph (A) by no later than the date that is 6 months after the date of enactment of this Act.

(i)(1) Except as provided in paragraph (2), the provisions of subsection (e) shall apply to textiles and textile products entered—

(A) after July 31, 1986, and

(B) before August 1, 1996.

(2) Notwithstanding any other provision of this section, the provisions of this section shall cease to apply on the day on which the President submits to the Congress a written statement certifying that Taiwan, the Republic of Korea, Hong Kong, the Peoples' Republic of China, Japan, Pakistan, Mexico, India, Indonesia, the Philippines, Thailand, Brazil, Singapore, the European Communities, and Canada have, after the date of enactment of this Act, each entered into a new textiles and textile products agreement with the United States that contains provisions which are consistent with the purposes of this Act.

Mr. BRADLEY. Mr. President, the Textile and Apparel Trade Enforcement Act has serious problems as a piece of trade legislation. It would force us to renege on commitments in several dozen trade treaties, it is discriminatory in its treatment of different textile and apparel producing countries, it rules out U.S. participation in future textile and apparel trade negotiations, and it abandons our philosophy of providing temporary import relief for the purpose of adjustment rather than permanent protection. Nevertheless, the two main premises behind the bill are just and demand our attention. The first premise is that we have let imports demolish the apparel and textile industry despite standards for protection under our own laws that should have been adequate for orderly import growth. Between 1980 and 1985, under the Multifiber Arrangement, total textile and apparel imports should have grown 13 percent per year; but in reality, they grew 20 percent per year. The second premise is that we have given workers in this industry no reason to hope the next 4 years will be any better than the last. A combination of import fraud, slack enforcement, and incomplete treaty coverage has allowed import growth as high as 31 percent in the past year. We must make significant changes in our textile and apparel trade policy if we are to provide even minimal security to those who are truly dependent on the industry. For example, the ILGWU supports 120,000 retirees on pension. What is their future if we let the industry go suddenly bankrupt?

The challenge before us is to meet the legitimate and pressing needs of nearly 2 million hard-working people in the textile and apparel industry and their dependents without causing irreparable damage to the international trading system. I am offering a substitute to this bill that would free us from needlessly reneging on our own trade agreements, unfairly discriminating between supplying countries, cutting off our future options for international trade agreements, or abandoning our philosophy of providing temporary import relief for adjustment rather than permanent protection. And yet this amendment allows the textiles bill to restore import levels to a fair volume consistent with the objectives of the Multifiber Arrangement, and to provide a plan for orderly, nondisruptive import growth.

The first part of the amendment I am offering requires the International Trade Commission to determine, within 3 months, the extent of injury to the textile and or apparel industries due to import competition. It directs the President to take action on the basis of the ITC findings to provide temporary relief to injured parts of the textile or apparel industries within 15 days of the ITC report. The ITC recommendations would restrict textile and apparel imports between August 1, 1985, and July 31, 1986, the date on which the current MultiFiber Arrangement expires, to the extent that surges in imports have injured our domestic industry.

The second part of the amendment I am offering would impose a 6-percent uniform cap on annual textile and apparel import growth from all countries, starting August 1, 1986. The growth cap would remain in effect until the major textile and apparel producing countries and the United States agreed to a new textile product trade treaty. This is different from the textiles bill because of its nondiscriminatory treatment of all textile and apparel producing countries, not just a few. Under the substitute for S. 680—I think the amendment is No. 720—imports from many Asian countries are allowed to grow 1 percent per year; imports from Mexico and Central American countries can grow 1 percent or 6 percent per year, depending on the import sensitivity of the product category; and Canadian and European import growth is unrestricted. The country-to-country differences in

import growth caps under the S. 680 substitute are likely to intensify the pressures for retaliation from countries that feel they are being treated unfairly. The nations hit hardest by the proposed textile import restrictions under the substitute for S. 680 import $33 billion of American goods that could be replaced with competing products and commodities from other countries. No textile bill will ever be free from retaliation, but a bill that places a uniform, nondiscriminatory cap on import growth from all countries will be less likely to attract devastating retaliation than a discriminatory bill like S. 680 or the substitute to S. 680. By leaving open the possibility that an acceptable trade treaty will result in a relaxation of U.S. import quotas, my amendment further reduces the chances of retaliation while providing an incentive for continuing international negotiations on textile and apparel trade. CRS estimates that such a 6-percent uniform growth cap on textile product imports is likely to be slightly more restrictive than S. 680 or the proposed substitute. In fact, CRS estimates that the series of growth caps under the proposed textile bill would be equivalent to a uniform 8.5-percent per year growth cap if Euorpean countries stepped up their exports to take advantage of their exemptions under the bill.

The amendment improves the enforceability of our textile and apparel trade laws in four ways. First, by restricting allowable import growth from all countries rather than from just some countries, my amendment closes a loophole for import fraud. Exporters in restricted countries under the S. 680 substitute would have a strong incentive to declare fraudulent points of origin for their products or to trans-ship those products through unrestricted countries.

Second, this amendment proposes to notify every textile and apparel producing country of the status of its quota on a quarterly basis. Countries exceeding one fourth of their yearly quota in any given quarter are notified early so they can plan to reduce exports to the United States for the remaining quarters in order to bring their total to 6 percent growth from the preceding year.

Third, the amendment calls for a GAO report determining the number and deployment of Customs Service textile import specialists and inspectors needed to enforce this law.

Fourth, it calls on Customs and the textile and apparel industries to recommend product categories in which we could more effectively specify quotas by weight. Quotas specified by weight are less subject to shipping fraud, since shippers have an incentive to determine the precise weight of their cargoes.

The last part of the amendment calls for a repeal of all provisions of this amendment, in 10 years. No industry should enjoy the special privilege of permanent protection in an open economy. Permanent protection makes productivity improvement and innovation unprofitable. If we destroy the incentives our economy provides for innovation, we will become followers in global industrial competition. On the other hand, 10 years is a very generous window for the industry to restructure itself. And we can rely on this industry to do so. Its aggressive attack on productivity has been unparalleled. But investment in new equipment alone may not be the answer. A clear 10 year limit on import relief should give us the time to see if there is a long-term solution to the interntional challenges in textiles and apparel competition.

There is no excuse for second-best trade policy Mr. President. The urgency of an issue like the problems facing the textile and apparel industry today should not prevent us from putting together the best legislation we can. This amendment establishes a quota that would set import levels in the current year in accordance with the extent of injury suffered by the domestic industry due to import competition. We are entitled to provide import relief due to injury from disruptive import competition under our international agreements and the GATT. This amendment also sets a limit on total import growth that is nondiscriminatory and does not cut off the road to future negotiations. At the same time, it improves our ability to enforce our trade laws. And last, it reaffirms our commitment to the principles of temporary import relief ultimately seeking humane answers to the problem of adjustment in a changing world economy.

Mr. President, this amendment, I believe, is balanced and it tries to seek a common ground. For that reason, I offer it and hope that it will be given consideration.

Mr. McCLURE. Mr. President, on behalf of myself and the Senators from South Carolina (Mr. HOLLINGS and Mr. THURMOND), I move to lay the amendment on the table.

Mr. BRADLEY. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion to lay on the table the amendment of the Senator from New Jersey. The yeas and nays have been ordered. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from North Carolina [Mr. EAST], the Senator from Florida [Mrs. HAWKINS], and the Senator from Pennsylvania [Mr. HEINZ] are necessarily absent.

I further announce that, if present and voting, the Senator from Pennsylvania [Mr. HEINZ] would vote yea.

Mr. CRANSTON. I announce that the Senator from Delaware [Mr. BIDEN] is necessarily absent.

The PRESIDING OFFICER (Mr. COCHRAN). Are there any other Senators in the Chamber who wish to vote?

The result was announced—yeas 87, nays 9, as follows:

[Rollcall Vote No. 200 Leg.]

YEAS—87

Abdnor	Gramm	Murkowski
Andrews	Grassley	Nickles

NOT VOTING—4

Biden	Hawkins
East	Heinz

So the motion to lay on the table the amendment (No. 723) was agreed to.

Mr. THURMOND. Mr. President, I move to reconsider the vote by which the motion to lay on the table was agreed to.

Mr. HELMS. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 724

(Purpose: To achieve the objectives of the Multi-Fiber Arrangement, to promote the economic recovery of the United States textile and apparel industry and its workers, to reduce unemployment, and for other purposes)

Mr. THURMOND. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from South Carolina [Mr. THURMOND] proposes an amendment numbered 724.

Mr. THURMOND. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the pending amendment add the following:

"TITLE II—TEXTILE AND APPAREL TRADE ENFORCEMENT

"SEC. 201. SHORT TITLE.

"This title may be cited as the 'Textile and Apparel Trade Enforcement Act of 1985'.

"SEC. 202. POLICY.

"The policy of this title is—

"(1) to prevent further disruption of the United States textiles and textile products markets, damage to United States textile and apparel manufacturers, and loss of jobs by United States workers by providing for orderly and nondisruptive growth of imports of textiles and textile products; and

"(2) to implement the objectives of the Multi-Fiber Arrangement by requiring the effective enforcement of import levels of textiles and textile products contemplated by the Multi-Fiber Arrangement.

"SEC. 203. FINDINGS.

"The Congress finds that—

"(1) the United States and most major textile producing countries are parties to the Multi-Fiber Arrangement, the purpose of which is to ensure the orderly growth of imports of textiles and textile products and to avoid disruption of the markets for textiles and textile products in importing nations;

"(2) the Multi-Fiber Arrangement, which first entered into force on January 1, 1974, and which was most recently extended in December, 1981, through July 1986, contemplates a 6 per centum annual rate of growth for imports for most exporting countries and provides for a lower rate of growth for imports from significant exporting countries;

"(3) since 1980, the objective of orderly growth of imports of textiles and textile products provided for in the Multi-Fiber Arrangement has not been achieved; from 1981 through 1984 imports of textiles and textile products into the United States have grown at an annual rate of 19 per centum, far in excess of the 1 per centum growth rate of the United States market for textiles and textile products during the same period and far in excess of the annual rate of import growth of less than 2 per centum that prevailed during the period 1974 through 1980;

"(4) the disruptive surge in imports of textiles and textile products which occurred from 1981 through 1984 resulted from the failure of the United States to enforce adequately its rights under the Multi-Fiber Arrangement and to extend coverage of the Multi-Fiber Arrangement to imports made of competing fibers;

"(5) import growth of apparel products has substantially outstripped the growth of the domestic market so that import penetration of the domestic market has more than doubled in the last six years, reaching a level of 50 per centum in 1984;

"(6) based on a nationwide audit of major retail outlets, the import penetration of such major items of apparel as trousers, blouses, shirts, suits, skirts and sweaters exceeds 50 per centum of domestic consumption;

"(7) since the most recent extension of the Multi-Fiber Arrangement, certain exporting countries have sharply increased their exports of textiles and textile products made in whole or in part from fibers not subject to the Multi-Fiber Arrangement with the effect of circumventing restraints agreed to under the Arrangement; the increased imports of these textiles and textile products have caused disruption of the United States market for textiles and textile products and have seriously undercut the effectiveness of the Multi-Fiber Arrangement;

"(8) imports of textiles and textile products into the United States are predominantly the product of significant exporting countries, with five large exporting countries now accounting for more than 50 per centum of all imports of textiles and textile products;

"(9) the domination of import trade by producers in the significant producing countries has limited participation in the United States market by other producing countries, many of which share important trade and other national interests, and encourage mutually beneficial trade and investment, with the United States;

"(10) a change in United States textile trade policy to afford the smaller producing countries and countries in the Caribbean region a relatively greater share of imports of textiles and textile products would promote the national economic interests of the United States;

"(11) the textile and apparel trade deficit of the United States was more than $16,200,000,000 in 1984, an increase of 53 per centum over 1983, and accounted for 13 per centum of the Nation's overall merchandise trade deficit;

"(12) the current level of imports of textiles and textile products, ten billion square yard equivalents in 1984, represents over one million job opportunities lost to United States workers;

"(13) imported textiles and textile products now account for 38 per centum (the equivalent of three million two hundred thousand bales of cotton) of the annual cotton consumption in the United States; only one of five of the bale equivalents included in imported textiles and textile products is grown in the United States; the result of the massive increases in cotton textile and apparel imports has been a declining market share for, and a $1,000,000,000 loss to, domestic cotton producers in 1983 alone, which was only partially offset by Federal cotton program benefits; another result is that United States cotton producers, who are spending about $20,000,000 annually in research and promotion efforts, have built markets not for themselves but for foreign growers;

"(14) imports of wool products have doubled since 1980, creating major disruptions among domestic wool products producers and seriously depressing the price of United States produced raw wool; the Multi-Fiber Arrangement recognizes that imports of certain products, such as wool products, in certain countries, including the United States, pose particular problems for certain industries, such as, the wool products industries in those countries and import growth rates of 1 per centum or less have been permitted in such cases;

"(15) as a result of this increased penetration and the very limited growth of the domestic market, the United States companies producing textiles and textile products identical, or similar, to those imported have been seriously damaged, many of them have been forced out of business, many have closed plants or curtailed operations, workers in such companies have lost employment and have been otherwise materially and adversely affected, and serious hardship has been inflicted on hundreds of impacted communities causing a substantial reduction in economic activity and lost revenues to local governments;

"(16) the increase in imports and increased import penetration of the United States domestic market have occurred notwithstanding the fact that, through extensive modernization programs and investment in more modern equipment, productivity, as measured by output per man hour, in the textile mill products sector has increased in the last ten years at the average annual rate of 4.2 per centum and in the apparel sector at the average annual rate of 3.4 per centum, as compared with the lower productivity growth of all manufacturing in the same period of 1.9 per centum;

"(17) the factors described above are causing serious damage, or the actual threat thereof, to domestic producers of textiles and textile products; as a result, market disruption exists in the United States requiring the new measures established under this Act;

"(18) based on experience during the past ten years and on other factors, the growth of the United States market for textiles and textile products is unlikely to exceed an average annual rate of 1 per centum during the next several years;

"(19) if the rate of growth of imports of textiles and textile products into the United States that occurred since 1980 continues, plant closings will continue to accelerate, leaving the United States market with reduced domestic competition for imported products;

"(20) in order to avoid further market disruption and deterioration of the situation confronting the United States industry producing textiles and textile products, which is already seriously damaged, it is essential—

"(A) to require the establishment of import levels for textiles and textile products supplied by major producing countries that reflect—

"(i) the import level that would have occurred had imports from these countries grown since 1980 by the 6 per centum annual growth rate contemplated by the Multi-Fiber Arrangement, or 1 per centum in the case of wool products, or

"(ii) the actual import level resulting from restraints under a bilateral agreement with the United States providing for an annual import growth rate of less than 6 per centum,

whichever is the lesser,

"(B) to require the establishment of import levels for textiles and textile products supplied by producing countries that reflect their 1984 import levels,

"(C) to require the establishment of import levels for textiles and textile products supplied by small producing countries that provide a significant increase in their market shares to meet their development needs and to permit future growth in such shares consistent with the Multi-Fiber Arrangement, and

"(D) to limit the future growth rate of imports of textiles and textile products into the United States to levels which reflect orderly growth as provided for in the Multi-Fiber Arrangement and the most recent Protocol extending the Multi-Fiber Arrangement;

"(21) the establishment of import levels, and limitation on future import growth to levels, that reflect effective enforcement of

the Multi-Fiber Arrangement and that also reflect the expected growth rate of the United States market for textiles and textile products will fulfill announced policy objectives of the United States regarding trade in textiles and apparel;

"(22) as the Department of Defense has long recognized, a strong, viable and efficient domestic textiles and textile products industry is essential in order to avoid impairment of the national security of the United States;

"(23) the developments that have led to the sharp increase in imports of textiles and textile products since 1980 may not have been foreseeable; nevertheless, the rights of the United States under international agreements should have been invoked in order to prevent increased quantities of textiles and textile products from being imported under such conditions as to cause or threaten serious damage to domestic producers of textiles and textile products in the United States; and

"(24) the sharp increase in imports of textiles and textile products since 1980, and the effect of this increase on the United States textiles and apparel industry and its workers, constitutes exceptional circumstances within the meaning of the Multi-Fiber Arrangement and its Protocol.

"SEC. 204. DEFINITIONS.

"For purposes of this title—

"(1) The term "textiles and textile products" includes, but is not limited to, all manmade fibers, tops, yarns, piece goods, made-up articles, apparel, and other textile manufactured products (which derive their chief characteristics from their textile components) made in whole or in part from any natural or manmade fiber, or blend thereof, that are classified under schedule 3, part 6 of schedule 6, part 1, 4, 5 (except subpart E), 7, or 13 of schedule 7, or part 1 of schedule 8 of the Tariff Schedules of the United States or part 1 of the Appendix to the Tariff Schedules of the United States;

"(2) The term "category" means, with respect to textiles and textile products that are the product of a country, each of the following—

"(A) each category of textiles and textile products identified by a three-digit textile category number in the Department of Commerce publication "Correlation: Textile and Apparel Categories with Tariff Schedules of the United States Annotated", dated January 1985 and, subsequently, in the first edition of such document that is revised to reflect the adoption by the United States of the Nomenclature Structure of the Harmonized System;

"(B) with respect to each country with which the United States has (i) an agreement on the date of enactment of this title limiting exports of textiles and textile products to the United States that includes specific limitations on subdivisions of a category described in subparagraph (A), or (ii) taken unilateral action to limit products entered under such a subdivision, each such subdivision;

"(C) a category consisting of the man-made fiber products classified under subpart E of part 1 of schedule 3 to the Tariff Schedules of the United States; and

"(D) each category consisting of each of the following products when, because of any fiber content, that product is not subject to the Multi-Fiber Arrangement:

"(i) yarn,

"(ii) fabric,

"(iii) apparel, and

"(iv) other textile products;

"(3) The term "import sensitive category" means—

"(A) a category (other than a category applicable to textiles and textile products that are a product of a country in the Caribbean region) for which the ratio of imports to domestic production, as reported in the Department of Commerce publication "U.S. Production, Imports and Import/Production Ratios for Cotton, Wool and Man-Made Fiber Textiles and Apparel", equals or exceeds 40.0 for the preceding calendar year; and

"(B) a category covering wool products;

"(4) The term "country" means a foreign country (other than Canada and the Member States of the European Economic Community as constituted on January 1, 1985), a foreign territory, an insular possession of the United States, or any other territory, possession, colony, trusteeship or political entity, whether affiliated with the United States or not, that is outside the customs territory of the United States;

"(5) The term "major producing country" means a country the annual aggregate quantity of textiles and textile products of which that entered under the categories referred to in paragraph (2)(A) during calendar year 1984 equalled or exceeded 10 percent of all textiles and textile products under such categories that entered from all countries and from Canada and the Member States of the European Economic Community during calendar year 1984;

"(6) The term "producing country" means a country (other than a major producing country and a country in the Caribbean region) the annual aggregate quantity of textiles and textile products of which that entered under the categories referred to in paragraph (2)(A) during calendar year 1984 equalled or exceeded 1.25 per centum of all textiles and textile products under such categories that entered from all countries and from Canada and the Member States of the European Economic Community during calendar year 1984;

"(7) The term "small producing country" means a country other than a major producing country and a producing country;

"(8) The term "country in the Caribbean region" means Mexico and a country eligible for designation as a beneficiary country under section 212 of the Caribbean Basin Economic Recovery Act (19 U.S.C. 2702);

"(9) The term "wool product" means an article containing over 17 per centum by weight of wool;

"(10) The term "cotton, wool and man-made fiber sweaters" means articles classified under categories 345, 445, 446, 645 or 646 as defined in the Department of Commerce publication "Correlation Textile and Apparel Categories with Tariff Schedules of the United States Annotated," dated January 1985;

"(11) The term "entered" means entered, or withdrawn from warehouse, for consumption in the customs territory of the United States;

"(12) The term "imported" means entered; and

"(13) The term "Milti-Fiber Arrangement" means the Arrangement Regarding International Trade in Textiles, as extended by the Protocol done at Geneva, December 22, 1981.

"SEC. 205. LIMITS ON TEXTILE AND APPAREL IMPORTS.

"(a) CALENDAR YEAR 1985.—Notwithstanding any other provision of law, the aggregate quantity of textiles and textile products classified under a category that is entered during calendar year 1985 shall not exceed—

"(1) in the case of textiles and textile products that are a product of a major producing country other than textile luggage and textile flat goods subject (as of the date of enactment of this Act) to a specific limitation under an agreement with a major producing country, the lesser of an amount equal to 101 per centum—

"(A) of the aggregate quantity of such products of such country classified under such category that would have entered during calendar year 1984 if the aggregate quantity of such products of such country classified under such category entered during calendar year 1980 had increased by 6 per centum annually, or 1 per centum annually in the case of a category covering a wool product, during calendar years 1981, 1982, 1983, and 1984, or

"(B) if the United States has an agreement with such country providing for an annual growth rate for such category of less than 6 per centum, of the aggregate quantity of such products of such country classified under such category that entered during calendar year 1984;

"(2) in the case of textile luggage and textile flat goods subject (as of the date of enactment of this Act) to specific limitation under an agreement with a major producing country, the specific limitation quantity in effect as of the date of enactment of the Act;

"(3) in the case of textiles and textile products that are a product of a producing country, an amount equal to the aggregate quantity of—

"(A) such products from such country classified under such category that entered during calendar year 1984, or

"(B) in the case of textile luggage and textile flat goods subject (as of the date of enactment of this Act) to specific limitation under an agreement with a producing country, the specific limitation quantity in effect as of the date of enactment of this Act;

"(4) in the case of textiles and textile products that are a product of a small producing country (other than cotton, wool, and man-made fiber sweaters described in paragraph (5)), an amount equal to the sum of—

"(A) the aggregate quantity of such products of such country classified under such category that entered during calendar year 1984, plus

"(B) an amount equal to—

"(i) 15 per centum of such quantity, in the case of a category that is not an import sensitive category, or

"(ii) 1 per centum of such quantity, in the case of a category that is an import sensitive category; and

"(5) in the case of cotton, wool and man-made fiber sweaters that are—

"(A) the product of substantial assembly operations in Guam from otherwise completed knit-to-shape component parts, an aggregate amount equal to 160,000 dozen; and

"(B) the product of substantial assembly operations in the Commonwealth of the Northern Mariana Islands from otherwise completed knit-to-shape component parts, an aggregate amount equal to 70,000 dozen.

"If application of paragraph (1) would result in the aggregate quantity of textiles and textile products of a major producing country classified under all categories permitted to enter during calendar year 1985 to be less than 70 per centum of the aggregate quantity of such products of such country

that entered during calendar year 1984, then, notwithstanding paragraph (1), the aggregate quantity of textiles and textile products of such country that may be entered under each category during calendar year 1985 shall not be less than 40 per centum of the aggregate quantity of such products of such country that entered under such category during calendar year 1984.

"(b) GROWTH ADJUSTMENT.—For calendar years after 1985, the aggregate quantity of textiles and textile products classified under each category that may be entered during each such calendar year shall—

"(1) in the case of such products that are a product of a major producing country or of a producing country, be increased by an amount equal to 1 per centum of the aggregate quantity that could be entered under such category during the preceding calendar year; and

"(2) in the case of such products that are a product of a small producing country, be increased by an amount equal to—

"(A) in the case of a category (other than an import sensitive category), 6 per centum of the aggregate quantity that could be entered under that category during the preceding calendar year, and

"(B) in the case of an import sensitive category, 1 per centum of the aggregate quantity that could be entered under that category during the preceding calendar year.

"If the aggregate quantity that could be entered under a category for a calendar year after 1985 is reduced under section 210(b), than in the first calendar year in which there is no such reduction, this subsection shall be applied as if there had been no reduction under section 210(b) in previous calendar years.

"(c) MINIMUM QUANTITIES.—If, under subsection (a) or (b), the aggregate quantity of textiles and textile products of a country that may be entered during a calendar year under a category is—

"(1) less than one million square yard equivalents, in the case of a category covering yarn, fabric, made-ups, and miscellaneous products, other than wool products;

"(2) less than seven hundred thousand square yard equivalents, in the case of a category covering apparel, other than wool products apparel; or

"(3) less than one hundred thousand square yard equivalents, in the case of a category covering wool products,

"then, notwithstanding subsection (a) or (b), the aggregate quantity of textiles and textile products that may be entered from such country under such category during the calendar year shall be one million, seven hundred thousand, or one hundred thousand square yard equivalents, respectively. The amount prescribed in the preceding sentence shall be accorded growth subject to the provisions of subsection (b) beginning the first calendar year after the aggregate quantity of imports from such country under such category equals the minimum quantity prescribed under this subsection.

"(d) SPECIAL RULE.—For purposes of this section, if during any calendar year after 1984, the aggregate quantity of textiles and textile products that are the product of a small producing country, other than a country in the Caribbean region, and that are entered under the categories referred to in paragraph (2)(A) of section 204 equals or exceeds 1.25 per centum of all textiles and textile products entered under such categories from all countries and from Canada and the Member States of the European Economic Community during such calendar year, then such small producing country shall be considered to be a producing country for all succeeding calendar years.

"(e) ENFORCEMENT.—The Secretary of Commerce shall prescribe such regulations governing the entry, or withdrawal from warehouse, for consumption of textiles and textile products as may be necessary to carry out this title.

"SEC. 206. IMPORT LICENSING.

"In order to ensure the equitable and efficient administration of section 205 of this title, the Secretary of Commerce shall, within six months after the date of enactment of this title, establish and administer an import licensing system under which an importer of any textiles and textile products from any country and from Canada and the Member States of the European Economic Community, will be required to present an import permit as a condition of entry. The Secretary shall charge a fee for import licenses in such amount as may be necessary to cover the cost of administration of the system.

"SEC. 207. ANNUAL REPORT.

"Not later than March 15, 1986, and March 15 of each calendar year thereafter, the President shall submit to the Congress a report on the administration of this title during the preceding calendar year. Such report shall include detailed information about the implementation and operation of the limitations established under section 205. All departments and agencies shall cooperate in preparation of this report, as requested by the President.

"SEC. 208. REVIEW.

"The Secretary of Commerce shall commence ten years after the date of enactment of this title a formal review of the operation of the Textile Import Control Program under the provisions of this title. The Secretary shall consult members and committees of Congress, representatives of the labor unions and the industries affected by the program, and appropriate government agencies. Within six months after the commencement of the study, the Secretary shall submit to Congress his findings as well as his recommendations for the future conduct of the program.

"SEC. 209. DUTY FREE ENTRY OF CERTAIN SWEATERS FROM GUAM AND THE NORTHERN MARIANAS.

"Subpart A of part 7, schedule 3 of the Tariff Schedules of the United States (19 U.S.C. 1202) is amended by adding at the end thereof the following new item:

"'385.97	Cotton, wool and man-made fiber sweaters that are entitled to enter under the quotas established under section 205(a)(5) of the Textile and Apparel Trade Enforcement Act of 1985 or the increased quotas under section 205(b) of such Act that adjust the quotas under such section 205(a)(5) and that do not contain foreign materials to the value of more than 50 percent of their total value as this standard is applied pursuant to Headnote 3(a) of the General Headnotes and Rules of Interpretation.	Free'.

"SEC. 210. EFFECTIVE DATE.

"(a) IN GENERAL.—Subject to the provisions of subsection (b), the provisions of this title shall apply to textiles and textile products entered, or withdrawn from warehouse, for consumption on or after the date of enactment of this Act.

"(b) CALENDAR YEARS 1985 AND 1986.—The Secretary of Commerce shall determine, and publish in the Federal Register, the aggregate quantity, if any, of textiles and textile products that may be entered under section 205 (a) or (c) of this title from each country under each category during the period beginning on the date of enactment of this title and ending December 31, 1985. Notwithstanding subsection (a), to the extent that the aggregate quantity of imports of textiles and textile products from a country under a category entered after December 31, 1984, and before the date of enactment of this title exceeds the quantity permitted entry for such country and such category during calendar year 1985 under subsection (a) or (c) of section 205, then the limit that would otherwise apply under section 205(b) for such category for such country for calendar year 1986 shall be reduced by the amount of such excess quantity. If such excess quantity exceeds the limit that would otherwise apply under section 205(b) for such category for such country for calendar year 1986, then the limit for such category and country for calendar years after 1986 shall be reduced until such excess is accounted for.

"TITLE III—FOOTWEAR

"SEC. 301. SHORT TITLE.

"This title may be cited as the 'American Footwear Industry Recovery Act of 1985'.

"SEC. 302. FINDINGS AND PURPOSE.

"(a) The Congress finds that—

"(1) The domestic nonrubber footwear industry is important to the national economy, and footwear firms are vital to the economic health of small towns throughout the United States.

"(2) The domestic nonrubber footwear industry is highly labor intensive, and low capital requirements for entry into footwear production make it a primary target for industrializing or newly industrialized countries. As a consequence, footwear is produced in virtually every footwear consuming country in the world.

"(3) Tremendous competitive pressure has been created in the world footwear market in the last decade as a result of rapidly growing production and capacity in numerous developing and developed countries. This development has resulted in the widespread erection of tariff and nontariff barriers by foreign countries designed to protect their domestic footwear industries.

"(4) The United States has historically resisted the protectionist trends of other producing nations and has instead maintained a market distinguished by its accessibility. As a result, the United States market has become a focal point for world trade in nonrubber footwear.

"(5) The diversion of international trade to the United States market has resulted in serious injury to domestic producers as manifested by—

"(A) the loss of 155,000 footwear jobs since 1968,

"(B) a decline in domestic production and production capacity, and

"(C) the permanent closure of over 500 plants during the same period.

"(6) The serious injury to domestic producers poses a significant danger to the industry's supplier base as well.

"(7) The domestic nonrubber footwear producers have made a significant commitment to the future of the industry through substantial capital investment.

"(8) Since the termination of temporary import relief in 1981, capital investment in the domestic nonrubber footwear industry has declined as the industry struggled to battle the massive surge in imports which increased the percentage share of imported footwear in the United States market from, 51 percent in 1981 to 77 percent in 1985.

"(9) Without the restriction of import levels, capital investment in this domestic industry will continue to decrease.

"(10) The domestic nonrubber footwear industry has thrice been judged by the International Trade Commission, as recently as May 1985, to be seriously injured by imports.

"(11) Since the termination of the two, four-year orderly marketing agreements in 1981, the harm to the domestic industry is even more critical then the serious injury which triggered the Commission's unanimous findings in 1976 and 1977.

"(12) The domestic nonrubber footwear industry has not been afforded adequate and appropriate relief from imports; therefore, the Congress concludes that—

"(A) the administrative process under sections 201, 202, and 203 of the Trade Act of 1974 has proven inadequate; and

"(B) in the absence of and effective remedy under such process, legislative relief is essential.

"(b)(1) It is the purpose of Congress in enacting this section to—

"(A) promote and expend the economic health of the United States nonrubber footwear industry,

"(B) preserve the jobs of American workers, and

"(C) prevent the further decline of this important domestic industry.

"(2) It is declared to be the policy of Congress that access to the United States market for foreign-produced nonrubber footwear should be on an equitable basis to ensure orderly trade in nonrubber footwear, reduce unfair trade in nonrubber footwear, and address United States balance-of-payments problems, of which footwear is the seventh largest component. In order to accomplish these objectives, it is deemed necessary and appropriate to limit imports of nonrubber footwear into the United States market.

"SEC. 303. DEFINITIONS.

For purposes of this title—

"(1) The term 'entered' means entered, or withdrawn from warehouse, for consumption in the customs territory of the United States.

"(2) The term 'Secretary' means Secretary of Commerce.

"(3) The term 'nonrubber footwear' means the following categories of nonrubber footwear products, identified by reference to the following item numbers of the Tariff Schedules of the United States (as in effect on January 1, 1985): 700.05 through 700.45; 700.56; 700.72 through 700.83; and 700.95.

"(4) The term 'apparent domestic consumption' means, with respect to any 1-year period, the sum of imports plus domestic production less exports.

"SEC. 304. QUANTITATIVE LIMITATION ON NONRUBBER FOOTWEAR.

"(a)(1) During the 8-year period beginning on the date of enactment of this title, the aggregate number of pairs of nonrubber footwear which may be entered during any 1-year period shall not exceed 60 percent of the estimated apparent domestic consumption of nonrubber footwear for such period.

"(2) The quantitative limitation imposed by paragraph (1) for any 1-year period shall be distributed among the following categories of nonrubber footwear so that the aggregate number of pairs of nonrubber footwear in such category which may be entered during any 1-year period shall not exceed the quantity equal to—

"(A) in the case of nonrubber footwear with a customs value that does not exceed $1.25 per pair, 10 percent of apparent domestic consumption of nonrubber footwear for such period,

"(B) in the case of nonrubber footwear with a customs value that exceeds $1.25 per pair but does not exceed $2.50 per pair, 5.4 percent of apparent domestic consumption of nonrubber footwear for such period, and

"(C) in the case of nonrubber footwear with a customs value that exceeds $2.50 per pair, 44.6 percent of apparent domestic consumption of nonrubber footwear for such period.

"(b) Within sixty days after the effective date of this title, and on the first day of the fourth quarter of each 1 year period thereafter, the Secretary shall determine on the basis of the best information available, including his own or independent forecasts, the expected apparent domestic consumption of nonrubber footwear for, in the case of the initial determination, the remainder of the current 1 year period and in the case of the first day of the fourth quarter of each 1 year period thereafter, the next succeeding 1 year period. On each such date, the Secretary shall determine and publish in the Federal Register the allocation for the next succeeding 1 year period of permissible imports of nonrubber footwear as required by this section.

"(c) On the first days of the first, second, and third quarters of each 1 year period, the Secretary shall revise the determinations of expected apparent domestic consumption made under subsection (b) for the current 1 year period on the basis of the best information then available and shall make such adjustments in the quantity of nonrubber footwear permitted to be imported under this section as indicated by the revision. All revisions and adjustments made under this subsection shall be published in the Federal Register.

"(d) If the revised determination of expected apparent domestic consumption published in the Federal Register under subsection (c) on the first day of the third quarter in any 1 year period for nonrubber footwear varies from the actual apparent domestic consumption of nonrubber footwear for such 1 year period, the Secretary shall publish in the Federal Register on the first day of the second quarter of such succeeding 1 year period a revision to the determination of expected apparent domestic consumption for such 1 year period made under subsection (c) of this section. The revision shall be in the amount of such variance and shall be in addition to any other revision that would be made on any such first day of the second quarter under subsection (c) of this section.

"(e)(1) The Secretary and the Secretary of the Treasury shall take such actions within their respective jurisdictions as may be necessary or appropriate to enforce the provisions of this section, including without limitation, the issuance of orders to customs officers to bar entry to merchandise if the entry of such merchandise would cause the limitations established under this section to be exceeded.

"(2)(A) The Secretary and the Secretary of the Treasury are each authorized to issue such implementing regulations, including the issuance of import licenses, as may be necessary or appropriate to effect the purposes of this section and to enforce the provisions of this section.

"(B) Before prescribing any regulations under subparagraph (A), the Secretary or the Secretary of the Treasury, as the case may be, shall—

"(i) consult with interested domestic parties,

"(ii) afford an opportunity for such parties to comment on the proposed regulations, and

"(iii) consider all such comments before prescribing final regulations.

"SEC. 305. COMPENSATION AUTHORITY.

"For purposes of section 123 of the Trade Act of 1974 (19 U.S.C. 2133), the imposition of the quantitative limitation under section 204 shall be treated as action taken under section 203 of the Trade Act of 1974 (19 U.S.C. 2253).".

COSPONSORS OF THE AMENDMENT ON TEXTILES

Strom Thurmond, Ernest Hollings, Daniel P. Moynihan, Jesse Helms, Howell Heflin, John Heinz, William Cohen, John W. Warner, Edward M. Kennedy, George J. Mitchell, Thomas F. Eagleton, Arlen Spector, John P. East, Thad Cochran, Paul S. Trible, Jeremiah Denton, Alfonse M. D'Amato, Jim Sasser, Orrin Hatch, Claiborne Pell, Mack Mattingly, Jake Garn, Paul Laxalt, John D. Rockefeller,

Paula Hawkins, Albert Gore, Jr., Alan J. Dixon, Christopher J. Dodd, Paul Simon, Wendell H. Ford, Dennis DeConcini, David Pryor, Charles Mathias, Russell B. Long, Patrick J. Leahy, Howard M. Metzenbaum, Donald W. Riegle, Jr., Lowell P. Weicker, Jr., Mitch McConnell, Robert W. Kasten, John H. Glenn, Jr., Dale Bumpers, Sam Nunn, and Robert Byrd.

Mr. HOLLINGS. Mr. President, this is on the Finance Committee amendment in the second degree.

The PRESIDING OFFICER. The Senator from Washington.

Mr. EVANS. I thank you, Mr. President.

Mr. President, earlier this afternoon we had some extended comments on trade legislation on the textile bill and the comment by the Senator from South Carolina that indeed this was a national issue. Of course, it is true that it is a national issue. Trade has been a national issue in this Nation for more than 200 years.

Our forefathers during the years leading up to the Revolution acted against the Stamp Act and citizens of that colonial era itched under homespun when they refused to import textiles from Britain and from other nations. But that did not solve the trade problems. It merely led to reaction, retaliation and ultimately the American Revolution.

The effect of this legislation, Mr. President, would substitute an internal trade war in the United States for an external trade war, an internal trade war which would pit one region against another, one State against another, one industry against another, and one worker against another.

I do not think that is the kind of unity which is desirable or necessary

in a period of growing international competitiveness. We have to be able to work together as a nation and not against each other.

I think it is important to attempt to differentiate between unfair trade and fair trade. Unfair trade we have legislated against for years, and there is some question in this body and in this country as to whether we have always used every bit of our current ability to work against unfair trade relationships.

But the mere fact that another nation may pay lower wages or that another nation has better ideas, or that another nation has more of a certain kind of resource of itself does not constitute unfair trade practice.

I recognize the difficulty of changing industries and markets in this Nation.

Unemployment rates were referred to by the Senator from Texas in his remarks earlier this afternoon and they bear repeating. If you examine the current unemployment rates of those States most involved in the shoe industry and in the textile industry, you find that in virtually every case current unemployment rates are lower than the national average; in fact in some of those States they are among the lowest in the Nation.

Who might be hurt by such legislation as is now being proposed? It is unquestionably those States of this Nation, those workers of this Nation engaged in export trade, where we are competitive, where we are selling American goods, American technology, and American know-how overseas.

We happen to be in the State of Washington the largest export trading State in the Nation on a per capita basis. But current unemployment in the State of Washington is not as low as any, any of the States seeking relief under this act, any of the leading textile States, any of the leading shoe-producing States. The State of Washington now has unemployment in June of this year over 8 percent. Our neighbors to the south, Oregon, have an unemployment rate of 9.4 percent. The west coast, generally an export community, is facing high unemployment rates, with a good deal of change in the kind of industries and the jobs we are engaged in.

But now we are asked to bear an even greater burden because those States with low unemployment seek to protect an industry that already is the most protected in this Nation.

Some call it retaliation, but other nations most certainly would retaliate against American production if we were to limit imports from those nations into the United States.

I am not so sure that retaliation is an appropriate term. After all, if you as a developing country cannot earn American dollars, cannot sell into the American market, how in the world are you expected to pay for American goods?

I doubt very much that the Boeing Aircraft Co. is interested in selling its 747's to the People's Republic of China in trade for tons of rice. They want dollars, just as all American exporters want dollars.

The fundamental basic of foreign trade is that it must be two-way trade. And what really has gone wrong in the past several years? What has caused the enormous explosion of trade protectionism and the proposals which have landed with increasing frequency on the desks of Congress?

Have foreign exporters become more unfair? Have foreign nations become more unfair in the last 2 or 3 years than they have been before? Mr. President, I doubt it. We have made progress, admittedly slow, not as much as we would like to make. But through hard and tedious negotiations, we have begun to change practices that are unfair, not to the degree many would wish, but I think it is safe to say that other countries are no more unfair today than they were 3 years ago. And yet what has happened in terms of the imbalance of trade? It soared enormously, not because American exports have declined precipitously, because they have not. Our exports have maintained a fairly substantial level. But imports have soared, and clearly if there is a reason it is the imbalance of the dollar which has paralleled almost exactly that trade imbalance which we have faced over the last several years.

We are striking out. We are striking out, however, by treating symptoms and not the disease. And if we forever treat symptoms we will never cure the disease. The disease, if it is the imbalance of the dollar, comes from the size of our American deficit. And instead of piling regulation on top of regulation and law on top of law to restrict or curtail trade, it seems to me it is time to return once again to the disease and an attempt to correct that disease, the size of our deficit.

Mr. MATTINGLY. Will the Senator yield for a question?

Mr. EVANS. I am pleased to respond to a question of my colleague from Georgia.

Mr. MATTINGLY. When we are talking about unfair trade and fair trade, there is a differentiation between the two. The Senator made the comment that we might have an international trade war amongst ourselves, region against region. I recall 1 year ago when we were talking about fraudulent entries in relation to country-of-origin requirements, the State from which the Senator comes was fighting the illegal practices in which some of our trading partners engage and that we were allowing to happen. Do you not feel that having legislation like this more forward can force a change in trade policy? I am certain the Senator from Washington agrees that we really do not have a strong trade policy in this country, nor one that we all understand.

Mr. EVANS. I certainly agree with my friend from Georgia that we indeed have not been as aggressive as we should have been, but I do not believe that we need more legislation. What we really need to do is to take more aggressive and more certain action. I believe that is beginning to happen, and just about that time, as is too often the case, we in Congress pass new legislation when the problem itself is beginning to shift and to modify.

Mr. MATTINGLY. If the Senator will yield for another question, if there is a law that is not being abided by or if there is a trade treaty that is not being agreed to or followed, what do you suggest in order to change that inequity?

Mr. EVANS. The first thing you do—and if the Senator would listen for a few more moments I will try to get to that more precisely—but it is the question of whether in fact we have not lived up to international agreements we have signed, and I think there is some considerable question as to whether we have or have not. But let me continue, if I might.

Mr. MATTINGLY. The Senator will address specific countries?

Mr. EVANS. I will indeed. I would be the first to say that we have big problems with the nation of Canada just on our northern border. We have big problems with timber imports from Canada. My approach to that problem is to lower the barriers, not raise the barriers, to lower the barriers so that we can go across the border into Canada and have an opportunity to buy their cheap timber and I think that is a perfectly appropriate mechanism. Let us lower barriers and open trade rather than build barriers and close trade, which is what I think we are doing here.

Mr. MATTINGLY. I hope the Senator would agree that when a country in a specific region does not agree or does not abide by the country-of-origin regulations or laws, that they are in fact wrong and that that fact should be rectified?

Mr. EVANS. They are wrong because there are existing laws which say it is wrong. We do not need new laws for that.

But let me continue.

Mr. MURKOWSKI. I wonder if my colleague from Washington would respond to just one quick question?

Mr. EVANS. Indeed, I say to my colleague from Alaska, if it is a quick question.

Mr. MURKOWSKI. The point was made concerning the high unemployment in the State of Washington as it compares with other States. Is not, to

a large degree, that unemployment due to the substantial decline in the timber industry as a consequence of Canadian imports to the United States, and as a consequence of the Japanese market being reduced? There is, in fact, an increase of timber into Japan from other countries including the Soviet Union.

How can you divorce the unemployment issue, which is of concern certainly to you and all of us in our particular States as we see traditional industries decline, from the realization of more imports from Canada to your State or Oregon, which increases unemployment and is extremely detrimental to your timber industry? There has to be equity in our trade relations—trade cannot be a one-way street. And while I understand the concerns of my colleagues and his commitment to free markets, I would suggest to him that the free market must be a reciprocal market. And that we do not have. So my specific question, as you address your own unemployment and as you argue for a free market, aren't you adding to your unemployment problem unless there is trade reciprocity?

Mr. EVANS. I do not believe so. I think, while the timber industry or its decline has some share of our unemployment problems, it is by no means all nor even the major share. It is a piece of a bigger problem, a problem of transition, a transition of a State which had long been dependent on a natural resource economy and is now shifting. I think that we will see, as years go by, a parallel—I hope it is a parallel—in our own State to the situation in Massachusetts. A decade ago, Massachusetts was an economic basket case. An economic basket case because it, too, was suffering the pangs of a declining textile industry and other industries where they found it was no longer possible to effectively compete. They did not give up. They did not look for undue restrictions. They looked for new industries and new opportunities. And currently, in June 1985, Massachusetts has an unemployment rate of 3.9 percent, the lowest in the Nation.

I suggest there are other ways rather than protecting what we now have or protecting an industry that finds increasing difficulties in competing; that is, to seek out new opportunities, new markets, and new ways. At the same time, I say to the Senator from Alaska, that I will indeed continue to work as strongly as I can—and I know the Senator has as well—in convincing for instance the Japanese that tariffs on timber imports, plywood imports, and lumber imports need to be reduced, and reduced now. That has had some effect. Those reductions are now scheduled. They are scheduled far too late, a year and a half from now. I think there is a fair indication that we may get that moved up. We will do everything we can to move it up.

But those are the kinds of answers—reducing barriers rather than increasing barriers. But let me continue for just a few moments.

The effect of this legislation now in front of us would abrogate bilateral agreements the United States has signed. It would abrogate the multifiber agreement. It would abrogate our responsibilities under GATT. Is that really the thing we want to do as a nation? For 200 years we have prided ourselves on hewing closely to those treaties and agreements which we have signed internationally. This is not the time, Mr. President, for us to now say we are not strong enough, we are not good enough, we are not competitive enough, that in order to change we are going to abrogate international agreements we have signed with 43 other nations, and then to come up with a bill that sort of selectively picks—and picks from among some of our closest friends to lay on some harsh and debilitating restrictions.

I had the opportunity to visit, along with Senator DOLE, the Orient this August—Taiwan and South Korea, two of our closest friends and two of our strongest supporters. And South Korea is still the bastion of our defense in the Pacific. And we are going to aim squarely at those two nations, and hit them a body blow in their ability to earn dollars and to carry on their economy. Hong Kong, as my colleague from Texas pointed out earlier today—as we visited this August—asked a question. It is a question that I think is unanswerable if we are to proceed on legislation like this; that is, the question of why us? Why us? We have no tariffs. We have no restrictions. We encourage everyone to come, to sell, and to trade. It is the freest trading market perhaps in the whole world.

Yet, we are going to hit them harshly for what earthly reason? The sponsors of this amendment say that they have eliminated or taken China out of the bill. Not so. They have treated China differently than some other major exporting nations but China will be severely restricted in their exports of textiles in the next few years.

That represents half of their total exports, and the United States represents half of their textile market. We do not even have a substantial trade imbalance with China. But here they are potentially the largest market of the 21st century. What are we about to do, cut them off, cause them to look elsewhere, or to build trading relationships with the many other nations of the world with whom they could build relationships? Who do we hurt? China? Perhaps, and temporarily, but ultimately and in the long run we hurt ourselves—all of us, even including those who serve in the textile industry.

What about the American consumer, Mr. President? The American consumer after all helps to run the marketplace. They decide what they want. They decide what they can afford. And we are about to restrict their choice. We are to ensure higher prices. And in fact, we are to ensure higher prices to those people at the cheaper end of the clothing line who can least afford, and least afford added costs. We will be faced as a Senate and a Congress very shortly with increased cost of Government because the cost of living will certainly go up. Those famous COLA's will go up along with the cost of living, and we will be facing a several billion dollar a year bill just to allow our citizens to keep up with that cost of living.

Mr. President, I ask unanimous consent that a table from the Bureau of Labor Statistics on unemployment be printed in the RECORD at this point, and that a sheet detailing the U.S. imports of textiles and apparel and the percentage change from last year to this year be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

TABLE 1.—CIVILIAN LABOR

[Numbers in thousands]

State	Unemployment							
	Number				Percent of labor force			
	June		July		June		July	
	1984	1985	1984	1985	1984	1985	1984	1985 [1]

Mr. EVANS. I say, Mr. President, that this chart shows clearly—and I think accurately—what has happened, and what is happening in the Nation today. There have been a lot of figures thrown around today. Many of them have been inaccurate, and some have been misleading. The figures, and I believe they are as accurate as you can get, from our Government statistical departments are that the current import penetration on the overall for textile is 20 percent—not the 50 percent or higher that was suggested earlier, and for apparel that is 32 percent. Those are the figures as of the end of 1984.

This textile and apparel industry already has 34 bilateral agreements, over 1,000 quotas, and interestingly enough the statistics show that average profits in this industry have been 14 percent a year over the last 5 years, hardly an industry that is dying.

We have imposed 400 new quotas, 100 of them in 1985 alone. We have enforced those bilateral agreements in spite of what some of my colleagues say. The response is to each special condition and to each individual element. Flexibility is a portion of those bilateral agreements. Rather, Mr. President, than attempting at this point at least to answer directly the arguments made by those who spoke earlier, let me close by suggesting that there is a better direction than this in which to go. Before I do, let me also add, Mr. President, another sheet on impact of the revised textile bill and I ask unanimous consent that that be added to the RECORD at this point.

There being no objection, the material ordered to be printed in the RECORD, as follows:

IMPACT OF REVISED TEXTILE BILL

The revised bill would establish new quotas unilaterally on uncontrolled products in a manner inconsistent with the Multifiber Arrangement (MFA) and our bilateral textile agreements. Also, exports from our three largest textile and apparel suppliers, defined under the bill as "Major Exporting Countries," would be cut back from the 1984 trade levels of MFA products as follows:

	Percent
Taiwan	19
Korea	17
Hong Kong	8

Suppliers defined as "Producing Countries" would be forced to cut back their exports from the levels negotiated with the U.S. by the following amounts:

	Percent
Singapore	34
India	32
China	30
Brazil	20
Japan	20
Thailand	4
Indonesia	3

Suppliers defined as "Small Producing Countries" would be cut back from their rights under our bilateral agreements as follows:

	Percent
Haiti	26
Dominican Republic	18
Mexico	16
Peru	9
Malaysia	5

Other "Small Exporting Countries", which are relatively new suppliers of textile and apparel products to the U.S., would be cut back from their export levels achieved through July 1985 by the following amounts:

	Percent
Bangladesh	66
Turkey	30
Portugal	18

Mr. EVANS. Mr. President, where should we go? Do we close the doors? Do we batten down the hatches? Do we fear our competitors? I think not. Or do we look at a different future? I mentioned earlier that our exports have not declined. Imports have increased. There is a reason for that—not that we are doing any poorer job in our sales overseas. In fact, we are doing a better job because it is tougher with the price of the dollar for us to export. But it is clear that it is the imbalance in the dollar that represents the disease and the cure is to once again return to the question of deficit reduction.

We ought not to be spending the time we are spending on this floor attempting to fiddle with each element of our economy, and how it can be protected. We ought to instead spend our time on another try at deficit reduction. And in successfully doing so, we ought to help further bring unemployment down as it has come down over the past several years, to help ensure continued price stability which we have also had over the last several yeas, to expand the opportunities for new jobs. And we have created 8 million new jobs in this Nation in the last 5 years.

And, what is more important, a higher percentage of the population between 18 and 65 is working today than at any time in the Nation's history.

If we get the deficit down, the 30-percent differential will tend to disappear. When that 30-percent differential disappears or moves toward disappearing, we have given the best gift we can give for competitiveness and for those industries in trouble and others which may not be in trouble.

Mr. President, let me end by suggesting that the State of Washington 10 years ago was the Nation's leader in the manufacture of outerwear garments. We made down clothing, ski clothing, and similar kinds of clothing than any other State in the Nation. We had a very big apparel business.

Much of it is now gone, but it has been replaced. It has been replaced by the fact that the city of Seattle has now become the fourth major fashion center in the United States, behind New York, Los Angeles, and San Francisco.

In doing so, we have created new jobs to replace some of those old jobs. Those new jobs now, instead of at the sewing machines to the same degree, are in marketing, in sales, and in distribution; new jobs for the longshoremen and the dockworkers. And, yes, even continued jobs in the appparel industry because we can now work in concert with local manufacturers and foreign manufacturers to build a bigger, a better, and more diverse industry.

Mr. President, let me close by asking unanimous consent that a series of editorials and articles be printed in the RECORD at this point.

There being no objection, the articles were ordered to be printed in the RECORD, as follow:

[From the Atlanta Constitution, Sept. 11, 1985]

POSITIVE IF OVERDUE TRADE POLICY

President Reagan, it seems increasingly certain, will veto the quotas on imported textiles that Congress, it looks increasingly certain, will enact. If the matter rested there, little could be said for either gesture.

But the White House apparently is looking for ways not only to beat back the urge to protectionism that has come over Congress and a widening array of U.S. industries. It also is looking for ways to help the other side of America's world-trade ledger.

It is to that other side—not to import restriction but to trade promotion—that national policy can most wisely be directed. The president is right in finally attending to it, where until now he has soundly but only single-mindedly hung tough against protectionism.

Textiles are a good case in point. You don't have to buy into the conclusion of a study done for the industry—the conclusion that other countries are aiding the exports of their textile-makers unfairly—in order to be aware that the governments of most exporting nations are anything but neutral. They actively assist their own producers in a variety of legitimate ways.

American textile-makers and apparel-makers, facing stiff foreign competition, have in the main modernized and increased productivity, as recommended to them if they were to hold a place in their domestic market and find export opportunities. Even so, they are suffering their worst industry shrinkage ever, with Georgia and other southeastern states especially hard hit.

But if the industry has done what it should do to meet competition and still is lagging, what could the problem be? And can anything more be done short of closing down our own borders (and running up the prices to American consumers in the bargain)? The problem is not foreign devils; the answer is not protection against them.

Some of the answer surely lies in private initiatives. The textile, apparel and cotton states in particular, but the whole nation as well, can take heart from the recent coordination among all those interrelated industries in promoting their activities and products. Additionally, the industry deserves a good part of the $300 million in export assistance that the Reagan administrationis said to be putting together, partly to help fend off the protectionist surge in Congress but also in an honest effort to get together an (overdue) positive trade policy.

Crucially, however, the federal deficit simply must be cut back sharply. It artificially exaggerates the dollar's worth, pricing U.S. goods out of foreign markets while making foreign goods unrealistically cheap here. Better than any devil theory, the very mundane deficit explains the largest part of our country's current $150 billion a year trade imbalance.

Additional revenue and less federal spending must be engaged to make any real difference. Industry pressure on Congress for spending restraint and on the White House for revenue increase would serve American trade interests far better than any protectionist or quota legislation.

[From the Detroit Free Press, Aug. 4, 1985]

TRADE: WASHINGTON TRIES TO ERECT WALLS INSTEAD OF MINDING THE DEFICIT

As the U.S. economy remains sluggish and the trade deficit projection for 1985 approaches a record $150 billion, Congress is gearing up to do something silly about the trade issue.

Pressed by angry labor and industry lobbies and personally frustrated by the persistence of the trade problem after months of lofty rhetoric on the Hill, members of Congress have recently introduced more than 300 protectionist bills. Some of those bills are freak proposals designed only to appease this or that group of constituents. But others are serious.

The much-publicized plan of the Democrats calls for comprehensive import surcharges; a GOP-sponsored project would ban all Japanese imports unless Tokyo dramatically increases its acquisition of American goods; a bill with bipartisan support would slash imports of textile products from developing countries.

What all those bills have in common is a desire to saddle U.S. consumers with the cost of propping up a number of domestic industries that have difficulty competing in the marketplace, or so they claim. Proponents of protectionism ignore the fact that the U.S. economy has intricate connections with world markets, and therefore is vulnerable to a crushing retaliation. Whether we like it or not, our hope for lasting prosperity is with free trade, not a global economic war that no one can win.

Congress could do a lot to ease the trade deficit by trimming the federal budget deficit. That would let hot air out of the U.S. dollar and make our besieged manufacturers competitive again. Many in Washington understand this. Yet, if the trade deficit continues to grow and the Reagan administration won't come up with a credible political alternative to import restrictions, the odds are good that some bad trade law will end up on the books by year's end.

Should that happen, the country will only be worse off. The trade imbalance that the United States registers with the rest of the world is merely drippage from the red ink in the federal budget. The real challenge for both Congress and the administration is to fix that deficit first. Erecting trade barriers, or, as President Reagan appears to want to do, merely resisting protectionist measures without removing the cause of protectionist sentiments, won't do much to protect our jobs. The time is running out.

[From the New York Times, Sept. 13, 1985]

BUDGET DEFICITS ARE THE KEY TO TRADE

To ward off Congress's attack on imports, President Reagan has been reacting to the politics of the protest but ignoring the economic fundamentals. He is straining now to produce a trade policy that can stem the tide of dangerous protectionism; but he still refuses to make the connection between the huge Federal budget deficits and the loss of America's competitiveness.

The political force behind protectionism is formidable. The imminent threat is a bill to erect stiff quota barriers against *foreign-made clothing* and fabrics. More than half the members of Congress are signed up as co-sponsors, and despite the Administration's active opposition they have now been joined by the Senate majority leader, Bob Dole. The President's *veto is* virtually certain, and it may stick. But 300 other protectionist measures lie in the same hopper. All are inspired by the spreading anxiety about surging imports and sluggish exports.

The toll in jobs is heavy in some areas and widespread enough to make foreign competition an issue in all sections. As Mr. Reagan points out, the losses have been more than offset by the steady creation of new jobs in other businesses. But that is small consolation to the communities savaged by layoffs. And their distress will not be quelled by free-trade lectures and a Maginot Line of vetoes.

Finally roused to the danger, the Administration is patching together a long-overdue trade policy that promises more vigorous promotion of exports and defense against unfair trade practices. In this respect, Mr. Reagan's basic instincts are commendable. In opposing new barriers, he rightly declares, "There are no winners in a trade war; only losers." And despite some lapses from this philosophy he has resisted a good deal of pressure, notably last month when he rejected a recommendation from the United States International Trade Commission to strike hard at shoe imports.

To head off other barriers, the President then proposed a new attack on restrictive trade practices by four key trading partners. And hastily, the Administration has promised still other measures, including a $300 million "war chest" for export subsidies, which it had scorned only a few months ago.

This rush to the trenches cannot compensate for the long neglect of the many warnings that the budget deficits and high price of the dollar were producing a firestorm of protectionism. Huge Federal borrowing has kept interest rates high and promises to keep them high through the decade. This has attracted a heavy flow of foreign capital into dollar investments and made the dollar yet more valuable, raising the price of all American goods to uncompetitive levels and making imports ever more attractive.

Though it was clear for years that curbing the deficits required cuts in the military buildup or higher taxes, and probably both, Mr. Reagan stood rigid. And even now he refuses to make the vital connection between deficit-cutting and the defense of America's trade and jobs.

Congress's responses are wrong, but the anxieties from which they spring are real. It is never too late to get at the core of the problem and to cut more, much more, from the deficit this year. The fastest, fairest way is with higher taxes, on gasoline if not incomes. The nation can choose the pain by which to restore the balance of its economy, but there's no trade policy worthy of the name without the pain of deficit reduction.

[From the New York Times, Sept. 24, 1985]

WEAKENING THE DOLLAR IS NOT ENOUGH

President Reagan has belatedly recognized that protectionist sentiment in Congress may be stronger than his veto power. Shoring up the veto is the purpose of his new attacks against the high-priced dollar and unfair foreign competition. Both efforts mark a change of policy. Both can be helpful. Both continue to address symptoms rather than causes of America's painful trade imbalance and loss of manufacturing jobs.

Congress is poised to vote for tight quotas on textile and clothing imports. Close behind wait 300 other bills, a major one of which would levy extra tariffs on *all* imports from countries that sell us substantially more than they buy from us—notably Japan.

Mr. Reagan valiantly resists this protectionism as damaging to trade and growth the world over. But if he wants his vetos sustained, he needs to persuade a third of the legislators that he is acting forcefully to make American industry more competitive. That explains Sunday's extraordinary five-nation ministerial conference about the dollar and yesterday's proposals to strike at unfair foreign trade practices.

An effort to weaken the dollar is the more promising response, but if it helps at all it will not be soon. Attacking unfair trade practices is certainly justified, but will also draw attention to America's restrictions. And it's unlikely to reduce the $150 billion trade deficit by more than 2 or 3 percent, if that.

As for subsidizing exports from a new $300 million "war chest," that's a game many nations can play, and do. Joining in, Mr. Reagan now proposes to breathe new life into the Export-Import Bank, an agency he sought to abolish on the persuasive ground that it mostly helped only a few big American companies.

The major policy shift is the apparent willingness to intervene in international currency markets. The Administration had stoutly insisted that the dollar's high value was a compliment to America. Now it has agreed to join with Japan, West Germany, Britian and France to try to lower the dollar's cost in other currencies. The allies promise again to stimulate consumption, Mr. Reagan again promises to cut his budget deficit, and all are expected to sell off dollars to make them cheaper.

How does that help Americans to sell more and import less? In theory and in time, it can. The high price of the dollar made foreign goods cheaper for Americans while making American goods more expensive abroad. It's not certain that maneuvers in currency markets can have more than temporary effect. Even if they do, it will be many months before imports decline and exports increase.

All this, in any case, falls short of addressing the underlying problem of America's budget deficit. The Administration denies it, but most economists believe that the huge Federal borrowing of the past four years kept interest rates abnormally high, attracting a tremendous flow of foreign capital into dollar investments and pushing up the dollar's value. If that is right—and we think it is—any new attack on the dollar without deficit reduction may actually raise America's interest rates.

Until the President and Congress attack the budget deficit, by cutting spending and raising some taxes, their tilting at trade imbalances will not suffice, or protect them from the wrath of hard-hit American industries.

[From the Washington Post, Sept. 29, 1985]

SECOND THOUGHTS ABOUT TEXTILES

The textile bill seemed, a month ago, certain to sweep through Congress and easily overcome a presidential veto. It's a genuinely bad bill—fiercely protectionist, written to push imports far below present levels and to keep them there. But at first the idea was immensely popular. More than two thirds of the House and well over half the Senate signed on as cosponsors.

Lately the congressional enthusiasm for it has abated. In the Senate its managers have anxiously substituted a diluted version in an attempt to hold their uneasy supporters. The House Ways and Means Committee reported it only after its supporters staved off, by a margin of one vote, an amendment that would have substantially weakened it. The change in the atmosphere suggests that the meaning of this bill is becoming clearer.

The retail trade industry—department stores, clothing stores and so forth—have organized a vigorous campaign against it. True, it would save jobs at least temporarily in the American textile industry. It would also raise the prices of textiles and everything that is made from them. That would hurt sales in the stores. The retailers ask pointedly why jobs and profits should be protected in the textile factories at the cost of jobs and profits in the shopping malls.

The farmers have also begun to take an interest in the bill. China, for example, sells textiles to this country and buys substantial amounts of American grain. The Chinese have declared explicitly that if the United States interferes with their textiles, they will find other sources for their wheat. Some of the senators have been hearing from farmers, and that's why the revised draft of the Senate bill drops China from the list of countries that would bear the chief impact of the textile quotas.

Congress is also beginning to be aware of certain aspects of this bill that are not precisely economic but which ought to make any American uncomfortable. The textile restrictions would apply to Latin America, Africa and especially Asia. But Europe and Canada would not be affected. Rep. Sam Gibbons, the chairman of the House Trade subcommittee, has denounced it as a "white man's bill."

The imports come mostly into the inexpensive end of the market. Curbing them would mean that the price increases mainly hit the kinds of clothes bought by people who don't have a lot of money to spend. That's another kind of discrimination that deserves a little more thought than it's been given.

Despite its manifest defects, the bill will probably be passed in one form or another. President Reagan intends to veto it. The real struggle now is over votes to sustain the veto. That will require a change of some congressional minds but, on closer acquaintance with this bill, a good many minds are evidently changing.

[From the New York Times, Apr. 18, 1985]

TRADE DEFICIT: GOOD FIXES AND BAD

Each succeeding month brings news that our trade deficit is damaging the American economy. In 1982 Americans bought $36 billion more from the rest of the world than the nation sold in foreign markets. The trade deficit then jumped to $61 billion in 1983 and $108 billion in 1984. It's only a

matter of time before it hits a $150 billion annual rate.

These massive trade deficits are doing substantial damage to American firms that try to export or that must compete with imports from the rest of the world. Manufacturers have been particularly hard hit. Manufacturing imports are running at nearly twice their 1980 level, while manufacturing exports are basically unchanged. But industries as different from manufacturing as agriculture and timber are also suffering because of the deteriorating trade situation.

Congress has responded to the growing national anguish over trade in two quite different ways—one good and one bad. The potentially useful response has been to bear down harder on the job of reducing the future budget deficits. Most of the increase in the trade deficit since 1980 has been caused by the rising dollar, which in turn has been the result of the huge budget deficit. The currently projected budget deficits raise real interest rates in the United States and attract funds from the rest of the world. This has raised the dollar's real value in comparison to other currencies by more than 70 percent since 1980. And with American prices up 70 percent in comparison to our overseas competition, it's not surprising that our trade deficit has exploded.

The agreement recently reached between President Reagan and the Senate Republican leadership shows that the projected deficits can be reduced sharply in the years ahead if Congress is willing to face the politically difficult task of reducing spending in every major part of the budget. The Republican package would cut the projected 1988 deficit from $244 billion to $100 billion. More than one-third of the program cuts are in the defense budget. A wide range of domestic programs are temporarily frozen or phased out. Social Security cost-of-living increases are reduced in an ingenious plan that includes a minimum guaranteed increase and full protection against rising inflation. If this plan is enacted in anything like its current form, the result will be a significant decline in real interest rates, in the dollar and in our trade deficit.

The other more direct approach to limiting the trade deficit by an import surcharge is misguided and dangerous. The 20 percent tax on imports that has been proposed in Congress would immediately hurt American consumers and contribute to rising inflation. Moreover, a decreased demand for imports would reduce the demand for foreign currency and thereby actually cause the dollar to be strengthened further. As a result, American firms would find that they have an even harder time selling their products abroad. While American firms that compete with foreign products here at home would be able to raise their prices and profits, their gain would be more than offset by the losses experienced by American consumers and exporters.

The greater risk is that American tariff could easily provoke retaliation by foreign governments and initiate a trade war that would cause world trade to shrivel. The last major trade war, precipitated by our 1930 Hawley-Smoot tariff, was a key source of the downward spiral of economic activity that became the Great Depression. The risk of repeating that experience if far too great to be ignored.

The president was right when he let the so-called voluntary restraints on Japanese autos come to an end. As a result, American consumers will pay lower prices not only for Japanese cars but for American cars as well. The Japanese announcement that their auto exports to the United States will be allowed to rise by 25 percent means that the price decline will be substantial. This decline in auto prices is a boon to American consumers. Congress seems to have forgotten this when it voted overwhelmingly to instruct the president to take steps to offset the increased trade deficit.

Moreover, Congress was wrong to assume that an increased import of Japanese cars will raise our total trade deficit. The increased sale of Japanese cars to the United States will raise the value of the yen and lower the value of the dollar. The more competitive dollar will make it easier for U.S. firms to export and will reduce the attractiveness of other foreign products in U.S. markets. Since our trade deficit is essentially a reflection of the capital inflow from the rest of the world, the increased sale of Japanese cars in the United States will change the composition of our trade deficit but will have very little effect on its total size.

Congress is reacting more out of anger and frustration than on the basis of economic logic. But the Japanese should understand that the true basis of this frustration is the sense that Japan as a government and as a people are being unfair in their support of policies that restrict American products from Japanese markets. If the international trading system is to continue to flourish and to bring benefits to consumers throughout the world, the Japanese must truly open their markets to foreign products.

[From the Tri-City Herald, Sept. 24, 1985]

ANOTHER TRADE WAR?

Sen. Dan Evans, R-Wash. is on solid ground in opposing the Textile and Apparel Trade Enforcement Act now before the Senate Finance Subcommittee.

The bill proposes high tariff protection for the clothing industry.

Mr. Evans called the legislation a sham and said that instead of helping "it would cost the American consumer dearly and burden the government with additional expenditures."

He said the bill "blatantly discriminates against our Asian trading partners" and would set "a gruesome precedent by singling out an industry which already is well protected for further preferential treatment."

The Reagan Administration estimates the tariff, if enacted, would cost American consumers $14 billion a year, driving up clothing prices 20 percent or more.

Enactment of the textile tariff would increase the presure on Congress from other industries clamoring for protection from foreign imports. About 300 protectionist bills have been introduced in the past few months.

Members of Congress say they found during their August vacation that loss of jobs to foreign competitors is a growing concern in many parts of the country.

Some political analysts fear a repeat of the protectionist fever that prompted Congress to pass the notorious Smoot-Hawley Tariff Act in 1930. That folly started as relief for the farmers. But relief for almost every important industry was piled on and in two years American foreign trade dropped about 60 percent.

Most economists believe the Smoot-Hawley tariff wall, and the trade walls other countries erected in retaliation, deepened and prolonged the Great Depression. Everyone lost that trade war. Now we seem intent on starting a new one.

Mr. Evans warned that "we are flirting with a real and serious risk of retaliation against U.S. products." "Let's not kid ourselves," he said, "we are not the only supplier in the world for products to these countries."

He said to pass the textile tariff would "shoot ourselves in the foot" while doing nothing to solve the real problem, which he wisely identifies as "our high budget deficit, the high value of the dollar and greater international competition." He advised that Congress concentrate on the deficits, "the biggest single factor in the imbalance of trade," and stop "wasting time on bogus bills that look like easy solutions (but) do more harm than good to the American consumer in the long run."

It's good advice.

Mr. EVANS. I would like to then close by reading a short editorial.

(From Wilmington, NC, Morning Star, Sept. 17, 1985)

PROTECTION WE DON'T NEED

North Carolina's textile industry is in bad shape. But what is good for the textile industry might not be good for the country, or even for North Carolina. Protecting textile jobs by restricting imports would lead to the loss of jobs in other industries.

If foreigners can't sell us what they produce, they won't have the dollars to buy what we produce. And if we won't let foreigners sell here, they will retaliate by refusing to let us sell there.

If we keep out foreign sports shirts and cars, foreigners can keep out American soybeans and timber. We will have saved some jobs, lost others, and driven up prices for consumers. We also may have antagonized and weakened our anti-communist friends in developing countries—particularly Asian ones.

To be sure, our trading partners don't always play fair in international trade. Some countries offer various kinds of help to favored industries.

But so does the United States. We protect or subsidize, among other things, sugar, ships, dairy products, military equipment and, yes, textiles. The average American tariff (tax) on textile imports is 22 percent, compared with an average of 5 percent for all other types of imports.

Yet the textile industry is clamoring for *more* protection that would cut imports by perhaps 30 percent. You can imagine what that would do to clothing prices. You can imagine what that would do to retailers.

But the textile industry has found some powerful friends: the Democrats. They know a hot issue when they see one, and they have decided to hang this one around the neck of Ronald Reagan.

Even many Republicans—Gov. Jim Martin and Sen. Jesse Helms among them—are reluctant to be seen as "against protecting American jobs."

So the textile protection bill appears to be a cinch to pass Congress. President Reagan vows to veto it. That would hurt him here in North Carolina and in other textile states. But Reagan is right.

Passing protectionist legislation is like jumping out of a burning skyscraper: The relief you feel doesn't last very long.

Mr. President, you might guess that that editorial would come from the Seattle Times or the Portland Oregonian, but, Mr. President, this is an edito-

rial dated September 17, 1985, from the Wilmington, NC, Morning Star.

The PRESIDING OFFICER. The Senator from Maine.

Mr. MITCHELL. Mr. President, I will yield briefly to the Senator from Virginia.

Mr. TRIBLE. I thank the Senator for yielding.

Mr. President, I rise in support of this amendment.

Mr. President, the textile and apparel industry provides employment for 2 million Americans—that is 1 out of every 10 manufacturing jobs. In Virginia the textile industry employs 76,000 people. Nationally, more people and more families depend on the textile-apparel industry than steel and autos combined.

Today our Nation is awash in a sea of foreign-made textile and apparel goods. Fifty percent of all textile and apparel goods sold in the United States today are made abroad. During the last 4 years our domestic market has grown at a rate of 1 to 1.5 percent each year and textile imports have exploded at an average rate of 19 percent per year.

Now our textile and apparel industry has responded to this challenge. Just this week, I toured the facilities of Dan River, Inc., in Danville, VA—one of America's finest textile companies. Dan River has a highly productive work force and state of the art equipment. Indeed, all across America management and labor have responded positively to the foreign challenge. Productivity gains greatly exceed the national average. Wage rates have been held to 75 percent of the national average for all manufacturing jobs. Nevertheless, imports saturate our market.

American enterprise cannot compete successfully with foreign governments like the People's Republic of China or against textile products heavily supported by foreign countries. Routinely, foreign textile products benefit from low-interest, subsidized loans, currency manipulation, high tariffs, and, of course, from lower wage rates. The average textile wage in the People's Republic of China is 16 cents per hour.

The truth is that international trade is neither free nor fair. We have to recognize that reality and deal with it. We must demand access to foreign markets for American products—textiles and apparel, tobacco, high technology, and all products made in the United States of America.

America must also take responsible action to retain its industrial base. A great nation must be able to build ships and produce steel and shoes and textile products. Smokestacks mean jobs and provide the use for our high technology.

The textile industry is not the only industry threatened by unfair foreign competition. Our footwear industry—as the International Trade Commission confirmed—is severely injured by foreign competition.

As a result of unfair competition, more than 500 plants have closed since 1968 and the market share of imported footwear has risen from 51 percent in 1981 to 77 percent today. Think of it, more than three out of every four pair of shoes sold in this country are imported,

The reason for this massive share of the American market is obvious. Because of the relative ease of producing shoes, many less developed countries use their shoe industry as a means to industrialize.

And then what do these nations do? They erect tariff and nontariff barriers to protect their fledgling shoe industries. Shoes, in other words, become instruments of national economic policy for many nations.

The time has come for the United States to respond in kind. The only solution now available to us is to limit our markets. The shoe manufacturing in Lynchburg cannot compete with foreign governments—and should not be expected to.

It is time to respond selectively and judiciously to the realities of the international marketplace. The actions contemplated by this amendment are absolutely consistent with international agreements and the findings of the International Trade Commission.

There is something very wrong with a trade policy that jeopardizes the jobs and well-being of millions of Americans. The truth is that today we have no policy but have simply surrendered to predatory international trade practices. It is time to fight for jobs in America. It is time to fight for those good people and families that depend on the textile and footwear industries for their livelihood, and it is time to put the world on notice that international trade must be fair.

Mr. MITCHELL. Mr. President, the record setting trade deficits of the last several years have finally forced our Nation to begin the debate over trade policy. This Senate floor action has become part of that national debate because the realities of the trading world have overtaken the normal process of developing a consensus and formulating policy.

We have before us a proposal to respond to one part of our trade problem by enforcing the multi-fiber arrangement which controls the growth of textile and apparel imports, and to provide, through legislation, the relief that our footwear industry was denied by a lack of administration action.

The proposal before us, therefore, addresses two primary manufacturing sectors—the two which have suffered the most from import surges in the past 5 years.

But we should not overlook the fact that 15 of our 20 basic manufacturing industries have trade deficits at the present time.

That is in large part due to a lack of aggressive action by our Government to enforce its rhetorical commitment to free trade.

The trade laws written by Congress have never been intended to permit unfettered access to our markets by the products of all nations without reciprocal treatment for our products.

The trade laws written by Congress have, in fact, contemplated that the effective threat of retaliatory action by our Nation would be a lever in moving other governments toward the goal of free trade.

But that has not been the case in the last 5 years.

For 5 years, while this administration has pursued a rhetoric of free trade, other nations—our trading partners—have pursued highly effective strategies to close their borders to imports; to limit the access that American goods have to their consumers; and to develop, protect, and enhance industrial sectors whose only purpose is to exploit the U.S. market.

The results of this highly successful effort on the part of our trading partners can be read in the rising tide of trade deficits that now threatens to swamp our manufacturing sector. They can be read in the jobs lost and the new jobs forfeited in textile manufacturing, apparel, footwear, and a host of other industries. They can be read in the fact that our Nation has, for the first time since the First World War, become a net debtor nation, meaning that the value of all our goods, all our services and a half century and more of American investments all over the world do not now suffice to offset the cost of our current consumption of imported manufactured goods.

Yet, despite the very clear and very direct evidence that the world trade situation has deteriorated, the principal response of this administration has been to claim that free trade is good and protectionism is bad.

Not only do such truisms mock the men and women whose jobs have been lost, they betray a lamentable lack of understanding of the most elementary facts about world trade today.

We do not face today, as the administration would like to believe, an international free trade regime that is threatened by unilateral and unwarranted protectionism from the U.S. Congress.

If we ever, in fact, had such a world, it has long vanished.

The reality of today's trading world is that governments—not private enterprise, or multinational corporations, or consortiums of industries—but governments all over the developed and developing world are running trade policies whose goals are to pro-

tect and preserve their domestic industries and to develop manufacturing sectors that can take advantage of the U.S. market.

In a hearing last month, I made reference to the sheer volume of such government actions, and it is a reference that bears repetition.

The Department of Commerce has published a report which takes 249 pages to simply list all the restrictions other nations have developed against the import of U.S. textiles. They range from prohibitive tariff structures, to licensing requirements which must be approved by domestic competitors, to outright import prohibitions.

Another volume prepared for the Fiber, Fabric & Apparel Coalition for Trade examines in detail the subsidies and market barriers that almost every nation in the world uses to protect its textile and apparel industries.

While our administration lectures the Congress about the importance of free trade, every other nation—and virtually all our trading partners—pursue policies that are the antithesis of free trade.

And some of the nations which have made the loudest objections to this legislation have the worst, most protectionist policies. They threaten retaliation even as they adopt more subsidies for their industry and more barriers against our products.

On July 16, the Journal of Commerce reported that "the Government of China, in a letter to U.S. Trade Representative Clayton Yeutter, * * * condemned efforts in Congress to impose tighter curbs on textile and apparel imports." And on the same day, in the same paper, an article appeared entitled "Chinese Effect New Import Taxes." That article reported that on top of existing tariff and nontariff restrictions, the Chinese were announcing additional import taxes to reduce imports on a variety of products. According to the article, the new import taxes would apply to certain textile articles including polyester yarn and synthetic fabrics.

Let me repeat this: The same day the Chinese Government threatens the USTR over this textile/apparel legislation, it imposes new import taxes on United States textile and fiber products.

And that is only a small part of this picture.

Korea is one of the largest exporters of textile, apparel, and footwear products into the United States.

What are Korea's policies toward United States imports?

According to the Department of Commerce, Korea imposes four different types of import taxes—a national defense surtax, a value-added tax, a special consumption tax, and a special charge. And then Korea requires a prior import guarantee deposit.

That amounts to a great many taxes. But surprisingly enough, those taxes don't really make much difference because if an American textile company wants to export to Korea it has to get the approval of the Korean textile association. And the United States product can be kept out simply on the grounds that it can be produced in Korea, whether or not it actually is produced there. I am sure the U.S. textile industry would love to be in a position of approving all import licenses on textile products.

Another leading importer of textile and apparel products into the United States is Taiwan. It has similar controls on textile imports through a licensing system, in addition to an ad valorem duty averaging 51 percent.

Brazil imposes five different import taxes in addition to temporary tariffs ranging up to 205 percent. Most goods may simply not be imported at all if similar goods are manufactured in Brazil.

But in the unlikely event that a United States made product does slip through the maze of import restrictions, Brazil imposes a special tariff on United States textiles and garments at a rate that is 100 percent above the rates assessed for all other countries.

A depressingly similar range of barriers faces American-made footwear. The notorious case of Panama, which has a worldwide quota for all footwear imports of 12 pairs is too well known to belabor.

Japan is another example. It imposes strict quotas on almost all leather related products including a limitation of 1 million imports per year. Japan, incidentally, has also experienced a recent increase in textile and apparel imports. In contrast to the prolonged anxiety in this Nation, the reaction of the Japanese Government to this import surge was quick and to the point. Through administrative action and Government directives to importers, the Japanese just recently moved to restrict textile imports from China, South Korea, Taiwan, and Pakistan. This action occurs while Japan runs record trade surpluses and within 2 months of the much publicized "action program" to encourage imports.

And in the face of such a world reality, our President continues to berate the Congress for the dangers that congressional action pose to free trade.

In reality, there is no free trade and there has not been free trade in the field of textile, apparel, and footwear for decades. It is only our Nation that continues to operate as though there were.

It is only our Government that refuses to recognize that American workers need help, and that American industry is as deserving of protection as the industries of other nations.

But the President's firm position has been to encourage the surge of imports because he believes they help hold down inflation. What he does not acknowledge is that whatever help imports may be in holding down inflation is obtained at a hidden cost—a hidden cost on American consumers—in terms of lost jobs, higher unemployment costs, lost production capacity, and lost future production and future economic growth.

The administration which has presided over the return of our Nation to a debtor status despite half a century of accumulated American investment here and abroad has imposed an enormous hidden tax on the future of our Nation.

That hidden tax will be paid in the form of lower living standards, as our children labor to pay the debts that are being accumulated today. That hidden tax will be paid in the continuation of the drift from well-paid, secure manufacturing jobs on which families can rely to lower paid work in other fields, where such work is available. That hidden tax will be paid in the continued need to send abroad the products of American labor in order to pay the bills we are running up right now.

The debate over this amendment is not a debate between free trade and protectionism.

It is a debate over the future of our manufacturing industries. Although this amendment goes directly to two principal sectors, our actions here have the potential for a far wider impact.

For if our trading partners see that we fail to take even the most elementary and modest steps to preserve two particularly threatened American industries—and the measure before us is a modest one—they will see that we do not have the will to preserve any part of our manufacturing base.

The measure before us does not seek to return American import levels to those of the Great Depression, as the President tried to imply the other evening. It does not even go so far to restrict imports as our products face in foreign markets.

It would not result in an immediate doubling of all consumer prices because the retail markup on imported textiles, apparel, and footwear is already sufficiently high that consumers are not seeing the benefit of cheap imports. What our consumers enjoy—and what they would continue to enjoy under this measure—is the vibrant competition that exists within the American textile, apparel, and footwear manufacturing sector that acts to hold down prices.

It is misleading in the extreme to characterize this measure as one that would force retailers to raise prices. It is commonly known that the retail

markup on domestic production—the so-called keystone markup—of 100 percent is doubled and even tripled on imported products.

In fact, the misleading rhetoric about this measure does not even acknowledge that it would permit imports to grow along with growth in our domestic market.

Nothing could be more reasonable than to permit expansion of imports along with expansion of the market to consume those imports. That is what this measure permits.

But it is nonetheless being characterized as though it would slam the door to all imports immediately and deny consumers the price advantages and choices to which they have become accustomed.

This debate is not a debate over free trade versus protectionism, not only because tariffs and import barriers in other nations prevent free trade, although they do.

It is not such a debate because the free enterprise system on which our Nation depends is a rarity in today's world, not the norm.

Our major trade competitors in textile and apparel products heavily subsidize their exports. They subsidize production for sale overseas. They provide special tax treatment for export production. In myriad ways, the governments of our trading partners manipulate and manage their industry in a way totally unknown in this country.

According to trade expert Alan Wolff, "global textile and apparel trade is tightly managed by virtually all foreign governments." Many lesser developed countries have designated textiles, apparel, and footwear as "export strategy" industries entitled to financial incentives and export subsidies.

To this known fact, the European Community has responded by adopting and enforcing stringent restrictions on imports in these fields. Japan has done likewise. Only our Nation, beguiled by the repetitive free trade mantra, has refused to do so. The entirely predictable result is that U.S. imports have accounted for almost all the growth in world textile and apparel trade, especially in the last 5 years.

U.S. per capita imports of clothing from the lesser developed countries has doubled since 1980; today, we import the equivalent of $56.63 for every man, woman, and child in the United States.

The corresponding European Community figure is $18.47. What is more interesting is that this level has actually shown a decline in the past 5 years, even though world production has grown during that period.

Japan's per capita consumption of these imports from lesser developed nations stands at $10.39 per capita. So our imports of clothing from the developing nations are five times the level of imports by Japan and three times the per capita level of imports by Europe.

The only conclusion to draw is that we in the United States are a bunch of suckers. Our competitors heavily subsidize and protect their textile and apparel industries. Meanwhile we wring our hands for months over legislation designed simply to enforce existing trade agreements governing textile and apparel trade.

In the face of the world trading realities, we are offered rhetoric and platitudes by our Government. Today, the administration is again pledging strong and aggressive action against unfair trade practices.

The same promise was made in 1984. Yet this year's import levels in both textiles and shoes have set new records over last year's. And last year's set records over the year before.

Just how much longer can we afford to respond to effective Government policies that hurt us with rhetoric and platitudes? Yet that is the sum total of this administration's trade policy as it has worked to date.

It is not good enough. Our people deserve better. Our industry deserves better. This measure that is before us today is one small step in making good on those repeated and unkept administration promises. I urge my colleagues to support it.

I ask unanimous consent to have printed in the RECORD articles from the Journal of Commerce and the Far Eastern Economic Review.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

CHINESE PRESIDENT LI WILL MEET REAGAN AS NUCLEAR PACT NEARS, TRADE WOES LOOM

(By Eduardo Lachica and Amanda Bennett)

While the major focus of Chinese President Li Xiannian's visit to Washington next week will be the completion of a long-stalled nuclear cooperation pact, an emerging trade problem may be more difficult to resolve.

In recent months, U.S. companies have become concerned about delays in Chinese orders for Western goods as Peking has reviewed its economic strategy.

The situation apparently isn't as tense as in 1980-81, when China scaled back its development goals and canceled or postponed billions of dollars in contracts. U.S. exports to China did well in the January-April period, up 34% from the year before, to $1.05 billion.

But if the current slowdown in orders continues, U.S. exports could falter later this year. Japan also could be hurt, since its consumer electronics products are a major target for cutbacks.

The State Department isn't sure whether the decrease in orders could be prudently brought up as a summit issue. Chinese officials have advised U.S. diplomats that they simply are being "prudent and cautious" about spending hard currency. But they didn't want to go any further into something that they consider a purely internal affair.

PLUNGE IN RESERVES

U.S. traders, however, ascribe the partial freeze in buying to a Chinese effort to halt a rapid drawdown of foreign-exchange reserves.

The International Monetary Fund reports that these reserves shrank to $11.9 billion in March from a peak of $17.3 billion in September 1984, but some analysts believe this pool could have more recently dropped below $10 billion. One Chinese investment manager explains the cutbacks in orders from the U.S. by saying, "Unless we watch our dollars China could become another Argentina."

Chinese officials continue to emphasize that they will need American capital goods over the long haul. The completion of the nuclear pact would open the possibility of large sales to China by allowing Westinghouse Electric Corp. and other U.S. suppliers to bid for some other estimated $10 billion to $20 billion in Chinese nuclear power projects over the next 15 years.

The nuclear agreement requires the endorsement of Congress, which is more disposed toward approval than in the spring of 1984, when the administration had to withdraw it from consideration. Rep. Don Bonder (D., Wash.), chairman of the House Foreign Affairs Committee panel on international economic policy, is leaning towards House approval in the interest of furthering U.S.-China trade.

SHARPER SCRUTINY IN SENATE

It's in the Senate where the treaty could receive the sharpest scrutiny. Last year Sen. William Proxmire (D., Wis.) and Sen. Alan Cranston (D., Calif.) used the accord as a peg to examine the administration's commitment to nuclear nonproliferation goals and found it wanting. Their arguments were supported by intelligence reports that China had aided Pakistan in obtaining sensitive bomb-making technology.

In his latest talks with Vice Premier Li Peng—no relation to the Chinese president—Ambassador Richard Kennedy, a U.S. special envoy on nuclear affairs, appears to have obtained further assurances that China's record would withstand congressional examination.

Otherwise, the circumstances of the state visit aren't the best for problem-solving at the highest level. The While House says President Reagan will hold only a brief meeting with President Li Tuesday before Mr. Reagan flies to his California home to complete his recovery from a cancer operation. Mr. Li, 76, years old, is even older than Mr. Reagan, 74, so U.S. officials expect Vice Premier Li, 56, to carry much of the load during the visit.

In fact, U.S. officials see the visit as an occasion to help cultivate Vice Premier Li, a Soviet-trained technocrat who wields considerable power, especially in the areas of energy and technology. "Li Peng is clearly one of the men of the future" and could influence U.S.-China relations for years to come, says a senior U.S. diplomat.

[From the Journal of Commerce, July 16, 1985]

CHINESE EFFECT NEW IMPORT TAXES

(By P.T. Bangsberg)

HONG KONG—China imposed new import taxes in an effort to curb what officials call "blind" purchasing and to conserve foreign reserves.

A circular from the State Council, the day-to-day governing body, did not state the amount of the levy.

It applies to cars, motorcycles, mini-buses and off-road vehicles, video cassette recorders, large-screen color television projection sets, mini-computers and peripherals, processed polyester yarn, synthetic chemical fabrics and other, unspecified items.

The new taxes, which took effect Monday, also apply in the four special economic zones and Hainan Island, another developing area, the circular said. The SEZs were created especially to attract foreign investment with a variety of tax and other incentives and a relaxation of bureaucratic controls.

The circular said the taxes were being imposed because "some localities and units had imported in a blind way commodities with big price differentials. This had an unfavorable impact on domestic economic development."

The new levies are in addition to existing customs and other imposts and are likely to rankle with foreign investors.

Some overseas companies already complain about the lack of access to the domestic market—which they thought they had been promised—and about the high cost of doing business, particularly accommodation in major cities.

China's foreign reserves have dwindled due to the buying spree, especially of consumer goods. Figures published last week showed a 30 percent fall to $11.3 billion in the six months to March 31, from $16.3 billion. Overseas debt rose in the same period from $3.7 billion to $3.9 billion, according to the People's Bank of China, the central bank.

Hu Yaobang, head of the communist party, told a pro-Peking newspaper in Hong Kong last week that China would slow the pace of its economic growth over the next five years "to concentrate on efficiency and management."

In a meeting in Peking on Monday with the visiting prime minister of Trindad and Tabago, George Michael Chambers, Supreme Leader Deng Xiaoping nevertheless expressed confidence that China's economic reforms would be successful.

The reforms and the policy of opening to the outside world were an important test, he said. "We must pass this test. If we do not persevere, it will be impossible for us to attain our strategic objective of economic development," he said.

Mr. Deng, who has spearheaded the reforms, said there would be "twists and turns and even mistakes of various degrees," but that China would correct them.

He went out of his way to reiterate that the "experiment" with special economic zones was correct, though there were problems to be solved on imports of foreign technology and earning of foreign exchange through exports.

Diplomatic sources in Peking, however, say China plans to curtail the number of coastal cities open to foreign investment because of problems with their development.

[From the Far Eastern Economic Review, Sept. 12, 1985]

JAPAN TO THE BARRICADES—TOKYO EXERTS SUBTLE PRESSURE TO SLOW TEXTILES INFLOWS

(By Bruce Roscoe)

Within two months of announcing its market-opening "action programme" aimed at easing US complaints against its import barriers the Japanese Government is implementing a series of measures designed to restrict surging textiles imports from China, South Korea, Taiwan and Pakistan.

Japan has not decided at this stage to invoke formally provisions of the Multi-Fibre Arrangement (MFA), which under the General Agreement on Tariffs and Trade permits developed nations to limit growth in their imports of textiles from developing nations to 6% a year. Instead, the import restrictions will be in form of "administrative guidance" given to textiles importers by the Ministry of International Trade and Industry (Miti). The ruling Liberal Democratic Party (LDP) also has put pressure on trading companies to cut textiles imports.

The measures, in effect, amount to Japan's version of the US' Jenkins Bill. (Drafted by Ed Jenkins, who chairs the US House of Representatives textiles committee, the Jenkins Bill is intended to reduce drastically US imports of textiles from developing nations.) But while the Jenkins Bill has attracted widespread publicity, Japan's measures, because of their lack of transparency, seem to have gone unnoticed.

In 1984, Japan's imports of cotton yarn and cotton fabrics from China, Pakistan and South Korea grew by about 50%, while imports of knitwear from China, South Korea and Taiwan rose by 60%. Pakistan, whose cotton-yarn exports to Japan jumped 69.4% in January–June this year, worries the Japan Cotton and Staple Fibre Weavers' Association most.

Led by the Japan Textile Federation, several industry associations have exerted pressure on the government to limit imports. Earlier this year, the textiles federation argued for invocation of the MFA. But Miti opposed this on the grounds that Japan could not be seen to be restricting imports when Prime Minister Nakasone had committed the nation to trade liberalisation. Some Miti officials also noted that a case for invoking the MFA would be weakened by the fact that many Japanese spinning companies recorded an increase in profits for the year ended 31 March. Japan has not applied the MFA before—the US, on the other hand, has applied the MFA against Japan on about 18 textiles items.

Nonetheless, the industry's lobby was strong enough to persuade Miti to exempt cotton yarn, cotton fabrics and knitwear from the July tariff reductions, which formed a part of Nakasone's import-action programme.

Undaunted by Miti's cool reception to the idea of using the MFA, the federation took its case to the LDP's special committee on textiles. At a meeting on 4 June the LDP committee sided with the Japanese industry, and produced a statement advising Miti that Japan was within its rights to invoke the MFA. This statement also advised the ministry to "make efforts" to protect the local textiles industry from imports.

On 29 August, the LDP committee met in Tokyo to finalise the protective measures. According to a participant of the meeting, committee members said that on 28 August they had approached several trading houses to request that textiles imports be conducted in an "orderly" manner—in Japanese, "orderly" or chitsujo is often used euphemistically to denote informally restricted marketing or improving.

The committee further decided to ask the Ministry of Finance to appropriate an emergency fund from this year's budget of Y5 billion (US$21 million) which would be distributed as low-interest loans to small and medium-size textiles companies to enhance their competitiveness. The size of a single loan would be set at Y30 million, and interest would be 5% a year. The loan programme was to be launched by 1 October at the earliest.

Yoshibumi Muto, who chaired the LDP meeting, later was reported as saying: "There is no difficulty in invoking the MFA within the current mood of promoting liberalisation of Japan's markets. If orderly importing does not produce results, we will invoke the MFA, and if imports of cotton yarn from Pakistan continue to increase at crazy levels, we will adopt tough measures.

The textiles federation, in papers * * * says a Miti official, "We are not telling them they cannot sell more. We just want them to slow down the growth in their exports." He said Pakistan was rejecting the request on grounds that last year its total trade with Japan was in deficit by U.S. $608.8 million, up from a deficit of U.S. $497.5 million in 1983.

Taiwan and South Korea, too, have been asked to restrain exports of knitwear, and Miti appears to be happy with the results so far. Imports of sweaters, for instance declined 12% in volume in the January-July period compared with the same period last year—in July alone, they fell by 15%.

While Miti has not said it will not seek to apply the MFA—some officials reportedly have referred to the MFA as Japan's "trump card" in the event administrative guidance fails—the ministry appears to recognize that invocation of the MFA would cast Japan in a dim international light. For one thing, Japan would the only country to take such action while enjoying a surplus in its overall textiles trade.

Mr. MITCHELL. Mr. President, I would like to discuss briefly the footwear portion of the legislation, then the textile portion, hopefully not to repeat what has been said earlier by others, and then I would like to comment on some of the assertions made here today by those who oppose this legislation.

The amendment proposed includes mandated quotas on the importation of foreign made, nonrubber footwear into the United States. It is the last resort for those who are concerned about the devastation of this American industry and the enormous loss of jobs and productive capacity associated with it.

This amendment, and the language establishing limits on textile imports, are not what Congress contemplated when the 1974 Trade Act was written. It is not the route that many of us would prefer to take.

But it is the only step remaining in the face of the President's decision not to enforce existing American trade laws. It is a step we are taking because we have no other choice.

The American footwear industry obeyed the letter and the spirit of our trade law. It carefully gathered evidence demonstrating that a massive dumping of worldwide overproduction of footwear was directly responsible for massive inroads into our domestic footwear market and the associated dislocation of domestic industry. The

loss of jobs, plant closings, community displacements, corporate bankruptcies have all flowed from the trade situation.

The industry did what the law requires be done. It collected data that demonstrates that three-fourths, over 75 percent, of the domestic market is now taken by imports. It collected data that demonstrates that the domestic industry can be competitive given a breathing space against these imports. It collected data that demonstrates that American jobs are being lost and American lives ruined by the pursuit of a trade policy inimical to American industry.

According to the law, it took that case to the properly constituted body, the International Trade Commission, and it persuaded the Commission on the evidence that injury to the domestic industry has resulted.

Under our trade law, the next step is the granting of relief to the injured industry, either in accord with the Commission's expert opinion, or in some other form at the discretion of the President.

The footwear industry did what the law requires. The International Trade Commission did what the law requires. The President did not. That is the root cause of why we are here today dealing with this legislation. If the footwear industry went through months and years of legal proceedings, spent hundreds of thousands of dollars under the law, and was summarily rejected by the President, why should the textile industry, or any other industry, follow the course established by law?

If an industry in which imports have reached 78 percent of the domestic market is unable to gain relief under the existing procedures of the law, why should any other industry follow the law and think they can gain relief? The hard reality is that President Reagan has unilaterally—unilaterally—declared the trade laws of this country to be a nullity, to have no force, no effect. The history of the past year demonstrates clearly that there are no circumstances, no economic circumstances, and no trade situation under which American trade law will provide relief to an adversely affected industry.

The Senator from Missouri [Mr. DANFORTH], the distinguished chairman of the Senate Subcommittee on Trade of the Committee on Finance, clearly, emphatically, and correctly described that situation today. That is why this action on footwear is necessary.

The amendment is a modest degree of restraint. What does it provide? It provides that imports will take no more than 60 percent of the domestic market. I challenge any Member of this body to stand up and describe, to name a single American industry that is prepared to accept 60 percent import penetration, even for a limited period of time. There is simply no factual basis on which to support the claims made in this body that this amendment constitutes a major blow to free trade in the world. In the area of footwear and most especially in textiles, there is not now and has not been for decades free trade in that sense.

The debate today by the opponents of this legislation mirrors the arguments made by the President, who seeks to persuade the American people that there are only two choices available to us: Either we have total free trade with no restrictions of any kind, or we have total protection with no trade of any kind. The reality of the world is different and our policy must reflect that reality.

Mr. President, I am not going to repeat the arguments made on textiles because the hour is late and a lot has been said, but I do want to make a few comments, particularly in light of the arguments made by some of the opponents of this legislation.

Concern earlier was expressed about China. On July 16 of this year, the Journal of Commerce reported that the Government of China, in a letter to the United States trade representative, condemned efforts to impose tighter curbs on textile and apparel exports. On the same day, in the same paper, a separate article appeared entitled "Chinese Effect New Import Taxes." The article reported that on top of existing tariff and nontariff restrictions, the Chinese had announced additional import taxes to reduce imports on a variety of products. According to the article, the new import taxes would apply to certain textile articles including polyester yarn and synthetic fabrics.

Let me repeat that: On the very same day that the Chinese Government protested an effort by this Congress regarding textile imports into this country, it imposed new import taxes on United States textile and fiber products that might go into that country. That is only a small part of the picture.

Concern earlier was expressed about Korea. What we are doing, it was asked, to Korea, described by one Senator as the American miracle of the Far East. Korea is one of the largest exporters of textile, apparel and footwear products into the United States. And what are Korea's policies toward United States products? According to the Department of Commerce, Korea imposes four different types of import taxes—a national defense surtax, a value-added tax, a special consumption tax, and a special charge. On top of those four taxes, Korea then requires a prior import guarantee deposit.

And surprisingly enough, even after all those taxes, Korea demands one more thing. That is, if an American textile company wants to sell its product there, if it is willing to pay the national defense surtax, if it is willing to pay the value-added tax, if it is willing to pay the special consumption tax, if it is willing to pay the special charge, if it is willing to make the prior import guarantee deposit, then it must get the approval of the Korean textile manufacturers association to sell its products in Korea.

Mr. HOLLINGS. Hear, hear.

Mr. MITCHELL. The manufacturers in Korea can then deny license approval to any American manufacturer and they can deny it even if that textile product is not made anywhere in Korea. That is, if it could be produced in Korea, whether or not it is produced, the license can be and ordinarily is denied by the Korean manufacturers association.

And here, today, Senators expressed concern, what are we doing to Korea. I say, what are we doing to the United States?

Another leading importer of textile and apparel products into the United States is Taiwan. Concern was expressed here about Taiwan—what are we doing to Taiwan? A list of their restrictions on American exports is similar and lengthy and I shall not repeat them all here. I shall simply ask the Senators who are unaware of it to take a look at this publication entitled "Foreign Regulations Affecting United States Textile And Apparel Exports," 251 pages of narrow, single-space type required just to list the restrictions that the other nations impose upon American textile products.

And U.S. Senators stand here and say, what are we doing to these other countries—when, as I say, the real question is, what are we doing to our own country?

Japan. So much has been heard about Japan. I shall try not to be repetitious, but I will point out that, first, Japan imposes strict quotas on almost all leather-related products, including a specific limitation on footwear of 1 million imports a year. Incidentally, Japan, like the United States, has also recently experienced an increase in textile and apparel imports. What have they done? Here we are debating, expressing anxiety about the effect on other countries, while the Japanese acted and acted swiftly. Just 2 weeks ago they took administrative action to limit textile and apparel imports. Then they issued Government directives to importers to restrict textile imports from China, South Korea, Taiwan, and Pakistan. That occurs at a time when Japan runs record trade surpluses and less than 2 months after it announced its much publicized "action program" to encourage imports.

Does anyone here today think that any member of the Japanese Diet stood up and said, "What are we doing to Taiwan? What are we doing to Korea? What are we doing to these other countries?" Of course they did not. While we wring our hands here, while we express fragile concerns, while we worry about the effects on workers in Korea, in Taiwan, and Hong Kong, millions more of American jobs are being lost.

I make two brief comments in closing about some of the arguments made today by opponents of this legislation. Earlier today one Senator stood up and said. "What are we doing? Unemployment is coming down, new jobs are being created." Since 1982, it was argued, unemployment has declined in America and 8 million jobs have been created.

Well, it just so happens that the year used for the base period, 1982, was the year in which unemployment reached the highest level in America in a half century. From 1940 to 1981, unemployment in the United States of America never once reached 9 percent. For almost the entire period of 1982, it was over 10 percent. So to say we have done well because unemployment has declined since 1982 reminds me of a case I once tried as a young prosecuting attorney. A man was charged with speeding at 75 miles an hour. When the officer stopped him, he said, "Why, officer, what are you talking about? I just slowed down by 25 miles an hour." He was going 100 miles an hour a little while earlier and protested against being charged with speeding at only 75 miles an hour.

Senators stand here and say what a brilliant record has been demonstrated in this country because unemployment has declined since 1982, not pointing out that in 1982 unemployment was the highest it has been in the United States in a half century.

In the decade of the 1960's unemployment in America averaged 4 percent. In the decade of the 1970's, it averaged 6 percent. Who among us will boast then of an unemployment rate of only about 7.5 percent and likely to average over 8 percent for the decade of the 1980's?

The real world requires more than just a choice between total free trade and total protection. It requires every nation to act out of intelligent self-interest. Every other trading nation has aggressively used the authority granted under the General Agreement on Tariff and Trade to protect their industries when suffering from swift surges of imports. Only the United States has failed to do so under an administration which has refused to pursue any trade policy other than the encouragement of massive imports in every sector of our economy. And let there be no mistake about it; that is the deliberate economic policy of this administration—not only to deny the erection of any barrier to imports but to encourage imports in every sector of the economy. The reason is simple and publicly stated by the administration. The President's singular economic and political achievement has been the control of inflation, and it is increasingly being achieved by a single mechanism alone—to encourage imports from whatever source, and take advantage of the depressing effect on prices in this country. It is a short-term gain at a massive long-term cost. Unless we begin to recognize that intelligent American self-interest requires us to take these limited, measured steps to protect our industries and American jobs in accordance with the dictates of American law, then, my colleagues, we will in the long run be causing this Nation very great harm.

I urge my colleagues to support this legislation. I yield the floor.

The PRESIDING OFFICER (Mr. GRASSLEY). The Senator from Washington is recognized.

Mr. GORTON. Mr. President, while this debate has been both relatively lengthy and considerably enlightening, at least two points have been mentioned only in passing if at best. The first of those points is, of course, that the bill with which we are dealing has nothing to do with quotas on either textiles or shoes. The Compact of Free Association is a matter of not only considerable importance but of great urgency, and it is for just that reason that the Senator from Idaho, the chairman of the committee which dealt with it, has been so impatiently waiting to attempt to get us back on that subject.

I am in agreement with him on that point. We should be considering that compact. We should be voting on that compact. We should deal with this issue, which is important, whatever side one takes on it, on its own merits and not as something which creates a crushing burden for an otherwise important proposition.

The second point, which it seems to me important to make at this stage in the debate, is that we are dealing primarily at least in this amendment with textiles, and textiles are already perhaps the most heavily protected of all major American industries. We already subject textile imports to an average tariff of some 22 percent, more than 4 times the average tariff for goods entering the United States. Four-fifths, roughly, of all textile imports are controlled by one form of quota or another.

The administration was persuaded as recently as last fall to tighten up its country of origin rules, and yet in spite of that protection we are now asked to provide additional, wide-ranging protection for this industry, even though it is clear—and for that matter hardly gainsaid—that the impact on other industries in the United States, on other forms of business in the United States, will be seriously adverse.

I want to make in passing one set of remarks expressing my admiration for the forcefulness and eloquence of the presentation of my own colleague from the State of Washington, and particularly to express my admiration for the distinguished Senator from Missouri [Mr. DANFORTH] who is obviously tugged in both directions by the issues which are contained in this bill but who at the same time in the finest tradition of this body feels it appropriate to deal with problems relating with trade in a constructive and in a straightforward fashion, one which will be to the benefit of the United States and is not designed only for one or two groups at the expense of others.

Finally, to remark also on the eloquence of my colleague from Texas, who so forcefully pointed out the impact this can have not only on the U.S. domestic economy but on many of our good friends and allies overseas. Each of them has pointed out that this bill is a direct violation of our solemnly undertaken international agreements in GATT and the MFA. I need not elaborate on that point except to say it is important for the Nation to take great care about potential violations of agreements into which it has solemnly entered. Others, the Senator from Texas with particular eloquence, pointed out the terrible discrimination inherent in this bill, which seems primarily to be aimed at some of our closest friends and allies. The Senator from Maine, I may say, in speaking on the other side of the issue, did point out with great eloquence a number of the limitations, the negative and wrongful limitations placed by the Republic of Korea on American textile imports. That might well justify legislation which was designed to remove those restrictions. It does not justify legislation which simply tells that Republic no matter what it does, its access to the American market will be totally and completely limited. Many Senators who have preceded me in this debate pointed out the great expense to the American people, all of whom are consumers of these textile and apparel goods and the questionable benefits resulting therefrom, the expense to the American consumer for each job saved.

I need not elaborate on that thinking. I must, however, point out, as did my own distinguished colleague from Washington, the potentially damaging effect on the agricultural sector of our economy, which is ripe for any kind of retaliation because it produces goods which are fungible, which are readily available elsewhere.

Markets which are already difficult for us to penetrate by reason of the high value of the dollar may well become much more difficult to penetrate should a bill such as this pass and should the form of retaliation take the course of simply purchasing those agricultural commodities from other nations which do not share our views on the protection of their textile industries.

The Senator from Missouri was right. We are dealing with a real issue here. This Nation cannot long survive $150 billion per year trade deficits. The Senator from Missouri was right when he pointed out that the administration's response to this very real challenge has been both weak and ineffective. While it has seemed to have sped up to a certain degree in the last few weeks, it is still marred by the kind of testimony which was presented on a House companion bill on telecommunications yesterday, which signals that we will talk big but take no action if other nations refuse to open their markets to us. That will be in the future, as it has been in the past, a serious mistake.

So the real challenge to us is not whether or not these trade deficits are important. They are. Every Member of this body agrees with that. The challenge to us is whether or not we attempt to deal with them by balancing down or balancing up.

That is to say, are we going to attempt to lower those trade deficits simply by closing American markets to competition by foreign producers, no matter how adverse the impact of that kind of action is on jobs for our people, or are we going to attempt to do so by balancing up—that is to say, by moving much more aggressively than in the past to see that foreign markets, whether they are in the Republic of Korea, Japan, the European Economic Community, or Latin America, are opened up to the United States and its producers on equal terms?

I am not yet convinced that the administration sees that as the emergent challenge which I believe it to be. I believe that the Congress of the United States can play a constructive role in legislation which urges or even requires the administration to take such action.

It is in that direction we should move—the opening up of more markets for Americans, whether they produce telecommunications equipment, wheat, soybeans, apparel, textiles, or any of a multitude of other commodities in this country—rather than to take the inevitable dead-end road of attempting to improve our economy by restricting our markets, with the inevitable effect that all Americans from all parts of this country will be hurt.

Mr. President, I expect that at some time in the immediate future, a motion to table this amendment will be presented. I urge my colleagues to support that motion, both because the amendment is a destructive and a negative one and because it is important that we pass the bill to which this amendment is attempted to be attached.

Mr. JOHNSTON. Mr. President, I rise in support of Senate Joint Resolution 77, which would approve the compact of free association. I would like to associate myself with the remarks made by the chairman of the committee, specifically with his description of the committee amendments and the reasons therefor. As the chairman noted, the history of U.S. administration of the trust territory and the negotiations is amply documented and that the most eloquent testimony in support of the compacts came from the peoples affected.

Mr. President, I have particular familiarity with the subject. My first assignment when I came to the Senate was as chairman of the Subcommittee on Territories of the then Committee on Interior and Insular Affairs. I have visited Micronesia, and in 1974 and 1975 I participated in and chaired the comprehensive oversight on public works programs in the trust territory which the Committee on Interior and Insular Affairs conducted. That oversight led to the establishment of the 5-year Capital Infrastructure Program which is only now reaching completion. Together with Senator MCCLURE and the then chairman of the committee, Senator Jackson, I participated in a series of oversight hearings which the committee conducted on the process of negotiations and together with Senator Jackson, Senator MCCLURE, and others floor managed House Joint Resolution 549, which approved the covenant to establish a Commonwealth of the Northern Mariana Islands.

Mr. President, one of the most eloquent statements given before the committee during our hearings on the compact was presented by John Mangefel, Governor of the State of Yap in the Federated States of Micronesia. One of the issues addressed by Governor Mangefel was any possible concern over whether the financial assistance provided for in the compact would be spent wisely. I think his answer is not only reassuring but also demonstrates that the confidence which we have in the future of this relationship is well placed. He stated:

If we do not spend the compact and our local funds wisely, we will be hurting ourselves. It is a well known fact that in the past, it was impossible to audit the Trust Territory. This was partly because of centralized control, partly because of changing Administrations, and partly through poor management and accounting practices. I for one have complained loudly about practices of past administrations. When administrators waste U.S. taxpayers money, they are also short changing Micronesians. We know that better than anybody, and you can be sure we will be careful with the money.

I ask unanimous consent that the entire statement by Governor Mangefel be placed in the RECORD at the conclusion of my remarks. His statement also indicates how important it is that we continue to provide technical assistance in financial management, program administration, and infrastructure maintenance.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. JOHNSTON. Mr. President, I think the Department of the Interior under Assistant Secretary Montoya has done an excellent job so far, although I wish the Office of Management and Budget would someday realize how important the investment in technical assistance is not only in future budget savings, but in the achievement of self-government and the welfare of the peoples concerned.

Mr. President, I want to add my strong endorsement to the amendments adopted by the committee and briefly touch on my reasons for supporting two of those amendments. I concur in the analysis provided by the chairman of the committee with respect to the continuation of authorization for various programs and the discretionary authority provided to the President to continue other Federal programs during a transition period. Of specific concern to me is the adoption of the new section 4 which makes it clear that Congress will be directly involved in any attempt to change, modify, alter, or terminate any provision of the compact or subsidiary agreements incorporated into the compact by reference or the two mutual security arrangements. The peace and security of the Pacific area lay at the heart of the designation of Micronesia as a strategic trusteeship and should not be subject to the whims of particular administrations. The security of the region is as important to the Micronesians, who have seen battles rage across their islands, as it is to the United States which fought those battles. The commitment made by the United States to protect and defend the Federated States of Micronesia and the Marshall Islands is as important as the financial assistance in permitting these Governments to develop and provide for future generations in peace. There is a tendency in all administrations to forget the constitutional role of the Congress in the formulation and conduct of U.S. policy and I believe section 4 is an important provision to guarantee the role of the Congress and the opportunity of the Micronesian governments to have their desires and concerns fully considered prior to any change, alteration,

modification, or termination of all or any part of the compact.

The second provision which I completely support is section 6 which places responsibility for the management of U.S. assistance to the freely associated states with the Secretary of the Interior. I participated in the hearing which the chairman referred to when Senator Jackson criticized the idea of placing the responsibility in the Department of State, and I concur wholeheartedly in the assessment by Senator Jackson and the concerns just expressed by the chairman of the committee. The record of the Department of the Interior is not without fault, and I have joined with the chairman of the committee in trying to correct those deficiencies. Despite this committee's efforts to enter into some dialog with the administration with respect to the future management of program and other assistance to Micronesia as well as the territories, the administration seems unwilling to discuss the issue. Last year, in a House hearing, the Department of State announced that its concept of post management relationship consisted in a:

> Two tiered interdepartmental body consisting of, first, a policy steering committee chaired by the Department of State . . . and second, an interdepartmental staff tailored to the requirements of the new relationship, attached to State for administrative support purposes and headed by State . . .

Of all the ill-considered and mischievous proposals which have surfaced, this is probably the worst. The original concept which Senator Jackson addressed would have been a simple transfer of authority from the Department of the Interior to the Department of State. That seemed to have been the administration's intention in submitting its fiscal year 1985 and fiscal year 1986 budget proposals, when funding was proposed under function 150 of the budget within the Department of State. Anyone familiar with the process of the foreign aid appropriations can guess what the possibilities would be for the Micronesians ever seeing any assistance from the Department of State, much less prompt attention to a situation such as the cholera epidemic in Truk or the leprosy outbreak in Ponape. In fact, the only significant efforts which the Department of State has made with respect to budgeting for Micronesia has been to seek funds for lavish residences for State Department employees, the cost of which exceeds the limited funding which the Office of Management and Budget has grudgingly agreed to for assistance to the Micronesian governments in the relocation of their capitals. I fully agree with the chairman of the committee that the proper provision of the financial, programmatic, and technical assistance contemplated under the compact, as well as the ability of the United States to respond in a timely fashion to any needs which might arise, has virtually nothing to do with the recognition of either the Federated States or the Marshall Islands as fully sovereign self-governing countries in free association with the United States. On the contrary, I would argue that the nature of the financial and other assistance lies at the heart of the relationship and it is as important to the United States as to the Micronesians that it be provided by agencies with the expertise, the knowledge, and the capability to provide such assistance. That is neither the role nor the mission of the Department of State. I would also note that the provision in section 6 providing that the Secretary of the Interior would appoint the resident representative for the United States in each of these areas is consistent with the answers which the administration provided to the questions posed by the committee during our May 1984 hearing. At that time, the committee inquired as to whether the resident representative would be involved in the provision of technical and other assistance, basically line agency functions, and who would appoint the representative. The administration responded that the resident representative would engage in line agency functions and would be appointed by the head of the new management office. Since it is not appropriate for the Department of State to undertake line agency functions, it is also consistent that the agency designated in the legislation appoint the resident representative. It would make little sense to assign the responsibility for the provision of line agency functions to one agency only to have the implementation of that assistance frustrated because the person on site was not responsible to the head of that agency.

Mr. President, I join with the chairman of the committee in offering my congratulations to the peoples of the Federated States of Micronesia and the Republic of the Marshall Islands and specifically to their elected representatives who came to Washington to testify in favor of the compact. Free association has been the desire of the Micronesian Governments since the beginning of the negotiations and was the recommendation of the Congress of Micronesia's Future Political Status Commission in 1969. I ask unanimous consent that the statement of intent from the July 1969 report be printed in the RECORD at the conclusion of my remarks. It is a remarkable statement and I believe demonstrates the friendship and trust with which the Micronesians enter into this relationship and I would like to assure them that it represents mine.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 2.)

Mr. JOHNSTON. Mr. President, I also join with the chairman, Senator MCCLURE, in endorsing this legislation as reported by the Committee on Energy and Natural Resources, and I urge its enactment.

Mr. President, I am for this bill. As a matter of fact, I am a coauthor of this bill, but I shall nevertheless vote to table. Very quickly, I will state why.

We have been working on the instant legislation, the Compact of Free Association, for a dozen years. It is of vital importance to the territories involved. There is a short time fuse involved.

The problem is that this legislation is in that intermediate zone. It is legislation that should pass, but it is not must pass legislation. Therefore, it is certain, I think, to attract a Presidential veto and probably not be overridden.

I urge the authors of this good legislation to put it on the debt limit bill. That way it will be certain to pass, and then I will vote for it, but not on this legislation, because this needs to pass, and it should pass quickly.

EXHIBIT 1

GOV. JOHN A. MANGEFEL—STATE OF YAP, FEDERATED STATES OF MICRONESIA

Mr. Chairman and members of the committee: I wish to express my gratitude for having the opportunity to place a statement in the record enouraging your favorable consideration of the Compact of Free Association for the Federated States of Micronesia. I apologize if this statement seems too long.

In this statement I hope to put the compact and Micronesia in perspective historically, politically, and financially.

As you may know it was an act of a pope some 400 years ago which has brought us to this moment. At that time we were self-sufficient. We made war and love on our own terms like everyone else. We were independent. we didn't know we were ignorant and undeveloped.

But along came the Spanish for gold and God. In Micronesia they gave us a lot of God, but no gold. The Germans then followed. They were interested in commerce and exporting copra. But they weren't around very long. Something to do with a big disagreement in Europe. We were then mandated to the Japanese Government. The Japanese were interested in colonizing and developing Micronesia. By this I mean the islands, of course, not the people. Well, finally, along comes the United States and we get trusteeshipped to you by the United Nations. During this 400 years a lot of important events and changes took place. Micronesia didn't change much, though.

Since U.S. Forces set foot on Micronesian Islands, a lot of changes have taken place. During that 40 years the United States has had many Presidents, both Democrat and Republican. We are a young nation, and our first President came into office only in 1979.

I was 34 years old when I first heard about the status issue in 1966. I have been connected with the status negotiations when they started 14 years ago. I am now 52 years old. That is a lot of time to invest in one project. Micronesians, however, on the whole are a patient people. Despite this, I

hope that this Congress will have the distinction and honor of approving the Compact of Free Association. There is not much to say about the political perspective. Because we are part of a United Nations trusteeship, members of the U.S. Congress do not have a political constituency in Micronesia. Since the negotiations started we have worked with three Republican and one Democratic administration in the executive branch, and, of course, with Senators and Representatives of both parties in the Congress. Consideration of Micronesia has always been a nonpartisan activity and I think this fact has served everyone well.

I mentioned financial considerations. Some people will think there is a lot of money in the compact. I agree. It is a lot of money. They may see that there are not a lot of people. So if you divide the lot of money into the not a lot of people, it looks like a lot of money for few people. Well, if you packed us all onto one island like Americans do in their cities, it would be a lot of money. But when you are talking about hundreds of Islands spread over thousands of miles, then it not so much. The FSM, for example, has four major airports, hospitals, docks, powerplants, and so on and they have to be maintained. Like democracy, it is an expensive proposition.

Like the expense of democracy, it is also a good investment. It costs less than building a nuclear submarine, or aircraft carrier, but Micronesia is not in danger of sinking. It costs less than what Americans pay for alcohol and tobacco every year, and it certainly is a lot healthier. It costs less than it does to operate the U.S. Congress, and it certainly is a lot less political.

Now, if I were on your side of the table, and I was when I was in the Congress of Micronesia, I would ask: "How do we know that the money will be spent wisely?" There are a lot of easy answers to that question, provisions in the compact, and so on. But the most realistic answer is if we do not spend the compact and our local funds wisely, we will be hurting ourselves. It is a well-known fact that in the past, it was impossible to audit the trust territory. This was partly because of centralized control, partly because of changing administrations, and partly through poor management and accounting practices. I for one have complained loudly about practices of past administrations. When administrators waste U.S. taxpayers' money, they are also shortchanging Micronesians. We know that better than anybody, and you can be sure we will be careful with the money.

Let me close with this thought: "Because the compact reflects the will of the people, I hope that both the U.S. Congress and the international community will recognize that self-government for the peoples of the trust territory should not be delayed." Those are not my words. They are from President Reagan in the recent issue of Pacific Magazine. I heartily agree with them, so we can soon get back to the self-government we had 400 years ago.

Thank you very much.

EXHIBIT 2

STATEMENT OF INTENT

Twenty-two years ago, when the islands of Micronesia were constituted as the Trust Territory of the Pacific Islands and placed under American administration, the United Nations directed that the administering authority "promote the development of the inhabitants of the Trust Territory toward self-government or independence as may be appropriate to the particular circumstances of the Trust Territory and its peoples and the freely expressed wishes of the people concerned." At that time, when the traumatic damage and dislocation of war had barely passed, when the distance between the Territory's six districts seemed so great as to call into question the area's very existence as a single administrative unit, when American plans in the Trust Territory were as vague as Micronesians' future intentions, there was little urgency about what has come to be known as the "future political status" of the Trust Territory. Yet with the passage of time, with the formation in 1961 of the Council of Micronesia, in 1964 of the Congress of Micronesia, and in 1967 of the Congress' Political Status Commission, we have reached our years of decision.

The Political Status Commission was created to study the alternatives before Micronesia and to make its recommendations to the Congress and to the people of Micronesia. We have not taken this task lightly nor have we accomplished our work quickly. Two years of study have gone into the recommendations we now make. We have consulted amongst ourselves. We have consulted scholars and administrators. We have weighed the interests of America and our own people. Members of the Commission have travelled to the Virgin Islands, a territory of the United States, to Puerto Rico, a commonwealth of the United States, as well as to Washington.

Most recently, in order to learn what these islands could reasonably expect or hope for in the future, the whole Commission visited island groups throughout the Pacific. We saw American Samoa, a territory of the United States, and Western Samoa, a former territory which has chosen independence. In Fiji we visited a crown colony of Britain. In Papua-New Guinea we toured the only other surviving Trust Territory in the world. Also, in our travels, we talked with leaders of Nauru, an independent island-nation, and the Cook Islands, a state in free association with New Zealand. We believe that we have acquainted ourselves with every alternative we might possibly face; that we have studied and contemplated every reasonable political arrangement for Micronesia. After all our study and travel, after candid discussion with each other and deep personal thought, after having considered as many as a dozen political possibilities, we have reduced the desirable alternatives to two, and from among these two, we have chosen one.

To the Congress of Micronesia, to the district legislatures and municipal governments of Micronesia, to the Trust Territory administration and the Government of the United States, the Political Status Commission makes the following recommendation: that the Trust Territory of the Pacific Islands be constituted as a self-governing state and that this Micronesian state—internally self-governing and with Micronesian control of all its branches, including the executive—negotiate entry into free association with the United States.

In recommending that the Trust Territory become a free associated state, the Political Status Commission recognizes two inescapable realities: the need for Micronesian self-government and the fact of long-standing American interest in this area.

We choose a free state because the continuation of a quasi-colonial status would prove degrading to Micronesia and unworthy of America. Difficulties and problems will surely arise, but the administering authority in these islands must become an authority administered by Micronesians. At the same time, we choose an associated state because we recognize the historically unique partnership between Micronesia and the United States. In recommending free association with the United States, we seek not an end but a re-definition, renewal and improvement of this partnership.

Whatever our particular evaluations of the American administration in Micronesia may be, we feel that one contribution has been indelible, one achievement almost unqualified: the idea of democratic, representative, constitutional government. Our recommendation of a free associated state is indissolubly lined to our desire for such a democratic, representative, constitutional government. We endorse this system—which was brought to us by America and which we have come to know as an essentially American system.

Yet our partnership with the United States and our endorsement of the American democratic system must be joined by our wish to live as Micronesians, to maintain our Micronesian identity, to create a Micronesian state. Such a state, we believe, would be a credit to America and to ourselves. As a self-governing state in free association with the United States, our past twenty years of partnership would be raised to a new level in a compact, not between guardian and ward, but between more nearly equal friends.

Now we must ask, as others will ask, what can a self-governing Micronesian state hope for from its free association with the United States? And what can the United States expect from Micronesia? As a self-governing state, Micronesia will continue to look to America: for representation and protection in international affairs, for material and human assistance in the affairs of government, but in times of crisis and in day-to-day operations. As a self-Governing state, Micronesia's needs will be as great or greater than as a Territory. We do not underestimate the problems we will face. We do not wish for any lessening of American concern for Micronesia or of American presence in Micronesia.

How, then, will America benefit by entering into association with Micronesia? How can Micronesia hope to reward continued American contributions to its development? We would point out—without the slightest suggestion of self-righteousness—that there was an element of trust, of moral obligation, involved when the United States undertook responsibility for these islands, and that such an obligation, which was begun when these islands were in ruins, should not be ended when they are reaching for political maturity.

Yet there is one item of material value which Micronesians can offer the United States—an item which is most precious in Micronesia and to Micronesians: the use of their land. Micronesians recognize that their islands are of strategic value, that the United States may require the use of some areas for purposes of military training and defense. We have seen the strategic value of these islands, have seen them conquered in historic battles, have seen them used for nuclear experiments and missile testing. Our experience with the military has not always been encouraging. But as a self-governing state in free association with the United States, we would accept the necessity of such military needs and we would feel confident that we could enter into responsible negotiations with the military, endeavoring

to meet American requirements while protecting our own interests.

Relinquishing use of land, accepting the presence of large numbers of military personnel, accepting the risk of treatment as a target area by a hostile power in war are not conditions to be lightly undertaken. But as a self-governing state we would be far more prepared to face these prospects than as a Trust Territory.

Thus, with a sense of the profound responsibilities upon all concerned, the Political Status Commission repeats its recommendation that Micronesia be constituted as a self-governing state in free association with the United States.

To turn this recommendation into reality, we must face long and complex negotiations. The United States may be called upon to make unprecedented provisions and accommodations, but we are confident that they will meet with us openly and in good faith. From the time it acquired territories in the Louisiana Purchase of 1803, through the settlement of the continental United States, the acquisition of Alaska and Hawaii, Puerto Rico and other island areas, the United States has dealt flexibly and imaginatively with its territories. It has shown a willingness to evaluate each territory as a separate case—and Micronesia surely is that.

For ourselves, we look forward to the success of future negotiations with the United States. But if these negotiations should fail, if it should not be possible to achieve the alternative we recommend, then we have only one remaining course. It is the second alternative mentioned in the Trusteeship Agreement, an alternative which might bring economic hardship and administrative difficulties. That alternative is independence. Independence is not the alternative we now recommend, but if it should prove impossible to renew our partnership with the United States as an associated free state, the Political Status Commission feels that independence would be the only road left open to us.

In the times to come, we will look to the United States for friendship and aid; but, whatever our relationship with the United States, whether as an independent nation or an associated free state, we must also look to Micronesians, look to ourselves. We maintain that the basic ownership of these islands rests with Micronesians and so does the basic responsibility for governing them.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from Idaho.

Mr. McCLURE. Mr. President, we have now been on this matter for 5 hours. I do not say that because it is unimportant. I say it because it is extraneous to the matter that is before the Senate, which is the Compact of Free Association.

I indicated to all Members at the outset that I did not wish to stifle debate or the opportunity for them to express themselves on this issue. But I am prepared to make a motion to table, and I will do so very soon. But I want to tell my colleagues why, because I think the Senator from Louisiana and I have the same opinion: Trade legislation is important legislation. It ought to be decided by this body and by Congress and by the legislative-political process in this country.

Mr. President, I have to oppose this amendment at this time, although I am a cosponsor of this amendment. I have great sympathy for the objective of the amendment. I agreed to cosponsor it when it was introduced originally as S. 680.

I have talked with the chairman of the Finance Committee. The Finance Committee has had 9 or 10 hearings this year on this subject matter. It is not that the matter is not being considered. It has not yet been brought to the floor of the Senate by the Finance Committee, but it is being considered in the appropriate forum where it, and all trade matters, can have an equal hearing in a balanced manner and not just one commodity or just one area of trade policy affected.

This compact, however, is now being held hostage not just to this amendment, because there will be a whole series of amendments to be offered, and on a whole variety of extraneous and unrelated, nongermane subjects.

The compact is the result of 15 years of negotiations. It has twice been reported unanimously by the Committee on Energy and Natural Resources. It has been passed by the House. It has been sitting on the Senate calendar—and sitting and sitting.

The compact would provide the basis for terminating the United Nations trusteeship and ending 400 years of foreign domination of these islands. It protects the security of these islands from future foreign influence and provides the opportunity for the people of Micronesia to live and develop according to their own desires and aspirations.

This is not some casual measure to be used as a vehicle for everyone's current cause. The textile amendment is only one amendment suggested to date.

The Senator from Utah has indicated a desire to add a compensation package, which also has never reported by a committee. The Senator from Colorado has indicated that he wants to use this as a vehicle for a $10 a barrel oil import fee. The Senator from New Hampshire wants to repeal most-favored-nation status for Afghanistan. The Senator from Iowa has three nongermane amendments that he would like to offer to this legislative package when he has the opportunity to do so.

If we are going to get into this, I would like to repeal section 2(c) of the Mineral Leasing Act and set a grazing fee for public lands at a rational figure, such as $1 per animal unit month.

Perhaps we could solve that problem after several hours or days of debate.

I am certain that the Senator from Louisiana would probably like to do the coal slurry pipeline——

Mr. JOHNSTON. Good idea.

Mr. McCLURE [continuing]. On this legislation and get that one out and settle it here on the floor of the Senate.

This is not the last train out of the station. This is not the place we have to solve all the current problems that any individual Member may be able to bring to mind.

The senior Senator from California has some strong feelings about a moratorium on the Outer Continental Shelf, as do I, and we could probably debate that for 2 or 3 days if we had time.

Maybe what we should do is put out a hotline request to all Members of the Senate and say pick out your one favorite issue and come on, we will take them all, and after we have amended the bill with 99 or 100 different amendments, we will take it over to the House and let them sort it out.

Maybe that is the way to advance the cause that is a very important question for this country not just this Congress or just this Senate, but the important question of resolving the status of the Trust Territory of the Pacific Islands.

Mr. President, this compact should have been passed by the Senate last Congress when the President transmitted it. It should have been passed clean without any of these collateral amendments. It should have been passed clean earlier this year when we again reported it favorably to the Senate.

Mr. President, on October 1 the lease for the use of the Kwajalein missile range expired. We have important military considerations in the use of that missile range, and that contract has expired.

We have claims pending against the United States Government for compensation of those who were affected by our atmospheric testing of atomic bombs at Bikini Island. That is under a stay order in the Court, but in spite of the fact that is it not proceeding forward to resolution, the pretrial discovery is going forward and we are responsible for all those bills.

So you have a host of lawyers going all around the world looking for every person who was at or near Bikini Island at the time of the explosion and they will get depositions from all of them and there will be hundreds and thousands of those depositions. People have suggested that the pretrial discovery process itself could cost as much as $100 million. That cost is not for settlement of the claims, but is just to pay the lawyers for all the busywork.

This compact, if we can get to it and pass it, settles those claims. It avoids that litigation. If approved by the court, we would have brought that matter to a conclusion.

I outlined the question of the trusteeship in my opening statement—how we came to have this kind of a trusteeship relationship over these islands in the Pacific and why it is important to us to resolve the question of their future status. We are not sole actors in this. We have a responsibility under an agreement with the United Nations. We seek to get an agreement from the people who are involved so that they and we can go to the United Nations together and say we want to create a new relationship and dissolve the old trusteeship.

The Compact of Free Association for the Marshalls and for the Federated States of Micronesia has been submitted to a plebiscite of the peoples involved and they approved it 2 years ago and they have been waiting for our action for 2 years. At some point they may well decide they have waited long enough.

I happen to be just old enough to regard World War II as my war. It is the one I lived through. It is the one I relate to. It is the one I have some emotions about. I watched as American GI's went out across the pacific to extinguish the Japanese military presence in these islands and thousands of American young men died in those islands as a result of a trusteeship under the League of Nations in which Japan abused their relationship and fortified them and made them military bases. It cost us dearly.

I do not want to see a time in the future where because of our unwillingness to act on this question we see a foreign military presence in those islands again.

This compact, if ratified, would avoid that possibility because there is a mutual security arrangement expressed in the compact that makes foreign military presence impossible.

It guarantees the security of the area but is importantly in the interest of the United States to resolve in that manner. We have no assurance that if these compacts are not adopted by the United States Government that indeed we will be able to achieve the result in any other manner.

Mr. President, the Senator from Louisiana said it very well. No matter how we feel about the issue of trade relationships or trade problems of this country, no matter how we feel about the textile questions themselves, no matter how I feel about the import of lumber from Canada, no matter how I feel about the grain trade with the Far East, this is not the time and place to try to resolve those complex issues at the price of exacerbating the relationships and creating tensions and problems for our country and threatening the security of our country just in order to resolve or attempt to resolve those issues as important as they are.

Mr. President, this amendment will not solve those problems. For that reason I am going to make a motion to table. If the motion to table is not agreed to, we still have not passed the amendment. We have only stopped the progress toward passage of the compact.

Mr. President, this, it seems to me, is not the time and the place and the manner to debate what is understandably an extremely difficult issue, but it has no place on this compact and I not only will offer the motion to table but I will fight the adoption of this or any other amendment that has the potential for killing the result of 15 years of work that is so vitally important to the United States. I say that reluctantly to my friends who feel very strongly about the textile issue, but it simply cannot be allowed to jeopardize the interest of the United States that would be solved by the passage of the Compact of Free Association.

Mr. HEFLIN. Mr. President, some experts have linked declining manufacturing employment particularly in the textile industry with mounting trade deficits. I believe they are correct.

I do know that the Southeast and Alabama has lost thousands of manufacturing jobs in the past 5 years primarily due to high value of the dollar in the world market and the foreign competition, in many instances unfair foreign competition.

This declining manufacturing employment—which has averaged more than 6 percent annually—has been the reason for some of the economic stagnation felt in Alabama and our sister States and the remainder of the Nation.

I have been, and still am, very disturbed about the developing trend of foreign subsidized products being dumped in America at below market prices. It is unfair, and uncompetitive, and blatantly illegal. existing trade laws prohibit these activities. The past failure of the U.S. Goverment to enforce these laws is a major problem. The lack of strict enforcement has significantly contributed to the decline of textile industry in this country. That is absolutely inexcusable.

The pending amendment would limit textile imports from various countries and is absolutely necessary for the survival of the textile industry in the United states. I have pledged to the people of Alabama and to the textile workers of Alabama my wholehearted efforts to pass this legislation as swiftly as possible while there is still a textile industry to save.

Regardless of administration claims of assistance to the American textile and apparel industry and to workers employed in that industry, it is impossible to deny the following facts: No. 1. Over 300,000 textile/apparel/fiber jobs have been lost in this country since 1980. No. 2. Over that same 5-year period textile/apparel imports have increased 100 percent. No. 3. Fifty percent of all finished apparel items sold in this country are now imported.

Even though this industry has been devastated by imports, the domestic textile/apparel/fiber industry is making every effort to remain competitive.

Over $1 billion a year have been reinvested by the textile/apparel industry to improve technology. In 1985, a record $2.1 billion will be reinvested.

The textile industry has imported productivity 10 percent since 1980, which is significantly higher than the national manufacturing average.

Meanwhile since 1981, this industry has found itself in a deteriorating economic environment.

It is no coincidence that it was that year that the dollar began its sharp ascent over other currencies of the world, and it is neither a coincidence that 1981 was the year the Federal Government began piling up record budget deficits.

The volume of U.S. exports has fallen 10 percent since then, while imports increased more than 40 percent.

A few years ago, we sold the rest of the world far more than we bought from them. This past year we bought from other countries $120 billion more than we sold to them. And now the Commerce Department estimates that the red ink will add up to a $169 billion annual trade deficit.

These trade deficits shake the very foundations of our country.

First, they are endangering our national security. I know that in recent months the United States has become a debtor nation. As our trade deficits increase, foreign interests will own and control more and more of our Nation's businesses, institutions, and resources.

Second, we are exporting American jobs to other countries. Every time we import $1 billion more in goods and services from abroad over than we are able to sell, we export 20,000 to 30,000 jobs from this country.

Third, these mounting trade deficits are damaging key and essential sectors of our economy—not just the textile industry which we are addressing today, but every major segment of our economy. For example, our agricultural economy is being devastated by foreign competition enhanced by the high value of the dollar.

And our textile industry is being strangled. Since 1981 Alabama and every Southeastern State have steadily lost textile jobs. The region's mills have reduced their employees by 20 percent—that's 120,000 workers.

In the Southeast States, producers of metal and metal products have lost more than 30,000 jobs during the last 6 years, more than two-thirds of which

were in Alabama, due primarily to high-dollar foreign competition.

We must not lose sight that the first priority is and must be to bring into control the massive Federal budget deficits. These budget deficits are a substantial cause of the overvaluation of the dollar, which in turn pushes trade deficits higher and higher.

We must address the root of the problem and bring Federal spending under control. I am convinced that the only long-range solution to put our financial house in order is a constitutional amendment to balance the Federal budget.

In addition, we must work to improve the productivity of our national workforce by investing in training and education. The jobs of the 21st century will require higher and higher educational levels.

To improve the technology level of our industry, innovative ideas and ingenious incentives must be tried. If this country is to keep the highest standard of living in the world, we must have the best educated work force, the most productive workforce, working in the best environment and circumstances we can provide.

But I fear that our textile/apparel/fiber industry, faced with an onslaught of foreign competition, must have relief if it is to remain viable enough to be helped by those remedies I have just mentioned.

Today, almost one half of all textiles/apparel sold in this country have been manufactured abroad. That percentage grows daily.

Clearly, U.S. textiles/apparel management and labor are making every effort to modernize, compete, and survive; but this industry must be supported in those efforts by more vigorous, effective enforcement of our trade laws. The time to begin is now.

Mr. GRASSLEY. Mr. President, while I am deeply concerned about conditions facing the domestic textile and apparel industry and its workers, I must reluctantly oppose this legislation. I do so only from the standpoint of, while aiding an admittedly ailing industry, it may simultaneously deal a body blow to another troubled sector of the economy—agriculture.

As my colleagues are aware, agriculture has already suffered tremendously as a result of some of our own domestic policies, and we can ill afford to pound another nail into the coffin. American farmers remember well the 1983 decision to restrict Chinese textile products and the resulting grain sale losses of $500 million.

With U.S. farm exports in the midst of a prolonged slump, we cannot risk retaliation from the countries at which this bill is aimed, and upon which agriculture exports are dependant. The total value of U.S. agricultural exports to East and Southeast Asia in fiscal 1984 was $12.5 billion—up some $1.5 billion from 1983. These Asian countries purchased about one-third of all agricultural exports from the United States last year.

In addition, the bill would have other effects—less direct perhaps—but just as harmful, on our potential export markets. By stifling the development of some of the more severely in-debted countries and draining them of important foreign exchange currency, we further threaten them with insolvency. All of this results in decreased export markets for U.S. products and threatens the solvency of our own domestic banking institutions.

The effects of this legislation, I believe, are not only damaging to our U.S. economy, but to our long term international interest. Domestically it would cost American consumers an estimated $14 billion per year, with low-income families hit the hardest. While it could be argued that jobs would be created in the textile industry, the International Business and Economic Research Corporation estimated that 62,000 retail jobs would be lost—743 of which would be in Iowa alone. With the economic conditions as they are in Iowa today, we can't afford to lose one job, let alone another 743.

I feel that all of us, whether we work in agriculture, steel, textiles or some other industries, need to look for broader solutions to solve our trade problems. We need to begin by establishing a national trade policy, further reduce our budget deficits, bring down an over-valued dollar, enforce our existing trade laws and get at the root cause of our trade problems rather than simply treating the symptoms. These solutions offer more long-term hope to industry as well as agriculture than do any short-term remedies such as this bill.

Mr. PRYOR. Mr. President, today the Senate has an opportunity to go beyond the empty rhetoric of the administration and take some meaningful action in the area of international trade. I support the pending amendment and I hope it is adopted by the full Senate.

Mr. President, the American people are growing increasingly weary over plant closings that literally devastate communities across this country. They are growing tired of seeing a flood of imports come into this Nation, and each of us is constantly being asked about our country's trade policies. I have frequently mentioned that lately we have had no trade policy, and recent actions by the administration have shown that when certain industries come forward, demonstrate the necessary injury under existing trade laws, and relief is recommended, this plea will be ignored. This is the case even though it is consistent with the letter and spirit of international law and the obligations we have to our trading partners.

This is what happened to the shoe industry, a very critical industry to certain parts of the State of Arkansas. Arkansas ranks 10th in shoe production, and shoe production is the principal manufacturing industry in five counties in my State—all of which have a population of less than 25,000 each.

With imported shoes now accounting for 77 percent of the market, this industry sought relief from the International Trade Commission [ITC]. It was clearly demonstrated that serious injury was present, and yet, after the ITC recommended relief for the industry, this was rejected by the President.

Likewise, the textile and apparel industries are seeing an annual increasing tide of imports. In the last 18 months the State of Arkansas has lost 12 textile plants, and over 3,800 workers have lost their jobs. With the continuing import surge, this trend will continue. If the administration would fully enforce the terms of the multifiber agreement, this amendment would not be necessary. But, that has not occurred. Therefore, the textile workers, and the cotton producers, who saw their markets taken as the import surge continued, want to be able to compete on a fair basis.

Mr. President, we need fair trade. Approval of the pending amendment will not only help these industries and our constituents, but it will send a strongly worded message to the President and his trade advisers—it is time to work for fair trade, and very importantly, it is time to enforce the laws that are now on the books.

Mr. HEINZ. Mr. President, let us not doubt the importance of the decision we are making today. We are talking about an industry that employs 2 million people—more than basic metals and automobile manufacturing combined—and sustains another 2 million in associated industries. It is an industry that accounts for $45 billion of our GNP, that is by far and away the largest employer of women and ethnic minorities.

Let us also realize that the textile and apparel industry is facing its demise. Over the past 4 years imports of textiles and apparel grew at an average rate of 19 percent, now taking one-half of the domestic apparel market. The impact of this deluge of imports has been devastating. More than 300,000 jobs have been lost in the industry, 250 plants have been closed, and last year's deficit amounted to $16 billion. The economic research firm Data Resource, Inc., has estimated that if current trends continue the import share of the apparel market will be over 80 percent by 1995. They have calculated that the high import scenario they envisage, compared to allowing imports to grow at the rate of domestic market growth as President

Reagan promised in 1980 will cause a loss of 947,000 jobs in the textile and apparel industries, and an additional 943,000 jobs lost in other industries due to the ripple effect. That is a total of 1,890,000 jobs lost. Furthermore the Federal budget deficit, if trends continue, and the President's commitment is abrogated, will be worse by $24 billion, the trade deficit will increase by $21 billion, GNP will decrease by $40 billion, and disposable income by $19 billion.

The question we are addressing today is twofold. Should we do anything to try to reverse this? And if we should do nothing, that is best to concentrate our resources at what we are competitive at producing. Others say we should do somethng, but that we are better off with the present flexible Multifiber Arrangement.

As to whether we should do anything, although I believe in the principle of free trade, I think the textile and apparel industry is a special case. First, it is not an inefficient industry. Over the last two decades textiles have invested an average of $1 billion a year on modernization, including a record $1.7 billion last year. The combination of U.S. technology and U.S. working men and women have made America the world leader in productivity.

The problem is that we are competing with countries that do not give us a chance. China makes no pretense with this; it pays its workers 16 cents an hour, and aims straight at the United States market. Taiwan, Hong Kong, Japan, and South Korea all subsidize their industries through grants, no-interest loans, tax incentives, research and development aid and government industry partnerships. Furthermore they set low import quotas, which unlike the United States they adhere to manufacturing decisions are not based on the marketplace, as are ours, but on domestic needs; wages and profits are sacrificed for this greater goal. This amendment, which is the text of S. 680 is necessary not to protect an inefficient declining industry, but to put us on the same footing as our trading partners, and to restore some kind of equity to the marketplace.

Second, the free-trade argument as extolled by David Ricardo is based on the assumption that we should be concentrating resources where we have a comparative advantage. We should switch the million or so workers from textiles to an industry we have an advantage in. In principle this argument has some logic to it, but in the case of textiles, a majority of the workers are unemployable elsewhere, and so a rapid transfer of resources is not a viable short or medium term alternative. In recent testimony to the Subcommittee on International Trade of the Finance Committee, John R. Meinert, vice chairman of Hartmarx, and president of the Clothing Manufacturers Association, illustrated this point from his own experience. I quote:

> Among the 12,500 people we employ in our factories, many are first and second generation Americans who lack the language and skills to participate in other sectors of the economy.

Traditionally textiles has been the way immigrants have become integrated into our society. It would be ironic to say the least now to penalize these people by providing additional benefits to the countries they left. Not only are many of its workers from ethnic minorities, but a majority are women, who often are not in a position to move to areas with more job opportunities, and are not available for many types of employment. At Hartmarx 10,000 of the 12,500 manufacturing employees are women. Textiles, in the words of Meinert "provides the underpinning of the maintenance of their families, and we give marginally employable but earnest workers the skills to pursue a lifetime of employment." It is an industry that is of fundamental social value, and because of the nature of its labor force those laid off are not likely to find work elsewhere.

Third, the demise of the textile industry in this country would have serious national security repercussions. Clearly it would be impossible to equip and supply military personnel without textile and apparel products—uniforms, parachutes, medical dressings are but three examples. On April 3, 1984 their U.S. Trade Representative Bill Brock said:

> Every U.S. industry insists it is essential for national security. Textiles is the only one we accept, and that goes back 20 years.

Dr. Kennedy of the U.S. Army Netwick Laboratories has concluded that if the import trends of the 1980's continue it would be impossible for the textile industry to support any major military mobilization, let alone support the needs of the civilian population.

Mr. President it is for these reasons, because the industry is efficient, but facing unfair subsidized competition, because resources devoted to it cannot easily be utilized in other parts of the economy, and because for national security having no textile industry is unacceptable, that advocates of free trade in principle, like myself, believe textiles should be an exception. It is for these reasons that the current administration pledged, in the words of Ronald Reagan "to relate total import growth to the rate of growth in the domestic market" and it is for these reasons that the MFA was negotiated.

As we have learned in the last 4 years, this pledge was broken. Even the more generous growth limits MFA were not kept. Imports from Hong Kong, Korea, and Taiwan were supposed to be kept to 1 percent per year—in fact they have grown by 40 percent. The argument that continuing the MFA is the best way to protect our industry, if examined in view of what has happened in the last decade, is nothing short of absurd. Perhaps one might argue that things will change, that the administration will enforce the MFA with a new determination. I considered this, until I heard Ambassador Yeutter, our current U.S. Trade Representative, at the subcommittee hearing on this issue indicates that no rollbacks would be sought by the administration in future MFA negotiations, and that he thought ample protection was enjoyed at the moment—so "ample" is this protection that the industry may cease to exist in 10 years.

Past experience and current administration statements have convinced me that we need to translate the intent of the MFA into law. This is what S. 680 does; it will limit imports to the level they would have reached had the multilateral agreement been adhered to. It will restrict the largest exporting countries which have dominated our market and allow for growth from the smaller countries. Thus for major exporting countries imports in 1985 would be reduced to what they were in 1980, plus 6-percent growth for each subsequent year, as permitted by the MFA. From 1985 onward import growth for these suppliers would be limited to 1 percent per year. For smaller suppliers growth limitations would be 6 percent per year.

Opponents of this bill argue it will have the effect of raising textile and apparel prices. My own research makes me doubt it—at the press conference announcing the bill's introduction, I produced four blue shirts bought at Sears made or assembled in Colombia, Guyana, Hong Kong, and the United States. All were selling for $18.99, despite different costs to Sears. Independent research has backed up my findings. Monroe H. Greenstein, a retail analyst with Bear, Stearns & Co. in New York, has written:

> Retailers here don't go to all the trouble to buy overseas to pass on the reduced price to the consumer.

John Meinert in his testimony to the Subcommittee on International Trade makes this same point. I quote:

> The high margins available on these imported goods are used to benefit those who import them, as the differential is retained by the import-seller. The American consumer does not receive lower prices, and we know this to be true from our information about companies which compete in our retail markets.

In fact the real danger to the consumer might come about if we let our domestic industry deteriorate, and allow foreign suppliers to fix the price. Last year Crompton Co. folded, America's last producer of velveteen. A 33-

percent increase in the price of Japanese velveteen followed. The danger is real, but we have the opportunity to avert it.

Further, it is argued that the action this bill entails would lead to compensation/retaliation. Again this is something I doubt. Since the bill only tries to enforce the MFA compensation demands through GATT ought not to be successful. Unilateral retaliation by the major foreign producers—Korea, Hong Kong, Taiwan, is equally unlikely in view of the fact that they all now have trade surpluses with us. Any retaliatory war will hurt them more than us. China is in a somewhat different situation, but its significant increases in production of agricultural goods in the last few years make it less dependent on agricultural imports and likely it will continue to reduce such imports regardless of what policy we pursue.

Finally, I have heard it said that this bill overreacts to the situation. The strong dollar, it is held, is responsible for the problems of the textile and apparel industry. The trade deficit is the product of our budget deficit, once we deal with that, the other will vanish. In general, taking the trade deficit as a whole, I believe the best way of dealing with it is to reduce the budget deficit, lower interest rates and thereby lower the value of the dollar. But that policy by itself will not adequately address certain sectional problems like textiles and will not help us recover the ground we have lost. A majority of U.S. imports of textiles and apparel has come from countries which have maintained a relatively stable exchange rate with the U.S. dollar. Three of the four largest apparel exporters, Taiwan, Hong Kong, China, and the Philippines not to mention the increasingly important countries Singapore, Sri Lanka, Thailand, and the Dominican Republic have not been affected by the exchange rate to the extent others have. The countries that have been significantly affected by the U.S. dollar's appreciation—the European Community and Canada—are not included in the provisions of this bill.

Mr. President, for the reasons that I have outlined, I urge my colleagues to support our textile and apparel industry by adopting this amendment. We have a chance to save the Nation's largest employer, to make a commitment to fair trade, to serve the best interests of the consumer. I ask that we take it.

Mr. McCLURE. Mr. President, I move to table the amendment and ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second. The yeas and nays were ordered.

The question is on agreeing to the amendment. On this question the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from North Carolina [Mr. EAST], the Senator from Arizona [Mr. GOLDWATER], the Senator from Florida [Mrs. HAWKINS], and the Senator from Indiana [Mr. QUAYLE] are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Delaware [Mr. BIDEN] is necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 42, nays 53, as follows:

[Rollcall Vote No. 201 Leg.]

YEAS—42

Abdnor	Domenici	Kassebaum
Andrews	Durenberger	Lugar
Armstrong	Evans	Matsunaga
Baucus	Exon	McClure
Bentsen	Garn	Nickles
Bingaman	Gorton	Packwood
Boren	Gramm	Pressler
Boschwitz	Grassley	Simpson
Bradley	Hart	Stafford
Burdick	Hatfield	Stevens
Chafee	Hecht	Symms
Chiles	Humphrey	Wallop
Cranston	Inouye	Wilson
Danforth	Johnston	Zorinsky

NAYS—53

Bumpers	Helms	Nunn
Byrd	Hollings	Pell
Cochran	Kasten	Proxmire
Cohen	Kennedy	Pryor
D'Amato	Kerry	Riegle
DeConcini	Lautenberg	Rockefeller
Denton	Laxalt	Roth
Dixon	Leahy	Rudman
Dodd	Levin	Sarbanes
Dole	Long	Sasser
Eagleton	Mathias	Simon
Ford	Mattingly	Specter
Glenn	McConnell	Stennis
Gore	Melcher	Thurmond
Harkin	Metzenbaum	Trible
Hatch	Mitchell	Warner
Heflin	Moynihan	Weicker
Heinz	Murkowski	

NOT VOTING—5

Biden	Goldwater	Quayle
East	Hawkins	

So the motion to lay on the table amendment No. 724 was rejected.

Mr. HOLLINGS. Mr. President, I move to reconsider the vote by which the motion was rejected.

Mr. DOLE. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

CLOTURE MOTION

Mr. THURMOND. Mr. President, I send a cloture motion to the desk.

The PRESIDING OFFICER. The cloture motion having been presented under rule XXII, the Chair directs the clerk to read the motion.

The assistant legislative clerk read as follows:

CLOTURE MOTION

We, the undersigned Senators, in accordance with the provisions of Rule XXII of the Standing Rules of the Senate, hereby move to bring to a close debate on amendment No. 724 to S.J. Res. 77, a joint resolution to approve the "Compact of Free Association", and for other purposes.

Strom Thurmond, Ernest F. Hollings, Bill Cohen, George J. Mitchell, David Pryor, Russell B. Long, John D. Rockefeller, Paul Simon, Jesse Helms, Paul Trible, Mack Mattingly, Alphonse D'Amato, Bob Dole, Christopher Dodd, Orrin G. Hatch, Al Simpson, Jeremiah Denton, John Warner, Robert Kasten, and John Heinz.

ORDER OF BUSINESS

Mr. BYRD addressed the Chair.

The PRESIDING OFFICER. The Senator from West Virginia.

Mr. BYRD. Mr. President, I seek recognition at this time in order to ask the distinguished majority leader if he could give us a rundown on the program for the rest of the evening and tomorrow and Friday and Monday.

Mr. DOLE. Mr. President, I thank the distinguished minority leader. It is my hope that tomorrow, we can move to the extension of the debt ceiling and, hopefully, complete action on that on Friday. I hope tomorrow will be an abbreviated day because a number of Senators have outside commitments starting at 3 p.m. On Friday, I do not know of any other way to say it except that we are going to be in session, and we hope to complete action on the debt ceiling on Friday. We are advised by the Treasury Department that October 7 is a sort of "drop-dead" day as far as what will happen at Treasury.

It is still my hope we might work out some agreement on each side that we will have an equal number of amendments on the debt ceiling relating to deficit reduction and perhaps dispose of the debt ceiling, at least on the Senate side, and go to conference early next week.

Mr. BYRD. Mr. President, does the distinguished majority leader anticipate more rollcall votes tonight?

Mr. DOLE. Not tonight, Mr. President. I was hoping that a cloture motion would not be filed to the pending amendment. I find myself now in a position where I shall be voting against cloture because I need to move on to the debt ceiling. If we are going to start having everybody calling the shots, then I shall have to abandon my support for the textile bill.

Mr. BYRD. Mr. President, as I understand the distinguished majority leader, there will be no more rollcall votes after 3 o'clock tomorrow?

Mr. DOLE. That is correct.

Mr. BYRD. And on Friday, does he expect rollcall votes?

Mr. DOLE. On Friday, I expect rollcall votes. As to Saturday, we indicated earlier we might have a session, but we shall not have a session on Saturday.

If we should not finish the debt ceiling on Friday, we shall have to go back and vote on cloture on Friday on the pending amendment, which will take some time. Then we anticipate rollcall votes on Monday on the debt ceiling.

Mr. BYRD. Can the distinguished majority leader indicate at this point at what hour on Monday rollcall votes might begin?

Mr. DOLE. Mr. President, I think it depends on where we are on the debt ceiling. I do not think we can protect people until 4 o'clock on Monday if we have not made substantial progress, because of the need to go to conference. Apparently, on Monday, the taxpayers start feeling the crunch on the lack of a debt ceiling. Checks are in the mail. There will not be enough cash in the Treasury to honor the checks when they return and somebody will be looking for someone about that time.

Mr. BYRD. Mr. President, I thank the distinguished majority leader.

Mr. HOLLINGS addressed the Chair.

The PRESIDING OFFICER. The Senator from South Carolina.

Mr. HOLLINGS. Mr. President, let me ask the distinguished majority leader, as he can well understand how to prevail, we are ready for a vote. Obviously, the membership has been told there are not to be any more votes tonight. I understand his desire is to set this aside. For what reason is that?

Mr. DOLE. Because we need to consider the debt ceiling so we can borrow the money and honor the checks that will be due and pay our debts.

Mr. HOLLINGS. I am not against that. As the Senator knows, I am principal cosponsor with Senator GRAMM on deficit reduction. But we are ready to go, and I think some on your side want to have extended remarks. On this side, we use the crude word, "filibuster," I guess.

Is that the concern of the majority leader?

Mr. DOLE. My primary concern is to pass the debt ceiling extension.

Mr. HOLLINGS. We are ready to vote on our amendment now or we can reach a time tomorrow morning on an up-and-down vote is what I am saying. We are not trying to delay cloture for obvious reasons.

Mr. DOLE. I understand that, but there are 40-some who have a different view. I think a number of those 40 would like to discuss their views on the pending amendment, which up until now I have supported.

Mr. HOLLINGS. I understand the majority leader, but I do not know of any of those on this side who would filibuster, or extend debate, at all. In fact, on cloture, I feel confident we probably can get the vote. What we are saying is we are ready to vote. We are not trying to disrupt the majority leader's handling of events. But after all, since we have had all of this discussion, then why not get that final vote?

Mr. DOLE. I would have no objection to that, but I am advised by a number of colleagues that they would not want that to happen soon.

Mr. HOLLINGS. Soon.

Mr. DOLE. Yes.

Mr. HOLLINGS. What is the intent of the majority leader tonight, to go over with this bill still pending?

Mr. DOLE. To go over with this bill still pending and hope to move to the debt ceiling extension at around 11 o'clock, or no later than noon tomorrow. We have only about 3 hours tomorrow because of the necessary absence of a number of Senators on each side of the aisle starting at 3.

We will come back in early on Friday morning and hopefully complete action on the debt ceiling extension. Part of that day will be chewed up now because a cloture motion has been filed. We will have to waste a couple of hours on that on Friday.

Mr. HOLLINGS. The Senator sees my point. I am trying to press forward to finalize the matter with all the debate fresh in our minds. We would agree to a time certain for an up-and-down vote Friday, Monday, or Tuesday. I do not think the debt extension—I am positive it is not the intention of the 40 Senators to debate it, that is, with respect to the particular procedures but on the merits of this bill. We can look at the other amendment where there were only nine votes, and in that light I hope the majority leader would work us in so we can get an up-and-down vote. That is what we want. I thought that is what he wanted. I did not put in the motion.

Mr. DOLE. If the sponsors of the amendment can work out an agreement, I would certainly be happy to propose it, if we can get a unanimous-consent agreement to vote at a certain time. But I will leave that up to the sponsors of the amendment.

Mr. HOLLINGS. We are ready. I think we ought to take the time, if the majority leader says he can work it out.

Mr. THURMOND. Mr. President, I realize the importance of the debt limit bill. I was hoping that could be taken up tomorrow and passes. I certainly want to cooperate with the able majority leader. That is a measure that has to pass. I was thinking, if he could finish that tomorrow, then everything takes care of itself.

Mr. DOLE. We only have 3 hours tomorrow, so I doubt that will happen, because at 3 o'clock about 16 Senators have commitments elsewhere. So we have Friday to work on it, and hopefully we can finish it Friday.

Mr. THURMOND. Then on Friday how does the majority leader suggest we handle the cloture matter and at the same time take care of the debt limit? We want to cooperate with him.

Mr. DOLE. What I suggest is that the Senator withdraw the cloture motion and let us complete action on the debt ceiling. Then the next order of business will be reconciliation, which is privileged. We are trying to work this out so we can do other business while we are still pursuing the particular matters of interest to the Senators from South Carolina and others.

Mr. THURMOND. I feel we can work this out.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. ARMSTRONG). The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. THURMOND. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

CLOTURE MOTION WITHDRAWN

Mr. THURMOND. Mr. President, after consideration and conferring with the majority leader and the minority leader, as well as Senator EVANS and others representing all concerned, I ask unanimous consent to withdraw the cloture motion.

The PRESIDING OFFICER. Is there objection to the request of the Senator that the cloture motion be withdrawn? The Chair hears none, and it is so ordered.

Mr. DOLE. Mr. President, I have indicated to all Senators who have an interest on both sides that it would be my intention to complete action on the debt ceiling extension and the reconciliation package and then return to the consideration of the pending measure and the pending amendment.

NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION MARINE FISHERIES PROGRAM AUTHORIZATION ACT OF 1985

Mr. DOLE. Mr. President, I ask unanimous consent that the Senate now turn to the consideration of Calendar No. 148, S. 991, to authorize certain fisheries activities.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (S. 991) to provide authorization of appropriations for certain fisheries activities.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee of Commerce, Science, and Trans-

portation, with amendments, as follows:

(The parts of the bill intended to be stricken are shown in boldface brackets, and the parts of the bill intended to be inserted are shown in italic.)

S. 991

Be it enacted by the Senate and House of Representatives of the United States of American in Congress assembled, That this Act may be cited as the "National Oceanic and Atmospheric Administration Marine Fisheries Program Authorization Act of 1985".

SEC. 2. The National Oceanic and Atmospheric Administration Marine Fisheries Program Authorization Act (Public Law 98-210; 97 Stat. 1409) is amended—

(1) in section 2(a), by striking "and" after "1984,", and by inserting and ", $27,382,000 for fiscal year 1986, and $28,614,190 for fiscal year 1987" immediately after "1985";

(2) in section 3(a), by striking "and" after "1984," and by inserting ", $25,933,000 for fiscal year 1986, and $27,099,985 for fiscal year 1987" immediately after "1985"; and

(3) in section 4(a), by striking "and" after "1984," and by inserting ", $11,395,000 for fiscal year 1986, and $11,907,775 for fiscal year 1987" immediately after "1985"; and

SEC. 3. Section 4(a) of the Commercial Fisheries Research and Development Act of 1964 (16 U.S.C. 779b(a)) is amended—

(1) by striking "and" at the end of paragraph (2);

(2) by striking the period at the end of paragraph (3) and inserting in lieu thereof ", and"; and

(3) by adding at the end thereof the following new paragraph:

"(4) $4,500,000 for the fiscal year ending September 30, 1986, and $4,702,500 for the fiscal year ending September 30, 1987.".

SEC. 4. Section 4(a) of the Anadromous Fish Conservation Act (16 U.S.C. 757d(a)) is amended by adding after paragraph (4) the following new paragraph:

"(5) $3,500,000 for fiscal year 1986, and $3,657,500 for fiscal year 1987.".

SEC. 5. (a) Section 2 of the Central, Western, and South Pacific Fisheries Development Act (16 U.S.C. 758e) is amended by striking "Tuna" and inserting in lieu thereof "Fisheries".

(b) Section 8 of the Central, Western, and South Pacific Fisheries Development Act (16 U.S.C. 758e-5) is amended—

(1) by striking "and" after "1984,"; and

(2) by isnserting immediately after "1985" the following: ", 1986, 1987, and 1988".

The PRESIDING OFFICER. Does the Senator wish to have the committee amendments agreed to en bloc?

Mr. DOLE. Mr. President, I move adoption of the committee amendments en bloc.

The PRESIDING OFFICER. The question is on agreeing to the committee amendments en bloc.

The committee amendments en bloc were agreed to.

AMENDMENT NO. 726

(Purpose: To provide authorization of appropriations for certain activities of the Fish and Wildlife Service)

Mr. DOLE. Mr. President, I send an amendment to the desk on behalf of the distinguished Senator from Missouri [Mr. DANFORTH] and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Kansas [Mr. DOLE] for Mr. DANFORTH proposes an amendment numbered 726.

On page 3, line 7, strike "$3,500,000" and insert in lieu thereof "$6,935,000"; and on line 8, strike "$3,657,500" and insert in lieu thereof "$7,247,075".

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 726) was agreed to.

Mr. DANFORTH. Mr. President, I am offering today S. 991, a bill to authorize appropriations for the National Oceanic and Atmospheric Administration's [NOAA] Marine Fisheries Programs. Over the past several years, the Commerce Committee has worked to bring NOAA's programs under active authorizations that require periodic review and renewal, rather than relying on standing authorizations. The purpose of this approach is to ensure that NOAA is held fully accountable in carrying out its activities and functions. Toward this end, S. 991 authorizes appropriations under four separate fishery acts: the NOAA Marine Fisheries Program Act; the Commercial Fisheries Research and Development Act of 1964; the Anadromous Fish Conservation Act; and the Central, Western, and South Pacific Fisheries Development Act.

The funds authorized by this bill will be used by NOAA's National Marine Fisheries Service to carry out a portion of its duties in the areas of information collection and analysis, fisheries conservation and management, and State and industry assistance programs. The balance of the funding needed by the Service to carry out these functions is authorized under several cyclical authorizations, the primary one being the Magnuson Fishery Conservation and Management Act.

Mr. President, S. 991 reauthorizes the NOAA Marine Fisheries Program Authorization Act at $64,710,000 during fiscal year 1986 and $67,621,950 for fiscal year 1987. The Commercial Fisheries Research and Development Act is reauthorized at $3,500,000 for fiscal year 1986 and $4,702,500 for fiscal year 1987, and the Anadromous Fish Conservation Act at a funding level of $3,500,000 for fiscal year 1986 and $3,657,500 for fiscal year 1987. The 1986 authorization levels are capped at the 1985 appropriation level and a 4.5-percent increase is provided for 1987 reflecting the need to provide essential Government services while restraining Federal spending.

The Central, Western, and South Pacific Fisheries Development Act is reauthorized for 3 years at the current authorization level of $5,000,000.

I am also offering, Mr. President, an amendment to S. 991. The amendment increases the authorization level in the Anadromous Fish Conservation Act to $6,935,000 in fiscal year 1986 and $7,247,075 in fiscal year 1987. Both the Fish and Wildlife Service of the Department of Interior and NOAA's National Marine Fisheries Service receive appropriations under the Anadromous Fish Conservation Act. The amendment is necessary to assure an authorization for funds appropriated to the Fish and Wildlife Service under the act which will otherwise not be provided. The Fish and Wildlife Service uses these funds for emergency striped bass research and cooperative agreements with States for conservation and enhancement of the anadromous fishery resources in our Nation. The amendment I am offering will freeze the fiscal year 1986 authorization at the fiscal year 1985 appropriation level for both of these agencies combined and allow for a 4.5-percent increase in fiscal year 1987.

Among the varied important services provided by the authorizations in S. 991 are enhancement of Columbia River fisheries, research and analysis of fisheries habitat, research required under the recently ratified Pacific Salmon Treaty and overall management of fisheries. Mr. President, marine waters of the United States contain approximately 20 percent of the world's fishery resources. The commercial and recreational marine fisheries of this country contribute $15 billion annually and some 600,000 jobs to our Nation's economy. This level of economic activity can be sustained and improved under the conservation and management programs authorized under this bill.

Mr. President, the Commerce Committee unanimously ordered S. 991 reported. I urge my colleagues to support this important authorization measure.

Mr. HOLLINGS. Mr. President, I join with my colleagues from the Commerce Committee in supporting S. 991, the National Oceanic and Atmospheric Administration Marine Fisheries Act of 1985. In conjunction with the reauthorization of the Magnuson Fishery Conservation and Management Act, this legislation would authorize the fisheries programs carried out by NOAA's National Marine Fisheries Service [NMFS] for fiscal years 1986 and 1987. The bill also contains 2-year reauthorizations for the Anadromous Fish Conservation Act, the Commercial Fisheries Research and Development Act and the Central, Western and South Pacific Fisheries Development Act.

As a nation, we have entrusted NOAA with the responsibility of providing the scientific and technical information needed to manage, develop,

and conserve our living marine resources. S. 991 authorizes programs which are important to NOAA in fulfilling this mission. These programs go beyond science and fishery issues. They touch on the health and environmental concerns of most Americans.

One example is the ongoing research at the Charleston Seafood Laboratory, an NMFS facility in my own State of South Carolina. Scientists there are cooperating with the National Institutes of Health to determine the beneficial health aspects of the fish oils present in seafood. Of no suprise to fishermen, preliminary results indicate that eating seafood is good for you. Researchers are examining the therapeutic and preventative effects of fish oil on heart disease, strokes, arthritis, and even some forms of cancer.

Last year, in response to public concern, we initiated a study to determine the extent of PCB contamination in Atlantic bluefish. The results of that study should resolve the issue of whether such contamination creates a threat to public health. Researchers in Charleston are also working to develop methods to detect and remove dangerous contaminants from shellfish. These and similar programs promise substantial health benefits at a relatively modest cost.

In recent years, we have begun to understand the importance of the marine habitat in maintaining and enhancing the production of ocean resources. S. 991 authorizes funds to implement a large portion of NMFS's habitat conservation policy. In addition to supporting habitat research, the program establishes interagency cooperation to provide more effective oil-spill mitigation, Lacey Act enforcement, and oversight of federally permitted coastal and marine activities.

I remain committed to achieving optimal use of living marine resources for the benefit of our Nation. The diverse programs which are reauthorized by this legislation clearly contribute to that goal. I urge Senate support for S. 991.

The PRESIDING OFFICER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading and was read the third time.

The PRESIDING OFFICER. The question is, Shall the bill pass?

The bill (S. 991), as amended, was passed, as follows:

S. 991

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "National Oceanic and Atmospheric Administration Marine Fisheries Program Authorization Act of 1985".

SEC. 2. The National Oceanic and Atmospheric Administration Marine Fisheries Program Authorization Act (Public Law 98-210; 97 Stat. 1409) is amended—

(1) in section 2(a), by striking "and" after "1984,", and by inserting ", $27,382,000 for fiscal year 1986, and $28,614,190 for fiscal year 1987" immediately after "1985";

(2) in section 3(a), by striking "and" after "1984," and by inserting ", $25,933,000 for fiscal year 1986, and $27,099,985 for fiscal year 1987" immediately after "1985"; and

(3) in section 4(a), by striking "and" after "1984,", and by inserting ", $11,395,000 for fiscal year 1986, and $11,907,775 for fiscal year 1987" immediately after "1985".

SEC. 3. Section 4(a) of the Commercial Fisheries Research and Development Act of 1964 (16 U.S.C. 779b(a)) is amended—

(1) by striking "and" at the end of paragraph (2);

(2) by striking the period at the end of paragraph (3) and inserting in lieu thereof ", and"; and

(3) by adding at the end thereof the following new paragraph:

"(4) $4,500,000 for the fiscal year ending September 30, 1986, and $4,702,500 for the fiscal year ending September 30, 1987.".

SEC. 4. Section 4(a) of the Anadromous Fish Conservation Act (16 U.S.C. 757d(a)) is amended by adding after paragraph (4) the following new paragraph:

"(5) $6,935,000 for fiscal year 1986, and $7,247,075 for fiscal year 1987.".

SEC. 5. (a) Section 2 of the Central, Western, and South Pacific Fisheries Development Act (16 U.S.C. 758e) is amended by striking "Tuna" and inserting in lieu thereof "Fisheries".

(b) Section 8 of the Central, Western, and South Pacific Fisheries Development Act (16 U.S.C. 758e-5) is amended—

(1) by striking "and" after "1984,"; and

(2) by inserting immediately after "1985" the following: ", 1986, 1987, and 1988".

Mr. DOLE. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ADDITIONAL CONFEREES TO H.R. 2419

Mr. DOLE. Mr. President, I ask unanimous consent that the following Senators be added as conferees to H.R. 2419, intelligence authorization: Senators ROTH and HOLLINGS.

The PRESIDING OFFICER. Without objection, it is so ordered.

TEMPORARY EXTENSION OF CERTAIN HOUSING PROGRAMS

Mr. DOLE. Mr. President, I ask unanimous consent that the Senate now turn to House Joint Resolution 393, temporary extension of certain housing programs being held at the desk.

The PRESIDING OFFICER. The clerk will state the joint resolution by title.

The assistant legislative clerk read as follows:

A joint resolution (H.J. Res. 393) to provide for the temporary extension of certain programs relating to housing and community development, and for other purposes.

The PRESIDING OFFICER. Is there objection to the present consideration of the joint resolution?

There being no objection, the Senate proceeded to consider the joint resolution.

AMENDMENT NO. 727

(Purpose: To extend certain provisions of the Garn-St Germain Act)

Mr. DOLE. Mr. President, I send an amendment to the desk on behalf of the distinguished chairman of the committee, Mr. GARN, and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Kansas [Mr. DOLE], for Mr. GARN, proposes an amendment numbered 727.

Mr. DOLE. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the joint resolution, add the following:

SEC. . EXTENSIONS OF GARN-ST GERMAIN ACT.

(a) Section 141(a) of the Garn-St Germain Depository Institutions Act of 1982 is amended by striking out "upon the expiration of three years after the date of enactment of this Act" and inserting in lieu thereof "on April 15, 1986".

(b) Section 206(a) of such Act is amended by striking out "Upon the expiration of three years after the date of enactment of this Act" and inserting in lieu thereof "On April 15, 1986".

Mr. GARN. Mr. President, I ask unanimous consent that a letter from the Federal Emergency Management Agency, dated October 1, 1985, be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

FEDERAL EMERGENCY MANAGEMENT AGENCY,
Washington, DC, October 1, 1985.

Hon. JAKE GARN,
Chairman, Committee on Banking, Housing, and Urban Affairs, U.S. Senate, Washington, DC.

DEAR MR. CHAIRMAN: In recent discussions, your staff has indicated that there is some misunderstanding about whether or not the Federal Emergency Management Agency intends to issue Federal Crime Insurance policies following passage of House Joint Resolution 393. I want to assure you that, as Federal Insurance Administrator, I fully intend to continue to issue new and renewal policies under the Federal Crime Insurance Program until November 14, 1985.

Sincerely,

JEFFREY S. BRAGG,
Administrator, Federal Insurance Administration.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 727) was agreed to.

Mr. EXON. Mr. President, the bill before us includes a provision which extends for several months the Net Worth Certificate Program, which has been available to savings and loan associations and savings banks since 1982, as a way to temporarily strengthen the net worth of those thrift institutions that are in financial difficulty.

Earlier in the year, I introduced legislation, S. 795, which is designed to extend a similar kind of temporary capital assistance to commercial banks that are heavily involved in agricultural lending and which are experiencing similar financial pressures. The Senate Banking Committee held hearings on my bill earlier this year.

The FDIC has expressed opposition to my bill, despite the fact that the FDIC is currently extending the same type of net worth assistance to savings banks subject to that agency's jurisdiction. Furthermore, although some have tried to distinguish between the types of problems experienced by the thrifts and the problems of the farm banks, the fact is that problem assets, problem loans, are now at the base of the difficulties of both types of institution. The FSLIC has acknowledged as much in their public statements in recent months.

Mr. President, I am not going to move to amend the pending bill to extend the Net Worth Certificate Program to agricultural banks at this time, although I am convinced that the situation would fully warrant that I do so.

Instead, I want to take this time to impress upon the Senate the need to take constructive action in regard to farm banks and their farmer and rancher borrowers, to provide an opportunity for them to work their way out of the present difficulties. I understand that the Senate will likely be considering legislation this fall for the restructuring of farm debt, in order to help deal with some of the problems that the farm credit system is having.

As this occurs, I would hope that the Senate will work to achieve a farm debt package which addresses the problems of commercial agricultural banks and their farm borrowers as well as other lenders who are heavily committed to our agricultural economy.

I intend to be actively involved in that effort. I also will maintain an active interest in the Net Worth Assistance Program and will hold open the option of moving at a later date to expand this program to agricultural banks, unless other, more broad-based efforts to assist farm banks and their borrowers is enacted and implemented in the meantime.

Mr. President, a significant number of agricultural lenders face serious problems because of the high value of the dollar, low farm income, and the depressed market for farmland. Thus far in 1985, nine banks have been closed in my State and the depressed agricultural economy has been a major factor in those closings. Nationwide, 44 farm banks have been closed this year. As a result of these closings, hundreds of farmers must now deal with the FDIC on their outstanding loans, rather than their local banker. Across the Nation, agricultural bankers face the difficult choice of foreclosing on farmers or risking their own liquidation or forced merger by bank regulators.

These are serious problems facing ag lenders. I am concerned that the Federal regulators do not give these lenders the same consideration they give to Continental Illinois and other institutions which are "too large to fail." Several weeks ago, the Elba State Bank in Elba, NE was closed. Elba is a small community of around 200 people in the middle part of my State. While this closing will not affect the Nation's banking system, this was the only bank in that town and the closing will definitely affect the families and businesses in the community.

I am hopeful that the Senate Banking Committee will work with the Senate Committee on Agriculture in the coming weeks to address the serious problems facing the farm credit system and a growing number of commercial banks with extensive investment in agriculture.

Mr. MOYNIHAN. Mr. President, I rise to voice my support for H.J. Res. 393, a bill to extend certain programs on a temporary basis, among them the Federal Crime Insurance Program [FCIP]. I also rise to congratulate my colleagues on the Committee on Banking, Housing, and Urban Affairs, who agreed today to extend the FCIP for 45 days. I and others concerned about the protection of residential and commercial property in areas plagued by crime regard this as a prudent and practical approach to deal with this problem.

Mr. President, Congress established the Federal Crime Insurance Program under the Housing and Urban Development Act in 1970. It provides affordable insurance against robbery, theft, burglary, and vandalism to tens of thousands of businesses and residents of high crime areas—insurance not otherwise affordable in the private insurance markets. In 1984, more than 42,000 people held FCIP policies, and more than 3,500 claims were paid in 27 States, the District of Columbia, Puerto Rico, and the Virgin Islands. Roughly one-third of FCIP beneficiaries are small businesses located in areas engulfed by crime and vandalism. Many of these businesses, absent support from the FCIP, might abandon their neighborhoods to further decay, taking with them jobs and tax revenues.

The Federal Crime Insurance Program is particularly important to New York. More than 25,000 New York residents and businesses hold FCIP policies—more than all other States combined. Some 97 percent of those policies, worth more than $209 million, are held in New York City, in neighborhoods which vitally need continued support and investment. In 1984, the FCIP paid more than 2,000 claims in New York City, worth $7.4 million.

Under a proposed arrangement considered by the Banking, Housing and Labor Affairs Committee, Federal responsibility for the program would have been shifted to the States. Not only would States such as New York be unable to minister as efficiently to the needs of policyholders under this arrangement, but in many cases the insured also would not be able to receive coverage commensurate with their needs.

That is why today's committee action is particularly welcome. And that is why I rise today to praise my colleagues, especially the Senator from Connecticut, Mr. DODD, for their foresight and sound judgment.

I also want to add my praise for the House Subcommittee on Housing and Community Development, particularly its chairman, Mr. GONZALEZ, and one of its members, Mr. SCHUMER. Both of these gentleman have played important roles in the effort to secure an extension of this program.

At the same time, I want to urge this body once again to reauthorize the Federal Crime Insurance Program. Although the FCIP serves a comparatively small segment of the population, those it serves are no less important, nor the services they receive less valuable, than similar programs for crop and flood insurance. The Federal Crime Insurance Program is an effective means to protect and encourage business investment in high-crime areas. I strongly recommend that it be reauthorized for another year.

The PRESIDING OFFICER. The joint resolution is open to further amendment. If there be no further amendment to be proposed, the question is on engrossment of the amendment and third reading of the joint resolution.

The amendment was ordered to be engrossed and the joint resolution to be read a third time.

The joint resolution (H.J. Res. 393) was read the third time.

The PRESIDING OFFICER. The question is, Shall the joint resolution pass?

So, the joint resolution (H.J. Res. 393), as amended, was passed.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the joint resolution was passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

REMOVAL OF INJUNCTION OF SECRECY—TREATY DOCUMENT NO. 99-10

Mr. DOLE. Mr. President, as in executive session, I ask unanimous consent that the injunction of secrecy be removed from a tax convention with Sri Lanka (treaty document No. 99-10) which was transmitted to the Senate today by the President of the United States; and also ask that the treaty be considered as having been read the first time; that it be referred, with accompanying papers, to the Committee on Foreign Relations and ordered to be printed; and that the President's message be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The message of the President is as follows:

To the Senate of the United States:

I transmit herewith for Senate advice and consent to ratification the Convention between the Government of the United States of America and the Government of the Democratic Socialist Republic of Sri Lanka for the Avoidance of Double Taxation and the Prevention of Fiscal Evasion with Respect to Taxes on Income, signed at Colombo on March 14, 1985. I also transmit the report of the Department of State on the Convention.

The Convention is the first income tax treaty to be negotiated between the United States and Sri Lanka. It is based on model income tax treaties developed by the Department of the Treasury and the Organization for Economic Cooperation and Development. The Convention deviates from these models, however, in several significant respects, as indicated in the attached report of the Department of State, to reflect Sri Lanka's status as a developing country. These deviations generally provide for broader source country right to tax than is found in the model treaties.

Among the principal features of the Convention are provisions to prevent third-country residents from taking unwarranted advantage of the treaty. Also included are the usual articles on nondiscrimination, mutual agreement, and exchange of information.

I recommend that the Senate give early and favorable consideration to the Convention and give its advice and consent to ratification.

RONALD REAGAN.

THE WHITE HOUSE, *October 2, 1985.*

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations and a treaty which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

ANNUAL REPORTS ON MINE SAFETY AND HEALTH ACTIVITIES—MESSAGE FROM THE PRESIDENT—PM 86

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with accompanying reports; which was referred to the Committee on Labor and Human Resources.

To the Congress of the United States:

In accordance with Section 511(a) of the Federal Mine Safety and Health Act of 1977, as amended (30 U.S.C. 958(a)), I transmit herewith the annual reports for Fiscal Years 1981 and 1982 on mine safety and health activities as submitted by the Secretary of Labor.

RONALD REAGAN.

THE WHITE HOUSE, *October 2, 1985.*

PRESIDENTIAL APPROVALS

A message from the President of the United States announced that he had approved and signed the following enrolled bills and joint resolutions:

On September 30, 1985:

S. 817. An act to authorize appropriations under the Earthquake Hazards Reduction Act of 1977 for fiscal years 1986 and 1987, and for other purposes.

S. 1514. An act to approve the Interstate Cost Estimate and Interstate Substitute Cost Estimate.

S. 1671. An act to amend title 38, United States Code, to provide interim extensions of the authority of the Veterans' Administration to operate a regional office in the Republic of the Philippines, to contract for hospital care and outpatient services in Puerto Rico and the Virgin Islands, and to contract for treatment and rehabilitation services for alcohol and drug dependence and abuse disabilities; and to amend the Emergency Veterans' Job Training Act of 1983 to extend the period for entering into training under such Act.

S.J. Res. 127. Joint resolution to grant the consent of Congress to certain additional powers conferred upon the Bi-State Development Agency by the States of Missouri and Illinois.

On October 1, 1985:

S.J. Res. 67. Joint resolution to designate the week of October 6, 1985, through October 12, 1985, as "Mental Illness Awareness Week".

S.J. Res. 111. Joint resolution to designate the month of October 1985 as "National Spina Bifida Month".

MESSAGES FROM THE HOUSE

At 11:02 a.m., a message from the House of Representatives, delivered by Ms. Goetz, one of its reading clerks, announced that the House has passed the following bill, in which it requests the concurrence of the Senate:

H.R. 3453. An act to amend the Internal Revenue Code of 1954 to extend the Superfund taxes for 45 days.

At 6:20 p.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that the bill (S. 1712) to provide an extension of certain excise taxes, in the opinion of the House, contravenes the first clause of the seventh section of the first article of the Constitution of the United States and is an infringement of the privileges of the House and that such bill is respectively returned to the Senate (pursuant to the provisions of H. Res. 283).

The message also announced that the House has passed the following bills, in which it requests the concurrence of the Senate:

H.R. 1261. An act for the relief of Richard W. Ireland;

H.R. 1863. An act for the relief of O. Edmund Clubb; and

H.R. 2991. An act for the relief of Betsy L. Randall.

MEASURES REFERRED

The following bills were read the first and second times by unanimous consent, and referred as indicated:

H.R. 1261. An act for the relief of Richard W. Ireland; to the Committee on the Judiciary.

H.R. 1863. An act for the relief of O. Edmund Clubb; to the Committee on the Judiciary.

H.R. 2991. An act for the relief of Betsy L. Randall; to the Committee on Agriculture, Nutrition, and Forestry.

MEASURE PLACED ON THE CALENDAR

The following bill was read the first and second times by unanimous consent, and placed on the calendar:

H.R. 3453. An act to amend the Internal Revenue Code of 1954 to extend the Superfund taxes for 45 days.

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC-1829. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report entitled "The Nuclear Waste Policy Act: 1984 Implementation Status, Progress, and Prob-

lems"; to the Committee on Energy and Natural Resources.

EC-1830. A communication from the Comptroller General of the United States, transmitting, pursuant to law, the seventh annual review of the Department of the Interior's methodology for allowing OCS wells to be shut in or to flare natural gas; to the Committee on Energy and Natural Resources.

EC-1831. A communication from the Secretary of Energy, transmitting, pursuant to law, the annual determination of the viability of the domestic uranium mining and milling industry; to the Committee on Energy and Natural Resources.

EC-1832. A communication from the Chairwoman of the International Trade Commission, transmitting, pursuant to law, the 43d quarterly report on trade between the United States and nonmarket economy countries for the period April-June 1985; to the Committee on Finance.

EC-1833. A communication from the Secretary of the Treasury, transmitting, pursuant to law, a report on Federal-State-local fiscal relations; to the Committee on Finance.

EC-1834. A communication from the Assistant Secretary of State (Legislative and Intergovernmental Affairs), transmitting, pursuant to law, a Presidential determination regarding the reprogramming of an additional $13 million for El Salvador from the fiscal year 1985 continuing resolution; to the Committee on Foreign Relations.

EC-1835. A communication from the Chairperson of the National Council on the Handicapped, transmitting, pursuant to law, the fifth annual report of the Council covering fiscal year 1984; to the Committee on Labor and Human Resources.

EC-1836. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report on 31 major issues that need to be addressed in an effort to constrain health care costs; to the Committee on Labor and Human Resources.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. DOMENICI, from the Committee on the Budget, without amendment:

S. 1730. An original bill to provide for reconciliation pursuant to section 2 of the first concurrent resolution on the budget for fiscal year 1986 (S. Con. Res. 32, 99th Congress) (Rept. No. 99-146).

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. GARN, from the Committee on Banking, Housing, and Urban Affairs:

Richard H. Francis, of Virginia, to be President of the Solar Energy and Energy Conservation Bank.

(The above nomination was reported from the Committee on Banking, Housing, and Urban Affairs with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

By Mr. ROTH, from the Committee on Governmental Affairs:

Barbara Jean Mahone, of Ohio, to be Chairman of the Special Panel on Appeals for a term of six years; and

Bill D. Colvin, of Virginia, to be Inspector General, National Aeronautics and Space Administration.

(The above nominations were reported from the Committee on Governmental Affairs with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

By Mr. THURMOND, from the Committee on the Judiciary:

To be members of the U.S. Sentencing Commission for a term of 2 years: Stephen G. Breyer, of Massachusetts; and Paul H. Robinson, of New Jersey.

To be members of the U.S. Sentencing Commission for a term of 4 years: Michael K. Block, of Arizona; Helen G. Corrothers, of Arkansas; and George E. MacKinnon, of Maryland.

To be members of the U.S. Sentencing Commission for a term of 6 years: Ilene H. Nagel, of Indiana; and William W. Wilkins, Jr., of South Carolina.

By Mr. THURMOND, from the Committee on the Judiciary:

William W. Wilkins, Jr., of South Carolina, to be Chairman of the U.S. Sentencing Commission.

(The above nominations were reported from the Committee on the Judiciary with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. BINGAMAN (for himself, Mr. GOLDWATER, Mr. NUNN, Mr. QUAYLE, Mr. CHILES, Mr. WILSON, Mr. GORE, and Mr. ROCKEFELLER):

S. 1727. A bill to amend title 5, United States Code, to authorize alternative personnel management systems for scientific and technical personnel in the Federal Government, and for other purposes; to the Committee on Governmental Affairs.

By Mr. NICKLES (for himself and Mr. BOREN):

S. 1728. A bill to authorize the Cherokee Nation of Oklahoma to lease certain lands held in trust for up to 99 years; to the Select Committee on Indian Affairs.

By Mr. HEINZ:

S. 1729. A bill to amend title XVIII of the Social Security Act to provide a more fair method for determining the inpatient hospital deductible and the extended care coinsurance amount; to the Committee on Finance.

By Mr. DOMENICI, from the Committee on the Budget:

S. 1730. An original bill to provide for reconciliation pursuant to section 2 of the first concurrent resolution on the budget for fiscal year 1986 (S. Con. Res. 32, 99th Congress); placed on the calendar.

By Mr. GORE:

S. 1731. A bill to require that not more than one-fourth of the budget authority of any department or agency of the executive branch may be obligated during the last quarter of a fiscal year; to the Committee on Governmental Affairs.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. BINGAMAN (for himself, Mr. GOLDWATER, Mr. NUNN, Mr. QUAYLE, Mr. CHILES, Mr. WILSON, Mr. GORE, and Mr. ROCKEFELLER):

S. 1727. A bill to amend title 5, United States Code, to authorize alternative personnel management systems for scientific and technical personnel in the Federal Government, and for other purposes; to the Committee on Governmental Affairs.

(The remarks of Mr. BINGAMAN and the text of the legislation appear earlier in today's RECORD.)

By Mr. NICKLES (for himself and Mr. BOREN):

S. 1728. A bill to authorize the Cherokee Nation of Oklahoma to lease certain lands held in trust for up to 99 years; to the Select Committee on Indian Affairs.

AUTHORIZING THE LEASE OF CERTAIN LANDS BY THE CHEROKEE NATION OF OKLAHOMA

● Mr. NICKLES. Mr. President, today I am introducing a bill on behalf of myself and Senator BOREN for the Cherokee Nation of Oklahoma. This bill would allow them to lease certain lands held in trust for 99 years.

Under current law, the Bureau of Indian Affairs can only grant 25-year land leases with a 25-year option. Many tribes have legislatively amended the United States Code (25 U.S.C. 415) to allow for 99 year leases. This bill that I am introducing today would do just that and therefore would include the Cherokee Nation as a tribe with this right.

This legislation is timely in that the Cherokee Nation is currently involved in litigation with the Muskogee Port Authority regarding the Cherokee's ownership of the Arkansas Riverbed. If this legislation is passed, the port authority and the Cherokee Nation can settle their differences without further litigation.

Therefore, Mr. President, I request the timely consideration and passage of this legislation.●

By Mr. HEINZ:

S. 1729. A bill to amend title XVIII of the Social Security Act to provide a more fair method for determining the inpatient hospital deductible and the extended care coinsurance amount; to the Committee on Finance.

MEDICARE BENEFICIARY FAIRNESS ACT

● Mr. HEINZ. Mr. President, the Health Care Financing Administration

has just announced that the part a hospital deductible—that fee paid out of pocket by Medicare beneficiaries for their first day of a hospital stay—will increase from $400 to $492. That is a whopping 23 percent hike in 1 year, Mr. President, and close to a 141-percent jump since 1981. Its impact will be felt not only by those beneficiaries requiring hospitalization; it will also affect those beneficiaries requiring extended nursing home stays since the copayment for skilled nursing care is linked to the inpatient deductible.

Mr. President, today I am introducing legislation to prevent this new attack on the pocketbooks of older Americans. My bill, the Medicare Beneficiary Fairness Act, will establish a more equitable formula for calculating and updating the hospital inpatient deductible and the skilled nursing facility copayment. Under this bill, the inpatient deductible will be determined on the basis of the annual increase in the hospital DRG prospective payment rates, instead of on the average cost of care for one day's hospitalization, as it is currently calculated. In addition, under my bill the copayment for extended nursing home care will be linked to the DRG payment rate, and will be lowered to a more affordable rate. This will help to ensure that Medicare beneficiaries share in the savings of the prospective payment system.

Mr. President, it is entirely unjust that Medicare beneficiaries should be asked to bear the heavy financial burden of this $492 inpatient deductible. Under the new prospective payment system, Medicare is saving millions over what it would have spent. Only this past summer, Secretary Heckler reported that the double-digit inflation in health care, with us since at least 1971, had at last been arrested. Costs were only up 9.1 percent overall; hospital costs—the biggest single item driving inflation in the health sector—had climbed only 6.1 percent. Secretary Heckler attributed this success to the new Medicare prospective payment system, increasing competition in the health sector and the overall reduction in inflation achieved by the administration's economic program.

Yet, the administration is now saying that beneficiaries will have to pay almost $500 upon each hospitalization and $62 for each day spent in a skilled nursing facility after the first 20 days. For those beneficiaries living on the margins, this hefty sick tax could delay or completely discourage necessary care, thus jeopardizing their health in the short run and possibly even adding to Medicare's costs over the long run.

Why, when Medicare's part A costs are finally under control, are beneficiaries being asked to dig deeper into their wallets? Why shouldn't beneficiaries share in the economies of the prospective payment system and the easing pressures of inflation?

Because of current law, HCFA must use an outmoded methodology for determining the annual increase in the inpatient deductible: it is made by calculating the average cost incurred by a patient for 1 day's stay in a hospital. However, under the prospective payment system, reimbursement is based on resources needed to care for a patient with a specified diagnosis or DRG. As DRG's are fully phased in, the length of stay has and will continue to drop, but the intensity of services delivered per day are becoming greater. Thus costs per day are rising even while the escalation in total hospital costs under Medicare has slowed. Using the existing method of calculating the inpatient deductible, patients will continue to be asked to pay more and more for first day coverage even as they are being discharged quicker and sicker than before.

If these patients are discharged to the care of a nursing home or home health agency, their financial burdens are even greater. Because of the tight administrative restrictions on reimbursement for these services, beneficiaries are caught in a ever-squeezing vise—higher payments on the front end of a hospital stay and higher out-of-pocket costs for post-hospital care. The jaws of this vise are closing in on patients—taking a substantial toll on their pocketbooks and, in all too many cases, the quality of their health care. America's elderly already pay over 15 percent of their incomes on their health care; by 1990, the figure is expected to reach about 19 percent. How much more can we ask them to pay?

On September 3, Secretary Heckler issued regulations imposing a freeze on Medicare reimbursements to hospitals. While Congress has to date rejected the freeze, opting instead for a one-half or 1-percent increase in payments to hospitals, all signs point to 1986 as a banner year for hospital cost containment. Even under the 1 percent proposal, Medicare will save $1.34 billion in fiscal year 1986 over current law. Surely, some of the savings in Medicare spending should be passed along to beneficiaries. I urge my colleagues to join me in this effort to hold down the price of health care for our Nation's most vulnerable citizens by supporting this bill.

I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1729

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Medicare Beneficiary Fairness Act of 1985".

SEC. 2. CHANGES IN INPATIENT HOSPITAL DEDUCTIBLE AND EXTENDED CARE COINSURANCE AMOUNT.

(a) IN GENERAL.—Section 1813(b) of the Social Security Act is amended to read as follows:

"(b)(1) The inpatient hospital deductible shall be $400 in the case of any spell of illness beginning in calendar year 1985. The inpatient hospital deductible for any spell of illness beginning in any succeeding year shall be an amount equal to the inpatient hospital deductible for spells of illness beginning in the preceding calendar year, increased or decreased by the same percentage increase or decrease as applies for purposes of DRG prospective payment rates under section 1886(b)(3) or 1886(e)(4) (whichever is applicable) to discharges in the fiscal year which begins on October 1 of such preceding calendar year. Any amount determined under the preceding sentence which is not a multiple of $1 shall be rounded to the nearest multiple of $1 (or, if it is midway between two multiples of $1, to the next higher multiple of $1).

"(2) The extended care coinsurance amount for any spell of illness beginning in any calendar year shall be an amount equal to one-twelfth of the inpatient hospital deductible for spells of illness beginning in such calendar year. Any amount determined under the preceding sentence which is not a multiple of $1 shall be rounded to the nearest multiple of $1 (or, if it is midway between two multiples of $1, to the next higher multiple of $1).

"(3) The Secretary shall promulgate the inpatient hospital deductible and all coinsurance amounts under this section between July 1 and October 1 of the year preceding the year to which they will apply.".

(b) CONFORMING AMENDMENT.—Section 1813(a)(3) of such Act is amended by striking out "by a coinsurance amount equal to one-eighth of the inpatient hospital deductible" and inserting in lieu thereof "by the extended care coinsurance amount (determined under subsection (b)(2))".

(c) EFFECTIVE DATE.—The amendments made by this Act shall apply to spells of illness beginning in or after calendar year 1986.●

By Mr. GORE:

S. 1731. A bill to require that not more than one-fourth of the budget authority of any department or agency of the executive branch may be obligated during the last quarter of a fiscal year; to the Committee on Governmental Affairs.

CURBING YEAR-END FEDERAL SPENDING

● Mr. GORE. Mr. President, I do not believe that a single magic solution is going to make the federal budget deficit disappear. The real reduction of government spending is going to take place in a piecemeal fashion and it is going to be slow, tough work. With that thought in mind, I am introducing a bill today that could be a part of the solution.

Billions of dollars are wasted each year by Federal agencies and programs in year-end spending sprees. These groups spend surplus allocations on questionable projects and purchases as the year ends because they are afraid. They fear that their budgets for the

following year will be cut by a concerned Congress looking for money left in the coffers. The logic behind this is painfully clear. It is the "use it or lose it" syndrome that is a part of the mentality of any bureaucratic power. What they don't use this year will be harder to justify for the budget next year. In the end, it is the American taxpayers and, sadly, their children, who will pay the cost of billions of dollars of questionable spending. This money could be put to much better use reducing our extraordinary Federal deficit.

We need to stop the bureaucratic equivalent of a 2-minute drill in the final quarter of the fiscal year.

It is difficult to say how much of these last-minute expenditures are on legitimate items and how many are outright wastes of taxpayers' dollars. But we need to blow the whistle on the practice and require greater scrutiny of year-end expenditures.

Let me cite a few examples of expenditures that at least raise the need for further scrutiny. According to a General Accounting Office report released just 2 weeks ago, the Veterans' Administration obligated 27 percent of its total annual appropriation in fiscal 1982 in the final quarter of that year, 50 percent of its total annual appropriation for fiscal 1983 in the final quarter and 71 percent of its total appropriation for fiscal 1984 in the final quarter.

During fiscal 1982, the Federal Emergency Management Agency spent 50 percent of its entire appropriation in the final quarter. During fiscal 1983, FEMA spent 70 percent of its entire year appropriation in the final quarter. Even more outrageous was the fact that FEMA's Director spent approximately $360,000 of the agency's appropriated funds for a number of personal items, including leased autos, renovation of a dormitory for a personal residence, and other items for his personal use.

The bill I am introducing today is identical to a bill I introduced in the House last year. It is designed to bring an end to these last-minute spending sprees in a realistic, yet cautious manner. It limits the amount of money an agency can spend in the last quarter of the fiscal year to 25 percent of its total annual appropriation.

The bill does include some flexibility. It would not harm an agency's ability to function and provide the services for which it was created. If an agency or project would be seriously disrupted by this 25-percent limitation, the Director of the Office of Management and Budget could authorize exceptions on a case-by-case basis. An obligation to report all such deviations to Congress would prevent abuse of this important safety valve.

Unfortunately, the vigorous management policies of the OMB have not been sufficient to end this questionable use of taxpayers' money. We are obligated to do what we can to help reduce our country's deficit. If we can't do it all at once, then we should do so through measures like this legislation—one step at a time.

It was at an open meeting in Tennessee that a constituent suggested that I do something to end these final quarter spending sprees. And it is at the advise of another constituent who attended an open meeting just a couple of weeks ago that I am introducing the bill in the Senate on this, the first day of the Federal fiscal year.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1731

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 1512 of title 31, United States Code, is amended by adding at the end thereof the following new subsection:

"(e)(1) In exercising his apportionment authority under this section, the Director of the Office of Management and Budget shall assure that not more than 25 percent of the total budget authority available to and planned for use by each agency for each such fiscal year may be obligated during the last three calendar months of each fiscal year. Upon his determination that full compliance with the requirements of this paragraph would seriously disrupt the execution of any agency program, the Director may authorize such departures from these requirements as are necessary to avoid the disruption.

"(2) The Director shall keep the Congress fully informed of actions taken pursuant to paragraph (1) for each covered fiscal year. The Director shall also report to the Congress all departures from the percentage requirements of paragraph (1), as authorized therein, and the reasons for such departures.

"(3) Any reserves established or other actions taken in connection with the apportionment process solely for the purpose of satisfying the requirements of paragraph (1) shall be exempt from subsection (c)(1) of this section and from sections 1012(a) and 1013(a) of the Impoundment Control Control Act of 1974. Nothing herein affects the authority of the Comptroller General under section 1015 of the Impoundment Control Act to report a reserve or deferral to the Congress if he concludes that the exemption provision of this subparagraph is not applicable.".●

ADDITIONAL COSPONSORS

S. 89

At the request of Mr. INOUYE, the name of the Senator from Vermont [Mr. LEAHY] was added as a cosponsor of S. 89, a bill to recognize the organization known as the National Academies of Practice.

S. 231

At the request of Mr. DOLE, the name of the Senator from South Dakota [Mr. ABDNOR] was added as a cosponsor of S. 231, a bill to establish a National Commission on Neurofibromatosis.

S. 434

At the request of Mr. D'AMATO, the name of the Senator from New York [Mr. MOYNIHAN] was added as a cosponsor of S. 434, a bill to extend the authorization of the Robert A. Taft Institute Assistance Act.

S. 723

At the request of Mr. MATSUNAGA, the name of the Senator from North Dakota [Mr. BURDICK] was added as a cosponsor of S. 723, a bill to amend title XVIII of the Social Security Act to authorize payment for occupational therapy services under part B of the Medicare Program.

S. 925

At the request of Mr. HUMPHREY, the names of the Senator from Vermont [Mr. LEAHY], the Senator from Illinois [Mr. DIXON], and the Senator from North Dakota [Mr. ANDREWS] were added as cosponsors of S. 295, a bill to deny most-favored-nation trading status to Afghanistan.

S. 961

At the request of Mr. SARBANES, the name of the Senator from South Carolina [Mr. HOLLINGS] was added as a cosponsor of S. 961, a bill to authorize the Alpha Phi Alpha Fraternity to establish a memorial to Martin Luther King, Jr., in the District of Columbia.

S. 987

At the request of Mr. EXON, the name of the Senator from New Hampshire [Mr. HUMPHREY] was added as a cosponsor of S. 987, a bill to recognize the organization known as the Daughters of Union Veterans of the Civil War 1861–65.

S. 1084

At the request of Mr. GOLDWATER, the name of the Senator from Texas [Mr. BENTSEN] was added as a cosponsor of S. 1084, a bill to authorize appropriations of funds for activities of the Corporation for Public Broadcasting, and for other purposes.

S. 1209

At the request of Mr. CHILES, the name of the Senator from South Carolina [Mr. THURMOND] was added as a cosponsor of S. 1209, a bill to establish the National Commission to Prevent Infant Mortality.

S. 1223

At the request of Mr. ARMSTRONG, the name of the Senator from Georgia [Mr. NUNN] was added as a cosponsor of S. 1223, a bill to authorize the erection of a memorial on Federal land in the District of Columbia or its environs to honor members of the Armed Forces of the United States who served in the Korean war.

51-059 O-86-4 (Pt. 19)

S. 1296

At the request of Mr. KENNEDY, his name was added as a cosponsor of S. 1296, a bill to amend the Immigration and Nationality Act to modify the requirement for naturalization of an understanding of the English language.

S. 1310

At the request of Mr. DANFORTH, the name of the Senator from Montana [Mr. BAUCUS] was added as a cosponsor of S. 1310, a bill to amend the Communications Act of 1934 regarding the broadcasting of certain material regarding candidates for Federal elective office, and for other purposes.

S. 1356

At the request of Mr. HEINZ, the name of the Senator from Ohio [Mr. GLENN] was added as a cosponsor of S. 1356, a bill to give the Nation's performance in international trade appropirately greater importance in the formulation of Government policy, to modernize the remedies available to U.S. producers regarding unfair and injurious foreign trade practices, and for other purposes.

S. 1451

At the request of Mr. CHAFEE, the names of the Senator from Washington [Mr. GORTON], the Senator from North Dakota [Mr. ANDREWS], and the Senator from Maine [Mr. MITCHELL] were added as cosponsors of S. 1451, a bill to allocate funds appropriated to carry out section 103 of the Foreign Assistance Act of 1961 for nutrition programs which reduce vitamin A deficiency.

S. 1476

At the request of Mr. CHAFEE, the name of the Senator from Iowa [Mr. GRASSLEY] was added as a cosponsor of S. 1476, a bill to strengthen the Nation's competitive position in international trade and to improve its ability to respond to unfair and injurious foreign trade practices.

S. 1579

At the request of Mr. CRANSTON, the name of the Senator from Illinois [Mr. SIMON] was added as a cosponsor of S. 1579, a bill to clarify that the remedies available for the enforcement of certain civil rights statutes are applicable to the States.

S. 1617

At the request of Mr. STEVENS, his name was added as a cosponsor of S. 1617, a bill to provide for more effective management of lands of the United States which are subject to conflicting claims or disputes, and to require the Secretary of the Interior to report annually thereon.

S. 1639

At the request of Mr. EXON, the name of the Senator from Alaska [Mr. MURKOWSKI] was added as a cosponsor of S. 1639, a bill to authorize the minting of gold bullion coins.

S. 1640

At the request of Mr. GRASSLEY, the names of the Senator from Michigan [Mr. RIEGLE], the Senator from South Dakota [Mr. ABDNOR], and the Senator from Mississippi [Mr. COCHRAN] were added as cosponsors of S. 1640, a bill to amend title XVIII of the Social Security Act to provide for coverage under the Medicare Program of services performed by a physician assistant.

SENATE JOINT RESOLUTION 2

At the request of Mr. HATCH, the name of the Senator from Iowa [Mr. GRASSLEY] was added as a cosponsor of Senate Joint Resolution 2, a joint resolution proposing an amendment to the Constitution of the United States relating to voluntary silent prayer or reflection.

SENATE JOINT RESOLUTION 10

At the request of Mr. KENNEDY, the name of the Senator from California [Mr. WILSON] was added as a cosponsor of Senate Joint Resolution 10, a joint resolution proposing an amendment to the Constitution of the United States relative to equal rights for women and men.

SENATE JOINT RESOLUTION 74

At the request of Mr. THURMOND, the names of the Senator from New Jersey [Mr. LAUTENBERG], and the Senator from New Hampshire [Mr. HUMPHREY] were added as cosponsors of Senate Joint Resolution 74, a joint resolution to provide for the designation of the month of February, 1986, as "National Black (Afro-American) History Month."

SENATE JOINT RESOLUTION 134

At the request of Mr. BIDEN, the name of the Senator from Tennessee [Mr. SASSER] was added as a cosponsor of Senate Joint Resolution 134, a joint resolution to designate "National Safety in the Workplace Week."

SENATE JOINT RESOLUTION 177

At the request of Mr. MATSUNAGA, the names of the Senator from Maine [Mr. COHEN], the Senator from Tennessee [Mr. GORE], the Senator from Utah [Mr. HATCH], the Senator from Alaska [Mr. MURKOWSKI], the Senator from Illinios [Mr. SIMON], and the Senator from Nebraska [Mr. ZORINSKY] were added as cosponsors of S. 177, a joint resolution relating to an International Space Year in 1992.

SENATE JOINT RESOLUTION 203

At the request of Mr. MURKOWSKI, the names of the Senator from New York [Mr. MOYNIHAN], the Senator from Massachusetts [Mr. KERRY], the Senator from South Dakota [Mr. ABDNOR], the Senator from Indiana [Mr. LUGAR], the Senator from South Carolina [Mr. HOLLINGS], the Senator from New Jersey [Mr. BRADLEY], the Senator from South Carolina [Mr. THURMOND], the Senator from Indiana [Mr. QUAYLE], the Senator from Utah [Mr. GARN], the Senator from Maryland [Mr. SARBANES], the Senator from Michigan [Mr. LEVIN], and the Senator from Arizona [Mr. DECONCINI] were added as cosponsors of Senate Joint Resolution 203, a joint resolution designating November 6, 1985, as "Ignacy Jan Paderewski Day."

SENATE JOINT RESOLUTION 211

At the request of Mr. DURENBERGER, the names of the Senator from Nebraska [Mr. ZORINSKY], the Senator from North Dakota [Mr. BURDICK], the Senator from South Carolina [Mr. HOLLINGS], the Senator from Kansas [Mrs. KASSEBAUM], the Senator from Minnesota [Mr. BOSCHWITZ], the Senator from Kansas [Mr. DOLE], the Senator from Wisconsin [Mr. PROXMIRE], the Senator from South Dakota [Mr. ABDNOR], the Senator from Maryland [Mr. MATHIAS], the Senator from Connecticut [Mr. WEICKER], the Senator from Kentucky [Mr. FORD], and the Senator from Idaho [Mr. MCCLURE] were added as cosponsors of Senate Joint Resolution 211, a joint resolution to provide for the designation of the week of October 6, 1985, as "National Sudden Death Syndrome Awareness Week."

SENATE CONCURRENT RESOLUTION 68

At the request of Mr. DURENBERGER, the name of the Senator from Virginia [Mr. TRIBLE] was added as cosponsor of Senate Concurrent Resolution 68, a concurrent resolution expressing support for Chile's National Accord for the Transition to Full Democracy.

SENATE CONCURRENT RESOLUTION 71

At the request of Mr. WEICKER, the names of the Senator from Maine [Mr. COHEN], the Senator from California [Mr. CRANSTON], the Senator from Arizona [Mr. DECONCINI], the Senator from Minnesota [Mr. DURENBERGER], the Senator from New Jersey [Mr. LAUTENBERG], the Senator from Rhode Island [Mr. PELL], the Senator from Arkansas [Mr. PRYOR], the Senator from Utah [Mr. GARN], the Senator from Iowa [Mr. GRASSLEY] and the Senator from Delaware [Mr. ROTH] were added as cosponsors of Senate Concurrent Resolution 71, a concurrent resolution to commemorate the accomplishments of Public Law 94-142, the Education for All Handicapped Children Act on the 10th anniversary of its enactment.

SENATE RESOLUTION 96

At the request of Mr. GOLDWATER, the name of the Senator from Indiana [Mr. LUGAR] was added as a cosponsor of Senate Resolution 96, a resolution relating to the centennial observance of the University of Arizona.

AMENDMENTS SUBMITTED

APPROVAL OF COMPACT OF FREE ASSOCIATION

THURMOND (AND OTHERS) AMENDMENT NO. 719

Mr. THURMOND (for himself, Mr. HOLLINGS, Mr. HELMS, Mr. MOYNIHAN, Mr. HEFLIN, Mr. HEINZ, Mr. COHEN, Mr. WARNER, Mr. KENNEDY, Mr. MITCHELL, Mr. EAGLETON, Mr. SPECTER, Mr. EAST, Mr. COCHRAN, Mr. TRIBLE, Mr. DENTON, Mr. D'AMATO, Mr. SASSER, Mr. HATCH, Mr. PELL, Mr. MATTINGLY, Mr. GARN, Mr. LAXALT, Mr. ROCKEFELLER, Mrs. HAWKINS, Mr. GORE, Mr. DIXON, Mr. DODD, Mr. SIMON, Mr. FORD, Mr. DECONCINI, Mr. PRYOR, Mr. MATHIAS, Mr. LONG, Mr. LEAHY, Mr. METZENBAUM, Mr. RIEGLE, Mr. WEICKER, Mr. MCCONNELL, Mr. KASTEN, Mr. GLENN, Mr. BUMPERS, Mr. NUNN, and Mr. BYRD) proposed an amendment to the joint resolution (S.J. Res. 77) to approve the Compact of Free Association, and for other purposes; as follows:

At the end of the joint resolution, insert the following:

TITLE II—TEXTILE AND APPAREL TRADE ENFORCEMENT

SEC. 201. SHORT TITLE.

This title may be cited as the 'Textile and Apparel Trade Enforcement Act of 1985'.

SEC. 202. POLICY.

The policy of this title is—

THURMOND (AND OTHERS) AMENDMENT NO. 720

Mr. THURMOND (for himself, Mr. HOLLINGS, Mr. HELMS, Mr. MOYNIHAN, Mr. HEFLIN, Mr. HEINZ, Mr. COHEN, Mr. WARNER, Mr. KENNEDY, Mr. MITCHELL, Mr. EAGLETON, Mr. SPECTER, Mr. EAST, Mr. COCHRAN, Mr. TRIBLE, Mr. DENTON, Mr. D'AMATO, Mr. SASSER, Mr. HATCH, Mr. PELL, Mr. MATTINGLY, Mr. GARN, Mr. LAXALT, Mr. ROCKEFELLER, Mrs. HAWKINS, Mr. GORE, Mr. DIXON, Mr. DODD, Mr. SIMON, Mr. FORD, Mr. DECONCINI, Mr. PRYOR, Mr. MATHIAS, Mr. LONG, Mr. LEAHY, Mr. METZENBAUM, Mr. RIEGLE, Mr. WEICKER, Mr. MCCONNELL, Mr. KASTEN, Mr. GLENN, Mr. BUMPERS, Mr. NUNN, and Mr. BYRD) proposed an amendment to amendment No. 719 proposed by Mr. THURMOND (and others) to the joint resolution Senate Joint Resolution 77, supra; as follows:

At the end of the matter proposed to be inserted, insert the following:

(1) to prevent further disruption of the United States textiles and textile products markets, damage to United States textile and apparel manufacturers, and loss of jobs by United States workers by providing for orderly and nondisruptive growth of imports of textiles and textile products; and

(2) to implement the objectives of the Multi-Fiber Arrangement by requiring the effective enforcement of import levels of textiles and textile products contemplated by the Multi-Fiber Arrangement.

SEC. 203. FINDINGS.

The Congress finds that—

(1) the United States and most major textile producing countries are parties to the Multi-Fiber Arrangement, the purpose of which is to ensure the orderly growth of imports of textiles and textile products and to avoid disruption of the markets for textiles and textile products in importing nations;

(2) the Multi-Fiber Arrangement, which first entered into force on January 1, 1974, and which was most recently extended in December 1981, through July 1986, contemplates a 6 per centum annual rate of growth for imports for most producing countries and provides for a lower rate of growth for imports from significant producing countries;

(3) since 1980, the objective of orderly growth of imports of textiles and textile products provided for in the Multi-Fiber Arrangement has not been achieved; from 1981 through 1984 imports of textiles and textile products into the United States have grown at an annual rate of 19 per centum, far in excess of the 1 per centum growth rate of the United States market for textiles and textile products during the same period and far in excess of the annual rate of import growth of less than 2 per centum that prevailed during the period 1974 through 1980;

(4) the disruptive surge in imports of textiles and textile products which occurred from 1981 through 1984 resulted from the failure of the United States to enforce adequately its rights under the Multi-Fiber Arrangement and to extend coverage of the Multi-Fiber Arrangement to imports made of competing fibers;

(5) import growth of apparel products has substantially outstripped the growth of the domestic market so that import penetration of the domestic market has more than doubled in the last six years, reaching a level of 50 per centum in 1984;

(6) based on a nationwide audit of major retail outlets, the import penetration of such major items of apparel as trousers, blouses, shirts, suits, skirts and sweaters exceeds 50 per centum of domestic consumption;

(7) since the most recent extension of the Multi-Fiber Arrangement, certain producing countries have sharply increased their exports of textiles and textile products made in whole or in part from fibers not subject to the Multi-Fiber Arrangement with the effect of circumventing restraints agreed to under the Arrangement; the increased imports of these textiles and textile products have caused disruption of the United States market for textiles and textile products and have seriously undercut the effectiveness of the Multi-Fiber Arrangement;

(8) imports of textiles and textile products into the United States are predominantly the product of significant producing countries, with five large producing countries now accounting for more than 50 per centum of all imports of textiles and textile products;

(9) the domination of import trade by producers in the significant producing countries has limited participation in the United States market by other producing countries, many of which share important trade and other national interests, and encourage mutually beneficial trade and investment with the United States;

(10) a change in United States textile trade policy to afford the smaller producing countries and countries in the Caribbean region a relatively greater share of imports of textiles and textile products would promote the national economic interests of the United States;

(11) the textile and apparel trade deficit of the United States was more than $16,200,000,000 in 1984, an increase of 53 per centum over 1983, and accounted for 13 per centum of the Nation's overall merchandise trade deficit;

(12) the current level of imports of textiles and textile products, ten billion square yard equivalents in 1984, represents over one million job opportunities lost to United States workers;

(13) imported textiles and textile products now account for 38 per centum (the equivalent of three million two hundred thousand bales of cotton) of the annual cotton consumption in the United States; only one of five of the bale equivalents included in imported textiles and textile products is grown in the United States; the result of the massive increases in cotton textile and apparel imports has been a declining market share for, and a $1,000,000,000 loss to, domestic cotton producers in 1983 alone, which was only partially offset by Federal cotton program benefits; another result is that United States cotton producers, who are spending about $20,000,000 annually in research and promotion efforts, have built markets not for themselves but for foreign growers;

(14) imports of wool products have doubled since 1980, creating major disruptions among domestic wool products producers and seriously depressing the price of United States produced raw wool; the Multi-Fiber Arrangement recognizes that imports of certain products, such as wool products, in certain countries, including the United States, pose particular problems for certain industries, such as, the wool products industries in those countries and import growth rates of 1 per centum or less have been permitted in such cases;

(15) as a result of this increased penetration and the very limited growth of the domestic market, the United States companies producing textiles and textile products identical, or similar, to those imported have been seriously damaged, many of them have been forced out of business, many have closed plants or curtailed operations, workers in such companies have lost employment and have been otherwise materially and adversely affected, and serious hardship has been inflicted on hundreds of impacted communities causing a substantial reduction in economic activity and lost revenues to local governments;

(16) the increase in imports and increased import penetration of the United States domestic market have occurred notwithstanding the fact that, through extensive modernization programs and investment in more modern equipment, productivity, as measured by output per man hour, in the textile mill products sector has increased in the last ten years at the average annual rate of 4.2 per centum and in the apparel sector at the average annual rate of 3.4 per centum, as compared with the lower productivity growth of all manufacturing in the same period of 1.9 per centum;

(17) the factors described above are causing serious damage, or the actual threat thereof, to domestic producers of textiles and textile products; as a result, market disruption exists in the United States requiring the new measures established under this Act;

(18) based on experience during the past ten years and on other factors, the growth of the United States market for textiles and textile products is unlikely to exceed an average annual rate of 1 per centum during the next several years;

(19) if the rate of growth of imports of textiles and textile products into the United States that occurred since 1980 continues, plant closings will continue to accelerate, leaving the United States market with reduced domestic competition for imported products;

(20) in order to avoid further market disruption and deterioration of the situation confronting the United States industry producing textiles and textile products, which is already seriously damaged, it is essential—

(A) to require the establishment of import levels for textiles and textile products supplied by major producing countries that reflect—

(i) the import level that would have occurred had imports from these countries grown since 1980 by the 6 per centum annual growth rate contemplated by the Multi-Fiber Arrangement, or 1 per centum in the case of wool products, or

(ii) the actual import level resulting from restraints under a bilateral agreement with the United States providing for an annual import growth rate of less than 6 per centum,

whichever is the lesser,

(B) to require the establishment of import levels for textiles and textile products supplied by producing countries that reflect their 1984 import levels,

(C) to require the establishment of import levels for textiles and textile products supplied by small producing countries that provide a significant increase in their market shares to meet their development needs and to permit future growth in such shares consistent with the Multi-Fiber Arrangement, and

(D) to limit the future growth rate of imports of textiles and textile products into the United States to levels which reflect orderly growth as provided for in the Multi-Fiber Arrangement and the most recent Protocol extending the Multi-Fiber Arrangement;

(21) the establishment of import levels, and limitation on future import growth to levels, that reflect effective enforcement of the Multi-Fiber Arrangement and that also reflect the expected growth rate of the United States market for textiles and textile products will fulfill announced policy objectives of the United States regarding trade in textiles and apparel;

(22) as the Department of Defense has long recognized, a strong, viable and efficient domestic textiles and textile products industry is essential in order to avoid impairment of the national security of the United States;

(23) the developments that have led to the sharp increase in imports of textiles and textile products since 1980 may not have been foreseeable; nevertheless, the rights of the United States under international agreements should have been invoked in order to prevent increased quantities of textiles and textile products from being imported under such conditions as to cause or threaten serious damage to domestic producers of textiles and textile products in the United States; and

(24) the sharp increase in imports of textiles and textile products since 1980, and the effect of this increase on the United States textiles and apparel industry and its workers, constitutes exceptional circumstances within the meaning of the Multi-Fiber Arrangement and its Protocol.

SEC. 204. DEFINITIONS.

For purposes of this title—

(1) The term "textiles and textile products" includes, but is not limited to, all manmade fibers, tops, yarns, piece goods, made-up articles, apparel, and other textile manufactured products (which derive their chief characteristics from their textile components) made in whole or in part from any natural or manmade fiber, or blend thereof, that are classified under schedule 3, part 6 of schedule 6, part 1, 4, 5 (except subpart E), 7, or 13 of schedule 7, or part 1 of schedule 8 of the Tariff Schedules of the United States or part 1 of the Appendix to the Tariff Schedules of the United States;

(2) The term "category" means, with respect to textiles and textile products that are the product of a country, each of the following—

(A) each category of textiles and textile products identified by a three-digit textile category number in the Department of Commerce publication "Correlation: Textile and Apparel Categories with Tariff Schedules of the United States Annotated", dated January 1985 and, subsequently, in the first edition of such document that is revised to reflect the adoption by the United States of the Nomenclature Structure of the Harmonized System;

(B) with respect to each country with which the United States has (i) an agreement on the date of enactment of this title limiting exports of textiles and textile products to the United States that includes specific limitations on subdivisions of a category described in subparagraph (A), or (ii) taken unilateral action to limit products entered under such a subdivision, each such subdivision;

(C) a category consisting of the man-made fiber products classified under subpart E of part 1 of schedule 3 to the Tariff Schedules of the United States; and

(D) each category consisting of each of the following products when, because of any fiber content, that product is not subject to the Multi-Fiber Arrangement:

(i) yarn,

(ii) fabric,

(iii) apparel, and

(iv) other textile products;

(3) The term "import sensitive category" means—

(A) a category (other than a category applicable to textiles and textile products that are a product of a country in the Caribbean region) for which the ratio of imports to domestic production, as reported in the Department of Commerce publication "U.S. Production, Imports and Import/Production Ratios for Cotton, Wool and Man-Made Fiber Textiles and Apparel", equals or exceeds 40.0 for the preceding calendar year; and

(B) a category covering wool products;

(4) The term "country" means a foreign country (other than Canada and the Member States of the European Economic Community as constituted on January 1, 1985), a foreign territory, an insular possession of the United States, or any other territory, possession, colony, trusteeship or political entity, whether affiliated with the United States or not, that is outside the customs territory of the United States;

(5) The term "major producing country" means a country the annual aggregate quantity of textiles and textile products of which that entered under the categories referred to in paragraph (2)(A) during calendar year 1984 equalled or exceeded 10 percent of all textiles and textile products under such categories that entered from all countries and from Canada and the Member States of the European Economic Community during calendar year 1984;

(6) The term "producing country" means a country (other than a major producing country and a country in the Caribbean region) the annual aggregate quantity of textiles and textile products of which that entered under the categories referred to in paragraph (2)(A) during calendar year 1984 equalled or exceeded 1.25 per centum of all textiles and textile products under such categories that entered from all countries and from Canada and the Member States of the European Economic Community during calendar year 1984;

(7) The term "small producing country" means a country other than a major producing country and a producing country;

(8) The term "country in the Caribbean region" means Mexico and a country eligible for designation as a beneficiary country under section 212 of the Caribbean Basin Economic Recovery Act (19 U.S.C. 2702);

(9) The term "wool product" means an article containing over 17 per centum by weight of wool;

(10) The term "cotton, wool and man-made fiber sweaters" means articles classified under categories 345, 445, 446, 645 or 646 as defined in the Department of Commerce publication "Correlation Textile and Apparel Categories with Tariff Schedules of the United States Annotated," dated January 1985;

(11) The term "entered" means entered, or withdrawn from warehouse, for consumption in the customs territory of the United States;

(12) The term "imported" means entered; and

(13) The term "Multi-Fiber Arrangement" means the Arrangement Regarding International Trade in Textiles, as extended by the Protocol done at Geneva, December 22, 1981.

SEC. 205. LIMITS ON TEXTILE AND APPAREL IMPORTS.

(a) CALENDAR YEAR 1985.—Notwithstanding any other provision of law, the aggregate quantity of textiles and textile products classified under a category that is entered during calendar year 1985 shall not exceed—

(1) in the case of textiles and textile products that are a product of a major producing country other than textile luggage and textile flat goods subject (as of the date of enactment of this Act) to a specific limitation under an agreement with a major producing country, the lesser of an amount equal to 101 per centum—

(A) of the aggregate quantity of such products of such country classified under such category that would have entered during calendar year 1984 if the aggregate quantity of such products of such country classified under such category entered during calendar year 1980 had increased by 6 per centum annually, or 1 per centum annually in the case of a category covering a wool product, during calendar years 1981, 1982, 1983, and 1984, or

(B) if the United States has an agreement with such country providing for an annual growth rate for such category of less than 6 per centum, of the aggregate quantity of such products of such country classified

under such category that entered during calendar year 1984;

(2) in the case of textile luggage and textile flat goods subject (as of the date of enactment of this Act) to specific limitation under an agreement with a major producing country, the specific limitation quantity in effect as of the date of enactment of the Act;

(3) in the case of textiles and textile products that are a product of a producing country, an amount equal to the aggregate quantity of—

(A) such products from such country classified under such category that entered during calendar year 1984, or

(B) in the case of textile luggage and textile flat goods subject (as of the date of enactment of this Act) to specific limitation under an agreement with a producing country, the specific limitation quantity in effect as of the date of enactment of this Act;

(4) in the case of textiles and textile products that are a product of a small producing country (other than cotton, wool, and man-made fiber sweaters described in paragraph (5)), an amount equal to the sum of—

(A) the aggregate quantity of such products of such country classified under such category that entered during calendar year 1984, plus

(B) an amount equal to—

(i) 15 per centum of such quantity, in the case of a category that is not an import sensitive category, or

(ii) 1 per centum of such quantity, in the case of a category that is an import sensitive category; and

(5) in the case of cotton, wool and man-made fiber sweaters that are—

(A) the product of substantial assembly operations in Guam from otherwise completed knit-to-shape component parts, an aggregate amount equal to 160,000 dozen; and

(B) the product of substantial assembly operations in the Commonwealth of the Northern Mariana Islands from otherwise completed knit-to-shape component parts, an aggregate amount equal to 70,000 dozen.

If application of paragraph (1) would result in the aggregate quantity of textiles and textile products of a major producing country classified under all categories permitted to enter during calendar year 1985 to be less than 70 per centum of the aggregate quantity of such products of such country that entered during calendar year 1984, then, notwithstanding paragraph (1), the aggregate quantity of textiles and textile products of such country that may be entered under each category during calendar year 1985 shall not be less than 40 per centum of the aggregate quantity of such products of such country that entered under such category during calendar year 1984.

(b) GROWTH ADJUSTMENT.—For calendar years after 1985, the aggregate quantity of textiles and textile products classified under each category that may be entered during each such calendar year shall—

(1) in the case of such products that are a product of a major producing country or of a producing country, be increased by an amount equal to 1 per centum of the aggregate quantity that could be entered under such category during the preceding calendar year; and

(2) in the case of such products that are a product of a small producing country, be increased by an amount equal to—

(A) in the case of a category (other than an import sensitive category), 6 per centum of the aggregate quantity that could be entered under that category during the preceding calendar year, and

(B) in the case of an import sensitive category, 1 per centum of the aggregate quantity that could be entered under that category during the preceding calendar year.

If the aggregate quantity that could be entered under a category for a calendar year after 1985 is reduced under section 210(b), than in the first calendar year in which there is no such reduction, this subsection shall be applied as if there had been no reduction under section 210(b) in previous calendar years.

(c) MINIMUM QUANTITIES.—If, under subsection (a) or (b), the aggregate quantity of textiles and textile products of a country that may be entered during a calendar year under a category is—

(1) less than one million square yard equivalents, in the case of a category covering yarn, fabric, made-ups, and miscellaneous products, other than wool products;

(2) less than seven hundred thousand square yard equivalents, in the case of a category covering apparel, other than wool products apparel; or

(3) less than one hundred thousand square yard equivalents, in the case of a category covering wool products,

then, notwithstanding subsection (a) or (b), the aggregate quantity of textiles and textile products that may be entered from such country under such category during the calendar year shall be one million, seven hundred thousand, or one hundred thousand square yard equivalents, respectively. The amount prescribed in the preceding sentence shall be accorded growth subject to the provisions of subsection (b) beginning the first calendar year after the aggregate quantity of imports from such country under such category equals the minimum quantity prescribed under this subsection.

(d) SPECIAL RULE.— For purposes of this section, if during any calendar year after 1984, the aggregate quantity of textiles and textile products that are the product of a small producing country, other than a country in the Caribbean region, and that are entered under the categories referred to in paragraph (2)(A) of section 204 equals or exceeds 1.25 per centum of all textiles and textile products entered under such categories from all countries and from Canada and the Member States of the European Economic Community during such calendar year, then such small producing country shall be considered to be a producing country for all succeeding calendar years.

(e) ENFORCEMENT.—The Secretary of Commerce shall prescribe such regulations governing the entry, or withdrawal from warehouse, for consumption of textiles and textile products as may be necessary to carry out this title.

SEC. 206. IMPORT LICENSING.

In order to ensure the equitable and efficient administration of section 205 of this title, the Secretary of Commerce shall, within six months after the date of enactment of this title, establish and administer an import licensing system under which an importer of any textiles and textile products from any country and from Canada and the Member States of the European Economic Community, will be required to present an import permit as a condition of entry. The Secretary shall charge a fee for import licenses in such amount as may be necessary to cover the cost of administration of the system.

SEC. 207. ANNUAL REPORT.

Not later than March 15, 1986, and March 15 of each calendar year thereafter, the President shall submit to the Congress a report on the administration of this title during the preceding calendar year. Such report shall include detailed information about the implementation and operation of the limitations established under section 205. All departments and agencies shall cooperate in preparation of this report, as requested by the President.

SEC. 208. REVIEW.

The Secretary of Commerce shall commence ten years after the date of enactment of this title a formal review of the operation of the Textile Import Control Program under the provisions of this title. The Secretary shall consult members and committees of Congress, representatives of the labor unions and the industries affected by the program, and appropriate government agencies. Within six months after the commencement of the study, the Secretary shall submit to Congress his findings as well as his recommendations for the future conduct of the program.

SEC. 209. DUTY FREE ENTRY OF CERTAIN SWEATERS FROM GUAM AND THE NORTHERN MARIANAS.

Subpart A of part 7, schedule 3 of the Tariff Schedules of the United States (19 U.S.C. 1202) is amended by adding at the end thereof the following new item:

" 385.97	Cotton, wool and man-made fiber sweaters that are entitled to enter under the quotas established under section 205(a)(5) of the Textile and Apparel Trade Enforcement Act of 1985 or the increased quotas under section 205(b) of such Act that adjust the quotas under such section 205(a)(5) and that do not contain foreign materials to the value of more than 50 percent of their total value as this standard is applied pursuant to Headnote 3(a) of the General Headnotes and Rules of Interpretation.	Free."

SEC. 210. EFFECTIVE DATE.

(a) IN GENERAL.—Subject to the provisions of subsection (b), the provisions of this title shall apply to textiles and textile products entered, or withdrawn from warehouse, for consumption on or after the date of enactment of this Act.

(b) CALENDAR YEARS 1985 AND 1986.—The Secretary of Commerce shall determine, and publish in the Federal Register, the aggregate quantity, if any, of textiles and textile products that may be entered under section 205 (a) or (c) of this title from each country under each category during the period beginning on the date of enactment of this title and ending December 31, 1985. Notwithstanding subsection (a), to the extent that the aggregate quantity of imports of textiles and textile products from a country under a category entered after December 31, 1984, and before the date of enactment of this title exceeds the quantity permitted entry for such country and such category during calendar year 1985 under subsection (a) or (c) of section 205, then the limit that would otherwise pply under section 205(b) for such category for such country for calendar year 1986 shall be reduced by the amount of such excess quantity. If such excess quantity exceeds the limit that would otherwise apply under section 205(b) for such category for such country for calendar year 1986, then the limit for such category and country for calendar years after 1986 shall be reduced until such excess is accounted for.

TITLE III—FOOTWEAR

SEC. 301. SHORT TITLE.

This title may be cited as the "American Footwear Industry Recovery Act of 1985".

SEC. 302. FINDINGS AND PURPOSE.

(a) The Congress finds that—

(1) The domestic nonrubber footwear industry is important to the national economy, and footwear firms are vital to the economic health of small towns throughout the United States.

(2) The domestic nonrubber footwear industry is highly labor intensive, and low capital requirements for entry into footwear production make it a primary target for industrializing or newly industrialized countries. As a consequence, footwear is produced in virtually every footwear consuming country in the world.

(3) Tremendous competitive pressure has been created in the world footwear market in the last decade as a result of rapidly growing production and capacity in numerous developing and developed countries. This development has resulted in the widespread erection of tariff and nontariff barriers by foreign countries designed to protect their domestic footwear industries.

(4) The United States has historically resisted the protectionist trends of other producing nations and has instead maintained a market distinguished by its accessibility. As a result, the United States market has become a focal point for world trade in nonrubber footwear.

(5) The diversion of international trade to the United States market has resulted in serious injury to domestic producers as manifested by—

(A) the loss of 155,000 footwear jobs since 1968,

(B) a decline in domestic production and production capacity, and

(C) the permanent closure of over 500 plants during the same period.

(6) The serious injury to domestic producers poses a significant danger to the industry's supplier base as well.

(7) The domestic nonrubber footwear producers have made a significant commitment to the future of the industry through substantial capital investment.

(8) Since the termination of temporary import relief in 1981, capital investment in the domestic nonrubber footwear industry has declined as the industry struggled to battle the massive surge in imports which increased the percentage share of imported footwear in the United States market from, 51 percent in 1981 to 77 percent in 1985.

(9) Without the restriction of import levels, capital investment in this domestic industry will continue to decrease.

(10) The domestic nonrubber footwear industry has thrice been judged by the International Trade Commission, as recently as May 1985, to be seriously injured by imports.

(11) Since the termination of the two, four-year orderly marketing agreements in 1981, the harm to the domestic industry is even more critical then the serious injury which triggered the Commission's unanimous findings in 1976 and 1977.

(12) The domestic nonrubber footwear industry has not been afforded adequate and appropriate relief from imports; therefore, the Congress concludes that—

(A) the administrative process under sections 201, 202, and 203 of the Trade Act of 1974 has proven inadequate; and

(B) in the absence of and effective remedy under such process, legislative relief is essential.

(b)(1) It is the purpose of Congress in enacting this section to—

(A) promote and expend the economic health of the United States nonrubber footwear industry,

(B) preserve the jobs of American workers, and

(C) prevent the further decline of this important domestic industry.

(2) It is declared to be the policy of Congress that access to the United States market for foreign-produced nonrubber footwear should be on an equitable basis to ensure orderly trade in nonrubber footwear, reduce unfair trade in nonrubber footwear, and address United States balance-of-payments problems, of which footwear is the seventh largest component. In order to accomplish these objectives, it is deemed necessary and appropriate to limit imports of nonrubber footwear into the United States market.

SEC. 303. DEFINITIONS.

For purposes of this title—

(1) The term "entered" means entered, or withdrawn from warehouse, for consumption in the customs territory of the United States.

(2) The term "Secretary" means Secretary of Commerce.

(3) The term "nonrubber footwear" means the following categories of nonrubber footwear products, identified by reference to the following item numbers of the Tariff Schedules of the United States (as in effect on January 1, 1985): 700.05 through 700.45; 700.56; 700.72 through 700.83; and 700.95.

(4) The term "apparent domestic consumption" means, with respect to any 1-year period, the sum of imports plus domestic production less exports.

SEC. 304. QUANTITATIVE LIMITATION ON NONRUBBER FOOTWEAR.

(a)(1) During the 8-year period beginning on the date of enactment of this title, the aggregate number of pairs of nonrubber footwear which may be entered during any 1-year period shall not exceed 60 percent of the estimated apparent domestic consumption of nonrubber footwear for such period.

(2) The quantitative limitation imposed by paragraph (1) for any 1-year period shall be distributed among the following categories of nonrubber footwear so that the aggregate number of pairs of nonrubber footwear in such category which may be entered during any 1-year period shall not exceed the quantity equal to—

(A) in the case of nonrubber footwear with a customs value that does not exceed $1.25 per pair, 10 percent of apparent domestic consumption of nonrubber footwear for such period,

(B) in the case of nonrubber footwear with a customs value that exceeds $1.25 per pair but does not exceed $2.50 per pair, 5.4 percent of apparent domestic consumption of nonrubber footwear for such period, and

(C) in the case of nonrubber footwear with a customs value that exceeds $2.50 per pair, 44.6 percent of apparent domestic consumption of nonrubber footwear for such period.

(b) Within sixty days after the effective date of this title, and on the first day of the fourth quarter of each 1 year period thereafter, the Secretary shall determine on the basis of the best information available, including his own or independent forecasts, the expected apparent domestic consumption of nonrubber footwear for, in the case of the initial determination, the remainder of the current 1 year period and in the case of the first day of the fourth quarter of each 1 year period thereafter, the next succeeding 1 year period. On each such date, the Secretary shall determine and publish in the Federal Register the allocation for the next succeeding 1 year period of permissible imports of nonrubber footwear as required by this section.

(c) On the first days of the first, second, and third quarters of each 1 year period, the Secretary shall revise the determinations of expected apparent domestic consumption made under subsection (b) for the current 1 year period on the basis of the best information then available and shall make such adjustments in the quantity of nonrubber footwear permitted to be imported under this section as indicated by the revision. All revisions and adjustments made under this subsection shall be published in the Federal Register.

(d) If the revised determination of expected apparent domestic consumption published in the Federal Register under subsection (c) on the first day of the third quarter in any 1 year period for nonrubber footwear varies from the actual apparent domestic consumption of nonrubber footwear for such 1 year period, the Secretary shall publish in the Federal Register on the first day of the second quarter of such succeeding 1 year period a revision to the determination of expected apparent domestic consumption for such 1 year period made under subsection (c) of this section. The revision shall be in the amount of such variance and shall be in addition to any other revision that would be made on any such first day of the second quarter under subsection (c) of this section.

(e)(1) The Secretary and the Secretary of the Treasury shall take such actions within their respective jurisdictions as may be necessary or appropriate to enforce the provisions of this section, including without limitation, the issuance of orders to customs officers to bar entry to merchandise if the entry of such merchandise would cause the limitations established under this section to be exceeded.

(2)(A) The Secretary and the Secretary of the Treasury are each authorized to issue such implementing regulations, including the issuance of import licenses, as may be necessary or appropriate to effect the purposes of this section and to enforce the provisions of this section.

(B) Before prescribing any regulations under subparagraph (A), the Secretary or the Secretary of the Treasury, as the case may be, shall—

(i) consult with interested domestic parties,

(ii) afford an opportunity for such parties to comment on the proposed regulations, and

(iii) consider all such comments before prescribing final regulations.

SEC. 305. COMPENSATION AUTHORITY.

For purposes of section 123 of the Trade Act of 1974 (19 U.S.C. 2133), the imposition of the quantitative limitation under section 204 shall be treated as action taken under section 203 of the Trade Act of 1974 (19 U.S.C. 2253).

MATSUNAGA AMENDMENT NOS. 721 AND 722

(Ordered to lie on the table)

Mr. MATSUNAGA submitted two amendments intended to be proposed by him to the joint resolution Senate Joint Resolution 77, supra; as follows:

AMENDMENT No. 721

At the end of the matter proposed to be inserted, add the following:

SEC. . For purposes of applying the provisions of this Act relating to the imposition of a limitation on the quantity of textiles and textile products that may be entered, or withdrawn from warehouse, for consumption in the customs territory of the United States, the term "country", notwithstanding any other provision of this Act—

(1) shall mean any foreign country or any territory of a foreign country, and

(2) shall not include any territory or insular possession of the United States.

AMENDMENT No. 722

At the end of the matter proposed to be inserted, add the following:

SEC. . For purposes of applying the provisions of this Act relating to the imposition of a limitation on the quantity of textiles and textile products that may be entered, or withdrawn from warehouse, for consumption in the customs territory of the United States, the term "textiles and textile products" shall, notwithstanding any other provision of this Act, not include any printed textiles.

BRADLEY AMENDMENT NO. 723

Mr. BRADLEY proposed an amendment to the amendment of the Committee on Finance on page 92 of the joint resolution, Senate Joint Resolution 77, supra; as follows:

Strike all after sect 7 p. 92, line one, and insert in lieu of the following:

TEXTILE AND APPAREL TRADE ENFORCEMENT

(a) The Congress finds that—

(1) the United States and most major textile producing countries are parties to the Multi-Fiber Arrangement, the purpose of which is to ensure the orderly growth of imports of textiles and textile products and to avoid disruption of the markets for textiles and textile products in importing nations;

(2) the Multi-Fiber Arrangement, which first entered into force on January 1, 1974, and which was most recently extended in December 1986 through July 1986, contemplates a 6-percent annual rate of growth for imports for most exporting countries and provides for a lower rate of growth for imports from major exporting countries;

(3) since 1980, the objective of orderly growth of imports of textiles and textile products provided for in the Multi-Fiber Arrangement has not been achieved; from 1981 through 1984, imports of textiles and textile products into the United States have grown at an annual rate of 19 percent, far in excess of the 1 percent growth rate of the United States market for textiles and textile products during the same period and far in excess of the annual rate of import growth of less than 2 percent that prevailed during the period 1974 through 1980;

(4) the disruptive surge in imports of textiles and textile products which occurred from 1981 through 1984 resulted from the failure of the United States to enforce adequately its rights under the Multi-Fiber Arrangement and to extend coverage of the Multi-Fiber Arrangement to imports made of competing fibers;

(5) import growth of apparel products has substantially outstripped the growth of the domestic market so that import penetration of the domestic market has more than doubled in the last 6 years, reaching a level of 50 percent in 1984;

(6) based on a nationwide audit of major retail outlets, the import penetration of such major items of apparel as trousers, blouses, shirts, suits, skirts, and sweaters exceeds 50 percent of domestic consumption;

(7) since the most recent extension of the Multi-Fiber Arrangement, certain exporting countries have sharply increased their exports of textiles and textile products made in whole or in part from fibers not subject to the Multi-Fiber Arrangement with the effect of circumventing restraints agreed to under the Arrangement; the increased imports of these textiles and textile products have caused disruption of the United States market for textiles and textile products and have seriously undercut the effectiveness of the Multi-Fiber Arrangement;

(8) imports of textiles and textile products into the United States are predominantly the product of major exporting countries, with 5 large exporting countries now accounting for more than 50 percent of all imports of textiles and textile products;

(9) the domination of import trade by producers in the major exporting countries has limited participation in the United States market by other exporting countries, many of which share important trade and other national interests, and encourage mutually beneficial trade and investment, with the United States;

(10) a change in United States textile trade policy to afford the smaller exporting countries and countries in the Caribbean region a relatively greater share of imports of textiles and textile products would promote the national economic interests of the United States;

(11) the textile and apparel trade deficit of the United States was more than $16,200,000,000 in 1984, an increase of 53 percent over 1983, and accounted for 13 percent of the Nation's overall merchandise trade deficit;

(12) the current level of imports of textiles and textile products, 9,800,000,000 square yard equivalents in 1984, represents over 1,000,000 job opportunities lost to United States workers;

(13) imported textiles and textile products now account for 38 percent (the equivalent of 3.2 million bales of cotton) of the annual cotton consumption in the United States, only one of five of the bale equivalents included in imported textiles and textile products is grown in the United States;

(14) the massive increase in cotton textile and apparel imports had resulted in a declining market share for, and a $1,000,000,000 loss to, domestic cotton producers in 1983 alone which was only partially offset by Federal cotton program benefits;

(15) United States cotton producers, who are spending about $20,000,000 annually in research and promotion efforts, have built markets not for themselves but for foreign growers;

(16) imports of wool products have doubled since 1980, creating major disruptions among domestic wool products producers and seriously depressing the price of United States produced raw wool;

(17) the Multi-Fiber Arrangement recognizes that imports of certain products, such as wool products, in certain countries, including the United States, pose particular problems for certain industries, such as, the wool products industries, in those countries and import growth rates of 1 percent or less have been permitted in such cases;

(18) as a result of this increased penetration and the very limited growth of the domestic market, the United States companies producing textiles and textile products identical, or similar, to those imported have been seriously damaged, many of them have been forced out of business, many have closed plants or curtailed operations, workers in such companies have lost employment and have been otherwise materially and adversely affected, and serious hardship has been inflicted on hundreds of impacted communities causing a substantial reduction in economic activity and lost revenues to local governments;

(19) the increase in imports and increased import penetration of the United States domestic market have occurred notwithstanding the fact that, through extensive modernization programs and investment in more modern equipment, productivity (as measured by output per man-hour) in the textile mill products sector has increased in the last 10 years at the average annual rate of 4.2 percent and in the apparel sector at the average annual rate of 3.4 percent, as compared with the lower productivity growth of all manufacturing in the same period of 1.9 percent;

(20) the factors described in the preceding paragraphs are causing serious damage, or the actual threat thereof, to domestic producers of textiles and textile products; as a result, market disruption exists in the United States requiring the new measures established under this Act;

(21) based on experience during the past 10 years and on other factors, the growth of the United States market for textile and textile products is unlikely to exceed an average annual rate of 1 percent during the next several years;

(22) if the rate of growth of imports of textile and textile products into the United States that occurred since 1980 continues, plant closings will continue to accelerate, leaving the United States market with reduced domestic competition for imported products;

(23) in order to avoid further market disruption and deterioration of the situation confronting the United States industry producing textiles and textile products, which is already seriously damaged, it is essential—

(A) to require the establishment of import levels for textiles and textile products supplied by major exporting countries that reflect the lesser of—

(i) the import level that would have occurred had imports from these countries grown since 1980 by the 6 percent annual growth rate contemplated by the Multi-Fiber Arrangement, or

(ii) the actual import level resulting from restraints under a bilateral agreement with the United States providing for an annual import growth rate of less than 6 percent,

(B) to require the establishment of import levels for textiles and textile products supplied by smaller exporting countries that provide a significant increase in their market shares to meet their development needs and to permit future growth in such shares consistent with the Multi-Fiber Arrangement, and

(C) to limit the future growth rate of imports of textiles and textile products into the United States to levels which reflect orderly growth as provided for in the Multi-Fiber Arrangement and the most recent Protocol extending the Multi-Fiber Arrangement;

(24) the establishment of import levels, and limitation of future import growth to levels, that reflect effective enforcement of the Multi-Fiber Arrangement and that also

reflect the expected growth rate of the United States market for textiles and textile products will fulfill announced policy objectives of the United States regarding trade in textiles and apparel;

(25) as the Department of Defense has long recognized, a strong, viable, and efficient domestic textiles and textile products industry is essential in order to avoid impairment of the national security of the United States;

(26) the developments that have led to the sharp increase in imports of textiles and textile products since 1982 may not have been foreseeable; nevertheless, the rights of the United States under international agreements should have been invoked in order to prevent increased quantities of textiles and textile products from being imported under such conditions as to cause or threaten serious damage to domestic producers of textiles and textile products in the United States; and

(27) the sharp increase in imports of textiles and textile products since 1980, and the effort of this increase on the United States textile and apparel industry and its workers, constitutes exceptional circumstances within the meaning of the Multi-Fiber Arrangement and its Protocol.

(b) The purpose of this section is—

(1) to prevent further—

(A) disruption of the United States textiles and textile products markets,

(B) damage to United States textile and apparel manufacturers, and

(C) loss of jobs by United States workers, by providing for orderly and nondisruptive growth of imports of textiles and textile products;

(2) to provide temporary relief in order to provide an opportunity for adjustment to import competition; and

(3) to implement the objectives of the Multi-Fiber Arrangement by requiring the effective enforcement of import levels of textiles and textile products contemplated by the Multi-Fiber Arrangement.

(c) For purposes of this section—

(1) The term "textiles and textile products" includes, but is not limited to—

(A) all man-made fibers, and

(B) all—

(i) tops,

(ii) yarns,

(iii) piece goods,

(iv) made-up articles,

(v) garments, and

(vi) other textile manufactured products which derive their chief characteristics from their textile components.

made in whole or in part from any natural or man-made fiber, or blend thereof,

that are classified under schedule 3, part 6 of schedule 6, part 1, 4, 5, 7, or 13 of schedule 7, or part 1 of schedule 8 of the Tariff Schedules of the United States or part 1 of the Appendix to such Schedules.

(2)(A) The term "category" means, with respect to any textile or textile product, the category into which such textile or textile product is classified under subparagraph (B).

(B) The Secretary of the Treasury shall classify all textiles and textile products according to a system which uses the following categories:

(i) each of the categories of textiles and textile products identified by a 3-digit textile category number in the Department of Commerce publication of January 1985 entitled "Correlation: Textile and Apparel Categories with Tariff Schedules of the United States Annotated";

(ii) a separate category for man-made fiber articles classified under subpart E of part 1 of schedule 3 of the Tariff Schedules of the United States; and

(iii) a separate category for each of the following articles which, because of fiber content, are not subject to the Multi-Fiber Arrangement:

(I) yarn,

(II) fabric,

(III) apparel, and

(IV) other textile products.

(3) The term "foreign country" includes any foreign territory or insular possession of the United States.

(4) The term "entered" means entered, or withdrawn from warehouse, for consumption in the customs territory of the United States.

(5) The term "Multi-Fiber Arrangement" means the Arrangement Regarding International Trade in Textiles, as extended by the Protocol done at Geneva on December 22, 1981.

(6) The term "Commission" means the United States International Trade Commission.

(d)(1) The Commission shall conduct an investigation for the purpose of—

(A) determining—

(i) the extent to which the domestic textile industry has been seriously injured, and is threatened with serious injury, by reason of imports of textiles, and

(ii) the extent to which the domestic apparel industry has been seriously injured, and is threatened with serious injury, by reason of imports of apparel, and

(B) recommending—

(i) the amount of any increase in, or imposition of, a duty or other import restriction on textiles which is necessary to prevent or remedy such injury to the domestic textile industry, and

(ii) the amount of any increase in, or imposition of, a duty or other import restriction on apparel which is necessary to prevent or remedy such injury to the domestic apparel industry.

(2) By no later than the date that is 90 days after the date of enactment of this Act, the Commission shall—

(A) submit to the President a report on the determinations and recommendations made by the Commission under paragraph (1), and

(B) publish a summary of such report in the Federal Register.

(3)(A) By no later than the date that is 15 days after the date on which the report is submitted to the President under paragraph (2), the President shall issue a proclamation implementing the recommendations of the Commission set forth in such report.

(B) Any increase in, or imposition of, any duty or other import restriction which is proclaimed under subparagraph (A) shall apply with respect to articles entered after July 31, 1985, and before August 1, 1986.

(e)(1) Except as otherwise provided in this Act and notwithstanding any other provision of law, the aggregate quantity of textiles and textile products of any foreign country classified under the same category that may be entered during the 1-year period beginning on August 1, 1986, shall not exceed the sum of—

(A) the aggregate quantity of textiles and textile products of such country classified under such category that was entered during the 1-year period beginning on August 1, 1985, plus

(B) 6 percent of the aggregate quantity described in subparagraph (A).

(2) Except as otherwise provided in this Act and notwithstanding any other provision of law, the aggregate quantity of textiles and textile products of any foreign country classified under the same category that may be entered during the 1-year period beginning on August 1, 1987, and during any succeeding 1-year period, shall not exceed the sum of—

(A) the aggregate quantity of textiles and textile products of such country classified under such category that could have been entered under this subsection (determined without regard to paragraph (3)) during the year proceeding such 1-year period, plus

(B) 6 percent of the aggregate quantity described in subparagraph (A).

(3) If the aggregate quantity of textiles and textile products of a foreign country classified under the same category that enter after August 1, 1985, and before the date on which a proclamation is issued under subsection (d)(3) exceeds any limitation imposed by such proclamation on the quantity of textiles and textile products of such country classified under such category that may be entered during the 1-year period beginning on August 1, 1985, the limitation imposed under paragraph (1) on the quantity of textiles and textile products of such country classified under such category that may otherwise be entered during the 1-year period beginning on August 1, 1986, shall be reduced by the amount of such excess.

(f) For purposes of applying section 123 of the Trade Act of 1974 (19 U.S.C. 2133), the issuance of a proclamation under subsection (d)(3), and the imposition of a quantitative limitation under subsection (e), shall be treated as action taken under section 203 of the Trade Act of 1974 (19 U.S.C. 2253).

(g)(1) The Secretary of the Treasury shall take such actions and issue such regulations as may be necessary or appropriate to enforce the provisions of this section, including, without limitation, the issuance of orders to Customs officers to bar entry to any article if the entry of such article would cause any quantitative limitations imposed under this section to be exceeded.

(2) In order to ensure the equitable and efficient administration of subsection (e), the Secretary of Commerce shall establish and administer an import licensing system under which an importer of any textiles and textile products from any foreign country will be required, during the 10-year period beginning on August 1, 1986, to present an import license as a condition of entry for such textiles or textile products. The Secretary of Commerce shall charge a fee for such import licenses in such amount as may be necessary to cover the cost of administrating such system.

(3) During the 1-year period beginning on August 1, 1986, and during each succeeding 1-year period, the Secretary of Commerce shall, at least once during every quarter within each of such 1-year periods, provide written notice to each foreign country which states the aggregate quantity of each category of textiles and textile products of such country that may be entered during the remaining portion of such 1-year period.

(h)(1) By no later than October 15 of 1987, and of each calendar year thereafter, the President shall submit to the Congress an annual report on the administration of this section during the preceding year. Such report shall include detailed information about the implementation and operation of the quantitative limitations imposed by this

section. All departments and agencies shall cooperate in the preparation of such report.

(2)(A) The Comptroller General of the United States shall submit an annual report to the Congress on—

(i) the allocation of United States Customs Service personnel in the import specialist and inspector functions necessary to fully enforce this section, and

(ii) the impact of computerization on trade law enforcement.

(3) The Secretary of the Treasury shall cooperate with the Comptroller General of the United States in the preparation of the report required under subparagraph (A).

(3)(A) The Secretary of the Treasury shall conduct a study of the categories of textiles and textile products to determine whether the quantitative limitations imposed by this section could be specified in terms of the weight of such textiles or textile products in order to simplify administration of such limitations through use of shipping weight. In conducting such study, the Secretary of the Treasury shall consult with recognized unions and groups representing workers in the textile and textile products industry.

(B) The Secretary of the Treasury shall submit to the Congress a report on the study conducted under subparagraph (A) by no later than the date that is 6 months after the date of enactment of this Act.

(i)(1) Except as provided in paragraph (2), the provisions of subsection (e) shall apply to textiles and textile products entered—

(A) after July 31, 1986, and

(B) before August 1, 1996.

(2) Notwithstanding any other provision of this section, the provisions of this section shall cease to apply on the day on which the President submits to the Congress a written statement certifying that Taiwan, the Republic of Korea, Hong Kong, the Peoples' Republic of China, Japan, Pakistan, Mexico, India, Indonesia, the Philippines, Thailand, Brazil, Singapore, the European Communities, and Canada have, after the date of enactment of this Act, each entered into a new textiles and textile products agreement with the United States that contains provisions which are consistent with the purposes of this Act.

THURMOND (AND OTHERS) AMENDMENT NO. 724

Mr. THURMOND (for himself, Mr. HOLLINGS, Mr. MOYNIHAN, Mr. HELMS, Mr. HEFLIN, Mr. HEINZ, Mr. COHEN, Mr. WARNER, Mr. KENNEDY, Mr. MITCHELL, Mr. EAGLETON, Mr. SPECTER, Mr. EAST, Mr. COCHRAN, Mr. TRIBLE, Mr. DENTON, Mr. D'AMATO, Mr. SASSER, Mr. HATCH, Mr. PELL, Mr. MATTINGLY, Mr. GARN, Mr. LAXALT, Mr. ROCKEFELLER, Mrs. HAWKINS, Mr. GORE, Mr. DIXON, Mr. DODD, Mr. SIMON, Mr. FORD, Mr. DECONCINI, Mr. PRYOR, Mr. MATHIAS, Mr. LONG, Mr. LEAHY, Mr. METZENBAUM, Mr. RIEGLE, Mr. WEICKER, Mr. MCCONNELL, Mr. KASTEN, Mr. GLENN, Mr. BUMPERS, Mr. NUNN, AND MR. BYRD) proposed an amendment to amendment No. 723 proposed by Mr. BRADLEY to the joint resolution Senate Joint Resolution 77, supra; as follows:

At the end of the pending amendment add the following:

"TITLE II—TEXTILE AND APPAREL TRADE ENFORCEMENT

"SEC. 201. SHORT TITLE.

"This title may be cited as the 'Textile and Apparel Trade Enforcement Act of 1985'.

"SEC. 202. POLICY.

"The policy of this title is—

"(1) to prevent further disruption of the United States textiles and textile products markets, damage to United States textile and apparel manufacturers, and loss of jobs by United States workers by providing for orderly and nondisruptive growth of imports of textiles and textile products; and

"(2) to implement the objectives of the Multi-Fiber Arrangement by requiring the effective enforcement of import levels of textiles and textile products contemplated by the Multi-Fiber Arrangement.

"SEC. 203. FINDINGS.

"The Congress finds that—

"(1) the United States and most major textile producing countries are parties to the Multi-Fiber Arrangement, the purpose of which is to ensure the orderly growth of imports of textiles and textile products and to avoid disruption of the markets for textiles and textile products in importing nations;

"(2) the Multi-Fiber Arrangement, which first entered into force on January 1, 1974, and which was most recently extended in December, 1981, through July 1986, contemplates a 6 per centum annual rate of growth for imports for most exporting countries and provides for a lower rate of growth for imports from significant exporting countries;

"(3) since 1980, the objective of orderly growth of imports of textiles and textile products provided for in the Multi-Fiber Arrangement has not been achieved; from 1981 through 1984 imports of textiles and textile products into the United States have grown at an annual rate of 19 per centum, far in excess of the 1 per centum growth rate of the United States market for textiles and textile products during the same period and far in excess of the annual rate of import growth of less than 2 per centum that prevailed during the period 1974 through 1980;

"(4) the disruptive surge in imports of textiles and textile products which occurred from 1981 through 1984 resulted from the failure of the United States to enforce adequately its rights under the Multi-Fiber Arrangement and to extend coverage of the Multi-Fiber Arrangement to imports made of competing fibers;

"(5) import growth of apparel products has substantially outstripped the growth of the domestic market so that import penetration of the domestic market has more than doubled in the last six years, reaching a level of 50 per centum in 1984;

"(6) based on a nationwide audit of major retail outlets, the import penetration of such major items of apparel as trousers, blouses, shirts, suits, skirts and sweaters exceeds 50 per centum of domestic consumption;

"(7) since the most recent extension of the Multi-Fiber Arrangement, certain exporting countries have sharply increased their exports of textiles and textile products made in whole or in part from fibers not subject to the Multi-Fiber Arrangement with the effect of circumventing restraints agreed to under the Arrangement; the increased imports of these textiles and textile products have caused disruption of the United States market for textiles and textile products and have seriously undercut the effectiveness of the Multi-Fiber Arrangement;

"(8) imports of textiles and textile products into the United States are predominantly the product of significant exporting countries, with five large exporting countries now accounting for more than 50 per centum of all imports of textiles and textile products;

"(9) the domination of import trade by producers in the significant producing countries has limited participation in the United States market by other producing countries, many of which share important trade and other national interests, and encourage mutually beneficial trade and investment, with the United States;

"(10) a change in United States textile trade policy to afford the smaller producing countries and countries in the Caribbean region a relatively greater share of imports of textiles and textile products would promote the national economic interests of the United States;

"(11) the textile and apparel trade deficit of the United States was more than $16,200,000,000 in 1984, an increase of 53 per centum over 1983, and accounted for 13 per centum of the Nation's overall merchandise trade deficit;

"(12) the current level of imports of textiles and textile products, ten billion square yard equivalents in 1984, represents over one million job opportunities lost to United States workers;

"(13) imported textiles and textile products now account for 38 per centum (the equivalent of three million two hundred thousand bales of cotton) of the annual cotton consumption in the United States; only one of five of the bale equivalents included in imported textiles and textile products is grown in the United States; the result of the massive increases in cotton textile and apparel imports has been a declining market share for, and a $1,000,000,000 loss to, domestic cotton producers in 1983 alone, which was only partially offset by Federal cotton program benefits; another result is that United States cotton producers, who are spending about $20,000,000 annually in research and promotion efforts, have built markets not for themselves but for foreign growers;

"(14) imports of wool products have doubled since 1980, creating major disruptions among domestic wool products producers and seriously depressing the price of United States produced raw wool; the Multi-Fiber Arrangement recognizes that imports of certain products, such as wool products, in certain countries, including the United States, pose particular problems for certain industries, such as, the wool products industries in those countries and import growth rates of 1 per centum or less have been permitted in such cases;

"(15) as a result of this increased penetration and the very limited growth of the domestic market, the United States companies producing textiles and textile products identical, or similar, to those imported have been seriously damaged, many of them have been forced out of business, many have closed plants or curtailed operations, workers in such companies have lost employment and have been otherwise materially and adversely affected, and serious hardship has been inflicted on hundreds of impacted communities causing a substantial reduction in economic activity and lost revenues to local governments;

"(16) the increase in imports and increased import penetration of the United

States domestic market have occurred notwithstanding the fact that, through extensive modernization programs and investment in more modern equipment, productivity, as measured by output per man hour, in the textile mill products sector has increased in the last ten years at the average annual rate of 4.2 per centum and in the apparel sector at the average annual rate of 3.4 per centum, as compared with the lower productivity growth of all manufacturing in the same period of 1.9 per centum;

"(17) the factors described above are causing serious damage, or the actual threat thereof, to domestic producers of textiles and textile products; as a result, market disruption exists in the United States requiring the new measures established under this Act;

"(18) based on experience during the past ten years and on other factors, the growth of the United States market for textiles and textile products is unlikely to exceed an average annual rate of 1 per centum during the next several years;

"(19) if the rate of growth of imports of textiles and textile products into the United States that occurred since 1980 continues, plant closings will continue to accelerate, leaving the United States market with reduced domestic competition for imported products;

"(20) in order to avoid further market disruption and deterioration of the situation confronting the United States industry producing textiles and textile products, which is already seriously damaged, it is essential—

"(A) to require the establishment of import levels for textiles and textile products supplied by major producing countries that reflect—

"(i) the import level that would have occurred had imports from these countries grown since 1980 by the 6 per centum annual growth rate contemplated by the Multi-Fiber Arrangement, or 1 per centum in the case of wool products, or

"(ii) the actual import level resulting from restraints under a bilateral agreement with the United States providing for an annual import growth rate of less than 6 per centum,

whichever is the lesser,

"(B) to require the establishment of import levels for textiles and textile products supplied by producing countries that reflect their 1984 import levels,

"(C) to require the establishment of import levels for textiles and textile products supplied by small producing countries that provide a significant increase in their market shares to meet their development needs and to permit future growth in such shares consistent with the Multi-Fiber Arrangement, and

"(D) to limit the future growth rate of imports of textiles and textile products into the United States to levels which reflect orderly growth as provided for in the Multi-Fiber Arrangement and the most recent Protocol extending the Multi-Fiber Arrangement;

"(21) the establishment of import levels, and limitation on future import growth to levels, that reflect effective enforcement of the Multi-Fiber Arrangement and that also reflect the expected growth rate of the United States market for textiles and textile products will fulfill announced policy objectives of the United States regarding trade in textiles and apparel;

"(22) as the Department of Defense has long recognized, a strong, viable and efficient domestic textiles and textile products industry is essential in order to avoid impairment of the national security of the United States;

"(23) the developments that have led to the sharp increase in imports of textiles and textile products since 1980 may not have been foreseeable; nevertheless, the rights of the United States under international agreements should have been invoked in order to prevent increased quantities of textiles and textile products from being imported under such conditions as to cause or threaten serious damage to domestic producers of textiles and textile products in the United States; and

"(24) the sharp increase in imports of textiles and textile products since 1980, and the effect of this increase on the United States textiles and apparel industry and its workers, constitutes exceptional circumstances within the meaning of the Multi-Fiber Arrangement and its Protocol.

"SEC. 204. DEFINITIONS.

"For purposes of this title—

"(1) The term "textiles and textile products" includes, but is not limited to, all manmade fibers, tops, yarns, piece goods, made-up articles, apparel, and other textile manufactured products (which derive their chief characteristics from their textile components) made in whole or in part from any natural or manmade fiber, or blend thereof, that are classified under schedule 3, part 6 of schedule 6, part 1, 4, 5 (except subpart E), 7, or 13 of schedule 7, or part 1 of schedule 8 of the Tariff Schedules of the United States or part 1 of the Appendix to the Tariff Schedules of the United States;

"(2) The term "category" means, with respect to textiles and textile products that are the product of a country, each of the following—

"(A) each category of textiles and textile products identified by a three-digit textile category number in the Department of Commerce publication "Correlation: Textile and Apparel Categories with Tariff Schedules of the United States Annotated", dated January 1985 and, subsequently, in the first edition of such document that is revised to reflect the adoption by the United States of the Nomenclature Structure of the Harmonized System;

"(B) with respect to each country with which the United States has (i) an agreement on the date of enactment of this title limiting exports of textiles and textile products to the United States that includes specific limitations on subdivisions of a category described in subparagraph (A), or (ii) taken unilateral action to limit products entered under such a subdivision, each such subdivision;

"(C) a category consisting of the manmade fiber products classified under subpart E of part 1 of schedule 3 to the Tariff Schedules of the United States; and

"(D) each category consisting of each of the following products when, because of any fiber content, that product is not subject to the Multi-Fiber Arrangement:

"(i) yarn,

"(ii) fabric,

"(iii) apparel, and

"(iv) other textile products;

"(3) The term "import sensitive category" means—

"(A) a category (other than a category applicable to textiles and textile products that are a product of a country in the Caribbean region) for which the ratio of imports to domestic production, as reported in the Department of Commerce publication "U.S. Production, Imports and Import/Production Ratios for Cotton, Wool and Man-Made Fiber Textiles and Apparel", equals or exceeds 40.0 for the preceding calendar year; and

"(B) a category covering wool products;

"(4) The term "country" means a foreign country (other than Canada and the Member States of the European Economic Community as constituted on January 1, 1985), a foreign territory, an insular possession of the United States, or any other territory, possession, colony, trusteeship or political entity, whether affiliated with the United States or not, that is outside the customs territory of the United States;

"(5) The term "major producing country" means a country the annual aggregate quantity of textiles and textile products of which that entered under the categories referred to in paragraph (2)(A) during calendar year 1984 equalled or exceeded 10 percent of all textiles and textile products under such categories that entered from all countries and from Canada and the Member States of the European Economic Community during calendar year 1984;

"(6) The term "producing country" means a country (other than a major producing country and a country in the Caribbean region) the annual aggregate quantity of textiles and textile products of which that entered under the categories referred to in paragraph (2)(A) during calendar year 1984 equalled or exceeded 1.25 per centum of all textiles and textile products under such categories that entered from all countries and from Canada and the Member States of the European Economic Community during calendar year 1984;

"(7) The term "small producing country" means a country other than a major producing country and a producing country;

"(8) The term "country in the Caribbean region" means Mexico and a country eligible for designation as a beneficiary country under section 212 of the Caribbean Basin Economic Recovery Act (19 U.S.C. 2702);

"(9) The term "wool product" means an article containing over 17 per centum by weight of wool;

"(10) The term "cotton, wool and manmade fiber sweaters" means articles classified under categories 345, 445, 446, 645 or 646 as defined in the Department of Commerce publication "Correlation Textile and Apparel Categories with Tariff Schedules of the United States Annotated," dated January 1985;

"(11) The term "entered" means entered, or withdrawn from warehouse, for consumption in the customs territory of the United States;

"(12) The term "imported" means entered; and

"(13) The term "Milti-Fiber Arrangement" means the Arrangement Regarding International Trade in Textiles, as extended by the Protocol done at Geneva, December 22, 1981.

"SEC. 205. LIMITS ON TEXTILE AND APPAREL IMPORTS.

"(a) CALENDAR YEAR 1985.—Notwithstanding any other provision of law, the aggregate quantity of textiles and textile products classified under a category that is entered during calendar year 1985 shall not exceed—

"(1) in the case of textiles and textile products that are a product of a major producing country other than textile luggage and textile flat goods subject (as of the date of enactment of this Act) to a specific limitation under an agreement with a major

producing country, the lesser of an amount equal to 101 per centum—

"(A) of the aggregate quantity of such products of such country classified under such category that would have entered during calendar year 1984 if the aggregate quantity of such products of such country classified under such category entered during calendar year 1980 had increased by 6 per centum annually, or 1 per centum annually in the case of a category covering a wool product, during calendar years 1981, 1982, 1983, and 1984, or

"(B) if the United States has an agreement with such country providing for an annual growth rate for such category of less than 6 per centum, of the aggregate quantity of such products of such country classified under such category that entered during calendar year 1984;

"(2) in the case of textile luggage and textile flat goods subject (as of the date of enactment of this Act) to specific limitation under an agreement with a major producing country, the specific limitation quantity in effect as of the date of enactment of the Act;

"(3) in the case of textiles and textile products that are a product of a producing country, an amount equal to the aggregate quantity of—

"(A) such products from such country classified under such category that entered during calendar year 1984, or

"(B) in the case of textile luggage and textile flat goods subject (as of the date of enactment of this Act) to specific limitation under an agreement with a producing country, the specific limitation quantity in effect as of the date of enactment of this Act;

"(4) in the case of textiles and textile products that are a product of a small producing country (other than cotton, wool, and man-made fiber sweaters described in paragraph (5)), an amount equal to the sum of—

"(A) the aggregate quantity of such products of such country classified under such category that entered during calendar year 1984, plus

"(B) an amount equal to—

"(i) 15 per centum of such quantity, in the case of a category that is not an import sensitive category, or

"(ii) 1 per centum of such quantity, in the case of a category that is an import sensitive category; and

"(5) in the case of cotton, wool and man-made fiber sweaters that are—

"(A) the product of substantial assembly operations in Guam from otherwise completed knit-to-shape component parts, an aggregate amount equal to 160,000 dozen; and

"(B) the product of substantial assembly operations in the Commonwealth of the Northern Mariana Islands from otherwise completed knit-to-shape component parts, an aggregate amount equal to 70,000 dozen.

"If application of paragraph (1) would result in the aggregate quantity of textiles and textile products of a major producing country classified under all categories permitted to enter during calendar year 1985 to be less than 70 per centum of the aggregate quantity of such products of such country that entered during calendar year 1984, then, notwithstanding paragraph (1), the aggregate quantity of textiles and textile products of such country that may be entered under each category during calendar year 1985 shall not be less than 40 per centum of the aggregate quantity of such products of such country that entered under such category during calendar year 1984.

"(b) GROWTH ADJUSTMENT.—For calendar years after 1985, the aggregate quantity of textiles and textile products classified under each category that may be entered during each such calendar year shall—

"(1) in the case of such products that are a product of a major producing country or of a producing country, be increased by an amount equal to 1 per centum of the aggregate quantity that could be entered under such category during the preceding calendar year; and

"(2) in the case of such products that are a product of a small producing country, be increased by an amount equal to—

"(A) in the case of a category (other than an import sensitive category), 6 per centum of the aggregate quantity that could be entered under that category during the preceding calendar year, and

"(B) in the case of an import sensitive category, 1 per centum of the aggregate quantity that could be entered under that category during the preceding calendar year.

"If the aggregate quantity that could be entered under a category for a calendar year after 1985 is reduced under section 210(b), than in the first calendar year in which there is no such reduction, this subsection shall be applied as if there had been no reduction under section 210(b) in previous calendar years.

"(c) MINIMUM QUANTITIES.—If, under subsection (a) or (b), the aggregate quantity of textiles and textile products of a country that may be entered during a calendar year under a category is—

"(1) less than one million square yard equivalents, in the case of a category covering yarn, fabric, made-ups, and miscellaneous products, other than wool products;

"(2) less than seven hundred thousand square yard equivalents, in the case of a category covering apparel, other than wool products apparel; or

"(3) less than one hundred thousand square yard equivalents, in the case of a category covering wool products,

"then, notwithstanding subsection (a) or (b), the aggregate quantity of textiles and textile products that may be entered from such country under such category during the calendar year shall be one million, seven hundred thousand, or one hundred thousand square yard equivalents, respectively. The amount prescribed in the preceding sentence shall be accorded growth subject to the provisions of subsection (b) beginning the first calendar year after the aggregate quantity of imports from such country under such category equals the minimum quantity prescribed under this subsection.

"(d) SPECIAL RULE.— For purposes of this section, if during any calendar year after 1984, the aggregate quantity of textiles and textile products that are the product of a small producing country, other than a country in the Caribbean region, and that are entered under the categories referred to in paragraph (2)(A) of section 204 equals or exceeds 1.25 per centum of all textiles and textile products entered under such categories from all countries and from Canada and the Member States of the European Economic Community during such calendar year, then such small producing country shall be considered to be a producing country for all succeeding calendar years.

"(e) ENFORCEMENT.—The Secretary of Commerce shall prescribe such regulations governing the entry, or withdrawal from warehouse, for consumption of textiles and textile products as may be necessary to carry out this title.

"SEC. 206. IMPORT LICENSING.

"In order to ensure the equitable and efficient administration of section 205 of this title, the Secretary of Commerce shall, within six months after the date of enactment of this title, establish and administer an import licensing system under which an importer of any textiles and textile products from any country and from Canada and the Member States of the European Economic Community, will be required to present an import permit as a condition of entry. The Secretary shall charge a fee for import licenses in such amount as may be necessary to cover the cost of administration of the system.

"SEC. 207. ANNUAL REPORT.

"Not later than March 15, 1986, and March 15 of each calendar year thereafter, the President shall submit to the Congress a report on the administration of this title during the preceding calendar year. Such report shall include detailed information about the implementation and operation of the limitations established under section 205. All departments and agencies shall cooperate in preparation of this report, as requested by the President.

"SEC. 208. REVIEW.

"The Secretary of Commerce shall commence ten years after the date of enactment of this title a formal review of the operation of the Textile Import Control Program under the provisions of this title. The Secretary shall consult members and committees of Congress, representatives of the labor unions and the industries affected by the program, and appropriate government agencies. Within six months after the commencement of the study, the Secretary shall submit to Congress his findings as well as his recommendations for the future conduct of the program.

"SEC. 209. DUTY FREE ENTRY OF CERTAIN SWEATERS FROM GUAM AND THE NORTHERN MARIANAS.

"Subpart A of part 7, schedule 3 of the Tariff Schedules of the United States (19 U.S.C. 1202) is amended by adding at the end thereof the following new item:

"'385.97	Cotton, wool and man-made fiber sweaters that are entitled to enter under the quotas established under section 205(a)(5) of the Textile and Apparel Trade Enforcement Act of 1985 or the increased quotas under section 205(b) of such Act that adjust the quotas under such section 205(a)(5) and that do not contain foreign materials to the value of more than 50 percent of their total value as this standard is applied pursuant to Headnote 3(a) of the General Headnotes and Rules of Interpretation.	Free'.

"SEC. 210. EFFECTIVE DATE.

"(a) IN GENERAL.—Subject to the provisions of subsection (b), the provisions of this title shall apply to textiles and textile products entered, or withdrawn from warehouse, for consumption on or after the date of enactment of this Act.

"(b) CALENDAR YEARS 1985 AND 1986.—The Secretary of Commerce shall determine, and publish in the Federal Register, the aggregate quantity, if any, of textiles and textile products that may be entered under section 205(a) or (c) of this title from each country under each category during the

period beginning on the date of enactment of this title and ending December 31, 1985. Notwithstanding subsection (a), to the extent that the aggregate quantity of imports of textiles and textile products from a country under a category entered after December 31, 1984, and before the date of enactment of this title exceeds the quantity permitted entry for such country and such category during calendar year 1985 under subsection (a) or (c) of section 205, then the limit that would otherwise apply under section 205(b) for such category for such country for calendar year 1986 shall be reduced by the amount of such excess quantity. If such excess quantity exceeds the limit that would otherwise apply under section 205(b) for such category for such country for calendar year 1986, then the limit for such category and country for calendar years after 1986 shall be reduced until such excess is accounted for.

"TITLE III—FOOTWEAR

"SEC. 301. SHORT TITLE.

"This title may be cited as the 'American Footwear Industry Recovery Act of 1985'.

"SEC. 302. FINDINGS AND PURPOSE.

"(a) The Congress finds that—

"(1) The domestic nonrubber footwear industry is important to the national economy, and footwear firms are vital to the economic health of small towns throughout the United States.

"(2) The domestic nonrubber footwear industry is highly labor intensive, and low capital requirements for entry into footwear production make it a primary target for industrializing or newly industrialized countries. As a consequence, footwear is produced in virtually every footwear consuming country in the world.

"(3) Tremendous competitive pressure has been created in the world footwear market in the last decade as a result of rapidly growing production and capacity in numerous developing and developed countries. This development has resulted in the widespread erection of tariff and nontariff barriers by foreign countries designed to protect their domestic footwear industries.

"(4) The United States has historically resisted the protectionist trends of other producing nations and has instead maintained a market distinguished by its accessibility. As a result, the United States market has become a focal point for world trade in nonrubber footwear.

"(5) The diversion of international trade to the United States market has resulted in serious injury to domestic producers as manifested by—

"(A) the loss of 155,000 footwear jobs since 1968,

"(B) a decline in domestic production and production capacity, and

"(C) the permanent closure of over 500 plants during the same period.

"(6) The serious injury to domestic producers poses a significant danger to the industry's supplier base as well.

"(7) The domestic nonrubber footwear producers have made a significant commitment to the future of the industry through substantial capital investment.

"(8) Since the termination of temporary import relief in 1981, capital investment in the domestic nonrubber footwear industry has declined as the industry struggled to battle the massive surge in imports which increased the percentage share of imported footwear in the United States market from, 51 percent in 1981 to 77 percent in 1985.

"(9) Without the restriction of import levels, capital investment in this domestic industry will continue to decrease.

"(10) The domestic nonrubber footwear industry has thrice been judged by the International Trade Commission, as recently as May 1985, to be seriously injured by imports.

"(11) Since the termination of the two, four-year orderly marketing agreements in 1981, the harm to the domestic industry is even more critical then the serious injury which triggered the Commission's unanimous findings in 1976 and 1977.

"(12) The domestic nonrubber footwear industry has not been afforded adequate and appropriate relief from imports; therefore, the Congress concludes that—

"(A) the administrative process under sections 201, 202, and 203 of the Trade Act of 1974 has proven inadequate; and

"(B) in the absence of and effective remedy under such process, legislative relief is essential.

"(b)(1) It is the purpose of Congress in enacting this section to—

"(A) promote and expend the economic health of the United States nonrubber footwear industry,

"(B) preserve the jobs of American workers, and

"(C) prevent the further decline of this important domestic industry.

"(2) It is declared to be the policy of Congress that access to the United States market for foreign-produced nonrubber footwear should be on an equitable basis to ensure orderly trade in nonrubber footwear, reduce unfair trade in nonrubber footwear, and address United States balance-of-payments problems, of which footwear is the seventh largest component. In order to accomplish these objectives, it is deemed necessary and appropriate to limit imports of nonrubber footwear into the United States market.

"SEC. 303. DEFINITIONS.

For purposes of this title—

"(1) The term 'entered' means entered, or withdrawn from warehouse, for consumption in the customs territory of the United States.

"(2) The term 'Secretary' means Secretary of Commerce.

"(3) The term 'nonrubber footwear' means the following categories of nonrubber footwear products, identified by reference to the following item numbers of the Tariff Schedules of the United States (as in effect on Janury 1, 1985): 700.05 through 700.45; 700.56; 700.72 through 700.83; and 700.95.

"(4) The term 'apparent domestic consumption' means, with respect to any 1-year period, the sum of imports plus domestic production less exports.

"SEC. 304. QUANTITATIVE LIMITATION ON NONRUBBER FOOTWEAR.

"(a)(1) During the 8-year period beginning on the date of enactment of this title, the aggregate number of pairs of nonrubber footwear which may be entered during any 1-year period shall not exceed 60 percent of the estimated apparent domestic consumption of nonrubber footwear for such period.

"(2) The quantitative limitation imposed by paragraph (1) for any 1-year period shall be distributed among the following categories of nonrubber footwear so that the aggregate number of pairs of nonrubber footwear in such category which may be entered during any 1-year period shall not exceed the quantity equal to—

"(A) in the case of nonrubber footwear with a customs value that does not exceed $1.25 per pair, 10 percent of apparent domestic consumption of nonrubber footwear for such period,

"(B) in the case of nonrubber footwear with a customs value that exceeds $1.25 per pair but does not exceed $2.50 per pair, 5.4 percent of apparent domestic consumption of nonrubber footwear for such period, and

"(C) in the case of nonrubber footwear with a customs value that exceeds $2.50 per pair, 44.6 percent of apparent domestic consumption of nonrubber footwear for such period.

"(b) Within sixty days after the effective date of this title, and on the first day of the fourth quarter of each 1 year period thereafter, the Secretary shall determine on the basis of the best information available, including his own or independent forecasts, the expected apparent domestic consumption of nonrubber footwear for, in the case of the initial determination, the remainder of the current 1 year period and in the case of the first day of the fourth quarter of each 1 year period thereafter, the next succeeding 1 year period. On each such date, the Secretary shall determine and publish in the Federal Register the allocation for the next succeeding 1 year period of permissible imports of nonrubber footwear as required by this section.

"(c) On the first days of the first, second, and third quarters of each 1 year period, the Secretary shall revise the determinations of expected apparent domestic consumption made under subsection (b) for the current 1 year period on the basis of the best information then available and shall make such adjustments in the quantity of nonrubber footwear permitted to be imported under this section as indicated by the revision. All revisions and adjustments made under this subsection shall be published in the Federal Register.

"(d) If the revised determination of expected apparent domestic consumption published in the Federal Register under subsection (c) on the first day of the third quarter in any 1 year period for nonrubber footwear varies from the actual apparent domestic consumption of nonrubber footwear for such 1 year period, the Secretary shall publish in the Federal Register on the first day of the second quarter of such succeeding 1 year period a revision to the determination of expected apparent domestic consumption for such 1 year period made under subsection (c) of this section. The revision shall be in the amount of such variance and shall be in addition to any other revision that would be made on any such first day of the second quarter under subsection (c) of this section.

"(e)(1) The Secretary and the Secretary of the Treasury shall take such actions within their respective jurisdictions as may be necessary or appropriate to enforce the provisions of this section, including without limitation, the issuance of orders to customs officers to bar entry to merchandise if the entry of such merchandise would cause the limitations established under this section to be exceeded.

"(2)(A) The Secretary and the Secretary of the Treasury are each authorized to issue such implementing regulations, including the issuance of import licenses, as may be necessary or appropriate to effect the purposes of this section and to enforce the provisions of this section.

"(B) Before prescribing any regulations under subparagraph (A), the Secretary or the Secretary of the Treasury, as the case may be, shall—

"(i) consult with interested domestic parties,

"(ii) afford an opportunity for such parties to comment on the proposed regulations, and

"(iii) consider all such comments before prescribing final regulations.

"SEC. 305. COMPENSATION AUTHORITY.

"For purposes of section 123 of the Trade Act of 1974 (19 U.S.C. 2133), the imposition of the quantitative limitation under section 204 shall be treated as action taken under section 203 of the Trade Act of 1974 (19 U.S.C. 2253).".

BAUCUS AMENDMENT NO. 725

(Ordered to lie on the table.)

Mr. BAUCUS submitted an amendment intended to be proposed by him to the joint resolution Senate Joint Resolution 77, supra; as follows:

At the end of the amendment, add the following:

SEC. . (a) Notwithstanding any other provision of this Act, any provisions of this Act that impose a limitation on the quantity of textiles and textile products that may be entered shall not apply with respect to the products of any foreign country entered in a calendar year if the aggregate value of agricultural products of the United States exported to such foreign country during the calendar year preceding such calendar year exceeded $400,000,000.

(b) For purposes of this section, the term "entered" means entered, or withdrawn from warehosue, for consumption in the customs territory of the United States.

AUTHORIZATION OF CERTAIN FISHERIES PROGRAMS

DANFORTH AMENDMENT NO. 726

Mr. DOLE (for Mr. DANFORTH) proposed an amendment to the bill (S. 991) to provide authorization of appropriations for certain fisheries activities; as follows:

On page 3, line 7, strike "$3,500,000" and insert in lieu thereof "$6,935,000"; and on line 8 strike "$3,657,500" and insert in lieu thereof "$7,247,075".

TEMPORARY EXTENSION OF CERTAIN HOUSING AND COMMUNITY DEVELOPMENT PROGRAMS

GARN AMENDMENT NO. 727

Mr. DOLE (for Mr. GARN) proposed an amendment to the joint resolution (H.J. Res. 393) to provide for the temporary extension of certain programs relating to housing and community development, and for other purposes; as follows:

At the end of the joint resolution, add the following:

SEC. EXTENSIONS OF GARN-ST GERMAIN ACT.

(a) Section 141(a) of the Garn-St Germain Depository Institutions Act of 1982 is amended by striking out "upon the expiration of three years after the date of enactment of this Act" and inserting in lieu thereof "on April 15, 1986".

(b) Section 206(a) of such Act is amended by striking out "upon the expiration of three years after the date of enactment of this Act" and inserting in lieu thereof "On April 15, 1986".

NOTICES OF HEARINGS

COMMITTEE ON SMALL BUSINESS

Mr. WEICKER. Mr. President, I would like to announce that on October 31, 1985 the Senate Small Business Committee will hold an oversight hearing on the activities of the Small Business Administration's Office of Veterans Affairs. The hearing will be held in room 428A of the Russell Senate Office Building and will begin at 10 a.m. For further information, please call Lisa Linden, of the committee staff at 224-5175.

SUBCOMMITTEE ON PUBLIC LANDS, RESERVED WATER AND RESOURCE CONSERVATION

Mr. WALLOP. Mr. President, I would like to announce for the information of the Senate and the public a modification to the information in the announcement of the hearing scheduled before the Subcommittee on Public Lands, Reserved Water and Resource Conservation of the Committee on Energy and Natural Resources on Thursday, October 10, 1985, at 9:30 a.m. in room SD-366 of the Senate Dirksen Office Building, Washington, DC.

The original hearing announcement stated that testimony would be received on S. 1596, Senate Joint Resolution 187, and S. 1116. In addition, testimony will be received on H.R. 2776, a companion bill S. 1596, a bill to amend the District of Columbia Stadium Act of 1957 to direct the Secretary of the Interior to convey title to the Robert F. Kennedy Memorial Stadium to the District of Columbia.

For further information, please contact Patty Kennedy of the subcommittee staff at (202) 224-2878.

COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. McCLURE. Mr. President, I would like to announce for the information of the Senate and the public of a change to the hearing previously scheduled before the Committee on Energy and Natural Resources on Thursday, October 3, 1985, 10 a.m., room SD-366 of the Senate Dirksen Office Building in Washington, DC.

The nomination of Anthony G. Sousa of Hawaii to be a member of the Federal Energy Regulatory Commission will be the only nomination considered at this hearing. The nominations of Donna R. Fitzpatrick of the District of Columbia to be an Assistant Secretary of Energy (Conservation and Renewable Energy) and Mary L. Walker of Maryland to be an Assistant Secretary of Energy (Environment, Safety, and Health) will not be considered at this hearing as previously announced.

For further information, please contact David Doane or Gerry Hardy at (202) 224-5305.

SUBCOMMITTEE ON NATURAL RESOURCES DEVELOPMENT AND PRODUCTION

Mr. WARNER. Mr. President, I would like to announce for the information of the Senate and the public, the scheduling of public hearings before the Subcommittee on Natural Resources Development and Production of the Senate Energy and Natural Resources Committee.

The hearings are scheduled for October 22 and 24, beginning at 9:30 in room SD-366, Dirksen Senate Office Building. Testimony is invited regarding Senate bills, S. 570, S. 372, and S. 946, bills to amend the Mineral Lands Leasing Act of 1920, as amended. In addition, the subcommittee invites testimony on other coal-related issues that might be pending or introduced prior to the hearings.

For further information regarding the hearings, you may wish to contact Mr. Robert Terrell or Mr. Patrick Sullivan of the subcommittee staff on extension (202) 224-5205. Those wishing to testify or who wish to submit written testimony for the hearing should write to the Committee on Energy and Natural Resources, Subcommittee on Natural Resources Development and Production, room SD-306, Dirksen Senate Office Building, Washington, DC 20510.

AUTHORITY FOR COMMITTEES TO MEET

SUBCOMMITTEE ON CIVIL SERVICE, POST OFFICE, AND GENERAL SERVICES

Mr. DOLE. Mr. President, I ask unanimous consent that the Subcommittee on Civil Service, Post Office, and General Services, of the Committee on Governmental Affairs be authorized to meet during the session of the Senate on Wednesday, October 2, 1985, in order to conduct a hearing on S. 1440, the Non-Smokers Rights Act.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON THE JUDICIARY

Mr. DOLE. Mr. President, I ask unanimous consent that the Committee on the Judiciary be authorized to meet during the session of the Senate on Wednesday, October 2, 1985, in order to receive testimony concerning S. 237, to amend title 18 to limit the application of the exclusionary rule.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, I ask unanimous consent that the Committee on the Judiciary be authorized to meet during the session of the Senate on Wednesday, October 2, in order to receive testimony concerning S. 412, Malt Beverage Interbrand Competition Act of 1985.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. McCLURE. Mr. President, I ask unanimous consent that the Committee on the Judiciary be authorized to meet during the session of the Senate on Wednesday, October 2, in order to receive testimony concerning the following nominations:

UNITED STATES CIRCUIT JUDGE

Laurence H. Silberman, of the District of Columbia, to be United States Circuit Judge for the District of Columbia.

UNITED STATES DISTRICT JUDGE

Paul N. Brown, of Texas, to be United States District Judge for the Eastern District of Texas.

Alan A. McDonald of Washington, to be United States District Judge for the Eastern District of Washington.

Alan H. Nevas, of Connecticut, to be United States District Judge for the District of Connecticut.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON GOVERNMENTAL AFFAIRS

Mr. DOLE. Mr. President, I ask unanimous consent that the Committee on Governmental Affairs be authorized to meet during the session of the Senate on Wednesday, October 2, to mark up the following legislation and nominations:

Civil service retirement legislation; Presidential libraries legislation; Bill Colvin, for Inspector General at NASA; and Barbara Mahone, for Chairman of the Special Panel on Appeals.

The PRESIDING OFFICER. Without objection, it is so ordered.

SELECT COMMITTEE ON INTELLIGENCE

Mr. DOLE. Mr. President, I ask unanimous consent that the Select Committee on Intelligence be authorized to meet during the session of the Senate on Wednesday, October 2, in closed session, to hold a hearing on the national intelligence strategy.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON ARMED SERVICES

Mr. DOLE. Mr. President, I ask unanimous consent that the Committee on Armed Services be authorized to meet during the session of the Senate on Wednesday, October 2, 1985, in order to conduct a hearing on nuclear winter.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON RULES AND ADMINISTRATION

Mr. DOLE. Mr. President, I ask unanimous consent that the Committee on Rules and Administration be authorized to meet during the session of the Senate on Wednesday, October 2, 1985, in order to conduct a meeting to consider legislative and administrative business currently pending, including S. 581, S. 582, and S. 583, bills which concern the Smithsonian Institution.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

NATIONAL COUNCIL OF PUBLIC WORKS IMPROVEMENT ORGANIZES

● Mr. STAFFORD. Mr. President, the Congress enacted Public Law 98-501 nearly a year ago. I was honored to be the Senate author of that legislation, which has come to be known as the infrastructure law.

Title I of that law establishes a 3-year National Council on Public Works Improvement. The Council is required to examine the state of our infrastructure, and to look at ways we can finance future improvements.

Mr. President, I am pleased to report to the Senate that the Council is now in business. The President and the Congress recently completed the selection of the Council's five members. The members are:

Robert E. Farris, commissioner, Tennessee Department of Transportation, appointed by the President to the Council, and the person selected by his colleagues on the Council to serve as its Chairman.

Joseph M. Giglio, a general partner of the investment firm of Bear, Stearns & Co., New York City. Mr. Giglio is the Senate appointee, and has been selected to serve as Vice Chairman of the Council.

A. Freeman Holmer, a councilor from Eugene, OR, former director of finance and administration for the State of Oregon, and an appointee of the President.

Frieda K. Wallison, an attorney with the Washington, DC, firm of Jones, Day, Reavis, & Pogue. She, too, is a Presidential selection.

Peter C. Goldmark, vice president of the Times Mirror Co., and the appointee on behalf of the House of Representatives.

Mr. President, I am most pleased that this important work is moving forward. I commend the President as well as the members selected to serve on this important Council.●

THE BUDGET PROCESS

● Mr. D'AMATO. Mr. President, I rise today to cosponsor S. 1702, a bill introduced by my distinguished colleague from Texas, to amend the budget process to establish a maximum allowable annual deficit ceiling beginning with the $180 billion deficit established in the 1986 budget and reducing the allowable deficit over 5 years to zero by fiscal year 1991.

The Federal budget is now a disaster. A contributing factor to this disaster is the failure of the budget process. Once again, the Congress is being forced to raise the debt ceiling in order to pay the Government's bills. This increase will raise the total debt to over $2 trillion. This increase is an admittance that the budget process has failed.

The Federal sector continues to show imbalances. The fiscal year 1985 deficit is expected to be $25 billion higher than the fiscal year 1984 deficit. This is not due to a lack of receipts. The root cause of the deficit is excessive Government spending. Preliminary estimates put receipts growth at 10 percent in fiscal year 1985. Total outlays, however, are expected to be up 11 percent. Many are quick to blame the increase on defense and interest outlays and claim that other programs are being squeezed. The fact, however, is that growth in real outlays, even excluding defense and interest payments, have accelerated rapidly in fiscal year 1985.

I believe that in order to reduce Government expenditures, the budget process must be reformed. Legislation, such as S. 1702, the Balanced Budget and Emergency Deficit Control Act of 1985, is the proper first step toward reducing Government spending.

I believe the economy is beginning to show signs of renewed strength that will carry forward into 1986. I, however, remain wary of economic indicators. These signs could quickly change, unless something is done with the budget process. This bill is timely and I urge my colleagues to support it.●

CONAGRA: 1985 FOOD PROCESSOR OF THE YEAR

● Mr. ZORINSKY. Mr. President, one of the biggest success stories of the decade in the Midwest has been the revitalization of ConAgra, Inc., a diversified food company headquartered in Omaha, NE. Under chairman and chief executive officer Charles M. "Mike" Harper, ConAgra has seen annual sales grow from $580 million in 1975 to $5.5 billion this year. Acquired along the way were companies with such familiar names as Armour Foods, Banquet, and Singleton Seafood.

In recognition of this tremendous growth, ConAgra recently was named 1985 Processor of the Year by Prepared Foods magazine. A cover story by executive editor Mike Pehanich chronicles ConAgra's rise to leadership among U.S. food companies.

Mr. President, I think those unfamiliar with ConAgra should learn about this remarkable company and its recent record of success in the Great Plains. Accordingly, I ask that a partial text of the Prepared Foods article be printed in the CONGRESSIONAL RECORD.

The material follows:

[From Prepared Foods, Sept. 1985]

CONAGRA: NEW LEADER IN ITS FIELD

(By Mike Pehanich)

Picking top managers is the topic, and, by all rights, it is one that Charles M. "Mike" Harper should own.

ConAgra's chairman and chief executive officer has nursed a lifeless Omaha-based commodities merchant from the brink of bankruptcy to fiscal health and gone on to coach it to prepared foods leadership in a mere decade. The former Pillsbury group vice president has done so, too, with a lean corporate staff that hardly seems large enough to direct a company that recorded fiscal '85 sales of $5½ billion with remarkable efficiency.

The question is asked: What is that blend of princely and pragmatic qualities that makes successful managers?

Harper peers over his reading specs a la Lyndon Johnson and eases into a philosophy of accountability, discussing how top drawer people attract other top drawer people and the need for "balanced businessmen" and a balanced approach to business. Yet still the question remains.

But when do you know you have a top manager, who has what the others don't?

He shakes his head for seconds, unable to speak—an enlightened man tongue-tied in truth's self-evidence. "You can tell," he says, finally. "You just can tell."

Curiously, that is the way it is with so much of the success of ConAgra, newcomer to prepared foods stardom. The strengths are apparent; the record uncontested. But when it comes to explaining why it is such a remarkable food company, well . . . you can tell, you just can tell.

TOP OF THE CHARTS

ConAgra could very well be, as Harper once described it, "the best damn food company in the U.S." Yet with only 10 years between its lofty current achievements and its courtship with ruin in 1976, its success seems to have come too rapidly to be fully believed, as if wizardry rather than business acumen had generated its success.

Its growth alone has been remarkable. When Harper joined ConAgra in 1975, its sales, coming from stubbornly priced commodities, amounted to $580 million. By fiscal 1985, sales had increased about tenfold to $5.5 billion.

Among the Fortune 500 leaders in ten-year average annual return to investors, it ranked tenth in 1984 with a 49.51% figure, set against an industry average of 19.35%. It has averaged 23% return on stockholders' equity over the past five years, posting 22% in 1985 against an industry average of 16.2%.

Even more remarkable has been how its prepared foods business has come to flower. In 1980, the company's second season in the value-added business, it amassed combined broiler chicken and catfish sales of $250 million and lost money. At the end of fiscal 1985, food sales outside agri-business totaled $3.6 billion and generated $154.1 million in profit.

"Much of ConAgra's success has to be credited to Mike Harper," says Bob White, v.p. of corporate planning and development. "Early on he said he wanted us to be the 'best damn food company' in terms of earnings. He put us on the fast track, and now he has believers."

Among its successfully integrated acquisitions are Banquet, Singleton Seafood, Sea Alaska seafood, Pfaelzer Bros. premium meats, Home Brands jellies and peanut butter, and Armour Foods.

Today, ConAgra claims to be the largest frozen prepared foods processor in the world.

The "new ConAgra" is probably exemplified in the Banquet turnaround. The undistinguished Banquet brand had generated a new product in a decade under its former parent. In contrast, 24 new Banquet products were introduced in 1984; 30 in fiscal '85. In addition, the Banquet image has received a facelift, with quality and consistency elevating consumer estimation of the brand. Sales of the brand were up more than 15% in 1984.

SURVIVOR TO LEADER

The frontispiece of ConAgra's commitment is to survive hard times. Fear of the financial graveyard is, indeed, so prominent that it precedes excellence and growth in the company's general strategy.

It stems, no doubt, from the decade-ago brush with disaster and is perhaps Harper's way of reminding his managers from whence they came.

The company had to move deftly. Unused property was unloaded and 25 assets were cut to pare debt by $35 million. A year later and already in the black, Harper and company rendezvoused in the Rocky Mountains and set down the company's financial objectives. Debt would not exceed 40% of capital. Trend line earnings should exceed 14% per year from the fiscal 1973 base—the company's best performance year prior to its rebirth. Dividend payout was targeted at 30 to 35% of trend line earnings. Finally, it aimed for minimum 20% return on year beginning common stockholders' equity.

"Twenty percent R.O.E. We live, breathe, and die by that," says Philip Fletcher, president and chief operating officer of ConAgra Frozen Prepared Foods Companies.

Such requirements have made the selection of acquisition candidates especially challenging, despite the company's reputation for making track stars of lame firms. Roughly 60 acquisitions have been completed since fiscal 1976 which in part explains the company's enormous leap in dollar volume during the same period.

"We look for a good fit within the broad food industry spectrum or allied product lines," explains White.

ConAgra has strategically expanded its operating base, linking agricultural commodities businesses with processing operations and imposing uniformly high standards upon all of its businesses. Few argue the strategy's effectiveness. On the commodities end, it leads the U.S. market in flour, pesticides, and poultry sales. On the finished end are processed poultry, frozen prepared foods, and processed fish and seafood.

"Full integration is not an overriding consideration in all of our businesses, but we do it where it makes economic sense," claims White, partially explaining the seemingly puzzle-like fit of ConAgra acquisitions. "Basically, we say we will look at the food business from the farmer's gate to the consumer's stomach."

The Armour acquisition in late 1983 has carried the company into further-processed red meats and strengthened its center-of-the-plate protein presence.

In truth, not everything the company touches turns to gold. ConAgra bailed out of a small pet food business which it didn't think could compete effectively. This past year, it left the frozen salmon processing business, and its Sea Alaska unit took a pounding with the king crab supply which went from 180 million lbs. in 1980 to 15-20 million lbs. last year.

How ConAgra is approaching Sea Alaska is indicative of the level-headedness with which management decisions are made. Current strategy is to manage the business to break even for the present while positioning it to make money when the crab curve turns upward. It is also examining surimi, the Japanese process whereby minced bottom fish is made into shellfish imitations and other types of products, as a buffer against market misery.

"Twenty percent R.O.E. is a goal that drives our company, but you have to look at the total picture," says Mike Harper. "Other large companies got out of the broiler business because they couldn't get stair-step earnings. *Average* return and long-term earnings growth are more important."

Diversification is important, too, Harper points out. The cycle of every individual segment has its good and bad years.

"We are spread out across the agribusiness chain so that someting is always doing well," says Harper.

INDEPENDENT OPERATIONS

Regarded by both peers and analysts as one of the top 10 CEOs in the U.S., Mike Harper seems to ascribe to a minimalist management philosophy that manifests itself in the de-centralized structure of ConAgra.●

TRIBUTE TO INDIANA VOLUNTEERS

● Mr. LUGAR. Mr. President, today I would like to acknowledge the volunteer efforts in Indiana during the wake of the recent tragedy in Mexico. Beginning Thursday evening, September 19, my Indianapolis office received over 166 inquiries on separate individuals who may have been affected by the earthquake.

Largely through the efforts of the amateur radio community of central Indiana we were able to locate a large number of these individuals. The staff and volunteers of the Hispano American Center, Inc., and the Mexican Association of Central Indiana were equally invaluable with their help during this crisis. These volunteers and the leaders of the Hispanic community worked tirelessly with the State Department to locate relatives and insure that they were alive and well. I commend these volunteers and applaud their deligent work.

I would also like to pay tribute to the local news media who continually provided information, many times in Spanish as well as English, on where people could phone to locate relatives and what organizations were accepting donations.●

O'GORMAN NAMED ONE OF NATION'S OUTSTANDING SCHOOLS

● Mr. ABDNOR. Mr. President, today I would like to call to the attention of my colleagues an outstanding high school from the State of South Dakota, O'Gorman High School in Sioux Falls.

O'Gorman High School, a parochial school, has been named 1 of 281 outstanding secondary schools in the Nation by the U.S. Department of Education. President Reagan and the

Department of Education yesterday honored O'Gorman High School at ceremonies at the White House.

This school was chosen on the basis of 14 criteria outlined by the Commission on Excellence in Education. These criteria include academic goals, discipline, and students progress. It pleases me that O'Gorman was so chosen on these and other points.

I ask you to join me in giving O'Gorman High School and its students and faculty, a well-deserved congratulations for its achievement of excellence in education.●

RELIGIOUS OPPRESSION IN SOVIET UNION

● Mr. SYMMS. Mr. President, as a participant in the 1985 Call to Congressional Conscience, I wish to bring to the attention of my colleagues the serious plight facing the thousands of religiously oppressed peoples in the Soviet Union. We must make the Soviet Union realize that peace and better relations between our two countries is dependent upon respect for human rights. As Americans, freedom of religion is often taken lightly, for we know that written in our Constitution is the inalienable right to choose a religion which we believe to be true. But for others in foreign lands such as the Soviet Union, the exercise of this "right" is a constant struggle against harassment, eviction from housing and schools, and even persecution and imprisonment. How can we, as leaders of this free Nation, ever come to an understanding with the Soviets, when the two countries disagree on basic human rights? How can we as Americans, find harmony with the Soviets when they deny the right of a person to exercise and practice a religious belief? I feel, that if we are to reach these goals, the Soviet Government must agree, and we as Americans must stress that the rights and freedoms of human beings are independent of the prerogatives of a government. We have learned through many sources, that the struggle for religious freedom continues in the Soviet Union and East Europe. We must voice our complaints to the Soviets. We must let those oppressed know we recognize their plight and pray that they will not give up hope to practice and preach their beliefs.

Real world peace cannot come about as long as the Soviet Union continues the harassments, beatings, imprisonments and deaths of its citizens who wish to emigrate or practice their religious beliefs. I urge my colleagues to pray to God that those who suffer these tragedies be permitted to practice and preach their faith unmolested. We must continually voice our concerns to our President and foreign policy officials to employ whatever powers are available, to extend our freedoms to others who long to share them.

During the first 6 months of 1985, 500 Jewish emigrants, or refuseniks, were permitted visas to leave the Soviet Union. Others wait, for many up to 10 years, to emigrate. The number of emigrants declined since the signing of the Helsinki Final Act of 1975. This decline must be reversed. A very few are permitted to leave, and there remain thousands that have the hope that they too will be allowed to start a new life of freedom outside the U.S.S.R. We must see to it that this hope is never extinguished, that it is kindled by our support and efforts. I urge my colleagues today to exercise their inalienable rights, as I am, and voice their complaints against Soviet religious persecution.●

SIMPLIFIED IMPUTED INTEREST RATES

● Mr. SIMON. Mr. President, earlier this year I voted for simplification of the reporting requirements for imputed interest rates on real estate sales. Yesterday, by voice vote, we in the Senate unanimously agreed to the conference report and sent it to the White House for signing.

I supported final passage but did vote for an amendment to put off a recorded vote for 10 days until reconciliation of Government appropriations bills could take place. I feel strongly that we have to move toward a balanced budget, and I favored requiring revenue replacement for the temporary loss from this bill. I want these votes interpreted as my continued strong support for a simplified and fairer imputed interest rate and as an expression of my strong support for a balanced budget.●

REPUBLIC OF CYPRUS COMMEMORATES 25TH ANNIVERSARY OF INDEPENDENCE

● Mr. LEAHY. Mr. President, the Republic of Cyprus commemorated its 25th anniversary of independence on Tuesday this week, and I urge my colleagues to reflect upon the history of that island. As we know, the island of Cyprus is of major strategic importance in the Eastern Mediterranean. Its people are blessed with a land of great beauty. In addition, Cyprus has been very helpful to the United States. Cyprus was utilized by wounded American soldiers stationed in Beirut after the bombings there. It is the base for C-130 transport planes to resupply U.S. troops and the 6th Fleet in the Mediterranean. And Cyprus was instrumental in the successful effort to remove thousands of PLO members from Lebanon in 1982.

Currently, the U.N. Secretary General is working strenuously to resolve the conflict on Cyprus and to restore the island's unity. The United States supports this effort, and I believe that the U.N. can be helpful in arranging a peaceful resolution of the divisions on the island. On this 25th anniversary of Cyprus' independence, we should take note of the special historical importance of Cyprus and work for a peaceful future.●

THE IMPACT OF EXPLODING HEALTH CARE COSTS

● Mr. STEVENS. Mr. President, I had the pleasure to hear former Secretary of Health, Education, and Welfare, Joseph Califano Jr., speak on August 7, before Commonwealth North in Anchorage, AK. Commonwealth North is composed of very prominent business and professional people throughout Alaska.

Secretary Califano made some very significant observations and comments regarding the explosion of health care costs and the impact on business and government. I highly recommend that all taxpayers read his words. To assist in facilitating that, I ask that his comments be printed in the RECORD.

The comments follow.

CHRYSLER'S HEALTH CARE COST CONTAINMENT: THE FIRST RESULTS

(Remarks of Joseph A. Califano, Jr.[1])

For years my message about health care costs has been bad news. I've been telling everyone who would listen that the megaton explosion in health care costs could cripple business, crush taxpayers, and compel government to ration medical care.

From the time I served on President Lyndon Johnson's White House staff, I've been working on this problem. To get Medicare and Medicaid passed in 1965, we acceded to the demands of doctors for payment of their usual and customary fees-for-service, and of hospitals for cost-based reimbursement.

By 1968, we knew these payment systems were at the hard core of health care inflation. In his Message on Health to the Congress that year, President Johnson sounded the alarm and cited three "major deficiencies" to be corrected:

The tilt of insurance plans that "encourage doctors and patients to choose hospitalization,"

The fee-for-service system with "no strong economic incentives to encourage [doctors] to avoid providing care that is unnecessary," and

The fact that "hospitals charge on a cost basis, which places no penalty on inefficient operations."

The President asked for authority to "employ new methods of payment." He warned that unless the nation restrained hospital costs, its health bill could reach $100 billion by 1975 and the cost of medical

[1] Mr. Califano is a director of Chrysler Corporation and Chairman of the Board's Commitee on Health Care. He is senior partner of the Washington law firm of Dewey, Ballantine, Bushby, Palmer & Wood. He was President Lyndon Johnson's Special Assistant for Domestic Affairs and Secretary of Health, Education and Welfare from 1977 to 1979. His forthcoming book, "America's Health Care Revolution: Who Lives, Who Dies, Who Pays," will be published by Random House next January.

care for a typical American family would double in 7 years.

Newspapers and leaders on Capitol Hill dismissed Johnson's numbers as hyperbole to get his program passed. Congress failed to act, bowing to pressures from the American Medical and Hospital Associations.

As it turned out, Johnson's numbers weren't right. By 1975, America's health care bill actually hit $133 billion. And the cost of medical care for an American family did not double in 7 years, it doubled in less than six.

My next heavy engagement with health care costs came as Secretary of Health, Education and Welfare in the late 1970's. Our repeated attempts to cap hospital costs were rebuffed by a Congress just beginning to bubble with anti-regulatory sentiment and once again responsive to pleas of doctors, hospitals, and hospital trustees. The cap we then proposed on hospital charges was across-the-board, designed to control payments by commercial insurers and Blues as well as Medicare and Medicaid. At that time, I was convinced that the job of in health care costs was too big for the private sector, that only government could do it, and that government had to do the whole thing.

Well, I've learned a lot during the last six years. I now believe the great hope to cut health care costs rests in an awakened, varied, competitive world of business purchasers insisting on high quality care at much lower cost, and health care providers competing to make the sale.

Government has to do its share, get its own house in order. But a Congress whose members must depend on private contributions for election campaigns, who are responsible to represent constituencies in their home districts and states, and who will inevitably worry about offending hospital trustees and influential state and local medical societies cannot do the job alone.

My conviction that the key to health care cost containment rests in an aroused private sector in no small measure relates to the first returns on our program at Chrysler.

Last year Chrysler cut its health care bill by $58 million, down from the $460 million projected in its budget. That amounts to savings of more than $300 for each employee and retiree. The $402 million is still high, but remember that for many years every time we made up a health care budget at Chrysler, we exceeded it. And our savings were achieved against double-digit hospital inflation and a 17 percent increase in Medicare deductibles and co-payments.

How did we achieve these big savings?

Let me start by giving you a bit of recent history.

In 1981, when Lee Iacocca asked me to join the Chrysler board, he told me Chrysler's health care costs alone could block the company's recovery. He asked me to set up and chair a Health Care Committee of the Board of Directors. As far as I know, it is still the only committee of its kind in corporate America.

For starters, the committee would include the two of us, Lee and me, and United Auto Workers President Doug Frasier.[2] As only Lee could put it, the three of us had done more to create the problem than any three people in America. I'd helped invent and administer Medicare, Medicaid and the Great Society's other health programs. Doug Fraser had demanded richer and richer health care benefits for the United Auto Workers. And Lee Iacocca had agreed to nearly every one of Fraser's demands. All of us—government, progressive management and labor—did all of this, with the best of intentions, for the most compassionate of reasons.

And Chrysler's experience is not unique. Since World War II, government, unions and corporate management have focused on providing more and more health care benefits for our people, without realizing they were becoming hostages to costs beyond their control. We all assumed that more was better, without ever assessing the correlation betwen higher costs and better quality care. So today, Americans take more tests, use more drugs, get more x-rays, have more surgery and spend more time in hospitals for minor medical procedures than any people in the world.

I don't need to belabor health care cost inflation trends. Last year our nation began to spend more than $1 billion a day on health care. For Chrysler, knuckling under to these costs would have meant disaster.

The first thing our committee did was ask: What were we getting for our health care dollars? The first thing we discovered was that we didn't know. Chrysler was spending more than $300 million for health care in 1982, and had no idea what it was buying or from whom. We didn't know who the efficient suppliers were. We had no quality controls. We didn't have the slightest idea what health care our employees needed.

Like most businesses, Chrysler had historically relied on whatever information its insurance carriers provided—or didn't provide. We didn't know how much we were paying, for what medical tests, diagnoses or procedures, to what doctors, hospitals or laboratories, for which employees, retirees and dependents, or how often. So the first step was to get the facts—the kind of information any businessman or individual buyer should get from any seller.

We took a 30-month snapshot of our health care purchases. We examined more than 67,000 hospital admissions, and more than $200 million in charges, incurred over a 30-month period. We cataloged each incident of inpatient and outpatient care for each Chrysler employee, retiree and dependent, doctor by doctor, hospital by hospital, diagnosis by diagnosis, test by test, x-ray by x-ray. What we found was appalling: unnecessary care, inefficiency, waste, even abuse and fraud. Unneeded care costs money. What's worse, subjecting individuals to unnecessary blood transfusions or x-rays, or to inappropriate surgery or hospitalization, endangers their health and often even their lives.

Here's the kind of thing we discovered for one year alone, the year 1981:

Chrysler insured got more than one million lab tests at a cost of $12 million. That's more than 5 for every man, woman and child we insured. Lee Iacocca quipped that since he didn't have any, someone got at least 10.

In the Detroit area, at the six largest acute care hospitals used by Chrysler employees, the cost for average length of stay ranged from $3,028 up to $6,077—a 100 percent spread.

The variances were just as wide in fees different physicians charged for the same services and the tests and x-rays they prescribed for the same diagnoses.

The single most costly medical procedure Chrysler paid for turned out to be the $4 million doctors billed the company for post-admission visits to hospitalized patients—$4 million for those bed visits doctors make as they walk down the hall.

Cataract surgery charges were skewed. The procedure is fairly common for the elderly; it takes about 20 minutes, and rarely requires a general anesthetic. The average ophthalmologist charge in the Detroit area is $2,000 for the operation. If a docotor does just three 20 minute procedures a day, four days a week, 42 weeks a year, he grosses more than $1 million for less than 200 hours of actual surgery. By comparison, in the Detroit area, the average physician charge for serious abdominal surgery is only $1,500; such surgery takes four to five hours, and its risks are far greater.

Against this backdrop of inefficiency, waste and abuse, we acted. Here are some of the things we did.

One of our early efforts focused on prescription drugs. Employees and retirees could get any prescription drug, no matter how expensive, for a $3 co-payment. Chrysler paid the pharmacist for the rest, whether it was a $35 brand-name product or a $7 generic equivalent. With the United Auto Workers' cooperation, we now limit Chrysler's payment to the price of the generic drug, unless the physician prohibits substitution. Employees can have the brand name equivalent, if they want to pay the price difference. The program saved $250,000 in the first partial year and promises much larger savings in the future.

We wanted our insured to be active and alert consumers, to review their medical bills for accuracy. So we started a program called "One Check Leads to Another." Under it, Chrysler shares refunded overcharges with employees and retirees who find them.

We've begun encouraging outpatient surgery, at a savings in 1984 of $2 million.

For dental care, we had offered only a fee-for-service plan. Unlike our medical coverage, however, the dental plan had meaningful co-payments and a maximum ceiling. We offered our employees an alternative: a dental Health Maintenance Organization. The Michigan HMO offers full coverage of all dental services with no deductibles, no co-payments and no yearly maximums. All services are performed at a fixed, pre-negotiated price to Chrysler.

Our dental HMO program already has more than 17,000 members. The dentists didn't like this program—in fact, they tried to stop it by writing letters to every Chrysler employee. The 1984 savings were $3 million.

We've mounted a major health promotion and disease prevention effort to keep our people out of the hospital and in good health. We inform our people about the dangers of smoking and urge them to quit. We tell them about the benefits of proper diet, exercise and rest, and the dangers of alcohol and drug abuse. We are beginning to provide financial incentives to adopt healthy life styles. More than one executive quit smoking upon learning that company life insurance rates were 75 percent higher for smokers. We also let our employees know that health care costs are a serious problem—and that they can get the same or

[2] The present committee is composed of UAW President Owen F. Bieber, former Michigan governor William G. Milliken, Owens-Illinois Chairman and Chief Executive Officer Robert J. Lanigan, Lee and me.

better care for less money if they make informed choices.

All these actions are paying off in savings to Chrysler and in better health care for its employees. But the big bucks have come from our move on unnecessary hospitalization.

First, we changed our view of hospitals. At Chrysler, we now regard them as institutions to stay out of, settings of last resort, places to go for treatment only when all else fails.

Second, we directly confronted hospitals with high profiles of unnecessary admissions or needlessly extended stays.

Third—and of critical importance—we instituted a prescreening program for hospitalization for salaried employees. Chrysler will not pay for hospitalization in non-emergency, non-maternity cases unless the need for admission is confirmed in advance by a second, independent, medical opinion. Where hospitalization is warranted, a specific number of days for reimbursement is approved before admission. If the admitting physician believes the stay should be extended beyond the specified period, he must go to Blue Cross in advance, explain why, and get approval. Otherwise, Blue Cross will not pay for the extra time.

Reducing hospitalization, more than any other single effort, has been responsible for enormous savings in 1984. Of the $58 million saved, we believe that about $32 million is attributable to hospital costs, and about $22 million to doctors fees and tests largely associated with hospitalization.

The most important lesson from the Chrysler experience is not the $58 million that have been saved in 1984. The most important lesson is that hard negotiating buyers, who treat health care like the other products they purchase, can change the system.

Where this comes through most clearly in the Chrysler experience is what's happened to Blue Cross/Blue Shield premiums compared to the price of Health Maintenance Organizations. For Chrysler salaried employees, we have been able to put in place all changes as soon as they appear to make sense. As a result, for salaried employees, in 1985 the Michigan Blue Cross/Blue Shield premiums are lower than the charges of Detroit health maintenance organizations.

What's the reason for this?

The largest single reason is that we are wringing unnecessary hospitalization related tests and care out of the Blue Cross/Blue Shield plan.

What does this portend for the future?

Intense competition, and a revolution in attitudes and in the delivery of health care.

We have already approached Michigan HMOs, and asked them to reduce their charges to us.

We intend to confront physicians as we have hospitals, to ask those who charge twice as much or more for the same services why they do, to redress the imbalance of skewed payments for cataract operations and dermatology as opposed to general surgery and family physicians, to establish professional screens and cost-benefit standards for psychiatric care, to seek out the most efficient hospitals, doctors, dentists, laboratories and radiologists and give our business to them. Simply put, Chrysler has reclaimed its right as a health care consumer to buy from efficient producers and to buy only the health care its employees need. And other businesses are doing the same.

Chrysler is mounting a frontal assault because a wide-open, fee-for-service, cost-based payment system simply can't deliver cost-effective, high quality medicine. The system is not an evil empire; it's just that all the incentives in it have pointed in the wrong direction. Doctors paid fees only when they deliver services will deliver more services. Hospitals paid on a cost or cost-plus basis will not purchase equipment prudently or care about efficient care of patients. Employees who think health care is a free lunch are likely to have insatiable appetites.

There isn't one single answer, certainly not at this early stage in the health care revolution and probably never. We need a variety of systems: commercial insurers, Blues, HMOs, preferred providers, hospitals, doctors and outpatient clinics, independent laboratories and radiologists, all competing with each other.

There has been some good news at Chrysler but the burden of health care costs still roosts on our shoulders.

Even though we saved $58 million, Chrysler still spent more than $400 million on health care in 1984. That's enough to make Blue Cross and Blue Shield Chrysler's single largest supplier.

Even with our savings, Chrysler's total health care bill, including its share of the Medicare payroll tax, came to more than $530 for every car we sold in 1984. That's about 10 percent of the cost of Chrysler's lower-priced models, and seven times the $75 per car that health care cost Chrysler in 1970.

Even with our savings, Chrysler's health care bill exceeded the amount Chrysler paid in cash retirement benefits to all of its 65,000 pensioners in 1984. And it was more than 4 times what we paid our shareholders in dividends.

It's no wonder Chrysler has so much more to do, and America has so many surplus hospital beds, duplicated services, and hospital staffing levels that often make the featherbedding that brought down the nation's railroads look like a lean and mean model of efficiency. The financial structure of the health care system stems from bad seeds of fee-for-service physician payments; cost and cost-plus hospital reimbursement; artificial monopolization of the practice of medicine and dentistry; unpredictable standards of malpractice and whopping judgments against hospitals and doctors that don't live up to them; government, corporate and union health care plans that let providers write their own checks; and decades of cozy intimacy that has characterized the relationship of the Blues and commercial insurers with doctors and hospitals.

Chrysler and corporate America are at last moving and shaking the health industry. But the problems are bigger than we and our insurers can solve. The government must work to restructure the health care system. DRGs—Diagnostic Related Groups—which set hospital payments for illnesses in advance regardless of the length of stay, are an important step. They have sparked a change in the attitude of hospitals that has helped Chrysler and other corporations. But too much of what the national government does simply shifts costs to the states and the private sector.

Medicare increases deductibles and co-payments to help control federal spending. Chrysler and other businesses with broad coverage for retirees, pick up most of those costs, dollar for dollar. Individuals not fortunate enough to have such retirement benefits must themselves bear these costs—if they have the money. So costs that disappear from the federal budget reappear as corporate or individual expenses. The feds cut Medicaid and drop beneficiaries from its rolls, and the costs pop up on state budgets. Nothing is saved. The system isn't any more efficient. The feds have simply hidden the pea under someone else's shell.

The national government must abandon its penchant for merely shifting costs, turn its head to structural changes in health care payment and delivery, and be sensitive to the tidal effects its cost cutting moves can have on these turbulent waters.

There is another task our government must perform. Hard-nosed bargaining by business and governments will bring down costs and give us a system efficient enough to provide quality care for all our people at a reasonable cost. But pressures of vigorous competition leave little space to provide Robin Hood care for the elderly, the poor and the unemployed. Competitive forces signal an end even to well-intended cost-shifting to pay for the poor by charging the well-insured more. By law, Medicare does not allow payments for anyone except Medicare patients. Business pressure to bring its own costs down will now prevent imposing higher charges on its insured. In such an environment, government must protect the vulnerable, and assure them access to medical services, or they will be squeezed out of the health care system.

Why am I so concerned about health care costs?

This nation cannot afford further delay in addressing the health care cost crisis. The graying of America is forcing the issue, with an ever-growing population demanding more expensive high technology hospital care.

In 1940, roughly seven percent of our population was 65 or older. Today that proportion is about 12 percent. When the baby boom ripens into the senior boom in the first quarter of the next century, some 20 percent of our population—about 60 million Americans—will be 65 or older.

And the composition of our older citizens is changing. In 1940, less than 30 percent of our senior citizens were 75 or older. By the end of this century, almost 50 percent of those over 65 will be 75 or older.

It's not just that life expectancy is now 72 for a man and 78 for a woman. Far more important is that those who live to be 65 now have a life expectancy of 82.

The effect of the aging of our population on health care costs is sobering. The Congressional Budget Office now projects that Medicare's hospital insurance trust fund will go bust by the early 1990's.

Yet, the hospital fund crisis is only the tip of the iceberg.

Few Americans have even begun to think about the unfunded health care liabilities of our nation. As our health care costs increase and our population ages, the present, unfunded post-employment health care cost liability of the Fortune 500 American companies alone—with about 15 million employees—approaches $2 trillion. That's more than the total assets of those companies.

That unfunded liability number alone should make us all realize that in health care costs, we face one of the greatest financial and social crises in this nation's history.

We simply don't have the money to maintain an inefficient health care system.

That stark fact presages a terrifying triage for the American people, and a debate over euthanasia more searing than our debate over abortion. In a book recently published by Brookings Institution, the authors, Henry Aaron and William Schwartz,

argue persuasively that, like Great Britain, we will soon ration health care in our country.

We always have had rationing, of course, related to individual economic wealth. But with Medicare, the government becomes the rationer of health care for those who use and need the acute care system most. This role is reinforced by the fact that the federal government funds 90 percent of all the basic biomedical research in America, and, together with state and local governments, pays most hospital bills.

Bluntly put, Uncle Sam will soon be playing King Solomon with your father and mother, and mine, and with you and me.

We face a frightening specter in our nation as medical technology and spiraling costs combine to blur the lines in hospital rooms among natural death, euthanasia, suicide and murder.

Without the most energetic pursuit of efficiencies, we will soon face a world in which there is no kidney dialysis for people over 55, no hip operations (or artificial hips) for those over 65, a world in which eligibility for expensive anti-cancer therapy will be based on statistical assessments of success, and key organ transplants will be severely limited to special cases of virtually certain recovery—all as defined in pages and pages of government regulations.

What kind of a vision for the future is that? It's not a very pleasant one. But, in Great Britain, that future is now. That's just what they do today. We in America are fortunate because we still have time to avoid that fate. We can learn from Britain's experience. We have a far more productive society. We can well afford to provide quality medical care to all. But we must eliminate inefficiencies and reduce the cost of health care for our society as a whole.

These issues, which go to the very sanctity of human life, are what add a special dimension and solemn responsibility to you who lead our people in the private and public sectors—and what make it such a privilege for me to speak to you for a few moments this morning.●

THE CIGARETTEE TAX

● Mr. SIMON. Mr. President, government should be encouraging people to live healthier lives. Leaders and lawmakers also should be doing everything possible to reduce the Federal deficit. Congress and the administration will sabotage both goals if they allow the cigarette tax to be cut in half October 1. In a weekly column I write for newspapers in my State, I note a new study by Harvard University that projects hundreds of thousands more teenagers will start smoking if the cigarette tax is lowered. This would be a travesty. I ask that the column be printed in the Record.

U.S Senator Paul Simon

A DEADLY DECISION SOON TAKES HOLD

Unless Congress and the Administration changes their minds, come Oct. 1 the nation will take a step that will increase the deficit and cost thousands of lives.

On Oct. 1, the cigarette tax is scheduled to drop 8 cents a pack, from 16 cents a pack. That will cost the federal treasury about $1.8 billion a year in income.

Why are we doing this?

Because the tobacco interests want it.

Why do they want it,

It's not very subtle. When you are my age—56—you either smoke or you do not smoke and sending the cost of a pack of cigarettes up or down 8 cents will not make much difference, except for the poorest people.

But teenagers are very price sensitive. When the price of cigarettes goes up, fewer teenagers smoke. When the price goes down, more teenagers smoke—hundreds of thousands more according to a new study by Harvard University.

The tobacco interests want to hook more young people on smoking. It's that simple.

And Congress and the Administration are going along with the tobacco industry, hurting the economic health of the country and hurting the physical health of its people.

The Harvard study says that "over 480,000 Americans will die prematurely if the 8-cent tax decrease takes effect." It estimates as many as 1 million additional young people will join the ranks of smokers if the tax cut takes place.

If their study is wrong by 50 percent, that still means 240,000 shortened lives, 500,000 more teenagers smoking.

It also means a bigger deficit for a country already awash in red ink.

The Harvard study also says that approximately 333,000 adult Americans would quit smoking if the tax were raised 8 cents a pack.

A University of Michigan health specialist reaches even more startling conclusions.

What the exact figures are no one knows.

But we do know some things from other sources:

Smoking is the most important cause of preventable death.

Eighty percent of all lung cancer deaths and 30 percent of all coronary deaths are attributable to smoking.

Lung cancer soon will surpass breast cancer as the leading cause of cancer among women.

The number of high school seniors who smoke is now down to 21 percent.

The last statistic is what bothers the tobacco people. Unless that changes, the cigarette industry in the United States will eventually be hurting.

With a near $200 billion federal deficit, we should be talking about ways to reduce the deficit, not increase it.

With the nation's health gradually improving, we should be talking about ways to improve it further, not harm it.

We are about to take a senseless, tragic step backward.

COMMENDATION OF 111TH SESSION OF THE WEST TENNESSEE ANNUAL CONFERENCE OF THE AFRICAN METHODIST EPISCOPAL CHURCH

● Mr. SASSER. Mr. President, this weekend will mark the 111th session of the West Tennessee Annual Conference of the African Methodist Episcopal Church.

The 13th District of the African Methodist Episcopal Church covers my own State of Tennessee and that of Kentucky. I am pleased that this year's conference will be held at the Greater Bethel A.M.E. Church in Jackson, TN.

Special honor will be paid to Bishop C.E. Thomas, bishop of the 13th District, Rev. James L. Gleese and Rev. J.C. Miller, heads of the conference, Rev. E.M. Martin, head pastor of the 13th District, and Mrs. H.L. Starks for her outstanding contribution to the good work of the A.M.E. Church. Rev. Elmer Martin deserves a special coord of praise for his devotion to the church through his work in behalf of the conference.

I extend my welcome to all those participating in the conference—from Tennessee and Kentucky. I wish them every success in this most important conference.●

IN MEMORY OF E.B. WHITE

● Mr. LAUTENBERG. Mr. President, E.B. White was a hero to nearly everyone who cares about words. He died yesterday, but he left us a lot. As almost any child knows, E.B. White left us "Charlotte's Web," "The Trumpet of the Swan," and "Stuart Little."

And as nearly anyone who has ever taken English I–A can tell you, Mr. White was responsible for the famous book "The Elements of Style." It is a book that English teachers send their students back to again and again.

Mr. White was a modest man, yet he was celebrated for his devotion to the English language. He was a guardian of our language, pointing the way to its simple, direct use.

Mr. White ended his book "Charlotte's Web" by describing Charlotte, the spider, in this way:

"It is not often that someone comes along who is a true friend and a good writer. Charlotte was both."

Mr. White was both a good writer and a good man. He will be missed.●

A YOUNG MAN'S TREK

● Mr. DURENBERGER. Mr. President, a revival is taking place today among America's youth. Many of our young people are demonstrating beyond a doubt, that they are not a "me" generation of selfish individuals who believe their needs come first. They are displaying a remarkable sense of compassion, energy and personal commitment to improving the quality of life for their fellow Americans through their voluntary efforts.

Wayne Meisel, a 25-year old from Minneapolis, makes me proud to represent Minnesota in the United States Senate. Wayne's dedication and commitment to the volunteer spirit is inspiring. With a backpack on his back and a painter's cap on his head, Wayne embarked on a 5-month, 1,500 mile walk around the United States stopping at university and college campuses along the way to promote student-run community volunteer programs.

Since Wayne's walk, he has formed a national coalition of student involve-

ment programs, pointing out the importance and rewards of volunteering in community projects outside of campus walls.

The influence of Wayne's commitment—and others like him—goes beyond the immediate results. Young adults like Wayne will someday lead our Nation. Knowing the commitment of their hearts and minds should reassure us about leaving the responsibility of running this country to future generations.

I ask that the text of a recent New York Times article on Wayne Meisel be printed in the RECORD:

The article follows:

[From New York Times, Sept. 1, 1985]

A YOUNG MAN'S TREK FOR VOLUNTARISM LINKS CAMPUS PROJECTS

Early last year, when Wayne Meisel told his father about his plan to go on a 1,500-mile trek through 13 Eastern states to interest college students in volunteering for public service projects, his father grimaced.

"My mom laughed at first," the softspoken, 25-year-old Harvard graduate said, "but finally gave me her support."

With a backpack, his painter's cap and letters of introduction from Derek Bok, the president of Harvard, and Senator David Durenberger, Republican of Minnesota, Mr. Meisel set off last January on a five-month, zig-zagging journey from Waterville, Me., to Washington, stopping off at 70 colleges along the way. At each college, he consulted with campus leaders on techniques for promoting community service projects run by students.

He made his walk on a shoestring budget. "I've slept on the floors and couches of 180 dormitories and fraternities," he said. "In Maine, I even stayed in an abandoned fried-clam stand."

"Sure, some people thought what I was doing was crazy," he said. "But I wanted to show students what someone with little money and strong ideals could accomplish."

Mr. Meisel said his reasons for completing his journey on foot were practical: "By walking, I was able to draw attention to the importance of student involvement in community life beyond the campus walls. And besides, at the time I didn't own a car."

Pooling the contacts he made on his walk, Mr. Meisel has since formed the Campus Outreach Opportunity League, a national coalition of student volunteer programs. Financed by a one-year $17,400 grant from the Edward W. Hazen Foundation in New Haven, Mr. Meisel and the staff of his New Haven-based organization provide technical assistance to students and university administrators seeking to improve off-campus volunteer programs. The coalition also organizes national student conferences on aspects of student voluntarism and publishes pamphlets listing job opportunities in community service.

"We want to stay away from the notion that students should be involved in community service out of a sense of moral obligation," said Robert Hackett, 24, a co-director of the group. "Rather, if we can convey to students that voluntarism can be enriching and fun, we'll stand a better chance of attracting more people to it."

This fall the Campus Outreach Opportunity League will coordinate a series of workshops on volunteer program management and skill development in New York, New Jersey, Connecticut, Rhode Isand and Massachusetts. Mr. Meisel and Mr. Hackett have also recently received a $60,000 grant from the Lyndhurst Foundation in Chattanooga, Tenn., to enable them to try to expand their work to more than 50 universities in the South.

Senator Durenberger, who is on the board of directors of Action, a federal volunteer agency, praises Mr. Meisel's efforts, saying, "in my 30 years of work with volunteer organizations, I have never met anyone Mr. Meisel's age with his level of commitment."

Mark Koide, 22, president of the American Association of University Students and a senior at Brown University in Providence, R.I., agrees.

The effort proves "students today are no longer part of the 'me generation,'" Mr. Koide said. "If Wayne is successful, his group could become a vanguard of a new generation of college students."

As the organization continues to grow, however, some volunteer groups express concern that the group may duplicate the efforts of existing agencies like Volunteer, a Washington clearinghouse. "In order to be successful," said Kenn Allen, president of Volunteer, "the Campus Outreach Opportunity League must be sensitive to what is already out there. They have to remember to respect the leadership and initiative of local volunteer operations, and to build upon, not replace, that base."

Mr. Meisel is optimistic, however. "As long as we can get college students to believe in what we are trying to do," he said, "then nothing can stop us."●

TOWARD A FREE MARKET IN SUGAR

Mr. CHAFEE. Mr. President, the artificially high price of sugar costs American consumers between $3 and $5 billion per year. The domestic price of raw sugar is approximately five times its world market price—that adds about $60 per year to the grocery bill of the average family of four.

Today I am pleased to join my colleagues Senator GORTON and Senator BRADLEY in cosponsoring S. 1222, a bill to lower the price support for sugar by 10 cents over the next 4 years.

The price of sugar—like that of other commodities—is supported through a system of nonrecourse loans. The current loan rates, or price support levels, were set by Congress as part of the 1981 farm bill.

Currently, the price support is 17.75 cents per pound. If participating producers cannot get that price in the marketplace, they sell it to the government instead—at 17.75 cents per pound.

This support level is significantly higher than the world market price of 3 to 4 cents. To keep the domestic price up—and thus to avoid buying sugar—the administration has imposed progressively tighter import quotas, starting with 5 million tons in 1981 and possibly going as low as 2 million tons next year.

The adverse effects of such high price supports and tight import quotas have been documented in series of recent editorials criticizing U.S. sugar policy. The burden is greatest on the American consumer, who pays more for sugar than do consumers in most parts of the world.

Producers, on the other hand, enjoy a level of subsidization unrivalled among other Federal farm programs. Whereas the Federal Government pays approximately $3,500 in benefits to each of 800,000 wheat farmers, and $9,000 in benefits to each of 300,000 milk producers, benefits under the sugar program average about $250,000 per year per producer.

High domestic sugar prices and tight import restrictions mean higher costs to U.S. manufacturers of processed foods containing sugar. Many manufacturers are finding it impossible to compete with low-priced products containing sugar purchased on the world market. Without action to remedy the situation, some may have no alternative but to move their operations overseas. This means more lost jobs.

These sugar price supports also mean a heavy burden for developing countries, notably those in Latin America and the Caribbean. These countries have borrowed extensively from American banks and depend heavily on export earnings to service their debts.

To stave off major debt defaults among these Third World countries, the United States must keep its markets open to LDC exports. Maintaining this protectionist scheme as welfare for the American sugar industry—despite the opportunities which this market presents for more competitive sugar producers abroad—is totally inconsistent with our obligation to keep markets open and to prevent damage to American lenders.

It also serves the interests of U.S. exporters to keep our market open to competitive products like sugar from LDCs. To alleviate their tremendous debt burden, these countries resort to austerity programs which promote exports and inhibit imports, causing U.S. exporters to lose traditional Latin markets. The more we restrict their exports to the United States, the more they must restrict their imports of U.S. goods, in order to conserve foreign exchange.

The debt crisis, more than anything else, is responsible for our loss of Latin markets. Why encourage the use of these barriers in Latin countries by cutting off lucrative export opportunities for them in our markets? American banks can rightfully blame this protectionist scheme and others like them for the inability of these countries to adequately service their debt.

Mr. President, the articles which follow are right on target in their criticism of our present sugar policy. I ask that they be printed in the record at this point.

The articles follow:

[From the New York Times, Aug. 25, 1985]

SUGAR'S SURE DANGER: PRICE

It's summertime and the slurping is heavy: Americans are consuming more sweeteners in everything from wine coolers to granola bars. Experts disagree on whether sugar and sugar substitutes pose a serious health risk. But there is no doubt that protecting a few thousand domestic sugar producers in the United States and Europe costs the consumer, and is bringing ruin to our friends in the third world. Common sense and common decency argue for serious reforms.

Sugar is nature's most concentrated source of carbohydrates and cane is the world's most efficient source of sugar. It needs a warm, wet climate and plenty of labor to cultivate.

Ideally, all the world's demand would be met by relatively poor, tropical countries like Brazil, Guatemala and the Philippines. The revenue generated from its export would increase demand for goods from consuming nations. Processing the raw cane would, as the British historian Sidney Mintz points out, offer much-needed training in low-tech manufacturing and business organization skills.

Unfortunately, cane can be grown—at higher cost—in Florida, Louisiana and Hawaii. And sugar can be also extracted from sugar beets or synthesized from corn, both of which can be grown in temperate climates. Once these methods gained an economic toehold in the developed world, their managers used their political muscle to limit competition from lower-cost sources.

Third-world sugar now sells for about 4 cents a pound. The United States imposes import quotas and tariffs to keep the domestic price at 22 cents a pound. That's so much of a difference that customs officials have been excluding sweetened foods ranging from jam to kosher pizza on the theory that people could profitably extract and sell the sugar.

The Common Market pays about the same price to beet farmers. They respond by producing so much sugar that Europe now exports it. The result is a triple whammy:

Consumers and taxpayers in America and Europe end up paying an extra $3 billion to $4 billion for sweeteners.

With demand for third-world sugar artificially depressed by protectionism, the free-market price has fallen to a third of the production cost for efficient Latin America growers. Brazil, desperate to unload the crop, is converting much of it into alcohol, for export as an octane booster in gasoline. Even that market may soon close, as American distillers fight to keep out the competition.

Low sugar prices mean low export earnings for sugar-producing countries. That makes it almost impossible for debtors like the Philippines to repay their loans to American and European banks. And it squeezes living standards, inviting perilous political effects.

The end of this madness is not in sight; the domestic sugar lobbies carry too much weight to be pushed off welfare. But at least there are now reforms in the wind worth rooting for. The Common Market's sugar subsidies are up for review this year in Brussels. There is hope that Europe will take steps to reduce production, if only to reduce the general pressure on the Common Market budget for agricultural subsidies.

On this side of the Atlantic, Senators Slade Gorton of Washington and Bill Bradley of New Jersey are sponsoring legislation that would trim a few cents from the domestic support price.

These are small steps. Consumers in rich countries and sugar producers in poor ones deserve much more. But as long as policies in Europe and America are tailored to protect special interests, small steps are probably the best we can expect.

[From the Wall Street Journal, Sept. 17, 1985]

U.S. SUGAR POLICY ROTS NEIGHBORING ECONOMIES

(By Georges Fauriol and Andrew D. Kopperl)

U.S. agricultural policy is fundamental to economic and political viability in the Americas. Directly and adversely affecting the Caribbean Basin region in particular is the sugar price-support program, which began with the 1981 farm bill.

As the 1985 farm bill is considered in Congress, and as President Reagan considers a change in sugar import quotas, the U.S. needs to ask whether the current sugar program is in its national interest, not only because it brings on higher consumer prices and inefficient agricultural practices, but perhaps more important, because it threatens the economies of nations that depend on sugar exports to survive.

The problem stems not so much from the existence of sugar price supports as much as it does the level of the support price, and the necessity to maintain that price through quotas. Under current law the U.S. government lends domestic growers—of which there are just over 11,000—18 cents for each pound of raw sugar cane produced. As long as the artificial domestic price is maintained at a pre-determined level above that 18 cents, the growers will sell to the market and pay off their loans. If, however, the price drops below that level, the growers may forfeit their crop to the government without obligation to pay off the loan. In its efforts to reduce deficit spending, the Reagan administration has kept foreign sugar out of the U.S. market simply to avoid a price drop and the likely result of crop forfeiture.

While this seemingly benign program protects the few U.S. growers from bankruptcy with artificially high prices (the U.S. price for raw sugar is above 20 cents while the international price is below five cents), it also denies highly leveraged countries one of their most important commodity markets.

During the 1970s, Western nations channeled credit to Third World nations to assist the development of industry, natural resources and agriculture, and to generate a sufficient level of foreign trade required to keep the entire system afloat. Latin America, not unlike most Third World nations, used this free-flowing capital to finance the expansion of basic national infrastructures. To a degree, foreign capital was concentrated on creating urban-industrial sectors in societies whose major source of foreign exchange lay in the trade of a very few commodities.

As the price of sugar, coffee, bananas, bauxite and oil skyrocketed at various times during the 1970s, repaying those foreign loans looked easy. But with the downturn in commodity prices in the early 1980s and the drying up of credits to the modernizing sectors, a squeeze was applied.

To its credit the Reagan administration has responded with a constructive policy in Central America and the Caribbean. In 1982 the administration launched the Caribbean Basin Initiative to encourage greater U.S. market access for the region's products. This was followed by the so-called Kissinger Commission agenda for economic development and political stability in the larger region.

Unfortunately, the encouragement of Caribbean Basin exports to the U.S. has been derailed by the U.S. sugar-quota system. When sugar ia added to the products that do not fall within the duty-free provision of the CBI (textiles, petroleum products, tuna and leather), the Caribbean Basin export capability is back to a level that brought on the CBI. The loss of income for the Caribbean Basin countries on sugar alone is estimated to reach at least $250 million in 1985. When considering, for example, that the Dominican Republic has earned as much as 40% of its foreign exchange from sugar, any reduction in exports can have a drastic impact on that nations' economic stability—and its roughly $3 billion debt.

Moreover, as U.S. sugar imports have declined from five million short tons in 1981 to an expected quota well below one million short tons for 1986, those producers have had to find other large consumers, the most worrisome being the Soviet Union. As a precentage of total regional sugar exports, excluding Cuba, the Soviet's share increased from 10% in 1981 to more than 25% in 1983 while the U.S. share has dropped during the same period from 52% to 30%. Thus, fundamentally, inattention to this sugar-export issue undercuts the intended purposes of U.S. economic and political diplomacy in the region.

It may strike the casual observer as exaggerating the case to suggest that sugar is a key aspect of our problems in the Americas. Clearly, there are broader issues at stake here, but it takes little insight into the developing world to see that economic development and diversification cannot occur unless the indigenous product base is strengthened first—or at minimum not allowed to die before a suitable alternative economic base is found. For if a nation cannot develop a constant source of foreign exchange, it will not be able to finance its foreign debt and strengthen the value of its currency. The foreign debt becomes perpetually larger while foreign investment into the nation is discouraged. And whatever direct foreign aid the nation receives goes to servicing the debt instead of developing new economic ventures.

With the loss of capital, the inability to service foreign debt, and the inevitable result of increasing inflationary pressures, the developing nation is even more prone to grass-roots social instabilities that question the worth and propriety of democratic institutions. Then as the Western world looks onto the quagmire it may have unintentionally produced, the political problems will become of a character requiring drastic—perhaps military—solution.

In the past 12 months, rioting in Jamaica and the Dominican Republic, gas lines in Guatemala, and migration of populations to the U.S. are indicative of the political implications of destabilized economies. If a root to the Central America-Caribbean problem is commodities trading, is it not simpler to encourage freer trade than to commit to an endless spiral of aid and intervention?

[From the Washington Post, Sept. 17, 1985]

COULD LIFE BE SO SWEET

The sugar price support system is one of the least defensible items in the federal

candy store, a program in which several billion dollars a year are plucked by fist from a large group of losers—U.S. consumers—for a small group of domestic producers. The mechanism has foreign policy implications as well; its net effect has probably been to squeeze the economies of Third World producing countries, including some in Latin America and the Caribbean Basin though vital to U.S. interests. The program was put in place four years ago, over administration objections, by power of a kind that has characterized sugar politics in Congress for 50 years. There is now an opportunity to roll the program back, as part of the pending farm bill. We hope it will succeed.

The sugar support system was set up in the farm bill of 1981, which is now expiring. The lore was that the administration dropped its opposition in return for the votes of sugar-state congressmen for its budget bill that year. "I went with the best deal," Rep. John Breaux of Louisiana, one of 29 Democrats to side with the administration on a key vote, was quoted as saying at the time. No, he went on to explain in one of the better moments of the 97th Congress, that did not mean his vote was for sale, but "it can be rented."

The program works like those for other supported commodities, through loan rates—guaranteed amounts for which producers can park their products with the government if market prices are too low. This loan rate for domestic sugar is now about 18 cents a pound. The world price is about a nickel. U.S. users could thus be expected to buy on the world market, and leave the government to buy up domestic production. To keep the government from having to do that, there is a second part to the program; the government has the power to set import quotas. Only enough foreign sugar is supposed to be let in to fill U.S. needs, after all U.S. sugar has already been bought.

Most years the program has worked out exactly that way. The legislated price has all been passed on to consumers, and sugar has not shown up as a budget item. This year for the first time the government will buy some—over 400,000 tons at a cost of around $200 million; domestic production plus allowed imports exceeded demand. Next year it may have to buy some more: apparently in response to pleas from hurting Caribbean Basin countries, quotas were not cut as they should have been to hold the government harmless.

The House and Senate farm bills would preserve this loan-and-quota system. Their one concession would be to freeze the loan rate at next year's expected 18 cents; it would then erode with inflation. Critics are at work on amendments that would take the rate down a penny a year instead. That is the least Congress should do. There are about 3,000 sugar cane farms in this country (mostly in Florida, Louisiana and Hawaii) and 6,000 sugar beet producers (mostly in California and the Midwest). The corn industry also benefits from the system; corn sweeteners now have half the U.S. market, and the higher the price of sugar, the higher the price of sweetners can also be. Spokesmen for these beneficiaries make impressive arguments in behalf of their protected market. One is a trade argument; that sugar is entitled to at least as much protection as shoes and textiles, both objects of sympathy just now in Congress. On this we agree with the sugar people. We don't think the shoe and textile industries should be protected, either. If something doesn't cost much, why not leave it be?

[From the Chicago Tribune, Aug. 30, 1985]

DANGEROUS SUGAR QUOTAS

Ten Central American and Caribbean nations have joined forces to press the United States to ease its harsh quotas on imported sugar and help save them from desperate economic troubles. With protectionist sentiment running so high, the request is not expected to have a warm welcome in Congress, but these sugar countries have logic, fairness and common sense on their side, not to speak of American consumers and sugar refiners and the best interests of American national security.

Because of the quotas, American consumers are now paying an artificially high price of 21.75 cents a pound for sugar, mainly to keep a mere 1,500 Louisiana sugar growers in profitable business. Many shoppers are turning to corn syrup-based sweeteners, with a number of U.S. sugar refiners going bankrupt as a result. This is occurring at a time when world sugar prices are at a rock bottom low of just 2.5 cents a pound!

Many of the countries in this group depend on sugar as their only export and are now facing economic catastrophe and political upheaval. Theirs is a region where the American government is expending considerable effort and money to resist communist revolution and maintain political stability. The administration is supposedly trying to help them with a Caribbean Basin economic assistance plan. Yet the sugar quotas are undermining everything.

A decision is expected by Sept. 15, the deadline for setting the 1985-86 sugar quota levels. If the administration is to adhere to its free trade principles, the quota ought to be eliminated entirely, though that can only come as part of the expected congressional struggle this fall over the next farm bill. The cost to the consumer and America's strategic interests is too high a price to pay for this kind of needless government dole.●

E.B. WHITE

● Mr. DURENBERGER. Mr. President, as you know, the esteemed American author E.B. White died yesterday at the age of 86. I can claim no personal or even geographical connection with Mr. White. His life and outlook were tied primarily to the East, and mine to the Midwest. I wish I could say I met him, but I never did.

I knew E.B. White only as millions of others do, through his brilliant, peculiarly American prose. He had a way of describing the most mundane event or the most common object in a singularly eloquent style, at once folksy and incisive.

Many of our children grew up with Charlotte's Web—and many of us grew somehow younger reading it ourselves. The New Yorker, Harper's and other publications were strengthened by his contributions. The Elements of Style, his "small wonder" on usage of the English language, has guided writers for a quarter of a century. His essays are among the most evocative and entertaining in American literature. In fact, it seems fitting that Mr. White lived his last days at his much-loved farm in Maine, the setting for so many of those essays.

Mr. President, rather than memorializing E.B. White with a potentially massive biographical sketch—which the author himself would no doubt find tedious—I prefer to let his prose speak for itself. I ask that Mr. White's brief 1957 essay, "A Report in Spring," be printed in the RECORD.

The essay follows:

A REPORT IN SPRING

NEW YORK, May 10, 1957.—I bought a puppy last week in the outskirts of Boston and drove him to Maine in a rented Ford that looked like a sculpin. There had been talk in our family of getting a "sensible" dog this time, and my wife and I had gone over the list of sensible dogs, and had even ventured once or twice into the company of sensible dogs. A friend had a litter of Labradors, and there were other opportunities. But after a period of uncertainty and waste motion my wife suddenly exclaimed one evening, "Oh, let's just get a dachshund!" She had had a glass of wine, and I could see that the truth was coming out. Her tone was one of exasperation laced with affection. So I engaged a black male without further ado.

For the long ordeal of owning another dachshund we prepared ourselves by putting up for a night at the Boston Ritz in a room overlooking the Public Garden, where from our window we could gaze, perhaps for the last time, on a world of order and peace. I say "for the last time" because it occurred to me early in the proceedings that this was our first adoption case in which there was a strong likelihood that the dog would survive the man. It had always been the other way round. The garden had never seemed so beautiful. We were both up early the next morning for a final look at the fresh, untroubled scene; then we checked out hastily, sped to the kennel, and claimed our prize, who is the grandson of an animal named Direct Stretch of the Walls. He turned out to be a good traveler, and except for an interruption caused by my wife's falling out of the car in Gardiner, the journey went very well. At present, I am a sojourner in the city again, but here in the green warmth of a city backyard I see only the countenance of spring in the country. No matter what changes take place in the world, or in me, nothing ever seems to disturb the face of spring.

The smelts are running in the brooks. We had a mess for Monday lunch, brought to us by our son, who was fishing at two in the morning. At this season, a smelt brook is the nightclub of the town, and when the tide is a late one, smelting is for the young, who like small hours and late society.

No rain has fallen in several weeks. The gardens are dry, the road to the shore is dusty. The ditches, which in May are usually swollen to bursting, are no more than a summer trickle. Trout fishermen are not allowed on the streams; pond fishing from a boat is still permissible. The landscape is lovely to behold, but the hot, dry wind carries the smell of trouble. The other day we saw the smoke of a fire over in the direction of the mountain.

Mice have eaten the crowns of the Canterbury bells, my whitefaced steer has warts on his neck (I'm told it's a virus, like everything else these days), and the dwarf pear has bark trouble. My puppy has no bark trouble. He arises at three, for tennis. The puppy's health, in fact, is exceptionally good. When my wife and I took him from the kennel, a week ago today, his mother

kissed all three of us good-bye, and the lady who ran the establishment presented me with complete feeding instructions, which included a mineral supplement called Pervinal and some vitamin drops called Vi-syneral. But I knew that as soon as the puppy reached home and got his sea legs he would switch to the supplement *du jour*—a flake of well-rotted cow manure from my boot, a dead crocus bulb from the lawn, a shingle from the kindling box, a bloody feather from the execution block behind the barn. Time has borne me out; the puppy was not long in discovering the delicious supplements of the farm, and he now knows where very vitamin hides, under its stone, under its loose board. I even introduced him to the toni smell of coon.

On Tuesday, in broad daylight, the coon arrived, heavy with young, to take possession of the hole in the tree, but she found another coon in possession, and there was a grim fight high in the branches. The new tenant won, or so it appeared to me, and our old coon came down the tree in defeat and hustled off into the woods to examine her wounds and make other plans for her confinement. I was sorry for her, as I am for any who are evicted from their haunts by the younger and stronger—always a sad occasion for man or beast.

The stalks of rhubarb show red, the asparagus has broken through. Peas and potatoes are in, but it is not much use putting seeds in the ground the way things are. The bittern spent a day at the pond, creeping slowly around the shores like a little round-shouldered peddler. A setting of goose eggs has arrived by parcel post from Vermont, my goose having been taken by the fox last fall. I carried the package into the barn and sat down to unpack the eggs. They came out of the box in perfect condition, each one wrapped in a page torn from the New England Homestead. Clustered around me on the floor, they looked as though I had been hard at it. There is no one to sit on them but me, and I had to return to New York, so I ordered a trio of Muscovies from a man in New Hampshire, in the hope of persuading a Muscovy duck to give me a Toulouse gosling. (The theme of my life is complexity-through-joy.) In reply to my order, the duck-farm man wrote saying there would be a slight delay in the shipment of Muscovies, as he was "in the midst of a forest-fire scare." I did not know from this whether he was too scared to drive to the post office with a duck or too worried to fit a duck into a crate.

By day the goldfinches dip in yellow flight, by night the frogs sing the song that never goes out of favor. We opened the lower sash of the window in the barn loft, and the swallows are already building, but mud for their nests is not so easy to come by as in most springtimes. One afternoon, I found my wife kneeling at the edge of her pernnial border on the north side, trying to disengage Achillea-the-Pearl from Coral Bell. "If I could afford it," she said bitterly, "I would take every damn bit of Achillea out of this border." She is a woman in comfortable circumstances, arrived at through her own hard labor, and this sudden burst of poverty, and her inability to indulge herself in a horticultural purge, startled me. I was so moved by her plight and her unhappiness that I went to the barn and returned with an edger, and we spent a fine, peaceable hour in the pretty twilight, rapping Achillea over the knuckles and saving Coral Bell.

One never knows what images one is going to hold in memory, returning to the city after a brief orgy in the country. I find this morning that what I most vividly and longingly recall is the sight of my grandson and his little sunburnt sister returning to their kitchen door from an excursion, with trophies of the meadow clutched in their hands—she with a couple of violets, and smiling, he serious and holding dandelions, strangling them in a responsible grip. Children hold spring so tightly in their brown fists—just as grownups, who are less sure of it, hold it in their hearts.●

ORDERS FOR THURSDAY

RECESS UNTIL 10:30 A.M. TOMORROW

Mr. DOLE. Mr. President, I ask unanimous consent that when the Senate completes its business today, it stand in recess until 10:30 a.m. on Thursday, October 3, 1985.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECOGNITION OF CERTAIN SENATORS

Mr. DOLE. Mr. President, I ask unanimous consent that on tomorrow, following the recognition of the two leaders under the standing order, there be special orders in favor of the following Senators for not to exceed 15 minutes each: Senators CHAFEE, MURKOWSKI, COHEN, SIMPSON, ARMSTRONG, GOLDWATER, NUNN, and PROXMIRE.

The PRESIDING OFFICER. Without objection, it is so ordered.

ROUTINE MORNING BUSINESS

Mr. DOLE. Mr. President, following the special orders just identified, I ask unanimous consent that on tomorrow there be a period for the transaction of routine morning business, not to extend beyond 12 noon, with statements therein limited to 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. DOLE. Mr. President, following the transaction of routine morning business on tomorrow, it will be the intention of the majority leader to proceed to the consideration of House Joint Resolution 372, the debt limit extention. If we can proceed to that at 12 noon until approximately 3 p.m., I advise my colleagues that it is quite likely that rollcall votes could occur during that period.

Mr. President, I ask unanimous consent that at 12 noon tomorrow, the Senate proceed to the consideration of House Joint Resolution 372, the debt limit extension.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECESS UNTIL 10:30 A.M.

Mr. DOLE. Mr. President, there being no further business to come before the Senate, I move that the Senate stand in recess until 10:30 a.m. tomorrow.

The motion was agreed to; and, at 8:46 p.m., the Senate recessed until Thursday, October 3, 1985, at 10:30 a.m.

NOMINATIONS

Executive nominations received by the Senate October 2, 1985:

DEPARTMENT OF STATE

Richard Schifter, of Maryland, to be Assistant Secretary of State for Human Rights and Humanitarian Affairs, vice Elliott Abrams, resigned.

THE JUDICIARY

Edward R. Korman, of New York, to be U.S. district judge for the eastern district of New York vice a new position created by Public Law 98-353, approved July 10, 1984.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

C. Everett Koop, of Pennsylvania, to be Surgeon General of the Public Health Service for a term of 4 years. (Reappointment.)

IN THE NAVY

Robert A. Fabrini, Naval Reserve Officers Training Corps candidate, to be appointed permanent ensign in the line or staff corps of the U.S. Navy, pursuant to title 10, United States Code, section 531.

The following-named Navy Enlisted Commissioning Program candidates to be appointed permanent ensign in the line or staff corps of the U.S. Navy, pursuant to title 10, United States Code, section 531:

Benoit, Thomas H.
Berry, Steven C.
Bethel, Jane P.
Brock, Arthur E.
Descampo, Anje
Frame, Charles E.
Garland, Michael A.
Graham, Douglas W.
Harkelroad, Joseph
Hill, Rodney A.
Hoffman, Jo E.
Holm, Keith
Keys, Richard T.
Kipps, Mark R.
Klotz, Michael D.
Koch, Robert W.
Leatherman, Brian C.
Lescault, F. Randall
Malsburg, John H.
Mangrum, Gerald G.
McGaffrey, Mark B.
McGibbon, Henry M.
Merz, Paul V.
Mickeline, Mark W.
Morgan, Edric O.
Morris, Debra A.
Perry, Douglas L.
Plum, Gregory L.
Reiser, Bernell A.
Sanford, William E.
Weber, Carl A.
Whiston, Richard A.
White, George D.
Williams, James A.

The following-named Naval Reserve officers to be appointed permanent ensign in the line or staff corps of the U.S. Navy, pursuant to title 10, United States Code, section 531:

Couch, Kevin J.
Ferris, Thomas M.
Seines, James P.
Wilson, John S.

William A. Crowell, Navy enlisted candidate, to be appointed permanent chief warrant officer, W-2, in the U.S. Navy, pursu-

ant to title 10 United States Code, section 555.

Earl S. Stewart, ex-Naval Reserve officer, to be appointed permanent commander in the Medical Corps of the U.S. Naval Reserve, pursuant to title 10, United States Code, section 593.

The following-named U.S. Navy officers to be appointed permanent commander in the Medical Corps of the U.S. Naval Reserve, pursuant to title 10, United States Code, section 593:

DeTriquet, John M.
Roberts, John C.
Ware, Lewis L.

HOUSE OF REPRESENTATIVES—*Wednesday, October 2, 1985*

The House met at 11 a.m.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

Protect Your people, O God, from all the adversaries that seek to destroy Your good gifts of life and freedom. We pray for those who have known the violence of terrorists or have been held hostage away from family and friend. May they experience Your comforting love and spirit in spite of their isolation and may we keep them ever in our prayers. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed a joint resolution of the following title, in which concurrence of the House is requested:

S.J. Res. 158. Joint resolution designating February 1986 as "National Community College Month."

JOINT CHIEFS OF STAFF REORGANIZATION ACT OF 1985

(Mr. SKELTON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SKELTON. Mr. Speaker, Monday, I described the provision of the Joint Chiefs of Staff Reorganization Act of 1985 that makes the Chairman of the JCS the principal military adviser to the President, the Secretary of Defense, and the National Security Council.

Today, I want to talk about the provision of the bill that establishes the new position of Deputy Chairman of the JCS. At the present time, the Secretary of Defense, each of the three service Secretaries, and each of the four service chiefs has a deputy, someone who can assist him in his duties and carry on when he is not in Washington. The Chairman is the only key individual in the Pentagon not having a deputy. Mr. Speaker, even a platoon leader has an assistant, known as a platoon sergeant.

Our intent in putting in this feature was to give the Chairman the help he needs in managing the JCS organization. He needs an alter ego, an individual who will understand the issues as they come to his desk. The arrangement that has been in effect over the past 3 years, having one of the service chiefs on call for 3 months at a time to fill in for the Chairman when he is not in Washington, is a workable solution, but it is not the best one. These four men already have two full-time jobs—running their respective services and participating in JCS deliberations—and to add a third job is simply asking one man to do too much.

The Deputy Chairman would be the second ranking officer in the Armed Forces and also be the director of the joint staff, those staff officers from the four services who assist the joint chiefs in the performance of their duties. He would also be selected from a service other than that of the Chairman.

INSURANCE FOR THE TRANSPORTATION INDUSTRY

(Mr. SHUSTER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SHUSTER. Mr. Speaker, I rise to alert my colleagues to a serious problem confronting our Nation's transportation industries, one which I fear is going to become even more serious in the months ahead.

In recent months, insurance companies have canceled insurance policies, refused to renew them, or demanded huge increases, often on the order of several hundred percent. One reputable bus company with an excellent safety record had to pay a whopping 800-percent premium increase to renew its insurance.

Unfortunately, this is typical of what is happening in transportation, not only in the bus industry, but also in truck, rail, and transit. Our Surface Transportation Subcommittee of the Public Works Committee will hold hearings to investigate how this could happen in a supposedly competitive insurance industry, and search for ways to alleviate this problem.

Without reasonably priced insurance, our Nation's transportation system may cease to operate efficiently.

EMERGENCY ECONOMIC SITUATION IN IOWA

(Mr. BEDELL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BEDELL. Mr. Speaker, yesterday, the Governor of the State of Iowa declared a state of economic emergency existing in Iowa because of the agricultural situation. This is the first time this has been done since the Great Depression in my State of Iowa.

This afternoon, most likely, we are going to have a chance to vote on a provision that is now in the committee print of the farm bill, and the question we are going to face is whether we are going to say, as the committee does, that we ought to give farmers a chance to vote on something that would give them better income than they will otherwise have, or whether we are going to say they do not have that choice, and we, in Congress, are going to mandate that they have to take a cut in income in a program that is similar to what we have already had.

I hope, in view of the problem we have, that this House will show some compassion, show some concern for those who are in serious trouble. I hope this House will stay with what is in the committee bill and say that we do want to give farmers some hope in this time of very great difficulty. It may be worse in Iowa than in some other States, but let me tell my colleagues that other States are going to follow if Iowa collapses. According to the Governor, there are 40 percent of the Iowa farmers who face financial difficulty at this time. I do not think that we want to see that problem made even worse.

IN OPPOSITION TO THE REPEAL OR SUBSTANTIAL REDUCTION OF THE CURRENT DEDUCTION FOR STATE AND LOCAL TAXES

(Mr. SEIBERLING asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SEIBERLING. Mr. Speaker, the Ways and Means Committee is now in the process of marking up a tax reform bill. One of the key provisions of concern to individual income taxpayers is President Reagan's proposal to eliminate the current deduction for State and local taxes.

Repeal of this deduction would have a serious impact on individual taxpayers, and on State and local governments. The deduction for State and local taxes is the oldest in the Federal system, dating back to 1913. The idea behind the deduction is quite clear: to prevent the Federal Government from engaging in the double taxation of

income already paid out as taxes to State and local governments.

The State and local tax deduction has been characterized as one which benefits the wealthy the most. This is simply not true. Over 50 percent of households taking the deduction have incomes of less than $30,000, and 87 percent have incomes of less than $50,000. In fact, more taxpayers—33 million in 1982—claim the State and local deductions than any other deduction, including the deduction for home mortgage interest.

Repeal of the deduction would impose a harsh penalty on States in the Northeast-Midwest region of the country. Residents of our area constitute 44 percent of the Nation's population, but would pay nearly 60 percent of the cost of eliminating deductibility. In Ohio, the average taxpayer claims $725 for the deduction each year.

The decline in Federal funding of social services under the Reagan administration has forced States and localities to pick up a bigger share of the load of caring for those who need help. These governments rely on the Federal deduction to help their taxpayers afford the cost of the services. If the deduction is repealed or substantially curtailed, you can bet there is going to be enormous pressure on States and localities to provide relief from this double taxation by cutting tax rates themselves. So the repeal of the State and local deduction would put the squeeze on States and localities when they can least afford it.

□ 1110

BAD TIMING FOR HOUSE CONCURRENT RESOLUTION 3

(Mr. COURTER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. COURTER. Mr. Speaker, tomorrow, Thursday, the House of Representatives is poised to debate House Concurrent Resolution 3. This resolution calls for the President to submit to the Senate for ratification the threshold Test Ban Treaty and the Peaceful Nuclear Explosions Treaty, and as well urges the President of the United States to enter into negotiations on a comprehensive test ban treaty.

Needless to say, these issues are important. They deserve full airing in this body now as they have been debated before.

My problem is the timing of this resolution. The President of the United States is to be meeting Mr. Gorbachev in Geneva in November. The Soviet Union put on the table their most serious proposal with regard to reductions in offensive weapons.

I fail to see why the House of Representatives this week should enter into a long and devisive debate on the arms control policy of this administration. The timing is wrong, Mr. Speaker. It simply does not make sense.

REMOVAL OF NAME OF MEMBER AS COSPONSOR OF HOUSE JOINT RESOLUTION 90

Mr. ATKINS. Mr. Speaker, I ask unanimous consent that the name of the gentleman from Virginia [Mr. WHITEHURST] be removed from the list of cosponsors of House Joint Resolution 90, of which I am the chief sponsor.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

DEDUCTIBILITY OF STATE AND LOCAL TAXES

(Mr. HENRY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HENRY. Mr. Speaker, for several months, since the Treasury Department's first formal proposal last November, we have been debating the question of whether taxes paid to the State and local governments will continue to be deductible under the Federal income tax system. Both the original Treasury Department proposal and the subsequent tax plan submitted to the Congress in May would completely eliminate the current deduction. The Ways and Means Committee now has before it staff options which propose a compromise which would eliminate the current deductibility of State and local sales taxes and personal property taxes, and would allow State and local income and real property taxes to be deducted up to the greater of $1,000—for a joint return—or 5 percent of adjusted gross income.

While the proposed compromise is certainly a recognition of the importance of deductibility for income used to pay State and local taxes, it does not go far enough. I remain concerned about what such taxation of State and local taxes would mean, both to the ability of State and local governments to operate and finance programs, and on taxpayers, particularly homeowners, who pay these taxes in States like mine. Fundamentally, the elimination or the large-scale curtailing of this deduction runs directly counter to our traditional federal system of government—it amounts to the Federal Government discouraging State and local governments from collecting revenues in the way they choose—particularly for States like mine, which are not able to raise revenue through exportable taxes like energy taxes. I support a strong Federal system—State and local governments can and frequently do try programs and initiatives which the Federal cannot do or cannot do as effectively. Indeed, a good deal of the change and activity in our country over the past few years—in areas from education to resource recovery to health care—has taken place at the State and local levels. Taking away the deductibility of State and local taxes, in essence, taxing people twice, would severely discourage States like mine from undertaking these initiatives. The benefits would be short term; the result would be the Government again being called upon to assume the responsibilities in these areas.

MARGARET HECKLER AS NEW AMBASSADOR TO IRELAND

(Mr. BIAGGI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BIAGGI. Mr. Speaker, when President Reagan named Margaret Heckler as his Secretary for the Department of Health and Human Services, I commended him. Yesterday, he named Margaret Mary O'Shaughnessy Heckler as our new Ambassador to Ireland. I commend him again.

Secretary Heckler did an outstanding job, under occasionally trying circumstances. Her imprint and contribution were clear on landmark laws to increase child support payments, expand tax credits for day care, and bolster research to combat the dual scourges of Alzheimer's disease and AID's. She was an effective watchdog over his agency's programs and on many occasions her sense of compassion triumphed over others whose passion was simply to cut.

Margaret Heckler will make a good Ambassador to Ireland. She assumes this position at a most pivotal time. In the coming months a new round of Anglo-Irish talks are scheduled to discuss the future of Northern Ireland. The United States has a direct stake in the outcome of these discussions especially with regard to providing future economic assistance once a solution is reached. Margaret Heckler with her varied background as a Member of Congress and a Cabinet secretary adds prestige to the ambassadorship. She will also be aware and sensitive to the deep and growing interest in America about the Irish question. I look forward to working with Margaret and wish her every success in this new and most challenging endeavor.

THE 565TH DAY OF LEBANON HOSTAGE CRISIS

(Mr. O'BRIEN asked and was given permisison to address the House for 1 minute and to revise and extend his remarks.)

Mr. O'BRIEN. Mr. Speaker, today is the 565th day U.S. citizens have been held hostage in Lebanon. Think of it. That's more than 1½ years.

William Buckley was kidnaped on the streets of Beirut, March 16, 1984, 565 days ago today.

Father Lawrence Jenco has been held hostage in Lebanon for 268 days.

Two hundred days ago today, Terry Anderson, the Associated Press bureau chief in Beirut, was taken hostage.

Today marks the 127th day of captivity for David Jacobsen, director of the American University hospital in Beirut.

Thomas Sutherland, dean of the American University agriculture school, was taken hostage 114 days ago.

Today also marks the 302d day since the kidnaping of Peter Kilburn, the American University librarian.

Mr. Speaker, the American hostage crisis in Lebanon continues. It won't be over until all six remaining Americans are back home safe and sound. In all the turbulence surrounding their captivity let us pray they are not disheartened. Let us pray for them as they hope and pray for freedom. They are not criminals, like the prisoners in Kuwait. They are the salt of the Earth.

FREE TRADE ZONE WITH CANADA

(Mr. LUNDINE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LUNDINE. Mr. Speaker, last Friday, Canadian Prime Minister Mulroney told President Reagan that he was interested in negotiating a free trade zone with the United States and asked whether Congress would be receptive. Yes, I for one say we are very interested, Mr. Prime Minister.

President Reagan must secure authority from Congress to proceed with these negotiations. Instead of lecturing the Congress about protectionism, President Reagan should immediately request negotiating authority from the Congress to establish a Canadian free trade zone.

Canada is our largest trading partner. Total trade with Canada last year reached $113 billion. About 22 percent of United States exports go to Canada.

The United States values its trade relationship with Canada. We are in search of expanding trade for our mutual benefit. There may be a few exceptions to the negotiation of a free-trade agreement which may require some extended form of managed trade. The issue of transshipment of European and other goods also must be addressed. These notwithstanding, the United States should move forward aggressively to begin these negotiations in earnest to complete a free trade agreement with Canada.

TAX REFORM

(Mr. BOEHLERT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BOEHLERT. Mr. Speaker, I am joining with my colleagues today to take a firm stand against any proposal to reduce or eliminate the deductibility of State and local taxes.

This is a matter of principle; there can be no compromise.

There simply is no convincing case to be made for changing this deduction, which is as old as the Tax Code itself.

Tax reform is supposed to make the Tax Code simpler. Can anyone honestly argue that the State and local tax deduction is confusing, contorted or baffling? I wish the same question could be asked rhetorically about the arguments used against the deduction.

Tax reform is supposed to make the Tax Code fairer. Is it fair to impose double taxation? Is it fair to tamper with a deduction that limits the tax burden on the middle class? Is it fair to make it more difficult for local school districts across the country to raise the money they need to educate our children? Is it fair to ask States to shoulder more responsibility while making them less able to afford those responsibilities?

The answer is "no," and I hope that answer resounds through this Chamber. This is not an issue of concern to a particular State or region; we are all threatened by this proposal.

In its summary of Treasury II, the administration listed State and local taxes under the heading "Preferred Uses of Income." That viewpoint, I assume, is limited to the administration. This deduction is not subsidizing some crazy whim.

The real reason for the proposal to eliminate the deduction was political expedience. It was a quick way to raise revenue.

We must tell the administration and our colleagues that the quick way is not always the soundest way.

The power to tax truly is the power to destroy. This proposal is destructive of our Federal system and of the middle class. It must not prevail.

TAX REFORM

(Mr. RICHARDSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RICHARDSON. Mr. Speaker, the Ways and Means Committee will soon present us with a tax reform proposal. Recently there have been reports that the voters: First, are not interested in tax reform; second, that they prefer that we deal with deficit reduction and trade; third, that the issues in this legislation are too politically hot; and fourth, that they offend too many people and constituencies.

Mr. Speaker, I disagree with these reports. There is a tremendous ground swell for tax reform in this country, and we should not retreat from this commitment to reform our tax laws.

In this connection, both the President's plan and the Ways and Means draft outline are steps in the right direction, although more improvements can and will be made in both pieces of legislation.

Mr. Speaker, let us not retreat from tax reform this calendar year. Maybe it is politically hot, and there are a lot of painful things that have to be done. But it is the right thing to do.

GORBACHEV INTERVIEW ON FRENCH TV

(Mr. RITTER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RITTER. Mr. Speaker, yesterday, Party Secretary Gorbachev was interviewed by journalists on French TV, and some of the clips turned up on Ted Koppel's "Nightline." You did not read about it in the morning papers; it was not there.

But there were some crucial exchanges with Gorbachev. When he was questioned about problems with Soviet Jewry, Mr. Gorbachev responded that Jews had it better in the Soviet Union than anywhere else in the world, and this in spite of the fact that 100,000 Jews would like to leave the Soviet Union and only 1,000 got out last year.

In addition, Mr. Gorbachev, when asked about political prisoners, and this was really a telling insight, when asked about political prisoners, Mr. Gorbachev stated that there really were not any. And he proceeded to berate the French journalist who asked the question for some 1 minute plus. He said, and I paraphrase here, "How could somebody like you, with your education, with your background, with your experience, even bring up such nonsense?" Yes, he actually berated a French journalist for asking a question about political prisoners.

There is a real elegant packaging of Gorbachev in our media these days. I think our journalists should insist on a little "truth in packaging."

RELEASE TARGETED ASSISTANCE FUNDS

(Mr. SMITH of Florida asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SMITH of Florida. Mr. Speaker, a U.S. district court has directed the administration to stop an illegal impoundment of $11.5 million in targeted assistance funds and to release this money. I urge OMB to comply with the law and to give this money to the States and localities that await it.

The people of Florida and other States bear a disproportionate share of the refugee adjustment burden. These funds—including the $3 million due to Florida—are really a repayment for State and local money being spent on a national problem.

Congress approved this money to help the States. GAO indicated that the impoundment was illegal. Now, the court has directed the administration to release the money.

OMB either may continue to flout the law, or else meet its obligation to repay the States that are carrying the greatest share of the resettlement program.

How it acts will determine what the administration really thinks about the taxpayers of the impacted States.

GORBACHEV'S PROPAGANDA CAMPAIGN

(Mr. MICHEL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MICHEL. Mr. Speaker, Soviet leader Gorbachev has begun another phase of his current propaganda campaign.

His well-crafted television address to the French people spoke of historic ties between Russia and France.

He did not mention that when France was invaded by the Nazis in 1940, Mr. Gorbachev's Communist Party was an ally of the Nazis. It was Soviet oil that fueled the panzer attacks that defeated France.

Mr. Gorbachev's Communist Party of the Soviet Union—the de facto government of the U.S.S.R.—is the sole remaining former ally of the Nazis still holding power.

Mr. Gorbachev appears to have forgotten this.

Gorbachev wants to go to the summit with the Western alliance split and with political discord within the United States.

The question is: Are we going to fall for one of the greatest propaganda blitzkriegs since the days of Dr. Goebels?

I hope not. It would be fatal if we lost the battle of the summit before we ever got to the summit.

□ 1125

STOP LOSS OF OCS DRILLING REVENUES TO THE TREASURY

(Mr. SHARP asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SHARP. Mr. Speaker, I want to alert Members of the House to one provision in the reconciliation bill that is going to make it much harder for us in the future to cut Federal deficits.

Mr. Speaker, money that rightfully belongs in the Federal Treasury is about to be given to a few coastal States unless the House votes to block this action. The measure in question gives away revenues from the Outer Continental Shelf drilling for gas and oil on what are clearly Federal lands.

This giveaway is occurring in defiance of Federal court rulings, in defiance of the intent of Congress in the 1978 OCS Lands Act, in defiance of the chairman and ranking Republican of the Committee on Interior which have jurisdiction on this issue, in defiance of the Reagan administration.

Help us block this OCS giveaway of billions of Federal dollars; help us to cut the Federal deficit in the future; urge the Rules Committee to allow us to vote on this critical issue.

HYPOCRISY ON TRADE

(Mr. PORTER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PORTER. Mr. Speaker, there are many tragic consequences of this Congress' failure to make real progress on the deficit this year. Simply wishing the deficit away, as we have done with a budget resolution that uses numerical sleight-of-hand, will not make it so.

One tragic consequence of our repeated huge budget deficits is the destruction of U.S. international competitiveness and the dismantling of America's manufacturing base. Mr. Speaker, the Federal budget deficit, which keeps real interest rates high and requires capital financing from abroad, contributes greatly to our overvalued dollar. Imports become cheap and exports expensive, and the American worker—in agriculture, textiles, machine tools, and a host of other occupations—pays the price.

The trade deficit is a byproduct of the Federal budget deficit and no amount of rhetoric will change that fact.

But rather than take the bull by the horns, Mr. Speaker, we now hear the war cry of protectionism—tariffs and quotas to save American jobs. Mr. Speaker, there are trade practices of other countries which are abhorrent and must be stopped. But let's not be hypocrites. Congress' failure in the war on budget deficits is the real culprit. We have met the enemy and he is us.

GLENBROOK MIDDLE SCHOOL, LONGMEADOW, MA, HONORED AS ONE OF THE NATION'S BEST

(Mr. BOLAND asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BOLAND. Mr. Speaker, on numerous occasions in recent years, we have heard lengthy discourses from this well on the ills which beset our educational system. All is not perfect in American education, but there is much that is good and much that deserves praise. Today, I want to call the attention of the House to examples of excellence in the secondary schools of the United States.

Yesterday, at the White House, President Reagan formally recognized 281 public and private schools selected by Education Secretary Bennett as winners of outstanding secondary school awards. Each of the outstanding schools was rated on the basis of 14 criteria including incentives for students, teacher leadership, and administrative support; and seven indicators of success, including student performance on standardized tests, faculty achievement, and quality of school programs. I think the Members of this House would agree that the schools scoring highest in these rating areas can truly serve as models for American education.

Mr. Speaker, one of the schools honored by the President yesterday was the Glenbrook Middle School of Longmeadow, MA, one of the communities I am privileged to represent in the House. Opened in 1968, Glenbrook serves 318 students in grades, 6, 7, and 8. For 17 years, Glenbrook has provided excellence in education to the young people of Longmeadow. I am delighted that its curriculum, faculty, students, and administrators have now received national recognition. Five members of the staff—Principal Robert Mumford; guidance counselor Joanne Gendron; and teachers Neil McMahon, Andrea Campbell, and Thoma Miller represented Glenbrook at the White House ceremony. I want to welcome them to Washington and congratulate them, and those at Glenbrook they represent, for the honor they have received.

Herbert Wells wrote that "human history becomes more and more a race between education and catastrophe." Our educational institutions, and those that work in them, are the factors which will determine whether we win or lose that race. I want to commend President Reagan and Secretary Bennett for recognizing and promoting the qualities exemplified in schools like Glenbrook, that make the American system of education unique and successful.

NEED FOR A BALANCED BUDGET AMENDMENT

(Mr. LAGOMARSINO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LAGOMARSINO. Mr. Speaker, the Federal Government's budget deficit is getting to be like the weather: Everybody talks about it, but nobody does much about it. If we are really serious about bringing the Federal budget under control, then we need to consider alternate ways to restrain spending. One proven method already used in 36 States, including my own State of California, is the balanced budget requirement. Deficits have been the simple result of congressional spending which has doubled from 1960 to 1970, and tripled from 1970 to 1980. Since the balanced budget amendment would bring fiscal responsibility through the limitation of Federal spending and taxes, it would foster economic growth and establish congressional accountability. With more money available to private markets, interest rates would tend to go down. Lower long-term interest rates would lead to greater investment, higher employment, and increased trade. Seventy-five percent of the American people favor a balanced budget amendment. Thirty-two States have already called for a national constitutional convention on this issue with a vote on the amendment expected in Michigan this month. Huge Federal budget deficits are the most crucial economic problem facing this country. I strongly urge my colleagues to support the balanced budget/tax limitation amendment.

AN OFFICE OF INSPECTOR GENERAL FOR THE TENNESSEE VALLEY AUTHORITY

(Mrs. LLOYD asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. LLOYD. Mr. Speaker, I am pleased to be a cosponsor of legislation to provide for an Office of Inspector General for the Tennessee Valley Authority.

The Tennessee Valley Authority brought innumerable benefits to the residents of the Tennessee Valley in more than 50 years. I applaud their efforts in raising the standard of living for the area and its commitment to economic development.

However, as do all things, the times have changed and the corporate makeup of TVA no longer reflects the spirit of American government. TVA has long been an autonomous entity which offers no avenue of recourse for its customers nor its employees. The attitude of TVA's management has evolved into a single-mindedness that no longer carefully guards the people of the valley.

TVA's credibility has suffered immense damage during its recent nuclear woes, and the relationship between management and employees has deteriorated to the point where the workers won't even talk to their own managers. If they could allow this to happen within their own organization, how can the public have confidence that they are guarding public interests.

This bill, which I cosponsor with Congressman FLIPPO, has my full support. I believe this legislation can help TVA in the long run by offering the citizens of the valley an overseer. I believe this will help TVA rebuild public confidence.

For too long, TVA has been allowed to adjust its rates without any participation from any other agency, without any oversight, and without any public participation. A private utility must go through a public service commission in order to raise rates. I don't think the public is well served if the Federal utility is not required to follow a similar procedure. Checks and balances are the core of our government. Without these elements, public trust would not exist. Even privately owned businesses have checks and balances through its owners and stockholders.

The need for an Inspector General was made clear when 2 weeks ago, TVA Chairman Chili Dean said he was not concerned about the debt ratio of TVA as long as he controlled the rates. This is not a healthy business attitude for the ratepayers of the Tennessee Valley.

I support TVA's efforts to turn its operations around, but let's face it, they got where they are by their own means. Perhaps, if there had been an inspector general 10 years ago, we would not be looking at the shutdown of five nuclearplants today.

Only public good can come from the independent review of the corporation's policies, its actions to implement policies in matters concerning direction of the corporation, changes in the electric rate structure and periodic rate adjustments, and personnel policies and their implementation.

The citizens of the valley and the employees of the agency have no effective avenues for addressing legitimate complaints against TVA. Additionally, the utility's effectiveness in the valley is lessened considerably by the loss of confidence of the citizens and employees. Support from both these groups is necessary for the future well-being of TVA.

As stated in the bill, an Office of Inspector General for the Tennessee Valley Authority will provide the board, the employees, and the people of the service area with an independent and objective review and appraisal of the agency.

ISRAEL'S RETALIATION AGAINST THE PLO

(Mr. BURTON of Indiana asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BURTON of Indiana. Mr. Speaker, yesterday Israel retaliated against the Palestinian Liberation Organization [PLO] for the cold-blooded murder of three Israeli civilians on Judaism's holiest day, Yom Kippur. The Israelis leveled PLO headquarters in Tunisia, including the building housing the PLO's Force 17, which Israel blamed for the terrorist attack.

Israel's Yitshak Rabin said:

> This action was intended to demonstrate that there is no immunity for any element of the PLO anywhere.

Mr. Speaker, this should be a message that the Free world sends to every terrorist: That there will be no sanctuary for you anywhere because those who love freedom will seek you out and mete out severe retribution wherever you hide. Those who give sanctuary must be willing to accept this retribution, right along with the terrorist that perpetrated the attrocity.

The allegations that the Israeli retaliation is contrary to international law or the "peace process" are completely ridiculous. The world must support those who respond to terrorism, not defend the rights of nations who harbor terrorists.

□ 1135

ANOTHER U.S. COMPANY BITES THE DUST

(Mrs. BENTLEY asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. BENTLEY. Mr. Speaker, yesterday the business press carried the announcement that Houdaille Industries, one of the top 10 machine tool companies in the country is closing its operations. This follows an 8.3-percent decline in orders for the industry in August and a July drop of 35.9 percent just from 1984 orders! In one year the industry has suffered that kind of loss.

In 1982, Houdaille sought relief from imports through a Government petition to the White House. They were turned down by the President after a favorable finding for Houdaille.

The National Machine Tool Builders' Association filed a 232 petition in 1983 seeking relief from import penetration based on national security. The Commerce Department found in favor of the industry. However, the White House still has the petition 20 months after it was answered by Commerce. And the machine tool industry is left hanging and turning in the wind.

What is happening to our country? Laws, in place, intended to protect the security of our country are being ignored.

Our defense, which must have an industrial capability to sustain itself, has been stretched to Southeast Asia. We are in a frightening situation.

AMERICAN PEOPLE ANSWER MEXICO'S CALL FOR HUMANITARIAN AID

(Mr. TORRES asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. TORRES. Mr. Speaker, last week I stood here in the well of the House and asked my colleagues to join with me and the American people to answer the call of humanitarian aid for the victims of Mexico's tragic earthquake.

The American people have answered most generously. This weekend I participated in a telethon beamed around the world through the auspices of the Spanish International Network, SIN. The response was overwhelming. Americans from every walk of life, from every Spanish-speaking community of this country, and from every community around the world contributed.

Credit for the genius of this worldwide endevour must go to: Danny Villanueva, general manager of KMEX-TV in Los Angeles; Rene Anselmo, president of SIN in New York; and the countless artists, singers, and entertainers who helped to raise the almost $5.29 million.

The telethon host and hostess, Ricardo Montalban and Vikki Carr, did an outstanding job. They were joined by Morgan Fairchild and Sammy Davis, Jr.

Mr. Speaker, to my congressional colleagues and staff members who contributed, I owe a vote of thanks. I especially want to thank the California delegation which responded with generous contributions for the people of Mexico.

LET US STAND UP FOR REGIONAL FAIRNESS ON THE TAX REFORM ISSUE

(Mr. EDGAR asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. EDGAR. Mr. Speaker, this morning the Democratic Caucus met to discuss tax reform. As a member of the executive council of the Northeast-Midwest Congressional Coalition. I have strongly opposed eliminating the State and local tax deduction. In my view, the President's proposal is unwise, unfair, and economically unsound.

Last week the Ways and Means Committee was presented with options to structure debate on tax reform. I commend Chairman ROSTENKOWSKI for many of his revisions, and for rejecting tax cuts that favor the wealthy at the expense of middle-income families. Yet while the options constitute an improvement, the compromise being contemplated on State and local tax deductibility remains unworkable.

States in the Northeast and Midwest will still bear the brunt of this proposal. The income of taxpayers will still be taxed twice. The principle of federalism is still compromised. Middle-income homeowners, families who send their children to public schools, and all Americans who depend on vital State and local services remain the losers under this scheme.

My constituents back in Pennsylvania have been quite clear on this issue. Getting rid of unfair shelters, closing abusive loopholes, and making sure everyone pays a fair share is their idea of tax reform. They want to cut the unfairness, but keep what works well.

And for most Americans, for middle-income working families, the State and local tax deduction is the one tax break that works for them—it is the section of the Tax Code that belongs to the people, not some special interest or multimillionaire.

Mr. Speaker, let's not muddy the waters and doom tax reform by compromising on this issue. Let's stand up for regional fairness, for the principles upon which our Government rests, for the bulk of the Americans we are elected to represent. Let's retain State and local tax deductibility in its full and present form.

STATE AND LOCAL TAX DEDUCTIONS

(Mr. WORTLEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WORTLEY. Mr. Speaker, long ago, a political television advertisement showed a large map of America, then a hacksaw severing New York from the map. Next, New York was adrift, floating out to sea.

The announcer said something to the effect that if New York were to fall into the ocean, the Nation as a whole would benefit.

New Yorkers were offended. So were citizens of other States.

Twenty years later, some still want to cast New York adrift. This time, New York would not be alone. New York would have lots of company, States like Pennsylvania, Massachusetts, Wisconsin, New Jersey, and Michigan.

I'm talking about the tax bill provision that would do away with deductions for State and local taxes. Some view these deductions, taken by 99 percent of American taxpayers who itemize, as a plague to be eradicated.

Nobody likes big taxes. Yet, State and local governments develop tax systems that fit their needs. States with commitments to quality education and good health services should not be penalized because they didn't have the foresight to locate borders on top of oil and gas deposits.

We are all part of America.

Pitting high tax States against low tax States mocks the principles of federalism.

Some advocate a compromise. They would institute an elaborate formula and cap the dollar amount allowed if State and local taxes exceed 5 percent of adjusted gross income. That idea is gross, all right.

Sometimes, the status quo isn't so bad. Compared to what is proposed, the status quo is outstanding. If we are serious about tax reform, let's come up with a plan that deals in real reform, not just for some, but for all taxpayers.

REFUGEE AID DISPUTE

(Mr. EDWARDS of California asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. EDWARDS of California. Mr. Speaker, those of us from the 21 States with large refugee populations are delighted by the action of the U.S. District Court for Northern California directing the Reagan administration to release forthwith $11.5 million in refugee targeted assistance funds.

These funds are used to provide refugee employment and employment-related services in heavily impacted areas. This money is absolutely essential if we are to enable refugees to achieve self-sufficiency. Our investment now in job training for refugees will be repaid many times over by the contributions that employable and self-sufficient refugees will be able to make to the communities in which they live.

I regret that we were forced to take the extreme measure of suing the administration to compel their release of the funds. I hope now that they will move speedily to comply with the court's order so that this money, so desperately needed, can be put to good use.

PORTER AMENDMENT DELAYS ENFORCEMENT DATE OF SUPREME COURT'S GARCIA DECISION

(Mr. FAWELL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FAWELL. Mr. Speaker, in a short while, we will consider H.R.

3424, appropriations for the Departments of Labor, Health and Human Services, and Education. I urge my colleagues to defeat a motion that the committee arise. After that, Members would then be able to vote in support of the Porter amendment. The Porter amendment delays for 1 month the enforcement date of the Supreme Court's Garcia decision.

As you know, Mr. Speaker, the Department of Labor's October 15 enforcement date is just around the corner. The Education and Labor Committee, however, has only completed one in a series of hearings on the Garcia decision. The next hearing, in fact, is conveniently scheduled for October 15.

It appears to my distinguished colleague from Illinois and me that this is the right opportunity to save the Department of Labor from having to expend what may turn out to be unnecessary manpower and resources for enforcing the Garcia decision after October 15. More importantly, this amendment provides State and local governments temporary relief from complying with Garcia until Congress decides what it exactly wants to do.

Because it is quite evident that this body will not approve corrective legislation by October 15, it makes little sense to enforce a court decision whose impact is still being investigated by the Education and Labor Committee. Assuming that some type of corrective legislation is passed by Congress, it will require State and local governments tc adjust course and meet new policy requirements for a second time. It is this type of meddling and indecision on the part of Congress which merely reinforces the notion that the Washington bureaucracy is alive and well.

With the Porter amendment, we now have the opportunity to at least temporarily spare State and local governments from the onerous financial and bureaucratic nightmare of Garcia. Let's not punish local governments because Congress failed to adequately address the Garcia issue by October 15. If we do not postpone the enforcement date, we will effectively punish municipal governments financially and with redtape bureaucracy.

The main concern of towns and cities is that the Fair Labor Standards Act does not permit the use of compensatory time off in lieu of overtime at time and one-half. The International City Management Association estimates that compliance with the FLSA overtime provisions alone will cost local governments nationwide approximately $1.5 billion.

Until the Education and Labor Committee has had the opportunity to investigate these matters, let's not impose upon State and local governments a Supreme Court decision which we know little of what its impact will be. For these reasons, I urge my colleagues to defeat the motion to arise, and to then support the Porter amendment.

CONGRESSIONAL FOREIGN TRAVEL ACCOUNTABILITY ACT

(Mr. WISE asked and was given permission to address the House for 1 minute.)

Mr. WISE. Mr. Speaker, after every recess questions always are raised about congressional travel. Was it necessary? How much did it cost? Was it worth it? Much of the travel is meritorious, Mr. Speaker, but there should not be even the appearance of a question about it. That is why I have introduced the Congressional Foreign Travel Accountability Act. Mr. Speaker, if a State or Federal employee or someone traveling in the private sector makes a trip, they do two basic things; they get approval of the trip, and they file an expense account.

My legislation would simply require the same from Members of Congress, that money for travel be appropriated and that committees file quarterly reports of all trips, who went on them, the purpose of the trip, all expenses incurred, and a statement of what was accomplished.

The information of course would be public.

Mr. Speaker, I do not feel this creates any hardship since I do not know any other organization that gets to travel on the "fly-now/explain-later" plan.

Cosponsoring this bill would show that Congress is serious about travel being for fact-finding and cutting down on public fault-finding.

Mr. Speaker, I urge cosponsorship of this important act.

REFUGEE TARGETED ASSISTANCE APPROPRIATIONS

(Mr. LEHMAN of California asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LEHMAN of California. Mr. Speaker, I want to bring to the attention of this House an important dispute between Congress and OMB over funds directed to counties heavily impacted by refugees.

OMB has refused to release $11.5 of a total of $89 million Congress appropriated for refugee targeted assistance in fiscal 1985. This action was in direct violation of a binding decision of the Comptroller General which ordered the release of the full $89 million. As a result, the Comptroller notified the Congress of an illegal impoundment of funds in the nature of a recission, only the second such notice during the entire Reagan administration.

Yet, OMB persisted, and six Members of this House joined a lawsuit filed in California to order the release of the funds. On Monday, a Federal judge ordered OMB to release the aid. Yet, today OMB still is withholding the funds.

Mr. Speaker, this case demonstrates that the arrogance of the President's budget office has exceeded even that we came to expect from the Nixon administration. This pattern of behavior by OMB is becoming all too common. OMB has thwarted the legislative intent of Congress. OMB has thwarted the legal authority of a binding decision from the Comptroller. And, OMB has failed to abide by a Federal court order. Without the trust that the administration will faithfully execute the laws that Congress makes, our system of government is jeopardized.

□ 1150

THE AMERICAN PEOPLE DESERVE BETTER GOVERNMENT

(Mr. HARTNETT was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HARTNETT. Mr. Speaker, appearing on the front page of the Washington Times this morning is an article about an employee of the U.S. Information Agency. Upon his return from Uruguay, he devised a unique method of travel. He flew to New Orleans, and then he and his family boarded the *Mississippi Queen* for a 16-day, $17,000 cruise up the Mississippi River to Burlington, IA. This money was paid by the USIA as travel expense.

When asked to repay this money, the gentleman said not only was he not going to repay it, but he was going to take it up with the grievance committee. The committee ruled not only was he correct in choosing that mode of travel, but the U.S. Information Agency owed him $1,770 more in spending money that they had not given him for per diem allowance.

Mr. Speaker, when a government cannot fire such an employee who has such a callous disregard for his agency, for his government, for the taxpayers' dollars, when they cannot fire him but they turn around and promoted him, it is a sad state of affairs. But I guess he probably saw the example of some of us here in Congress who take military aircraft and take junkets all over the world at large expense to the taxpayers.

The American people deserve better government than we have given them, Mr. Speaker, and I think Congress should decide we are going to give them the better government they deserve.

STATE AND LOCAL TAX DEDUCTIBILITY

(Mr. WEISS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WEISS. Mr. Speaker, ever since the Federal income tax was first enacted in 1913, taxes paid to State and local governments have not been considered income. The reasoning then, as it should be now, was that to put a tax on a tax represented an unfair form of double taxation. Nevertheless, the President has proposed eliminating the deductibility of State and local taxes. This double taxation will harm individual taxpayers, burden States and localities around the Nation, and seriously undermine our Federal system of government.

State and local governments would be under enormous pressure to reduce taxes and to cut services. Interstate tax competition, already at an unhealthy level, would increase. Care of the Nation's poor, a national responsibility, will fall even more heavily on the Nation's cities.

I urge the Ways and Means Committee not to report a tax bill that calls for either full or partial repeal of the deductibility of State and local taxes. Double taxation, even if only on some taxes and not others, would unfairly burden America's middle class. We need tax reform, but not at the expense of fairness or the integrity of our Federal system.

TAX DEDUCTIONS FOR STATE AND LOCAL TAXES

(Mr. CARPER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CARPER. Mr. Speaker, I rise today to address an issue which critically affects the State of Delaware, as it does many of the States represented in this Chamber today. The deductibility of State and local taxes is of great concern to Delawareans as 55 percent of Delaware's taxpayers itemize their deductions. In 1982, Delaware's taxpayers realized a total savings from this deduction of $97 million.

Recently, my office conducted a survey of Delawareans to determine their views on the critical issue embodied in tax reform. By far their strongest opposition was expressed to the administration's proposal to repeal State and local tax deductions. Even as a means of reducing overall Federal rates, 75 percent of those individuals who responded to the survey do not favor the elimination of this deduction. This is consistent with the overall message I hear from my constituents that tax fairness, not tax simplification, is their primary goal for tax reform.

It is my sincere concern that any tax reform approved by this Congress embody the principles of tax fairness, and maintain the principle of the deductibility of State and local taxes.

HUMAN RIGHTS VIOLATIONS IN THE SOVIET UNION

(Mr. LEVIN of Michigan asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LEVIN of Michigan. Mr. Speaker, I heard last night the Gorbachev interview on French television. I heard him react with disbelief when asked about political prisoners in the U.S.S.R., and I heard him claim that Soviet Jewry had a position, he claimed, of privilege, not persecution.

In both cases Mr. Gorbachev was dissembling, tragically distorting the truth about human rights violations in the Soviet Union.

Our reaction should be to criticize not the Western media for airing Mr. Gorbachev's views but should be to criticize Mr. Gorbachev. We should point out that while Mr. Gorbachev can appear on United States and French television, Mr. Mitterrand and President Reagan cannot appear on Russian television.

Our leaders should react by raising issues of human rights violations at the summit, strongly and visibly.

We need an arms control agreement. We equally need to press vigilantly the issue of human rights everywhere.

OMB IMPOUNDMENT OF $11.5 MILLION IN REFUGEE TARGETED ASSISTANCE ILLEGAL

(Mr. VENTO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. VENTO. Mr. Speaker, last week the Comptroller General informed Congress that the Office of Management and Budget [OMB] acted illegally when it impounded $11.5 million in refugee targeted assistance funds. On September 30, thanks to the efforts of our colleagues, Mr. EDWARDS and Mr. LEHMAN, the U.S. district court for northern California issued a temporary restraining order prohibiting OMB from withholding these funds. Without this court order, these funds would have reverted to the Treasury at the end of fiscal year 1985.

Ramsey County, MN, has one of the largest populations of Southeast Asian refugees of any county in the United States. Over 26,000 refugees, mostly from Southeast Asia, live in Minnesota. The vast majority of these refugees live in Ramsey and Hennepin Counties. These two Minnesota counties would have lost over $300,000 in targeted assistance if OMB's action were allowed to stand.

OMB has acted illegally. The GAO has said so and so has a Federal court. The committee report for H.R. 3424, the Labor-HHS appropriations bill which the House is considering today, contains specific language which should remove whatever doubt OMB may have had regarding Congress' intent that these funds could be carried over from 1 fiscal year to another. I commend the committee and urge this House to approve the same. I hope that the administration will not appeal the court's decision but will instead promptly comply with the letter and the spirit of the court's ruling.

REMOVAL OF NAME OF MEMBER AS COSPONSOR OF H.R. 1523

Mr. RAHALL. Mr. Speaker, I ask unanimous consent that my name be removed as a cosponsor of H.R. 1523.

The SPEAKER pro tempore (Mr. ATKINS). Is there objection to the request of the gentleman from West Virginia?

There was no objection.

DISMISSING THE ELECTION CONTEST AGAINST RICHARD HOWARD STALLINGS

Mr. BATES. Mr. Speaker, by direction of the Committee on House Administration, I call up a privileged resolution (H. Res. 272) dismissing the election contest against RICHARD HOWARD STALLINGS, and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 272

Resolved, That the election contest of George Vernon Hansen, contestant, against Richard Howard Stallings, contestee, relating to the office of Representative from the Second Congressional District of Idaho, is dismissed.

The SPEAKER pro tempore. The gentleman from California [Mr. BATES] is recognized for 1 hour.

Mr. BATES. Mr. Speaker, I yield 30 minutes, for the purpose of debate only, to the gentleman from Kansas [Mr. ROBERTS], and pending that, I yield myself such time as I may consume.

Mr. Speaker, House Resolution 272 is a resolution to dismiss the election contest regarding the seat of the Representative from the Second Congressional District of Idaho.

Under the U.S. Constitution, title 2 of the United States Code, and the Rules of the House of Representatives, the Committee on House Administration is charged with the responsibility of hearing contested election cases, and recommending disposition of such cases to the House

Pursuant to the rules of the Committee on House Administration, Chairman FRANK ANNUNZIO estab-

lished a task force to examine the documentary record, and to receive oral arguments from contestant and contestee. I chaired the task force. Serving with me were Mr. SWIFT and Mr. ROBERTS.

SUMMARY OF PROCEEDINGS

After presentation of oral arguments, and examination of the record, the task force determined that the contestant did not meet his burden of presenting sufficient documentary and other evidence to warrant further proceedings. The task force then recommended dismissal of the contest to the Committee on House Administration. On July 24, the Committee on House Administration, by a vote of 12 ayes and 1 nay, directed me to bring to the floor this resolution dismissing the election contest of George Hansen against RICHARD STALLINGS.

Although contestant Hansen raised a number of issues regarding the administration of the election, which the State of Idaho has addressed for future elections, the committee concluded that the issues raised were not adequately supported by documentary or other materials as required by House precedent, and were in any case insufficient to overturn the outcome of the election. The election night canvass of the ballots, and a subsequent partial recount at contestant Hansen's request, gave STALLINGS an initial winning margin of 133 votes, which was increased to 170 votes after the recount.

SUMMARY OF PRIMARY GROUNDS

There were two primary grounds upon which the contest was based. First, Hansen claimed that a number of illegal votes were cast for Mr. STALLINGS which, if removed, would change the outcome of the election. The essence of this claim is that these allegedly illegal votes were cast by voters who were not properly registered.

The second ground for the contest was that the results of a partial recount, which was conducted at contestant Hansen's request, required the House of Representatives to conduct a full recount. Constestant Hansen also raised during oral argument, various ancillary claims of irregularity, which I will address later, even though they were not a part of contestant's original notice of contest. For example, after filing the notice of contest, contestant Hansen suggested that the canvass of votes by the State on election night was not conducted in accordance with Idaho law, and that an impoundment order, protecting the balloting materials, was not properly issued by the secretary of state.

The committee reviewed these and other agruments put forth by contestant, but found that the various issues raised were not, individually or collectively, sufficient to change the result of the election, and were not supported by an evidenciary showing.

Consequently the task force, and the committee recommend that the House adopt the resolution dismissing the election contest.

ILLEGAL VOTES

Mr. Hansen's first claim was that a number of illegal votes were cast for Mr. STALLINGS, which, if invalidated, would change the outcome of the election. The task force found that the claim was without foundation.

Contestant Hansen claimed that approximately 2,500 voters were illegally registered. Contestant based his claim on an interpretation of an Idaho statute which specifies the information to be gathered by State registrars in registering voters. In Idaho, the State election official completes a voter registration form based upon information provided to the election official by the prospective voter. Based on that information, and any additional information provided by the prospective voter, the election official then makes a determination as to whether or not the applicant is qualified to register and to vote.

In some instances, State election officials registered voters whose addresses were listed as post office boxes, or were incomplete or missing. Contestant Hansen argued that since these registration forms, filled out by State election officials, lacked some or all of the elements of a conventional address; for example, street numbers and street names, that these citizens should be declared ineligible to vote.

Election officials from urban and suburban areas can, by and large, specifically locate eligible voters by street name and street address. However citizens living in remote or rural areas seldom live on a block or in a subdivision, and may live where there are no streets, or where rural access roads are unpaved, unnamed and unnumbered. These voters may receive their mail through a post box, or by rural free delivery. The lack of a street address is not a basis for depriving an otherwise eligible citizen of the State of Idaho his or her opportunity and right to vote.

In this instance, contestant Hansen's complaint relates largely to the rural areas of Blaine County, where many people live in areas remote from any town. The election officials registering these voters made determinations about their eligibility, even in the absence of a street name or number. In making that determination, that the applicants were residents and citizens qualified to vote in the election, the election officials satisfied themselves as to the fact. But notwithstanding the determinations made by the State election officials, contestant Hansen complained that these 2,500 voters should be disenfranchised, and their votes thrown out.

Contestant Hansen did not challenge these voters on election day as Idaho law provides. Rather he raised this complaint only after the election result was announced. He sought investigations by the county prosecutor, the State attorney general, the Justice Department and the FBI. He also asked the State court to rule that the results of the election were invalid, because of the registration practices complained about.

The State attorney general's office, and the Blaine County magistrate conducted independent investigations. At the conclusion of the investigations, public reports were issued. The results were that not a single voter was found to have been unqualified to vote. These investigations fully supported the declared result of the election.

Based on the results of these investigations, the task force found that contestant's claim of a right to the seat, due to registration irregularities, was without merit.

RESULTS OF PARTIAL RECOUNT

Contestant Hansen's second ground for contesting the election was based upon a partial recount. Contestant availed himself of an Idaho statute which allows a disappointed candidate to obtain a full or partial recount. The disappointed candidate posts a $100 bond for each precinct he chooses to have recounted. Obviously he has multiple incentives to pick those precincts which he believes will best support his position or claim. If the results of the candidate-initiated recount demonstrate to the State officials that a full recount is justified, then the State takes over and conducts a districtwide recount at State expense, and refunds to the disappointed candidate the entire bond posted in support of the partial recount.

In this instance, contestant Hansen picked 45 precincts, posted the necessary bond, and a partial recount was conducted. As a result, contestant lost ground to contestee STALLINGS by an additional 37 votes. Although this unfavorable trend did not support contestant Hansen's position that he was entitled to the seat, at the conclusion of the recount of the 45 precincts, contestant Hansen petitioned the State attorney general for a full State-paid recount, citing the results of the partial recount. The State attorney general concluded that a full State-paid recount was not justified by the results, and rejected Hansen's request for a full State-paid recount, whereupon contestant Hansen appealed the decision of the attorney general to the Idaho Supreme Court. The Idaho Supreme Court reviewed the arguments of contestant Hansen and the Idaho Attorney General, and rejected contestant Hansen's argument that the results of the partial recount justified a full recount at State expense. After a review of the written and oral arguments presented by contestant

Hansen, both the task force and the Committee on House Administration came to the same conclusion. Contestant Hansen's second claim was determined to be without merit, and the committee, like the Idaho Attorney General and the Idaho Supreme Court, rejected it.

CONCLUSION REGARDING PRIMARY GROUNDS

Hence, contestant's two principal claims, raised in his notice of contest, were determined to be inadequate to change the result of the election, or to justify a full recount by the State of Idaho or the House of Representatives.

ANCILLARY GROUNDS

During the course of oral arguments, contestant raised some additional issues which he suggested might serve as a basis for throwing out the results of the election. For example, contestant Hansen suggested that an impoundment order, issued after the election night canvass, was not proper or in accordance with State law, and that the proceedings prevented local election officials from performing their duties in verifying the election totals. Contestant made this claim unsuccessfully in the State court. However, he did not make this claim in his notice of contest. He raised it only after his claim of illegal voting had been investigated and found to be without merit. Contestant's claim identifies no errors, nor did contestant identify the types of errors he believed may have occurred. He merely alleges irregularity, and speculates as to the impact. Under House precedent, bare allegations of irregularity do not overcome the presumption that State election officials have acted in accordance with law, nor do such allegations serve as a basis for imputing errors. Contestant was unable to convince the courts of Idaho that the election night canvass was in any sense defective, and the task force and the committee found contestant Hansen's arguments similarly unpersuasive.

Contestant raised various other matters which were not contained in the notice of contest. But the task force and the committee found that, both individually and collectively, these claims were not sufficient nor specific enough to put into serious question the propriety or accuracy of the canvass. This committee found no reason to believe that there was anything illegal or improper in the conduct of the canvass, and that these ancillary claims do not provide a basis for changing the result of the election.

DISMISSAL RECOMMENDATION

For the reasons given and upon recommendation of the task force, the Committee on House Administration, by a vote of 12 ayes and 1 nay, recommended to the House that the election contest be dismissed.

□ 1205

Mr. ROBERTS. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, we are here today to perform a most solemn responsibility—judging the qualifications, returns and election of one of our colleagues. The questions presented by this case are not easy ones—especially in light of the precedent set in this House earlier this year and in light of recent events.

The task force to determine the outcome of this election was made up of myself, Mr. BATES and Mr. SWIFT. While I do not agree with the conclusion of the task force, I do wish to thank both gentlemen for their demeanor during the proceedings.

As I stated, the questions presented by this case are not easy ones and I would like to call to the attention of my colleagues the four basic issues that we feel are both primary and pertinent to this case.

First, there is the canvassing issue. The impoundment order issued by the Secretary of State of Idaho resulted in the ballots being impounded but it also resulted in an inconsistent and defective canvass of the votes. The board of canvassers in the largest county in Idaho, Bonneville County, was unable to verify the accuracy of the count. They have so certified by means of an affidavit filed with the notice of contest. In addition to having no access to the ballots, the county commissioners in 14 of the 26 counties in the congressional district had a best limited access, and in many cases, no access to the precinct poll books and tally books when they conducted their canvass of the vote.

Now, under Idaho law, the impoundment of the ballot boxes is authorized only upon a request for a recount. And, such a request may only be made after the completion of the canvass by the county commissioners. There was no complete canvass. There was no recount. The Secretary of State's impoundment order was premature. It interfered with the ordinary and necessary access to all election materials.

Second, there was a recount of 10 percent of the precincts. Yes, Mr. Hansen lost ground. That recount demonstrated a rate of error in the total count of more than 3½ times the margin of victory. Mr. Hansen was denied a State-sponsored recount of the remaining 90 percent of the precincts. And, I want to stress that now, after the election and the partial recount and the impoundment of ballots, Idaho's law has been changed. After the fact, State law now provides for automatic State-conducted recounts in races as close as this race.

Third, the address of the voters issue. Idaho law requires that in order to be a qualified voter, an individual must include in his or her voter registration application information which definitely locates his or her residence. But, in Blaine County, some 5,400 voters failed to provide this information and approximately 1,000 voters listed only their post office boxes.

More to the point, this requirement was inconsistently applied throughout the election district—13 counties accepted post office box registrations to identify residences and the remaining 13 did not.

Fourth, we do have an important precedent in this case and all election disputes from this date forward.

Mr. Speaker, as I said during that debate earlier this year for me and for my Republican colleagues, this House is not the same. The collective sense of unfairness symbolized by the McIntyre precedent remains in our hearts. There is in fact, a pall hanging over contested election deliberations by the House.

You, in the majority changed the precedents we must follow by your actions in McIntyre. As majority leader, Mr. WRIGHT, stated on the floor of this House on January 3, 1985, the results of an election are called into question when "the very ability of the State election procedures to determine the outcome accurately is put into serious question."

The majority in the McIntyre election dispute decided to ignore State law and adopt House mandated rules. But, in this case you have decided to rely on State law and the doctrine of the exhaustion of State remedies.

This is an inconsistent application of House precedents and underscores the abuses served on this House and the American people when you seated Mr. MCCLOSKEY. Inconsistent application of Indiana law from county to county was alleged to be intolerable in McIntyre-McCloskey while in Hansen-Stallings it is merely viewed as the vagaries of the State system and is considered a virtue. I suggest the record will clearly show you cannot have it both ways. Mr. Hansen desires a recount to determine if the inconsistent application of Idaho law denied him the election. On a similar basis Mr. MCCLOSKEY was granted such a recount.

It appears as if the majority in this House once again is willing to yield to State law, to continue the high threshold of proof heretofore used in election disputes prior to the McIntyre case. It appears as if like Halley's Comet, the McIntyre precedent was no precedent at all. It has apparently gone. I can assure my colleagues it has not been forgotten. Under the precedent set by the majority in McIntyre, Mr. Hansen should be granted a recount.

□ 1215

Mr. Speaker, I reserve the balance of my time.

Mr. BATES. Mr. Speaker, I yield such time as he may require to the gentleman from Washington [Mr. SWIFT].

Mr. SWIFT. Mr. Speaker, the issue is whether this contest should be dismissed. I believe it should, and for the same reason this House has regularly recommended dismissing contests, including most recently the Guam contest. Under our precedents a contestant has a substantial burden. A contestant must allege with specificity irregularities that, if proven, would likely change the result of the election. This is the standard the House has consistently applied. To my mind, the contestant, Mr. Hansen, did not satisfy this test.

A contest is subject to dismissal at any time if the contestant's claims are not sufficiently specific to put into serious question the outcome of the election.

Are contestant's claims sufficiently specific in light of the evidence presented to meet this test? In my opinion they are not. Contestant's primary claim is that substantial illegal voting marred and likely changed the result of the election. Allegedly, nonresidents were allowed to vote. After a full investigation of these charges, Idaho's attorney general found them meritless. Not a single instance in which an unqualified person was permitted to vote was discovered. The attorney general's findings stand unrefuted by contestant. Consequently, I find no merit in contestant's claim of illegal voting.

Do the results of the partial State recount justify, as contestant claims that they do, a full House recount? Again, under our precedents, I believe not. The State recount revealed no material difference in the count. Although the recount was conducted only in those precincts where the contestant felt a mistake favorable to him was most likely, the recount only increased Mr. STALLINGS' margin. Again Mr. Hansen does not dispute the result of the State recount. Nor does he identify specific problems in the count or the recount. His claim rests on no more than mere speculation. If contestant had evidence of significant irregularity, he was obliged to produce it. Without such evidence his claim is to be dismissed.

Lastly, contestant claims that the canvass of votes was not conducted in accordance with State law. Mr. Hansen made this claim unsuccessfully in State court. This claim was not made in Mr. Hansen's notice of contest. I suspect it is only now being raised because all the other claims have proven to be unsupportable. There is no reason to believe that there was anything illegal or improper in the manner that the votes were canvassed.

For these reasons I would recommend that the contest be dismissed.

Mr. ROBERTS. Mr. Speaker, I yield 10 minutes to my distinguished colleague and friend, the gentleman from California [Mr. THOMAS].

Mr. THOMAS of California. Mr. Speaker, on election day in November of 1984, there was a very close election, but there was a winner and the State certified that winner. Oh, there was a State official involved in some questionable procedure. It was challenged by county officials. There were election materials that were handled differently in different counties. State election law was not followed precisely in some counties in that congressional district.

Are we back home again in Indiana? No; we are in Idaho's Second District.

But the similarities between those two contests does not end there. This House decided to send to the House Administration Committee and a task force dominated 2 to 1 by Democrats the question of how to resolve those elections.

And so, were there hearings in Idaho's Second District, as there were in Indiana's Eighth District? No. Were there witnesses brought forth to examine the information of individuals who participated in the election, as was done in Indiana? No.

In fact, the motion filed by the Democrat to dismiss under the laws by which he certainly has that privilege was not even filed in a timely fashion. How was that handled? By a 2-to-1 vote.

I recall in the debate on Indiana's Eighth, a number of Democrats pointing out that there was a bill in the Indiana Legislature. It had been introduced, and the contents of that bill that had been introduced has some change suggested in Indiana law which was supportive of the Democrats' position, and on this floor they touted how significant the fact was that the Indiana Legislature was considering a possible change in Indiana State law. It was evidence for them of a clear direction, not just of the voters but of the State government of Indiana. What happened to the bill? It did not even get out of one House.

In Idaho a bill was introduced, passed by the legislature, and signed by the Governor. It is now the law of the State of Idaho, repudiating the action that was taken by State election officials. It is the law of the State of Idaho based upon what occurred in this contest.

Did this task force consider what occurred in Idaho? No.

In Indiana the people elected a candidate in the Eighth Congressional District. His name was Rick McIntyre. The State of Indiana certified him as the winner, once during the election and a second time after the recount. He came to this floor on January 3, like any other Member-elect. He held a valid certificate from the State of Indiana. Was that good enough for the Democratic majority in this House? No.

Did we get to an investigation of Indiana's Eighth Congressional District based upon a motion filed by the loser, FRANK MCCLOSKEY? No. That contest, that motion that was filed has not been handled by the House Administration Committee. Perhaps it is for the reason that the gentleman from Washington gave as to why he believes we should now support the task force and the committee's position, and that the motion is without merit. But that did not stop the majority of Democrats in this House. They sent it to the committee, and as a matter of fact, by a series of 2-to-1 votes, the choice of the people of Indiana was overturned, the Indiana State election laws were trashed, and by a majority of Democrats on the floor of the House FRANK MCCLOSKEY was selected as the Representative from the Eighth District of Indiana.

Now, in Idaho's Second District, we may have an individual who was elected by the people. He was certified by the State. But Idaho's election law was not followed in terms of a canvassing of those votes to determine in fact if the initial count was an accurate count. Idaho State law requires that. It was not done. The presumption is that Mr. STALLINGS holds a valid State certificate.

But did the task force look behind the certificate, as they did in Indiana? Did they examine the irregularities of Idaho law as they did in Indiana? No. By a series of 2-to-1 votes, they dismissed all of the discrepancies and the inaccuracies and the inadvertent errors in Idaho's Second District.

Now, Mr. and Mrs. America may be a little bit confused by what has gone on over a span of 6 months. Why in the world would we spend the time in Indiana to go behind the State certificate and attempt to overturn and in fact, by a straight Democratic vote on the floor of the House, overturn that certificate when in Idaho we will not even hold one hearing to question any violation of State law in Idaho? Well Mr. and Mrs. America, let me clarify it for you. In Indiana the holder of the State certificate was a Republican; in Idaho the holder of the State certificate is a Democrat.

So, Mr. and Mrs. America, if the wind shifts westward and you notice a bit of a putrid smell on the wind, let me tell you what that is. That is the House of Representatives writing chapter 2 in their book of political arrogance.

I would ask the Members of this House to simply not participate any longer in these kinds of charades unless and until the Committee on House Administration and this House decide that election contests are at

least equal to ethics questions against the Members and we treat election contests as we treat questions of ethics, and that is that there be an equal number of Democrats and an equal number of Republicans deciding what the truth is.

□ 1230

Unless and until that structural procedure is changed, I think we can understand what every case coming to this floor from House Administration and any task force formed by that committee is going to be, and that will be by a series of 2-to-1 votes making sure that the outcome is exactly as the majority wishes.

In Indiana's Eighth, it was to overturn the valid State certificate, deny the election to the Republican and seat the Democrat.

In Idaho, since the Democrat won, the Democratic majority upholds State law, does not examine the changes taken place, and somehow within a period of 6 months, the Democrats are attempting to convince everyone that black is white and then white is black.

You do not believe it and I do not believe it, but it is going to happen. It is going to happen when the majority, through sheer arrogance, exercises the tyranny of the majority. Mr. Speaker, I yield back the balance of my time.

Mr. BATES. Mr. Speaker, I have some final remarks that I would make, and I now reserve the balance of my time.

Mr. ROBERTS. Mr. Speaker, I yield 1 minute to my friend and colleague, the gentleman from Idaho [Mr. CRAIG].

Mr. CRAIG. Mr. Speaker, I would like to associate myself with the remarks of my colleague from Nebraska and my colleague from California as it relates to this issue.

In January when we convened to seat Members, I took the floor hoping to convince my colleagues here in the House to uphold State law, both in the instance of Indiana and in the instance of Idaho. I stood and encouraged this House to seat RICHARD STALLINGS. Although there was a question and a cloud in Idaho as to whether he was officially elected, the State had certified as they had in Indiana.

I am not sure yet whether I erred, but at least I was very ignorant as to what would follow the proceedings in this House. Now we know. The story has unraveled. There is no question as to how the House planned to proceed at that time and then proceeded.

My ignorance was this: What I failed to recognize was that the incumbent in the Indiana race, Mr. MCCLOSKEY, was a Democrat, and the incumbent in the Idaho race, Mr. Hansen, was a Republican. In that rests the whole question and, of course, in that is the result of the outcome.

Mr. ROBERTS. Mr. speaker, I yield 3 minutes to my friend and colleague, the gentleman from Indiana [Mr. MYERS].

Mr. MYERS of Indiana. Mr. Speaker, I rise for clarification. I thought I understood what was happening until I came to the floor today. I have looked for the committee hearings. Were the committee hearings printed, I ask the gentleman from California [Mr. BATES]? I have a committee print, but I mean the hearings where they investigated the facts that I have heard discussed here today.

I yield to the gentleman for his response.

Mr. BATES. As the House Administration Committee has done on all contested elections, we have several this year. The task force holds a hearing. If the gentleman is referring to field hearings, there were none held in this case because the evidence was not overwhelming to warrant such hearings.

Mr. MYERS of Indiana. No hearings held in Washington?

Mr. BATES. There were hearings in Washington.

Mr. MYERS of Indiana. Were there any hearings held in Idaho to investigate the allegations and the facts as has been presented here today?

Mr. BATES. Hearings held in Washington, none held in Idaho.

Mr. MYERS of Indiana. There were none held in Idaho?

Mr. BATES. None.

Mr. MYERS of Indiana. Were there any witnesses from Idaho that appeared here to substantiate or to raise any further questions about what happened in Idaho?

Mr. BATES. No. In order to go to the expense and hold those hearings, we handled this the same as all the other contested elections similar to the one in Guam. We did not go to Guam. We did not go to Idaho. We did not go to all these other places. In fact, the McCloskey-McIntyre is the only one in which the additional effort and expense of holding the hearings in the District of Columbia occurred, to my knowledge.

Mr. MYERS of Indiana. Well, the statement was made by the gentleman from California, as I recall, today that the questionable ballots of 2,500, or whatever they were, that they were valid ballots. How does the gentleman know that?

Mr. BATES. How do we know that any——

Mr. MYERS of Indiana. How do we know that people exist who cast those ballots? The gentleman said they lived on rural routes way out so they got their mail at a post office box. How does the gentleman know that without any hearings?

Mr. BATES. An investigation was conducted.

Mr. MYERS of Indiana. By whom?

Mr. BATES. The district attorney in Idaho.

Mr. MYERS of Indiana. Idaho's officials were accepted? Indiana's officials were not valid? Why is Idaho acceptable and Indiana was not?

Mr. BATES. I did not chair the task force.

Mr. MYERS of Indiana. I am asking the gentleman, the gentleman chaired this one.

I yield to the gentleman for the response as to why Idaho's officials were valid and Indiana's were not, the officials of that State.

Mr. BATES. As the gentleman may be aware, the contested election procedure is under a different statute than the one which the Indiana is under.

Mr. MYERS of Indiana. Indiana, action by this House, had no contested election. There was not one.

Mr. BATES. There were two separate procedures.

Mr. MYERS of Indiana. As it has already been drawn out, the Indiana case was instigated by this House.

Why was it not similar? Why was it handled entirely different? There was a very close examination, in Indiana ballot by ballot, which ignored Indiana law entirely, and yet we have not examined Idaho law. As has been said, Idaho law has been changed because they recognized it was wrong. Indiana examined theirs and said, "We have a valid law. We did not change it."

I am shocked today. I did not agree with what happened in the Indiana case. I did not think the House had the right to come into Indiana and rewrite the election laws. But if that was going to be the precedent, if that was going to be the new rule that this House decided for its membership, so be it.

But today we have gone back and said, "Oh, we're going to abolish all of that."

Inconsistency, and I am shocked at this House and am very disappointed in this task force and the House Administration Committee and the leadership of this House.

Mr. ROBERTS. Mr. Speaker, to close debate on our side, I yield such time as he may consume to my friend and colleague, the gentleman from Minnesota [Mr. FRENZEL].

Mr. FRENZEL. Mr. Speaker, there is in this specific case before us no bitterness, no allegation of misconduct by either contestee or contestant or by the people who are promoting either person.

The bitterness that has infected our debate today is a residual of discussions and decisions made with respect to Indiana's Eighth District earlier in the year. The reason that that bitterness floods over, spreads over this whole Chamber today, is that the cases are so similar.

As has already been pointed out, in the case of the Indiana Eighth, the House decided that it had to upset the laws of the State of Indiana. It said that the Indiana laws were no good, that Indiana State officials were incompetent and that the election was therefore invalid. We literally caused another election under rules invented by the elections task force as it went along. Then, those rules were changed on the last day of that subcommittee's work so that it could declare the person it wanted as the winner, even though he had not won the election.

In the Idaho case which is now before us, we have a very similar situation. I recall our distinguished majority leader saying that the laws of Indiana were not carried out in a timely, regular, and fair manner.

What do we have in Idaho? Exactly the same kind of problem. The gentleman from Kansas outlined the difficulty with canvassing, the address problem, the error rate. But did the task force and the committee make a similar decision? No. In this case the committee decided by a 2-to-1 vote that the contestee's complaint was without merit. In a similar case, the committee will back up Idaho law, but it trashed Indiana law.

I submit that the difference between these actions was simply the difference in the way it was handled; that is, the McIntyre-McCloskey matter was not handled under the Federal Contested Elections Act. It was handled under an exercise in pure cronyism.

The Hansen-Stallings matter was handled under the Federal Contested Elections Act. It follows, in my judgment, the precedents of the House; that is, the elections task force said that the State did the best it could under the circumstances. The State ought to be upheld.

The problem is not with Hansen-Stallings. The problem is the atrocity wrought in the case of McIntyre versus McCloskey, the egregious exercise in cronyism that I have already discussed.

The bottom line after all the exclusions, deductions, tax credits, and carry-forwards, the net, net, net in that case, is that we overturned Indiana. We discredited the State, its law and its officials. Here we are going to uphold Idaho, its State law and its officials.

There is clearly something wrong in this House of Representatives. It is not with the matter before us today. It is the matter which was stuffed down the throats of the minority by the Democratic majority in our previous Indiana decision.

Now, my judgment is that the best way that the Republican minority can express its absolute disgust with the previous McIntyre-McCloskey matter and not befoul the matter that is before us is to vote "present" on the rollcall which I expect will follow.

If we are to follow the precedents of the House and good procedures and the Federal Contested Elections Act, many Members would be inclined, as I am inclined, to vote "yes" on the recommendation of the House Administration Committee. It is pretty straightforward. A "yes" vote means that we agree with the State of Idaho.

If we are to follow the McIntyre precedent that you gave us, that our friends in the Democrat majority inflicted on us, we would have to vote "no". A "no" vote would say the State has not done a good job, that it has not done its job in a timely manner. I do not believe that is the way Republicans should vote, either.

I think our only choice is to vote "present" and leave the Democrat majority with its own mess, the mess of conflict of precedent, and counter-precedent, which they have awarded to themselves. Let them remain hoisted on their own petards, swinging in the wind. They have justly earned that position of embarrassment.

I will remind my Republican friends that we have already voted to seat Congressman STALLINGS. On the previous January 3 vote to seat him, no Republican voted against Mr. STALLINGS. He presented a valid certificate presented to him by his State. We accepted it and we voted to make him a Congressman, like all the rest of us.

It is only Mr. McIntyre who is the victim of partisan cronyism in this House.

I think the good news in this matter is the information that I started with. That is, whatever irregularities we have found in the committee and in the task force, there was no allegation of fraud, no intentional wrongdoing. We do not know, as stated before, whether the State did right or not. But, as should have been our precedent in the McIntyre case, the committee decided that the State's laws and its certificate should be upheld.

Mr. Speaker, I urge on my Republican colleagues a "present" vote and on my Democrat colleagues examination of their consciences.

Mr. ANNUNZIO. Mr. Speaker, I want to take this opportunity to compliment the members of the task force for their thorough examination and review of this contested election.

Both majority and minority have expressed differing views as to the conclusion of this contest. However, the hearing and the meeting of the committee at which the matter was considered was conspicuously without the rancor which has characterized deliberations on earlier contests. I congratulate Mr. BATES who chaired the task force as well as Mr. SWIFT and Mr. ROBERTS who served ably thereon. I congratulate Mr. FRENZEL, the ranking minority of the committee, for his objectivity and candor.

I look forward to a continued constructive relationship with the minority and I believe that we are working in the right direction.

Mr. ROBERTS. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. BATES. Mr. Speaker, just a few final remarks.

I would for the record want to clarify that there is no similarity between this contested election and the McIntyre-McCloskey issue which was under House Resolution 1 and was under a different set of rules.

This particular resolution is brought up under Federal statute of contested elections, quite similar to the one for the Territory of Guam in which a Republican Delegate from Guam did have his election challenged. He was seated unanimously by the task force, dominated by Democrats and by the full committee which also has a Democratic majority and by the full House.

So I think to make a comparison of the cases requires a comparison of these two cases where we did without incident, without bitterness, without hostility, seat the Member and followed through with the recommendations, as I think we should do on this one.

I might say that the members on the task force and the full committee have conducted themselves quite properly in voting out a 12-to-1 bipartisan vote for approval; so I think we should not add to the hostility and bitterness that has been brought about by previous actions.

I call on the House of Representatives to support this recommendation, House Resolution 272, and vote "aye."

□ 1245

Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the resolution.

The question was taken, and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. ROBERTS. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 247, nays 4, answered "present" 169, not voting 14, as follows:

[Roll No. 326]

□ 1255

Mr. McDADE changed his vote from "yea" to "present."

Mr. SWINDALL changed his vote from "present" to "nay."

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. BATES. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the resolution just adopted.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

PERSONAL EXPLANATION

Mr. STALLINGS. Mr. Speaker, a few moments ago, on rollcall No. 326, relating to the contested-election contest in Idaho, I intended to vote "present." As circumstances developed on the floor, it became apparent that a present vote was developing as a protest vote, one disapproving of the process carried out by the Committee on House Administration. Thus, I voted "aye," not wanting to have my vote thus construed. I reiterate that I intended to vote "present" and that was my desire.

GENERAL LEAVE

Mr. NATCHER. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on H.R. 3424, and to include extraneous matter, along with tables and charts.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

DEPARTMENTS OF LABOR, HEALTH AND HUMAN SERVICES, AND EDUCATION AND RELATED AGENCIES APPROPRIATION ACT, 1986

Mr. NATCHER. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 3424), making appropriations for the Departments of Labor, Health and Human Services, and Education, and related agencies, for the fiscal year ending September 30, 1986, and for other purposes; and pending that motion, Mr. Speaker, I ask unanimous consent that general debate be limited to not to exceed 1 hour, the time to be equally divided and controlled by the gentleman from Massachusetts [Mr. CONTE] and myself.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Kentucky [Mr. NATCHER].

The motion was agreed to.

□ 1307

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 3424, with Mr. FUQUA in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

The CHAIRMAN. Under the unanimous-consent agreement, the gentleman from Kentucky [Mr. NATCHER] will be recognized for 30 minutes and the gentleman from Massachusetts [Mr. CONTE] will be recognized for 30 minutes.

The Chair recognizes the gentleman from Kentucky [Mr. NATCHER].

Mr. NATCHER. Mr. Chairman, I yield myself 12 minutes.

□ 1310

Mr. NATCHER. Mr. Chairman, as you know, H.R. 3424 which we present to the House today appropriates the money for the Departments of Labor, Health and Human Services, and Edu-

cation. In addition, we have in the bill funds for 10 related agencies and various trust fund limitations.

Let me begin by saying that it is a distinct honor and a privilege, Mr. Chairman, to serve on this subcommittee with my distinguished friend, the gentleman from Massachusetts [Mr. CONTE], the ranking minority member on the full Committee on Appropriations and the ranking minority member on this subcommittee. It is a pleasure to serve with all of the subcommittee members. In particular, I want to thank my distinguished chairman, Mr. WHITTEN, for his help on this bill. He always helps us.

All of these members, Mr. Chairman, are able Members of the House. In addition, we have an excellent staff on this subcommittee, Mr. Chairman; the hearings on the items funded by this bill are held over a period of some 14 or 15 weeks. The staff provided great assistance in helping to prepare for these hearings and I want the Chairman to know that this is one of the best subcommittee staffs on Capitol Hill.

Mr. Chairman, the bill provides a total of $104,881,197,000 for the Agencies and Departments under our jurisdiction; 96.5 percent of this amount is for entitlement programs. These programs have funding levels that are determined by basic authorizing legislation principally various provisions of the Social Security Act.

The bill includes $72,638,317,000 for these entitlements in fiscal year 1986, an increase of $1,312,000 over the amounts requested by the President, and $947,307,000 below the amounts appropriated for the fiscal year 1985.

For discretionary programs, Mr. Chairman, in which spending is controlled through the annual appropriation bill, the bill includes $31,779,395,000 for fiscal year 1986. This is an increase, Mr. Chairman, of $4,272,446,000 over the President's budget, but a decrease of $5,575,000 below the amount appropriated for fiscal year 1985.

For Labor, we recommend $6,672,184,000 for fiscal year 1986.

For the Department of Health and Human Services, we recommend $68,440,788,000 for fiscal year 1986. In addition, the bill includes advance appropriations of $11,473,754,000 for fiscal year 1987 for their Department.

For the Department of Education, Mr. Chairman, we recommend to the Committee $17,526,805,000.

For related agencies in the bill, we recommend the sum of $767,660,000 for fiscal year 1986.

Mr. Chairman, the bill as presented to the Committee on Appropriations and as presented to the House restores funding for a number of programs which were proposed to be eliminated or drastically reduced in the President's budget. Programs such as the Job Corps. In this bill, we have placed the Job Corps back into the bill, and the amount is $640 million.

Community services block grant was deleted by OMB. The bill before us today, Mr. Chairman, carries $361,700,000 to restore this program.

Nurses Training Program, deleted by OMB, $59,600,000. We placed that back into the bill and recommend it to the Committee, Mr. Chairman.

Impact aid, category B; $130 million is restored to the bill and we recommend it to the Committee.

Mr. Chairman, for student aid the President's budget proposed a reduction of $1,341 million. We restore that to the bill and recommend it to the Committee.

For library services, the sum of $123,600,000 is included in the bill. The budget proposed to terminate this program.

In addition, Mr. Chairman, budget requests were submitted to our Committee on Appropriations totaling $1,450,828,000 for programs that are not currently authorized. The Committee has deferred consideration of these items until they are reauthorized. Mr. Chairman; these programs if carried at the 1985 level would total $1,880,832,000. These programs are funded on an interim basis in the continuing resolution.

These programs, Mr. Chairman, are all important programs. One, for instance, is the Refugee and Entrant Assistance Program, $444,262,000.

Health resources and service, $934,174,000.

Corporation for Public Broadcasting, $200 million.

The programs that are not authorized appear on page 4 of the committee report.

Mr. Chairman, let me review for the Members, some of the programs that we recommend. In the Department of Labor for instance:

Training and employment services, we recommend $3,621,045,000.

For the Job Corps, as I pointed out, $640 million.

Summer youth employment, we have $824,549,000.

For community service employment for older Americans, $326 million.

Dislocated workers, $100 million.

Black lung disability trust fund money, which we authorized the expenditure of, $984,778,000.

The State unemployment insurance and employment service operation, Mr. Chairman, $2,483,540,000.

Bureau of Labor Statistics, $194,925,000.

Mr. Chairman, in this bill, we carry the amount of $189,666,000 for AIDS; acquired immune deficiency syndrome $189,666,000. This is an increase over the 1985 level of 90 percent. It is a $70 million increase over the President's budget.

Mr. Chairman, the number of reported cases of AIDS in this country at this time are 13,332. Of this number, 6,481 have died. This amount that we carry of $189,666,000 is larger than three of the NIH Institutes that are in the bill.

One is the Dental Institute. Another one is the Eye Institute. Another is the Institute on Aging.

The amount we carry in the bill for AIDS is larger than any one of those three Institutes; and Mr. Chairman, it is justified at this time. This is a serious matter. The people in this country, 226 million people, are concerned about it. The people in our 50 States are concerned about it.

Mr. Chairman, as far as nurses training, as I pointed out, we placed back in the bill $59,600,000 the 1985 level.

For the Center for Disease Control, we carry $441,194,000. A little over $40 million of the money for AIDS is in the Center for Disease Control.

National Cancer Institute, Mr. Chairman, $1,221,590,000, the highest amount ever appropriated for the National Cancer Institute.

National Heart, Lung and Blood Institute, $812,882,000.

Mr. Chairman, for Medicare contractors, we have $972 million; we have an increase there of $37 million over the budget.

For Social Security, we have in the hill authority to spend $4,022 million from the trust funds for administrative costs including funds to restore 1,000 positions. For the programs for the aging, $701,600,000 including $265 million for supportive services and centers.

Mr. Chairman, I now yield to the gentleman from Iowa [Mr. SMITH].

□ 1320

Mr. SMITH of Iowa. Mr. Chairman, I want to commend the gentleman for his work in this bill. He discussed the bill very thoroughly, but I also want to point out that caps were put on this bill on August 1, when this Congress adopted this budget resolution. It would be very easy for people to say there should be more money for one or the other of the institutes or for some of the programs in the bill, but the fact of the matter in that the caps were put on when the House adopted the budget resolution, and the bill is almost up to the level that we could possibly appropriate under that bill, is that not correct?

Mr. NATCHER. The gentleman is correct.

Mr. Chairman, one other matter in closing that I would want to point out to the Committee, and that is this: Let me say to you, ladies and gentlemen of the House, that on the Committee on Appropriations we have reported out of the committee 12 of our 13 bills. Every one of these bills, Mr. Chair-

man, with the exception of one, was reported out under the 1985 level. Foreign aid is 21 percent under the 1985 fiscal year level. This bill is over $5 million under the 1985 fiscal year level.

Only one bill has been reported out that was a little over the 1985 fiscal year level. Mr. Chairman, it speaks well for the Committee on Appropriations and for every Member of this House.

H.R. 3424, which we present to the House today, includes a total of $104,881,197,000 for programs under the jurisdiction of the Subcommittee on the Departments of Labor, Health and Human Services and Education and Related Agencies. This amount is an increase of $4,273,758,000 above the amount recommended by the President but a decrease of $3,417,666,000 below the comparable appropriations for fiscal year 1985. The increase over the President's request is principally the result of the Committee's decision to restore programs to the 1985 level which were either eliminated or drastically reduced under the President's proposal. The decrease below the 1985 level results from changes in appropriations for entitlement programs. The Committee has for the most part included in the bill the amounts requested by the President for these entitlements. This has been done on an interim basis pending consideration of the President's legislative package. Current estimates by the Congressional Budget Office indicate that an additional $2 billion will be needed for these entitlements once the legislation is completed. The Committee expects the President to request these funds in a supplemental. In addition the 1985 supplemental included a one-time general funds supplemental of $3.5 billion for Social Security as required by Public Law 98-21. This one-time payment substantially distorts the year-to-year comparisons.

For discretionary programs where funding is controlled through the annual appropriation process, we recommend $31,779,395,000 for fiscal year 1986. This is $4,272,446,000 above the President's request but $5,575,000 below the comparable amount appropriated for fiscal year 1985. Spending for these activities has, as a whole, been held at the 1985 level. In those cases where the Committee has recommended increases over the 1985 level, we have also recommended offsetting decreases in other programs and projects. There are many other programs which we would have liked to have increased above the 1985 level. However, given the current deficit and given the decision to maintain overall discretionary spending at the 1985 level, this was not possible. Because of these constraints, we have not recommended funding for any new programs at this time.

The Committee has deferred consideration of appropriations for programs which are not currently authorized for fiscal year 1986. This includes refugee assistance, health professions training, community and migrant health centers, health planning and trade adjustment assistance. A complete list of these programs appears on page 4 of the Committee report. These programs, many of which are proposed for termination in the President's request, received $1,880,832,000 in 1985.

DEPARTMENT OF LABOR

The bill provides a total for the Department of Labor of $6,672,184,000, including $4,952,906,000 for discretionary programs and $1,719,278,000 for entitlements. The bill exceeds the President's budget request by $843,511,000, all in discretionary programs, and exceeds the 1985 level by $359,709,000. All of the increase over 1985 is in the entitlement programs which are not subject to control through the appropriations process.

In addition, the bill includes a total of $2,700,975,000 in trust fund transfers, an increase of $57,507,000 over the budget request and $68,124,000 over the 1985 amount. Virtually all of the trust funds are for financing the administrative costs of the State Employment Security Agencies.

We recommend $3,621,045,000 for programs under the Job Training Partnership Act, an increase of $815,524,000 over the President's request. Most of the increase is accounted for by the appropriation of $640,000,000 for the Job Corps; the budget request proposed to terminate it. This is an excellent program, as the Members of the House know, and is deserving of our continued support. We also added $160,000,000 for summer youth employment, including $100,000,000 for the summer of 1986 to bring it up to the 1985 level. We included $20,698,000 to restore job training pilots and demonstrations to the 1985 level; the budget proposed elimination of these.

We were forced to defer consideration of trade adjustment assistance activities because of lack of authorizing legislation. In the meantime, all trade adjustment activities under the Trade Act are being continued at the 1985 level until November 14 under the continuing resolution.

The bill includes $326,000,000 for the title V older workers program, the same as the 1985 level. This funds about 64,000 part-time community service jobs.

We provide $800,700,000 for Employment Service State grants, an increase of $45,500,000 over the budget request and $23,302,000 over 1985. The small increase over 1985 is to cover built-in increases, primarily State employee salary increases. The bill includes $1,654,100,000 for State administration of the unemployment insurance system, an increase of $10,000,000 over the budget request to maintain nonpersonal services funding at the 1985 level.

The Committee added $1,304,000 to the budget of the Mine Safety and Health Administration to restore 46 mine inspector positions that the budget proposed to eliminate. In light of recent adverse GAO findings concerning statutorily—required numbers of inspections, the Committee felt it was necessary to restore these resources.

With regard to the Bureau of Labor Statistics, we added $6,763,000 to the budget request. This was primarily for two purposes: First, to restore $5,000,000 to maintain the plant closing and mass layoff survey begun in 1985 but eliminated from the President's budget and second, to add $1,300,000 to continue the expansion of service sector data collection.

We added $7,092,000 to the request for the Office of inspector general to maintain the 1985 funding level. We could see no good reason to cut the inspector general by 16 percent. This office, if properly managed, should save the Government a considerable amount of money.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

We recommend $79,914,542,000 for programs of the Department of Health and Human Services including $11,473,754,000 in advance appropriations for fiscal year 1987. When this amount is added to those amounts available under current law from the Social Security and Medicare trust funds, this department is expected to spend more than $300 billion in fiscal year 1986. Social Security alone is expected to make cash payments totalling more than $198 billion to more than 40 million Americans.

The amount included in the bill for these programs is $1,362,932,000 above the President's budget but $2,530,581,000 below the comparable appropriation for 1985. As is the case with other parts of the bill, this recommendation is based on freezing overall discretionary spending at the 1985 level and funding entitlements at the level requested by the President pending consideration of the legislative program affecting these accounts. In those cases where the Committee has recommended increases over 1985 we have also recommended offsetting decreases. Increases have been restricted for the most part to two items. First the bill includes an increase of $290 million for biomedical research at the National Institutes of Health and the Alcohol, Drug Abuse, and Mental Health Administration. This increase is required to support the expanded level of research projects agreed to in 1985. Second, the bill includes a further increase of $70 million over the President's request for NIH for ac-

quired immune deficiency syndrome [AIDS].

ACQUIRED IMMUNE DEFICIENCY SYNDROME

The largest increase recommended by the Committee for the Department is for work related to the problem of acquired immune deficiency syndrome. The Public Health Service considers this disease to be the most serious and devastating public health problem to appear in recent memory. In its full-blown form, AIDS is the only epidemic disease that is essentially uniformly fatal. Over 13,000 people in the United States have contracted AIDS. Half of them have died, and the prospects for the remainder are poor. The number of cases is doubling each year.

The Committee recommends a total appropriation for 1986 of $189,666,000 for all activities associated with acquired immune deficiency syndrome [AIDS]. This does not include funds provided for the Food and Drug Administration which is funded in the Agriculture, Rural Development, and Related Agencies appropriations bill. The amount provided is an increase of $70,000,000 over the President's revised budget request and $89,711,000 over the 1985 level. This represents a 90 percent increase over 1985. By agency, the amounts appropriated are as follows: Centers for Disease Control, $45,645,000; National Institutes of Health, $140,562,000; and the Alcohol, Drug Abuse and Mental Health Administration, $3,459,000.

The committee firmly believes that an all-out effort to overcome AIDS is required and that the funding and other recommendations in this bill will assist in making that effort possible.

As usual our committee has placed the very highest priority on support for biomedical research through the National Institutes of Health.

The 16 appropriations included in the bill for the NIH total $5,247,836,000. This is an increase of $616,058,000 over the budget estimates for NIH and $335,147,000 over the comparable fiscal year 1985 appropriations.

The NIH is the largest source of support for biomedical research conducted in the universities, medical schools, dental schools, and research institutions of this Nation. For the past 36 years, the support of investigator initiated research grants has been the principal mechanism for distributing funds provided for NIH-supported research. The committee believes that the support of these projects must be sustained and enhanced so that the current momentum of scientific discovery is preserved and future health gains are assured.

The funds provided in the bill, together with unobligated balances carried forward from fiscal year 1985, will provide a total of $3,050,802,000 for research project grants in 1986, an increase of $278,035,000 over the amount available for research project grants in 1985. The bill will fund the full amounts currently estimated to be required for noncompeting continuations of grants awarded in prior years, as well as providing a total of $942,968,000 for competing renewals and new grants, an increase of $22,592,000 over 1985.

The committee believes that the NIH must continue and expand its current efforts in the fight against AIDS. Progress has been made—the causative agent has been identified and a blood screening test has been developed—but much remains to be done. Although the NIH has identified approximately $70.7 million for AIDS research within its amended request, the committee believes that, in the interest of accelerating the program so that all promising avenues can be pursued, additional amounts are needed. Therefore, the committee is providing an additional $70 million within the appropriation of the Office of the Director for the Director, NIH, to disburse among the Institutes for new AIDS initiatives and expanded programs. The committee intends that whatever additional staffing is required for the AIDS research effort and its intensified management should be provided.

The committee also expects the NIH to take steps to stimulate greater participation in AIDS research by the extramural research community.

The committee has included $564,853,000 for the Health Resources and Services Administration for those activities which are currently authorized. This is $5.1 million below the 1985 level but $60 million above the President's budget. The committee has added $59.6 million to the President's budget to fund nursing programs at the 1985 level. The committee has also added $400,000 to continue the activities of the new organ transplant program which was initiated in the 1985 supplemental. The largest single item in this account is the Maternal and Child Health Block Grant. The bill includes $478 million for this program which is the maximum amount currently authorized. As I indicated earlier, almost two-thirds of the programs of this agency are not currently authorized and we have deferred consideration of these pending completion of legislative action. These include health professions, health planning and many health service programs.

We have included $441,194,000 for programs administered by the Centers for Disease Control including $80,717,000 for infectious diseases. This agency plays a key role in the fight against AIDS. The task of preventing the spread of this disease and tracking its epidemiology falls to the CDC. The amount for infectious diseases is $20.6 million above the comparable appropriation for 1985.

We have included $947,333,000 for activities under the jurisdiction of the Alcohol, Drug Abuse and Mental Health Administration including $43,696,000 for the Federal share of expenses at St. Elizabeths Hospital; $490 million is for the Alcohol, Drug Abuse and Mental Health Block Grant which is funded at the 1985 level. We recommend a total of $329.8 million for research activities of this agency which is an increase of $23.6 million over the 1985 appropriation. This will fund continuation costs of projects begun in previous years and will also provide $74.5 million for new projects, the same amount appropriated for new grants in fiscal year 1985. We have recommended $8 million for mental health clinical training which is a reduction of $14 million from last year's level but an increase of $8 million over the President's budget. The clincal training program has been reduced by almost 70 percent over the last 5 years because of its success in increasing the supply of psychiatrists, psychologists, social workers, and nurses. Given the need for funds for other mental health activities, especially research, we believe that a further reduction is now justified.

The bill which we present today includes $43,869 million in general fund support for the Medicare and Medicaid program administered by the Health Care Financing Administration. This funding is mandated by various provisions of the Social Security Act. This includes $24,210 million for the Federal share of State Medicaid Program costs and $19,659 million for the general funds share of Medicare. The bill also includes $1,271 million for administrative costs of the Health Care Financing Administration. This includes $972 million to pay the cost of processing Medicare claims. We have added $37 million to the President's budget for Medicare contractors because of the large increase in the number of claims to be processed in 1986.

We have also included $20.4 billion for the general fund entitlement programs administered by the Social Security Administration including Aid to Families with Dependent Children, Supplemental Security Income and Black Lung. More than 15 million Americans are directly assisted by these programs which serve our neediest citizens. Also included is $2.1 billion for the Low Income Energy Assistance Program which is the same level appropriated in fiscal year 1985.

H.R. 3424 provides authority to spend $4,022 million to administer the trust fund progrmas of the Social Scurity Administration. This is $30 million above the President's budget an $236 million above the limitation last year. The committee has restored 1,000 full-time positions to the Social

Security Administration which the President's budget proposed to eliminate. The report makes very clear the position of the committee that no large scale reductions in staff or field offices is to be implemented in fiscal year 1986.

We have included $5,699 million for human development programs including $2.7 billion for the title XX Social Services Block Grant and $527 million for foster care. These amounts are mandated by law. Other important programs of this agency include $1,087 million for Headstart, $701.6 million for programs administered by the Administration on Aging, and $200 million for child welfare services. We have recommended an appropriation of $250 million for WIN, which the President's budget proposed to eliminate.

We have also recommended an appropriation of $361.7 million for the Community Services Block Grants which the President proposed to terminate.

DEPARTMENT OF EDUCATION

For the Department of Education, the bill includes $17,526,805,000, an increase of $2,054,654,000 over the budget request for fiscal year 1986. The total amount in the bill is $1,218,003,000 below the 1985 appropriations including amounts in the recent supplemental appropriations bill enacted on August 15, 1985. The decrease from 1985 is primarily in the Guaranteed Study Loan Program where the committee has included the amount requested in the budget. This is an entitlement program for which the committee has no control over the cost of the program. If additional funds are required during 1986, a supplemental budget request will have to be submitted to cover the actual cost of the program.

For Chapter 1 grants for disadvantaged children, the bill includes $3,688,163,000, an increase of $41,548,000 over the budget request. These funds help the States and local school districts to provide supplementary education for over 5 million disadvantaged children.

The committee recommends $695 million to continue the Impact Aid Program at the same level as in fiscal year 1985. This is $152 million over the budget request. The committee restored $130 million for category B payments for which the budget proposes to terminate. In addition, increases over the budget have been provided to maintain construction and special payments at current levels.

For special programs in elementary and secondary education, the bill includes $655,609,000, an increase of $7,700,000 over the budget request but a decrease of $102,500,000 below fiscal year 1985. The reduction is mainly in science and mathematics education where the committee has postponed further funding until the program is reauthorized. The Chapter 2 Block Grant Program will be continued at $531,909,000, the same amount as fiscal year 1985. Civil rights training, women's educational equity, magnet schools, territorial assistance, and Ellender fellowships will be maintained at 1985 levels. The budget proposed to terminate these programs. Follow Through would be funded at $7,500,000, the full amount authorized for 1986.

The committee recommends $172,951,000 for bilingual education programs, an increase of $30,000,000 over the budget. The amount recommended includes funds to continue the Emergency Immigrant Education Assistance Program at the 1985 funding level.

In the bill, we include $1,320,100,000 for the education of handicapped children at the elementary and secondary school levels. This amount is $14 million over the budget request, but a relatively slight decrease from the 1985 appropriation. The amount provided in the bill will assist State and local educational agencies in providing special education to 4.2 million handicapped children.

For rehabilitation services to disabled youths and adults, the bill provides $1,233,900,000 an increase of $17,500,000 over the budget request and about the same as the 1985 appropriation. The amount includes $1,100 million for basic State grants, $27 million for independent living program, $22 million training, and $4,200,000 for the Helen Keller Center. The committee recommends $41 million, an increase of $2 million over the 1985 amount for the National Institute of Handicapped Research.

The bill includes $933,277,000 for vocational and adult education programs, an increase of $101,963,000 over the budget request. The amounts provided will continue these programs at current levels. Both of these programs were reauthorized in 1984 and received additional funds in the recent supplemental appropriations bill. Consumer and homemaker education programs would continue at $31,633,000, the same as in 1985.

The committee recommends $4,910,482,000 for student assistance programs. This is an increase of $1,341,482,000 over the budget request and maintains all student aid programs at the 1985 funding level. The budget request is based on a legislative proposal to restructure the existing student aid programs. Since Congress has taken no action on this proposal, the committee recommendation is based on current law.

The bill includes $3,612 million for Pell grants to permit a maximum grant of $2,100 up to 60 percent of the cost of attendance—the same policy as in the previous year. Also included in the bill is $592,500,000 for college work study, $412,500,000 for supplemental opportunity grants, $217,482,000 for direct loans, and $76 million for State incentive grants.

For guaranteed student loans, the committee has approved the budget request of $2,714,482,000, but has not agreed to the program changes requested as part of the budget. If no legislative changes are made by Congress during fiscal year 1986, the amount provided may be insufficient to meet program costs. Thus a supplemental budget request may be necessary for 1986. This is an entitlement program and appropriations have to be provided to meet the costs of the program authorized by law.

For the various higher education institutional aid programs, the bill includes $450,238,000 an increase of $203,160,000 over the budget request. Generally, the committee has restored these programs to the 1985 funding level—including special programs for the disadvantaged [TRIO], cooperative education, international education, graduate training programs, and the fund for the improvement of post secondary education. The Committee has approved the budget request of $141,208,000 for aid to developing institutions. For college housing loans, the committee authorizes $80 million in new loans compared to $40 million in 1985 and zero requested in the budget.

Again as in previous years, the budget proposes to terminate all Federal assistance to libraries. The bill restores the funding to $123,680,000 or about the same amount as in fiscal year 1985. The recommendation includes $23,680,000 for public library construction.

For payments to certain institutions the bill includes $5,500,000 for the American Printing House for the Blind; $31,400,000 for the National Technical Institute for the Deaf; $58,700,000 for Gallaudet College; and $164,230,000 for Howard University.

RELATED AGENCIES

The bill includes $767,666,000 for 10 related agencies. This is entirely discretionary spending. We exceed the budget request by $12,661,000, but we are below 1985 by $28,791,000. In addition, there are trust fund transfers here totaling $74,693,000, an increase of $5,892,000 over the budget request.

The ACTION agency is funded at the 1985 level of $150,164,000. This includes $18,364,000 for VISTA, an increase of $1,364,000 over the 1985 amount. the older Americans volunteer programs are continued at the 1985 level of $103,806,000.

The remaining related agencies are basically funded at or slightly below the 1985 levels. One agency, the National Commission on Libraries and Information Science, is not funded in

1986. The U.S. Institute of Peace will be funded in 1986 by utilization of a $4 million carryover from the 1985 appropriation; no new budget authority is required at this time.

The Corporation for Public Broadcasting is not yet authorized and has been left out of the bill. The House Rules, of course, prevent us from including unauthorized appropriations.

Mr. CONTE. Mr. Chairman, I yield myself such time as I may consume, and I rise in support of this legislation.

Mr. Chairman, it is indeed an honor and a privilege to join with the chairman of the subcommittee, the distinguished gentleman from Kentucky, the Pete Rose of the House of Representatives, in bringing H.R. 3424, the fiscal year 1986 Labor, Health and Human Services, and Education appropriations bill to the House floor. There is no more fair, no more hardworking, no more responsible, a chairman than BILL NATCHER, and it continues to be a pleasure to work with him on this bill.

No legislation that comes before this Congress is more subject to being pulled apart—on the one hand, by those who say the bill is inadequate in meeting the needs of the people; and, on the other, by those who say this bill contains irresponsible spending. And I bet you we hear from both sides of that tug of war today.

But for the past 2 years, under the leadership of the gentleman from Kentucky, we have passed bills that have been signed into law by the President, after years of vetoes and continuing resolutions. And, Mr. Chairman, this year, with the bill we bring before you, I believe we stand a good chance of striking that golden mean again.

Let me remind my colleagues what we accomplished over the last 2 years.

In fiscal year 1985, funding for the Department of Education increased by $3.4 billion, from $15.3 billion to $18.7 billion.

In last year's bill, funding for biomedical research went up by $650 million.

In last year's bill, maternal and child health increased by $79 million, Head Start increased by $79 million, child welfare services increased by $35 million, Chapter 1 Education for Disadvantaged Children increased by $208 million, and many other programs too numerous to name received major increases, in a bill signed by the President.

In H.R. 3424, which we present to you today, we have sustained those increases, and to do it, we have added $4.3 billion to the President's request.

But, in sustaining those funding levels, and in restoring all these proposed cuts, Mr. Chairman, we have also held the line in fiscal year 1986, and we have held it, almost across the board at fiscal year 1985 levels.

For total discretionary spending in this bill, we are $5.6 million below our fiscal year 1985 level.

Mr. Chairman, this bill provides a total of $104.9 billion in new budget authority, $3.4 billion below the comparable fiscal year 1985 amount, and $4.3 billion above the President's request.

As usual, the majority of the money in this bill is for mandatory spending, over which the Appropriations Committee can exercise little, if any, control. For approximately 69.5 percent of the funds in this bill, or $72.6 billion, we simply act as a conduit.

As my colleagues know, the fate of these mandatory program spending levels, for programs such as Medicaid, Medicare part B, Aid to Families with Dependent Children, Supplemental Security Income, Guaranteed Student Loans, and so forth, are now being considered by the various authorizing committees, under the reconciliation process.

We are not privy to the deliberations of the Ways and Means Committee, the Education and Labor Committee, and other authorization committees. Nor are we able to predict what final spending levels will result from this process.

So, we have no choice, really, but to go with the President's requested levels for these entitlement programs, and wait for the dust to settle to see whether those requested levels are sufficient.

For discretionary spending, which is what this bill is about, and by which this bill is judged, H.R. 3424 provides $31.8 billion, $5.5 million under the comparable fiscal year 1985 level, and $4.3 billion over the budget request as I've indicated.

Within the overriding principle of holding the line, Mr. Chairman, we have nonetheless taken it upon ourselves to respond to one of the most pressing public health crises of the day, and potentially of the century, acquired immune deficiency syndrome [AIDS].

Within the overall total, H.R. 3424 provides nearly $189 million for the AIDS effort, $70 million over the budget request, and an increase of $89.7 million over fiscal year 1985.

This major addition of $70 million is provided to the National Institutes of Health, to double their requested level of research, so that no stone will be left unturned in research into the causes, treatments, and potential cures for AIDS.

There are now, Mr. Chairman, at least 12,000 confirmed cases of AIDS in this country. The number is doubling every 10 months.

Eighty-five percent of these diagnosed with the disease die within 3 years.

Many thousands more have what is called AIDS-related complex, some of whom will go on to develop AIDS.

It is estimated that up to 1 million people have been exposed to the virus, HTLV-III, responsible for the disease.

Recent studies indicate that more than 50 percent of the gay men in San Francisco show signs of having been exposed to the virus.

Other studies indicate that an increasingly large number of prostitutes are showing exposure to the virus, providing an apparent means for this disease to continue to spread.

And, tragically, babies and young children are not immune to infection.

It is the committee's intention that no avenue be left unexplored for lack of funding, and that progress be made as fast as is humanly possible.

In addition, in report language, that I sponsored, we call upon the Secretary of Health and Human Services to appoint a coordinator to the AID effort, an AIDS czar, if you will. Up until now, at least nine agencies have been involved in this effort. From the outside, it appears that this has been an ad hoc effort.

What we need is a well-coordinated, well-planned effort, with one person running the show, making decisions about what needs to be done, what resources are needed, and how the resources should be utilized most effectively.

What we need, in my opinion, is someone of the caliber of the people who ran the successful campaign to abolish smallpox from the face of the Earth. I hope the Department will move immediately to implement this recommendation, so that we can mount a similar campaign on AIDS.

The other major increase over fiscal year 1985 program levels is an increase of $265 million for the National Institutes of Health. This increase is required to continue the higher level of activity that was initiated in the last couple of years. It represents the minimum necessary to prevent any ongoing activities from having the plug pulled.

For new grants and projects to be initiated in fiscal year 1986, we have frozen funding at the same amount provided for new activities in fiscal year 1985.

The $4.3 billion in program restorations result from the administration's budget request to terminate some 58 programs, like the Job Corps, and to make deep cuts in other programs, like student financial assistance, which this Congress, through its debate on the budget, has made clear it does not intend to go along with.

These restorations preserve some of the most important programs in this bill that benefit millions of people in this country. The bill restores $1.3 billion for student financial aid; $815 mil-

lion for employment and training programs; $361 million for the Community Services Block Grant; $150 million for the Work Incentives or WIN Program, providing job opportunities to welfare recipients; $100 million for vocational education; $152 million for impact aid, affecting schools in nearly every congressional district in the country; $124 million for library programs; $200 million for higher education programs; and many others.

For those concerned about Job Corps, which was proposed for termination; there is $640 million in this bill, an increase of $23 million over fiscal year 1985, just about the amount necessary, according to the Department of Labor's figures, to prevent any current Job Corps center from being closed.

In order to provide additional funding for the two programs I mentioned earlier, and yet to stay within the fiscal year 1985 total for discretionary programs, H.R. 3424 makes major adjustments in two accounts.

The committee has accepted a proposed reduction of $121 million in the JTPA title III Dislocated Worker Program. The reason is that the Labor Department has testified several times that there is a very large carryover accumulating in this program.

The experience under this program, initiated in fiscal year 1984, under the Job Training Partnership Act, is that the average cost of retraining a worker under this program is turning out to be much lower than anyone anticipated. The large amount of accumulated carryover is expected to be sufficient to permit the current level of operation to be carried on, and so the program should suffer no harm.

The other major adjustment is that no new funding has been provided for the $100 million math and science program. This is a new program, funded for the first time last year, and the authorization has expired. No reauthorization activity has started in the House, to my knowledge, and so we do not yet have an idea if whether and in what form this program will be reauthorized.

The last particular thing about H.R. 3424 that I would point out to my colleagues, is that, as usual, and in accordance with House rules, the committee has deferred action on unauthorized programs, for which some $1.9 billion in funding was provided in fiscal year 1985. These programs include trade adjustment assistance, health professions programs (except nursing), NIH and NIMH research training, refugee programs, and the Corporation for Public Broadcasting. These programs are currently being continued at their present rate, and under current terms and conditions, through the continuing resolution.

Let me make just a point or two regarding some of the issues in H.R. 3424.

For Head Start, the bill provides an increase of $12 million. It is one of the few programs to receive an increase, and demonstrates the support the program has.

I would call attention to two provisions in the report language. First, the committee is quite concerned about the adequacy of salaries for Head Start employees, and is quite serious about the study it has asked for on that issue.

Second, I would call attention to the provision I sponsored relating to providing permanent funding for temporary enrollment expansions in Head Start projects. I am aware of situations where retrenchment in the number of children that can be served by a local project would work hardship, and it is my expectation that the Department will follow this report language and rectify situations such as these.

In the National Institutes of Health, I am pleased to see a modest growth rate in the National Institute of Arthritis, Diabetes, Digestive and Kidney Diseases. In addition to some other critical items, it appears there are sufficient fiscal resources to sustain the development and implementation of the Digestive Disease Research Centers Program.

In addition, I would point with pride to a number of other items in the bill: The $5 million for the Bureau of Labor Statistics to maintain the second full year of funding for the plant closing and mass layoff survey; the fact that we were able to keep some funding for mental health clinical training, with the hope of agreeing to an even higher figure; the doubling of the College Housing Loan Program; the restoration of funds for the Women's Bureau's Demonstration Grant Program, to continue activities like the Displaced Homemaker's Network and to initiate after an unexpected delay, the Corporate Linkage Program.

In addition, there are several important pieces of report language that I would call attention to, including the call for a report on Alzheimer's disease, to once again try to get the Department of Health and Human Services to face up to an issue it has ducked in every possible way—the provision and coverage of services for victims of Alzheimer's disease and their families; the call for a full-scale plan to do the necessary research on the health effects of acid rain; and language calling attention to the next steps necessary to continue recent progress in the areas of neurofibromatosis and head injury. I also look forward to the expanded efforts of the interagency panel working on learning disabilities.

Finally, I would like to call attention to two user fees that are now being initiated. The first is the National Library of Medicine, which, in response to a 2-year campaign I waged, has agreed to charge foreign users an unsubsidized price for using the library's data base, which should bring in over $1 million a year. The second is contained in this bill, and was contained in the budget request, to assess fees for the production and distribution of reference reagents to private manufacturers, and for the participation by commercial laboratories in the proficiency testing program established and operated by CDC. These new user fees are expected to raise nearly $500,000 a year.

Mr. Chairman, we worked long and hard on this bill. We held hearings on every aspect of this bill from late February to late May, 4 days a week. We heard from hundreds of administration witnesses, Members of Congress, and public witnesses.

Our hearings take up 12 volumes.

Mr. Chairman, the members of the subcommittee, including those on my side, GEORGE O'BRIEN, CARL PURSELL, JOHN PORTER, and BILL YOUNG, care deeply about the programs in this bill.

These are the programs that the children in our districts, our teachers, our college students, our unemployed and eager to be employed, our poor, our disabled, our old.

This bill is the bill that says "we care", and that says "opportunity" and "access", "education" and "jobs", and, maybe, above all, "health."

In this bill, we have not retreated. We have not taken a backward step. We have not turned away.

What we have done is retained, and maintained, the programs that we have built over the years.

But, Mr. Chairman, in this bill, the members of the subcommittee have also taken a long, hard look at reality.

We, know, that without a good economy, there is no opportunity, there is little to educate for, or obtain access to.

You cannot reduce the deficit by pointing to someone else and telling them to tighten their belt. This bill does its job, and holds the line.

For all the pressures to spend more money; for all the serious and pressing needs like AIDS; this bill comes in $5 million below fiscal year 1985 spending levels for the discretionary programs under our control.

That took a lot of courage, and restraint, and bipartisan effort.

For all of my colleagues, who care about the people of this country, and who care about the future of our economy and ultimately of our country, I say to you that this bill strikes the golden mean, and I urge your strong support.

□ 1335

Mr. NATCHER. Mr. Chairman, I yield 4 minutes to the distinguished gentleman from California [Mr. HAWKINS], the chairman of the Committee on Education and Labor. And, Mr. Chairman, I want the chairman and the members of this committee to know that I appreciate the opportunity that I have had to work with the gentleman in the well. The gentleman from California [Mr. HAWKINS] is serving as chairman of his committee, he is an able chairman, and I want to thank him at this time.

Mr. HAWKINS. Mr. Chairman, I appreciate the remarks of the gentleman from Kentucky and his cooperation and support, and I express my appreciation for this time which he has given to me.

Mr. Chairman, I reluctantly rise, however, to express my dismay at how much this bill deviates from the priorities included in the first budget resolution for fiscal year 1986.

The chairman of the committee, the gentleman from Kentucky, has assured me that he will continue to work with me to address some of these concerns. It is my hope that the future will place us in the position of giving much broader support than what I personally feel that is being done today.

The budget resolution, I would like to remind the Members, passed this House by a vote of 309 to 119, and it provided sufficient authority to fund the programs targeted to the low income and otherwise disadvantaged people at their current policy levels in fiscal year 1985 plus an inflation adjustment, which we agreed to.

Already the poor of this country have suffered because of previous deficit reductions. Their condition has worsened. On this basis, many of us supported the budget resolution as a means of more adequate funding for low-income programs.

Now, agreeing to the fact that the bill before us today does a lot of good things—and I commend the members of the committee on both sides of the aisle for the good that it does—I cannot, in all good conscience, not take recognition of the fact that some of the most disadvantaged will be further disadvantaged by this particular bill, despite the fact that, as compared with the budget resolution itself, there is sufficient money available to make the adjustments in these programs as we envisioned in the budget resolution itself.

These programs, I would like to remind the Members, include such programs as chapter I, the Compensatory Education Program. The cut in this bill will reduce the program by at least 340,000 children. That is the practical effect. That type of reduction, I think, cannot be challenged, and I think that is the type of reduction that we did not commit ourselves to in the budget resolution.

Furthermore, such programs as handicapped education, the Pell grants and child welfare services will be cut. And, in addition to this, such training programs as the Job Training Partnership Act and the WIN Program will be cut or reduced even below the 1985 level.

Now, the fact that there is money left over in these programs is no indication that we do not need the money. It is an indication of the unwillingness of certain officials to provide the money for the displaced, for the severely economically disadvantaged, for the children of our Nation, that the administration has said is so tragic that we must pass a program of subminimal wages in order to put our youth to work. Here is an opportunity for us to provide definite constructive programs.

So it seems to me that when we talk of a safety net, we make a mockery of that concept, and we have to admit that in the spring of the year we have a love affair in a budget resolution, and we say we are going to protect these programs, and everybody agrees that it should be done, and we have a committee, the Education and Labor Committee, that tailors its recommendations to fit that budget resolution, and we will further be asked to go into a process of reconciliation to make sure that we do it, and here the very programs that we recommend to you, you are now cutting back. This, I submit, makes a mockery of the budget process, and I say today that some of us have voted for a budget resolution the last time in this House.

Mr. CONTE. Mr. Chairman, I yield 1 minute to my good friend, the gentleman from Illinois [Mr. O'BRIEN].

Mr. O'BRIEN. I thank the gentleman for yielding.

Mr. Chairman, the gentleman from Kentucky [Mr. NATCHER] and the gentleman from Massachusetts [Mr. CONTE] said it all. All of us on the committee had additions considered desirable but untimely. There are no new programs in this bill. We are as close to the 1985 level as we can possibly get. This bill is a rather remarkable accomplishment which I think credits the entire committee, but Congressman NATCHER and Congressman CONTE most of all.

I rise in complete support of this bill.

Mr. CONTE. Mr. Chairman, I yield 3 minutes to my good friend, the gentleman from Michigan [Mr. PURSELL].

Mr. PURSELL. I thank the gentleman for yielding.

Mr. Chairman, last evening our Wednesday group met with many outstanding national economists, Paul Volcker, Martin Feldstein, Paul McCracken, and others who were looking at the future of this Nation. Though many issues were discussed there was no question that the single greatest problem facing this Nation is the deficit. Our Labor-HEW appropriation bill has almost across-the-board bipartisan effort to show restraint, and yet as my good friend, the gentleman from Massachusetts [Mr. CONTE], indicated, a degree of balance between those who think we should spend more and those who think we should spend less.

This is the first time, as a member of this committee, that I can recall that almost every member of our committee used restraint in the markup process to keep our expenditures at the 1985 levels. That is not easy, with the enormous pressures on this bill, which is one of the most important components of the Federal budget. The subcommittee followed the freeze principle, in keeping the spending level below the 1985 current level. This bipartisan effort does signal a responsible change of direction and keeps our appropriation bills in a position to be signed by the President.

I want to congratulate the chairman of the committee, the gentleman from Kentucky, BILL NATCHER, and the ranking minority member, SILVIO CONTE, with whom I have had the honor to serve for many years. I also want to congratulate our great staff who exercised understanding and wisdom and worked carefully with the members of this committee to fashion a bill that I think meets the targets for 1985 and looks to the future on key programs, whether it be student aid or nursing research.

Mr. NATCHER. Mr. Chairman, I yield 4 minutes to the distinguished gentleman from Maryland [Mr. HOYER], a member of the subcommittee, and a good member, Mr. Chairman.

Mr. HOYER. I thank the gentleman for yielding time to me.

Mr. Chairman, I am pleased to be given this opportunity to stand with two of the most distinguished leaders of this body, Chairman WILLIAM NATCHER and the ranking member, SILVIO CONTE, and the other members of the subcommittee in support of the fiscal year 1986 appropriations bill for the Departments of Labor, Health and Human Services, and Education. As has been stated this bill is $4.3 billion over the President's budget request for discretionary spending programs and $5.6 million below the fiscal 1985 level.

We had to make some very tough decisions in reaching this compromise that we have before us today. This is exactly what we have Mr. Chairman. This bill reflects a compromise and, in many ways, a retreat. It is a compromise because no single member or single constitutuency will be totally satisfied. It is a retreat because this bill reflects the retreat by the adminis-

tration and American public policy in providing services for the poor, the young, the disabled, and the aged.

As Mr. NATCHER often says this bill is "the people's bill."

It is, Mr. Chairman, and the members of the subcommittee have been and will continue to be placed in a precarious position. Until the people of this country and this Congress are willing to come to grips with reducing the budget deficit in a responsible manner and increasing revenues, our subcommittee will year after year be forced to continue the juggling act between fiscal and programmatic responsibilities.

This is a fiscally responsible bill. But, let there be no mistake: We can't have our cake and eat it too. Mr. Chairman, a majority of the subcommittee members decided to vote out a bill at or below the fiscal year 1985 level and, therefore, make the tough decisions that were necessary. We had to cut or freeze some accounts which we would have desired to increase. At the same time, however, we are aware of the tremendous need that exists to provide services, particularly health and education services, to millions of underserved and unserved Americans.

Mr. Chairman, this is not the bill that I would like to see come out of the subcommittee, but these are not the best of times.

I am not totally pleased with the results but I stand behind our decision. I am supportive of the increase, a 90-percent increase over 1985, for activities related to the acquired immune deficiency syndrome [AIDS] that we have provided. We have recommended a total of $189.6 million, an increase of $70 million over the President revised budget request and $89.7 over the 1985 level. We believe this expenditure is necessary and crucial. This disease is not limited to a small class of Americans. It is a disease which threatens all of us. We believe that an all-out national effort is necessary to attack this dreaded disease.

In the Department of Health and Human Services, I would have liked to have been able to provide funds up to the full authorized levels for aging programs, for the social services block grant, for family social services, the AFDC program and human development services just to name a few. I am painfully aware that the children of this Nation represent approximately 40 pecent of the total poor population in the country.

In education, we have all heard much talk about a "Nation at risk" and what has been the Federal response: Retreat. The fiscal year 1986 appropriation for chapter 1 is approximately $1 billion short of the fiscal year 1980 level as adjusted for inflation.

Mr. Chairman, a society can be judged in large part by its priorities. The President's budget proposed to spend 30 percent of the budget on defense and 1½ percent on the education of our children. That is not good policy. We are biting a hard bullet in this bill. The fiscal policies that we have pursued over the past 5 years have forced this result incorporated in H.R. 3424. To continue along this path is not good policy for the future vitality of our country. As a nation we must recognize our fiscal responsibilities to this and future generations.

As I have said, I rise in support of H.R. 3424. It is the best that we can do in light of budget shortfalls that confront us. But, to continue to short change health and education while sharply increasing payments on an ever escalating debt and to add to the already substantial defense budget is neither good policy nor good sense.

□ 1350

Mr. CONTE. Mr. Chairman, I yield 2 minutes to the gentleman from Texas [Mr. BARTLETT].

Mr. RITTER. Mr. Chairman, will the gentleman yield?

Mr. BARTLETT. I yield to the gentleman from Pennsylvania.

Mr. RITTER. I thank the gentleman for yielding.

Mr. Chairman, I would just like to comment on the remarks of the gentleman who was just in the well. This Nation spends over $200 billion on education. It is true that only a small percentage of that does come from the Federal Government, but in that context, education overall is more like two-thirds of the Defense budget. The 1½ percent figure the gentleman referred to doesn't accurately reflect resources allocated for education. And, I yield back to the gentleman.

Mr. BARTLETT. Mr. Chairman, I rise to support the Porter amendment which will be offered and which I believe will be generally agreed to by both sides of the aisle.

The Porter amendment will not resolve the adverse impact on employee rights that was caused by the Garcia decision, but the Porter amendment will give all parties and additional 30 days extension to avoid a disruption in the budget process and the employee relations process while Congress addresses the Garcia decision directly.

The Porter amendment for a 30-day extension is not done merely for the convenience of Congress, but to assure reasonable time to negotiate a settlement and an agreement on what those employee rights ought to be. Mr. Chairman, much has been discussed about the Garcia decision in terms of its impact on State and municipal budgets, and that is true in terms of negative impact on taxpayers. But the Garcia decision, if left unamended, would primarily have a negative impact on the rights of employees, and I think that is what this Congress has to focus on.

I commend the chairman of the Committee, Mr. HAWKINS, and the chairman of the subcommittee and the ranking members of the subcommittee and the full committee for attempting to reach a settlement on the Garcia decision. The Garcia decision, with or without the Porter amendment to extend it for 30 days will not go away. We will be back on the floor within 30 days to resolve the employee rights issues in the Garcia decision. I thank the gentleman from Illinois for offering his amendment.

Mr. NATCHER. Mr. Chairman, I yield 4 minutes to the distinguished gentleman from California [Mr. ROYBAL], who is not only a Member, Mr. Chairman, of this subcommittee, but is, as one of the 13 subcommittee chairmen, the chairman of the subcommittee that appropriates the money for the Department of Treasury and the Post Office. And the gentleman is an able Member of the House.

Mr. ROYBAL. I thank the gentleman for yielding me this time.

Mr. Chairman, I rise in support of H.R. 3424, the Labor-HHS-Education appropriation bill for fiscal year 1986. This bill does not accept the Presidents' proposed reductions in funding for those programs vital to the elderly, the poor, the disadvantaged, and in fact, all the people of this great Nation. As a member of the subcommittee which drafted this bill, I want to commend Chairman NATCHER and the ranking minority member, Mr. CONTE, on their hard work and objectivity and for their unwavering support of the programs administered by the three agencies for which we are appropriating funds today.

The bill we are considering today contains a $70 million increase over the President's amended request for the National Institute of Health to conduct research on AIDS. Having worked on this issue since it first came to the attention of health officials and from discussions with experts on AIDS, I am convinced that over $100 million is needed and could efficiently be used this year to deal effectively with this dreaded disease.

In 1982 we had less than 1,000 reported AIDS cases. Today there are more than 1 million Americans infected with AIDS and this number is expected to double every year. What is needed is a well-funded and coordinated plan to confront this insidious and deadly disease. The bill before us today is a major step in that direction.

In addition to increasing the research funds, this bill also urges the Secretary of Health and Human Services to appoint a permanent coordinator to exercise oversight over the funds appropriated for the national

effort against AIDS. I hope the Secretary of HHS not only heeds this advice but also appoints a national blue ribbon panel composed of governmental and nongovernmental experts on AIDS to address all public health aspects of the AIDS crisis and to develop a unified policy direction on such issues related to the science, risk-reduction/health education, social, legal, and ethical dimensions of AIDS and HTLV-III infection. Such a panel is needed in order to coordinate the scientific and social efforts of not only HHS, the Department of Defense, the Department of Education, and other Federal agencies, but also our universities and other private groups and organizations.

There may be some who would question whether the increased funding is going to be properly spent. It is my understanding that NIH has prepared an internal document identifying a number of new initiatives which would be conducted in fiscal year 1986 if increased resources were made available. These new initiatives total more than the additional $70 million we are providing in this bill and include the development of better methods for the identification and inactivation of the HTLV-III virus on the blood, as well as the development and testing of drugs for the treatment of AIDS and opportunistic infections. I can assure my colleagues that the $70 million is going to be well spent and will not be enough. I will continue to request additional funds through the appropriations process until we eradicate or at least control this world-wide epidemic.

I also want to bring to the attention of my colleagues that this bill also contains funding for many other programs of vital importance to all our constituencies. It maintains the funding of the Older Americans Act including the meals and employment programs. The ten research centers of excellence on Alzheimer's disease and related disorders and the initiative focusing on family stress problems started last year at NIMH will continue.

With regard to social security staffing and office closings, the bill restores 1,000 of the 1,689 full-time employee positions that were proposed to be reduced, and report language states clearly that no funds have been approved by this committee for the implementation of a restructuring of the SSA field organization.

The bill also includes an increase of $30 million over the President's request for bilingual education programs assisting limited English proficient children to improve their academic skills and performance. The committee rejected the administration's proposal for language to override the mandatory allocations of Title VII of the Elementary and Secondary Education Act, including the requirement that specific percentages of part A funds be used for transitional bilingual education programs and for alternative instructional programs. Those allocations were arrived at after full legislative consideration of the Bilingual Education Act. As they reflect the will of Congress, they should be fully respected and complied with.

Contrary to the administration's request, the bill would also maintain Emergency Immigrant Education assistance to the States. Under this program, grants are provided to States with school districts enrolling substantial numbers of immigrant children. In this way, the Federal Government will help cover the costs of educating about 300,000 immigrant children, whom overburdened school districts might otherwise be unable to serve adequately.

With regard to job training, almost $21 million over the President's request has been added to restore funding for national pilot and demonstration programs. A chief aim of these programs is to improve the delivery of services to special populations. Sufficient funds are provided for an important initiative, a new national program to begin addressing the severe problems of Hispanic unemployment and underemployment.

One of the most effective early childhood programs is the Head Start Program, which is intended primarily for preschoolers from low-income families. The bill includes a $12 million increase over last year's level for this most worthwhile program. It seeks to ensure continued funding for the Early Childhood Bilingual Multicultural Resource Centers. These centers have been very important in providing support services to Head Start Programs serving disadvantaged bilingual children.

I urge my colleagues to support this bill and to oppose any efforts to reduce any of the funding levels recommended within it.

Mr. CONTE. Mr. Chairman, I yield 4 minutes to the gentlewoman from Nebraska [Mrs. SMITH].

Mrs. SMITH of Nebraska. I thank the gentleman for yielding me this time.

Mr. Chairman, I wish to commend our chairman, Mr. NATCHER, and our ranking minority member, Mr. CONTE, for their statesmanship and for their hard work and dedicated leadership in drafting this bill.

I support the amendment soon to be offered by my friend from Illinois, [Mr. PORTER], to delay the appropriation of funds to the Department of Labor that would be used to enforce the Supreme Courts' Garcia decision.

This ruling, which overruled a previous Supreme Court decision, extended the Fair Labor Standards Act [FLSA] to nearly all State and local government employees.

Most significantly, these governing units must pay workers overtime pay in cash, regardless of any comp time arrangements they may have with their employees. Ironically, I have found that many employees see the Garcia decision as resulting in the loss of the compensatory time-off benefit that they cherished, and not a gain.

The costs to State and local governments associated with the overtime provisions of the FLSA threaten to result in reductions in public services, tax increases, and possible layoffs of public employees. In the final analysis, the citizens of the United States are the ultimate losers with the Garcia decision.

On a national scale, complete coverage under the FLSA or all State and local government employees is likely to cost governments between $1 to $3 billion in overtime wage payments this year alone. My home State of Nebraska has 32,667 State employees and 81,974 county and city employees, most of which now fall under the FLSA because of the Garcia decision.

The following are estimated financial effects of the Garcia decision as they relate to some local governments in Nebraska. Hamilton County, NE, estimates that it will incur $10,000 in additional snow removal costs and $8,000 in overtime pay for deputy sheriffs and jail dispatchers. Stanton County was forced to add two part-time deputies on a three-man police force to prevent overtime at a cost of $6,615.86. Cass County expects expenditures of $20,810.77 in overtime pay for road workers, $5,281.07 in overtime for the sheriffs department, and $3,302.32 in overtime for dispatchers over a 12-month period. This computes to a $25,543.96 cost to Cass County for 1 year's time.

The city of Scottsbluff, NE, expects to pay $25,000 in overtime and administrative costs over the next year because of the Garcia decision. The city of Grand Island estimates overtime and administrative costs at $10,000 to $15,000. Hastings, NE, expects overtime costs of $30,000. The city of Kearney has already paid over $8,000 in back overtime pay since the Garcia decision went into effect, and expects $30,000 per year in future overtime costs. Ogallala, NE, expects to pay a minimun of $14,000 in first year direct payroll costs. The city of Seward estimates overtime and administrative costs of $2,000 to $3,000, and Fremont, NE, expects overtime payments surpassing $12,000.

I think that the application of the FLSA to seasonal jobs such as State brand inspectors highlights particularly well some of the problems of the Garcia decision. The Nebraska State brand committee currently employs 56 full-time brand inspectors. The committee estimates that during the busi-

est months of this seasonal job the total overtime wages for the 56 brand inspectors could be as high as $23,116.80 per month, not including additional sums in Social Security and retirement payments that would be incurred.

That is a significant expenditure of money from just one small agency of the Nebraska State government. All of the overtime wage payments I have mentioned will take a great toll on the already financially strapped State and local governments in my State.

Now there can be no doubt that each State and local public servant should be fairly and equitably compensated for the important duties he or she performs. One time-honored method of fairly compensating public workers, while at the same time preserving the financial stability of State and local governments, was compensatory time-off arrangements. The Garcia decision renders comp time arrangements nearly useless.

That is why it is vital that the authorizing committee have a complete and full opportunity to consider the impact of the Garcia decision before the Department of Labor begins its investigations of State and local governments for compliance. Unless a delay is enacted, the Department of Labor will begin its investigations on October 15.

I have introduced legislation in response to the Garcia decision, H.R. 3237, that already has 37 cosponsors, and I know of at least 11 other bills in the House that pertain to this same issue. Clearly, there is a great deal of concern in the House with Garcia.

The Labor Standards Subcommittee has held only one hearing on this issue to date; that hearing was held, September 24. Although more hearings may occur, it is extremely unlikely that the subcommittee, much less the full Hosue, will have the chance to give this issue the consideration it deserves before the October 15 deadline.

The Garcia decision has the potential to adversely affect every State, city, and county government in this country. I think a Federal intrusion on this scale makes it incumbent upon us to at least study the matter before administrative enforcement.

After all, it was Justice Blackman himself, the author of the Garcia opinion, who wrote that it is up to Congress to determine the limits of the FLSA under the commerce clause.

I hope you will join us in voting to delay enactment of Garcia so that the House has the chance to work its will before our State and local governments have to give up their sovereignty through forced compliance to the FLSA.

□ 1400

Mr. NATCHER. Mr. Chairman, I yield 4 minutes to one of our good subcommittee members, the distinguished gentleman from Ohio [Mr. STOKES].

Mr. STOKES. Mr. Chairman, I am pleased to join with my distinguished chairman, BILL NATCHER, and the ranking minority member, SIL CONTE, in supporting this bill. It is a great privilege to serve on this subcommittee with both of these distinguished gentlemen.

Mr. Chairman, Mr. NATCHER has performed a meaningful service in crafting a bill which successfully accommodates the needs of the elderly, the poor, children and families, workers, the unemployed, and countless others, while still meeting stringent budget targets.

Mr. Chairman, I have said many times that a strong national defense in the absence of a strong, healthy and educated populace does not provide for the longevity and prosperity of a society. The priorities of this bill are the health, education, and wellbeing of our Nation. In protecting human needs programs for our Nation's citizens, this bill includes funding of $104.4 billion, $4.3 billion more than the amounts requested by President Reagan. The committee debated long and hard concerning which programs could be targeted for additional resources, in a time of budget restraint, and which programs could survive without a budgetary adjustment for inflation.

In the area of health, this bill recommends $5.248 billion for the National Institutes of Health. These resources will help to sustain an explosion of progress in the field of medical research and will ensure a continued strong investment in the future health of this Nation.

I am delighted also that the NIH appropriations include $10 million for the research in minority institutions [RCMI] awards. The purpose of this initiative, begun in 1985, is to strengthen the research environment of a select group of predominately minority educational institutions in order to enhance their contributions to the biomedical sciences. These funds will permit highly meritorious and approved but unfunded applications to be financed in fiscal year 1986.

The bill also continues critical funding for primary health services to mothers and children through the maternal and child health block grant, the preventive health services block grant, Childhood Immunization Program.

In the area of employment, the committee found no evidence to substantiate the Reagan administration's request to terminate the Job Corps Program. We recommend $640 million to support an average enrollment level of 40,500 slots. Disadvantaged youth and adults will also benefit from the additional resources provided in the bill for summer jobs and for the work incentive program, also targeted for elimination by the administration.

With the approval of $17.6 billion in the bill for the Department of Education, critical educational services will also be maintained. The subcommittee agreed unanimously that the severely underfunded student financial assistance programs would have to be restored. We also recommend an increase of $1.3 billion over the budget request for Pell grants, college work study, direct loans and guaranteed student loans. These recommendations for student aid, as well as the $176 million included in the bill for the trio program, will help to ensure that equal educational opportunity remains a reality for millions of college-age students in our Nation.

I have highlighed only a few of the very important programs provided for in this legislation. Mr. Chairman, millions of Americans and their families will benefit from this legislation. It is an excellent bill and I urge my colleagues to join me in supporting this bill.

Mr. CONTE. Mr. Chairman, I yield 6 minutes to the gentleman from Illinois [Mr. PORTER].

Mr. PORTER. Mr. Chairman, I thank the gentleman for yielding this time to me.

Mr. Chairman, there are not two Members that are more easy to work with than my chairman, the gentleman from Kentucky [Mr. NATCHER], and my ranking minority member, the gentleman from Massachusetts [Mr. CONTE]. And for their cooperation I thank the members of our subcommittee and the wonderful staff that we are blessed with in working on this very important appropriation bill.

I commend my chairman, my ranking member, and the subcommittee members for bringing out a bill that is below the 1985 spending level. It joins a list of other bills, all but one coming out of the Appropriations Committee so far this year, that have been below the 1985 level. I have said from the very beginning of the year that if we are going to address the budget deficit, staying below the 1985 level in each appropriations bill is the standard we must meet at least and I am proud that our subcommittee has done so.

One matter that was not addressed in the bill that I thought ought to be addressed—and it has been referred to by the gentleman from Texas [Mr. BARTLETT] and the gentlewoman from Nebraska [Mrs. SMITH]—is what will be done regarding the enforcement of the decision in Garcia versus San Antonio Metropolitan Transit Authority handed down by the Supreme Court earlier this year. The Garcia decision extended the Fair Labor Standards Act to all State and local governments—something that I think Congress never intended to do. One effect

of the decision is to deny to public employees the option of compensatory time off in lieu of overtime pay. In most cases public employees have fought hard to include the comp-time option in their collective-bargaining agreements, and this decision would abrogate those agreements. I have heard from public employees, many of them in my district, who wish to retain the choice between comp time and overtime pay.

I will, therefore, be offering, as I did in the subcommittee and in the full committee, an amendment to this bill at the appropriate time that would deny funds to the Department of Labor for enforcement of the Garcia decision until November 14, 1985, the day that the current continuing resolution expires.

There was originally in this amendment a provision to deny to the Department of Labor retroactive enforcement of Garcia. Deferring to the judgment of my colleague, the gentleman from Texas [Mr. BARTLETT], I have removed that provision from the amendment so that the matter can be worked out, as it should be worked out, by the authorizing committee. The denial of funds for retroactive enforcement could in any case have effected only Department of Labor efforts and could not have any effect on individual claims accrued in accordance with Garcia.

Hopefully, by November 14 the authorizing committee will have reported substantive legislation that effectively deals with the many problems that are posed by that decision. I would say to the gentleman on the authorizing committee that the support that I have seen and I think they have seen for my amendment is a strong indication that the people across America expect that this matter will be addressed by the committee, that they will work out the differences, and that they will bring a bill to the floor in a timely manner that does make corrections in what would otherwise occur under Garcia.

I urge them to act. There has been only one hearing held on the matter since February 19 when the decision was handed down. The second hearing is scheduled for October 15, the very day that the Department of Labor was scheduled to begin enforcement. These efforts appear insufficient to protect units of local government and their employees. Their message to the authorizing committee today is clear: bring forward proper corrective legislation.

Mr. LOEFFLER. Mr. Chairman, will the gentleman yield?

Mr. PORTER. I yield to the gentleman from Texas.

Mr. LOEFFLER. Mr. Chairman, I thank my friend, the gentleman from Illinois, for yielding, and commend him on the amendment he will offer later during the amendment process.

I, as well as the gentleman from Illinois, worked hard during the markup process to try to resolve the Garcia dilemma we all face, and I recognize that this is the best effort that we can achieve during the course of the appropriation process. Joining in support of the gentleman's amendment, I think we need to remind this body that the Garcia decision was rendered on February 19 of this year. October 15, less than 2 weeks from now, is when it is to be implemented, and this institution has not moved forward. But both the gentleman from Illinois and this gentleman from Texas are saying that if we do not move forward with the authorizing process, then we will act as we move ahead with the appropriation bills in the future.

There is just no reason for the Congress to be dragging its feet, refusing to act, when every State, every city, every local government, and every school district in this country is going to be forced to make an overtime payment in lieu of compensatory pay. What we are doing is draining the local budgets and then taking away the ability of the local governments to be able to provide services.

Mr. Chairman, in my judgment, the Garcia decision is a decision where Washington just meddled in State and local governments' business when it should not have. I thank the gentleman from Illinois and commend him for his amendment.

Mr. BARTLETT. Mr. Chairman, will the gentleman yield?

Mr. PORTER. I yield to the gentleman from Texas.

Mr. BARTLETT. Mr. Chairman, I thank the gentleman for yielding, and I very much appreciate the gentleman's persistence in this matter in assuring that the House get a chance to address this issue even in a limited way on appropriation bills today. And I commend the gentleman for his commitment to employee rights.

I would make one further point for the gentleman and for the record, and that is the point on the issue of retroactive liability. The retroactive liability that is in the Garcia decision must be resolved. It will not be resolved today, but it must be resolved in the final package. It is essential that Congress determine the specifics of compensatory time and overtime and volunteer personnel and split shift and other issues, and it is also essential that the liability for those new rules will begin only after the effective date of the legislation and not before. So whatever the final version of the legislation will be, we must remove that liability overhang that is presently retroactive back to February 19, the date of Garcia.

Today will not end the Garcia controversy, but we will make some progress by giving 30 days for additional reasonable discussion. Garcia will not go away. I hope that the committee will come back with some authorizing legislation, but whether the committee comes back or not, the Garcia decision will be and must be addressed by this body this year.

Mr. Chairman, I thank the gentleman for yielding and for his initiative.

Mr. PORTER. Mr. Chairman, I thank the gentleman for his statement, and I might say that I certainly defer to his judgment in working out substantive legislation. It is a matter for his committee and his subcommittee alone and not for the Appropriations Committee. But I remind the Members of the House that there is $3 to $4 billion of additional liability each year that would accrue to the taxpayers of State and local governments if this matter is not addressed by the authorizing committee.

The CHAIRMAN. The time of the gentleman from Illinois [Mr. PORTER] has expired.

The gentleman from Massachusetts [Mr. CONTE] has one-half minute remaining, and the gentleman from Kentucky [Mr. NATCHER] has 2 minutes remaining.

Mr. NATCHER. Mr. Chairman, I yield the balance of our time, 2 minutes to the distinguished gentleman from Massachusetts [Mr. EARLY] an able member of this subcommittee.

Mr. EARLY. Mr. Chairman, I thank the gentleman for the time.

Mr. Chairman, as a member of this subcommittee, I am delighted to be here to speak to one aspect of this particular bill. I am pleased to report on what the subcommittee on which I am very proud to serve, at the request of the gentleman from California [Mr. ROYBAL], did with regard to AIDS. What we did, I say to the Members, is we listened. We listened to the experts. The experts told us about the uncertainties of this disease and the threat of this disease.

So the subcommittee funded the $45 million in CDC to do surveys and studies in the followup of the disease. Then we listened to the experts, and we put $145 million in NIH. That was done for three reasons: First, for discovery, because no one knows what this disease is yet; second, to develop a vaccine to cure the disease; and third, to educate the people, both the public and the young people. The threat of this disease, according to the experts, is to the young people, not just to the gay community but to all of America.

This subcommittee, as the gentleman from Kentucky [Mr. NATCHER] said in his opening statement, increased the funding for AIDS 90 percent. I really urge this House not to grandstand on this particular issue. This is a threat. This is one of the biggest threats the United States ever

faced. We have increased this account 90 percent over what the President wanted. We have told the experts, "Make the discovery. Find a vaccine and educate the American people."

Mr. Chairman, I commend the gentleman from Kentucky [Mr. NATCHER] and the gentleman from Massachusetts [Mr. CONTE] especially for what they have done on this problem. I urge the Members not to grandstand on this issue, and let us face one of the most serious threats facing America.

Mr. FAZIO. Mr. Chairman, I rise to pay tribute to the hard work of the chairman of the subcommittee, the gentleman from Kentucky, and the ranking minority member of the subcommittee, the gentleman from Massachusetts, and the other members of the panel, for taking steps to provide adequate funding to combat AIDS.

The subcommittee has approved a total of $189,666,000 for all activities associated with AIDS, a full $70 million over the President's revised budget request. As we are all aware, however, the head of the Public Health Service indicated last week that the Service has requested an additional $70 million from the Office of Management and Budget. So the subcommittee's recommendation is on target in terms of addressing the real funding needs with respect to AIDS.

I commend the subcommittee for its foresight and for taking steps to ensure that research to control this deadly virus will not be restrained by a lack of funds.

On another matter, Mr. Chairman, I would just like to commend the subcommittee and its chairman and ranking minority member for their support of our efforts to send a strong signal to the Office of Management and Budget that the Congress expects OMB to release the $11.5 million it has withheld in what the Comptroller General of the United States has termed an illegal impoundment of Federal refugee assistance money.

I appreciate the chairman's efforts, and I am pleased to report to the House that in a preliminary injunction, the U.S. District Court in northern California has directed OMB to "take all steps necessary to ensure that the full sums are released forthwith and do not revert to the Treasury at the end of the fiscal year."

I am confident we will ultimately succeed in getting these funds released.

Mr. RANGEL. Mr. Chairman, I rise in support of H.R. 3424, the Departments of Labor, Health and Human Services, and Education and Related Agencies Appropriation Act, 1986. As chairman of the Select Committee on Narcotics Abuse and Control I want to comment specifically on a few of the bill's provisions that relate to drug abuse.

The bill provides $490 million for the Alcohol, Drug Abuse and Mental Health Services block grant. The block grant is the primary source of Federal funding to States to support community based drug abuse treatment and prevention programs as well as alcohol abuse and mental health services. The amount in the bill is the amount requested for 1986 by the administration. It is also the same amount appropriated in fiscal year 1985.

Since the block grant was implemented in 1982, Federal support for drug abuse services has declined by approximately 40 percent. Some States have been able to maintain the level of services by offsetting Federal cuts with increased State appropriations for drug abuse programs. Other States have been forced to close programs, denying treatment to those who need it to overcome their drug dependency and lead productive lives.

The problems created by cuts in Federal funding have been exacerbated by earmarking requirements in the block grant. For example, the 5-percent set-aside for women's substance abuse services enacted last year, while well-intentioned, has had unfortunate results. Without providing any new funding and without regard to a State's level of commitment to women's programs, the set-aside requires States to increase services for women at the expense of existing services for other needy clients, both men and women.

While treatment capacity overall has been shrinking, the demand for treatment over the past few years has been growing, fueled by the abundant supplies of heroin, cocaine, marijuana, and other dangerous drugs. Hearings held by the Select Committee in Chicago, New England, Washington, DC, and other parts of the country confirm that States cannot meet the increased need for drug abuse services and that treatment programs are already operating at over 100-percent capacity. As is always the case, those who are denied treatment are those who cannot afford to pay for expensive private care.

I support the recommended appropriation for the block grant for 1986, but it is clear that more needs to be done. Drug abuse is fast becoming our most serious national health problem, and the Federal Government bears a heavy responsibility to support State and local treatment and prevention efforts. I urge my colleagues to support H.R. 526, legislation I have introduced that will provide an additional $125 million annually for 5 years to expand State and local drug abuse treatment and prevention programs. Considering the billions of dollars that drug abuse costs in terms of increased crime, incarceration of offenders, increased health and welfare payments, increased unemployment, and a host of other social costs, we simply cannot afford to continue denying drug abuse treatment and prevention services to those who need and want such services.

H.R. 3424 also provides $65,539,000 for drug abuse research by the National Institute on Drug Abuse. This amount is $3,221,000 less than the budget request but $1,219,000 over the 1985 appropriation. It is sufficient to maintain the same level of funding for new research projects as in 1985.

Over the years, NIDA's research program has made important strides in understanding drug abuse. Some of NIDA's research findings have made important contributions to other areas of biomedical research as well. For example, NIDA-sponsored research has been responsible for unlocking some of the puzzles about how durgs work in the body and for the discoveries of opiate receptors in the brain and natural opiate-like substances in the body. NIDA's research has also led to an increased understanding of the serious health risks of drugs such as marijuana, and has helped to document the effectiveness of drug abuse treatment. Naltrexone, a new, nonaddictive drug to treat opiate dependence, was also developed with NIDA's support. NIDA is also playing an important role in investigating the links between intravenous drug use and AIDS.

A strong emphasis on drug abuse research is essential to acquire the new knowledge needed for advances in drug abuse treatement and prevention. An effective, well-coordinated research program cannot be carried out by the States and the private sector alone but needs Federal leadership and financial support. While I would like to see significantly greater amounts appropriated for NIDA's important research efforts, I urge my colleagues to support the funding provided in H.R. 3424.

I note that the bill defers funding for NIDA's research training program pending the enactment of authorizing legislation. Because maintaining an adequate number of skilled drug abuse researches is critical to continue high quality drug abuse research efforts, I urge early congressional action on this important authorization so that funding for research training programs can be considered.

Finally, I want to comment on the role of the Department of Education in drug abuse education efforts in our Nation's schools. The bill appropriates $17.5 billion for the Department of Education, approximately $2 billion more than the administration's request. At a hearing of the select committee last week on the impact of drug abuse on education and high school dropout rates, the Department of Education witness testified that only $3 million is allocated by the Department for school-based drug abuse prevention efforts through the Alcohol and Drug Abuse Education Program. Testimony received by the select committee from local school representatives who have participated in the program confirm its value. But this $3 million effort is a wholly inadequate response to the epidemic of drug abuse among our school-age children.

Numerous drug abuse prevention and education experts who have testified before the select committee have emphasized the need to incorporate drug abuse education programs in school curriculums for grades K–12. Because children often try drugs as early as the fourth and fifth grades, it is essential to reach them before they get to junior high and high school and to reinforce antidrug messages throughout their developing years. Most State and local school agencies, however, lack the resources, and oftentimes the expertise, to implement such programs.

Our children are the future of our country. Through effective drug abuse education programs in our schools, we can prevent drug abuse from destroying the lives of so many of our young people. I urge Congress and the Administration to work together to forge a strong leadership role for the Department of Education in helping schools establish sound drug education programs.

Mr. ROGERS. Mr. Chairman, I rise in strong support of the bill. I would like to begin by commending the distinguished chairman, Mr. NATCHER, and the ranking minority member for their strong leadership on this bill.

In addition, I would like to state my strong support for an amendment to be offered by my distinguished colleague from West Virginia. I understand that this amendment will add $4.5 million to provide for additional administrative law judges for the Black Lung Program.

Mr. Chairman, these administrative law judges are desperately needed. Today, there is a backlog of over 21,000 claims for black lung pending at the Department of Labor. New claims are coming in at the rate of about 5,000 cases per year. But as it now stands, they can only handle abut 5,400 cases per year. By my calculations, at that rate, it will take over 50 years to work our way through the backlog.

There is a wise saying that justice delayed is justice denied. The current delays in the adjudication of black lung cases clearly represents such a denial of justice. When Congress established the Black Lung Program, it clearly intended to provide benefits on a timely basis for miners afflicted with this terrible disease and their families. Unfortunately, today we're at the point where these individuals have to wait for years for a resolution of their claims. And I've even heard of heart-rending cases where the intended beneficiaries died before their claims were settled. Clearly, this was not how Congress intended this program to be administered.

This amendment will go a long way toward solving this serious problem. I urge my colleagues to support this bill and the amendment to add these needed funds for the Black Lung Program.

Mr. ERDREICH. Mr. Chairman, I am pleased to see the strong support in this bill for continued biomedical research, especially as related to our battle against cancer. This administration's goal of reducing cancer mortality in the United States by 50 percent by the year 2000 is certainly a positive step.

As you know, Mr. Chairman, the cancer centers of this country play a strong role in this effort, and each day new research and developments at these centers brings us closer to that goal. I am concerned about what I understand is an effort to reduce levels of funding for some of these centers. Not only will this action threaten cancer research, but, because these reductions have not been applied fairly to all centers, and because they disregard peer review recommendations, its effect is to undermine the integrity of the merit-based peer review system, a system that, as you know Mr. Chairman, is viewed as one of the most rational and effective systems for allocating limited Federal dollars.

Our center in Alabama received its review a year ago. This review recommended with enthusiasm the renewal of the grant. Also recognized were exemplary interdisciplinary coordination and superb organizational capabilities and facilities. New programs of cancer research were recommended and have been developed at our center. The first centers funded last year received 95 percent of their recommended levels, but when it came to UAB and six other centers, NCI set their approved funding levels at a much lower percentage. As a result, we understand that wide variations exist presently in funding levels among the cancer centers funded in fiscal year 1985.

Last year our colleagues in the other body attempted to address this problem by expressing a desire "that these cancer core grants be funded at full peer review levels." Unfortunately the administration ignored the committee's directive. This year we understand that the other body will once again address this problem in even stronger terms. We ask, Mr. Chairman, that in your conference on this bill, you closely consider the Senate language with a view toward seeing that all centers are treated fairly and equitably, and that the integrity of the peer review process be maintained.

Mr. FORD of Tennessee. Mr. Chairman, I rise today in support of the provisions within H.R. 3424 that appropriate the necessary moneys to administer programs under the Job Training Partnership Act [JTPA], including the Job Corps Program.

There are a vast number of disadvantaged and dislocated workers in our country today. However, it is well documented that a disproportionate number of disadvantaged and dislocated workers are not sufficiently benefiting from the Federal job training programs designed to serve them.

The reasons range from problems in the structure of the JTPA itself, to deficiencies in local implementation that demonstrate both a lack of understanding of the special needs of disadvantaged and dislocated persons and, in some instances outright discrimination.

Until these persons needs are met more effectively, the stated goals of the JTPA to reduce welfare rolls and unemployment will never be reached.

Mr. Chairman, the programs are simply not serving the persons they were designed to serve. There appears to be a total lack of understanding on the part of the Department of Labor officials, private industry councils, and others concerned with the implementation of the JTPA.

Some of these problems arise when those responsible for the implementation of the programs, attempt to treat all workers in a similar manner, although their basic needs are entirely different.

The JTPA is clearly taking the wrong direction when it concentrates on such things as short-term exposure to job search techniques and résumé writing. This is not the correct approach for welfare mothers, battered women, the disadvantaged, and most dislocated workers.

People who have work skills do not have the same needs as those who are burdened by serious disadvantages, multiple deterrents and no work history. JTPA does not seem to allow for these differences. It prefers the quick-fix approach that yields low-paying, exploitative work, with negligible opportunities for upward mobility.

TPA programs tend to be structured to deal with the trainee who is motivated, has skills, is practically job ready and needs little support services or remedial assistance. Program administrators can relate to this trainee profile, but have little sensitivity to the larger pool of economically disadvantaged for whom the legislation was supposedly enacted.

Mr. Chairman, as chairman of the Subcommittee on Public Assistance and Unemployment Compensation, I am confronted with statistics that show the poverty levels in this country swelling on a daily basis.

The statistics indicate that two out of very three persons below the poverty level are women, and half the families below the poverty level are headed by single women.

However, even with the disproportionate number of women in poverty, and in low-paying jobs, JTPA data indicates the job training programs, designed to serve this group, have been neither equitable nor effective.

Mr. Chairman, these facts I have presented are truely troublesome, not only to the persons in need of these programs, but to society as a whole. Chronic joblessness and poverty mean heavier economic burdens for us all.

Therefore I ask my colleagues to support the funding of these programs. However, we must hold accountable those responsible for the implementation of these programs.

We must make certain these programs are consistently monitored and that training assistance is provided for those workers who are most in need.

We must see that these needs are met and that persons who want to work can work and become self-sufficient. It will be less costly to society in the long run to make the types of long-term training investments most likely to produce positive results.

Mr. HOYER. Mr. Chairman, the health consequences of the medical disorders and health-related behaviors in the Alcohol, Drug Abuse, and Mental Health Administration [ADAMHA] domain are immense. This legislation also provides over $900 million for the ADAMHA, an increase of $36 million over the President's budget request. Mental disorders and addictive states cause personal, economic, and social upheaval and conservative estimates suggest that mental disorders and addictions directly afflict 30 to 45 million people and cost $185 billion annually. In direct health-care expenditures the annual cost is $20 billion and the indirect costs to society—(including lost productivity, social services, and crime control)—are estimated at $165 billion. The committee has provided $329 mil-

lion to initiate high priority research into some very promising areas of investigation in mental illness, alcoholism, and drug abuse.

As my colleagues know, the Nation has made remarkable progress in understanding, preventing and treating mental illness and addictive disorders and highly promising directions for future advances are on the horizon. I personally am confident that the research community is ready for substantial progress and that the funds we have provided in this bill will yield valuable dividends. The prestigious institute of Medicine of the National Academy of Sciences released a landmark report on the status of ADAMHA-supported research and concluded that a doubling of the Federal investment in this area over the next 5 years is necessary based on the magnitude of the mission. Many public witnesses testified in support of the IOM recommendations during our hearings on this bill including, for example, the American Psychiatric Association, a medical specialty society who has taken a leadership role in advocating for responsible and well justified increased Federal support for ADAMHA research, training and service programs. While fiscal pressures prevented us from recommending greater budgetary support this year, I am confident that in subsequent years we can begin the necessary program growth. Research support is cost effective; a failure to invest in research today can cost much more in the future.

Mr. FORD of Tennessee. Mr. Chairman, I rise today to voice my support for continued Federal student aid programs, especially the Pell grants. These financial aid programs gives millions of low- and middle-income students the opportunity of a college education that they might not otherwise have.

This appropriation bill does not reduce the financial aid budget by the $1.34 billion as the administration would like. It does, however, fund the student aid programs at the fiscal year 1985 level of $4.9 billion. The young men and women of this country need this continued support.

President Reagan has implored our youth "to hitch your wagon to a shooting star." Well, Mr. President, a college education and the opportunities that it brings is a falling star for the many young people who cannot afford the cost of a degree these days.

By the Federal Government providing a small subsidy to enable someone to go to college, the taxpayer will be reaping a double dividend. Over a 40-year working lifetime, a college gradutate will contribute an extra $86,000 in tax revenue to the Federal Government.

The investment in an educated, technically competent society is essential if the United States is to compete, much less lead, a world into the 21st century.

I urge my collegues on both sides of the isle to support the appropriations on financial assistance. We owe it to ourselves as well as our children to continue financial support to deserving students across the land.

Mr. TRAFICANT. Mr. Chairman, as we consider H.R. 3424, the Labor-HHS-Education appropriations, I would like to express my deep concern over previous HHS funding of the Head Injury Clinical Research Center at the University of Pennsylvania. Given the gross abuses and inhumane practices that occurred at that facility in recent years, I was gratified to learn that HHS had terminated funding of this clinic and that the clinic has been closed down.

I rise today to reassert to my colleagues that this clinic must remain closed and that HHS should not—under any circumstances—renew funding for this clinic. I want to stress the point that I am not against animal research, but I am adamantly opposed to animal cruelty and inhumanity. I believe that the limited funds that HHS has to work with for medical research should be funneled into research efforts that are productive and conducted under humane conditions. An examination of the practices at the Head Injury Clinical Research [HICRC] at the University of Pennsylvania reveals a abhorrent record of animal abuse and mistreatment.

In September 1985, the Department of Agriculture found the University of Pennsylvania guilty of violating regulations of the Animal Welfare Act. Those violations occurred through experiments conducted at the HICRC in which a test animal's head was encased in a hard plastic helment, its head positioned in a machine that delivered a piston blow, after which the helmet was chipped off with a hammer and screwdriver. Horrifyingly enough, these animals were forced to have their heads bashed in while unanesthetized. This type of inhumane treatment was in clear violation of the Animal Welfare Act, and, sadly, it was typical of the inhumane practices undertaken at the HICRC before it was closed down and funds were justifiably cut off.

New evidence reveals that as far back as 1982, experiments at the HICRC were halted by the dean of the school of medicine because of flagrant violations of National Institutes of Health [NIH] standards. Evidence has shown that between 1982 and 1985 flagrant violations of both the Animal Welfare Act and NIH continued at the HICRC. After 3 years of subjecting animals to cruel, inhumane, and irresponsible experiments, the clinic has finally been closed down and government funds have finally been cut off. Given their track record, I feel that both the shutdown and cutoff off of funds should remain in effect. I was pleased to join over 30 of my colleagues in an effort to ensure the cut off of HHS funds. I want to state again that I am not against animal research—only research that employs cruel and inhumane methods.

I want to applaud all of my colleagues who got involved in this effort and I want to commend their efforts to uphold the important standards and regulations set forth in the Animal Welfare Act.

Mr. FRENZEL. Mr. Chairman, I would like to applaud the Appropriations Committee for bringing forth a bill that appears to conform to the budget resolution, and even to freeze funding at last year's level. There will be some slippage when we add funds for programs awaiting authorization and when we supplement this bill's insufficient funding for student financial aid. But even with these anticipated shortfalls added in, the bill falls within the subcommittee's budget target.

All too often we fail to meet our own budget requirements. In that regard, at least, this bill is satisfactory. That is the good news of this bill.

The bad news is that the bill fails to achieve any real savings from the previous year. The bill's totals are $3.5 billion below the fiscal year 1985 level, but that savings is in fact an illusion. Last year we made a one-time payment of $3.5 billion to the Social Security Trust Fund to compensate for the inclusion of pre-1957 military service credits. With that one-time expenditure subtracted from last year's total, what remains is a freeze. We will fail to hold that level when we experience the inevitable cost overruns from which we cannot seem to escape.

I am particularly nervous about the likely need for a supplemental to meet a possible future shortfall in funding for supplemental security income. The size of the supplemental will depend on legislative changes now being considered by the Committee on Ways and Means, but it seems likely that we will need to add a considerable expense. That pretty much destroys the illusion of fiscal responsibility in this bill.

The bottom line as presented by the committee is vastly improved over past performances, and for that I am grateful. But the true bottom line will once again indicate a missed opportunity to cut spending and attack the deficit. For that reason I shall vote against this bill.

□ 1415

Mr. CONTE. Mr. Chairman, I have no further requests for time, and I yield back the balance of my time.

The CHAIRMAN. All time has expired.

The Clerk will read.

The Clerk read as follows:

H.R. 3424

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the following sums are appropriated, out of any money in the Treasury not otherwise appropriated, for the Departments of Labor, Health and Human Services, and Education, and related agencies for the fiscal year ending September 30, 1986, and for other purposes, namely:

Mr. NATCHER (during the reading). Mr. Chairman, I ask unanimous consent that the remainder of the bill be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

The text of the remainder of the bill, beginning with title I, is as follows:

TITLE I—DEPARTMENT OF LABOR

EMPLOYMENT AND TRAINING ADMINISTRATION

PROGRAM ADMINISTRATION

For expenses of administering employment and training programs, $68,355,000, together with not to exceed $42,243,000 which may be expended from the Employment Security Administration account in the Unemployment Trust Fund.

TRAINING AND EMPLOYMENT SERVICES

For expenses necessary to carry into effect the Job Training Partnership Act, including the purchase and hire of passenger motor vehicles, the construction, alteration, and repair of buildings and other facilities, and the purchase of real property for training centers as authorized by the Job Training Partnership Act, $3,521,045,000 plus reimbursements, to be available for obligation for the period July 1, 1986, through June 30, 1987, including $2,000,000 for the National Commission for Employment Policy, including $3,000,000 for all activities conducted by and through the National Occupational Information Coordinating Committee under the Job Training Partnership Act, and including $10,000,000 for service delivery areas under section 101(a)(4)(A)(iii) of the Job Training Partnership Act in addition to amounts otherwise provided under sections 202 and 251(b) of the Act: *Provided*, That no funds from any other appropriation shall be used to provide meal services at or for Job Corps centers: *Provided further*, That of the funds made available for obligation for the Summer Youth Employment and Training Program for the program years 1985 and 1986 the Secretary of Labor may reserve an amount, which, when combined with excess unexpended funds, shall not exceed fifteen percent of the total provided for the program, and allot such funds to the States so that each service delivery area receives, as nearly as possible, an amount equal to its prior year allocation for this program. For the purposes of this provision, "excess unexpended funds" shall mean for program year 1985, any amount unexpended as of September 30, 1985, in excess of 10 percent of the prior year State allotment, and for program year 1986, any amount unexpended as of September 30, 1986, in excess of 10 percent of the prior year State allotment. Reallocations of excess unexpended funds pursuant to this provision shall be accomplished by reducing, by an amount equivalent to the amount of excess unexpended funds, allotments made to the States.

For the summer youth employment and training program authorized by the Job Training Partnership Act, $100,000,000, in addition to amounts otherwise provided herein for these purposes, to be available for obligation for the period July 1, 1985, through June 30, 1986.

COMMUNITY SERVICE EMPLOYMENT FOR OLDER AMERICANS

To carry out the activities for national grants or contracts with public agencies and public or private nonprofit organizations under paragraph (1)(A) of section 506(a) of title V of the Older Americans Act of 1965, as amended, $254,280,000.

To carry out the activities for grants to States under paragraph (3) of section 506(a) of title V of the Older Americans Act of 1965, as amended, $71,720,000.

FEDERAL UNEMPLOYMENT BENEFITS AND ALLOWANCES

For payments during the current fiscal year of benefits and payments as authorized by title II of Public Law 95-250, as amended, and of trade adjustment benefit payments and allowances, as provided by law (part I, subchapter B, chapter 2, title II of the Trade Act of 1974, as amended) $10,000,000, together with such amounts as may be necessary to be charged to the subsequent appropriation for payments for any period subsequent to September 15 of the current year: *Provided*, That amounts received or recovered pursuant to section 208(e) of Public Law 95-250 shall be available for payments.

STATE UNEMPLOYMENT INSURANCE AND EMPLOYMENT SERVICE OPERATIONS

For activities authorized by the Act of June 6, 1933, as amended (29 U.S.C. 49-49l-1; 39 U.S.C. 3202(a)(1)(E)); title III of the Social Security Act, as amended (42 U.S.C. 502-504); necessary administrative expenses for carrying out 5 U.S.C. 8501-8523, and sections 231-235 and 243-244, title II of the Trade Act of 1974, as amended; and as authorized by section 7c of the Act of June 6, 1933, as amended, necessary administrative expenses under sections 101(a)(15)(H)(ii) and 212(a)(14) of the Immigration and Nationality Act, as amended (8 U.S.C. 1101 et seq.), and section 51 of the Internal Revenue Code of 1954, as amended (26 U.S.C. 51), notwithstanding section 261(f)(2)(A) of the Economic Recovery Tax Act of 1981, as amended, $23,600,000, together with not to exceed $2,459,940,000 which may be expended from the Employment Security Administration account in the Unemployment Trust Fund, and of which $22,700,000 together with not to exceed $778,000,000 of the amount which may be expended from said trust fund shall be available for obligation for the period July 1, 1986, through June 30, 1987, to fund activities under section 6 of the Act of June 6, 1933, as amended, including the cost of penalty mail made available to States in lieu of allotments for such purpose, and of which $278,732,000 shall be available only to the extent necessary to administer unemployment compensation laws to meet increased costs of administration resulting from changes in a State law or increases in the number of unemployment insurance claims filed and claims paid or increased salary costs resulting from changes in State salary compensation plans embracing employees of the State generally over those upon which the State's basic allocation was based, which cannot be provided for by normal budgetary adjustments.

ADVANCES TO THE UNEMPLOYMENT TRUST FUND AND OTHER FUNDS

For repayable advances to the Unemployment Trust Fund as authorized by sections 905(d) and 1203 of the Social Security Act, as amended, and to the Black Lung Disability Trust Fund as authorized by section 9501(c)(1) of the Internal Revenue Code of 1954, as amended, and for nonrepayable advances to the Unemployment Trust Fund as authorized by section 8509 of title 5, United States Code, and to the "Federal unemployment benefits and allowances" account, to remain available until September 30, 1987, $465,000,000.

LABOR-MANAGEMENT SERVICES

SALARIES AND EXPENSES

For necessary expenses for Labor-Management Services, $57,505,000.

PENSION BENEFIT GUARANTY CORPORATION

PENSION BENEFIT GUARANTY CORPORATION FUND

The Pension Benefit Guaranty Corporation is authorized to make such expenditures, including financial assistance authorized by section 104 of Public Law 96-364, within limits of funds and borrowing authority available to such Corporation, and in accord with law, and to make such contracts and commitments without regard to fiscal year limitations as provided by section 104 of the Government Corporation Control Act, as amended (31 U.S.C. 9104), as may be necessary in carrying out the program through September 30, 1986, for such Corporation: *Provided*, That not to exceed $33,040,000 shall be available for administrative expenses of the Corporation.

EMPLOYMENT STANDARDS ADMINISTRATION

SALARIES AND EXPENSES

For necessary expenses for the Employment Standards Administration, including reimbursement to State, Federal, and local agencies and their employees for inspection services rendered, $191,118,000, together with $406,000, which may be expended from the Special Fund in accordance with sections 39(c) and 44(j) of the Longshoremen's and Harbor Workers' Compensation Act.

SPECIAL BENEFITS

(INCLUDING TRANSFER OF FUNDS)

For the payment of compensation, benefits, and expenses (except administrative expenses) accruing during the current or any prior fiscal year authorized by title V, chapter 81 of the United States Code; continuation of benefits as provided for under the head "Civilian War Benefits" in the Federal Security Agency Appropriation Act, 1947; the Employees' Compensation Commission Appropriation Act, 1944; and sections 4(c) and 5(f) of the War Claims Act of 1948 (50 U.S.C. App. 2012); and 50 per centum of the additional compensation and benefits required by section 10(h) of the Longshoremen's and Harbor Workers' Compensation Act, as amended, $259,500,000, together with such amounts as may be necessary to be charged to the subsequent year appropriation for the payment of compensation and other benefits for any period subsequent to September 15 of the current year: *Provided*, That in addition there shall be transferred from the Postal Service fund to this appropriation such sums as the Secretary of Labor determines to be the cost of administration for Postal Service employees through September 30, 1986.

BLACK LUNG DISABILITY TRUST FUND

For payments from the Black Lung Disability Trust Fund, $984,022,000, of which $942,868,000 shall be available until September 30, 1987, for payment of all benefits and interest on advances under subsection (c)(2) of section 9501 of the Internal Revenue Code of 1954, as amended, as authorized by section 9501(d) (1), (2), (4), and (7) of that Act and of which $25,481,000 shall be available for transfer to Employment Standards Administration, Salaries and Expenses, and $15,297,000 for transfer to Departmental Management, Salaries and Expenses, and $376,000 for transfer to Departmental Management, Office of Inspector General, for expenses of operation and administration of the Black Lung Benefits program as authorized by section 9501(d)(5)(A) of that Act: *Provided*, That in addition, such amounts as may be necessary may be charged to the subsequent year appropriation for the pay-

ment of compensation, other benefits, or interest on advances for any period subsequent to June 15 of the current year: *Provided further,* That in addition, such amounts shall be paid from this fund into miscellaneous receipts as the Secretary of the Treasury determines to be the administrative expenses of the Department of the Treasury for administering the fund during the current fiscal year, as authorized by section 9501(d)(5)(B) of that Act.

OCCUPATIONAL SAFETY AND HEALTH ADMINISTRATION

SALARIES AND EXPENSES

For necessary expenses for the Occupational Safety and Health Administration, $218,045,000, including not to exceed $53,021,000, which shall be the maximum amount available for grants to States under section 23(g) of the Occupational Safety and Health Act, which grants shall be no less than fifty percent of the costs of State occupational safety and health programs required to be incurred under plans approved by the Secretary under section 18 of the Occupational Safety and Health Act of 1970: *Provided,* That none of the funds appropriated under this paragraph shall be obligated or expended for the assessment of civil penalties issued for first instance violations of any standard, rule, or regulation promulgated under the Occupational Safety and Health Act of 1970 (other than serious, willful, or repeated violations under section 17 of the Act) resulting from the inspection of any establishment or workplace subject to the Act, unless such establishment or workplace is cited, on the basis of such inspection, for ten or more violations: *Provided further,* That none of the funds appropriated under this paragraph shall be obligated or expended to prescribe, issue, administer, or enforce any standard, rule, regulation, or order under the Occupational Safety and Health Act of 1970 which is applicable to any person who is engaged in a farming operation which does not maintain a temporary labor camp and employs ten or fewer employees: *Provided further,* That none of the funds appropriated under this paragraph shall be obligated or expended to prescribe, issue, administer, or enforce any standard, rule, regulation, order or administrative action under the Occupational Safety and Health Act of 1970 affecting any work activity by reason of recreational hunting, shooting, or fishing: *Provided further,* That no funds appropriated under this paragraph shall be obligated or expended to administer or enforce any standard, rule, regulation, or order under the Occupational Safety and Health Act of 1970 with respect to any employer of ten or fewer employees who is included within a category having an occupational injury lost work day case rate, at the most precise Standard Industrial Classification Code for which such data are published, less than the national average rate as such rates are most recently published by the Secretary, acting through the Bureau of Labor Statistics, in accordance with section 24 of that Act (29 U.S.C. 673), except—

(1) to provide, as authorized by such Act, consultation, technical assistance, educational and training services, and to conduct surveys and studies;

(2) to conduct an inspection or investigation in response to an employee complaint, to issue a citation for violations found during such inspection, and to assess a penalty for violations which are not corrected within a reasonable abatement period and for any willful violations found;

(3) to take any action authorized by such Act with respect to imminent dangers;

(4) to take any action authorized by such Act with respect to health hazards;

(5) to take any action authorized by such Act with respect to a report of an employment accident which is fatal to one or more employees or which results in hospitalization of five or more employees, and to take any action pursuant to such investigation authorized by such Act; and

(6) to take any action authorized by such Act with respect to complaints of discrimination against employees for exercising rights under such Act:

Provided further, That the foregoing proviso shall not apply to any person who is engaged in a farming operation which does not maintain a temporary labor camp and employs ten or fewer employees: *Provided further,* That none of the funds appropriated under this paragraph shall be obligated or expended for the proposal or assessment of any civil penalties for the violation or alleged violation by an employer of ten or fewer employees of any standard, rule, regulation, or order promulgated under the Occupational Safety and Health Act of 1970 (other than serious, willful or repeated violations and violations which pose imminent danger under section 13 of the Act) if, prior to the inspection which gives rise to the alleged violation, the employer cited has (1) voluntarily requested consultation under a program operated pursuant to section 7(c)(1) or section 18 of the Occupational Safety and Health Act of 1970 or from a private consultative source approved by the Administration and (2) had the consultant examine the condition cited and (3) made or is in the process of making a reasonable good faith effort to eliminate the hazard created by the condition cited as such, which was identified by the aforementioned consultant, unless changing circumstances or workplace conditions render inapplicable the advice obtained from such consultants: *Provided further,* That none of the funds appropriated under this paragraph may be obligated or expended for any State plan monitoring visit by the Secretary of Labor under section 18 of the Occupational Safety and Health Act of 1970, of any factory, plant, establishment, construction site, or other area, workplace or environment where such a workplace or environment has been inspected by an employee of a State acting pursuant to section 18 of such Act within the six months preceding such inspection: *Provided further,* That this limitation does not prohibit the Secretary of Labor from conducting such monitoring visit at the time and place of an inspection by an employee of a State acting pursuant to section 18 of such Act, or in order to investigate a complaint about State program administration including a failure to respond to a worker complaint regarding a violation of such Act, or in order to investigate a discrimination complaint under section 11(c) of such Act, or as part of a special study monitoring program, or to investigate a fatality or catastrophe: *Provided further,* That none of the funds appropriated under this paragraph may be obligated or expended for the inspection, investigation, or enforcement of any activity occurring on the Outer Continental Shelf which exceeds the authority granted to the Occupational Safety and Health Administration by any provision of the Outer Continental Shelf Lands Act, or the Outer Continental Shelf Lands Act Amendments of 1978.

MINE SAFETY AND HEALTH ADMINISTRATION

SALARIES AND EXPENSES

For necessary expenses for the Mine Safety and Health Administration, $150,215,000, including purchase and bestowal of certificates and trophies in connection with mine rescue and first-aid work, and the purchase of not to exceed fifty-two passenger motor vehicles for replacement only; the Secretary is authorized to accept lands, buildings, equipment, and other contributions from public and private sources and to prosecute projects in cooperation with other agencies, Federal, State, or private; the Mine Safety and Health Administration is authorized to promote health and safety education and training in the mining community through cooperative programs with States, industry, and safety associations; and any funds available to the Department may be used, with the approval of the Secretary, to provide for the costs of mine rescue and survival operations in the event of major disaster: *Provided,* That none of the funds appropriated under this paragraph shall be obligated or expended to carry out section 115 of the Federal Mine Safety and Health Act of 1977 or to carry out that portion of section 104(g)(1) of such Act relating to the enforcement of any training requirements, with respect to shell dredging, or with respect to any sand, gravel, surface stone, surface clay, colloidal phosphate, or surface limestone mine.

BUREAU OF LABOR STATISTICS

SALARIES AND EXPENSES

For necessary expenses for the Bureau of Labor Statistics, including advances or reimbursements to State, Federal, and local agencies and their employees for services rendered, $158,616,000, of which $13,258,000 shall be for expenses of revising the Consumer Price Index, together with not to exceed $36,309,000, which may be expended from the Employment Security Administration account in the Unemployment Trust Fund: *Provided,* That $5,848,000 shall remain available until September 30, 1987.

DEPARTMENTAL MANAGEMENT

SALARIES AND EXPENSES

For necessary expenses for Departmental Management, including $2,136,000 for the President's Committee on Employment of the Handicapped, $99,037,000, together with not to exceed $252,000 which may be expended from the Employment Security Administration account in the Unemployment Trust Fund.

ASSISTANT SECRETARY FOR VETERANS EMPLOYMENT AND TRAINING

Not to exceed $124,485,000 may be derived from the Employment Security Administration account in the Unemployment Trust Fund to carry out the provisions of 38 U.S.C. 2001-08 and 2021-26.

OFFICE OF THE INSPECTOR GENERAL

For salaries and expenses of the Office of the Inspector General in carrying out the provisions of the Inspector General Act of 1978, $39,323,000, together with not to exceed $4,300,000 which may be expended from the Employment Security Administration account in the Unemployment Trust Fund.

SPECIAL FOREIGN CURRENCY PROGRAM

For payments in foreign currencies which the Treasury Department determines to be excess to the normal requirements of the United States, for necessary expenses of the Department of Labor, as authorized by law,

$47,000, to remain available until expended. This appropriation shall be available in addition to other appropriations to such agency for payments in foreign currencies.

GENERAL PROVISIONS

SEC. 101. Appropriations in this Act available for salaries and expenses shall be available for supplies, services, and rental of conference space within the District of Columbia, as the Secretary of Labor shall deem necessary for settlement of labor-management disputes.

SEC. 102. None of the funds appropriated under this Act shall be used to grant variances, interim orders or letters of clarification to employers which will allow exposure of workers to chemicals or other workplace hazards in excess of existing Occupational Safety and Health Administration standards for the purpose of conducting experiments on workers' health or safety.

This title may be cited as the "Department of Labor Appropriation Act, 1986".

TITLE II—DEPARTMENT OF HEALTH AND HUMAN SERVICES

HEALTH RESOURCES AND SERVICES ADMINISTRATION

HEALTH RESOURCES AND SERVICES

For carrying out titles III, VII, VIII, and XXI of the Public Health Service Act, and section 427(a) of the Federal Coal Mine Health and Safety Act, and title V of the Social Security Act, $564,853,000, of which $2,500,000 shall be available only for payments to the State of Hawaii for care and treatment of persons afflicted with Hansen's disease; of which $750,000 to be available until expended, shall be used to renovate the National Hansen's Disease Center; and of which $1,200,000 shall remain available until expended for interest subsidies on loan guarantees made prior to fiscal year 1981 under part B of title VII of the Public Health Service Act: *Provided*, That this appropriation shall be available for payment of the costs of medical care, related expenses, and burial expenses hereafter incurred by or on behalf of any person who has participated in the study of untreated syphilis initiated in Tuskegee, Alabama, in 1932, in such amounts and subject to such terms and conditions as prescribed by the Secretary of Health and Human Services and for payment, in such amounts and subject to such terms and conditions, of such costs and expenses hereafter incurred by or on behalf of such person's wife or offspring determined by the Secretary to have suffered injury or disease from syphilis contracted from such person: *Provided further*, That when the Department of Health and Human Services administers or operates an employee health program for any Federal department or agency, payment for the full estimated cost shall be made by way of reimbursement or in advance to this appropriation: *Provided further*, That none of the funds made available by this Act shall be used to provide special retention pay (bonuses) under paragraph (4) of 37 U.S.C. 302(a) to any regular or reserve officer of the Public Health Service for any period during which the officer is providing obligated service under section 338B (or under former sections 225(e) or 752) of the Public Health Service Act except that this proviso shall not apply to any period of service covered by an agreement entered into by an officer under 37 U.S.C. 302(c)(1) before the date of enactment of Public Law 97-377: *Provided further*, That in addition to the amounts provided herein, $15,750,000 shall be available to the Health Resources and Services Administration from reimbursements from other Federal Agencies and Departments for the operation of employee occupational health programs under 5 U.S.C. 7901.

MEDICAL FACILITIES GUARANTEE AND LOAN FUND

FEDERAL INTEREST SUBSIDIES FOR MEDICAL FACILITIES

For carrying out subsections (d) and (e) of section 1602 of the Public Health Service Act, $25,000,000 together with any amounts received by the Secretary in connection with loans and loan guarantees under the Public Health Service Act, to be available without fiscal year limitation for the payment of interest subsidies. During the fiscal year no commitments for direct loans, or loan guarantees shall be made.

HEALTH MAINTENANCE ORGANIZATION LOAN AND LOAN GUARANTEE FUND

Any amounts received by the Secretary in connection with loans and loan guarantees under title XIII of the Public Health Service Act, and not to exceed $700,000, may be disbursed with respect to any liability or contingent liability incurred prior to 1985.

CENTERS FOR DISEASE CONTROL

DISEASE CONTROL

(INCLUDING TRANSFER OF FUNDS)

To carry out titles III and XIX and section 1102 of the Public Health Service Act, sections 101, 102, 103, 201, 202, and 203 of the Federal Mine Safety and Health Act of 1977, and sections 20, 21, and 22 of the Occupational Safety and Health Act of 1970; including insurance of official motor vehicles in foreign countries; and hire, maintenance, and operation of aircraft, $441,194,000, of which $3,797,000 shall remain available until expended for equipment and construction and renovation of facilities: *Provided*, That training of employees of private agencies shall be made subject to reimbursement or advances to this appropriation for the full cost of such training: *Provided further*, That not to exceed $1,266,000 in collections from user fees, including collections from training and reimbursements and advances for the full cost of proficiency testing of private clinical laboratories, may be credited to this appropriation: *Provided further*, That $10,000,000 shall be derived from unobligated balances provided under Public Law 94-266 for national influenza immunization.

NATIONAL INSTITUTES OF HEALTH

NATIONAL CANCER INSTITUTE

For carrying out section 301 of the Public Health Service Act with respect to cancer, $1,221,590,000.

NATIONAL HEART, LUNG, AND BLOOD INSTITUTE

For carrying out section 301 and section 1105 of the Public Health Service Act with respect to cardiovascular, lung, and blood diseases, and blood and blood products, $812,882,000.

NATIONAL INSTITUTE OF DENTAL RESEARCH

For carrying out section 301 of the Public Health Service Act with respect to dental diseases, $97,691,000.

NATIONAL INSTITUTE OF ARTHRITIS, DIABETES, AND DIGESTIVE AND KIDNEY DISEASES

For carrying out section 301 of the Public Health Service Act with respect to arthritis, diabetes, and digestive and kidney diseases, $541,298,000.

NATIONAL INSTITUTE OF NEUROLOGICAL AND COMMUNICATIVE DISORDERS AND STROKE

For carrying out section 301 of the Public Health Service Act with respect to neurological and communicative disorders and stroke, $418,590,000.

NATIONAL INSTITUTE OF ALLERGY AND INFECTIOUS DISEASES

For carrying out section 301 of the Public Health Service Act with respect to allergy and infectious diseases, $371,941,000.

NATIONAL INSTITUTE OF GENERAL MEDICAL SCIENCES

For carrying out section 301 of the Public Health Service Act with respect to general medical sciences, $455,593,000.

NATIONAL INSTITUTE OF CHILD HEALTH AND HUMAN DEVELOPMENT

For carrying out section 301 of the Public Health Service Act with respect to child health and human development, $306,812,000.

NATIONAL EYE INSTITUTE

For carrying out section 301 and part F of title IV of the Public Health Service Act with respect to eye diseases and visual disorders, $188,988,000.

NATIONAL INSTITUTE OF ENVIRONMENTAL HEALTH SCIENCES

For carrying out sections 301 and 311 of the Public Health Service Act with respect to environmental health sciences, $188,319,000.

NATIONAL INSTITUTE ON AGING

For carrying out section 301 of the Public Health Service Act with respect to aging, $149,067,000.

RESEARCH RESOURCES

For carrying out section 301 of the Public Health Service Act with respect to research resources and general research support grants, $304,579,000: *Provided*, That none of these funds, with the exception of funds for the Minority Biomedical Research Support program, shall be used to pay recipients of the general research support grants program any amount for indirect expenses in connection with such grants.

JOHN E. FOGARTY INTERNATIONAL CENTER

For carrying out the activities at the John E. Fogarty International Center, $11,529,000, of which $1,999,000 shall be available for payment to the Gorgas Memorial Institute for maintenance and operation of the Gorgas Memorial Laboratory.

NATIONAL LIBRARY OF MEDICINE

For carrying out section 301 with respect to health information communications and part I of title III of the Public Health Service Act, $46,972,000.

OFFICE OF THE DIRECTOR

For carrying out the responsibilities of the Office of the Director, National Institutes of Health, $117,085,000, including purchase of not to exceed ten passenger motor vehicles for replacement only.

BUILDINGS AND FACILITIES

For construction of, and acquisition of sites and equipment for, facilities of or used by the National Institutes of Health, $14,900,000, to remain available until expended.

ALCOHOL, DRUG ABUSE, AND MENTAL HEALTH ADMINISTRATION

ALCOHOL, DRUG ABUSE, AND MENTAL HEALTH

For carrying out the Public Health Service Act with respect to mental health, drug

abuse, alcohol abuse, and alcoholism, $903,637,000 of which $100,000 for design, modernization, and improvement of government owned or leased intramural research facilities shall remain available until expended.

FEDERAL SUBSIDY FOR SAINT ELIZABETHS HOSPITAL

For a portion of the cost of the maintenance and operation of Saint Elizabeths Hospital in the District of Columbia $43,696,000: *Provided,* That in fiscal year 1986 and thereafter the maximum amount available to Saint Elizabeths Hospital from Federal sources shall not exceed the total of the following amounts: the appropriations made under this heading, amounts billed to Federal agencies and entities by the Secretary of Health and Human Services for services provided at Saint Elizabeths Hospital, and amounts authorized by titles XVIII and XIX of the Social Security Act: *Provided further,* That this amount shall not include Federal funds appropriated to the District of Columbia under "Federal Payment to the District of Columbia" and payments made pursuant to section 9(c) of Public Law 98-621: *Provided further,* That the Secretary of Health and Human Services may set rates which in the aggregate do not exceed the estimated total cost of inpatient and outpatient services provided through Saint Elizabeths Hospital as authorized by title 16, sections 2315 and 2320, title 21, sections 511, 513, 522, 545, 902, and 1116, and title 24, sections 301 and 302 of the District of Columbia Code, and may bill and collect from (prospectively or otherwise) individuals, the District of Columbia and other entities for any services so provided: *Provided further,* That the Secretary of Health and Human Services may set rates which in the aggregate do not exceed the estimated total cost of inpatient and outpatient services provided through Saint Elizabeths Hospital as authorized by title 24, sections 191, 196, 211, 212, 222, 253, and 324, title 31, section 1535, and title 42, sections 249 and 251 of the United States Code, and may bill and collect (prospectively or otherwise) from individuals, and Federal agencies, and other entities for any services so provided. Amounts so collected shall be credited to the appropriation for Saint Elizabeths Hospital and shall remain available until expended.

OFFICE OF ASSISTANT SECRETARY FOR HEALTH

PUBLIC HEALTH SERVICE MANAGEMENT

For the expenses necessary for the Office of Assistant Secretary for Health and for carrying out title III of the Public Health Service Act, $87,621,000, together with not to exceed $1,050,000 to be transferred and expended as authorized by section 201(g) of the Social Security Act, from the Federal Hospital Insurance and the Federal Supplementary Medical Insurance Trust Funds referred to therein and, in addition, amounts collected by the National Center for Health Statistics from the sale of data tapes shall be credited to this appropriation and shall remain available until expended.

RETIREMENT PAY AND MEDICAL BENEFITS FOR COMMISSIONED OFFICERS

For retirement pay and medical benefits of Public Health Service Commissioned Officers as authorized by law, and for payments under the Retired Serviceman's Family Protection Plan and Survivor Benefit Plan and for medical care of dependents and retired personnel under the Dependents' Medical Care Act (10 U.S.C., ch. 55), such amounts as may be required during the current fiscal year.

HEALTH CARE FINANCING ADMINISTRATION

GRANTS TO STATES FOR MEDICAID

For carrying out, except as otherwise provided, title XIX of the Social Security Act, $17,710,469,000, to remain available until expended.

For making, after May 31, 1986, payments to States under title XIX of the Social Security Act, for the last quarter of fiscal year 1986 for unanticipated costs, incurred for the current fiscal year, such sums as may be necessary, the obligations and the expenditures to be charged to the subsequent appropriations for the current or succeeding fiscal year.

Payment under title XIX may be made for any quarter beginning after June 30, 1985, and before October 1, 1986, with respect to any State plan or plan amendment in effect during any such quarter, if submitted in, or prior to such quarter and approved in that or any such subsequent quarter.

For making payments to States under title XIX of the Social Security Act for the first quarter of fiscal year 1987, $6,500,000,000, to remain available until expended.

PAYMENTS TO HEALTH CARE TRUST FUNDS

For payment to the Federal Hospital Insurance and the Federal Supplementary Medical Insurance Trust Funds, as provided under sections 217(g), 229(b) and 1844 of the Social Security Act, sections 103(c) and 111(d) of the Social Security Amendments of 1965, and section 278(d) of Public Law 97-248, $19,659,000,000.

PROGRAM MANAGEMENT

For carrying out, except as otherwise provided, titles XI, XVIII, and XIX of the Social Security Act, $88,185,000, together with not to exceed $1,168,108,000 to be transferred to this appropriation as authorized by section 201(g) of the Social Security Act, from the Federal Hospital Insurance and the Federal Supplementary Medical Insurance Trust Funds referred to therein: *Provided,* That in addition, $15,000,000 shall similarly be derived by transfer from said trust funds and shall be expended only to the extent necessary to process workloads not anticipated in the budget estimates and to meet unanticipated costs of agencies or organizations with which agreements have been made to participate in the administration of title XVIII and after maximum absorption of such costs within the remainder of the existing limitation has been achieved.

SOCIAL SECURITY ADMINISTRATION

PAYMENTS TO SOCIAL SECURITY TRUST FUNDS

For payment to the Federal Old-Age and Survivors Insurance and the Federal Disability Insurance Trust Funds, as provided under sections 201(m), 217(g), 228(g), 229(b), and 1131(b)(2) of the Social Security Act and section 152 of Public Law 98-21, $497,008,000.

SPECIAL BENEFITS FOR DISABLED COAL MINERS

For carrying out title IV of the Federal Mine Safety and Health Act of 1977, including the payment of travel expenses on an actual cost or commuted basis, to an individual, for travel incident to medical examinations, and to parties, their representatives, and all reasonably necessary witnesses for travel within the United States, Puerto Rico, and the Virgin Islands, to reconsideration interviews and to proceedings before administrative law judges, $727,908,000. For making, after July 31, of the current fiscal year, benefit payments to individuals under title IV of the Federal Mine Safety and Health Act of 1977, for costs incurred in the current fiscal year, such amounts as may be necessary, the obligations and expenditures to be charged to the subsequent appropriations for the current or succeeding fiscal year.

For making benefit payments under title IV of the Federal Mine Safety and Health Act of 1977 for the first quarter of fiscal year 1987, $270,000,000, to remain available until expended.

SUPPLEMENTAL SECURITY INCOME PROGRAM

For carrying out the Supplemental Security Income Program, section 401 of Public Law 92-603, section 212 of Public Law 93-66, as amended, and section 405 of Public Law 95-216, including payment to the social security trust funds for administrative expenses incurred pursuant to section 201(g)(1) of the Social Security Act, $7,712,089,000, to remain available until expended: *Provided,* That any portion of the funds provided to a State in the current fiscal year and not obligated by the State during that year shall be returned to the Treasury. For making, after July 31 of the current fiscal year, benefit payments to individuals under title XVI of the Social Security Act, for unanticipated costs incurred for the current fiscal year, such sums as may be necessary, the obligations and expenditures therefor to be charged to the subsequent appropriations for the current or succeeding fiscal year.

For carrying out the Supplemental Security Income Program for the first quarter of fiscal year 1987, $2,339,250,000, to remain available until expended.

ASSISTANCE PAYMENTS PROGRAM

For carrying out, except as otherwise provided, titles I, IV-A and -D, X, XI, XIV, and XVI of the Social Security Act and the Act of July 5, 1960 (24 U.S.C., ch. 9), $6,679,578,000, to remain available until expended.

For making, after May 31 of the current fiscal year, payments to States under titles I, IV-A and -D, X, XIV, and XVI of the Social Security Act, for the last three months of the current fiscal year, for unanticipated costs, incurred for the current fiscal year, such sums as may be necessary, the obligations and expenditures to be charged to the subsequent appropriations for the current or succeeding fiscal year.

For making payments to States under titles I, IV-A and -D, X, XIV, and XVI of the Social Security Act for the first quarter of fiscal year 1987, $2,193,754,000, to remain available until expended.

CHILD SUPPORT ENFORCEMENT

For carrying out, except as otherwise provided, titles IV-D and XI of the Social Security Act, $432,601,000, to remain available until expended.

For making, after May 31 of the current fiscal year, payments to States under title IV-D of the Social Security Act, for the last three months of the current fiscal year, for unanticipated costs, incurred for the current fiscal year, such sums as may be necessary, the obligations and the expenditures to be charged to the subsequent appropriations for the current or succeeding fiscal year.

For making payments to States under title IV-D of the Social Security Act for the first quarter of fiscal year 1987, $170,750,000, to remain available until expended.

LOW INCOME HOME ENERGY ASSISTANCE

For carrying out title XXVI of the Omnibus Budget Reconciliation Act of 1981, $2,100,000,000.

LIMITATION ON ADMINISTRATIVE EXPENSES

For necessary expenses, not more than $4,022,486,000 may be expended, as authorized by section 201(g)(1) of the Social Security Act, from any one or all of the trust funds referred to therein: *Provided*, That travel expense payments under section 1631(h) of such Act may be made only when travel of more than seventy-five miles is required: *Provided further*, That $175,000,000 of the foregoing amount shall be apportioned for use only to the extent necessary to process workloads not anticipated in the budget estimates, for automation projects and their impact on the work force, and to meet mandatory increases in costs of agencies or organizations with which agreements have been made to participate in the administration of titles XVI and XVIII and section 221 of the Social Security Act, and after maximum absorption of such costs within the remainder of the existing limitation has been achieved: *Provided further*, That $182,939,000 for automatic data processing and telecommunications activities shall remain available until expended: *Provided further*, That none of the funds appropriated by this Act may be used for the manufacture, printing, or procuring of social security cards, as provided in section 205(c)(2)(D) of the Social Security Act, where paper and other materials used in the manufacture of such cards are produced, manufactured, or assembled outside of the United States.

HUMAN DEVELOPMENT SERVICES

SOCIAL SERVICES BLOCK GRANT

For carrying out the Social Services Block Grant Act, $2,700,000,000.

HUMAN DEVELOPMENT SERVICES

For carrying out, except as otherwise provided, the Older Americans Act of 1965, the Runaway and Homeless Youth Act, the Native Americans Programs Act, the Developmental Disabilities Assistance and Bill of Rights Act, the Child Abuse Prevention and Treatment Act, and the Head Start Act, $2,003,722,000: *Provided*, That $76,349,000 shall be the maximum amount available for Indian and migrant Head Start programs for fiscal year 1986.

FAMILY SOCIAL SERVICES

For carrying out parts B and E of title IV and section 1110 of the Social Security Act, and title II of Public Law 95-266 (adoption opportunities), $745,019,000.

WORK INCENTIVES

For carrying out a work incentive program, as authorized by part C of title IV of the Social Security Act, including registration of individuals for such programs, and for related child care and other supportive services, as authorized by section 402(a)(19)(G) of the Act, including transfer to the Secretary of Labor, as authorized by section 431 of the Act, $250,000,000 which shall be the maximum amount available for transfer to the Secretary of Labor and to which the States may become entitled pursuant to section 403(d) of such Act, for these purposes.

OFFICE OF COMMUNITY SERVICES

COMMUNITY SERVICES BLOCK GRANT

For carrying out the Community Services Block Grant Act, $361,700,000, of which $18,350,000 shall be for carrying out section 681(a)(2)(A), $3,720,000 shall be for carrying out section 681(a)(2)(D), $2,800,000 shall be for carrying out section 681(a)(2)(E), and $6,130,000 shall be for carrying out section 681(a)(2)(F).

DEPARTMENTAL MANAGEMENT

GENERAL DEPARTMENTAL MANAGEMENT

For necessary expenses, not otherwise provided, for general departmental management, including hire of six medium sedans, $123,949,000 together with not to exceed $8,000,000 to be transferred and expended as authorized by section 201(g)(1) of the Social Security Act from any one or all of the trust funds referred to therein.

OFFICE OF THE INSPECTOR GENERAL

For expenses necessary for the Office of the Inspector General, $42,219,000 together with not to exceed $30,000,000 to be transferred and expended as authorized by section 201(g)(1) of the Social Security Act from any one or all of the trust funds referred to therein.

OFFICE FOR CIVIL RIGHTS

For expenses necessary for the Office for Civil Rights, $15,636,000 together with not to exceed $4,000,000 to be transferred and expended as authorized by section 201(g)(1) of the Social Security Act from any one or all of the trust funds referred to therein.

POLICY RESEARCH

For carrying out, to the extent not otherwise provided, research studies under section 1110 of the Social Security Act, $6,500,000.

GENERAL PROVISIONS

SEC. 201. None of the funds appropriated by this title for grants-in-aid of State agencies to cover, in whole or in part, the cost of operation of said agencies, including the salaries and expenses of officers and employees of said agencies, shall be withheld from the said agencies of any State which have established by legislative enactment and have in operation a merit system and classification and compensation plan covering the selection, tenure in office, and compensation of their employees, because of any disapproval of their personnel or the manner of their selection by the agencies of the said States, or the rates of pay of said officers or employees.

SEC. 202. None of the funds provided herein shall be used to pay any recipient of a grant for the conduct of research an amount equal to as much as the entire cost of such research.

SEC. 203. Appropriations in this Act for the Health Resources and Services Administration, the National Institutes of Health, the Centers for Disease Control, the Alcohol, Drug Abuse, and Mental Health Administration, the Office of the Assistant Secretary for Health, the Health Care Financing Administration, and Departmental Management shall be available for expenses for active commissioned officers in the Public Health Service Reserve Corps and for not to exceed two thousand four hundred commissioned officers in the Regular Corps; expenses incident to the dissemination of health information in foreign countries through exhibits and other appropriate means; advances of funds for compensation, travel, and subsistence expenses (or per diem in lieu thereof) for persons coming from abroad to participate in health or scientific activities of the Department pursuant to law; expenses of primary and secondary schooling of dependents in foreign countries, of Public Health Service commissioned officers stationed in foreign countries, at costs for any given area not in excess of those of the Department of Defense for the same area, when it is determined by the Secretary that the schools available in the locality are unable to provide adequately for the education of such dependents, and for the transportation of such dependents, between such schools and their places of residence when the schools are not accessible to such dependents by regular means of transportation; expenses for medical care for civilian and commissioned employees of the Public Health Service and their dependents, assigned abroad on a permanent basis in accordance with such regulations as the Secretary may provide; rental or lease of living quarters (for periods not exceeding five years), and provision of heat, fuel, and light and maintenance, improvement, and repair of such quarters, and advance payments therefor, for civilian officers, and employees of the Public Health Service who are United States citizens and who have a permanent station in a foreign country; purchase, erection, and maintenance of temporary or portable structures; and for the payment of compensation to consultants or individual scientists appointed for limited periods of time pursuant to section 207(f) or section 207(g) of the Public Health Service Act, at rates established by the Assistant Secretary for Health, or the Secretary where such action is required by statute, not to exceed the per diem rate equivalent to the rate for GS-18; not to exceed $9,500 for official reception and representation expenses related to any health agency of the Department when specifically approved by the Assistant Secretary for Health.

SEC. 204. None of the funds contained in this Act shall be used to perform abortions except where the life of the mother would be endangered if the fetus were carried to term.

SEC. 205. Funds advanced to the National Institutes of Health Management Fund from appropriations in this Act shall be available for the expenses of sharing medical care facilities and resources pursuant to section 327A of the Public Health Service Act.

SEC. 206. Funds appropriated in this title for the Social Security Administration and the Office of Child Support Enforcement shall be available for not to exceed $5,000 for official reception and representation expenses related to income maintenance or child support enforcement activities of the Department when specifically approved by the Commissioner of Social Security.

SEC. 207. Funds appropriated in this title for the Health Care Financing Administration shall be available for not to exceed $2,000 for official reception and representation expenses when specifically approved by the Administrator of the Health Care Financing Administration.

SEC. 208. No funds appropriated for the fiscal year ending September 30, 1986, by this or any other Act, may be used to pay basic pay, special pays, basic allowance for subsistence and basic allowances for quarters of the commissioned corps of the Public Health Service described in section 204 of title 42, United States Code, at a level that exceeds 110 percent of the Executive Level I annual rate of basic pay: *Provided*, That amounts received from employees of the Department in payment for room and board may be credited to the appropriation accounts "Health Resources and Services", National Institutes of Health "Office of the Director", "Disease Control", and "Federal Subsidy for Saint Elizabeths Hospital".

SEC. 209. None of the funds appropriated in this title shall be used to transfer the general administration of programs authorized under the Native American Programs Act from the Department of Health and

Human Services to the Department of the Interior.

SEC. 210. Funds provided in this Act may be used for one-year contracts which are to be performed in two fiscal years, so long as the total amount for such contracts is obligated in the year for which the funds are appropriated.

This title may be cited as the "Department of Health and Human Services Appropriation Act, 1986".

TITLE III—DEPARTMENT OF EDUCATION

COMPENSATORY EDUCATION FOR THE DISADVANTAGED

For carrying out chapter 1 of the Education Consolidation and Improvement Act of 1981, as amended, $3,688,163,000, of which $5,246,000 shall be used for purposes of section 555(d) of said Act to provide technical assistance and evaluate programs, and the remaining $3,682,917,000 shall become available on July 1, 1986, and remain available until September 30, 1987: *Provided*, That of these remaining funds, no funds shall be used for purposes of section 554(a)(1)(B), $264,524,000 shall be available for purposes of section 554(a)(2)(A), $150,170,000 shall be available for purposes of section 554(a)(2)(B), $32,616,000 shall be available for purposes of section 554(a)(2)(C) and $35,607,000 shall be available for purposes of section 554(b)(1)(D).

For carrying out section 418A of the Higher Education Act, $7,500,000.

IMPACT AID

For carrying out title I of the Act of September 30, 1950, as amended (20 U.S.C. ch. 13), $675,000,000, of which $22,000,000 shall be for entitlements under section 2 of said Act, $10,000,000, which shall remain available until expended, shall be for payments under section 7 of said Act and $643,000,000 shall be for entitlements under section 3 of said Act of which $513,000,000 shall be for entitlements under section 3(a) of said Act: *Provided*, That payment with respect to entitlements under section 3(a) to any local educational agency described in section 3(d)(1)(A) of said Act shall be at 100 per centum of entitlement except that payment to such agency attributable to children who reside on property which is described in section 403(1)(C) of said Act shall be limited to 15 per centum of entitlement: *Provided further*, That payment with respect to entitlements under section 3(a) to any local educational agency not described in section 3(d)(1)(A) shall be ratably reduced from 100 per centum of entitlement except that payment to such agency attributable to children who reside on property which is described in section 403(1)(C) shall be ratably reduced from 15 per centum of entitlement: *Provided further*, That payment with respect to entitlements under section 3(b) of said Act to any local educational agency in which 20 per centum or more of the total average daily attendance is made up of children determined eligible under section 3(b) shall be at 60 per centum of entitlement and payment with respect to entitlements under section 3(b) of said Act to any local educational agency in which less than 20 per centum of the total average daily attendance is made up of children determined eligible under section 3(b) shall be ratably reduced from 100 per centum of entitlement: *Provided further*, That the provisions of section 5(c) of said Act shall not apply to funds provided herein: *Provided further*, That no payments shall be made under section 7 of said Act to any local educational agency whose need for assistance under that section fails to exceed the lesser of $10,000 or 5 per centum of the district's current operating expenditures during the fiscal year preceding the one in which the disaster occurred: *Provided further*, That in determining entitlements under section 3 of the Act of September 30, 1950 (Public Law 874, Eighty-first Congress), the local contribution rate for each local educational agency shall not be more than the local contribution rate for that agency for fiscal year 1985: *Provided further*, That in the case of a local educational agency that did not have a local contribution rate for fiscal year 1985, the Secretary shall base such agency's fiscal year 1986 payment on a local contribution rate the agency could have received for fiscal year 1985.

For carrying out the Act of September 23, 1950, as amended (20 U.S.C. ch. 19), $20,000,000 which shall remain available until expended, shall be for providing school facilities as authorized by said Act, of which $8,500,000 shall be for awards under section 10 of said Act, $8,500,000 shall be for awards under sections 14(a) and 14(b) of said Act, and $3,000,000 shall be for awards under sections 5 and 14(c) of said Act.

SPECIAL PROGRAMS

For carrying out the consolidated programs and projects authorized under chapter 2 of the Education Consolidation and Improvement Act of 1981, as amended $531,909,000, of which $31,909,000 shall be for programs and projects authorized under subchapter D of said Act, including $10,700,000 for programs and projects authorized under subsection 583(a)(1) of said Act; $6,052,000 shall be used for awards, which, except for educational television programming, are not to exceed a cumulative amount of $1,000,000 to any recipient for national impact demonstration or research projects; $7,000,000 for activities authorized under subsection 583(b)(1) of said Act; $3,157,000 for programs authorized under subsection 583(b)(2) of said Act; $3,000,000 for programs authorized under subsection 583(b)(3) of said Act; and $2,000,000 for activities authorized under subsection 583(b)(4) of said Act: *Provided*, That $500,000,000 to carry out the State block grant program authorized under chapter 2 of said Act shall become available for obligation on July 1, 1986, and shall remain available until September 30, 1987.

For grants to State educational agencies and desegregation assistance centers authorized under section 403 of the Civil Rights Act of 1964, $24,000,000.

For carrying out activities authorized under title IX, part C of the Elementary and Secondary Education Act, $6,000,000.

For carrying out activities authorized under section 1524 of the Education Amendments of 1978, $2,700,000.

For carrying out activities authorized under section 1525 of the Education Amendments of 1978, $2,000,000.

For carrying out activities authorized under Public Law 92-506, as amended, $1,500,000: *Provided*, That said sum shall become available on July 1, 1986, and shall remain available until September 30, 1987.

For carrying out the provisions of title VII of the Education for Economic Security Act, relating to magnet schools assistance, $75,000,000: *Provided*, That not more than $4,000,000 in the fiscal year may be paid to any single eligible local educational agency.

For carrying out the provisions of title VI of the Education for Economic Security Act, $5,000,000 to remain available until expended.

For carrying out activities authorized under the Follow Through Act, $7,500,000.

BILINGUAL EDUCATION

For carrying out, to the extent not otherwise provided, title VII of the Elementary and Secondary Education Act, title VI of the Education Amendments of 1984, and title IV, part E of the Carl D. Perkins Vocational Education Act, $172,951,000, of which $5,000,000 shall be for section 732 of title VII of the Elementary and Secondary Education Act and $30,000,000 shall be for the Emergency Immigrant Education Program authorized by title VI of the Education Amendments of 1984.

EDUCATION FOR THE HANDICAPPED

For carrying out the Education of the Handicapped Act, $1,320,100,000, of which $1,135,145,000 for section 611 and $29,000,000 for section 619 shall become available for obligation on July 1, 1986, and shall remain available until September 30, 1987.

REHABILITATION SERVICES AND HANDICAPPED RESEARCH

For carrying out, to the extent not otherwise provided, the Rehabilitation Act of 1973, as amended, and the Helen Keller National Center Act, $1,233,900,000, of which $1,305,916 shall be for activities under section 110(b)(3) of the Rehabilitation Act, $14,635,000 shall be for special demonstration programs for the severely disabled under section 311 of the Rehabilitation Act, $2,100,000 shall be for special recreational programs under section 316 of the Rehabilitation Act, $5,000,000 shall be for State grants under title VII, part A of the Rehabilitation Act, and $4,200,000 shall be for continued operation of the Helen Keller National Center for Deaf-Blind Youths and Adults.

VOCATIONAL AND ADULT EDUCATION

For carrying out, to the extent not otherwise provided, the Carl D. Perkins Vocational Education Act, and the Adult Education Act, $933,277,000 which shall become available for obligation on July 1, 1986, and shall remain available until September 30, 1987: *Provided*, That $10,178,000 shall be available for title IV, parts A and C of the Carl D. Perkins Vocational Education Act including $6,000,000 for section 404 of said title: *Provided further*, That $7,000,000 for State advisory councils under section 112 of the Carl D. Perkins Vocational Education Act shall be used to provide to each State an amount equal to the amount it received in the previous fiscal year: *Provided further*, That no State shall receive less under title II of the Carl D. Perkins Vocational Education Act than it received in the previous year: *Provided further*, That $101,963,000 for the Adult Education Act shall be used to provide to each State an amount equal to the amount it received under said Act in the previous year.

STUDENT FINANCIAL ASSISTANCE

For carrying out subparts 1, 2, and 3 of part A, and parts C and E of title IV of the Higher Education Act, as amended, $4,910,482,000 which shall remain available until September 30, 1987, of which $412,500,000 shall be available for carrying out subpart 2 of part A of title IV of the Higher Education Act: *Provided*, That amounts appropriated for Pell Grants shall be available first to meet any insufficiencies in entitlements resulting from the payment

schedule for Pell Grants published by the Secretary of Education for the 1985-86 academic year: *Provided further,* That pursuant to section 411(b)(4)(A) of the Higher Education Act, amounts appropriated herein for Pell Grants which exceed the amounts required to meet the payment schedule published for any fiscal year by 15 per centum or less shall be carried forward and merged with amounts appropriated for the next fiscal year: *Provided further,* That the maximum Pell grant a student may receive in the 1986-87 academic year shall be $2,100: *Provided further,* That the cost of attendance criteria used for calculating eligibility for and the amount of the Pell Grants for academic year 1986-87 shall be the same as the cost of attendance criteria used for academic year 1985-86.

GUARANTEED STUDENT LOANS

For necessary expenses under title IV, part B of the Higher Education Act, $2,714,482,000 to remain available until expended, of which $87,000,000, shall be for administrative cost allowances under section 428(f) of said title and loan advances under section 422(c) of said title.

HIGHER EDUCATION

For carrying out title III of the Higher Education Act of 1965, as amended, $141,208,000, of which $23,208,000 for the endowment grant program under section 333 of title III of said Act shall remain available until September 30, 1987: *Provided,* That not less than $45,741,000 of funds appropriated for title III of said Act shall be available only to historically black colleges and universities.

For carrying out subpart 4 of part A of title IV ; titles VI, VII, VIII, and X, parts B, C, D, and E of title IX; and sections 420, 734, and 1204(c) of the Higher Education Act of 1965, as amended; title XIII, part H, subpart 1 of the Education Amendments of 1980; and section 102(b)(6) of the Mutual Educational and Cultural Exchange Act of 1961, $303,030,000, of which $23,500,000 made available for interest subsidy grants under section 734 of the Higher Education Act and $20,000,000 made available for undergraduate and graduate facilities grants under part B of title VII of said Act shall remain available until expended: *Provided further,* That sections 922(b)(2) and 922(e)(2) and the funding limitations set forth in section 922(e) of the Higher Education Act shall not apply to funds in this Act.

For carrying out title V, section 501 of the Human Services Reauthorization Act, Public Law 98-558, not to exceed $6,000,000 to remain available until September 30, 1987: *Provided,* That the Federal share of the cost of the facility shall not exceed 50 percent.

HIGHER EDUCATION FACILITIES LOANS AND INSURANCE

For the payment of principal and interest, including interest insufficiencies, as authorized by the Department of Health, Education, and Welfare Appropriation Act, 1968, on account of outstanding beneficial interests or participations held by the Government National Mortgage Association, as trustee, on behalf of the Department of Education, and issued pursuant to the Participation Sales Act of 1966 (section 302(c) of the Federal National Mortgage Association Charter Act (12 U.S.C. 1717(c)), and for the payment of interest to the Treasury as required by title VII, part C, section 733(b)(2) of the Higher Education Act, as amended (20 U.S.C. 1132d-2(b)(2)), $17,996,000, to remain available until expended. The Secretary is hereby authorized to make such expenditures, within the limits of funds available under this heading and in accord with law, and to make such contracts and commitments without regard to fiscal year limitation, as provided by section 104 of the Government Corporation Control Act (31 U.S.C. 9104), as may be necessary in carrying out the program set forth in the budget for the current fiscal year. For the fiscal year 1986, no new commitments for loans may be made from the fund established pursuant to title VII, section 733 of the Higher Education Act, as amended (20 U.S.C. 1132d-2).

COLLEGE HOUSING LOANS

The aggregate amount of commitments for loans made from the fund established pursuant to title IV of the Housing Act of 1950, as amended (12 U.S.C. 1749), for the fiscal year 1986 shall not exceed the total of loan repayments and other income available during such period, less operating costs. Payments of interest insufficiencies for the fiscal year 1986 as may be required by the Government National Mortgage Association, as trustee, on account of outstanding beneficial interests or participations issued pursuant to the Participation Sales Act of 1966 (section 302(c) of the Federal National Mortgage Association Charter Act, as amended (12 U.S.C. 1717(c))) shall be made from the fund established pursuant to title IV of the Housing Act of 1950, as amended (12 U.S.C. 1749-1749c) using loan repayments and other income available during such fiscal year. During the fiscal year 1986 and within the resources and authority available, gross commitments for the principal amount of direct loans shall be $80,000,000.

EDUCATIONAL RESEARCH AND STATISTICS

For necessary expenses to carry out sections 405 and 406 of the General Education Provisions Act, as amended, $59,978,000.

LIBRARIES

For carrying out, to the extent not otherwise provided, titles I, II and III of the Library Services and Construction Act (20 U.S.C., ch. 16); and title II, part B except section 224, and part C of the Higher Education Act, notwithstanding the provisions of section 221, $123,680,000: *Provided,* That $23,680,000 of the sums appropriated shall be used to carry out the provisions of title II of the Library Services and Construction Act and shall remain available until expended.

SPECIAL INSTITUTIONS

AMERICAN PRINTING HOUSE FOR THE BLIND

For carrying out the Act of March 3, 1879, as amended (20 U.S.C. 101-106), including provision of materials to adults undergoing rehabilitation on the same basis as provided in 1985, $5,500,000.

NATIONAL TECHNICAL INSTITUTE FOR THE DEAF

For carrying out the National Technical Institute for the Deaf Act (20 U.S.C. 681 et seq.), $31,400,000.

GALLAUDET COLLEGE

For carrying out the Model Secondary School for the Deaf Act (80 Stat. 1027) and for the partial support of Gallaudet College authorized by the Act of June 18, 1954 (68 Stat. 265), including continuing education activities, existing extension centers and the National Center for Law and the Deaf, $58,700,000.

HOWARD UNIVERSITY

For partial support of Howard University (20 U.S.C. 121 et seq.), $164,230,000, of which $2,000,000 shall be for an endowment matching grant in accordance with policies and procedures as appropriate for comparable grants under the Challenge Grant Amendments of 1983 (Public Law 98-95) and shall remain available until expended.

DEPARTMENTAL MANAGEMENT

SALARIES AND EXPENSES

For carrying out, to the extent not otherwise provided, the Department of Education Organization Act, including rental of conference rooms in the District of Columbia and hire of three passenger motor vehicles, $224,157,000.

OFFICE FOR CIVIL RIGHTS

For expenses necessary for the Office for Civil Rights, as authorized by section 203 of the Department of Education Organization Act, $44,181,000.

OFFICE OF THE INSPECTOR GENERAL

For expenses necessary for the Office of the Inspector General, as authorized by section 212 of the Department of Education Organization Act, $15,281,000.

GENERAL PROVISIONS

SEC. 301. None of the funds appropriated by this title for grants-in-aid of State agencies to cover, in whole or in part, the cost of operation of said agencies, including the salaries and expenses of officers and employees of said agencies, shall be withheld from the said agencies of any State which have established by legislative enactment and have in operation a merit system and classification and compensation plan covering the selection, tenure in office, and compensation of their employees, because of any disapproval of their personnel or the manner of their selection by the agencies of the said States, or the rates of pay of said officers or employees.

SEC. 302. Funds appropriated in this Act to the American Printing House for the Blind, Howard University, the National Technical Institute for the Deaf, and Gallaudet College shall be subject to audit by the Secretary of Education.

SEC. 303. None of the funds provided herein shall be used to pay any recipient of a grant for the conduct of research an amount equal to as much as the entire cost of such research.

SEC. 304. No part of the funds contained in this title may be used to force any school or school district which is desegregated as that term is defined in title IV of the Civil Rights Act of 1964, Public Law 88-352, to take any action to force the busing of students; to force on account of race, creed or color the abolishment of any school so desegregated; or to force the transfer or assignment of any student attending any elementary or secondary school so desegregated to or from a particular school over the protest of his or her parents or parent.

SEC. 305. (a) No part of the funds contained in this title shall be used to force any school or school district which is desegregated as that term is defined in title IV of the Civil Rights Act of 1964, Public Law 88-352, to take any action to force the busing of students; to require the abolishment of any school so desegregated; or to force on account of race, creed or color the transfer of students to or from a particular school so desegregated as a condition precedent to obtaining Federal funds otherwise available to any State, school district or school.

(b) No funds appropriated in this Act may be used for the transportation of students or teachers (or for the purchase of equip-

ment for such transportation) in order to overcome racial imbalance in any school or school system, or for the transportation of students or teachers (or for the purchase of equipment for such transportation) in order to carry out a plan of racial desegregation of any school or school system.

SEC. 306. None of the funds contained in this Act shall be used to require, directly or indirectly, the transportation of any student to a school other than the school which is nearest the student's home, except for a student requiring special education, to the school offering such special education, in order to comply with title VI of the Civil Rights Act of 1964. For the purpose of this section an indirect requirement of transportation of students includes the transportation of students to carry out a plan involving the reorganization of the grade structure of schools, the pairing of schools, or the clustering of schools, or any combination of grade restructuring, pairing or clustering. The prohibition described in this section does not include the establishment of magnet schools.

SEC. 307. No funds appropriated under this Act may be used to prevent the implementation of programs of voluntary prayer and meditation in the public schools.

SEC. 308. Section 402(c) of the Housing Act of 1950 is amended by striking out in clause (9) "October 1, 1985" and inserting in its place "October 1, 1986".

This title may be cited as the "Department of Education Appropriation Act, 1986".

TITLE IV—RELATED AGENCIES

ACTION

OPERATING EXPENSES

For expenses necessary for Action to carry out the provisions of the Domestic Volunteer Service Act of 1973, as amended (42 U.S.C. 4951 et seq.), $150,164,000, of which $18,364,000 shall be available to carry out title I, part A of said Act.

FEDERAL MEDIATION AND CONCILIATION SERVICE

SALARIES AND EXPENSES

For expenses necessary for the Federal Mediation and Conciliation Service to carry out the functions vested in it by the Labor-Management Relations Act, 1947 (29 U.S.C. 171-180, 182), including expenses of the Labor-Management Panel and boards of inquiry appointed by the President, hire of passenger motor vehicles, and rental of conference rooms in the District of Columbia; and for expenses necessary pursuant to Public Law 93-360 for mandatory mediation in health care industry negotiation disputes and for convening factfinding boards of inquiry appointed by the Director in the health care industry; and for expenses necessary for the Labor-Management Cooperation Act of 1978 (29 U.S.C. 125a); and for expenses necessary for the Service to carry out the functions vested in it by the Civil Service Reform Act, Public Law 95-454 (5 U.S.C. Chapter 71), $23,394,000.

FEDERAL MINE SAFETY AND HEALTH REVIEW COMMISSION

SALARIES AND EXPENSES

For expenses necessary for the Federal Mine Safety and Health Review Commission (30 U.S.C. 801 et seq.), $3,815,000.

NATIONAL COUNCIL ON THE HANDICAPPED

SALARIES AND EXPENSES

For expenses necessary for the National Council on the Handicapped as authorized by section 405 of the Rehabilitation Act of 1973, as amended, $704,000.

NATIONAL LABOR RELATIONS BOARD

SALARIES AND EXPENSES

For expenses necessary for the National Labor Relations Board to carry out the functions vested in it by the Labor-Management Relations Act, 1947, as amended (29 U.S.C. 141-167), and other laws, $134,854,000: *Provided*, That no part of this appropriation shall be available to organize or assist in organizing agricultural laborers or used in connection with investigations, hearings, directives, or orders concerning bargaining units composed of agricultural laborers as referred to in section 2(3) of the Act of July 5, 1935 (29 U.S.C. 152), and as amended by the Labor-Management Relations Act, 1947, as amended, and as defined in section 3(f) of the Act of June 25, 1938 (29 U.S.C. 203), and including in said definition employees engaged in the maintenance and operation of ditches, canals, reservoirs, and waterways when maintained or operated on a mutual, nonprofit basis and at least 95 per centum of the water stored or supplied thereby is used for farming purposes.

NATIONAL MEDIATION BOARD

SALARIES AND EXPENSES

For expenses necessary to carry out the provisions of the Railway Labor Act, as amended (45 U.S.C. 151-188), including emergency boards appointed by the President, $6,358,000.

OCCUPATIONAL SAFETY AND HEALTH REVIEW COMMISSION

SALARIES AND EXPENSES

For the expenses necessary for the Occupational Safety and Health Review Commission, $5,901,000.

PROSPECTIVE PAYMENT ASSESSMENT COMMISSION

SALARIES AND EXPENSES

For expenses necessary to carry out section 601 of Public Law 98-21, $2,784,000 to be transferred to this appropriation from the Federal Hospital Insurance and the Federal Supplementary Medical Insurance Trust Funds.

RAILROAD RETIREMENT BOARD

DUAL BENEFITS PAYMENTS ACCOUNT

For payment to the Dual Benefits Payments Account, authorized under section 15(d) of the Railroad Retirement Act of 1974, $392,000,000 which shall be credited to the account in 12 approximately equal amounts on the first day of each month in the fiscal year.

FEDERAL PAYMENT TO THE RAILROAD RETIREMENT ACCOUNTS

For payment to the accounts established in the Treasury for the payment of benefits under the Railroad Retirement Act for unnegotiated checks, $2,200,000 which shall be the maximum amount available for payments pursuant to section 417 of Public Law 98-76: *Provided*, That these funds shall remain available through September 30, 1987.

LIMITATION ON ADMINISTRATION

For expenses necessary for the Railroad Retirement Board, $55,422,000 to be derived from the railroad retirement accounts: *Provided*, That such portion of the foregoing amount as may be necessary shall be available for the payment of personnel compensation and benefits for not less than 1,199 full-time equivalent employees: *Provided further*, That $500,000 of the foregoing amount shall be available only to the extent necessary to process workloads not anticipated in the budget estimates and after maximum absorption of the costs of such workloads within the remainder of the existing limitation has been achieved: *Provided further*, That notwithstanding any other provision of law, no portion of this limitation shall be available for payments of standard level user charges pursuant to section 210(j) of the Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 490(j); 45 U.S.C. 228a-r).

LIMITATION ON RAILROAD UNEMPLOYMENT INSURANCE ADMINISTRATION FUND

For further expenses necessary for the Railroad Retirement Board, for administration of the Railroad Unemployment Insurance Act, not less than $16,487,000 shall be apportioned for fiscal year 1986 pursuant to section 3679 of the Revised Statutes, as amended (31 U.S.C. 655), from moneys credited to the railroad unemployment insurance administration fund, and of this amount $1,280,000 shall be derived from contributions credited to the railroad unemployment insurance account and shall be credited to the railroad unemployment insurance administration fund as authorized by section 11(a)(iv) of the Railroad Unemployment Insurance Act: *Provided*, That such portion of the foregoing amount as may be necessary shall be available for the payment of personnel compensation and benefits for not less than 379 full-time equivalent employees.

SOLDIERS' AND AIRMEN'S HOME

OPERATION AND MAINTENANCE

For maintenance and operation of the United States Soldiers' and Airmen's Home, to be paid from the Soldiers' and Airmen's Home permanent fund, $33,276,000: *Provided*, That this appropriation shall not be available for the payment of hospitalization of members of the Home in United States Army hospitals at rates in excess of those prescribed by the Secretary of the Army upon recommendation of the Board of Commissioners and the Surgeon General of the Army.

CAPITAL OUTLAY

For construction and renovation of the physical plant, to be paid from the Soldiers' and Airmen's Home permanent fund, $15,000,000, to remain available until expended.

TITLE V—GENERAL PROVISIONS

SEC. 501. The expenditure of any appropriation under this Act for any consulting service through procurement contract, pursuant to 5 U.S.C. 3109, shall be limited to those contracts where such expenditures are a matter of public record and available for public inspection, except where otherwise provided under existing law, or under existing Executive order issued pursuant to existing law.

SEC. 502. No part of any appropriation contained in this Act shall be expended by any executive agency, as referred to in the Office of Federal Procurement Policy Act (41 U.S.C. 401 et seq.), pursuant to any obligation for services by contract, unless such executive agency has awarded and entered into such contract in full compliance with such Act and regulations promulgated thereunder.

SEC. 503. Appropriations contained in this Act, available for salaries and expenses, shall be available for services as authorized by 5 U.S.C. 3109 but at rates for individuals not to exceed the per diem rate equivalent to the rate for GS-18.

SEC. 504. Appropriations contained in this Act, available for salaries and expenses, shall be available for uniforms or allowances therefor as authorized by law (5 U.S.C. 5901-5902).

SEC. 505. Appropriations contained in this Act, available for salaries and expenses, shall be available for expenses of attendance at meetings which are concerned with the functions or activities for which the appropriation is made or which will contribute to improved conduct, supervision, or management of those functions or activities.

SEC. 506. No part of the funds appropriated under this Act shall be used to provide a loan, guarantee of a loan, a grant, the salary of or any remuneration whatever to any individual applying for admission, attending, employed by, teaching at, or doing research at an institution of higher education who has engaged in conduct on or after August 1, 1969, which involves the use of (or the assistance to others in the use of) force or the threat of force or the seizure of property under the control of an institution of higher education, to require or prevent the availability of certain curricula, or to prevent the faculty, administrative officials, or students in such institution from engaging in their duties or pursuing their studies at such institution.

SEC. 507. The Secretaries of Labor, Health and Human Services, and Education are authorized to transfer unexpended balances of prior appropriations to accounts corresponding to current appropriations provided in this Act: *Provided*, That such transferred balances are used for the same purpose, and for the same periods of time, for which they were originally appropriated.

SEC. 508. No part of any appropriation contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein.

SEC. 509. No part of any appropriation contained in this Act shall be used, other than for normal and recognized executive-legislative relationships, for publicity or propaganda purposes, for the preparation, distribution, or use of any kit, pamphlet, booklet, publication, radio, television, or film presentation designed to support or defeat legislation pending before the Congress, except in presentation to the Congress itself.

No part of any appropriation contained in this Act shall be used to pay the salary or expenses of any grant or contract recipient, or agent acting for such recipient, related to any activity designed to influence legislation or appropriations pending before the Congress.

SEC. 510. The Secretaries of Labor, Health and Human Services, and Education are each authorized to make available not to exceed $7,500 from funds available for salaries and expenses under titles I, II, and III, respectively, for official reception and representation expenses; the Director of the Federal Mediation and Conciliation Service is authorized to make available for official reception and representation expenses not to exceed $2,500 from the funds available for "Salaries and expenses, Federal Mediation and Conciliation Service"; and the Chairman of the National Mediation Board is authorized to make available for official reception and representation expenses not to exceed $2,500 from funds available for "Salaries and expenses, National Mediation Board".

SEC. 511. None of the funds appropriated by this Act shall be used to pay for any research program or project or any program, project, or course which is of an experimental nature, or any other activity involving human participants, which is determined by the Secretary or a court of competent jurisdiction to present a danger to the physical, mental, or emotional well-being of a participant or subject of such program, project, or course, without the written, informed consent of each participant or subject, or a participant's parents or legal guardian, if such participant or subject is under eighteen years of age. The Secretary shall adopt appropriate regulations respecting this section.

SEC. 512. None of the funds provided in this Act to any department or agency may be expended for the transportation of any officer or employee of such department or agency between his domicile and his place of employment, with the exception of the Secretaries of Labor, Health and Human Services, and Education, and medical officers and other health personnel on out-patient medical service who are exempted from such limitations under 31 U.S.C. 1344.

SEC. 513. Notwithstanding any other provision of this Act, no funds appropriated by this Act may be used to execute or carry out any contract with a non-governmental entity to administer or manage a Civilian Conservation center of the Job Corps which was not under such a contract as of September 1, 1984.

SEC. 514. Upon the enactment of the Compact of Free Association, amounts appropriated by this Act for Federal financial assistance to the Trust Territory of the Pacific Islands shall be available only for the Republic of Palau, but only in amounts that such Republic would have received had the Compact not been enacted.

This Act may be cited as the "Departments of Labor, Health and Human Services, and Education and Related Agencies Appropriation Act, 1986".

The CHAIRMAN. Are there any points of order against the bill?

Are there any amendments?

Mr. RAY. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I rise today to congratulate Congressman NATCHER and my other colleagues on the Appropriations Committee on the Labor, HHS, and Education Subcommittee for keeping this appropriations bill under 1985 levels by $3.4 billion.

They have not sought to appropriate in areas which have not yet been covered by authorizing legislation. Even with projected funding in the areas not yet authorized, this subcommittee has shown its commitment to cutting the deficit without gutting programs which are crucial to many Americans—programs such as: Job Training Partnership Act, Social Security, Low-Income Energy Assistance, Vocational and Adult Education, Rehabilitation Services and Handicapped Research, Medicaid, and Impact Aid.

These are programs which are critical to the needs of many disadvantaged Americans.

Mr. Chairman, I applaud the efforts of Congressman NATCHER and my colleagues to report a fiscally responsible bill to the House for its consideration.

Mr. LELAND. Mr. Chairman, will the gentleman yield?

Mr. RAY. I yield to the gentleman from Texas.

Mr. LELAND. Mr. Chairman, I have asked the gentleman to yield for the purpose of engaging in a colloquy between the subcommittee chairman, the gentleman from Kentucky [Mr. NATCHER], and also the ranking minority member on that subcommittee, the gentleman from Massachusetts [Mr. CONTE], and the ranking minority member on the Select Committee on Hunger. I really appreciate the gentleman's yielding to me.

A few months ago we conversed on the issue of expanding the Center for Disease Control's nutrition surveillance system to include reporting and investigating cases of severe undernutrition in the United States. The Select Committee on Hunger, which I chair, conducted a hearing earlier this year on the effects of hunger on infant and child health. During this hearing several medical and nutrition experts testified that they are seeing and treating a significant number of children with third degree malnutrition—a condition caused by inadequate food intake. This current surveillance system is inadequate for two reasons. First, it includes information only on low-income children and some pregnant women who enter public health centers for health screening. Second, the medical data collected is insufficient to diagnose severe undernutrition. Based on this information, our medical witnesses expressed the need for a more comprehensive reporting system.

Mr. NATCHER. Mr. Chairman, if the gentleman will yield, I would like to say to the gentleman from Texas that I recall our conversation well. I remember our agreement that the subcommittee would address this issue during hearings next year. The gentleman is correct.

Mr. LELAND. Mr. Chairman, since the select committee hearing, we have heard from physicians, nutrition experts, and professional medical organizations across the country that an expanded surveillance program is essential in assessing and treating severe malnutrition. I thank the gentleman for his consideration of this issue.

Mr. CONTE. Mr. Chairman, will the gentleman yield?

Mr. RAY. I yield to the gentleman from Massachusetts.

Mr. CONTE. Mr. Chairman, as ranking minority member on the subcommittee, I agree that our hearings next year should include investigation of this inadequacy in our present surveillance system. Three prominent health and nutrition experts from my State testifed at the select committee hearing on the urgent need for a national system for reporting severe undernutrition. I fully support their statements. To assure that food and health

services are available to treat severe malnutrition, we must know who and where the victims are.

Mrs. ROUKEMA. Mr. Chairman, will the gentleman from Georgia yield?

Mr. RAY. Yes; I yield to the gentlewoman from New Jersey.

Mrs. ROUKEMA. Mr. Chairman, I thank my colleague.

I want to thank the Chairman and the gentleman from Massachusetts [Mr. CONTE] and also my Hunger Committee chairman.

I would also like to add my support to the concept of the subcommittee studying this issue next year. As the ranking Republican on the Hunger Committee, I believe it is essential for us to have more complete data on severe malnutrition. It is only with these data that we can address the underlying socioeconomic causes of poverty and hunger. Given the budget restraints that we face, we must have reliable information in order for us to address malnutrition in the most efficient and effective way; so I anticipate the subcommittee's investigation and appreciate the cooperation we have been given.

I thank the gentleman very much.

Mr. LELAND. Mr. Chairman, I certainly want to thank the gentleman for yielding and all of those who have participated, and the gentlewoman from New Jersey, particularly, for their interest and look forward to working together to address this issue in the future.

Mr. BIAGGI. Mr. Chairman, will the gentleman yield?

Mr. RAY. I yield to the gentleman from New York.

Mr. BIAGGI. Mr. Chairman, I thank the gentleman for yielding. I rise to engage in a colloquy with the gentleman [Mr. NATCHER], who as usual does a most superb job in producing difficult legislation.

Mr. Chairman, earlier this year I introduced H.R. 776, a bill to require the Secretary of Health and Human Services to study duplicative collection of information and to recommend methods for reducing such duplicative collection. It is aimed at having HHS take the lead for the Federal Government in simplifying and reducing those forms required to be filled out by senior citizens in order to participate in certain Federal benefit programs.

This bill was prompted by such absurdities as senior citizens having to fill out as many as 12 different forms all for programs administered by the Social Security Administration.

The CHAIRMAN. The time of the gentleman from Georgia [Mr. RAY] has expired.

(At the request of Mr. BIAGGI, and by unanimous consent, Mr. RAY was allowed to proceed for an additional 5 minutes.)

Mr. RAY. Mr. Chairman, I yield further to the gentleman from New York [Mr. BIAGGI].

Mr. BIAGGI. Mr. Chairman, the study called for in my bill would not require any new expenditures. Instead funds already appropriated for administrative costs for certain of these programs would be pooled to finance the study.

Considering that H.R. 776 has been cosponsored by 82 of our colleagues on a bipartisan basis, I was considering offering it as an amendment to this legislation. In lieu of this, I wonder if the chairman would be willing in a letter to the Secretary to have the Department undertake this study during fiscal year 1986 with available resources and have it completed prior to final action on their fiscal year 1987 appropriation bill?

Mr. NATCHER. Mr. Chairman, if the gentleman will yield to me, I would like the gentleman to know that the answer to the gentleman's question is yes. The gentleman is correct.

Mr. Chairman, further, I want to commend the gentleman from New York City for the work that he has done all through the years since he has been a Member of the Congress, not only pertaining to this matter, but pertaining to all the matters of the committee on which he serves. He does it well.

Mr. BIAGGI. Mr. Chairman, I thank the gentleman from Kentucky.

I would like to engage in a colloquy with the distinguished chairman of the subcommittee on the matter of expenditures for vocational education funds for older workers under the Carl D. Perkins Act.

Section 417 of the act, named after our distinguished former colleague and chairman of the Education and Labor Committee, requires the Secretary of Education to establish model centers for vocational education for older individuals.

I contacted Secretary Bennett last year in order to learn of the Department's plans for funding section 417. He advised me in a letter that the appropriations bill for fiscal year 1985 had been made prior to passage of the act and funding for these centers would not be provided in fiscal year 1985.

Could the gentleman advise me as to the discretionary funding levels for vocational education in this bill and if, in fact, the Department should not be in a position to fund these centers?

Mr. NATCHER. Mr. Chairman, if the gentleman will yield; the gentleman is correct. The committee bill provides $10,178,000 for the Carl D. Perkins Act. Accordingly, the Secretary of Education is required, as outlined in the law, to fund these centers since this is the first fiscal year that the program has operated under the reauthorized statute.

Mr. BIAGGI. I appreciate the gentleman's comments and expect that the Department will review its funding priorities in fiscal year 1986 in light of these comments and the statute.

Mr. ROSE. Mr. Chairman, will the gentleman yield?

Mr. RAY. I yield to the gentleman from North Carolina.

Mr. ROSE. Mr. Chairman, would the chairman engage in a brief colloquy with me?

Mr. NATCHER. Certainly.

Mr. ROSE. Mr. Chairman, under the leadership of the gentleman from Kentucky, earlier this year I testified before the gentleman's committee about the atrocities that many of us were concerned about at the Head Injury Clinical Research Center at the University of Pennsylvania. The gentleman very patiently listened to us and the gentleman asked his staff to investigate. Mrs. Heckler took certain action and now I understand from the dean of the School of Medicine at the University of Pennsylvania that the Head Injury Clinical Research Center has been closed and, according to his word to my office this morning, would remain closed.

I have prepared an amendment which I had discussed with the gentleman from Kentucky that would ask Congress to say that none of the funds in this bill should be used to fund the Head Injury Clinical Research Center at the University of Pennsylvania.

Could I now ask the gentleman, since the center has been closed, Mr. Chairman, and since this action has been taken, it will not be necessary and we certainly will not offer an amendment; but in the gentleman's opinion, will any of the funds in this bill be used in any way to fund the Head Injury Clinical Research Center at the University of Pennsylvania?

Mr. NATCHER. Mr. Chairman, if the gentleman will yield, first I want the gentleman from North Carolina [Mr. ROSE] to know that we appreciate the assistance that the gentleman has given to our subcommittee on this matter. The gentleman not only appeared before the subcommittee and made an excellent statement, but the gentleman has been nice and kind enough to talk to the gentleman from Massachusetts [Mr. CONTE] and myself on a number of occasions about this matter.

This laboratory is now closed. It will remain closed. There is no money in this bill for the operation of that laboratory and the gentleman is mainly the reason why this took place.

Mr. ROSE. Mr. Chairman, I thank the gentleman from Kentucky for that and for his willingness to listen to us. It characterizes the gentleman's whole career in this body that he has been so willing to listen to his colleagues when we had a concern, some-

times that was a little controversial. We appreciate the gentleman's help.

Mr. GUNDERSON. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I rise to engage the distinguished chairman of our committee and the distinguished ranking member in a colloquy to clarify three particular areas of the bill.

I want to first compliment both gentleman on the excellent legislation which they have brought forth to us. I do, however, want to bring three concerns up and ask these gentleman their opinion exactly what was intended.

One area in which there seems to be a rather glaring cut is in the area of guaranteed student loans. We note that the gentleman's proposal calls for a $1,083 million reduction in guaranteed student loans for 1986 over 1985.

Could the gentleman somehow assure the Members that we will have adequate funds to meet the guaranteed student loans in this country?

Mr. NATCHER. Mr. Chairman, if the gentleman will yield to me at this point, in the supplemental appropriation bill that was signed into law on August 15 by the President, we carried $720 million additional money for guaranteed student loans. There was a funding deficit as far as this particular account was concerned.

In addition to that, Mr. Chairman, for guaranteed student loans, the committee has approved the 1986 budget request of $2,714,482,000, but has not agreed to the program changes requested as part of the budget. If no legislative changes are made by Congress during fiscal year 1986, the amount provided may be insufficient to meet program costs. Thus a supplemental budget request will probably be necessary for 1986. This is an entitlement program and appropriations have to be provided to meet the costs of the program authorized by law.

I would like for the gentleman to further know that it is the intention of our subcommittee, the distinguished gentleman from Massachusetts [Mr. CONTE], the ranking member, and all the other members of the subcommittee, that we intend to follow this matter carefully to see that adequate funds are appropriated.

Mr. GUNDERSON. Mr. Chairman, I appreciate the gentleman's comments.

Mr. Chairman, as we consider H.R. 3424 today, it is clear that Congress is maintaining the longstanding Federal commitment to education. For the most part, funding levels proposed for fiscal year 1986 are equal to those provided in the current fiscal year.

Specifically, in the postsecondary education area, $933 million is appropriated for vocational and adult education and while $4.910 billion will be spent on student financial assistance, including $3.612 billion on Pell grants, $412 million on supplemental educational opportunity grants [SEOG's], $592 million on college work study, $217 million on direct loans, and $76 million for State student incentive grants.

In the guaranteed student loan area, $2.714 billion is appropriated—a sum which is $1.083 billion below the fiscal year 1985 level, which needed $720 million in supplemental appropriations this year. The committee indicates that this should be a sufficient sum, but that—in the event it is not enough—a supplemental appropriation can be requested since the GSL Program is an entitlement.

Quite frankly, if the committee bill is subject to criticism at any point, it is here. In recent years, we have all too frequently dismissed convenient underestimates of spending on entitlement programs by saying that we can always pass a supplemental appropriation. In this case, as well, we should provide what we truly feel is necessary to fund a program. If that means we have to make reductions elesewhere, so be it. Planned supplemental appropriations only lead to larger and larger deficits.

The committee bill also contains a $24 million, 2 percent reduction in higher education funding. A review of the various individual programs, however, demonstrates that they are all funded at their fiscal year 1985 levels except for the construction grant programs.

In the elementary and secondary education areas, title I funding—compensatory education for the disadvantaged—is maintained at $3.696 billion, the fiscal year 1985 funding level, as are impact aid, at $695 million, and bilingual education, at $173 million.

Within the special programs portion of the elementary and secondary education budget, funding is held constant for virtually every program—State block grants, $532 million, the Secretary's discretionary fund, $32 million, civil rights training and advisory services, $24 million, and the women's educational equity fund, $6 million.

Only the Follow-Through Program, reduced by $2.5 million to a $7.5 million appropriation, the maximum authorized by law, and the math and science education programs, reduced by $100 million due to no 1986 authorization and no departmental explanation of how previous appropriations were spent, did not receive the same level of funding as they did in fiscal year 1985.

In short, Mr. Chairman we are keeping within the overall spending limitations of fiscal year 1985 while, at the same time, maintaining the Federal commitment to education. In a word, access to education is maintained.

Similarly, H.R. 3424 also preserves the delicate balance between maintaining fiscal responsibility and providing necessary health services and research.

For example, H.R. 3424 continues to fund programs authorized under the Nurse Training Act. This appropriation is vital in our continuing quest to provide quality health care to millions of Americans annually.

The bill also directs research funds to the paramount medical issue of our time, AIDS. With the additional Federal commitment contained in H.R. 3424, it is our hope that an effective treatment and an ultimate cure can be developed in the very near future.

Finally, H.R. 3424 retains funding for essential job training and work experience programs, but at slightly reduced level—a total of $3.621 billion for the Job Training Partnership Act, $128 million below fiscal year 1985, a 3.5-percent decrease. That total figure includes $1.863 billion for title II-A; $23 million less than fiscal year 1985, a 1.2-percent reduction, $725 million for summer youth employment the same as fiscal year 1985, and $640 million for the Job Corps, $23 million more than fiscal year 1985, a 3.6-percent increase.

The WIN Program, which assists AFDC recipients to gain employment and work experience, is also retained at a $250 million level, $17 million less than fiscal year 1985, a 6.8-percent cut.

In summary, Mr. Chairman, the committee has done a credible job under difficult fiscal circumstances.

Mr. CONTE. Mr. Chairman, will the gentleman yield?

Mr. GUNDERSON. I yield to the gentleman from Massachusetts.

Mr. CONTE. Mr. Chairman, I might add one other item here. Under the budget resolution, both the Senate and the House Education Committees have received instructions under the reconciliation process to cut down the amount of spending for the GSL Program.

The Chairman, the gentleman from Kentucky, is absolutely right. We have always provided the amount required to fully fund the GSL Program. If a supplemental is necessary, we will give that our immediate attention, and move an appropriation right away to provide the additional funds.

Mr. GUNDERSON. Mr. Chairman, I appreciate the gentleman's remarks.

Mr. Chairman, if I may move on to another subject, I am one of two Members who serve on the board of directors of Gallaudet College. I notice by the committee report that they are proposing $189,000 below what the President's budget request was for Gallaudet College. Can the gentleman comment on the amount that is being appropriated?

Mr. CONTE. The gentleman is absolutely right. The only reason we did that is to keep it at the 1985 level. For Gallaudet, it is a very small amount. We did that to almost every item in the budget. We tried to keep every item under or at the 1985 level.

Mr. GUNDERSON. Mr. Chairman, one final comment if I might, in the area of the Job Training Partnership Act. There is a $23 million cut in job training. Can the gentleman assure us that there will be adequate funds in the Job Training Program to maintain it at the 1985 level?

□ 1430

Mr. CONTE. Definitely. There is, I believe, an estimated carryover of $496,527,000, and that should be more than sufficient to cover the small reduction.

Mr. GUNDERSON. Mr. Chairman, I appreciate the gentleman's assurances, and would like to again commend both our chairman and ranking member.

The CHAIRMAN. The Chair would like to inform the Committee that at this point the Chair is only entertaining those amendments that are not prohibited by clause 2(c) of rule XXI.

AMENDMENT OFFERED BY MR. DORNAN OF CALIFORNIA

Mr. DORNAN of California. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. DORNAN of California: On page 38, after line 14, add the following new section.

"SEC. 211. Pursuant to United States Code title 42, paragraph 264, funds provided in this act for research into the causes and transmission of the acquired immune deficiency syndrome disease may be used by the Surgeon General for closing or quarantining as a public health hazard any bathhouse or massage parlor which in his judgment pursuant to law can be determined to facilitate this transmission or spread of the AIDS epidemic."

Mr. DORNAN of California. Mr. Chairman, the potential for damage to our society by this disease, properly called a venereal disease finally by the doctor in our country with most of the responsibility for doing something about it, the Under Secretary for Health, Dr. James Mason, is reaching almost catastrophic proportions.

At noon today, our time, 9 o'clock in Los Angeles, Mr. Rock Hudson died of this disease. I think that if all the Members had been at a luncheon that I sponsored last Thursday with Dr. James Mason, they would have heard him clearly say the following, which was also in last week's Washington Post. Dr. James Mason said:

We could stop transmission of this disease today if only homosexuals and intravenous drug users—

But they are another story—

were willing to observe certain precautions.

Certainly it is beyond question, beyond question to every doctor with whom I have spoken—and that is dozens—that the transmission of this disease is certainly furthered by bath houses and massage parlors. This is not a partisan issue. It was the mayor of San Francisco who temporarily got these bath houses closed. They were reopened with a proviso that the cubicle doors stay open in the bath houses. I do not know what that is going to accomplish.

In today's New York Times, there is an article with several quotes from the health officials in New York who are struggling with this enormous problem. The mayor himself said that he would have to quarantine a quarter of a million who are AIDS carriers. Mayor Koch, one of our former colleagues, said that such a quarantine is simply not possible.

Judge Hyman, who is hearing the case about the young boy whose parents are fighting to put him into the school system, who is not an AIDS carrier but an AIDS victim, and by all accounts will die within the next 2 or 3 years unless a cure is found said, "Why are AIDS patients with 2 or 3 months to live still allowed to circulate in public, infecting other people?"

So we have a problem that not many of us in this House know much about, and we have confusing briefings coming out from very skillful doctors in every one of our major cities. In this 2-hour luncheon downstairs last Thursday, which was supposed to be a half-hour luncheon, Dr. Mason admitted to me that the tail of this dragon is only 4 years old. We do not have conclusive answers on anything except this—that the bath houses are transmitting points for a disease that next year will have infected 18,000 people as victims, and we are already at a point where there are a million and a half carriers. Thirty-six hundred Americans have already died!

I announced publicly from the well 3 weeks ago that I would support any allocation of funds that could substantially help clinical research. I said I would support making those moneys available, and I have heard no one on either side of the aisle, or in either body, say he would not be willing to spend the tax dollars necessary to give relief to the victims. All you have to do is see these young victims on television and your heart goes out to them as they waste away. They make statements, and 2 weeks later, television stations bring back a videotape of a deceased person and replay his tragic final statements.

The dollars allocated now are $126 million. We had Members from both parties at my luncheon, where Dr. Mason said that OMB would soon be sending up a request for an additional $70 million. Like cancer research, we cannot just throw billions at it. We have to progress in a somewhat orderly manner, but I think the generosity of both bodies is unlimited, almost, on what we can do to turn back the tide on this modern-day plague. But certainly this amendment of mine is a tiny, small step forward to do something to help people who in many cases seem unable or unwilling to help themselves as far as stopping the transmission of this disease.

Mr. Chairman, I yield back the balance of my time but will engage in further colloquy and debate on this amendment if anybody so desires.

Mr. WEISS. Mr. Chairman, I move to strike the last word.

Mr. Chairman, let me start off by extending my appreciation to the Committee on Appropriations for reporting a bill which has a 90-percent increase in funding for AIDS, acquired immune deficiency syndrome, activities and I want to take this opportunity especially to commend the distinguished gentleman from Kentucky [Mr. NATCHER] for the leadership he has exercised to insure increased funding levels to fight this fatal disease. His efforts will bring us to halting this dreaded epidemic and finding a cure for those already suffering.

I also want to express my appreciation to the learned gentleman from Massachusetts [Mr. CONTE], who has joined in that effort, and to my friend, the gentleman from California [Mr. ROYBAL], who has worked so effectively to provide adequate funding levels.

Let me address very briefly the amendment that has been offered by the gentleman from California [Mr. DORNAN].

The substance of the amendment, which says in essence that the Surgeon General may be allowed to use funds for closing or quarantining as a public health hazard certain facilities simply restates the obvious. It restates authority that the Surgeon General already has relating to infectious or contagious diseases. So the amendment really does nothing new and there is no way that one can really oppose it. One would hope that the Surgeon General, in whatever action he decides to take regarding facilities in any locality in this country, would in fact recognize that the local public health officials are the best ones to rely on as to what kind of action should be taken. Historically, that has been the procedure that has been followed by the Surgeon General and I would hope and expect that the same process would be followed in regard to this particular dread disease.

Mr. GREEN. Mr. Chairman, will the gentleman yield?

Mr. WEISS. I would be delighted to yield to the gentleman from New York.

Mr. GREEN. I thank my colleague from New York for yielding.

Mr. Chairman, it is a fact that there are public health experts who believe that it would be a serious mistake in terms of trying to reach out and educate the at-risk population to close places like this where some members of the at-risk population tend to gather.

Mr. WEISS. I thank the gentleman for that point, and it is very important because one of the things that may be done by the offering of this kind of an amendment is to suggest that in some fashion the very people whose lives are being lost to this disease are in some way cavalier and disregarding of

the nature and the impact of that disease.

That happens to be directly contrary to the fact. The Centers for Disease Control reported in June 1984 that in New York City rates of gonorrhea among men aged 15 to 44 declined to their lowest rates in the past 7 years.

□ 1440

There was a story in the New York Times on September 22 of this year that said that in New York City, sexually transmitted diseases have decreased by 80 percent over the last 2 years among gay men. We are talking about venereal disease. Over the last 3 years, there has been a 72-percent decline in sexually transmitted diseases among gay men in San Francisco.

Obviously in those two cities, which have been the hardest hit by this awful disease, there has been concurrently, because of efforts undertaken by the gay community and the public health organizations of those cities, a very positive and effective educational program as to what constitutes safer sex practices and what constitutes dangerous and unsafe sex practices.

So the gentleman's point is well taken that in many ways the bath houses being open may provide an opportunity for people to be educated about the dangers of AIDS and how the disease is spread.

The CHAIRMAN. The time of the gentleman from New York [Mr. WEISS] has expired.

(By unanimous consent, Mr. WEISS was allowed to proceed for 3 additional minutes.)

Mr. WEISS. With the broad powers that the Surgeon General already has this amendment gives him no additional powers whatsoever. I would hope that in exercising that power he would rely on the advice of local public health officials.

There is a suggestion at least implicit in some of the discussion that in some way this disease affects only or preponderantly members of the male homosexual community. It should be noted, however, that in other parts of the world, it is members of the heterosexual community who through sexual contact have been the prime targets of this dreaded disease. In Central Africa, in Zaire, for example, it is a heterosexual disease, and the ratio of disease affecting men as compared to women is 1.1 to 1. So there is no occasion for any of us to stand back and to think that AIDS only happens to those "other" people. This is a disease that can affect any and everyone in our society, and that is why the efforts of the Appropriations Committee under the leadership of the gentleman from Kentucky, Mr. NATCHER, are so important.

What we are doing by moving ahead to deal with this disease, to try to find a vaccine for it, to try to find effective treatment for it, is not only to help "others," but to help every one of us in this society, heterosexual and homosexual men and women, the young and the old. What is remarkable about the successful effort of the Congress to increase funding is that it has been done in the face of opposition from this administration. The $70 million increase which the gentleman from California [Mr. DORNAN] says that Dr. Mason was talking about is $70 million already included in this particular bill, at the insistence of the gentleman from Kentucky. The other body has decided to go along with that and Dr. Mason is attempting to persuade the administration to go along.

I would hope that all of us would watch the progress of this disease and the needs of the scientific community during this coming year, because we may find that even the $200 million in this bill may not be enough, for this year, and we may have to go much further in providing funds in order to deal effectively with this problem.

The AIDS epidemic has now afflicted over 13,000 Americans and caused over 6,600 fatalities. The tragedy deepens daily, with each life that is lost, and with each person that it touches. The Government estimates that over 40,000 individuals will have contracted the disease by the end of next year. AIDS does not discriminate—it knows no geographic boundaries and afflicts men, women and children in all walks of life. The American people, all across the country, are looking to the Federal Government to launch an exhaustive and immediate attack to resolve this health crisis.

The money in this appropriations bill is essential for funding continued and expanded research on AIDS, especially in the quest for a treatment and a vaccine. The appropriations committee wisely doubled the administration's request for NIH funding to insure that resources would be available to support collaborative work on the development and testing of drugs for the treatment of AIDS. In addition, over $20 million is allocated to CDC to support vital education and prevention programs to help reduce the transmission of this disease.

The subcommittee which I chair, the Intergovernmental Relations and Human Resources Subcommittee, recently held two field hearings on AIDS in New York City and San Francisco. In both cities, researchers, public health officials, and health care providers urged the Congress to continue its leadership role in appropriating additional funds for AIDS activities. I am proud that the Appropriations Committee has heeded this call and urge that all of us continue to monitor the situation in order to assess whether additional funds will be needed in the upcoming months. The health of all Americans depends on this commitment.

Mr. WAXMAN. Mr. Chairman, I would only point out that this amendment does not give the Surgeon General any authority that he and the Secretary do not have under the Public Health Service Act. If some new power were to be authorized here, clearly the amendment would be out of order on an appropriations bill.

I would also say that I hope that the Surgeon General and the Secretary would use careful judgment in exercising the authority of the Public Health Service Act. The authority is tightly circumscribed and most responsibility for the control of infectious diseases has been traditionally left to the State and local authorities.

I will vote for the amendment, but I would urge the Secretary and the Surgeon General to use the ability that it restates with great discretion.

Mr. NATCHER. Mr. Chairman, I move to strike the last word.

Mr. Chairman, first I want to commend the gentleman from New York, Mr. Weiss, for the role that he has played in regard to this matter pertaining to AIDS and the amount of money that is in the bill. Many months ago, the gentleman, along with several other Members, I recall the gentleman from New York [Mr. GREEN], and several others appeared before our committee and testified concerning this matter. It is through the help of these Members, Mr. Chairman, that we were able to bring this bill out with $189,666,000 in the bill for this particular matter.

Mr. Chairman, as far as this amendment is concerned, we have no objection to this amendment on this side.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California [Mr. DORNAN].

The question was taken; and the Chairman announced that the ayes appeared to have it.

Mr. WALKER. Mr. Chairman, I demand a recorded vote, and pending that, I make the point of order that a quorum is not present.

The CHAIRMAN. The Chair will count. Fifty-two Members are present, not a quorum. Pursuant to the provisions of clause 2 of rule XXIII, the Chair announces that he will reduce to a minimum of 5 minutes the period of time within which a vote by electronic device, if ordered, will be taken on the pending question following the quorum call. Members will record their presence by electronic device.

The call was taken by electronic device.

The following Members responded to their names:

□ 1455

The CHAIRMAN. Four hundred twenty-three Members have answered to their names, a quorum is present, and the Committee will resume its business.

□ 1505

RECORDED VOTE

The CHAIRMAN. The pending business is the demand of the gentleman from Pennsylvania [Mr. WALKER] for a recorded vote.

This will be a 5-minute vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 417, noes 8, answered "present" 1, not voting 8, as follows:

NOES—8

Clay	Dellums	McKinney
Conyers	Dymally	Roybal
Crockett	Green	

ANSWERED "PRESENT"—1

Gonzalez

NOT VOTING—8

Addabbo	Fiedler	Wright
Alexander	Martinez	Zschau
Boulter	Rodino	

Mr. BROWN of California changed his vote from "no" to "aye."

So the amendment was agreed to.

The result of the vote was announced as above recorded.

PERSONAL EXPLANATION

Mr. BOULTER. Mr. Chairman, on rollcall No. 328, the vote on the amendment offered by the gentleman from California [Mr. DORNAN], I was inadvertently detained because of my attendance at a meeting concerning the fiscal year 1986 farm bill. Had I been present, I would have voted "aye."

Mr. NATCHER. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I ask unanimous consent that all debate on the bill and all amendments thereto conclude not later than 4 o'clock.

The CHAIRMAN. Is there objection to the request of the gentleman from Kentucky?

PARLIAMENTARY INQUIRY

Mr. DANNEMEYER. Mr. Chairman, reserving the right to object, I would like to make a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. DANNEMEYER. Would this limitation as to time pertain as to any amendment that may be offered at the conclusion of the bill, only conditioned upon preventing the committee from rising?

The CHAIRMAN. After 4 o'clock amendments would not be debatable, unless they are printed in the RECORD and protected by the 5-minute rule.

Mr. DANNEMEYER. This limitation would then be applicable to an amendment that this Member seeks to offer at the end of the bill that can only be offered on condition that the Committee be prevented from rising, is that right?

The CHAIRMAN. After 4 o'clock.

Mr. DANNEMEYER. I object, Mr. Chairman.

Mr. NATCHER. Mr. Chairman, I wonder if the gentleman would withhold just momentarily.

Mr. DANNEMEYER. I reserve the right to object, Mr. Chairman.

Mr. NATCHER. Mr. Chairman, I would like to advise the distinguished gentleman from California and all the members of the committee that we have left two money amendments. Both involve trust funds. With the agreement of my distinguished friend from Massachusetts we will accept these two amendments, only two money amendments.

In addition, we have the Garcia amendment. According to my information, it has been worked out from the standpoint of all of those involved.

We have, Mr. Chairman, one or two other matters that should be handled within that time limit without any trouble at all. I would hope that the gentleman would not object.

We are going to take the two money amendments now, and I say to the gentleman that if we cannot handle the amendments that are now pending, I will ask unanimous consent to set this aside.

Mr. DANNEMEYER. What is the time that the gentleman suggests as a conclusion?

Mr. NATCHER. Four o'clock.

Mr. DANNEMEYER. Mr. Chairman, I withdraw my reservation of objection.

The CHAIRMAN. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

The CHAIRMAN. The unanimous consent request is agreed to.

Mr. NATCHER. Mr. Chairman, I yield back the balance of my time.

AMENDMENT OFFERED BY MR. RAHALL

Mr. RAHALL. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr.. Rahall: Page 8, line 18, strike out "$984,022,000" and insert in lieu thereof "$988,471,000".

Page 8, line 25, strike out "$15,297,000" and insert in lieu thereof "$19,746,000".

Mr. CONTE (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. RAHALL. Mr. Chairman, the amendment I, along with my colleagues in the West Virginia delegation, are offering would increase the level of funding from the Black Lung Disability Trust Fund suggested by H.R. 3424 by $4,449,000 for management, salaries, and expenses.

We are offering this amendment pursuant to the recommendation for this increased funding made by the Secretary of Labor Bill Brock, earlier this week.

There currently exists at the Labor Department a massive backlog of black lung cases waiting review, especially in the Office of Administrative Law Judges.

At this time, this backlog amounts to some 21,000 cases, many of which have been pending for years and even up to a decade.

Meanwhile, about 5,000 cases are added annually and the Department is capable of resolving only 5,400 cases a year.

Secretary Brock has recommended that $4,449,000 be added for fiscal year 1986 to eliminate this backlog. Of this amount, $3,523,000 is for increased staff at the Office of Administrative Law Judges and $926,000 is for increased staff in the Department's Solicitor's Office.

According to Secretary Brock, this proposal calls for an OALJ disposition level of 8,500 cases in each of the next 4 years.

I should also add that the Office of Management and Budget has given its general approval to this recommendation.

Mr. Chairman, many in the coalfields of this Nation are suffering great hardships due to the current backlog of black lung cases at the Department of Labor. I commend Secretary Brock for making this recommendation and for recognizing the problems caused by this situation.

The West Virginia delegation has been in the forefront of efforts to resolve this problem, as have been the gentlemen from Pennsylvania, AUSTIN MURPHY and JOHN MURTHA.

Further, I wish to compliment the chairman of the Subcommittee on Labor—HHS—Education, BILL NATCHER, for his diligent work on this matter and for allowing us to offer this amendment today.

Mr. Chairman, I yield to the distinguished chairman of the subcommittee, the gentleman from Kentucky [Mr. NATCHER].

Mr. NATCHER. Mr. Chairman, the gentleman who has presented this amendment, the gentleman from West Virginia, along with his three colleagues who sit right here with him, have talked with us about this matter for the last 2 or 3 days. In addition to that, I have in my hand a letter dated September 30 from the Secretary of Labor advising the committee that this is a serious matter and requesting additional funds. The money is definitely needed.

Mr. Chairman, this letter from the Secretary came too late for us to consider this in committee. The amendment would provide for a total of about $4.5 million. It would be trust fund money, as Mr. CONTE, the ranking minority member, will tell you. It does not affect our overall bill total as far as discretionary new budget authority is concerned and as far as our relationship to the 1985 level is concerned.

Mr. Chairman, on this side we accept the amendment.

Mr. CONTE. Mr. Chairman, will the gentleman yield?

Mr. RAHALL. I yield to the ranking minority member of the committee.

Mr. CONTE. I thank the gentleman for yielding.

Mr. Chairman, the minority accepts the amendment. We received the same letter from the Secretary of Labor. There is a tremendous backlog of these black lung cases. They need additional judges in order to clean up the backlog.

The amendment is a good amendment and should be adopted.

Mr. RAHALL. I thank the gentleman for his comments.

Mr. Chairman, I commend the ranking minority member, the gentleman from Massachusetts [Mr. CONTE] and the chairman of the subcommittee, my dear friend, the gentleman from Kentucky [Mr. NATCHER] for their strong support of this amendment. It is an effort on behalf of the entire West Virginia delegation whom I thank also for their efforts. I salute them.

Mr. MOLLOHAN. Mr. Chairman, will the gentleman yield?

Mr. RAHALL. I yield to my colleague from West Virginia.

Mr. MOLLOHAN. I thank the gentleman for yielding.

Mr. Chairman, I rise in support of Mr. RAHALL's amendment to increase the Department of Labor appropriations by $4.5 million so that the cruel backlog of black lung cases can be adequately addressed.

Mr. Chairman, the hopes and prayers of thousands of retired coal miners support this amendment. A backlog of 21,000 cases at the administrative law judge level of the black lung appeal process has created a situation that forces afflicted men to wait years and years for decisions on their appeals.

After much discussion and input by Chairman NATCHER, my West Virginia colleagues and myself, the Department of Labor has come up with a viable plan to attack the backlog. Mr. RAHALL's amendment is designed to begin implementing that plan.

Mr. Chairman, I implore my colleagues to see the justice of this amendment which would allow the Department of Labor to add 15 more administrative law judges to the force of men and women who will work hard to yield decisions on cases that have been languishing for years in the mire of bureaucracy. The men of West Virginia who labored long and hard in coal mines are entitled to timely decisions on their black lung appeals, and I know the other veteran miners of America share in that reasonable expectation. Thank you.

Mr. RAHALL. Mr. Chairman, I yield to the gentleman from West Virginia [Mr. STAGGERS].

Mr. STAGGERS. Mr. Chairman, I congratulate my colleague, the gentleman from West Virginia [Mr. RAHALL], for offering this amendment.

Mr. Chairman, I rise in strong support of this important amendment and commend my colleague from West Virginia [Mr. RAHALL] for his prompt action.

There are currently some 21,000 black lung cases awaiting review at the Department of Labor's Office of Administrative Law Judges. This tremendous backlog has resulted in some disabled miners or their widows waiting for years to receive benefits and medical care they so desperately need. Unfortunately, some miners die of black lung disease before their claims are reviewed and a decision is reached. This situation must not be allowed to continue.

Secretary Block has assured us that reducing this backlog is one of his highest priorities. Under the Secretary's direction, a Black Lung Task Force was established in July of this year to develop proposals to reduce the backlog. The task force has worked diligently on this problem and they have considered many options. Some of these options were administrative in nature and have been implemented by the Secretary at no additional cost.

In addition to these administrative changes, the Secretary has proposed the hiring of additional staff at the Office of Administrative Law Judges and at the Office of the Solicitor. The Office of Management and Budget has given general approval to this plan which will cost approximately $4.5 million. We are willing to work with the Secretary to ensure that he has the resources necessary to begin immediately to reduce the black lung backlog. The additional $4.5 million requested by Secretary Brock will allow the Department of Labor to increase staff, beginning in fiscal year 1986, so that processing of these 21,000 black lung claims can be expedited and the backlog eliminated.

I look forward to the day when coal miners, disabled black lung disease, can receive the benefits to which they are entitled in a timely fashion.

Mr. RAHALL. Mr. Chairman, I yield to my dear friend, the gentleman from West Virginia [Mr. WISE].

Mr. WISE. I thank the gentleman for yielding.

Mr. Chairman, I rise in support of this important amendment offered by the entire West Virginia delegation. It will mean that if somebody walks into my office right now and I have to tell him that it will take 7 years to have a hearing on his black lung claim, we have finally begun to cut that down. It has been agreed to by the administration, by both sides, and it goes a long way toward ending this inequity. I urge support of this amendment.

Mr. RAHALL. Mr. Chairman, I yield to the gentleman from Pennsylvania [Mr. MURPHY].

Mr. MURPHY. I thank the gentleman for yielding, and I thank the gentleman from West Virginia and his colleagues for offering this amendment. I rise in strong support of this amendment.

Mr. Chairman, we have held hearings all during this past 7 months on the tremendous backlog of black lung cases. We are now securing very favorable cooperation from Secretary Brock at the Department of Labor. He is attempting to assign personnel to handle these cases. These funds will certainly go a long way in helping to alleviate what has become a terrible backlog in our black lung claims.

Mr. CHAIRMAN. The question is on the amendment offered by the gentleman from West Virginia [Mr. RAHALL].

The amendment was agreed to.

AMENDMENT OFFERED BY MR. DASCHLE

Mr. DASCHLE. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. DASCHLE: Page 15, line 25, strike out "$124,485,000" and insert in lieu thereof "$132,975,000".

Mr. DASCHLE. Mr. Chairman, my amendment would restore the $8.49 million budget shortfall in funding for two veterans' employment programs administered by the Department of Labor during the next fiscal year. The Department of Labor budget request for fiscal year 1986 did not provide sufficient dollars to fund the legislatively mandated personnel levels for the Disabled Veterans' Outreach Program [DVOP] and local Veterans' Employment Representatives Program [LVER].

Both programs are congressionally mandated and are funded from Federal Unemployment Tax Act [FUTA] revenues. Being a trust fund, these dollars do not delete or add to the Treasury's deficit. The projected fiscal year 1986 end-of-year balance in the FUTA Employment Security Administration account, from which the DVOP and LVER Programs are funded, is $920 million. Accordingly, the revenues for these programs are available and should be appropriated as intended by Congress.

For the DVOP, an additional $4,058,000 is required, based on current veteran population statistics, for a total of $64,903,000. For the LVER program, an additional $4,432,000 is needed, for a total of $55,073,000. I understand the Department of Labor, having recognized this shortfall, has already initiated a supplemental budget request for these funds. However, since the new fiscal year began yesterday, some States will have to proceed with some reductions in force of staff if we do not act quickly.

I approached the very able chairman of the subcommittee recently to discuss the amendment I am offering. The distinguished gentleman from Kentucky [Mr. NATCHER] has supported veterans programs throughout his distinguished service in the House and I wanted to seek his help in correcting the problem. The gentleman has been most cooperative and on behalf of our

veterans I want to thank him for his leadership. The shortfall is not the fault of the committee. The Office of Management and Budget underestimated the staffing requirements based on the formula contained in chapter 41 of title 38, United States Code.

The official population data received from the Veterans' Administration and Department of Defense indicates the need for 2,028 positions to comply with the mandate of Congress that there be one Disabled Veterans Outreach Program specialists for each 5,300 disabled and Vietnam-era veterans. The funding level contained in the committee bill would provide for 1,932 staff. This difference of 96 positions means, as I said previously, that some States will have to terminate the jobs of disabled veterans who hold these positions.

The measure before us contains funds for 1,489 staff-years for the local veteran employment representative program, also administered by the Department of Labor through the Employment Service. The 1,489 figure was based on forecasts of the number of veterans expected to register for services at local offices. Data now available supports a staffing level of 1,598 positions in order to comply with regulations implementing chapter 41 of the code. These positions are very important because local veterans' employment representatives supervise the delivery of mandated employment services to veterans in each local job service office.

Mr. Chairman, now that the administration has proposed the increase, why wait for a supplemental? If we don't restore the amount contained in my amendment, there will be a tremendous adverse impact on veterans throughout the country.

I therefore, urge the adoption of my amendment.

Mr. Chairman, I yield to the gentleman from Kentucky [Mr. NATCHER], the subcommittee chairman.

Mr. NATCHER. Mr. Chairman, one of the Assistant Secretaries of the Department of Labor has sent us a memorandum concerning this particular matter. This is an oversight on the part of the administration, as far as the Department is concerned, and is simply a short funding of two veterans' programs. This money is needed at this time, Mr. Chairman, $8,490,000.

We have no objection to the amendment on this side. We accept it.

Mr. DASCHLE. I thank the chairman.

Mr. Chairman, I yield to the gentleman from Massachusetts [Mr. CONTE], the ranking minority member of the committee.

Mr. CONTE. I join in the chairman's assessment of the amendment. We have looked the amendment over. There is certainly a great need for it. We have no objection to the amendment.

Mr. NATCHER. Mr. Chairman, if the gentleman will further yield to me, I would like the members of the committee to know that this $8,490,000 is trust fund money. Mr. Chairman, it does not change the new budget authority members in our bill.

Mr. DASCHLE. I thank the chairman for reemphasizing that fact.

Mr. Chairman, I yield to the gentleman from Mississippi [Mr. MONTGOMERY], the chairman of the Committee on Veterans' Affairs.

Mr. MONTGOMERY. I thank the gentleman for yielding.

Mr. Chairman, I rise in full support of this amendment. In 1980, the Congress enacted Public Law 96-466 which created the Disabled Veterans Outreach Program [DVOP]. This is a program designed to assist Vietnam-era veterans, especially disabled Vietnam-era veterans, in obtaining employment. The program utilizes employment specialists, many of whom are themselves disabled veterans, to develop job and training opportunities for veterans. The legislation authorizing this program calls for the assignment of one DVOP specialist for each 5,300 veterans of the Vietnam era and disabled veterans residing in each State.

Local veteran employment representatives [LVER] perform all of the functions which are delegated to the Secretary of Labor with regard to employment assistance for veterans. This program is administered through State employment offices, and provides counseling, placement assistance, job development, and job advancement activities for eligible veterans.

As the chairman of the Veterans' Affairs Committee's Subcommittee on Education, Training, and Employment, Mr. DASCHLE has done an admirable job of overseeing this important program. He has developed a good working relationship with the officials who administer this program in the Department of Labor. As Mr. DASCHLE noted, there is a shortfall in the funding for the DVOP and LVER Programs because of low estimates of veteran population relied on by the Office of Management and Budget. Mr. DASCHLE is a vigilant chairman, and I applaud his efforts on behalf of veterans seeking employment. This amendment will require no additional appropriations, since the funds for this program are drawn from the unemployment trust fund. I urge my colleagues to support the amendment so that the Secretary of Labor can provide the level of services required by law.

Mr. DASCHLE. I thank the chairman.

Mr. Chairman, I yield to the gentleman from Pennsylvania [Mr. EDGAR].

Mr. EDGAR. I thank the gentleman from yielding.

Mr. Chairman, I rise in strong support of the amendment offered by the gentleman from South Dakota. As a past chairman of the House Veterans Affairs Subcommittee on Education, Training and Employment I share his concern to maintain adequate funding levels for all veterans employment programs.

It has recently been brought to our attention that the Department of Labor budget request for fiscal year 1986 did not provide sufficient funding for the legislatively required personnel levels for the Disabled Veterans Outreach Program [DVOP] and Local Veterans Employment Representatives [LVER] Program.

We understand that the personnel level formula mandated in title 38, United States Code, for the DVOP Program and that required by regulations for the LVER program were improperly applied by OMB at the time of the President's fiscal year 1986 budget request. As a result, the funding totals currently contained in H.R. 3424, the Labor-HHS-Education Appropriations for fiscal year 1986, if enacted, would create a shortfall in DVOP and LVER personnel for this fiscal year.

The DVOP and LVER programs are congressionally mandated and are funded from Federal Unemployment Tax Act [FUTA] revenues. Being a trust fund, these dollars do not delete or add to the treasury's deficit. The projected fiscal year 1986 end-of-year balance in the FUTA Employment Security Administration Account, from which the DVOP and LVER programs are funded, is $920 million. Accordingly, we feel that the revenues for these programs are available and should be appropriated as intended by Congress.

For the DVOP Program, an additional $4,058,000 is required, based on current veteran population statistics, for a total of $64,903,000. For the LVER Program, an additional $4,432,000 is needed, for a total of $55,073,000. We understand that the Department of Labor has recognized this shortfall and has already initiated a supplemental budget request for these funds. Since the request is tied to the fiscal year 1987 budget process, however, it will be too late to fulfill their legislative requirements and States will proceed to initiate lay-offs of affected staff this fiscal year.

I believe the Office of Management and Budget is intentionally ignoring the will of the Congress and attempting to curtail a veterans' employment program by way of the appropriations process. We in the legislative branch cannot allow OMB to manipulate this process in a way which results in seriously diminished services to those veterans seeking employment assistance.

Mr. Chairman, the House Veterans Affairs Committee has made a strong

commitment through title 38, United States Code, in requiring the Department of Labor to fully fill these positions. Vietnam veterans and disabled veterans still have high percentages of unemployment.

I would like to express my appreciation for the consideration of this amendment on the part of the chairman of the subcommittee Mr. NATCHER and its ranking member Mr. CONTE. I would also like to commend the gentleman from South Dakota for his continuing hard work on behalf of Vietnam veterans and all veterans.

Mr. DASCHLE. I thank the gentleman from Pennsylvania.

The CHAIRMAN. The question is on the amendment offered by the gentleman from South Dakota [Mr. DASCHLE].

The amendment was agreed to.

AMENDMENT OFFERED BY MR. PORTER

Mr. PORTER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. PORTER: Page 17, insert after line 4 the following:

SEC. 103. Notwithstanding any other provision of this Act, none of the funds appropriated or otherwise made available by this Act may be obligated or expended prior to November 14, 1985, in order to enforce the decision of February 19, 1985, by the United States Supreme Court in *Garcia* v. *San Antonio Metropolitan Transit Authority et al, (SAMTA).*

Mr. PORTER, Mr. Chairman, this is the amendment that I referred to in the general debate. It does exactly what the Clerk read. It defers the enforcement of the Garcia decision by the Department of Labor to November 14, 1985.

I yield to my chairman.

Mr. NATCHER. Mr. Chairman, before the gentleman from Pennsylvania [Mr. MURPHY] moves to strike the last word, I want the gentleman from Illinois and the gentleman from Pennsylvania [Mr. MURPHY] and the chairman of the committee involved in this particular matter, Mr. HAWKINS, to know that on our subcommittee we appreciate their efforts. This matter has been worked out by all of the groups that were interested, Mr. Chairman. As far as the amendment that is now being presented, there is no reason why every Member of this committee cannot vote for this amendment. I want to thank both of these gentlemen and all of those involved in working this matter out.

Mr. PORTER. I thank the gentleman.

Mr. MURPHY. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I want to thank the gentleman from Illinois for offering this amendment and in cooperating and making it in the form that he has. It is merely an extension of time to allow the Education and Labor Committee to address a very serious problem, the effects of the Garcia case on municipal government.

I want to thank the gentleman from Kentucky [Mr. NATCHER] and the gentleman from Massachusetts [Mr. CONTE] for their cooperation in the full committee in allowing us sufficient time in the Education and Labor Committee to properly address this matter. I want to thank the majority of the members of that committee who gave us the additional time to hold a hearing, schedule another hearing and look into such things as compensatory time, comp time, during the gap period that is now allowed in the National Labor Relations Act, should we allow an accumulation of comp time, how should we define "volunteer workers," the calculation of the basic wage rates, honoring labor agreements, protecting our municipalities from retroactive liability. These are very serious matters. I want to say that we have not delayed, Mr. Chairman. I want to assure my colleagues on both sides we have not delayed. We are addressing the problem. I know the problem, although it may have originated last spring with the Supreme Court decision, we heard nothing about it here in Congress until the Secretary of Labor placed an arbitrary date of October 15 for enforcement. We have been racing against that time since following our summer recess. We are addressing the problem. I want to thank my chairman, the gentleman from California [Mr. HAWKINS], for his guidance in the matter, the gentleman from Texas [Mr. BARTLETT] and the gentleman from Wisconsin [Mr. PETRI] on the minority side. We are attempting to bring this about to a favorable resolution, and I appreciate the additional time.

Mr. BARTLETT. Mr. Chariman, will the gentleman yield?

Mr. MURPHY. I yield to the gentleman from Texas.

Mr. BARTLETT. I would like to add my compliments and I think the gratitude of all of the Members of this House and municipal and State government employees everywhere to the gentleman from Pennsylvania [Mr. MURPHY] for taking this issue seriously, for not only agreeing to this 30-day extension of time but for the diligence he has shown during the last several months in attempting to arrive at a legislatively precise settlement of the issues that he recited and other issues that are involved.

The Supreme Court ruled in Garcia that Congress must now go in and make a specific legislative determination as to what our intent is with regard to State and municipal employees. So my special commendation goes to the chairman of the subcommittee, the gentleman from Pennsylvania [Mr. MURPHY], and the chairman of the full committee, the gentleman from California [Mr. HAWKINS], for their willingness to address this issue legislatively.

Mr. MURPHY. I thank the gentleman, and I want to assure all of the Members that the gentleman from Texas [Mr. BARTLETT] and I have been spending 10 to 12 hours every week since Labor Day on this very issue.

Mr. HAWKINS. Mr. Chairman, will the gentleman yield?

Mr. MURPHY. I yield to the gentleman from California.

Mr. HAWKINS. Mr. Chairman, I really do not intend to delay, but may I, in answer to some remarks made earlier, assure the membership that the Education and Labor Committee, as well as the subcommittee headed by the gentleman from Pennsylvania [Mr. MURPHY], are moving diligently ahead. The parties involved in this problem are negotiating on a daily basis. They are meeting in good faith, including the National League of Cities, the Conference of Mayors, the AFL–CIO, and other relevant groups. I would hope that we use some prudence ourselves in remarks that we make so as not to in any way disturb what I consider to be very critical negotiations. I think in some degree of caution that we are very close to a resolution of the problem, and I would hope that within the next few days, even before this expiration date that is included in this motion, that before that date we would have a resolution of the problem.

May I again thank the gentleman from Illinois [Mr. PORTER] for the amendment that he has offered and for the changes that he has made. I think they are in the direction of helping out in the negotiations, and for that we are certainly thankful.

Mr. CONTE. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I want to compliment the gentleman from Pennsylvania and expecially the gentleman from California, [Mr. HAWKINS] for hammering this amendment out today. We fought the amendment as originally proposed in committee, as you well know, myself and BILL NATCHER. I thought it was an improper place to propose it. It belonged in your jurisdiction, because the amendment as proposed in committee was such a far-reaching one. We won by only one vote. It was a very, very close vote. So I want to commend you gentlemen today for working out the changes and restrictions in scope, and because of the changes, and the work that has been done to make it more acceptable, I now support the amendment as proposed here today.

I yield to my good friend, the gentleman from California [Mr. HAWKINS].

Mr. HAWKINS. May I say that this is a distinctly different amendment, and I commend the committee for its position in the committee. Since that

time, the gentleman from Illinois has I think wisely made the changes so that in your wisdom you were correct, you would be correct today in voting to support the amendment which is now before us.

Mr. CONTE. I thank the gentleman.

Mr. VALENTINE. Mr. Chairman, will the gentleman yield?

Mr. CONTE. I yield to the gentleman from North Carolina.

Mr. VALENTINE. Mr. Chairman, I rise in support of the amendment offered by the gentleman from Illinois.

As I have said before in this Chamber, the Garcia decision struck a potentially crippling blow against State and local governments throughout the United States. I am delighted that my distinguished colleague from Illinois has introduced this measure to delay enforcement of the Garcia decision until corrective action can be taken.

In the Garcia decision, the Court sharply curtailed the traditional practice of allowing many employees of State and local governments to take compensatory time off in lieu of overtime pay. The decision even as the effect of preventing many of these employees from volunteering their time to local authorities.

This decision will hurt the very group it apparently intended to help. Local government employees often "bank" their compensatory time off. This has been one of the few extra benefits for professionals whose dedicated efforts on behalf of their fellow citizens cannot be adequately compensated.

This decision will also result either in much heavier burdens on taxpayers or in decreased government services. Gov. Jim Martin of my State has testified that the decision will cost North Carolina more than $15 million in additional overtime payments in fiscal years 1985-86 alone. The State will also have to acquire an additional 100 highway patrol officers merely to maintain the current level of enforcement. In some localities, services will almost certainly be curtailed.

In testimony before the Senate Labor Committee, Secretary of Labor William E. Brock expressed the administration's support for legislation to correct the Garcia decision. In his testimony, Secretary Brock pointed out that both local officials and local government employees are concerned about the Garcia decision. This concern by employees are well as officials merely underscores the fact that the system for delivering State and local services was working well before the Garcia decision. State and local authorities need the flexibility that they had before this decision.

The potential impact of the Garcia decision is staggering. Virtually every service provided by State and local governments, including the life and death matters of law enforcement, fire protection, and emergency medical services, is treatened by the Court's ruling.

We cannot allow these essential services to be curtailed. The welfare of our citizens, as well as the interests of State and local government employees across the Nation, demands that the Congress take action. Several bills to correct the Garcia decision have been introduced, and the Committee on education and Labor is holding hearings on this issue. This amendment simply provides an extra month for this legislation to be considered fully by both Houses of Congress.

This amendment provides vital breathing space for our State and local governments. I urge my colleagues to support this measure.

Mr. JEFFORDS. Mr. Chairman, I want to commend Mr. PORTER for working with members of the Education and Labor Committee and for offering this amendment. The impact of the Garcia decision is far-reaching and complex. I think many of those parties involved—Congress, labor, State and local government—are only now beginning to understand the full effects of this decision.

With this increasing knowledge, I think and hope that there is an increased willingness to sit down and work out a mutually acceptable compromise. I know my colleague, Mr. PORTER, wants to see a substantive solution to these problems, and I think the vast majority of Members want to see the same result.

I may be guilty of overoptimism, but I think the Education and Labor Committee, working with the interested parties, the administration and the other body, can resolve this issue in the next few weeks. While I cannot speak for them, I think the chairmen of the committee and the Labor Standards Subcommittee, Mr. HAWKINS and Mr. MURPHY, desire an resolution of this issue as much as I do. I might add that the prudence they have exhibited to date is understandable given the honest misunderstandings that have surrounded this debate for the past few months.

For the moment, however, the question before us is whether we should further delay enforcement of the Supreme Court's decision. Although I have some serious concerns about the approach this amendment takes, I think at this point it is the only option we have.

Legislating on an appropriations bill is a poor way to do business. We all know that. And we all know that the Education and Labor Committee has not yet acted on this issue. Let me make it clear that I do not fault our Chairmen, Mr. HAWKINS of the full committee and Mr. MURPHY of the subcommittee, for the progress of their deliberation. Let's face it—there is a lot of misunderstanding on this issue. It only stands to reason that we should try to sort through the rhetoric and work out a reasonable solution.

I think we can do this, and I think we can do it quickly. How quickly? I don't know. And for that reason, a limited delay of enforcement, despite the many problems it creates, should be enacted.

If we can reach an agreement tomorrow or 2 weeks hence, the issue is moot. But I can't guarantee we will. And rather than begin enforcement only to alter the particulars of enforcement shortly thereafter seems to me about the worst of all possible worlds.

With misgivings, and with hope for a better solution, I urge adoption of this amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois [Mr. PORTER].

The amendment was agreed to.

AMENDMENT OFFERED BY MR. FORD OF TENNESSEE

Mr. FORD of Tennessee. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. FORD of Tennessee: Page 20, after line 18, insert the following:

For carrying out section 406 of the Public Health Service Act through a grant to the University of Tennessee Center for Health Sciences in Memphis, Tennessee, for the establishment of a center for basic and clinical research into, training in, and demonstration of, advanced diagnostic, prevention, and treatment methods for cancer, $25,000,000.

Mr. NATCHER. Mr. Chairman, I reserve a point of order on the amendment offered by the gentleman from Tennessee.

Mr. FORD of Tennessee. Mr. Chairman, the amendment calls for the appropriation of $25 million to a comprehensive cancer research center in Memphis, TE.

Mr. Chairman, each year over 850,000 new Americans are treated as having some form of cancer, and about half of those will die in the course of a year. The National Cancer Institute proposes to reduce cancer mortality by 50 percent by the year 2000.

Frankly, Mr. Chairman, with our current rate of investment in research, this is merely a pipe dream to think in terms of a 50-percent reduction. It simply will not happen without new comprehensive cancer research centers in this Nation.

Mr. Chairman, the Midsouth is one of the last remaining major geographics in population bases within the Nation without ready access to a comprehensive cancer research center. All other ingredients for this complete spectrum of medical services already exist in the Memphis medical area.

□ 1535

A children's comprehensive cancer research center; St. Jude's Children's Research Hospital is fully operational in Memphis and will help bring biomedical scientists and clinical investigators to that region and to the Midsouth. Mr. Chairman, planning has already been underway for a 5-year period to activate a Memphis compre-

hensive cancer center. The cost of such a center has been carefully worked out by the medical institution. In my amendment that I offer today, it will provide Federal funds necessary to get this center off the ground.

We have already submitted the necessary documents to the National Institutes of Health. We have already been in contact with that Institute because the funds that we are talking about today are brick and mortar funds.

I would call upon my colleagues in this Congress to join with us today. Tennesseans, Mississippians, Arkansans, and also the foothills of Missouri to bring that cancer research comprehensive center to that Midsouth region.

Mr. JONES of Tennessee. Mr. Chairman, will the gentleman yield?

Mr. FORD of Tennessee. I yield to the gentleman.

Mr. JONES of Tennessee. I thank the gentleman for yielding to me.

Mr. Chairman, I rise in support of the amendment being offered by my colleague from Tennessee, Mr. FORD. He has already provided an excellent explanation of it and its justification.

It is my contention that Memphis, and the medical research personnel and facilities there, can be readily adapted to joining in the national crusade against cancer. Actions have already been taken by the State of Tennessee to strengthen the capabilities of the University of Tennessee Center for the Health Sciences. St Jude's Children's Research Hospital has already developed as one of the premier cancer research facilities in the world.

Finally, the Memphis area has developed as one of the great medical centers of this country. It is located in the middle of a tristate area and is one of America's great cities. Where would it be better, than Memphis, TN, to locate such a cancer research center as this amendment provides? To approve this amendment will allow the Federal Government to build on what is already an excellent base of medical knowledge, commitment, and skill. I urge that my colleagues vote for this amendment.

Mr. FORD of Tennessee. I thank my colleague for those comments and I would like to say to my colleagues once again that we have a unique opportunity to provide a comprehensive cancer research center in the Midsouth. I certainly would hope that the chairman of the subcommittee, Mr. NATCHER, as well as Mr. WAXMAN on Health and Environment and the Subcommittee on Commerce would see fit to in some way support and embrace this amendment that is before the House today.

Mr. WAXMAN. Mr. Chairman, will the gentleman yield?

Mr. FORD of Tennessee. I yield to the gentleman.

Mr. WAXMAN. I understand the frustration and feeling that the gentleman must offer this amendment at this time. One of the problems that we have had is we have not passed the authorization bill that would protect the cancer centers program around this country.

We are now in conference on the NIH bill. I am hopeful that in the next several weeks we will be able to reach an agreement with the Senate and send a bill to the President that he will agree to.

I would be reluctant to support this specific amendment only for this one reason: I think it is inappropriate to spell out a specific cancer center or specific research program and to designate it without letting the people who make the peer review of these programs have the say as to what program or center ought to be recognized for a grant of money.

The CHAIRMAN. The time of the gentleman from Tennessee [Mr. FORD] has expired.

(By unanimous consent, Mr. FORD of Tennessee was allowed to proceed for 3 additional minutes.)

Mr. FORD of Tennessee. Mr. Chairman, I continue to yield to the gentleman from California.

Mr. WAXMAN. I would say to the gentleman that I know of the work of this particular center. I have certainly heard of their very fine reputation. Once we get the authorization bill adopted, it seems to me that when the cancer centers are protected, that this would be one of those that I understand would be high up for consideration for the funds that the gentleman seeks to have obtained through this bill.

I am hopeful that we will get that bill passed. I would hope that we would not go to a vote on this particular amendment because I do not really think it is the wisest thing for us to do. I share the gentleman's concern.

Mr. FORD of Tennessee. I certainly understand that we are talking about the appropriations and the authorization bill has not been acted upon by the Senate. I would hope that the NIH 1985 budget is only $4 million for construction costs. I wanted to bring this amendment to the House floor because the applications are being submitted to the National Institutes of Health, but we will not be able to get those amendments in until the 1986 appropriations by this body or this Congress.

Hopefully, the chairman of the subcommittee would certainly give us some support at NIH in saying that this particular project ought to be a priority to NIH in which we feel on the merits of this application it will be a high priority for the National Institutes of Health.

Mr. WAXMAN. If the gentleman would yield further, the reputation of this institution is very, very high. I would therefore guess that it would be high up for consideration. But I would not be in a position to say that one center or another should be given the designation by the NIH. I think it is their decision through their peer review.

Mr. FORD of Tennessee. Georgraphics, though. We are looking at, geographically speaking, Mr. WAXMAN, we are late in filing the application because of the St. Jude Children's Research Hospital in the city and the problems that we are having with that institution now. We have childhood cancer research. We must, in that region, have cancer research, and we feel that in the Midsouth region that this is the location.

I know it is not appropriate to name or identify the institution, but we have to, in this particular case, because of the geographical problem that we are faced with.

Mr. WAXMAN. If the gentleman would yield further, I would hope and expect that NIH would look at the geographical considerations as well as everything else they will have before them. Under those circumstances, I am sure they are going to want to review this one carefully.

Mr. SUNDQUIST. Mr. Chairman, will the gentleman yield?

Mr. FORD of Tennessee. I yield to the gentleman.

Mr. SUNDQUIST. I thank the gentleman for yielding to me.

Mr. Chairman, I rise in support of his amendment and I want to make the point that this is bipartisan support that we have for a very critical problem in this country; that of cancer research. My distinguished colleague from Tennessee, Congressman JONES, has already explained this thoroughly, so I do not need to comment on it any further. But it is important to know that we must have geographical, regional cancer centers, and Memphis, as my colleague has described, is uniquely located, and has the facilities with St. Jude's and the University of Tennessee to qualify.

I am pleased that our colleague from California has pointed out the events in the next few weeks that are going to occur and feel confident that when he looks at this that we will find that Memphis uniquely qualifies.

The CHAIRMAN. The time of the gentleman from Tennessee [Mr. FORD] has again expired.

(By unanimous consent, Mr. FORD of Tennessee was allowed to proceed for 1 additional minute.)

Mr. NATCHER. Mr. Chairman, will the gentleman yield?

Mr. FORD of Tennessee. I yield to the gentleman.

Mr. NATCHER. Mr. Chairman, as pointed out by the distinguished gentleman from California, the chairman

of the subcommittee on health that is in charge of the authorizations for NIH, the gentleman knows that of course this project is not authorized and would be subject to a point of order.

I want to commend the gentleman on an excellent statement concerning this particular matter, and certainly after the authorization is enacted, and any time that the gentleman appears before our committee, he is going to get a good hearing.

Mr. FORD of Tennessee. I thank the distinguished subcommittee chairman for that.

Mr. Chairman, in light of that, I ask unamious consent to withdraw my amendment.

The CHAIRMAN. Is there objection to the request of the gentleman from Tennessee?

There was no objection.

Mr. DANNEMEYER. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I take the well at this time to explain my reasoning for requesting that the Committee do not rise so that this Member from California will have an opportunity of offering an amendment that relates to the prohibition on the use of funds. The proposed amendment reads as follows:

Add at the end, the following:

Sec. . None of the funds appropriated by this Act may be expended to issue or enforce any regulation, or fund any program which would permit some personnel in medical facilities to wear protective garments in treating AIDS patients and not permit other personnel to do so.

We Californians have about 10 percent of everything in America: About 10 percent of the people, but in this case, we have sadly, 25 percent of the AIDS cases currently existing in this country. About 13,000 people have AIDS. Half of them have died. As I say, 25 percent of those are in California. Forty percent are in New York City.

A set of circumstances came to my attention during the August recess that prompts me to draw your attention to this matter at this time. A lawyer from San Francisco called my office in Fullerton relating a situation about some nurses working in the San Francisco General Hospital. They are general practitioners taking care of routine patients, including AIDS patients.

□ 1545

These four nurses were told that intaking care of AIDS patients they could not wear gowns, masks, and gloves because they would impinge on the sensitivity of the AIDS patients. Bear in mind that every other health practitioner in that hospital taking care of AIDS patients wears gowns, masks, and gloves. These nurses were singled out, saying, "You cannot wear this protective clothing in the performance of your duties." It is weird to even think that this could exist. These nurses complained to CAL-OSHA and OSHA came from Sacramento to San Francisco to conduct an investigation. They asked, "Is this true?"

CAL-OSHA ruled with the nurses and said to the hospital administrators, "You may not discriminate against these nurses in the performance of their duties except in those cases where the doctors have notated on the chart of the AIDS patient that something else shall take place."

And what do you know? The day after CAL-OSHA issued its decision siding with the nurses against the discrimination, doctors went around to the AIDS patients in the San Francisco General Hospital and noted on the chart that the nurses were not to wear gowns, masks, and gloves. And get this: At the moment when the doctor himself was writing that notation on the AIDS patient's chart, that doctor was wearing not one set of gloves but two and a gown and a mask to protect his physical self and the ones he works with and his loved ones. But these doctors seek a different standard for these nurses in the performance of their duties.

In response to this situation, I wrote to the Director of HHS, Public Health and Human Services, and also the Public Health Service and complained that this situation is intolerable. These nurses should be able to protect themselves as they go about their duties. And today I received a response from PHS in which they said, "This is a matter that we will relegate to the discretion of the hospital in question." In other words——

Mrs. BURTON of California. Mr. Chairman, will the gentleman yield, please?

Mr. DANNEMEYER. Not at this time.

PHS is not going to do anything about this discrimination. The State has finessed it, PHS has finessed it, and I do not think we should permit this. There is uncertainty in the medical community as to whether AIDS can be transmitted by normal social contact, but those doctors and dentists and technicians and x-ray people and dietitians treating those AIDS patients are wearing gowns, masks, and gloves, and I happen to believe that those nurses should be permitted to do the same.

All my amendment says is that none of the funds appropriated by this act may be expended to issue or enforce any regulation or fund any program which would permit some personnel in medical facilities to wear protective garments in treating AIDS patients and not permit other personnel to do so.

Mr. CHAIRMAN. The time of the gentleman from California [Mr. DANNEMEYER] has expired.

(By unanimous consent, Mr. DANNEMEYER was allowed to proceed for 1 additional minute.)

Mr. DANNEMEYER. Mr. Chairman, I ask for the assistance of my colleagues to keep the Committee from rising so that this Member would be able to offer this relatively minor amendment. I am hopeful that we will not even have to keep the Committee from rising and that the Committee will accept it.

Mrs. BURTON of California. Mr. Chairman, will the gentleman yield?

Mr. DANNEMEYER. I am happy to yield to my friend, the gentlewoman from San Francisco, CA.

Mrs. BURTON of California. Mr. Chairman, I happen to represent the city of San Francisco, and the gentleman is talking about our general hospital. Now, I talked to the public affairs officer of the Department of Public Health at San Francisco General Hospital just a little while ago.

No. 1, nurses at San Francisco General have not been denied the right to wear protective clothing when treating AIDS patients. Both CAL-OSHA and the California Labor Relations Board heard the nurses' complaint and ruled in the hospital's favor.

No. 2, the doctors may wear whatever they want, and most of the doctors——

The CHAIRMAN. The time of the gentleman from California [Mr. DANNEMEYER] has again expired.

Mrs. BURTON of California. Mr. Chairman, could I have an additional minute. I am asking the gentleman.

Mr. DANNEMEYER. It is not my time.

The CHAIRMAN. Does the gentlewoman from California [Mrs. BURTON] seek recognition?

Mrs. BURTON of California. Mr. Chairman, I ask unanimous consent for 1 minute.

The CHAIRMAN. Does the gentlewoman move to strike the last word?

Mrs. BURTON of California. Yes; I do, Mr. Chairman.

Mr. KEMP. I have been on my feet, Mr. Chairman.

The CHAIRMAN. The gentleman is a member of the committee, and the Chair recognizes the gentleman from New York [Mr. KEMP].

Mr. KEMP. Mr. Chairman, I move to strike the last word.

The CHAIRMAN. The Chair recognizes the gentleman from New York [Mr. KEMP].

Mr. KEMP. Mr. Chairman, I would like to engage the chairman of the subcommittee in a colloquy, and then, if I have time left over, I would be glad to yield to other Members.

Mrs. BURTON of California. Mr. Chairman, will the gentleman yield for half a minute and let me finish my statement?

Mr. KEMP. Yes; briefly, I yield to my colleague, the gentlewoman from California.

Mrs. BURTON of California. Mr. Chairman I thank the gentleman for yielding.

No. 2, the doctors at San Francisco General Hospital may wear whatever they want, and most have chosen not to wear protective clothing. These are the doctors, mind you. This is even when examining AIDS patients. Other hospital personnel are treated like the nurses. No personnel are punished for unnecessarily using protective clothing. And the hospital follows the Center for Disease Control guidelines, as it should.

So all of the statements that the gentleman from California [Mr. DANNEMEYER] made are not true about San Francisco General Hospital.

Mr. DANNEMEYER. Mr. Chairman, will my colleague yield?

Mr. KEMP. Mr. Chairman, since I have the time, I will be glad to yield briefly. I have a very important colloquy that I would like to engage in with the chairman of the subcommittee, so I would appreciate the gentleman's using just a brief amount of time.

Mr. DANNEMEYER. Mr. Chairman, I can respond to my colleague, the gentlewoman from San Francisco, CA, to repeat that CAL-OSHA found the discrimination that I have described. One of the nurses' names is Watson. The recitations I made to the Members of this House are absolutely correct. Discrimination has been practiced against those nurses, and I would ask my colleague, who has a long history of exhibiting antidiscrimination and voting against discrimination to follow me in this instance, assuring to these nurses that they may have the same protection that other health care personnel in that facility have. What is wrong with that?

Mrs. BURTON of California. Mr. Chairman, if the gentleman will yield——

Mr. KEMP. Mr. Chairman, I am going to apologize to my colleagues, but I must reclaim my time. I am glad they had a chance to make their points.

Mr. NATCHER. Mr. Chairman, before the gentleman proceeds, would the gentleman be kind enough to yield to the gentleman from California [Mr. LEHMAN]? If the gentleman needs more time, we can seek to get additional time for him.

Mr. KEMP. I am happy to yield to the gentleman from California.

Mr. LEHMAN of California. Mr. Chairman, I thank the gentleman for yielding. I take this time for two reasons. First I want to commend the gentleman from Kentucky for his help on an issue important to my district and my State, targeted refugee aid, and to commend my good friend from California for his efforts in this regard as well.

I bring to the attention of this House the committee report language adopted unanimously by the full committee last week which directs OMB to release $11.5 million in disputed refugee funds. The gentleman from California led the effort to secure this language making it clear to OMB that Congress intended all $89 million appropriated for the Targeted Assistance Program in 1985.

I also would like to bring the attention of this body to a court order signed just hours ago by U.S. District Court Judge Robert P. Aguillar which instructs OMB to immediately release the disputed $11.5 million to eligible counties and ask unanimous consent to have the court order inserted into the RECORD of this debate.

Thank you Mr. Chairman, and again my commendation to my good friend and colleague for his efforts in protecting integrity and constitutional prerogatives of the Congress.

The court order follows:

UNITED STATES DISTRICT COURT NORTHERN DISTRICT OF CALIFORNIA

No. C 85-20593 RPA

TEMPORARY RESTRAINING ORDER AND ORDER TO SHOW CAUSE WHY PRELIMINARY INJUNCTION SHOULD NOT ISSUE

Don Edwards, Richard H. Lehman, Sala Burton, Howard Berman, Robert T. Matsui, Vic Fazio, County of Santa Clara, Lao Family Community, Inc., Bach Viet Association, Inc., and Teng Khang, on behalf of himself and all others similarly situated, plaintiffs, versus, Margaret Heckler, as Secretary of the United States Department of Health and Human Services, James Baker, as Secretary of the United States Department of Treasury, and Joseph Wright, as Acting Director of the Office of Management and Budget, Defendants.

Plaintiffs have moved for a temporary restraining order pursuant to Federal Rules of Civil Procedure 65. Defendants have filed a memorandum in opposition. The parties have appeared through their respective attorneys. After reading and considering the relevant papers and hearing oral arguments, the Court finds and orders as follows:

This case arises from a conflict between the legislative and executive branches of government over the interpretation of an appropriate bill. This Court finds that it has jurisdiction over this matter through the right of judicial review and further finds that all plaintiffs have standing to bring this action.

Good cause appearing therefor, the Court makes the following findings:

1. Plaintiffs have shown probable success on the merits;

2. Plaintiffs have shown possible irreparable harm;

3. Plaintiffs have shown that the balance of hardships tips decidedly in their favor.

Plaintiffs have shown probable success on the merits by establishing the intent of Congress to make available for obligation the full amount of $89,026,000. This finding is based on the following considerastions:

1. the decision of the Comptroller General, dated June 28, 1985, attached to plaintiffs' Memorandum of Points and Authorities in Support of a Motion for a Temporary Restraining Order and/or a Preliminary Injunction, as plaintiffs' Exhibit D;

2. the letter of the Comptroller General, dated September 26, 1985, attached as plaintiffs' Exhibit H;

3. the letter from Secretary Heckler to Congressman Edwards, dated July 26, 1985, attached as plaintiffs' Exhibit F; and;

4. an examination of the legislative history of the appropriation statute, Fiscal Year 1985 Continuing Resolution.

The plaintiffs have shown irresparable harm because of the lack of any alternate remedy at this late date for any person to enforce the Continuing Resolution. Congress' powers, pursuant to 2 U.S.C. § 683, have been nullified because the fiscal year will end prior to the expiration of the statutory period set forth in § 683, and the disputed funds will revert to the General Fund of the U.S. Treasury. Similarly, the Comptroller General cannot seek the relief authorized by 2 U.S.C. § 687 because the disputed funds will revert to the General Fund of the U.S. Treasury at the end of the fiscal year, prior to the expiration of the statutory period set forth in § 687. Finally, individual plaintiffs will be injured as a result of the unavailability of funds and will be unable to receive the employment training mandated by the Refugee Targeted Assistance Program.

The plaintiffs have shown that the balance of hardship tips decidedly in their favor. There is a lack of any other available remedies, and the funds are necessary to effectuate the legislative intent of the Continuing Resolution to assist the absorption of the continuing influx of refugees in the United States.

It is therefore ordered that defendants are hereby enjoined to make available for obligation the full sums ($89,026,000) appropriated by Congress for the Refugee Targeted Assistance Program in Fiscal Year 1985.

It is further ordered that defendants shall take all steps necessary to ensure that the full sums ($89,026,000) appropriated by Congress for the Refugee Targeted Assistance Program in Fiscal Year 1985 are released forthwith and do not revert to the General Fund of the U.S. Treasury at the end of the Fiscal Year 1985.

It is further ordered that defendants are hereby enjoined to obligate and disburse immediately the full sums ($89,026,000) appropriated by Congress for the Refugee Targeted Assistance Program in Fiscal Year 1985 to the recipient/grantee states and/or state agencies, in accordance with 45 C.F.R. §§400.4 and 400.5 and the Refugee Targeted Assistance Program.

It is further ordered that defendants and each of them appear before this Court on October 25, 1985, at 9:00 a.m., or as soon thereafter as the matter can be heard, in Courtroom 1, before the Honorable Robert P. Aguillar, United States District Judge and show cause then and there why a preliminary injunction should not issue in the form and with the terms contained in this Temporary Restraining Order.

A true copy of this Temporary Restraining Order shall immediately be served upon defendants by serving their counsel. Defendants shall personally serve upon counsel for plaintiffs all papers in opposition to this Order to Show Cause no later than 10:00 a.m. on October 11, 1985. Plaintiff shall personally serve upon counsel for defendants any papers in reply to defendants' opposition no later than 10:00 a.m. on October 18, 1985.

This Temporary Restraining Order shall remain in full force and effort through October 25, 1985, pursuant to the consent of all parties, or until further order of this Court, after which time it shall be void in accordance with Rule 65 of the Federal Rules of Civil Procedure.

It is so ordered.

Dated: October 2, 1985.

ROBERT P. AGUILLAR,
U.S. District Judge.

Mr. KEMP. Mr. Chairman, I would state to the subcommittee chairman, the gentleman from Kentucky [Mr. NATCHER], that many of us on both sides of the aisle are supporters of a Federal commitment to provide family planning services to the poor. Many of us, Mr. Chairman, have been concerned about the activities of some of the recipients of title X family planning grants who have, in our opinion, encouraged the use of abortions as a mechanism of family planning and have done so with Federal funds.

Most of us would agree, I think, that abortion by its very nature is not a method of family planning. In June the House defeated the reauthorization of title X of the Public Health Services Act under suspension of the rules because many Members wanted the opportunity to deal with this very important issue. The distinguished chairman of the subcommittee, the gentleman from Kentucky [Mr. NATCHER], did not include title X moneys in the bill because the program lacks an authorization, but the other body has included funding for title 10 at the subcommittee level.

Could the subcommittee chairman give us his assurance that I or some other Member who is concerned about this issue would be able to offer an amendment to the continuing resolution when it is considered by the House in November?

Mr. NATCHER. Mr. Chairman, will the gentleman yield to me?

Mr. KEMP. I am glad to yield to my chairman.

Mr. NATCHER. Mr. Chairman, as the gentleman knows, on November 14 the first continuing resolution expires. The distinguished gentleman from New York is a member of the Committee on Appropriations, and certainly it would be his right and privilege at that time before the full Committee on Appropriations to offer his amendment, at the time we take up the second continuing resolution. That would be his right and his privilege as a member of the committee.

Mr. KEMP. Mr. Chairman, I thank the subcommittee chairman. I strongly support an amendment, whether it be to an authorization or an appropriation, that will provide family planning services to the poor while prohibiting U.S. funding for organizations that perform, counsel, and refer for abortion. It is a simple point, but one that bears repeating again and again: Abortion is not a method of family planning! When title X was first enacted in 1970 it was intended to provide contraceptive services to women in the poor and near-poor categories, and to subsidize research into the development of new contraceptive techniques. Congress clearly intended to establish a wall of separation between pregnancy prevention and pregnancy termination. Planned Parenthood argued in testimony to the House that:

Title X deals positively with the problem of unwanted fertility by preventing unwanted pregnancies. Indeed, the law makes it clear, by excluding abortion from the services authorized under title X, that all of the funds are to be used for prevention.

Congressman JOHN DINGELL, in explaining the intent of his amendment barring the use of funds in programs that include abortion as a method of family planning, said: "There is a fundamental difference between the prevention of conception and the destruction of human life." Yet title X grantees perform and counsel for thousands of abortions each year. Planned parenthood performed 84,947 abortions in 1984. My amendment supports family planning by rebuilding the wall of separation between contraception and abortion. This all of separation will make it clear that Congress is committed to encouraging the use of family planning but will not require U.S. taxpayers to underwrite the use of abortion as a means of family planning. It is time to send a clear signal to receipients of title X funds—many of whom are confused and concerned by our failure to fully address this issue—that abortion is not a method of contraception or family planning and that those programs that continue to advocate abortion will be ineligible for the taxpayer's dollars. Those title X grantees that are truly concerned about the need to provide family planning services to the poor will choose Federal funding over abortion.

Earlier this year the House voted to uphold President Reagan's policy on population and prohibit funding for international organizations that include abortion as a method of family planning by a vote of 234 to 189. My amendment extends the same rights and responsibilities to domestic family planning agencies. These agencies would be provided with a choice between Federal funding and abortion advocacy, just as international family planning agencies have been asked to choose. Many have chosen to continue their commitment to family planning without abortion, and with the benefit of Federal funding. I hope that our domestic family planning agencies will make the same choice.

Children are our most precious resource. Let us support those organizations that help people plan their families with dignity and hope for the future, and end taxpayer subsidies for the practice of abortion as a family planning alternative.

Mr. FRANK. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I want to welcome my friend, the gentleman from California, to the cause of zealous antidiscrimination issues. It is not a guise in which I had previously envisioned him, but it is nice to have him here.

I do think, however, that we ought to understand that if the motion to rise is defeated, if we are going to get beyond the appropriations part of it and into the question of using this bill to deal with nondiscrimination it would be unworthy of genuine antidiscrimination proponents to deal only with this issue.

I can say parenthetically that I am inclined to agree with the gentlewoman from California on the issue, although the very factual dispute points out the difficulty we have if we become, through the appropriations subcommittee process, the author of each discrimination dispute amendment. But if we are not to rise and we are to deal with discrimination, I just want to advise Members that the Grove City issue will then be before us.

During the rollcall, if we have one, I have amendments that will be prepared, and if we are going to say that within this bill we are going to prevent discrimination, it seems to me we ought to deal with this question of the Supreme Court having overturned legislation, because at least, as I remember, over 400 Members of this House signed a brief the gentlewoman from Rhode Island had initiated saying the Supreme Court was wrong. So if we are going to deal with the question of antidiscrimination—and I will yield to my friend, the gentleman from California, who stands there—I would ask him, would he not agree with me that if this is an appropriate vehicle to deal with the question of antidiscrimination, on the matter of the question of the Grove City decision, sex discrimination, race discrimination, and discrimination against the handicapped, ought we not, if we are to deal with this issue, deal with this one as well?

Mr. Chairman, I yield to the gentleman from California in order to respond to the question.

Mr. DANNEMEYER. Mr. Chairman, to the observation of my friend I can make this statement——

Mr. FRANK. If the gentleman will allow me to say this, it was not an observation. I want to be sure the gentleman understands. It was a question, not an observation.

Mr. DANNEMEYER. In response to the gentleman's question, I can make the observation that my amendment relates to discrimination in a very narrow segment of health care personnel——

Mr. FRANK. I understand, but I just wanted to ask the gentleman's a question. I take back my time because I want to ask the gentleman a question and get an answer. He had time to explain his amendment, and it was fairly simple. Certainly its genesis was.

But my question to him was, if we are to deal with antidiscrimination, ought we not deal with these fundamental questions of antidiscrimination? It is my intention to abide by the will of the House. If the House wants to rise and deal in the appropriations process with appropriations questions, that is fine. But if the House want to deal with antidiscrimination, that is also fine, but I think that we ought to then deal with more fundamental discrimination questions. I would not want the gentleman from California to be a nitpicking antidiscriminator. If he is going to become a born-again antidiscriminator, let us deal with fundamental issues.

Mrs. BOXER. Mr. Chairman, will the gentleman yield?

Mr. FRANK. I yield to the gentlewoman from California.

Mrs. BOXER. Mr. Chairman, I thank the gentleman for yielding.

I truly agree with the gentleman that since my colleague, the gentleman from California, has shown his great desire to see that women have equality in the workplace, we should definitely, if we do not rise, take up these broader questions.

But I support the motion to rise, and I want to really tell the gentleman why. I say to the gentleman——

Mr. FRANK. Mr. Chairman, let me take back my time. The gentlewoman from California can get her own time. I want to be fair to my friends.

Mrs. BOXER. Mr. Chairman, I want to say to the gentleman that I will not be able to because we will rise very shortly. I need just 10 seconds to just say that I have here an actual report the gentleman would be interested in.

Mr. FRANK. I yield to the gentlewoman from California.

Mrs. BOXER. I think the gentleman will appreciate that I have something that he would be interested in. I have a copy of the report of the inspector who inspected for Cal-OSHA San Francisco General Hospital, in which he said there are no violations of OSHA health and safety standards, and that the hospital policy closely adheres to CDC guidelines for infectious disease control for AIDS.

So there is no point of taking this whole issue up when it is clearly on the record that there are no violations. Nurses can wear whatever protective garments they want. That is clearly the policy.

Mr. DANNEMEYER. Mr. Chairman, will the gentleman yield?

Mr. FRANK. I yield to the gentleman from California to answer my question.

Mr. DANNEMEYER. Is there any real reason why we should not adopt this amendment?

Mr. FRANK. I take back my time. Will the gentleman from California tell me, does he favor, if we are going to deal with antidiscrimination, dealing with the question of Grove City? It may be his intention to reaffirm the Supreme Court, but is it not a legitimate topic, if we are going to deal with questions of antidiscrimination?

Mr. DANNEMEYER. Mr. Chairman, will the gentleman yield?

Mr. FRANK. Yes, I yield to the gentleman from California.

Mr. DANNEMEYER. I can tell my colleague that he will have ample opportunity to address the issues of discrimination that he has described when the bill comes before the floor dealing with those issues.

Mr. FRANK. Mr. Chairman, I will take back time.

In other words, the gentleman says the only antidiscrimination issue he wants to deal with is this one, and I want to advise him that he does not have that option. If the House is going to deviate from normal procedure to deal with antidiscrimination, then all of it will be on the table. Otherwise Members ought to vote for the motion to rise.

Mr. WAXMAN. Mr. Chairman, will the gentleman yield?

Mr. FRANK. I yield to the gentleman from California.

Mr. WAXMAN. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman, I think it would be really wonderful if this House would take its time to discuss the OSHA dispute at San Francisco General Hospital in depth. I will be putting in the RECORD a letter I received from the Department of Health and Human Services clarifying what the regulations are. There is a dispute, I think, factually whether CAL-OSHA ruled one way or the other. This is all being appealed.

It seems clear to me, however, that this is the kind of issue that is most appropriately resolved by public health officials, hospital administrators, and local agencies. The Congress should not intervene to sustain or overrule each local decision about each hospital, each health professional, and each patient. Clearly the Centers for Disease Control, the State of California, the city of San Francisco, San Francisco General Hospital, the various nursing unions and professional organization—all have given a great deal of consideration about how to contain the AIDS epidemic and how to treat patients effectively and humanely. I would hope that the Congress would not now suddenly choose to enter into this discussion without benefit of full information and advice.

Mr. Chairman, the letter to which I referred is as follows:

DEPARTMENT OF HEALTH AND HUMAN SERVICES,
Washington, DC, October 2, 1985.

The Hon. HENRY A. WAXMAN,
House of Representatives,
Washington, DC.

DEAR MR. WAXMAN: This is in response to your inquiry concerning the protection of health professionals who provide care to patients with acquired immunodeficiency syndrome (AIDS).

The Public Health Service (PHS) has recommended safety guidelines for all health care workers and allied professionals, which would include nurses, who work with patients with diagnosed or suspected AIDS. This approach with AIDS is consistent with the way Federal health officials have addressed other contagious diseases, such as smallpox, polio and hepatitis. A copy of the guidelines regarding health care workers and AIDS is enclosed. The guidelines clarify when special precautions, such as using protective gear, are indicated. Further, the guidelines do not restrict hospitals from implementing additional precautions.

PHS and others have been conducting studies of health-care workers who are exposed to AIDS patients in the course of their work, as through needlestick injury or providing mouth-to-mouth resuscitation. Of the 1,758 health-care workers participating in such studies who have been tested for antibody to the virus that causes AIDS, 26 (1.5%) were seropositive. All but three of the persons belonged to groups recognized to be at increased risk for AIDS. Epidemiologic information is not available for one of these three health-care workers who was tested anonymously. The other two suffered needlestick injuries that were potentially preventable had they followed the current guidelines. The enclosed MMWR article dated September 27, 1985, contains more information on these workers.

The PHS recommendations have been widely accepted, and the evidence is persuasive that they are appropriate. Infection control policies work best when they are consistent, reliable, easy to follow, and based on sound medical evidence. We believe that the current PHS guidelines for clinical and laboratory workers meet those criteria.

We appreciate your interest in AIDS and efforts to control it.

Sincerely yours,
JAMES O. MASON, M.D., DR.P.H.,
Acting Assistant Secretary for Health.

The CHAIRMAN. The time of the gentleman from Massachusetts [Mr. FRANK] has expired.

□ 1600

Mr. NATCHER. Mr. Chairman, before moving that the Committee do now rise, I want to call the attention of the Members of the Committee to the fact that the gentleman who sits in the Chair presiding over this bill, the chairman of the Committee on Science and Technology, and one of the able Members of the House, always presides with dignity and honor, and I want the Chairman to know that we appreciate it.

The CHAIRMAN. The gentleman is recognized for another minute if he wishes.

Mr. NATCHER. Mr. Chairman, I move that the Committee do now rise

and report the bill back to the House with sundary amendments, with the recommendation that the amendments be agreed to and that the bill, as amended, do pass.

The CHAIRMAN. The question is on the motion offered by the gentleman from Kentucky [Mr. NATCHER].

The question was taken; and the Chairman announced that the ayes appeared to have it.

Mr. DANNEMEYER. Mr. Chairman, I demand a recorded vote, and pending that, I make the point of order that a quorum is not present.

The CHAIRMAN. The Chair will count. Seventy-six Members are present, not a quorum. Pursuant to the provisions of clause 2, rule XXIII, the Chair announces that he will reduce to a minimum of 5 minutes the period of time within which a vote by electronic device, if ordered, will be taken on the pending question following the quorum call. Members will record their presence by electronic device.

The call was taken by electronic device.

The following Members responded to their names:

□ 1615

The CHAIRMAN. Four hundred twenty-two Members have responded to their names, a quorum is present, and the Committee will resume its business.

RECORDED VOTE

The CHAIRMAN. The pending business is the demand of the gentleman from California [Mr. DANNEMEYER] for a recorded vote.

A recorded vote was ordered.

The CHAIRMAN. The vote is on the preferential motion offered by the gentleman from Kentucky [Mr. NATCHER] that the Committee do now rise.

The Chair will remind the Members that this is a 5-minute vote.

The vote was taken by electronic device, and there were—ayes 238, noes 185, not voting 11, as follows:

[Roll No. 330]

NOT VOTING—11

Addabbo	Hunter	Williams
Dickinson	Moody	Wright
Fiedler	Rodino	Zschau
Gray (PA)	Weber	

□ 1625

So the motion was agreed to.

The result of the vote was announced as above recorded.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. FUQUA, Chairman of the Committee of the Whole House on the State of the Union, reported that the Committee, having had under consideration the bill (H.R. 3424), making appropriations for the Departments of Labor, Health and Human Services, and Education, and related agencies, for the fiscal year ending September 30, 1986, and for other purposes, had directed him to report the bill back to the House with sundry amendments, with the recommendation that the amendments be agreed to and that the bill, as amended, do pass.

The SPEAKER. Without objection, the previous question is ordered.

There was no objection.

The SPEAKER. Is a separate vote demanded on any amendment? If not, the Chair will put them en gros.

The amendments were agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER. The question is on the passage of the bill.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. FRENZEL. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 322, nays 107, not voting 5, as follows:

NOT VOTING—5

Addabbo	Rodino	Zschau
Fiedler	Wright	

□ 1640

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

DETAILED FIGURES AND DATA RELATIVE TO H.R. 3424, DEPARTMENTS OF LABOR, HEALTH AND HUMAN SERVICES, AND EDUCATION AND RELATED AGENCIES APPROPRIATION ACT, 1986

Mr. NATCHER. Mr. Speaker, I ask unanimous consent to insert in the RECORD at this point a detailed table showing the amounts in H.R. 3424, just passed, for each of the programs funded in the bill, together with appropriate comparisons.

The SPEAKER. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

HR 3424 - FY 1986 APPROPRIATIONS FOR THE DEPARTMENTS OF LABOR, HEALTH AND HUMAN SERVICES, EDUCATION AND RELATED AGENCIES

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Mr. Saunders, one of his secretaries.

ANNUAL REPORTS ON MINE SAFETY AND HEALTH ACTIVITIES FOR FISCAL YEARS 1981 AND 1982—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, referred to the Committee on Education and Labor.

(For message, see proceedings of the Senate of today, Wednesday, October 2, 1985.)

FOOD SECURITY ACT OF 1985

The SPEAKER. Pursuant to House Resolution 267 and rule XXIII, the Chair declares the House in the Committee of the Whole House on the State of the Union for the further consideration of the bill H.R. 2100.

□ 1650

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill (H.R. 2100) to extend and revise agricultural price support and related programs, to provide for agricultural export, resource conservation, farm credit, and agricultural research and related programs, to continue food assistance to low-income persons, to ensure consumers an abundance of food and fiber at reasonable prices, and for other purposes, with Mr. BONIOR of Michigan in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. When the Committee of the Whole rose on Tuesday, October 1, title VA was open to amendment at any point to amendments printed in the CONGRESSIONAL RECORD before September 24, 1985, and pending was an amendment offered by the gentleman from Illinois [Mr. MADIGAN].

Mr. OLIN. Mr. Chairman, I rise in support of the amendment offered by the gentleman from Illinois [Mr. MADIGAN]. There are many, many reasons to be in favor of this amendment, which would have the effect of striking from a committee bill the Bedell provisions for wheat and feed grains.

□ 1650

I absolutely support the statements made when this was previously debated by the gentleman from Illinois [Mr. MADIGAN] and the gentleman from Texas [Mr. STENHOLM].

I would like my remarks to be associated with their remarks. I do not intend to take the full time here, but I would like to mention a few of the problems with the Bedell provisions with due respect for my colleague, my colleague and good friend from Iowa. I think the thing that really bothers me the most about the amendment is that I just cannot really believe that the Bedell provisions are really going to help the farmers. This may sound foolish to say, but that is the way it looks to me. The program is basically mandatory. People are not going to be able to market their wheat or feed grains unless they have certificates and the program is voted for. If they do not join the program, they cannot market at all except in the export market, and then they will not be able to get the benefit of the subsidies in the program. Estimates of the set-asides required under this program to meet the carryover requirements are anywhere between one-third to 30 and 50 percent. It is hard for me to understand how the price level farmers are going to receive is going to offset one-third to 40 to 50 percent reduction in production and end up with their being better off financially. That is very hard to buy.

The second point: The loan rates, instead of being under the market price, as they are in most commodities in our program, are raised to $4.50 for wheat and $3.25 for corn. This will result in an immediate increase in the market price. Any of you who have livestock, poultry, or other agricultural products that live off feed grains, poultry, for example, 70 percent of the cost of raising poultry is feed. Most poultry growers do not raise their own feed. They are going to have to buy it.

They have to pay $4.50 for the equivalent of wheat, $3.25 for corn, when their competitors in the foreign markets are paying world price levels.

Poultry, for example, that gets no subsidy, wants no subsidy, does not need a subsidy, they are engaging in world markets on a competitive basis. Immediately we are going to put them in a noncompetitive mode. Basically the same thing happens with livestock. The thing that really bothers me the most is the export provision of the Bedell proposal. The Bedell provisions provide for a subsidy for all wheat and feed grain exports where a marketing certificate exists and the committee bill encourages maximum sales in the international market at competitive world levels.

It is not stated what that level is; it is whatever level it takes to move the grain.

To make up the exporters for their trouble, the exporter is reimbursed by the Federal Treasury for the acquisition cost of the grain, for the handling of the grain, and for a fair return to boot.

It seems to me like we have got a completely open-ended commitment with regard to exports. Any price the exporter pays is made up. Any price he gets out of the world market is made up. This is done in the name of making agricultural imports more competitive. In actuality, this program, without any question, is going to be probably, if we ever put it into effect, which is unlikely, it would be one of the major and the most extensive dumping programs engaged in by this Nation in the history of the world. You can imagine just what would happen when you have no restrictions on the price the exporter can pay for the grain. He can export as much as he wants at any price he wants to pay to get it, and that is made up by the Government.

The Department of Agriculture estimates that the subsidy cost to the Federal Government of this program would be $30 million at least in the first 5-year period. You can just imagine what other countries would do, faced by this kind of a dumping situation, you cannot imagine that they would let it go on for very long before they closed their border.

The CHAIRMAN. The time of the gentleman from Virginia [Mr. OLIN] has expired.

(By unanimous consent, Mr. OLIN was allowed to proceed for 2 additional minutes.)

Mr. OLIN. If they close their borders, the next thing they would do would be to take their lower priced grains and try to get it into this country. We could not stand that either. All of our poultry farmers and livestock farmers would be looking for that grain. We would have to close our borders. What happens then? Well the bill that is supposed to benefit the wheat and feed grain farmers results in no exports.

Exports would dry right up. There would be no way the world could stand that amount of commotion.

Mr. Chairman, you can talk a long time on this bill, but if you analyze what it is in it, contrary to some of the people who are promoting the bill, it is a program that is fraught with difficulties, very likely to be not in the interests of the farmer it is designed to help.

I urge my colleagues to vote against the provision of that program and for the Madigan amendment.

Mr. ROBERT F. SMITH. Mr. Chairman, will the gentleman yield?

Mr. OLIN. I certainly will yield to the gentleman from Oregon.

Mr. ROBERT F. SMITH. I thank the gentleman for yielding, and I compliment the gentleman on his statement. I just want him to know that he has been joined by many associations in this country. Just to name a few: the National Cattlemen's Association,

American Farm Bureau Association, the National Grange, the National Grain & Feed Association, the National Pork Producers Council, the National Association of Wheat Growers, the National Corn Growers Association, American Soybean Association, and the National Cotton Council. The gentleman is among fine people.

Mr. OLIN. Mr. Chairman, I appreciate the remarks of the gentleman.

Mr. Chairman, I yield back the balance of my time.

Mr. GLICKMAN. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

I will not take very long, so that I may yield to Mr. BEDELL or Mr. DASCHLE, if they would require time.

I would like to make the following points: No. 1 agriculture is really at a crossroads in this country. I think if we continue going down the road for very much longer, another 5, 10, or 15 years, there are not going to be any more farmers left in America. That pattern has been continuing now for 30, 40, or 50 years. It is accelerating now. That acceleration is happening so fast that I could lose half of the farmers in my State in the next 10 years.

Now since we are at this crossroads we have to explain, or ask ourselves: Do we want to continue to go down the same road with the same policy, or do we want to at least give a try to something else, something that provides some stability to farm income? Yes; something that involves a lot of risk but something that just might save a lot of farmers in the next 10, 15, or 20 years.

Now the Bedell amendment, which I support and which the Madigan amendment attempts to knock out, does just that. It gives farmers the option of voting whether they want a program of higher price supports in order to keep them in business over a longer period of time. There are down sides to this program as well as up sides. It is not perfect. None of us believe that this program does not have some problems. But Mr. BEDELL, I am sure, will talk about and refute a lot of the things that Mr. SMITH just talked about. The fact of the matter is, what is wrong with giving farmers a choice on a program which is different, in a sense contradictory with the base voluntary program in this bill? That is very democratic. We have done it over and over again in this country. We have done it in the 1949 Agricultural Adjustment Act. Wheat farmers in 1963 were permitted a referendum to vote on similar programs. We have done it over and over again in marketing orders in this country, in terms of check-off programs. We have given farmers the option, the right to vote, to decide their own fate. Now what we are doing in this amendment is giving farmers that right to vote on a program which many people believe is like the current peanut program and which has given people in that part of the country who produce that crop a great deal of stability in their programs. I am not saying it is perfect, but what I am saying is that that crossroads is here. While I am going to vote for the committee bill because it is better than the status quo and better than what the administration proposed, we may just be going down a road which continues downhill for an awful long time and we are going to lose a lot of people in the process. Farmers ought to be given the right to vote if they want an alternative and different kind of program. They have had that right before. It has been given to them under the current permanent law. They have that right, and they think it ought to be given to them under this bill.

Mr. Chairman, I urge my colleagues to vote against the Madigan amendment and to keep the Bedell amendment in the language of the bill.

Mr. MARLENEE. Mr. Chairman, will the gentleman yield?

Mr. GLICKMAN. I yield to the gentleman.

Mr. MARLENEE. I thank the gentleman for yielding.

Well, if you concur in the idea that we should give the farmers the right to vote, would the gentleman support a proposition or an amendment to this referendum proposal that would allow the livestock producers, the chicken and poultry people a vote on this referendum because their prices are going to go up, their costs are going to go up, and they have no right to vote in this matter. Would the gentleman support that?

Mr. GLICKMAN. In the first place, I supported a similar amendment in the committee. I do not know what is going to be offered here. I will tell you this, I am going to support the Bedell amendment as it came out of committee because I think it provides the best kind of balanced referendum that we can give the farmers as an alternative to this bill.

Mr. ENGLISH. Mr. Chairman, will the gentleman yield?

Mr. GLICKMAN. I yield to the gentleman from Oklahoma.

Mr. ENGLISH. I thank the gentleman for yielding.

If the gentleman from Montana would go back to the microphone, I would like to respond a little bit to his question. I think it deserves an answer. I sponsored in the committee a beef check-off plan that we hope will help tremendously as far as our beef producers are concerned. It gives them an opportunity to go out and promote beef and hopefully will increase the amount of consumption.

Would the gentleman at the same time then suggest we allow all the cotton producers, peanut producers, wheat producers, corn producers, and sugar producers, and everybody else to come in and have a hand and a say in that beef promotion program and vote on the referendum that is to take place down the road?

Mr. MARLENEE. Mr. Chairman, will the gentleman from Kansas continue to yield?

Mr. GLICKMAN. I yield to the gentleman.

Mr. MARLENEE. I thank the gentleman for yielding.

I would like to respond to the question. The poultry and livestock people are directly involved because it is the source of their feed.

The CHAIRMAN. The time of the gentleman from Kansas [Mr. GLICKMAN] has expired.

(On request of Mr. ENGLISH and by unanimous consent, Mr. GLICKMAN was allowed to proceed for 1 additional minute.)

Mr. ENGLISH. Mr. Chairman, will the gentleman yield?

Mr. GLICKMAN. I yield to the gentleman from Oklahoma.

Mr. ENGLISH. I thank the gentleman for yielding.

Mr. Chairman, I would suggest to the gentleman that I think very much so, that the people that are producing wheat, and corn, and feed grains, they can definitely make the argument that they are going to be directly affected as far as anything that is done as far as beef is concerned. So they should have a say, they should be able to vote. The thing we really get down to, and this is in what we are talking about here, all these commodities are interrelated. That is something that those of us on the Agriculture Committee know about. That is the reason we try to support each other. We also recognize there are different philosophies and different approaches on each of the commodities and there is regionalism which comes into play also. We try to accommodate each other, work with each other. But if we are going to get into this business of saying, "Well, now, your program may affect me somehow, and then I want to come in and have a say in your program," then everybody is going to start, quite frankly, messing each other up, and that is going to cause great problems.

Mr. GLICKMAN. Mr. Chairman, I would just conclude by saying that this program requires a super majority of farmers, 60 percent to approve it. It provides farmers with a choice of going for the basic voluntary program or one that has a greater mandatory nature but one that would increase prices for them. And I would encourage my colleagues to give the farmers in such distress the option of voting on a referendum.

Mr. ROBERT F. SMITH. Mr. Chairman, I move to strike the requisite number of words, and I rise in favor of the Madigan amendment.

Mr. Chairman, there are three reasons why I oppose the Bedell amendment and favor the Madigan amendment to strike. The first is total government control of farming by the Federal Government as a result of the Bedell amendment and its passage. Then, it will provide a ghost-town syndrome in America. Then, it is very unfair.

Mr. Chairman, first of all, this program in the first year is a plum and then it turns to a lemon for farmers. It is a giant and cruel hoax. Let me tell you why.

During the first year the set-aside is limited to no more than 30 percent for wheat and 20 percent for corn at a price of $4.50 for wheat and $2.25 for corn.

During the second year, however, the U.S. Department of Agriculture has estimated that the set-aside would have to be at least 40 percent. During the third year the set-asides may go higher than that. These set-asides are necessary to maintain a high domestic wheat and feed grain price in the Bedell amendment. These set-asides make farmers slaves to the Bedell amendment. Bedell is not voluntary compliance; it is involuntary servitude. You must sign up or you suffer the vagaries of world prices.

□ 1705

Let me provide you with an example of the cruel hoax of promise of better income in 1986 that will be snatched away in 1987, by giving you an example of a farm in Illinois, 500 acres, with a yield of 120 bushel, which may be a little low. In 1986, under Bedell, the gross income from that farm would be $156,000, with a 20-percent set-aside; in 1987, that farm, with a 40-percent set-aside, would have a gross of $117,0000.

This program reduces farm income. However, those that set up the program and would require exorbitant reductions in set-asides will no doubt blame the Secretary of Agriculture because in the bill the Secretary of Agriculture is the person who must adjust the set-aside to stop the surpluses from building and to make sure that the wheat and corn prices are at that level, that high level target. This is a mandated program.

Mr. Chairman, this proposal will also result in the extinction of the true family farmer. Why is that? Farmers who vote in this referendum we all know can own as few as 15 acres. They have a job in town. This is a hobby farm. Losing 7½ acres of their land is not going to affect them whatsoever. The referendum would be controlled by this group who receives a majority of their income from off farm sources. Why is that? Because, again, according to the USDA, 75 percent of all farms in America have gross sales of less than $100,000. These farms have more than 75 percent of their income from off farm. Full-time farmers, operating on one-half or slightly more of their land, will not be able to meet their tax payments, their debt load, their marketing payments, as well as feed and clothe their families. There is no chance. Therefore, the referendum will be controlled by those people living on income off farm.

Why is it a ghost-town syndrome? Because the large set-aside that would be required under this provision would make a ghost town of Main Street, America. The ripple effect on downtown rural America would be devastating. This measure would export jobs. Those who process mill wheat and corn will either turn to imports or just move to Canada or Mexico to take advantage of world prices, which will be, of course, much lower. Then, of course, they will send their finished product back to America. Livestock feeders will follow suit, to take advantage, or course, of cheap feed. The same will hold true of meat and poultry processors. These feed, seed, fertilizer equipment manufacture salesmen will be run out of business in small town, America.

Corn sweeteners, which were once competitive with sugar, will have their competitive edge removed, and the alcohol fuels industry will be forced out of business.

Under this provision, in the first year feed will increase drastically, as much as 60 percent, compared with no referendum. What does that mean?

The CHAIRMAN. The time of the gentleman from Oregon [Mr. ROBERT F. SMITH] has expired.

(By unanimous consent, Mr. ROBERT F. SMITH was allowed to proceed for 2 additional minutes.)

Mr. ROBERT F. SMITH. Livestock liquidation would obviously follow this huge increase in cost of feed, not to say what would occur in the poultry and pork industry throughout America.

The very people that this amendment is supposed to help oppose it? It is supposed to help wheat growers and corn growers and small grain growers in America. And who opposes it? The two national associations it is supposed to help, besides influencing the rest of agriculture in America.

So I suggest to you that, Mr. Chairman, this referendum sinks Uncle Sam's hand even deeper into the pockets of American agriculture. It is bad policy. It is bad for agriculture. It is bad for America. It ought to be stricken.

Mr. BEDELL. Mr. Chairman, will the gentleman yield?

Mr. ROBERT F. SMITH. I have no more time. I yield back the balance of my time.

Mr. DASCHLE. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. BEDELL. Mr. Chairman, will the gentleman yield?

Mr. DASCHLE. I yield to the gentleman from Iowa.

Mr. BEDELL. Since the gentleman refused to yield for a question, I understand his sincerity, and I do not question but what he believes what he is saying. But if I might address the gentleman, does he agree that under the proposal, the referendum proposal that is in the bill, that there is a buy-down of exports, and actually, under this circumstance, we will actually hold our exports better than in any other program? Does the gentleman understand that and does the gentleman agree with that?

Mr. ROBERT F. SMITH. If the gentleman will yield, I understand the buy-down. I suggest, however, that the buy-down is going to be so expensive to the United States of America and to the USDA and to the taxpayers that we will not be able to afford the buy-down.

When the world prices, which they well may do, sink to maybe $2—we do not know what the world price of wheat will be, let us say it is $2—the buy-down, then, of course, makes up the difference between the world price and $4.50 in wheat.

Mr. BEDELL. If the gentleman will yield further, we do not want to take forever debating it, but the reality is that in the provision that is in there at this time for the referendum, it says that we are going to buy down and be competitive. The CBO says it is going to cost significantly less than the current program. If we are going to do everything we can to hold our exports, then it is quite clear we are not going to need a bigger set-aside. And the Department of Agriculture, there is no secret about it, they have been against this all the way, they have skewed the figures any way they could to make it look bad, and I just hope that our colleagues in the Congress will realize that when those figures are quoted from the Department of Agriculture that at least I think most of us on the committee, after hearing them, realized that we better take those figures with a grain of salt.

Mr. EVANS of Illinois. Mr. Chairman, will the gentleman yield?

Mr. DASCHLE. I yield to the gentleman from Illinois.

Mr. EVANS of Illinois. I thank the gentleman for yielding, and I rise in strong opposition to the Madigan amendment and urge my colleagues to support the Bedell provisions in the bill.

I oppose the Madigan amendment to strike the producer-approved wheat and feed grains program included in H.R. 2100, the Food Security Act of 1985.

I oppose this amendment for a number of reasons, the primary being that of farm income. Beyond a doubt, the culprit in the conditions ravaging our farm sector is low farm income. For the past 4 years our Nation's farmers have been faced with the frightening reality of sinking commodity prices, sharply declining land values and, worst of all, little prospect of recovery in the agricultural economy in the near future.

This combination of factors has resulted in the inability of the most efficient and productive farmers on Earth to make a decent profit. Low prices translate into reduced land values, reduced land values in turn translate into less equity. Our farmers are faced with a seemingly impossible situation: They can't pay off their loans because they can't get a reasonable price for their product, and they can't get sufficient credit because low prices have eroded their equity.

The producer referendum title of H.R. 2100 will give our farmers the opportunity, should our Nation's farmers decide that this policy is desirable, to increase their farm income, while idling those lands which are contributing to our persistent commodity surplus. Through a nationwide referendum, our wheat and feed grain producers are provided the deserved and democratic opportunity to determine the direction of Federal farm policy over the next 4 years.

Most importantly, the producer referendum title to H.R. 2100 offers our struggling farmers an alternative to the current outmoded and failed farm policy. Current farm policy is so poor that the Governor of my home State of Illinois recently announced a major statewide program to assist financially-strapped farmers remain in business through a restructuring of their debts. A farm policy so ineffective that just yesterday the Governor of the state of Iowa was forced to declare a state of economic emergency, and a moratorium on farm foreclosures.

In short, the producer referendum title gives our producers a just price for their energy and investment in the sector that is the very heart of our Nation's strength and security. In addition, this proposal provides the needed mechanisms to control our soaring stockpiles of commodities, while reducing the cost of the Federal farm program to our taxpayers more than any other farm proposal offered in the 99th Congress. This cost savings benefits all Americans.

I strongly believe that this proposal, by increasing farm income, is in the best interests of our Nation's farmers. This increase will also benefit those industries which rely on a healthy agricultural sector, such as the agricultural implement industry, and the merchants in main street rural America who depend on the purchasing power of our farmers. American consumers who pay less than the citizens of any other country in the world for food will benefit by the strengthening of our farm sector, a sector which has consistently provided an abundance of high-quality foodstuffs.

Mr. DASCHLE. Mr. Chairman, as I said earlier, I rise in opposition to the Madigan amendment. I am amused by those who found fault with the concept of a referendum and who at the same time say that all of these organizations, farm organizations, who clearly represent their membership, are opposed to a referendum in this provision of the bill.

It seems to me that there is no better way to judge whether any farm organization is for or against any provision of the bill than to allow them to vote on it, which is exactly what we do.

I am also amused that there is opposition to allowing the little guy to vote. I cannot help but think that back about 50, 100 years ago, when those who had no property—I guess it was longer than 50 years ago, 100 to 150 years ago, perhaps—those who had no property were not allowed to vote, either, and there were all kinds of reasons why those people, true citizens of our Nation, were not provided an opportunity to vote, but we decided that everyone in this country ought to have a right, big and small, and so we provided that right to every citizen. And unless someone can come up with a better way, unless someone can tell us how to better serve all the interests in agriculture, not separating big from small, then I think that this is the very best provision that we can establish in a referendum.

As we talk about this particular part of the bill, I think everyone has to understand, those who are watching from their offices as well as those who may be watching from around the country, clearly agriculture is in a depression and clearly if we are in that kind of a depression, something has gone wrong over the last 4 years. Something has to fundamentally change if we are going to resolve this crisis.

It is no secret that the very next piece of legislation to come before the House Agriculture Committee is going to be a bill that provides additional emergency credit to farmers.

Well, I have to say that I doubt that that bill would be necessary at all if we had been doing everything right over the last 4 years, if farmers were in a position of financial strength. But they are not. We are in a depression. And if anyone has to be reminded, only yesterday the Governor of Iowa declared a moratorium across the board on all farm creditors. During that announcement, it was the Governor who said it was the Congress and the President to blame. For doing what? For not providing the mechanism by which farmers are going to be able to enhance their income.

Well, if we have done anything in this bill, if we have set any goal, it has to be that we have tried as best we know how under very difficult circumstances to provide farmers what they have told us categorically we have to have, and that is a better price and better income, that we have to do something different from what we have done over the last 4 years. This bill does it. And this provision, perhaps more than any other provision dealing with wheat and feed grain farmers does it better than any other part of the bill. It does it at less cost to the Government. We do not have to take our word for it. The CBO says so. It does it without any new huge subsidy. Do not take my word for it. The CBO says so. And it does it by providing a reasonable compromise between those who say that we have to mandate supply control and those who want market orientation. It is a blend.

The CHAIRMAN. The time of the gentleman from North Dakota [Mr. DASCHLE] has expired.

(By unanimous consent, Mr. DASCHLE was allowed to proceed for 4 additional minutes.)

Mr. DASCHLE. To those who oppose this provision I would only ask one question: What is the alternative? If the alternative is to go back to what we have done over the last 4 years, then clearly we have failed in setting out a new course and a new direction to provide farmers some hope that we can give them what they need the most, not complicated new programs, not a whole broad range of new ideas that cannot work, a simple concept based on their opportunity to vote. For what? For a better price and more income. If we fail to do that, then we fail to accomplish our goal.

Mr. MADIGAN. Mr. Chairman, will the gentleman yield?

Mr. DASCHLE. I yield to the gentleman from Illinois.

Mr. MADIGAN. I thank the gentleman for yielding. At the outset I want to make the point that I am not now nor would I ever challenge the sincerity or the integrity of the gentleman from South Dakota. I believe that he sincerely cares about the farmers and ranchers in every region of this country. But because there continues to be reference to the CBO, I want to read to the gentleman from a letter from CBO to me, under date of October 1. Page 2 of that letter says:

"However, the market assumptions underlying the more recent August baseline suggest that acreage reductions of 40 percent in wheat and 25 percent in feed grains would be required to keep carryover stocks from rising substantially. Since the amendment"—referring to Mr. BEDELL's provision—"limits the size of acreage reductions to 35 percent in wheat and 20 percent in feed grains, this provision

of the amendment would increase"—I underline "increase"—"outlays under the bill using the assumptions. Export subsidies and net lending costs are both greater in our estimates under the August baseline than under the resolution baseline assumptions."

Mr. BEDELL. Mr. Chairman, will the gentleman yield?

Mr. DASCHLE. I yield to the gentleman from Iowa.

Mr. BEDELL. I think the gentleman from Illinois is well aware that that letter was sent before we froze the bases on the amendment that was passed here in the House. I think the gentleman would agree that if you are going to increase bases by 20 percent, you are going to have a bigger set-aside than you are if you freeze the bases, and I hope the gentleman is well aware of the fact, and I am sure the gentleman does not want to mislead anybody on that matter.

Mr. DASCHLE. Mr. Chairman, in addition to what the gentleman from Iowa has stated, that assumes that the Bedell substitute, which has passed, accepted by the Congress, had not been enacted. Clearly it has been enacted, bringing us completely in line and underscoring once again the budgetary positives that can be brought about as a result of this legislation.

Mr. ENGLISH. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, in July of this year, the subcommittee I chair in Government Operations held a hearing dealing with the crisis that we have all been hearing about in the farm credit system. One thing that we learned that I do not think should be particularly surprising is the fact that that crisis can be traced directly to the lack of farm income. The one point that everyone seemed to agree on is that the fastest way to deal with the farm crisis in the credit system of this Nation is for the farmers to have some income to pay their debts.

Now, I do not suppose that that should be very surprising. However, I think it should also be underscored that there is going to be little in a positive nature that is done to assist in the farm credit system if we do not deal with the income facing the farmers of this Nation.

We had before us that day the historian of the Department of Agriculture, and he was giving us the history of the farm credit system and going through how it all developed. During that discussion, though, he made the comment that he found a great number of similarities between what was taking place in 1985 in agriculture and what took place in 1926.

□ 1720

For those people who are not familiar, 1926 was the beginning of the Great Depression for agriculture in this country. Most economists would agree that it was not the stock market crash of 1929 that drew this Nation into the Great Depression of the 1930's, but instead it was the agriculture depression of the late 1920's, and the stock market crash was simply a symptom of that fact.

I think that this should underscore the fact that we are facing a very serious problem. This matter should not be approached as business as usual. We should not expect that we are going to continue to go along with the same old proposals, the same old bills, the same old programs, and expect that we are going to avert a possible crisis.

I wish it were true; I wish it did not call for strong medicine. I wish it did not call for strong action. I wish that we could all close our eyes, and hide our head in the sand, and expect that we are all going to wake up to high prices tomorrow and farmers are going to live happily ever after and all the financial woes of this Nation are going to go away. That is not likely to be the case. We cannot depend upon that.

What we have before us in the Bedell proposal is some strong medicine. It is a strong program. It was designed to be as such. It was recognized that there are differences in the farm community. We do have farmers that do not want to take that step. That is the reason that the Bedell proposal contains a provision that farmers be allowed to vote. They ought not have to take that medicine. The U.S. Government will not give them that medicine; the Congress will not give them that medicine. They will have to decide themselves as to whether or not they want to take that extra step. Whether they think the situation is bad enough for some strong steps.

Now there is some discussion of servitude. That has been brought up. If farmers should vote, if over 60 percent of the farmers should vote to approve the Bedell proposal and to implement it, what it says is this: Those people who are willing to sacrifice, those people who are willing to cut back on their production, those are the people who will receive benefits of the program.

Now those people who want to continue to be a part of the problem, who want to continue to go out and grow fence row to fence row, who want to continue to produce larger and larger supluses, they are going to have to take their chances. They are going to have to take their chances on the world market. I do not see that there is a great deal of unfairness about that. I do think that it is unfair, however, to expect those farmers who are making the sacrifices to share those benefits with those people who are not willing to make the sacrifices. That is what we have been doing in the past. That is what we have been doing in the past and that is what the Bedell amendment stops.

We see that discussion of the fact it would require half the land to be taken out of production in order to comply with the Bedell amendment. We have heard statements from the Congressional Budget Office that it would be somewhere in the neighborhood of 40 percent.

The CHAIRMAN. The time of the gentleman from Oklahoma [Mr. ENGLISH] has expired.

(By unanimous consent, Mr. ENGLISH was allowed to proceed for 2 additional minutes.)

Mr. ENGLISH. That is a fact the farmers of this Nation will know going into that vote. That is a decision for them to make. Let them decide whether or not they are willing to make that kind of a tradeoff. A substantial reduction in their production in exchange for a good price. I would suggest to the Members that that is fair. Some studies that we have done, though, if we do not take those steps, if we do not reduce that production, indicate that unless you have at least a 35-percent acreage reduction that this Nation will continue to increase the surpluses in wheat and feed grains from year, to year, to year. Even at 35 percent it would require at least 6 years to reduce the carryover that we have down to a level to where it is even 1 year's domestic consumption.

The point was also raised with regard to any type of export subsidy. What if the price goes down to $2? I would ask you that what are we going to do if the price goes to $2 under the program that we have today? Because we are going to be stuck with a loan rate of $2.47 a bushel, and that is not going to be any different than what is happening today. The U.S. Government will take title to virtually every bushel of crop that is grown on this land, for wheat and feed grains alike.

The bottom line is this: The American farmer should have the right to decide his own fate. We have two different philosophical approaches. One is to allow the farmers to grow fence row to fence row, increase the surpluses to even greater levels, and push the price down to where we break foreign governments. Now that takes a lot of farmers with it; there is no question about it. I do not think that those who support that approach disagree with that fact.

Or we go the other direction. We tell the American farmer we do make substantial cutbacks in our production, but we can assure you that you will get a better price, and you also will be able to look forward to year, after year, after year an improvement in the overall farm situation. Let the farmer decide which of these directions he wants to go; let him make the ultimate

decision because it is on his head that it is ultimately going to rest.

The CHAIRMAN. The time of the gentleman from Oklahoma [Mr. ENGLISH] has again expired.

(On request of Mr. DORGAN of North Dakota and by unanimous consent, Mr. ENGLISH was allowed to proceed for 2 additional minutes.)

Mr. DORGAN of North Dakota. Mr. Chairman, will the gentleman yield?

Mr. ENGLISH. I yield to the gentleman.

Mr. DORGAN of North Dakota. I thank the gentleman for yielding to me.

Mr. Chairman, as always, the gentleman has spoken eloquently and I want to associate myself with his remarks. I want to say the issue here is that the gentleman from Iowa has come forward with a new proposal; a different approach. I do not know if there is anyone left in the Chamber who really thinks that what is going on out there in the country is working. It is not.

The present approach to dealing with agricultural problems, the present approach to try to keep family farmers on the farm is not working. Farmers are going broke in record numbers; prices are going down; the Federal budget exposure is going up. What are we doing about it? Do we continue to do more of the same? No. What we do, in my judgment, is to try something different; try a new approach. That is exactly what the gentleman from Iowa has offered this House. An opportunity to do something different. More important than that, to give the farmer an opportunity to choose to do something different.

I just think that the proposal before us today from Mr. BEDELL is a good one. I hope that we reject the amendment offered by Mr. MADIGAN, and I hope this House will give those farmers out there something to look forward to. What they have today fundamentally does not work. I come from rural America. I wish that we had the time to read the letters on the floor of the House from young men and women who are desperately trying to make a go of it on the family farm and are discovering they are not just losing their land, their machinery, their savings, but their dreams. We have a responsibility to do something about it.

One last point. In Europe, Western Europe, Japan, and other countries their farmers are doing better than ours. Why? Because they have made a decision that they want to maintain a network of family farms. That is a policy decision they have made. I think the amendment offered by Mr. BEDELL moves us down that road to make a decision about whether or not we really want to do something to make sure there is a network of family farmers in America's future.

I hope we defeat this amendment, and I hope we give Mr. BEDELL's amendment the kind of vote of confidence we should.

The CHAIRMAN. The time of the gentleman from Oklahoma [Mr. ENGLISH] has again expired.

(On request of Mr. BROWN of Colorado and by unanimous consent, Mr. ENGLISH was allowed to proceed for 2 additional minutes.)

Mr. BROWN of Colorado. Mr. Chairman, will the gentleman yield?

Mr. ENGLISH. I yield to the gentleman.

Mr. BROWN of Colorado. I thank the gentleman for yielding.

Mr. Chairman, I would just address one point, because I know the gentleman to be a sincere and a strong advocate of strong agriculture in this country, and that it is of particular concern not only for his district but this Nation.

The gentleman mentioned a concern about this bill being fair with regard to providing marketing certificates and with the area that it does not provide marketing certificates. I think he makes a good point. I guess the point I would like him to respond to, if he would, is the unique feature that was passed yesterday where we provided marketing certificates at the significantly higher price for imported grain for people who have not participated in the program. In other words, a program that has an aspect of providing a price support program for world producers.

Mr. ENGLISH. If the gentleman could explain that to me, I am not sure I understood that feature of the bill.

Mr. BROWN of Colorado. Certainly. The Bedell amendment yesterday, and I quote:

"The Secretary may make available to importers marketing certificates," the higher price, "for wheat or wheat products imported during the marketing years." They go on to expand.

Mr. ENGLISH. Well, let us go on to expand; let us get the other conditions on there. I think you are leaving a little something out as to why that is being done. Would you enlighten us on that?

□ 1730

Mr. BROWN of Colorado. The reference, of course, that follows down is to section 22 of the Agriculture Adjustment Act. Let me emphasize that the question of controlling imports under that Agriculture Adjustment Act is one that is discretionary with the President and not mandatory.

But what we have done in this program is provided price supports for imported grain. At the same time we will force American producers, some of them, to sell at a lower price.

Mr. ENGLISH. If the gentleman will go ahead, I think the gentleman is leaving a good deal out as to under what conditions that that should be done, that the Secretary should issue those certificates. Would the gentleman go ahead and provide us that information?

Mr. BROWN of Colorado. I would be glad to read. This says:

A marketing certificate applicable to a quantity of wheat or wheat products issued to an importer shall authorize such importer to market, barter or donate without restriction an amount of wheat or wheat products equal to the amount of such marketing certificate.

Now, to make the gentleman's point——

The CHAIRMAN. The time of the gentleman from Oklahoma [Mr. ENGLISH] has again expired.

(At the request of Mr. BEDELL, and by unanimous consent, Mr ENGLISH was allowed to proceed for 1 additional minute.)

Mr. BEDELL. Mr. Chairman, will the gentleman yield?

Mr. ENGLISH. I would be happy to yield to the gentleman from Iowa.

Mr. BEDELL. The gentleman needs to read the amendment very carefully, and the gentleman did very rapidly. It says the Secretary may. I hope the gentleman understands it says the Secretary may. The purpose of that is so he would not be in violation of any GATT arrangements.

Does the gentleman think the Secretary is going to go out and issue a whole bunch of certificates to let people go ahead and import items?

There is some concern that in the way the bill was originally written that those who have been bringing in some imports, and there have been some minimum imports, that it would adversely affect them.

Further than that, the gentleman said section 22 is discretionary with the Secretary. Let me read to the gentleman exactly what it says: "any loan, purchase, or other program or operation undertaken by the Department of Agriculture or any agency operating under its direction, with respect to any agricultural commodity or product thereof, or to reduce substantially the amount of any product processed in the United States from any agricultural commodity or product thereof," that he is mandated to advise the President to take section 22 into account.

Mr. BROWN of Colorado. Mr. Chairman, may I respond to the gentleman from Iowa?

Mr. ENGLISH. I yield.

The CHAIRMAN. The time of the gentleman from Oklahoma [Mr. ENGLISH] has again expired.

(At the request of Mr. BROWN, and by unanimous consent, Mr. ENGLISH was allowed to proceed for 2 additional minutes.)

Mr. ENGLISH. Mr. Chairman, I am happy to yield to the gentleman from Colorado.

Mr. BROWN of Colorado. I think the gentleman from Iowa makes several good points and I will try to respond.

It is mandatory to the Secretary that he advise the President. The program is discretionary I said in terms of the President's decision on it. In other words, this allows marketing certificates for imported wheat. It is up to the President whether or not——

Mr. ENGLISH. Mr. Chairman, I yield to the gentleman from Iowa.

Mr. BEDELL. No; that is not true. It says that the Secretary may do this.

Mr. BROWN of Colorado. Section 22 is discretionary within the President's purview of acting.

So this not only allows marketing certificates for imported grain, but the decision on how you enforce section 22 is very much discretionary in the President's hands.

Just to respond to the gentleman's question with regard to the Secretary and imported products, let me suggest this President had acted very forcefully to encourage imports from the Caribbean basin related to the Caribbean initiative. Would he allow grain to come in under the pressures of the international marketplace?

Mr. BEDELL. Mr. Chairman, would the gentleman yield?

Mr. ENGLISH. I would be happy to yield to the gentleman from Iowa.

Mr. BEDELL. Right now we are not importing grain to any extent. If we have a Secretary that is foolish enough to say we are going to limit production here in the United States among all our farmers, and then we are going to encourage foreigners to ship grain into here, I have an awful lot of disagreements with this Secretary, but I really do not think this Secretary is really about to do anything as foolish as that.

Mr. ENGLISH. Mr. Chairman, if I may reclaim my time, I would simply like to make one comment.

Mr. BROWN of Colorado. That is exactly what the bill provides.

Mr. ENGLISH. Mr. Chairman, if the gentleman would allow me to reclaim my time, I would simply make one point. I think the gentleman is well aware of this and it is very clear that the reason for that provision is so we would not be in violation of our trade agreements. That basically comes down to the Secretary of Agriculture and the President.

Now I have to say very candidly if we have got a President who is willing to go to that extent to work against and cut the throats of his own farmers to issue such certificates without the need of violating the trade agreements, then obviously then we are going to put ourselves in the position in which we are going to have a President down there that I think is going to be surrounded by farmers and tractors for the rest of his term. That is the simple fact of life about it.

The gentleman knows full well why that provision was put in, so we would not be in violation of those trade agreements.

Let me say this. Any of these arguments that are made like this, then I would suggest that the best place to make those arguments is to the American farmer and allow him to decide.

Mr. MARLENEE. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, the Beverly Hills-Fonda-Willie Nelson-Harkin referendum plan is a damaging and ludicrous concept. It has been ginned up by those who could know very little about farm management and who know very little about our export position and what is needed to export grain out of this country.

Editorial writer after editorial writer across this country have come to recognize, what the referendum plan entails and forebodes from this Nation. The Washington Post, the very liberal Washington Post, comes out and says the Harkin plan, the referendum plan should die, it should be vetoed. The Washington Times also did a scathing editorial on the referendum plan.

Let me quote from the very heart of the country where the author comes from the editorial in the Des Moines Register: "Psst. Hey, you on the combine. How about a guaranteed price for corn of $3.60 a bushel?" Now this is in the Harkin plan and, of course, that is just a few cents difference from the gentleman from Iowa, the author, Mr. BEDELL.

How about almost $7.00 for soybeans. And it won't cost the taxpayers a thing.

Such a deal. No wonder Senator Tom Harkin's proposed farm bill is a hit among country singers.

Unfortunately, in concentrating on the single goal of raising commodity prices, some other things are sort of brushed over—the rights of land owners, higher food prices, possible devastation of the livestock industry, the withdrawal of U.S. agriculture from world markets.

The proposal to raise commodity prices by limiting production. That would be done with mandatory acreage reductions, if a 60 percent majority of producers approved in a referendum. For the minority whose operations might be imperiled by acreage reductions—too bad.

I ask why should we have a referendum that penalizes every rural community in America while at the same time we reward every foreign producing nation that competes with us? Why should we have that kind of a referendum?

Yes; vote for a referendum if you want to encourage foreign pro-duction.

Yes; vote for a referendum if you want to have grain farmers putting 50 percent of their land into some kind of an idle status.

Yes; vote for a referendum if you want to destroy our efforts at proving ourselves a reliable supplier of grain to the world.

Yes; vote for a referendum if you want to cut the volume of income flowing into rural America and you want to see more empty store fronts, more suppliers going out of business.

Yes; vote for a referendum if you want to insert instability into the planning process of every agricultural producer in America.

Mr. Chairman, a lot of Congressmen will vote for the referendum process because it has been propagandized by those popular country singers and by a vocal minority who offer it as a panacea.

Some Congressmen will vote for it because they want to avoid a vote to which they can be held responsible. The referendum is not responsible. The referendum is nothing but a trap. It exploits the fears and depressions in rural America. It will create conflicts, State versus State, commodity versus commodity, farmer versus farmers, generation versus generation and strife, and even within families it will create strife, a domestic conflict not seen in this country since the Civil War.

Those who desire to divide and conquer agriculture, the livestock producer against the feed supplier, could not ask for a better method to do it.

The only responsible vote right now is a vote for the Madigan amendment that will strike out the referendum. A vote for Madigan that would leave in place the basic provisions of this farm bill, responsible provisions that provide income protection, that provide market capability, that provide market clearing grain.

Farm organization after farm organization opposes this referendum, as was pointed out by my colleague from Oregon [ROBERT F. SMITH].

After examining it, it is no wonder the producers themselves have—rejected the idea. Wheat growers do not want the ill-conceived referendum: Vote it out by voting for Madigan.

The CHAIRMAN. The time of the gentleman from Montana [Mr. MARLENEE] has expired.

Mr. MARLENEE. Mr. Chairman, I ask unanimous consent that I may proceed for 1 minute.

The CHAIRMAN. Is there objection to the request of the gentleman from Montana?

Mr. WEAVER. Mr. Chairman, I object.

The CHAIRMAN. Objection is heard.

Mr. DE LA GARZA. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I do so to inquire if maybe there might not be a possibility that we could get a vote by, let us say, 6 o'clock. We had debated this issue yesterday extensively and we are de-

bating it now. I would not want to cut anyone off, but conceivably we could do this with 2 minutes each or something like that to make our final plea.

The leadership has requested that we rise by 6 o'clock and then come back tomorrow. I would hope that the issue is settled and that we might get the vote this evening.

Mr. Chairman, I would ask unanimous consent that all debate on this amendment cease at 6 o'clock and we proceed to vote at that time.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

Mr. BEREUTER. Mr. Chairman, reserving the right to object, I am particularly anxious to be cooperative with the Chairman and members of the committee, but this committee is debating the future of my State and only members of the Agriculture Committee have been able to participate in the debate at this point.

I understand the urgency that seems to be upon us.

Mr. DE LA GARZA. Mr. Chairman, will the gentleman yield?

Mr. BEREUTER. I am pleased to yield.

Mr. DE LA GARZA. Mr. Chairman, I would be happy to yield the balance of my time to the gentleman from Nebraska.

Mr. BEREUTER. Mr. Chairman, I withdraw my reservation of objection.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

Mr. WEAVER. Mr. Chairman, reserving the right to object.

The CHAIRMAN. The gentleman from Oregon [Mr. WEAVER] reserves the right to object.

Mr. BROWN of Colorado. Mr. Chairman, I object.

The CHAIRMAN. Objection is heard.

Mr. DE LA GARZA. Mr. Chairman, I continue under my time. I offer the gentleman my time in good faith, and I would be happy to yield to the gentleman.

Mr. MADIGAN. Mr. Chairman, will the gentleman yield?

Mr. DE LA GARZA. I yield.

Mr. MADIGAN. Mr. Chairman, I think part of the problem, I would say to my distinguished chairman, that nobody on this side of the aisle has objected to an extension of time for anyone speaking on that side of the aisle. Nobody on this side of the aisle has objected to any unanimous-consent request coming from that side of the aisle. Last evening and again this evening we have had objections being made to members of the committee even having 10 seconds beyond the 5 minutes. One of them just happened.

So the gentleman cannot expect people over here to not object to an extension of time.

Mr. DE LA GARZA. Let me plead with my colleagues not to get into this type of a situation. I cannot control who objects and who does not object. I hope that we do not get into this side of the aisle and the other side of the aisle.

Mr. Chairman, I would yield the balance of my time to my colleague from Nebraska [Mr. BEREUTER] at this point if the gentleman wishes to take it. I am offering it in good faith.

I have not made a unanimous consent request.

Mr. ROBERTS. Mr. Chairman, would my chairman yield?

Mr. DE LA GARZA. I yield.

Mr. ROBERTS. Mr. Chairman, I have been waiting patiently for 2 days as a member of the committee to have my 5 minutes' worth, and I thought perhaps it might take 7 minutes. The same thing happened in committee when we were discussing this.

Mr. DE LA GARZA. Mr. Chairman, if I may reclaim my time, did I make a unanimous-consent request? If I did so, I withdraw it.

The CHAIRMAN. The unanimous consent request was objected to.

Mr. DE LA GARZA. So it was objected to.

We are just wasting time. The Chairman would just like to accommodate the members.

At this time, I yield the balance of my time to the gentleman from Nebraska [Mr. BEREUTER].

Mr. BEREUTER. I thank the gentleman for his courtesy. I would prefer to permit the members of the committee who have not spoken to have that opportunity. So I thank the chairman for his courtesy and I will ask for my own time.

Mr. DE LA GARZA. Mr. Chairman, I do not wish to take time to make a motion and force a vote when the membership is not ready. I would say, Mr. Chairman, that I make the same plea again. We have a bill that is structured as comprehensively as we could.

□ 1745

There is passion on both sides of this issue. I would hope that the membership would stay with the committee. It may not be the best of solutions, but it is the best we can do.

Mr. MADIGAN. Mr. Chairman, will the gentleman yield?

Mr. DE LA GARZA. I yield to the gentleman from Illinois.

Mr. MADIGAN. Mr. Chairman, could we have everybody stand who is interested in still talking on this and take a quick headcount and try to multiply that by some time for each one and then see if we can set a time limit?

Mr. DE LA GARZA. I would be willing to do that.

The CHAIRMAN. Is there a request that the Chair ask Members who wish to speak to stand?

Mr. DE LA GARZA. We are just taking a referendum, Mr. Chairman, on my time.

The CHAIRMAN. The time of the gentleman from Texas [Mr. DE LA GARZA] has expired.

(By unanimous consent, Mr. DE LA GARZA was allowed to proceed for 1 additional minute.)

Mr. DE LA GARZA. Mr. Chairman, I have asked for this additional time to conclude our referendum to see how many want to speak. Who is counting?

I count about 17. I figure with 1 minute each we would need about 20 minutes.

The leadership has requested that we rise at 6. That means that we will go until tomorrow before we have a vote on this.

I yield back the balance of my time, Mr. Chairman.

Mr. WEAVER. Mr. Chairman, I move to strike the requisite number of words. I rise in opposition to the amendment.

Mr. Chairman, I first would like to say to my dear friend, the gentleman from Illinois, that our other dear colleague, the gentleman from Montana, has spoken three times now on the amendment. The last time the gentleman spoke required a unanimous-consent request to speak again for 5 minutes.

I have not spoken on this farm bill at all. I have served on the Agriculture Committee for 10 years. This issue has been one that I alone raised in session after session of the Congress, and yet I have not spoken on this amendment at all; so I think we were generous.

I did not object when the gentleman from Montana got up and asked to speak for the third time, and with time short, the chairman of the committee says, "I think it was only fair that we reserve a little bit of time for those of us who have not spoken at all on the floor of the House on this provision."

Now, I rise in opposition to the Madigan amendment and in support of the language that was put in this bill in the Agriculture Committee by the gentleman from Iowa [Mr. BEDELL].

I think that people do not understand what is going on in the markets for grain. We continue to talk about how we are subject to world prices and world prices for corn and soybeans and wheat fall and we cannot do anything about it.

The truth is, and we must understand this, that the United States makes the world price. We set the world price. I remember when I used to offer my barrel-for-bushel bill and I would get letters from Australia. I would get letters from Canada, from their wheat boards, and they would

say, "Mr. Weaver, you are the only one talking sense. Everyone is going broke in this business unless the United States wakes up and raises the price of its grain so we can all make a living."

They said time and again, "You make the world price."

Now, the Bedell language is going to raise the domestic price for farmers and if we raise the domestic price for farmers, we are going to raise the world price as well.

What is not understood, and we had better understand it, is that we could raise the world price by $2 a bushel and we would sell just as much grain as we do today. We have been giving away all our grain. This I think is the thing I resent more about our past farm policies than any other single thing, and that is by allowing stupidly, ridiculously allowing our grain prices to fall below the cost of production.

We have been selling to the Soviet Union at below our cost and therefore subsidizing the Soviet Union. I have to stand here on the floor of the House and watch the House vote massive amounts for the defense of our Nation and at the same time we provide the Soviet Union with massive amounts of grain at below the cost of production.

My estimates are that we have in the last 4 years subsidized the Soviet Union for 3 billion dollars' worth of grain. We also subsidized Japan, our largest buyer of our grain, by billions of dollars.

I think this is the height of stupidity. The language of the gentleman from Iowa, Mr. BERKLEY BEDELL, will raise the price not only in the domestic market, but in the world market and stop these subsidies to the Soviet Union.

The farmer is going broke because of our inability and unwillingness to act to allow him to control his supply.

Now, let me tell you, if you think that our markets will be hurt by controlling supply, in the last 2 years, and these are figures that were affirmed by the U.S. Department of Agriculture and I understand that they do not often tell what really goes on, but these are my figures and I called the Department of Agriculture and got them affirmed today. You think we have been hurt in our market share of grain in the last 3 years? We sell 70 percent of all the corn in world markets.

We sell 70 percent of all the soybeans in world markets.

We sell 35 percent of all the wheat in world markets and the only reason it has fallen to that point is that India and China have had huge crops in the last few years.

But let me tell you something, OPEC—and I will finish immediately—OPEC has 30 percent of the world market in oil and it controls the price. We can control our price the same way.

The CHAIRMAN. The time of the gentleman from Oregon [Mr. WEAVER] has expired.

Mr. MADIGAN. Mr. Chairman, I ask unanimous consent that the gentleman from Oregon be given the rest of the evening.

The CHAIRMAN. Is there objection to the request of the gentleman from Illinois?

Mr. WEAVER. Mr. Chairman, I object.

The CHAIRMAN. Objection is heard.

Mr. HUCKABY. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I would like to engage in a brief colloquy with the gentleman from Iowa.

The gentleman from Illinois [Mr. MADIGAN] earlier suggested that this section of the bill limits the amount of the acreage reduction of the set-aside of corn to 20 percent and wheat to 35 percent. It was my impression that there are no maximum limits. Could the gentleman clarify that? Which is correct?

Mr. BEDELL. Mr. Chairman, if the gentleman will yield, that is absolutely correct. There is no limitation, only in the first year. In the first year, there is. Following that, there is not.

Mr. HUCKABY. But what are the limitations in the out years?

Mr. BEDELL. The same as in the rest of the bill, there is no other limitation.

Mr. HUCKABY. There are no limitations?

Mr. BEDELL. There are none.

Mr. MADIGAN. No, no.

Mr. HUCKABY. In addition, there has been concern, and I think rightfully so, expressed regarding the poultry industry as such. We export a lot of poultry and there is concern that we will penalize our poultry industry by significantly increasing the price they have to pay for grain.

Is it the gentleman's intent to address this concern anywhere during the legislative process?

Mr. BEDELL. I would be receptive toward addressing that in the trade section, if we could do so.

Mr. MADIGAN. Mr. Chairman, will the gentleman yield?

Mr. HUCKABY. I yield to the gentleman from Illinois.

Mr. MADIGAN. Mr. Chairman, I want to thank the gentleman for yielding, because I have been trying for 45 minutes to get somebody to yield to me.

Earlier in an exchange between the gentleman from South Dakota and the gentleman from Iowa and myself, the point was made that the letter that I am quoting from that was from the Congressional Budget Office does not take into account the changes made by the gentleman from Iowa [Mr. BEDELL] in his own provision by dint of the amendment here.

As a matter of fact, on page 1 of the letter, it specifically says that the amendment would prohibit farmers from increasing acreages of certified crops, the thing that the gentleman from Iowa said was not contemplated.

Now, I have tried for 45 minutes to get recognized to respond to the gentleman and now nobody knows what I am talking about.

The other thing I would like to say, if the gentleman will continue to yield, is that the exchange that the two gentlemen have just had about there not being any limits on acreage reduction in the out years, 1987 through 1990, is one of the very principal objections to the thing, because the Secretary of Agriculture estimates that on wheat he would have to go to a 50-percent set-aside and on corn he would have to go to a 40-percent set-aside and under the terms of the provision in the bill he would be allowed to do that.

Now, the gentleman is vesting in the Secretary of Agriculture, whom the gentleman from Iowa has asked to resign, the gentleman proposes to invest in this man, who he wants to resign, total control over all the production of agriculture in corn and wheat crops in the United States.

I would suggest there is a little bit of inconsistency there and it is almost a tie.

Mr. HUCKABY. Mr. Chairman, if I can reclaim my time, is it not true that under existing legislation and under the Foley-Marlenee provisions today that the Secretary of Agriculture can determine the set-aside, whether it be 20 or 50 percent in wheat?

Mr. MADIGAN. No, it specifically says in Foley-Marlenee what the set-aside is to be and it says that in Bedell for the first year.

Mr. HUCKABY. What does it say, what is the set-aside for wheat under Foley-Marlenee?

Mr. MADIGAN. It calls for under Foley-Marlenee 20 percent on corn and 30 percent on wheat.

Mr. HUCKABY. Is that a maximum or a minimum?

Mr. MADIGAN. That is the minimum.

Mr. HUCKABY. That is the minimum, so you could have more than that.

Mr. MADIGAN. But let me make the distinction to the gentleman. If the farmer chooses not to go long with that, he can still be in business, just like he is today; but under Bedell, if he chooses not to go along with that, he cannot sell his commodities in the United States of America.

Now, that is a pretty significant difference, and I thank the gentleman for yielding.

Mr. BEDELL. Mr. Chairman, will the gentleman yield?

Mr. HUCKABY. I yield to the gentleman from Iowa.

Mr. BEDELL. It is a shame that we cannot debate this on the facts of the situation.

The letter that the gentleman had from the CBO assumed that the gentleman from Iowa was going to offer his other amendment, which would limit the set-aside for the whole period. That is the assumption they had at the time they wrote the letter.

Sure, that is why they say it limits it; but as the gentleman knows, the gentleman from Iowa did not offer that amendment and I hope that the gentleman will correct the record so that we will not mislead everyone with regard to what is in it.

Mr. ROBERTS. Mr. Chairman, will the gentleman yield?

Mr. HUCKABY. I yield to the gentleman from Kansas.

Mr. ROBERTS. Mr. Chairman, if I could have the attention of the gentleman from Iowa, I am now confused in regard to the set-aside requirements under the gentleman's program.

Did the gentleman say that for wheat in the first year it would be 30 percent and then thereafter it was at the discretion of the Secretary?

Mr. BEDELL. Just exactly the same as under the base provision in the bill.

Mr. ROBERTS. Mr. Chairman, if the gentleman will continue to yield, if I could ask my subcommittee chairman, whose sincerity and integrity is unquestioned, by the way, in regards to what he is trying to do, have we frozen the acreage basis at their current levels for 3 years running, 5 years running, or what is the status of that?

The CHAIRMAN. The time of the gentleman from Louisiana [Mr. HUCKABY] has expired.

(At the request of Mr. ROBERTS, and by unanimous consent, Mr. HUCKABY was allowed to proceed for 1 additional minute.)

Mr. HUCKABY. Mr. Chairman, I yield to the gentleman from Iowa.

Mr. BEDELL. As long as the referendum, if it were to be in effect, it keeps the same program for acreage limitations.

Mr. ROBERTS. So that would be for 2 years, if the gentleman will continue to yield, because the referendum would be held again after 2 years, so we are going to freeze the acreage base for 2 years at current levels?

Mr. BEDELL. Not exactly; the program is the same as it is at this time. If the farmer could go to the committee and show that his acreage base was not what he had been planting or anything, the county committee has the authority to make whatever changes seem appropriate.

Mr. ROBERTS. But what I am getting at, if the gentleman will continue to yield, is can the acreage base in the yield bill that the gentleman from Texas [Mr. STENHOLM] and myself authored, we had a 20-percent kind of freedom there where a farmer could rotate from one program off to another; that is not the case now?

Mr. BEDELL. The gentleman is correct.

Mr. ROBERTS. Mr. Chairman, I thank the gentleman.

Mr. DE LA GARZA. Mr. Chairman, I ask unanimous consent that all debate on this amendment, the Madigan amendment, end in 1 hour and that the time be divided equally between the chairman of the committee and the ranking minority member.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. RICHARDSON. Mr. Chairman, I rise in support of H.R. 2100, the Food Security Act, which governs Federal Farm Income and Price Support Programs, Soil Conservation Programs, and Domestic and International Food Assistance Programs.

The economy of rural America is on the verge of collapse; New Mexico is among those predominantly rural States which shares this plight. While foreclosures and the failures of rural businesses increase, agricultural exports, land prices, and product prices decrease, at unprecedented rates. Export levels have steadily declined by 30 percent since 1980; farmland values have dropped by 20 to 25 percent in many States; most major commodity and livestock prices are at their lowest levels in several years. The crisis is not due to the inefficiency of the U.S. farmer but rather to his extraordinary capacity to produce far more than he can sell domestically or internationally. The USDA predicts that farmers will produce another bumper crop this year. As prices have rapidly fallen, U.S. farmers have been forced to plant fence row to fence row in an attempt to make an acceptable living; clearly, this has not worked.

Nearly a third of middle-sized commercial farms face financial difficulties with high debt loans and negative cash flows today. Farms producing cash grains, general livestock, or dairy products account for more than three-quarters of the financially stressed farms; such is the composition of the farming community in New Mexico. Our middle-sized family farms are bearing a disproportionate share of the debt of the farming community. The continued health of rural and urban America depends on saving this sector of our Nation from insolvency. The collapse of our agricultural communities, the closing of banks, businesses, and farm suppliers, will affect the stability of food to all communities and add to the burdens of densely populated urban communities.

Our responsibility lies in ensuring that our food supply remains stable, competitive, and diversified, both domestically and internationally. While hunger abroad is well documented, hunger, malnutrition, infant mortality and low birth weight rates, too, are on the rise in this country. Our Nation faces a hunger problem which has been described as a "public health epidemic." The Food Stamp and Child Nutrition Programs, as described in H.R. 2100, are our Nation's primary and most successful responses to hunger in America. These programs not only help those most in need of assistance but also assist our farmers by guaranteeing that their products will be used and not wasted in Government storage facilities. The Federal farm program provides low cost and effective nutrition to our Nation.

As we consider H.R. 2100, we must remember that our farmers need income. Increased Federal support of farmers will be necessary unless farm income improves dramatically in the next year. We need a farm policy which does not bankrupt farmers and taxpayers at the same time. A gradual move toward a market-oriented policy is acceptable and desirable farm policy. H.R. 2100 respresents a realistic farm policy. I urge my colleagues to support this bill on which the economic future of our agricultural and urban sector depend.

Mr. SCHAEFER. Mr. Chairman, the current provisions in H.R. 2100 providing for a producer referendum on marketing certificates for wheat and feedgrains will prove to be disastrous to livestock producers, consumers, and agricultural industries. Under the bill, if 60 percent or more of the producers of wheat and feedgrains—including at least 50 percent of the wheat and 50 percent of the feedgrain producers—vote affirmatively, then marketing certificates would be in effect for the following 2 years.

Should the referendum pass, the marketing certificates and the corresponding acreage reduction programs would effectively constitute mandatory controls on production. Participation in the program would be practically 100 percent, since nonparticipants would not be allowed to sell or even trade their grain in the domestic market. They could only sell their grain for the export market or consume it on the farm.

Under such a referendum, U.S. wheat and feedgrains would be rendered noncompetitive, minus large export subsidies. The USDA estimates that, under this referendum, export subsidies—cash and in-kind—for corn and wheat would total $16 billion during fiscal year 1986 through fiscal year 1988. Per-bushel-subsidies would be high because grain exporting companies would have a strong incentive to sell at any price since the Government would guarantee the companies that their costs would be covered, including "acquisition, handling, and a fair return."

As a result of the large export subsidies, Government outlays for wheat and corn during fiscal years 1986–88 would be about $3 billion above the House bill with no referendum. The referendum also allows for subsidies to be paid to domestic grain purchasers, which could add another $3 to $4 billion-per-bushel to Government outlays.

Under this proposal, consumers would pay much more for less food. During 1986–90, spending for cereal, bakery products, meat, and poultry alone would be $26 bil-

lion above spending under the House bill without the referendum. Low-income families would be hit the hardest, since they spend the largest portion of their income on food. In addition, outlays for food stamps would rise about $1.5 billion over the life of the bill.

Other sectors of agriculture and the related industries would be severely impacted. Livestock, dairy, and poultry producers could expect 60-percent higher feed costs if the referendum passed. Brokers, trading houses, transportation, and marketing firms would experience significantly less business. With reduced acreages and production, input and food processing industries could expect considerably less business. At the same time, import restrictions would have to be applied to processed products such as flour and bakery products to prevent less expensive foreign products from taking over the domestic market. This would heighten world trade tensions and, no doubt, bring retaliation from our trading partners.

In sum, the referendum would place U.S. consumers in the ironic position of paying more for grain products than consumers in most other countries. In fact, foreign importers would benefit directly from cheaper U.S. grain and, thus, become more competitive than the United States in both domestic and world markets for products produced from grain.

For these reasons, I stand in opposition to this referendum.

Mr. TRAFICANT. Mr. Chairman, I rise in strong support of provisions in H.R. 2100, the Food Security Act, that extend the Food Stamp Program for 5 years, providing modest increases in benefits and eligibility, and requiring States to set up employment and training programs. I also urge my colleagues to oppose any amendments to delete these increases and limit the eligibility requirements as outlined in the bill.

Mr. Chairman, if one takes a look at what has happened to the Food Stamp Program over the last 4 years in terms of funding, it becomes obvious that this worthwhile program has suffered drastic cuts. At the same time the Food Stamp Program was being cut, defense spending was massively increased. Well, now we find ourselves in a position where hunger and poverty in America have increased at an alarming rate. I believe that it is a disgrace for a nation, as wealthy and powerful as ours, to have a hunger problem. But we do have a hunger problem in this country and it is growing. Simply put, the modest increases in the Food Stamp Program outlined in H.R. 2100, are necessary to offset the devastating impact previous cuts in food stamp spending have had, and to combat the continuing problem of hunger and poverty in America.

Study after study indicates that hunger, malnutrition, infant mortality, and low birth weight rates are all on the rise in America. Equally disturbing is the fact that one out of every four children under the age of 6 is living in poverty—virtually guaranteeing increased social and Government costs down the road. Children going hungry, undernourished infants and pregnant mothers—one would think this scenario describes a Third World country—but this grim scenario is of America. An America haunted by the specter of an ever growing number of hungry, malnourished children living in poverty. Facing this growing problem should be one of our No. 1 priorities in the Congress. The Food Stamp Program is one small step toward setting our priorities straight. It is a step we must take—the modest increases in the Food Stamp Program are of vital importance.

Doesn't it make good sense to provide modest increases now in order to prevent much greater expenditures in the future? Of course it does. The increases in deductions provided for in the bill will be of great help to the working poor—people struggling to get ahead. By providing a greater deduction for child care expenses, for example, single mothers will find it easier to get a job and become self-supporting.

The increases in benefits and expansion of deductions outlined in H.R. 2100 for the Food Stamp Program are modest. Yet these modest increases are vital to our effort to respond to the growing problem of hunger and poverty in this country. Times are changing and we must be flexible enough to respond to those changes in a positive fashion. These increases in benefits and deductions will provide much needed relief to poverty stricken families—especially single mothers struggling to make a better life for their families. We cannot turn a cold shoulder on the pressing needs of these people. By supporting these modest increases we are making a sound investment in the future of this Nation. I again urge my colleagues to oppose any amendments seeking to eliminate or limit the increases in the Food Stamp Program provided for in H.R. 2100.

Mr. DE LA GARZA. Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker pro tempore [Mr. DURBIN] having assumed the chair, Mr. BONIOR of Michigan, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 2100) to extend and revise agricultural price support and related programs, to provide for agricultural export, resource conservation, farm credit, and agricultural research and related programs, to continue food assistance to low-income persons, to ensure consumers an abundance of food and fiber at reasonable prices, and for other purposes, had come to no resolution thereon.

□ 1800

GENERAL LEAVE

Mr. DE LA GARZA. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on today's consideration of H.R. 2100.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

MEDICARE PAYMENT FOR THERAPEUTIC SHOES

(Mr. SMITH of New Jersey asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. SMITH of New Jersey. Mr. Speaker, diabetes affects approximately 5½ million people in the United States with an estimated 2.1 million of those affected individuals aged 65 or over and, therefore, potential Medicare beneficiaries.

Two weeks ago, I asked that the Rules Committee make in order under the rule for the Deficit Reduction Amendments of 1985 an amendment that would permit payment for therapeutic shoes under Medicare part B for individuals with severe diabetic foot disease. This language was developed and drafted in conjunction with the American Diabetes Association and is essentially H.R. 2543, a bill I introduced in May. According to information compiled by the ADA, this amendment is a cost-effective piece of legislation. In fact, the ADA has made what they consider a conservative estimate that implementation of such legislation could result in a gross cost savings of $105 million in 1 year alone. Savings would occur through decreased need for costly amputation versus the use of the less expensive therapeutic shoes.

Mr. Speaker, the preventive aspect of providing these therapeutic shoes cannot be overstated. According to a statement I will include in the RECORD by the American Diabetes Association, the Centers for Disease Control [CDC] estimates that each year 40,000 diabetics are required to have a lower extremity amputation. The CDC estimates further that of the 40,000 amputations per year among diabetics, 64 percent or 25,600 occur among individuals 65 or over. The rate of amputation could, however, be substantially diminished—ADA estimates a 40 percent reduction—if proper foot care were available and affordable.

Furthermore, Mr. Speaker, Mr. Pomeroy Sinnock, chief, information and training section of the Center for Prevention Services of the Division of Diabetes Control [CDC] has said that the CDC is currently working on a comprehensive program for prevention of certain developments in the severe diabetic, including lower extremity amputation, of which prescription and use of therapeutic shoes is an integral part.

Mr. Speaker, the cost of a pair of specially fitted molded shoes can vary around the United States from about $150 to $400. My amendment would cap the reimbursable cost at $375 so that under Medicare part B the system would pay no more than $300—or 80 percent of the cost of the shoes. It is likely, however, that the reasonable charge will be less. The amendment contains provisions to allow the health care financing administration to contract regionally for the supply of the shoes in order to keep costs at their minimum. It also provides for peer review organization monitoring of prescription for the shoes.

When one compares the cost of shoes with the cost of amputation, the savings become obvious. What price can we affix to the quality of life enjoyed by an individual who has through preventive medical practices been spared an amputation? The ADA estimates that individuals who undergo lower extremity amputations will live only 2 to 5 years following amputation. And yet Medicare continues to only pay for amputations while not allowing for reimbursement for therapeutic footwear that can prevent the trauma of amputation.

Perhaps you are already aware, Mr. Speaker, that the Veterans' Administration currently provides reimbursement for therapeutic shoes and has done so for approximately 10 years. According to Dr. Richard Baerg, head of podiatry services with the Veterans' Administration, their program using therapeutic shoes has been justified as a program which reduces the rate of surgery and, therefore, reduces costs.

Mr. Speaker, an amputation costs Medicare approximately $15,000 per patient. But therapeutic footware can prevent more than just amputation. Medicare now pays for costs of hospitalization for surgery on lesions, debridement of ulcers and infections. Members should also be aware that many individuals undergo more than one amputation on a single limb. This occurs when the first amputation does not properly heal.

Very simply, Mr. Speaker, this amendment provides Congress with the opportunity to substantially improve the quality of life for diabetics while actually reducing costs to the Medicare system. I urge the Rules Committee to permit House consideration of my amendment.

AMERICAN DIABETES ASSOCIATION

The amendment offered by Congressman Christopher Smith (R-NJ) is strongly supported by the ADA as it will provide Medicare payment for therapeutic shoes for individuals with severe diabetic foot disease. This provision would amend Section 1861(s) of the SS Act to include coverage under Part B of Medicare for specially molded therapeutic shoes if they are prescribed by a physician who certifies that the individual has severe diabetic foot disease and is under a comprehensive plan of care related to their diabetic condition. Severe diabetic foot disease is intended to include those individuals who have severely deformed or ulcerated feet. The shoes must be fitted and furnished by a certified pedorthist, a certified orthotist, or other qualified individuals as to be defined by the Secretary.

This amendment would provide payment for 80 percent of the fair costs of a pair of shoes incurred in any calendar year but could not exceed $300.00 (80 percent of $375).

It is intended that the requirement of physician certification would act as a control to guard against possible misuse or abuse. It is also intended that the individual be under a plan of care which would be directed toward their diabetes generally as well as their foot disease. This would include patient education. It is believed that this requirement would allow the patient to maximize the benefits provided by the shoes.

It is also understood that the Health Care Financing Administration could promulgate regulations requiring that there be prior authorization by a PRO or other entity before shoes are provided. This would make sure that the benefit is limited to those individuals who have severe foot disease marked by deformity and/or ulceration. It would also help assure that the patient is under a plan of care in which their diabetic condition generally, not just their foot disease, was being treated. It is not intended that this require that the individual be part of a diabetes clinic; rather, that they be under the care of a physician who is overseeing the treatment of their diabetes and monitoring their condition.

JUSTIFICATION

Of the approximately 5½ million diabetics in the United States, it is estimated that about 2.1 million are 65 and over and Medicare eligible.[1]

Diabetics are particularly prone to foot disease. Many suffer from peripheral neuropathy or loss of feeling or sensation in the extremities. This can lead to repeated injury or trauma resulting in ulceration and infections.

Diabetics also suffer from peripheral vascular disease. This disease causes the blood supply to the lower extremities to be severely diminished. A diminished blood supply impairs or prevents the healing of ulcers and infections. This can lead to gangrene and ultimately to amputation.

The Center for Disease Control estimates that each year 40,000 diabetics are required to have a lower extremity amputation.[2] Of these 40,000 amputations a year anywhere from 10,000 to 25,000 occur in individuals aged 65 and over.[3] It is estimated that individuals who undergo lower extremity amputations will live only 2-5 years following the amputation.

The rate of amputations could be substantially diminished if proper foot care were available. Proper foot care involves patient education and where the foot disease is only mild, the use of extra-depth shoes and plastizote inserts. For patients who suffer from severe diabetic foot disease, that is deformity and ulceration, specifically designed therapeutic shoes molded to the individual are necessary. It is these specially designed shoes that the Smith Amendment would provide coverage for.

Of the 2.1 million individuals 65 and over who suffer from diabetes, it is believed that at least 3 percent have severe diabetic foot disease.[4] If these high risk individuals had properly fitting therapeutic shoes, it is believed that at least 40 percent of these amputations could be prevented.[5]

The cost of a pair of specially fitted molded shoes can vary from about $150 to $400.[6] The Smith amendment would cap the amount at $375 so that Medicare would pay no more than $300 (80 percent of $375). However, it is likely that the reasonable charge will be less. In our cost analysis, however, we use the maximum cost to Medicare of $300 per pair, per year. While the amendment would allow only one pair of shoes annually, it is believed that in 30 percent to 40 percent of cases, the shoes will last longer, anywhere from 18 months to two years. The shoes can be resoled, and can be fitted with new inexpensive inserts to extend their life. Thus, while our cost analysis assumes all eligible persons will avail themselves of a new pair every year, this is not likely to be the case.

When one compares this with the cost of an amputation, the savings becomes obvious. An amputation costs Medicare approximately $15,000 per patient.[7] Even if shoes prevent only 40% of amputation, this could result in a gross cost savings in one year of $105 million.[8] This would result in a net sav-

[1] National Diabetes Data Group and the Center for Disease Control.

[2] This information was derived by the CDC from the statistics collected by The National Center for Health Statistics from the National Hospital Discharge Survey, 1980.

[3] HCFA reports 10,262 cases under DRG 285 which is limited to individuals with an entry diagnosis of amputation for endocrinology disorders which encompasses diabetes. This DRG does not include individuals admitted for other diabetes related illnesses who then undergo an amputation. The CDC estimates that of the 40,000 amputations per year among diabetics, 64 percent or 25,600 occur among individuals 65 and over. Most, Sinnock, *Diabetes Care*, V. 6, 87-91, 1983.

[4] Podiatrists and Diabetologists consulted by the American Diabetes Association estimate the amount as somewhere between 3 percent and 5 percent.

[5] J.K. Davidson, "The Grady Memorial Hospital Diabetes Program," *Diabetes in Epidemiological Perspective*, London, 1983. In that study amputations were reduced approximately 40 percent when individuals participated in a comprehensive plan of care which included proper foot care and shoes where indicated and where affordable. Because that study was done among an indigent population, many study participants were unable to afford shoes. Had shoes been readily available, it is possible that the amputation rate would have been reduced even more. In another study at Kings College in London, amputations were reduced approximately 50 percent where individuals participated in a foot care program which included special shoes.

[6] Diabetologists and Podiatrists consulted by the ADA estimate the price as generally not less than $350. However, the Veterans Administration, which operates a comprehensive foot care program, pays approximately $100 to $150 per pair.

[7] HCFA 1981 cost data for Part A is approximately $10,000. The $15,000 was derived by a 5 percent inflation index and adding on the estimated Part B costs which include surgical and anesthesia costs and prosthesis, in some cases.

[8] This figure is derived as follows: If we take the average of the range of estimates for numbers of amputations per year in individuals 65 and over, that is, the average of 25,000 and 10,000, we get 17,500 amputations per year. Forty percent, the number expected to be prevented, would be approximately 7,000. $15,000 times 7,000 equals $105 million.

ings of $86.1 million (the cost of amputation prevented minus the cost to Medicare of shoes for the eligible population). (See discussion, *infra*)

What is not included in this estimate is the medical costs attributable to foot disease which does not result in an amputation. This includes costs of hospitalization for surgery on lesions, debridement of ulcers and infection.[9] It also does not take into effect the fact that many individuals undergo more than one amputation on a single limb, when the first amputation does not properly heal. Nor does it reflect the added costs incurred by the Social Security System associated with permanent disability due to amputation.

This amendment clearly represents the opportunity to improve the quality of life for diabetics while reducing costs to the Medicare system.

U.S. WATERWAYS IMPORTANT TO TRADE MARKET

(Mr. BEVILL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BEVILL. Mr. Speaker, we Americans have an advantage in the international trade market. We have the best inland waterway system in the world. And, we need to use it to fight some of the unfair foreign trade competition we've seen in recent years. With our waterways, we can ship American goods at less cost and be competitive in foreign markets. That means jobs for our workers.

When we let foreign countries dominate our trade market, we are exporting American jobs instead of American products. We need to turn that trend around. A good place to start is by recognizing the need to modernize our waterways and ports. Every dollar we spend renovating our waterways and deepening our ports helps our economy. We cannot afford to let the valuable resources deteriorate. We need to replace those outdated locks that keep our barges tied up for hours and deepen our ports to accommodate the biggest ships.

Mr. Speaker, a modern waterway system can help lower that massive trade deficit. The entire text of my remarks follows:

Mr. BEVILL. Mr. Speaker, at a time when Congress is considering new trade legislation, I would like to point out the importance of our Nation's waterways in foreign trade. We have more than 25,000 miles of inland, intracoastal and coastal waterways and more than 200 ports that serve 42 of our 50 States directly and each one indirectly. This system can move large loads over long distances at low costs. When we can move coal and grains at lower costs because of these waterways, we are better able to compete for foreign markets. Our goal should be to more fully develop these lanes of commerce so that we can ship our goods to export centers more economically.

We don't want to export American jobs. We want to export American products. But we have been on the losing side of an escalating trade war. The foreign trade deficits have been at record high levels. That hurts us all, especially our Nation's farmers, our textile, coal and metals industries. In coming weeks, we will be debating the pros and cons of protectionism for American industry in the face of unfair trade practices by foreign countries. I believe we can win part of the battle here in our own backyard.

I have long supported and will continue to fight for legislation which will enable us to start construction on some of the most urgently needed water projects across the country. We cannot turn our backs on this vital renovation and development of our waterway system.

The United States is a major contender in world trade. But, sadly, our ports are not keeping pace with the efficiency of those of major world trading nations. Port depths along the critical Atlantic and gulf coasts were designed for the early 20th century trade. These ports are now dominant in the coal and grain trades but cannot accommodate 35 percent of the world's dry bulk fleet fully loaded. That 35 percent includes ships which require depths of 50 feet or more. The major coal ports of Norfolk and Baltimore which ship out over two-thirds of U.S. export coal have depths of 45 and 42 feet, respectively. The major grain ports of the United States on the lower Mississippi River handle two-thirds of U.S. grain exports, but have depths of only 40 feet.

The fastest-growing coal ports are Mobile in my home State of Alabama and the lower Mississippi ports, on the gulf. Their link to the river barge system is responsible for this growth. We expect that the Tennessee-Tombigbee Waterway will make U.S. coal even more competitive in foreign markets by cutting the costs of shipping Appalachian coal. It appears that we have cleared the way for deepening the major coal and grain ports—Norfolk, Baltimore, lower Mississippi, and Mobile. And this is a step in the right direction. Each bargeload of coal we export means a job for an American worker. Each load of grain we export is good news for our farmers.

We must consider that investment in modernizing our waterway system is an investment in the future. Without that, we are more likely to lag behind other nations in the trade arena.

Deepening our ports is a start. We also have locks and dams that are deteriorating. We cannot continue delaying this development. We need to get work underway for these projects because they will be needed in the next century. It can easily take 25 years to get a project to completion. What are we waiting for? The 21st century will be here before we know it.

My Energy and Water Development Appropriations Subcommittee has recognized this need. My subcommittee and I have traveled across this country looking at projects which need attention. On the Mississippi, there's the need for a second chamber at locks and dam 26; there is a backlog of barges waiting at the Gallipolis Lock and Dam on the Ohio River; in Pennsylvania, locks 7 and 8 are antiquated as is the Winfield Lock in West Virginia. Fisherman's Wharf in San Francisco needs improvement. And, in Alabama, we desperately need to replace the Oliver Lock and Dam on the Warrior River where barge traffic gets backed up.

Barges move 46 percent of America's export grain. Add a few cents per bushel because those barges have to waste time waiting at an outdated lock and that could mean the difference between loss and profit for our farmers and barge operators. Failure to modernize our waterways harms not only the water transportation industry, but our overall economy as well. We need the competition that a stronger network of waterways will provide. We should also keep in mind that when any one water project in this Nation is developed, it helps the entire Nation.

The U.S. waterways support the Nation and serve the world. We are the No. 1 world exporter of both grain and coal. Our grain exports are the largest single contributor to the U.S. balance of trade—over $33 billion in 1984. The inland waterways move over half of all exported grain from river terminal to export elevator, an inland journey of over 1,100 miles. We cannot afford to jeopardize this important commerce by allowing our infrastructure to deteriorate. Already, grain exports are falling because of the high price of U.S. grain and the rise of foreign grain production. Do we want to deal our grain producers another blow with costly transportation costs because our inland waterways and ports don't measure up to world class standards?

I might also point out that we have a common interest in our Nation's defense. Our waterways are essential for a secure America. Coastal ports serve Navy, military transport, and U.S. Coast Guard vessels in peacetime and during mobilization. The Navy's new homeport policy will expand the number of ports serving as a permanent base for its fleets. Shipyards are essential for defense and they must have access to maintained waterways. Most of the U.S. stockpiles and domestic sources of strategic commodities are served by the inland rivers and Great Lakes. Would we want delays in shipping these goods in time of war? I don't think so. That's another reason why it's our job to make sure our waterway system is in tip-top shape.

Improving our Nation's waterways won't be the only step toward balancing our foreign trade. But it's an important part of achieving that goal. That's why my subcommittee continues to include appropriations for this vital work.

We must also reduce the Federal deficit, lower interest rates and establish a healthier and truer value of the American dollar in relation to foreign currency. The strong

[9] A study at the Kings College Foot Clinic in London found the recurrence of diabetic foot ulcers for individuals furnished with therapeutic shoes to be 19 percent compared with 91 percent for individuals who wear regular shoes.

dollar keeps foreign products flowing into our country.

We can be cautiously optimistic about the recent drop in our trade deficit from a high of $13.4 billion in June to $9.9 billion in August. But it's too early to say we are seeing a turnabout in trade. And, even with that drop, our trade deficit has totaled $91.2 billion for the first 8 months of this year. That's 8.6 percent greater than last year's trade deficit during those same 8 months. Government officials still believe the 1985 trade deficit could reach $150 billion. Any way you slice it, the trade deficit is taking too big of a chunk out of our economy.

It's time for us to do what we can to help make American farm products, lumber, coal and other products more attractive and competitive to world markets. Improvements to our export system will lower transportation costs for goods going to export. Those increased exports will bring greater profits. That means more jobs back to America. That's what I'm working for. That's what America needs. That's what America wants.

THOUGHTS ON "AN INTERVIEW WITH GORBACHEV"

(Mr. DORNAN of California asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. DORNAN of California. Mr. Speaker, I had intended to speak yesterday on the first day of our fiscal year about the problem of continuing resolutions in this House where we run from our fiscal responsibility, and I will still do that, but I will submit most of my remarks as written. I just wanted to comment, because my leader gave a brilliant exposition of Soviet hypocrisy and phoniness today, that this September 9 issue of "An Interview With Gorbachev," where they even go to the trouble of airbrushing off the birthmark on his forehead, is the most disgusting, groveling, bootlicking interview I have ever seen with a public figure in my entire life.

His pinstripe suit is "resplendent," his shirt is "gleaming," he brings down in a "karate style" chop on the desk, but always "quite gently;" he is "tanned," he is "solid but not fat," he "laughs easily," he "dominates the meeting with the five Time executives including senior editor Henry Grunwald;" he "dominates" the meeting with three extraordinary tools: Eyes, hands, and voice." The voice is "extraordinary, deep but also quite soft."

You have never seen an article like this about our leaders, even in the house organs of our great parties.

No President has ever been covered like this.

HYPOCRISY: THEIRS AND OURS

Mr. DORNAN of California. Mr. Speaker, here it is, the beginning of a new fiscal year and we still have not completed our constitutionally mandated responsibility of looking after the Nation's finances.

Because of our negligence, we have been forced to pass another embarrassing continuing resolution. This clearly illustrates two things: That the "tax and spend" liberals in the House are not capable of producing a serious budget; and that the budget process is the problem, not the solution.

Let's face facts my dear colleagues, the budget process is out of control and it threatens irreparable harm by increasing the deficit, and therefore hurting the economy. Something must be done to reform our budget process.

During the last 5 years Congress has exceeded the target in its budget resolution by an average of $28 billion a year. In fact, since fiscal year 1977 Congress has been forced to pass, and the President forced to sign, 24 continuing resolutions. And the only reason we pushed through a budget this year was because our August recess vacation was about to commence. How's that for responsibility.

But the fact is that the big spenders here on the Hill actually prefer to spend money this way. By waiting until the last minute Congress attempts to pressure the President into accepting appropriations bills that exceed the limits established in our own budget resolution. The President is then forced to either shut the Government down, an unpleasant prospect, or take what Congress dumps on him. This is a sort of "budgetary terrorism" whereby the Congress holds the budget hostage until the administration meets its demands.

For instance, this year the continuing resolution contains some $900 million for the World Bank's International Development Association, a good portion of which is for zero interest loans to Communist countries and to Third World countries hostile to U.S. interests. Because these zero interest loans are part of the continuing resolution, there is never any debate or individual voting record established on this controversial spending of U.S. tax dollars. This is a devious way to sneak in the back door what cannot be brought across the front porch with open debate. This is irresponsible, and very wrong. My colleagues, just ask any of your voting taxpayers.

THE DEDUCTION FOR STATE AND LOCAL TAXES

(Mr. HORTON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HORTON. Mr. Speaker, I rise, as cochair of the Northeast-Midwest Congressional Coalition, to express in the strongest terms our total opposition to any tax reform package which restricts the deduction for State and local taxes. Our position on this matter is not new. My cochair, Congressman WOLPE, and I have stated our concerns on behalf of the Executive Committee of the Coalition in testimony before the Ways and Means Committee and in meetings with Treasury Secretary Baker.

With the Ways and Means Committee beginning markup, however, our concerns take on greater urgency. We have heard a great deal of talk lately about a possible compromise on the issue of deductibility, and it is important that we let the committee—and the administration—know the depth of our opposition.

Over the days and weeks ahead, you will be hearing from Members across the country who share our concerns. I urge you to weigh their statements carefully and examine the impact that repeal or restriction would have on the delivery of Government services and education in your own district.

I want to emphasize first of all that we welcome the interest of the administration in reform of our tax system. The Nation's Internal Revenue Code has grown extremely complex, and in recent years it has become overloaded with provisions designed to benefit special interests. Any effort to make it simpler for the average American to file tax returns and to produce a system that distributes the tax burden more fairly deserves our close attention.

However, we cannot ignore the fact that the tax system is a major instrument through which our National Government seeks to achieve its policy goals. What we do on taxes may have more impact on our national and regional economies than almost any other action we take.

Our responsibility as legislators is to insure that, in addition to creating a fairer and simpler system, tax reform also contributes to economic growth, especially in those areas of the country that have lagged behind the recovery.

By these criteria, we find repeal of deductibility to be potentially the most damaging element of the administration's tax reform proposal. Residents of our region constitute 44 percent of the Nation's population, but would pay 57 percent of the cost of eliminating deductibility. Our fear is that this would exacerbate the drain of income out of our region. My State of New York, for example, currently gets back only 92 cents in Federal spending for every dollar in taxes it sends to Washington. Eliminating deductibility only would make the situation worse.

Repeal also would violate one of the most basic principles of federalism upon which the Nation's intergovernmental system is based. The deduction for State and local taxes is the oldest in the federal system. It was included in the legislation establishing the modern income tax in 1913. The intent of the framers of that legislation was clear: They did not want the Federal Government engaging in "double taxation"—taxing individuals on income they already had paid as taxes to State and local governments.

The administration claims that the reason for the discrepancy between States in terms of the value of deductibility is that we have higher State and local tax rates.

Our States—all of which are net energy importers—rely mainly on income, sales, and property taxes for their revenues. Energy-producing States, on the other hand, have maintained low personal tax rates by imposing severance taxes on oil, gas, and coal. In 1983, eight so-called "low tax" States—Alaska, Wyoming, North Dakota, New Mexico, Oklahoma, Louisiana, Montana, and Texas—collected $6.5 billion from severance taxes. That was more than 25 percent of their State tax revenues.

Under the administration plan, these severance taxes—which ultimately are passed on to consumers throughout the country—would be considered business taxes, and therefore would remain deductible.

The argument also has been made that the wealthy benefit most from deductibility. This is not the case. Repeal would hit middle-income taxpayers hardest. Over half the households that take the State and local deduction have incomes below $30,000, and 87 percent have incomes below $50,000. In addition, half of all households with incomes between $20,000 and $25,000, two-thirds of those between $25,000 and $30,000, and fully 80 percent of those between $30,000 and $50,000 deduct their State and local taxes.

In fact, more taxpayers claim the State and local deduction than any other deduction, including the one for home mortgage interest. In 1982, 33 million filers took the State and local deduction; 24.5 million—that's 25 percent fewer—took the home mortgage interest deduction. Households deducting State and local taxes were distributed fairly evenly around the country—not concentrated in a few high-tax States.

For these reasons—and for others that will be enumerated—we oppose any compromise on the issue of retaining full deductibility for nonbusiness State and local taxes.

LEGISLATION TO MAKE SOCIAL SECURITY AN INDEPENDENT AGENCY AND REMOVE IT FROM THE UNIFIED BUDGET

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Oklahoma [Mr. JONES] is recognized for 5 minutes.

Mr. JONES of Oklahoma. Mr. Speaker, I take this special order to inform the House that I have introduced legislation which has been cosponsored by the members of the Social Security Subcommittee and by about 20 other colleagues of ours here in the House.

The bill we have introduced does essentially two things: First, it makes Social Security an independent agency; and second, it removes Social Security from the unified budget beginning in 1987.

The purpose of this legislation, simply stated, is to take Social Security out of politics, to quit making Social Security a political football and creating insecurity for the older Americans it is designed to help; and second, to give Social Security Administration a sense of continuity and stability.

As I pointed out, this legislation is sponsored in a strong bipartisan way, and also it crosses philosophical lines. For example, we have such known conservatives on the Republican side as BILL ARCHER, who is the ranking Republican member on the Social Security Subcommittee, JAKE PICKLE of Texas, the former chairman of the Social Security Subcommittee, and liberals such as ED ROYBAL, who heads up the Aging Committee, and the distinguished gentleman from Florida, CLAUDE PEPPER, who formerly headed the Aging Committee. They are all cosponsors of this legislation.

Social Security, unfortunately, has been used as a political football by both parties in past years. It has been unstable in the sense that there have been nine Social Security Commissioners just in the last 12 years, and that has created management turmoil within the administration, and this bill is designed to combat that.

What the bill does is, first of all, create a new independent agency free of the redundant layers of bureaucracy and redtape that was created by the Department of Health and Human Services. It has a bipartisan three-member Board appointed by the President with staggered 6-year terms. The board would have broad legislative, regulatory and administrative authority and would generally serve as the policymaking arm of the agency. In order to manage the day-to-day administration, the board would appoint a commissioner to a 5-year term to serve as the chief operating officer for the Social Security Administration.

The second thing it does is to take Social Security out of the unified budget beginning in 1987. My colleagues will recall that the Social Security Amendments of 1983, which saved the Social Security Trust Fund, already dictated that Social Security be taken out of the unified budget in 1993. This just accelerates it to 1987.

The fact is, the Social Security Trust Fund, the disability and retirement trust fund, has begun this year building up surpluses, and those surpluses will continue to build, assuming we have some semblance of economic growth, until the year 2020, when we start dipping into those surpluses to pay for the baby boom generation as it enters into retirement years.

Those trust funds are not contributing to the deficit of the United States, and by taking it out of the unified budget, we take Social Security out of the politics of budget debate because it does not belong there, and we also focus the true attention that we ought to be focusing on where the budget deficits are being created.

So I hope that others of my colleagues will be interested in joining us on this legislation. It has been reported unanimously out of the Social Security Subcommittee, and I expect that when tax reform is concluded one way or the other that we will be reporting it out of the Committee on Ways and Means.

Mr. CRAIG. Mr. Speaker, will the gentleman yield?

Mr. JONES of Oklahoma. I would be happy to yield to the gentleman from Idaho.

Mr. CRAIG. I thank the gentleman for yielding.

Mr. Speaker, I would like to thank my colleague, the gentleman from Oklahoma, for taking this special order to discuss the legislation that he has just introduced. I have heard about it. I have not had an opportunity to look at it in detail, but I would applaud his action.

For some time, I and a good many others have felt that Social Security needed to be viewed separately, apart from, as an independent agency, away from the unified budget, to do exactly what the gentleman is saying should be done, to view it in the cold light that we need to examine it for its soundness, for its actuarial soundness, and how it properly can be dealt with from one trust fund to another, and certainly not be embroiled, as it has been over the last 4 or 5 years, in the whole budget debate and the politics of that budget debate.

I know I, as one Member of this body, for some time have been very disturbed when I hear the argument, made in a bipartisan way on this floor, that as we work to balance the budget or as we work to cut the budget, we are balancing the budget on the backs of the Social Security recipients. This is an argument that could no longer be placed if the gentleman's bill is passed and becomes law. It does, then, allow not only the Congress but the administrative body that would be setup under the gentleman's legislation to administer Social Security, an opportunity to view it separately, as it was historically, and as it would be again.

I congratulate the gentleman on this effort.

Mr. JONES of Oklahoma. Mr. Speaker, I thank the gentleman very much and look forward to working with him and Members on both sides of the aisle to make sure that this becomes law.

TRIBUTE TO RUSSELL SIDNEY GIDEON

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio [Mr. STOKES] is recognized for 5 minutes.

Mr. STOKES. Mr. Speaker, I take this time to advise the House of the passing of a good friend of mine and an exceptional human being—Russell

Sidney Gideon. Russell Gideon was the Emeritus Past Sovereign Grand Commander of the United Supreme Council, A.A.S.R. of Freemasonry, Prince Hall affiliation, northern jurisdiction. Russell Gideon was revered by masons around the globe. He leaves a host of friends and admirers.

Dr. Gideon was born in 1904 in Liverpool, Nova Scotia, Canada. When he was 9, his family moved to Calgary, Alberta. While growing up in Calgary, Gideon was an all-star athlete in hockey, baseball, track, and football. He is reported to have caught the first forward pass in Canadian football while playing for the Calgary Tigers. He, while often being the only black man in the competition, led the Victorian Athletic Club to multisport championships from 1921-24.

One of the many attributes for which Dr. Gideon was known was his intense energy, drive, and motivation. Many of these attributes grew out of his experiences in Calgary. Russell Gideon became engaged in multiple enterprises as early as age 15. At that age, he began working as a delivery boy in a drug store in Calgary, while he organized a five-piece band on the side. After going to school, then working at the drug store, the band, with Russ as the drummer, would then play at hotels on weekends.

The drug store part time job made a lasting impression. The drug store owner had a son the same age as Russell Gideon. The owner decided to send his son to become a pharmacist while at the same time, he told Russell Gideon that he would help him get a job as a railroad porter. Mr. Speaker, nothing could have given Russell Gideon more determination to become a pharmacist.

Determined to pursue his dream, Russell Gideon left Calgary in 1932 and moved to Boston. At that time, pharmacy schools did not admit black students. Undeterred, Russell Gideon began studying at the Patrick School of Pharmacy. Dr. Patrick was a black pharmacist who seriously felt the need to train others. When Massachusetts pharmacy schools finally admitted blacks, Russell Gideon enrolled at Western Massachusetts School of Pharmacy where he graduated in 1941.

In 1933, Russell Gideon met Lillian Morris. They were married in 1934 and during the past year, celebrated their 50th wedding anniversary.

The Gideons were deeply involved in World War II. Lillian served in the Red Cross in England and France while Russell was a tech sergeant in the 366th Infantry Medical Corps.

After the war, the Gideons planned to move from Boston to North Carolina. Just before going to North Carolina, they went to visit one of Russell's relatives in Seattle. The trip changed their minds and their futures.

Mr. Speaker, the Gideons moved to Seattle where Russell operated a pharmacy for 13 years. He later became a rehabilitation counselor and was appointed to the Washington State Parole Board by Governor Rossilini in 1963.

As a result of his numerous civic activities, Russell Gideon has been awarded many honors and commendations. He is listed by Ebony magazine as one of Amercia's 100 influential blacks and he is listed in "Who's Who in Black America."

In addition to being a national officer with the masons, Dr. Gideon served as a national officer with Phi Beta Sigma Fraternity. He was also an officer of the National Business League and a life member of Kiwanis International. In Seattle, he will be remembered as a founding member of the Central Area Business League; a charter member of the Central Area Kiwanis Club; the past chairman of the Trustee Board of Mr. Zion Baptist Church; and for his service on the boards of the Seattle OIC, Seattle Urban League, East Madison YMCA, and other organizations.

Mr. Speaker, Dr. Gideon leaves his wife, Lillian, his son Melvin and his sister, Ms. Lela Dodd of Toronto. At this time, I ask my colleagues to join me in extending condolences to his family. We will all miss this faithful servant and outstanding leader.

□ 1810

PRESIDENT'S ACTION ON TRADE CRISIS MAY BE TOO LITTLE TOO LATE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Alabama [Mr. SHELBY] is recognized for 5 minutes.

Mr. SHELBY. Mr. Speaker, at dawn today, America's coasts were the target of a massive foreign invasion—not by a foreign army, but by foreign imports—auto, steel, textiles, electronics, forest products, just to list a few.

I was glad to see this week that the President has turned from his nonchalance and recognized the fact that we have a trade crisis. I fear, however, that the President's response may be too little too late.

The President said in his announcement of a new trade policy this past Monday morning that he had worked for 4 years at Versailles, Williamsburg, London, and Bonn to get our trading partners to dismantle their trade barriers, eliminate their subsidies and other unfair trade practices.

During those 4 years, employment in the steel industry declined by more than 50 percent, or about 240,000 jobs. In Alabama, the steel industry has been devastated by imports resulting in the loss of thousands of jobs. Lumber operations have had to close their doors or prune their work force in the face of soaring Canadian lumber imports.

On August 28, the President refused to grant relief to the footwear industry, which has seen 105 plants closed in this country in 1984 alone—costing 13,300 jobs.

Then, a few Saturdays ago, in his weekly radio address, the President announced that he had asked the United States Trade Representative to investigate Korean prohibitions on United States insurance firms, Brazil's restriction of United States high technology products, and Japanese restrictions on United States tobacco products.

Since then, the Debra Knit textile plant in Northport, AL, in my district, has announced that due to imports, it will close its doors on October 15, throwing 300 people out of work, adding to the 7,000 textile workers who have already lost their jobs in Alabama and the estimated 400,000 nationwide. Many of these employees had worked in the once thriving textile industry for years.

In the past 5 years, almost 3 million American jobs have been lost to foreign competition.

All across this Nation communities are threatened by a new wave of plant closings and unemployed workers are worried about feeding and educating their families. Our very industrial base is jeopardized by imports.

Meanwhile, the President continues to tell us that the economy is doing well. Our trade deficit this year is expected to be a once unimaginable $150 billion. We have become a debtor nation for the first time since 1914. The President is obviously looking at our economy through rose-colored glasses—probably imported from Japan.

There is no simple, magic solution to our trade crisis. Developing a response—one which will determine who works and who doesn't, and the price consumers will pay for goods—is a complex and delicate task.

As part of the solution, I suggest that we get our own fiscal house in order and restore some sanity to this Nation's fiscal policy. There is a direct link between our trade deficit and our Federal budget deficit. Large budget deficits drive up interest rates which leads to a strengthened dollar. With a strong dollar, imports increase and exports decrease. The result is a soaring trade deficit. Economists estimate that the overvalued dollar accounts for 60 to 80 percent of our current trade deficit. Action must be taken to make significant cuts in our Federal deficit now.

America must also regain its competitive edge in world trade. Americans have the willingness and ability

to use our ingenuity to modernize and make the technological advancements necessary to compete head to head with foreign producers.

We need, also, to stand up to the unfair trade practices of our trading partners through tougher enforcement of our trade laws. We must also apply the principle of reciprocity and force other countries to grant access to our products, as well as initiative an aggressive program encouraging and promoting the sale of U.S. goods, both at home and abroad.

Furthermore, we need to call for a new round of GATT negotiations. The international business environment has changed since 1948 when GATT became the principal international body negotiating trade relations. Many of the GATT provisions are no longer justified in the new international economic order.

Of course, there is a clamor for a strict protectionist response. History shows that such strict measures may be counterproductive and lead to higher prices. I believe that we should heed the warnings of the ghost of Smoot-Hawley.

Alabama's economy, like most States, is comprised of industries which are dependent on export of their products. Retaliation to unreasonable trade barriers erected by the United States could cost even more American jobs.

I certainly will not deny the benefits and virtues of free trade. However, our definition of what "free" actually means does not always correspond with that of our trading partners. While we must be cautious not to unravel a fragile world-trading system and cause an inevitable trade war, there comes a time when additional pressures must be brought to bear.

One response may be to grant our industries troubled by imports short-term relief in exchange for commitments to modernize and adjust so to become a more competitive industry.

This is particularly important in light of estimates that it may take 12 to 18 months for the President's plan to have any appreciable impact on the trade deficit. How many plants will close and how many jobs will be lost in the interim?

The President said Monday, "I will not stand by and watch American workers lose their jobs because other nations do not play by the rules." Yet, in the midst of this rhetoric, Mr. Reagan threatens to veto the Textile and Apparel Enforcement Act of 1985, of which I am a cosponsor. I invite the President to come to Alabama and veto this legislation at a closed textile plant, face to face with unemployed textile workers.

In facing the challenge posed by the trade crisis, I urge strong leadership by both the President and Congress.

Positive action must now be taken to design a sensible rationale, coherent, trade policy to replace the daily jumble of reactive announcements so that we may combat swiftly and effectively this crisis threatening our economic foundation.

ORDER OF BUSINESS

Mr. PARRIS. Mr. Speaker, I ask unanimous consent that I be recognized ahead of the gentleman from California [Mr. DORNAN] who has graciously consented to that request.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Virginia?

There was no objection.

PROPOSED AMENDMENTS TO FOREIGN ASSISTANCE ACT APPROPRIATIONS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Virginia [Mr. PARRIS] is recognized for 60 minutes.

Mr. PARRIS. Mr. Speaker, in San Francisco, CA, on October 24, 1945, almost 40 years ago, to the day, the United States became one of the original 51 members of the United Nations. The United States was a key organizer of the United Nations and is still by far the world body's most important source of funds.

The regular budget of the United Nations has grown from $58 million in 1960 to $685 million in 1983—more than two-thirds of a billion dollars. That is an astounding 1,081 percent increase over the past 23 years. Even more astounding is the fact that that averages out to a 47-percent increase per year—and that doesn't even include funding of the so-called special programs.

Let me provide you with a little more in-depth view into several of these special programs. I would point out that what I will relate to you is not even the tip of the proverbial iceberg; however, it is indicative of what is happening with most of these programs.

The first of these programs is the U.N. Development Program [UNDP]. During the 1965 session of the U.N. General Assembly, on November 22, 1965, a resolution was agreed to which combined the U.N. Expanded Program of Technical Assistance [UNEPTA] with the U.N. Special Fund [UNSF]. The result was the UNDP, the U.N. Development Program.

The purpose of the organization, as originally stated, was to assist lesser-developed countries in their efforts to accelerate social and economic development.

When established in 1965, the Governing Council had only 37 members; however, in 1971 this number was increased to 48. Developing countries now hold 27 seats on the Governing Council and Eastern Europe holds 4. At the same time, Western European countries and "others" normally considered out allies hold only 17 of the 48 seats, or approximately 35 percent of the total membership. "Others" includes such countries as the United States, Australia, Canada, Japan, and Turkey.

Keeping in mind the originally stated purpose of the program, as well as the unbalanced vote ratio, lets look at some of the grants which have been issued by UNDP in the past several years. This information is derived from the annual reports of the Administrator and the compendium of approved projects for January–September 1982—the last year for which a quasi-complete compendium of programs is available.

In Ethiopia, a nation virtually paralized with drought and famine, a nation with adequate food to feed the hungry rotting on the docks for lack of adequate transport capability, UNDP granted $980,000 for logistical and technical support for food aid transport.

At the same time, however, the UNDP issued grants to Ethiopia for the following: $4 million for handicraft industries and leather development; $100,000 for solar power for telecommunications; $716,000 for preservation and presentation of selected sites and monuments.

All in all, the UNDP, in just one part of calendar year 1982, finalized grants to Ethiopia totaling $61 million.

While we are on the subject of grants to Ethiopia, consider that in December 1984, over U.S. objections, the U.N. General Assembly approved the construction of a $73.5 million conference center in Ethiopia, even as millions of Ethiopians were starving. Now that is food for thought.

Other UNDP grants in that portion of 1982 included:

To Afghanistan, illegally occupied by the Soviets, grants were made for: Phase I, administrative reform, $800,000; World Bank development project, $3.1 million; civil aviation fellowships, $2 million; assistance to the Afghan Institute of Management, $1.5 million.

To Bulgaria, grants were made for: Ship Hydrodynamics Center and Robotics Institute, $1 million; ship handling and maneuverability tests, $500,000; various science and technology projects, $2 million.

To Costa Rica, grants were made for: Implementation of the national development plan, $500,000; National Center for Port Training and Preparation, $200,000.

To Cuba, a pawn of the Kremlin with a Communist presence just 90 miles from our shores, grants were made for: Training of personnel for

the hotel and tourist industry, $1.5 million;

Introduction of nuclear techniques into the national economy $1.8 million. A total of $24.3 million went to Cuba for just a part of 1982.

For Czechoslovakia, an Eastern European satellite of the Soviet Union, grants were made for: Strengthening of maintenance in iron and steel industries, $1.1 million grants to Czechoslovakia totaled $3.1 million.

To Iran, a grant was made for: Phase II, administrative support services, $2 million.

To Laos, grants totaling $27.2 million were made.

To Libya, a base for the worldwide export of terrorism under the leadership of Mu'ammar Qadhafi, grants totaling $5.5 million were made for: Phase II economic planning, $1.5 million; industrial research center, $2 million.

To Mongolia, grants totaling $7.5 million were made.

To Nicaragua, the home of the Sandinista government which is virtually at war with the balance of its neighbors in Central America, grants totaling $6 million were made for: Public finance administration and budget system, $700,000; other policy and planning areas, $2.3 million; support for the finance corporation of Nicaragua, $30,000; salaries for national development plan, $200,000; international trade and development, $336,000.

To Poland, grants totaling $8 million were made for: The trans-European north-south motorway connecting Soviet bloc nations, $1.8 million.

To Romania, an Eastern European nation, grants totaling $11.1 million were made for: Phase II, development of nuclear technology, $700,000; various transportation building programs, including the north-south motorway, $1.6 million; industrial development, $1.5 million.

To Syria, grants totaling $16.8 million were made for: Phase II, testing, research and development center, $1.5 million; shipbuilding and ship repair industry, $13,000; development planning, phase II, $1 million; hotel and tourism training center, $1.9 million; management development and productivity center, $1 million.

To North Vietnam grants totaling $57 million were made for: Feasibility study for four dams, $5 million; natural resources projects, $12.6 million; institute of agricultural sciences, $7 million; logging training, $3.6 million; industry, $5.5 million; transportation and communications, $4.6 million; science and technology, $1.2 million.

To Yugoslavia, grants totaling $7.5 million were made for: High energy ionizing radiation (industry), $170,000; relocation of slide bearings factory, $120,000.

These are just a few examples of the grant activities approved by the UNDP in just 1 year.

Since 1976, the United States annual contribution to the UNDP has increased by 65 percent. In that time, the United States has contributed over $1.3 billion to this program. This year alone, the United States contributed $165 million—25 percent of the entire budget. And that is how Americans' tax dollars are being spent without any real control by the United States.

Getting back to the United Nations regular budget, let's look at its grown over the past 40 years. In 1946, the regular budget for the United Nations was $19.3 million. By 1984, that budget had grown to $792 million—an astounding 4,168-percent increase since 1946. I want my colleagues to understand that that is an average increase of 107 percent per year, or over 1,000 percent per decade over the last 40 years—and that doesn't include our contributions to the various so-called special programs. Clearly, this whole situation has gotten quite out of hand. This is especially true when you consider what the United Nations is spending all of this money on and who decides where it is to go.

You have got to answer the questions, "What kind of voice does the United States have in the votes and day-to-day operations of this institution," and "Is the United Nations good for the United States and for the rest of the free world?" I would hope to provide you with sufficient information with which to answer these questions. Based on available information, the conclusions were not at all difficult for me to draw, and I believe anybody reviewing this situation from the standpoint of the interests of the United States can only reach the same conclusion.

Let's review how the $14 billion in American taxpayers' money contributed to the United Nations has been spent since 1946.

There is simply no incentive at the United Nations to cut costs or otherwise hold down budget growth. The vast majority of nations voting on the U.N. budget pay a miniscule share of U.N. outlays. For every $1 million increase in the budget, the 80 developing countries who contribute the minimum 0.01 percent of the budget are assessed only $100 per nation. Clearly, these developing countries receive substantial return for their $100 investment; yet it is the United States and other developed nations that bear the brunt of these increased costs. The trouble is that the United States and the developed nations have, by comparison, relatively few votes with which to control or even influence budget decisions.

Let's look, also, at some other ways in which our taxpayers money is put to use in the United Nations. Look, for example, at the U.N. Conference on Trade and Development [UNCTAD]. It spends $9 million in U.S. contributions on maintaining its permanent offices, $1 million for conferences and $314,000 for consultants. By comparison, however, it spent only $284,000 of the $9 million U.S. contribution on programs to promote and expand world trade and only $875,000 for encouraging economic cooperation among developing countries. That was in 1982—since then, the situation has only worsened.

Indeed, UNCTAD was created to foster the economic development of Third World nations through increased trade and improved access to world markets. Instead, however, UNCTAD has actually undermined the Third World's potential for growth by spearheading the drive to create the new international economic order.

In another area, consider what was done with the 1984-85 U.S. contribution to UNICEF: $3.3 million was used for child health in Africa and $724,000 was used for child nutrition in Africa. At the same time, however, only $22,000 was used for child nutrition in Central and South America; $953,000, almost $1 million was used for social welfare programs for children in Africa while only $24,000 was used for social welfare programs for children in East Asia and Pakistan; and, finally, $2.5 million was used for formal education in Africa while a mere $119,000 was used for education in Central and South America.

Although the Continent of Africa and its children certainly need and deserve our help and assistance, the question remains, is this a fair and equitable distribution of our taxpayers money and the programs it supports throughout the world? I think not, to the exclusion of proportionate assistance for many of our other friends around the world.

The United States really does not have any control over the actions of the United Nations or its related agencies. We don't determine where these funds go, to whom, or how much—the Soviet Union has seen to that. The United Nations has evolved into a valuable tool used by the Soviet Union and her satellites in executing their expansionist policies. The United Nation has deteriorated to a forum for propaganda for the Soviets, and a very effective one at that.

Four decades after it was founded with the goal of maintaining world peace, the United Nations has become instead a symbol of largely failed dreams and a center of anti-American rhetoric. It has drifted away from its role as an institution for the resolution of conflict. Even our U.S. Ambassador has acknowledged that regretable fact. And now we find that the vast

amounts of money spread around the Third World countries at will by the Soviets, are no more than international, political bribery.

The saddest thing about all this is that it is the American citizens who are paying for over 25 percent of these activities.

The Soviet bloc and the "group of 77"—the Third World bloc—use the United Nations to attack the free enterprise system in general, and multinational corporations in particular, as the alleged source of the world's economic ills. Increasingly over the years, there has been a developing pattern of so-called nonaligned nations voting with the Soviet Union in a knee-jerk reaction condemning the United States. In fact, a review of voting history indicates that the nonaligned nations have voted 86.2 percent of the time with the Soviet Union. That can hardly be considered nonaligned.

This U.N. majority uses a double standard in practicing selective indignation over alleged human rights violations by the United States, Israel, South Africa and other Western states, while so often overlooking outrages committed by Socialist and Communist countries.

When was the last time the United Nations passed a resolution condemning Soviet use of chemical weapons in Cambodia or Kampuchea? When was the last time the United Nations passed a resolution condemning the Soviet occupation of Poland or the military invasion of Afghanistan? When was the last time the United Nations passed a resolution condemning human rights abuses by the governments in Cuba and Nicaragua—or by the Soviets in Russia, for that matter?

In his book, "1984," George Orwell made the point that totalitarian regimes seek to hide their own despotic practices by accusing others of acts in which they themselves systematically engage. I think it is clear what is going on in New York.

Let us now focus on other ways in which the Soviet Union manipulates the United Nations to suit its own purposes, beginning with article 3 of the U.N. Charter which declares all "states" that ratified the U.N. Declaration of January 1, 1942, to be "original members of the United Nations." Accordingly, the Soviet Union is represented at the United Nations by three countries: the U.S.S.R. proper, the Ukraine, and Byelorussia, despite the fact that these two republics enjoy no independence from the Soviet system today. Not only does this afford Moscow three votes in the General Assembly, but also permits three separate New York-based missions, about a third of whose employees, according to the FBI, are deeply involved in espionage.

Section 2 of article 17 of the U.N. Charter states that "the expenses of the organization shall be borne by the members as apportioned by the General Assembly." The Charter failed to specifically mention peacekeeping operations. The Soviet Union has taken full advantage of this failure by contributing virtually nothing to peacekeeping missions in the Congo, the Golan Heights, or Lebanon. Currently, the U.S.S.R. is in arrears on its payments to the United Nations by about $200 million, nearly all of which is peacekeeping nonsupport.

The ambiguity of article 17 also gives the Soviets the option of paying its share of assessed and voluntary contributions to the United Nations in rubles, at an exchange rate determined by the Soviets themselves. In recent years, the U.S.S.R. has chosen to make virtually all of its payments in rubles, which are useless outside the Soviet Union.

The spirit of articles 100 and 101 of the U.N. Charter is clearly stated: Secretariat employees are to be international civil servants, loyal to the United Nations rather than to any particular nation. However, paragraph 1 of article 101 opened up a loophole allowing the Secretary General to appoint staff according to General Assembly recommendations. In 1968, Platon Morozov, the Soviet member of the 1968 Committee on the Reorganization of the Secretariat, demanded that permanent employment contracts—U.N. civil service contracts—no longer be issued. As a result today, virtually every one of the 200-plus professional Secretariat employees from the U.S.S.R. are on a fixed-term contract.

In addition, all the activities of these employees are coordinated in detail by the Soviet Mission to the United Nations. According to Arcady Shevchenko, the Soviet who was United Nations Under Secretary General until his 1978 defection to the United States, Soviet employees are required to turn their U.N. salaries over to the Soviet Government and receive only a fraction of it in return for their compensation. It was estimated in 1974 that about $15.2 million of the $22.7 million earned each year by the Soviet Secretariat staff ends up in Moscow. In short, the United States and the world are indirectly underwriting the work of the Kremlin.

According to knowledgable sources within the FBI, the United Nations is an established base for Soviet espionage. U.N. employees ae permitted, by U.N. headquarters agreement, to travel almost freely anywhere in the United States. About 333 of the 1,100 Communist-bloc officials in New York are professional Soviet Secretariat employees—greater than one-third of those 333, it is estimated, are agents of the KGB and other Soviet intelligence services. According to Arcady Shevchenko, the agents in New York frequently take advantage of the freedom-of-travel capabilities to conduct high technology espionage activities. The only restriction on Soviet travel is the so-called 25-mile restriction. This is not really a restriction at all inasmuch as the Soviet representative need only give as little as 24 hours notice of intent to travel inside the United States outside of the 25-mile limit, and he or she thereafter is free to do so. It is interesting to note that even these restrictions are not applied to employees from the East European satellite countries.

Next, we come to the Department of Public Information which used U.S. 1982–83 contributions for the following purposes: permanent posts, $8 million; public information contracts, $1.6 million; radio and visual services, $5 million; press and publications, $2.2 million; and information centers, $5 million.

At least several of these require further comment, in my view. First, the Radio and Visual Services Division. This includes television news summaries of U.N. events, 7,000 radio news programs on U.N. events, photo coverage of meetings, 6,200 radio programs in 18 languages, all used largely for the dissemination of Soviet propaganda.

Second, the Press and Publications Division, which publishes booklets, pamphlets and leaflets on the United Nations and its activities, disarmament and international security, racial discrimination, Namibia, decolonization, and the new international economic order, among other subjects.

With that in mind, consider that the Director of the External Relations Division of this Department, Anatoly Mkrtchyan, has been identified by Mr. Shevchenko as a KGB colonel—and, yet, he directs the dissemination of U.N. material to all 64 U.N. information centers throughout the world. The Department's practice of slanting U.N. publications in line with Soviet propaganda efforts has been more than amply documented. Case in point: the Department of Public Information [DPI] has managed to avoid any reference to the Soviet destruction of KAL flight 007 and the premeditated murder of all of its passengers. In its press releases, DPI referred to "the Korean airliner draft decision," "The destruction of Korean aircraft," "the loss of a Korean airliner," and "the disappearance of a Korean airliner;" but never once was there reference to its Soviet perpetrators.

In addition to the above, the Soviets literally control many other departments of the United Nations which include, but are not limited to, Personnel, Conference Services, Office of Legal Affairs, and the U.N. Library.

I have only touched the tip of the proverbial iceberg in these remarks today. The fact of the matter is that we, the people of the United States, are subsidizing Soviet expansionism. What I have told you today is not rhetoric, it is not American propaganda—it is pure, unadulterated, and substantiated facts, taken largely from U.S. records. And if that doesn't worry you and move you to action, then, quite frankly, I'm scared for the Congress as an institution and for America as a people; because a little of everything we believe in as a nation is wrapped up in this whole seemly mess.

This is not a partisan issue. This is something over which we should share the same concerns. We should also, as an institution, make a collective effort to put a halt to these abuses—it's not too late—yet.

I am not suggesting that we withdraw from the United Nations. In fact, I believe we should maintain our membership and continue our efforts to bring it back to the original purpose for which it was created. But until it returns to an institution dedicated to the resolution of world conflict, I believe we should and must substantially and dramatically reduce our financial support of its operating budgets.

If permitted by the resolution approved by the Rules Committee, I intend to offer several amendments to the foreign aid bill at such time as it comes to the floor for consideration. These amendments would be aimed at reducing U.S. financial participation in the United Nations. It is my profound hope that, based upon the facts which I have shared with you today and upon your own review of the situation, you will see your way clear to support either one or the other of these amendments. But, first, I hope you will give me your support when I request consideration of these amendments on the floor of the House as we consider the foreign aid bill.

I invite and urge any and all of you to investigate this matter for yourself. My staff and I would be happy to provide you with whatever assistance or information you may need or desire.

Mr. Speaker, at this point I include for the RECORD my amendments referred to.

AMENDMENTS TO H.R. 3228; AS REPORTED

OFFERED BY MR. PARRIS OF VIRGINIA

Page 48, after line 2, insert the following:

TITLE VI—LIMITATIONS

SEC. 601 Notwithstanding any other provision of law, the total amount of both the assessed and voluntary contributions of the United States to the United Nations and its affiliated agencies (including any United Nations organization or program) during any fiscal year may not exceed $146,658,000 (which is the total amount of such contributions of the Soviet Union, including Byelorussia and the Ukraine, for 1984).

Page 48, after line 2, insert the following:

TITLE VI—LIMITATIONS

SEC. 601. (a) Notwithstanding any other provision of law, the United States contribution to a United Nations organization during any fiscal year may not exceed 50 percent of the amount of such contribution during fiscal year 1985.

(b) For purposes of subsection (a)—

(1) the term "United Nations organization" means the United Nations or any of its affiliated agencies; and

(2) the term "United States contribution" means the total amount of the assessed and voluntary contributions made by the United States.

Page 8, line 10, strike out the period and insert in lieu thereof the following: ": *Provided further,* That notwithstanding any other provision of law, the total amount of both the assessed and voluntary contributions of the United States to the United Nations and its affiliated agencies (including any United Nations organization or program) during any fiscal year may not exceed $146,658,000 (which is the total amount of such contributions of the Soviet Union, including Byelorussia and the Ukraine, for 1984).".

Page 8, line 10, strike out the period and insert in lieu thereof the following: "*Provided further,* That notwithstanding any other provision of law, the total amount of the assessed and voluntary contributions made by the United States to the United Nations or any of its affiliated agencies during any fiscal year may not exceed 50 percent of the amount of such contribution during fiscal year 1985.".

Page 48, after line 2, insert the following:

TITLE VI—LIMITATIONS

SEC. 601. None of the funds made available by this Act may be used for a United States voluntary contribution to the United Nations or any of its affiliated agencies (including any United Nations organization or program) if the amount of such contribution would exceed 50 percent of the amount of such contribution made by the United States during fiscal year 1985.

Page 7, line 10, strike out "$298,364,800" and insert in lieu thereof "$224,114,800".

Page 7, line 14, strike out "$148,500,000" and insert in lieu thereof "$74,250,000".

Page 7, line 10, strike out "$298,364,800" and insert in lieu thereof "$273,065,550".

Page 7, line 15, strike out "$48,150,000" and insert in lieu thereof "$24,075,000".

Page 7, line 19, strike out "$2,282,500" and insert in lieu thereof "$1,141,250".

Page 8, line 6, strike out "$166,000" and insert in lieu thereof "$83,000".

□ 1835

Mr. Speaker, I yield to the gentleman from California [Mr. DORNAN].

Mr. DORNAN of California. I thank the gentleman for yielding.

Mr. Speaker, I had the honor of being one of the initial cosponsors of the effort of the gentleman in this area. I just wanted to go back to one point that the gentleman made earlier.

I have a special order tonight following Mr. DAN BURTON, and I intend to talk about SDI because tomorrow is the 13th anniversary of the Soviet signing of the ABM Treaty in 1972.

We ratified it on the 30th of September, and they did so 3 days later. The gentleman said earlier that we have been the most substantial giver of money in the expansionism of the Soviet empire around the world. And the United Nations, their delegation to the United Nations, all three of their delegations plus their civilian employees that the gentleman informed me about that I did not know they had, civilian employees in the work pool that were not attached to Byelo-U.S.S.R., Ukraine, S.S.R., or U.S.S.R.

Would the gentleman repeat that statement again about the effort that we have contributed to for the Soviet empire?

Mr. PARRIS. The fundamental point I would say to the gentleman from California is that the United States contributes in round dollars, in average budgets, and has in recent years, and we did this year, contributed fundamentally 25 percent of the total budget of the United Nations. That means we are by far, by a factor of 4, 5, or 10, contributing more money than any other nation to the operating budgets of the United Nations.

I pose to the gentleman and to the Nation the rhetorical question: What is it we are getting for that? The answer is, we are being condemned by resolutions, by name, for our perceived failures in a number of areas around the world and yet, never, as I pointed out in my statement, has there been a resolution condemning the invasion of Afghanistan; never has there been a prohibition, if you will, of the involvement of the Soviet Union in so many areas that the gentleman is aware of on the continent of Africa, and so forth.

Mr. DORNAN of California. The gentleman mentioned yellow rain. Of course it was the Soviet KGB colonel who was part of the scientific arm of the United Nations who had the responsibility to investigate their part in poison gas.

I just want to make an observation that the gentleman certainly did not know I was going to make, that makes this a part of the RECORD for everyone who is watching through the capabilities of C-SPAN television. I have some friends and relatives that are watching tonight in California. I would just like to point out some historical background to this House. There are Members on both sides of the aisle, some of them injured permanently, who wear or wore the Purple Heart because of wounds inflicted upon them by the military of Nazi Germany. There are Members in this House, very few, who have Purple Hearts because of wounds inflicted upon them by Communist pilots, possibly Russian pilots in Russian-made Mig aircraft, and the gentleman [Mr. PARRIS] is one of those Members who flew for the U.S. Air Force when it had just barely separated from the U.S. Army. The gentleman not only received Purple Hearts, but decorations for bravery in combat.

I followed the gentleman by a few years as a peacetime fighter pilot, because the gentleman at least brought the war to an end. I did not have to go through what he went through.

We now have a Member on the majority side who was murdered by a Soviet fighter, a Sukhoi fighter, Larry McDonald of Georgia. There are very few Members of this House, JOHN MCCAIN on our side, who suffered several Purple Hearts, some in combat and others in the most vile type of combat, Purple Hearts sustained under severe torture by the Vietnamese Communist forces.

I think it behooves the citizens of this country and all of the Members of this House when those who have been awarded Purple Hearts and other medals for valor get up to talk about how our tax dollars are used to implement the growth of the Soviet empire, that they listen and pay attention to those Members or any Member who has taken the time to research what really is the obvious.

We are undergoing a propaganda onslaught in Western Europe and in the United States, with the man at the point of that propaganda onslaught, Mr. Gorbachev, who, as former Secretary of State and former four-star General Al Haig said last night on an ABC show, is absolutely as smooth as they come. Going through all the leaders of our lifetime, Stalin 29 years, Khruschev 11 years, Brezhnev 18 years, and we had a lot of consistency in defense budgets there. Then we get 3 deaths in a row, the head of the KGB takes over for a while, Andropov, then Chernenko, a caretaker while Gorbachev got his act together, because they knew he was dying. Now we have a man probably at the age of the gentleman from Virginia, middle fifties, who may be there for 20 years, as long as most of us are in the House who are here now.

They are back to real consistency in their defense budget. He is smoother than all the rest put together. He is getting a lot of cooperation out of some segments of European and United States-Canadian media, and we had better be on our guard as we go up toward Geneva, to the convening of the meeting between President Reagan and Gorbachev on November 19.

So I thank the gentleman for his special order and hope that some of the people, Members in their offices and people out there across America, continue to watch through Mr. BURTON's special order which ties into that of the gentleman and to my special order which also ties in, on SDI, ties in with that of the gentleman from Virginia.

I thank the gentleman.

Mr. PARRIS. I thank the gentleman.

I think it is certainly accurate to say that there is no Member of this Congress who has been more dedicated in this area of concern of greater magnitude to the interests of the United States than the gentleman from California, Mr. DORNAN.

At this time I yield to the gentleman from Indiana.

Mr. BURTON of Indiana. I thank the gentleman for yielding.

One thing I would like to add: We do spend approximately 25 percent, pay for approximately 25 percent of the budget of the United Nations, as the gentleman from Virginia has stated.

It appears as though that is an exercise in self-flagellation, sometimes because of what we get out of the United Nations for our investment.

One of the things that goes along with that, in the area of funding the Communist expansion in the world that really chagrins me is that sometimes we directly support Communist regimes with American taxpayers' dollars when we really should not be doing it. One case in point happened over the past couple of months and I would like to bring it to the attention of the American people and I appreciate the gentleman giving me just a moment to do that. That is in the case of Mozambique; the president of that country, if you want to call him a president, a man named Machel, as the gentleman knows. He has killed approximately 70,000 of his countrymen in concentration camps, many tortured to death. Two hundred thousand to three hundred thousand have been incarcerated in these so-called reeducation camps. He has been sending thousands of young people from his country to Cuba to educate them in Marxist-Leninist dogma and revolutionary tactics, so that he could keep the Communist regime going for the next 2 or 3 generations over there, and further. They received over a billion dollars from the Soviet Union in direct military support. They have about 20,000 Soviet bloc troops in their country. The man is a sworn supporter of Karl Marx and Lenin, said he is a lifetime member of the Communist bloc.

□ 1850

Now, in the foreign aid bill this year, the State Department wanted to give economic and military aid to this tyrant at the very time that the freedom fighters over there controlled 80 percent of the country and appeared to be headed for victory, and because this man is on the ropes and the freedom fighters are about to win, he struck his hand out to the West, the United States of America, and has asked for military and economic assistance and has said, "If you help me, folks, I might change my ways."

Now, 3 weeks before he was to meet with our President—and these are facts—he signed another agreement with the Soviet Union, and he made some more derogatory comments about the imperialist Americans.

Last week, our President, at the behest of the State Department, had this man visit the White House, and the flag of his country flew in front of the White House of the United States of America, it had the hammer and sickle up on the corner and an Ak-47 machine gun, and I could not figure out why, because when I talked to this man in the Foreign Affairs meeting later that day when he came, I asked him if he was a Marxist-Leninist, and because of what we had read and heard through top secret documents about his country, why should we be giving him economic and military aid. And he had no answer for us.

We added in the conference committee of the foreign aid bill $12 million in economic aid this year. We were able to stop the military assistance, but the State Department still got $12 million for economic aid for this dictator, this Communist dictator.

And my question to the State Department, to the people of this country and the administration, whom I support—I support President Reagan, I think he is doing a fine job, but I question the judgment of the State Department when a freedom fighting force, Renamo in Mozambique, is about to be victorious, and we are about to see that country go back into a free column, that our Government gives $12 million in economic aid to the other side, and brings this dictator into our White House to meet with our President. And the dictator is asking for military support to defeat the freedom fighters at the very time that they are about to win.

It makes no sense to me, just as it makes no sense to you, to pay for 25 percent of the budget of the United Nations and to continually have those people beat us in the head and support the Soviets. there is an inconsistency that I just do not understand.

Mr. PARRIS. I thank the gentleman for his contribution.

I would simply add to that, on the question of Mozambique, which is modestly off the subject here, but let me share this with you: I have been told, I think from reliable sources, there are, in fact, MIG fighters stationed in a military airfield which is closed to civilian traffic in Mozambique.

Mr. BURTON of Indiana. No question.

Mr. PARRIS. There is, in fact, a Marxist dictator by the name of Michel, with whom I had the opportunity of spending 2 hours talking—there is no question about his political ideological orientation—he, I think, is largely responsible for what has been thousands—and I have been told the number is 36,000—emigrants from Mo-

zambique to come to other nations in the southern African sphere, and they have the classic problem, they are in a small isolated village, and the rebels, if you will, the freedom fighters, whatever you choose to call them, come to their village and say, "Share with us your money, your food, lodging, whatever." If they do that, the next day literally the government forces of Mozambique come to their village, put a gun in their mouth and shoot their heads off. If they do not do that, the freedom fighters, the rebels, the whatever, take their own measure of retaliation for their failure of cooperation. So these persons have no defense by anybody for anything. And they have no alternative but to flee across the borders, where I would remind the gentleman that this is the part of the world that has lions and leopards and whatever crawling all over, and they are getting fatter by the day.

Mr. BURTON of Indiana. That is right.

Mr. PARRIS. I thank the gentleman for his contribution.

Let me, Mr. Speaker, simply remind my colleagues that in his book "1984" George Orwell made the point that totalitarian regimes seek to hide their own despotic practices by accusing others of acts in which they themselves systematically engage.

I think, Mr. Speaker, it is perfectly clear to those of us who review these facts that that is what is going on in New York, in this Nation, at the United Nations. I think it is time that we do something about it.

ORDER OF BUSINESS

Mr. BURTON of Indiana. Mr. Speaker, I ask unanimous consent to be recognized ahead of the gentleman from California [Mr. DORNAN] on my special order.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Indiana?

There was no objection.

SOVIET SPIES IN THE UNITED STATES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Indiana [Mr. BURTON] is recognized for 30 minutes.

Mr. BURTON of Indiana. I thank my colleague, the gentleman from California [Mr. DORNAN], for letting me go ahead of him in this special order tonight.

My special order is going to be very brief. It involves two editorials, one of which I would like to enter into the RECORD, Mr. Speaker, and the other I would like to read into the RECORD.

This editorial I plan to read deals with the subject that my colleague, the gentleman from Virginia [Mr. PARRIS], just talked about, that being the Communist spies that we have here in the United States and how they get here, many of which come through the United Nations and are employees of that body that we support. The title of this editorial, which was in the Indianapolis Star, a newspaper in my district, is "Privileged Spies," and I think everybody in America ought to be aware of this. It reads as follows:

[From the Indianapolis Star, Oct. 1, 1985]

PRIVILEGED SPIES

There are many hundreds of Soviet bloc spies, moles and double agents on our shores—the world's biggest collection of alien snoops—doing their dirty work against the United States. They have a privileged status: Few are caught or expelled. Who is protecting them?

KGB agents keep defecting to the West. They divulge names of Soviet spies in Britain, Italy, France and Greece. But if they expose the identities of spies in this country, that is the end of it. Those spies are allowed to go on spying.

The magnitude of Soviet espionage is outlined by recent events. A high-ranking KGB member Vitaly Dzhurtchenko, who held the rank of first counselor with the Soviet Foreign Ministry, disappeared last month in Rome and defected to the United States.

Intelligence sources said he had detailed knowledge of Soviet intelligence operations in the United States and elsewhere. A New York Times story said he revealed that there were Soviet double agents in the CIA. A CIA official said the story was untrue. Who is right?

The report linked the Rome defection to those of Oleg Gordievski, chief of the KGB in London, and Sergei Bokhan, deputy director of the GRU, Soviet military intelligence, in Athens, Greece.

Gordievski was said to have given British intelligence the names of more than 100 Soviet agents, including British nationals, working for the KGB. Bokhan reportedly disclosed the identities of Soviet agents in Greece, including three officers in the Greek army.

After the London defection, Britain expelled 31 Soviet nationals, including diplomats, "businessmen" and "reporters." The USSR retaliated by expelling 31 British nationals.

Meanwhile, in West Germany, a Bavarian engineer suspected of being a communist spy fled to East Germany, bringing to nine the number of West Germans, including the chief of West German counter-intelligence and a secretary in the office of Chancellor Helmut Kohl, who have defected to the East out of fear they would be exposed as communist agents.

For communist spies in the United States, it was espionage as usual.

Now why should swarms of Soviet spies be allowed to continue to operate with impunity in the United States, eavesdropping electronically on U.S. officials, stealing military and high-tech industrial secrets, planting disinformation in the media and gulling Americans into helping attain crucial Soviet strategic goals?

Who is behind our hands-off-spies policy?

Britain in 1971 expelled 105 Soviets accused of spying. At the time British intelligence reported finding links with Soviet espionage in the United States. Then the matter was dropped.

France in April 1983 expelled 47 Soviet agents, half the Soviet diplomatic staff there, charging them with trying to steal scientific, technological and military information.

Charles Lichenstein, former alternate U.S. representative to the United Nations, estimates 800 to 1,200 communist and client-state nationals are actively engaged in espionage against the United States in the United States.

The usual official U.S. excuse for the handsoff policy is that if we kick out their spies they will kick out ours and it will be much easier for theirs to bore back into our open society than for ours to bore back into their closed society.

That's slippery logic. It overlooks too many risks. It does not justify handing our most powerful and conspiratorial adversaries the keys to our undoing.

Mr. Speaker, this is a very crucial problem facing the United States. We have spies in this country. We know it. We know who they are, and we do not do anything about it. It is time that we expelled them.

Representative COURTER has a bill which he has introduced, which I am supporting, which would limit the number of employees that the Soviet Union has in the United States to the same number we have in the Soviet Union. That is a great first step to eliminating these Soviet spies in the United States. A great deal more needs to be done, but we need to get them out of here.

[From the Indianapolis Star, Oct. 1, 1985]

BETWEEN A TERRORIST AND A FREEDOM FIGHTER

(By Joseph Sobran)

WASHINGTON.—The question is often raised. What is the difference between a terrorist and a freedom fighter? Often the question is rhetorical, a rather cynical flippancy implying that the distinction is a semantic quibble. The people fighting on your side are freedom fighters, and those on the other side are terrorists.

I heard this point made for the umpteenth time the other day, and of course it's the umpteenth time that often sets you thinking. The speaker was implying, I gathered, that the Nicaraguan rebels, the so-called Contras, are no better than the sort of people who try to assassinate popes and things.

Well, we can begin by acknowledging that the terms "terrorist" and "freedom fighter" are not logically exclusive. One term refers to a means, the other to an end. You can use terror tactics on behalf of, say, a war for national independence, as has often been done. We hate to see evil means used for ends we admire, but in this world that sort of thing happens.

I haven't been to Nicaragua, and I don't know to what extent, if any, the anti-communist rebels employ terror against noncombatants to secure their acquiescence, which is what terrorism boils down to. Central American wars generally tend not to adhere too closely to the code of chivalry, but whether the Contras are *egregious* in this respect is not for me to say. Several points have to be considered: the frequency of terror tactics; the nature of the target; whether such tactics are matters of policy by the central command, or whether they

occur because there is in fact no effective central command to speak of.

But none of this affects the question of whether the cause of the rebels is essentially right. We think the cause of American independence from Britain was right, and few of us would change our minds, though we might be chastened, if we learned that George Washington's troops made a practice of massacring civilians as a lesson to Tory diehards.

To put it another way, we must beware of defining terrorism ideologically. Whether one is a terrorist has little to do with what side one is fighting on, only with the methods used. In fact, it's perfectly possible to be a terrorist and a freedom fighter at the same time—for the simple reason that it is possible to use bad methods for good purposes.

Of course, we wish it weren't so. We feel that a good cause is disgraced by evil tactics, and it is unbecoming to a side that is striving for human freedom to be killing and terrifying the innocent. The nature of the cause should both win adherents and deter its votaries from needless inhumanity.

By the same token, we feel no incongruity about a communist terrorist. Communism itself is state terrorism. The Soviet Union not only uses fear to control its own populace, but is conducting a war in Afghanistan that employs such devices as boobytrapped toys that can blow the hands off a curious child.

The strange thing is that we hear so little about communist terrorism, especially from the folks who are eagerly imputing terrorism to anticommunist forces. One suspects that their real target is not terrorism, but anti-communism. It is one thing to point out that freedom fighters sometimes sink to the use of atrocities for the purpose of demoralizing and enemy population; it is another to fail to point out, at the same time, that communism does this habitually.

A brother-in-law of mine came back from Vietnam telling the story of a cleaning woman at his Army base. She went home one day and found her baby in his crib, his head cut off. This was to discourage others from working for the Americans. No doubt it worked. There is nothing in communist ideology to discourage that sort of thing—as long as it works.

We can concede to the left the point that some people on our side may do things that shame us. We not only can—we should. At the same time, we should insist that it is the left that such tactics are most typical of.

True, there are times when we can't be to choosy about our allies. We fought on this side of Stalin to stop Hitler. That should prevent us from being self-righteous. But it should never prevent us from being righteous.

INADEQUACIES OF THE SALT PROCESS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California [Mr. DORNAN] is recognized for 60 minutes.

Mr. DORNAN of California. Mr. Speaker, it is coming up on 7 o'clock here. That means in London it is midnight, Paris it is 1 a.m., so in Moscow it is already 2 o'clock a.m. on October 3. So they are already at the 13th anniversary of the day when they ratified the Anti-Ballistic Missile Treaty. We had ratified it on September 30, 1972. Because we are going to go late tomorrow night, Mr. Speaker, on the farm bill, I decided to take this special order tonight instead of tomorrow night. I believe that it is fitting that we should discuss the inadequacies of the entire SALT process that led to the ABM Treaty that has encouraged Soviet noncompliance and current Soviet strategic defense programs.

I heard the good news today that we will be having an administration briefing on Soviet strategic defense programs, on this Chamber floor, before we go into regular session on October 10.—and I thank you, Mr. Speaker, for allowing this—I hope all 435 Members, everyone who is not in the hospital, and, hopefully, nobody will be, will all be on this floor to get this defense briefing. The specific focus will be strategic defense, or whatever you wish to call it "Soviet SDI," "Soviet star wars," "Soviet star peace." I began using "Star Peace" myself 2½ years ago, and now I see that Soviet Foreign Minister Mr. Shevardnadze is using that term to confuse the issue. Whatever you want to call strategic defense, I do not think one one-hundredth of the American public is aware that the Soviet Union has five branches of military service to our three branches. Most Americans are not aware that our Marine Corps is not a separate branch. It is under the U.S. Department of the Navy. We have the Department of the Air Force and the Department of the Army, and we have a chairman of the Joint Chiefs. The Marine Corps Commandant, as of a few years ago, is a voting member of the five member Joint Chiefs of Staff. These five members include the Chairman, who now is a naval officer. Prior to that, it was an Army officer. But the Soviet Union has five separate branches. In addition to the Navy, the Army, and the Soviet Air Force, the Soviet military has two specific branches that all people of the free world should be aware of. One of them is called the Soviet Strategic Rocket Forces. It is a separate branch of service with a different color uniform, different type insignia for rank and identification for that branch of service. The fifth, and newest branch, although it has been in existence for years, is called the Soviet Strategic Defense Forces. Again, different color uniforms, different insignia, different style for rank. This separate branch of service has under it all the interceptor aircraft of the Soviet Air Force.

The Soviet pilot who appeared on television, only 2 years ago last month, and, in essence, bragged that he had shot down a gigantic 747 jumbo jet and murdered a U.S. Member of Congress of 10 years' service, Larry McDonald of Georgia, that fighter pilot flying that Sukho-15 interceptor aircraft was an officer of the Soviet Strategic Defense Forces. What is left of our active duty interceptors, only five squadrons, is still inside our Air Force. We do not have a separate command for our interceptors. We do not have a single SAM site in this country to protect us against Backfire bombers or the new Blackjack bombers. The Soviet Union has almost 10,000 SAM sites 7,000 radars, as well as the entire effort to implement a newer ballistic missile force, or antiballistic missile force under the Soviet strategic defense force. We do not have any strategic defense of the United States. The Soviet strategic defense currently consists of 64 sites that are being split, and then split again, all around Moscow. The Galosh sites, are product improved, not yearly, but monthly. We do not have any antiballistic missiles sites, although we are allowed one site to protect one of our ICBM fields.

□ 1905

But they have an antiballistic missile system in effect, operational, have had for years, and that is under their Soviet strategic defense forces.

All of the research and development that they are doing is to be used in this command. They want to continue their extensive R&D on strategic defense while Mr. Gorbachev is orchestrating and taking the lead, with his foreign minister, Mr. Shevardnadze, in a massive propaganda effort to make us shut down our SDI research and development. I will explain why that is the most important communist goal in the world over the next few months as we go through this special order tonight.

Mr. Speaker, what I would like to do is briefly go through for my colleagues, and anyone else who is interested, some charts tonight, and I will go through them in more detail next week to alert my colleagues. All of these charts have been shown on the floor of the U.S. Senate, but the U.S. Senate, as we know, is not televised.

I want to go through them again next week in more detail, because when you are seeing them for the first time, it is a little difficult to absorb them; and, some of them are designed only to be shown to an audience at close range.

So let me explain why I am doing this. The ABM Treaty is hailed by liberal arms control people, the arms control establishment, as the jewel of the whole MAD theory, the MAD-capped theory of Mutually Assured Destruction. It is this immoral theory, and I do not use the word "immoral" lightly. I believe that we learned, or should have learned, from World War II and the strategic bombing studies that were done after World War II that we did not need, for example, to bomb Dresden in Europe. We probably could have sat longer after the first atomic bomb on Hiroshima before the

72 or less hour period when we dropped a second nuclear weapon on Nagasaki. To deliberately target innocent population centers, even if that nation is a dictatorial power, Facist or Communist is wrong. We still must consider the population innocent, even more innocent than in a democracy because for decades they have had no privilege to vote as to what leader is going to determine their destiny. To target, as we never did tactically in Vietnam, no matter what Jane Fonda or Tom Hayden said, orphanages, hospitals, schools, old peoples' homes or churches is wrong. Yet, we heard those charges ad nauseam in estremis throughout this country as the debate over our involvement in Vietnam worsened.

But under mutual assured destruction, the MAD cappers would have the Soviet Union, the United States, the Force de Frappe in France, and the British Strategic Forces targeting orphanages and old peoples' homes and schools and hospitals and churches and everything else in between. Because somehow or other in this approach to nuclear weaponry, it is OK for each side to target the innocents of their societies.

When I came to this Congress and began to study this, and had been given the privilege of top secret briefings on our strategic policy which every Member of this and the other body, should receive. We are given that trust. I took advantage of that trust, and had because of a long association with the military in reserve status and peacetime years, flying as a fighter pilot, I was able to absorb and digest the information thoroughly.

The first briefing I received was in this building, in the rotunda area, on the fourth floor, in the old Atomic Energy Committee rooms which are very secure as secure as any briefing room in this city—it is now used by the Select Intelligence Committees of both bodies—I learned in that room, sitting with Larry McDonald, and now Senator STEVE SYMMS of the other body, just how immoral our targeting practices were and those of the Soviet Union. Only four members attend the series of briefings on a regular basis. We learned that we were conned through a process, that started with Robert Strange McNamara under John F. Kennedy, and furthered by Clark Clifford, and most of the defense establishment until the mid 1970's, when we started to move away from this theory, this implemented policy of mutual assured destruction. Ironically the acronym MAD fits it perfectly like a glove. So I do not use the word "immoral" lightly.

I made one of my freshmen speeches, saying that as long as I was in this Chamber I would work to change that policy to something that made more sense than "blowing away" one another's population centers and making our bombing of Hamburg and Dresden pale in comparison. Even if these bombings were brought about by Adolf Hitler's aggression, they were still implemented, as policy by one of my heros, Winston Churchill. Because in the pressure of war, you begin to let things begin to happen. The Germans hit London accidentally, they claimed, and there is some justification they did, so Churchill responded and hit Berlin. Each side upped the ante, and finally we had an 800-degree Centigrade firestorm in the middle of Hamburg in 1943. We proceeded to try and set firestorms for a year and half after that and succeeded again in Dresden in February 1945 and Tokyo in March 1945. These firestorms killed far more people than either of the atomic bombs we dropped over Japan in August 1945.

Yet, when we began our analysis as to what role this played in bringing the war to a close we found out that one series of raids on the ball bearing plants in Schweinfurt had more effect on ending the war, a strategic targeted mission against military-industrial targets, had more effect than the slaughter of the population of Hamburg. Yet, we found ourselves evolving, partly for fiscal reasons, into this immoral policy of mutual assured destruction.

Now, this immoral theory implies that America must hold hostage innocent civilian centers, and that is the best way to defend against aggression. It is this antiquated treaty of a bygone era that is becoming the greatest obstacle to the development of a comprehensive strategic defense plan for the free world, and its leading nation both industrially and with military might, the United States.

The Soviet Union has never abandoned its efforts to defend against ballistic missiles. The Kremlin leaders have used the interregnum period between the signing of the ABM Treaty in May 1972 and the present to continue to research, develop, test, and deploy ABM systems in direct violation of that ratified agreement.

In addition, the Soviet efforts in anti-tactical missile defense, surface-to-air missiles, anti-satellite issues and space-based issues have circumvented the original provisions and intent of the ABM Treaty. The result is that while the United States has scrupulously adhered to its part of the treaty, the Soviet Union has steadfastly moved forward.

Now, let me point out something that is so obvious I am almost ashamed that it almost escaped me. I only learned it recently at a small luncheon of a few Members where I asked someone from the Defense Department, who is quite deeply involved in the course we are going to take at Geneva, to come over and speak to us about Soviet violations. I learned that we have a built-in watchdog system that prevents the United States from violating any agreement we have entered into—even if we wanted to.

□ 1915

As I recall our well-known and loved, if not respected, American personalities like Paul Newman and Charlton Heston got into this argument back in 1982 on different sides. Mr. Newman made a statement to Mr. Charlton Heston in a nationwide debate on ABC that we were as guilty of as many violations as they were. He came up with a figure that had been supplied to him that literally came off the wall. He said that there have been eight violations. I forget whether he broke it down to five being theirs and three being ours, but he gave the impression that we violated all the time. In fact, it was only a handful and we resolved it with the standing consultant committee, both sides were pleased and there were no problems.

Well, at that moment there had been 57 serious violations in the open public discourse available in open debate on the Senate floor, in this Chamber, in Aviation Week and Space Technology magazine, and in all sorts of other defense publications. I had just put this in the RECORD, and I had it cleared by all the intelligence agencies so I had not inadvertently slipped into an area of violating any intelligence sources. So I put in the 57 Soviet violations.

But Paul Newman was telling America in a nationwide discussion show that there were only eight and they were almost evenly divided. Well, it turns out that the United States did not violate these treaties but we have lawyers, counsels at the State Department, and in the Defense Department, so that if we inadvertently started to violate something, they stop us, advise us, and very easily it goes public. All the various groups, from pacifist organizations to antidefense groups of all shapes and descriptions, can easily get leaks from some of these protagonist lawyers for their point of view. They are hidden throughout the bureaucracy of the Defense Department and the State Department. This means, in one sentence, that in this open, free society there is a built-in process by legal counsel that prevents us from violating one of these signed and ratified treaties.

In other words, the Soviets do not have to rely on our good will or the integrity of our President and his Secretary of Defense or Secretary of State. There is a legal system here that prevents us from cheating.

The Soviet Union is in violation of the treaty that some have called the most successful treaty between the United States and the U.S.S.R. ever—

the ABM Treaty. They are in violation of this treaty in three different ways. No. 1, Article 5, No. 1, Common Understanding (C) prohibits the development and deployment of a mobile ABM radar. This provision was inserted to prevent either side from developing a quick ABM breakout capability. When the research and development reaches such a point, one side can break out and the other side is given a fiat accompli. It would be sort of like the Hitler-Stalin pact of 1939, when the world's two greatest tyrannies, communism and nazism, found themselves in bed together, with von Ribbentrop signing this treaty in Hitler's name. Within 2 years Nazi Panzer divisions, implementing Operation Barbarrosa in June of 1941, smashed the Soviet Army right in the face and arbitrarily undoing a treaty that Stalin was relying on. I guess he thought there was some honor among thieves and dictators and this would never happen to him.

At that time the Soviet Union was rolled back with losses of millions of lives. It was only because of the Soviet winter on the eve of Pearl Harbor, December 6, with the advanced German recon units looking at the Kremlin with their binoculars, that the same fate that befell Napoleon, befell the German armies and they were bogged down. Given the winter respite, the incredibly heroic Soviet fighting and resistance and a massive tank buildup behind the Ural Mountains that rolled out the violators of this treaty.

However, the Soviet Union, as our Republican leader, BOB MICHEL, pointed out at this microphone today, remains today with a government in force that is the only government in power on the face of this Earth that signed a treaty of friendship with the Nazi Government, with Adolf Hitler.

Now, in 1975 the Soviets developed and deployed a mobile radar on the Kamchatka Peninsula in clear violation of this section of the treaty. It is because the Boeing 747 Korean Airlines flight 007 was lost and coming near this Kamchatka Peninsula that supposedly they had the right to murder 269 men, women, and children, including over 60 Americans. Hence we know why they are sensitive about this peninsula of Siberia.

The military significance of this type of ABM radar is that it can be moved and set up quickly, providng the Soviets with the capability of rapidly setting up a nationwide ABM radar system.

The second way they violated this treaty: Article 6, section B, limits the location of early-warning radar sites to the periphery of the territory of each nation, the United States and the Soviet Union. Their orientation must also be outward. Their radars have to point outward to prevent them from having the capability for use in an antiballistic missile mode, a war-fighting capability to stave off a missile attack.

Starting in 1981, the Soviets began building a large phased-array radar, state of the art, near the city of Krasnoyarsk. By the way, just a few months ago, as all my colleagues know, this was secret information. It has since been declassified. The site's location is thousands of kilometers from their borders internally, deep into that massive Soviet land mass, clearly not on the periphery of their territory. This radar also is not oriented outward, as required under the treaty.

No. 3, the treaty limits each side, as I said earlier, to one ABM site—not a single site but a series of sites—one ABM system in each country. It also prohibits giving components, other than ABM system components, the capability of knocking out incoming strategic ballistic missiles. This provision in the treaty was geared toward preventing the use of surface-to-air missiles—SAM's, as they are called—in the dual role of both antiaircraft and antiballistic missile. They are only supposed to be antiaircraft under this treaty.

In several instances the Soviets have tested their air-defense radars, along with their SAM's, up through the SAM-5 series and the SAM-10 series, which are hypersonic in speed and have the capability of going way over a hundred thousand feet beyond the altitude of any American aircraft, including our advanced intelligence aircraft like the SR-71.

The Soviets have tested these modern new SAM missiles in an ABM mode. They now have a nationwide SAM air defense system that possesses an ABM capability. According to the President's report—and I am quoting the President's report verbatim—"This and other such Soviet activity suggests that the U.S.S.R. may be preparing an ABM defense of its national territory."

I do not think there is any doubt about it.

"Following an established pattern, the Soviets negotiated and signed the ABM treaty to prevent U.S. development."

The Soviets thought they would just slow U.S. ABM programs or slightly cripple them. They got more than they ever bargained for. We even shut down the research and development part that we were allowed because no U.S. scientist wanted to work on something that had no future and the money just dried up quickly in this Congress, particularly in this House. On the appropriations, in the House, they really took the initial lead against even having an ABM system surrounding Washington, DC.

Many of those who object to the President's strategic defense initiative—which they love pejoratively to sneeringly call star wars—do so on the ground that the United States will be violating the ABM Treaty. They ignore the reality that the Soviets have already riddled the ABM Treaty with violations.

Now, at this point I want my colleagues to understand what we are up against with not only Mr. Gorbachev but the way our free world media is interacting with them. If one of the reporters who covers the White House asks President Reagan a question—let us say we take the dean of the reporters, Helen Thomas or Sam Donaldson or Bill Plante of CBS, or let us say Chris Wallace asks the President a question, and rather than respond to the question, the President says, "Well Chris," or "Helen, I am shocked that someone of your education and your cultural level would ever ask such an offensive question."

Well, this is what happened to a French reporter last night. We got to see it on Ted Koppel's "Nightline" show. He makes an ad hominem attack, that is, Mr Gorbachev, on a French reporter because the reporter asked, "Do you have 4 million people in political prisons?"

Now, do not think ill of my colleagues or of my Speaker if you ask him, "Did you read the September 9, 1985 article in Time magazine, the cover story on Mr. Gorbachev?" And they respond negatively. Because I tell all my constituents and my colleagues' constituents that this position of power and trust you have given us increases in such complexity with each passing year. We have, in all probability wisely frozen the number of Members here at an arbitrary figure. Four hundred thirty-five means nothing. We froze it in 1912 with the admission of Arizona as a State, and we increased it only for 2 years when Alaska became a State. When Hawaii became a State, we took away seats from the rest of the continental 48 and left the number at 435. We have 435 Members representing a country that had barely over 100 million people at the turn of the century. It is now 238 million. With more and more complexity and more issues, from social problems like abortion and controlling the AIDS epidemic through all of the fiscal problems that we do not seem to have the guts to solve around here, and then you come to these defense issues, believe me, it is easy to miss one Time magazine article, even a cover story on the brandnew leader of the Soviet empire.

I asked 30 Members today if they had read this article, and every one told me, "No." And I told every one of them, "I will send you copies of it to your office. Please just read the preface."

Now, here are excerpts from the preface. It is very short. I should

really read the whole thing, but I want to show you some of the charts. Here is the prolog by five important Time magazine people, including their editor-in-chief, Mr. Henry A. Grunwald. And I swear to you, the founder of this magazine, the man who also founded Life, Fortune, and thereby the magazine that brings us People magazine, I swear to you that Mr. Henry Luce is rolling in his grave at this article.

Mr. Henry Grunwald, editor-in-chief of Time; Ray Cave, managing editor of Time; Richard Duncan, chief of all correspondents worldwide; Moscow bureau chief James O. Jackson; and the Moscow bureau's Felix Rosenthal. It says: "Their report:"

Then comes the prolog. I guess one or all contributed to this opening before we get into answers to written questions, and it is just pure Communist propaganda. Gorbachev is allowed to use our oldest and longest established publication—in fact, it was established the year I was born; it is as old as I am, established in the fifties. He uses these pages to answer written questions, and then he gets a few softball questions, no tough questions like the one the French journalist asked yesterday and transmitted over American television within hours. And you can imagine what is coming up in the article. I will submit if for the RECORD at this point, as follows:

AN INTERVIEW WITH GORBACHEV

CANDID VIEWS ABOUT UNITED STATES-SOVIET RELATIONS AND HIS GOALS FOR HIS PEOPLE

(Any leader of the Soviet Union is inevitably and rightfully an object of worldwide curiosity. That interest is only increased by the secrecy and mystery that traditionally shroud the Kremlin. In the case of Mikhail Gorbachev, the world's attention is intensified still further because he represents a new generation of Soviet leadership, a new attitude and a new style. But until last week, the General Secretary of the Communist Party had never met with Western journalists for a face-to-face interview. Now he has granted that first interview, a remarkably detailed, frank and far-ranging one, to a group from Time: Henry A. Grunwald, editor in chief of Time Inc.; Ray Cave, managing editor of Time; Richard Duncan, chief of correspondents; Moscow Bureau Chief James O. Jackson; and the Moscow Bureau's Felix Rosenthal. Their report:)

Newly back from a vacation on the Crimean seashore, Mikhail Gorbachev looks well tanned, just a bit ruddy in the cheek. He conveys an image of robust health and naturally controlled energy. He is solid but not fat. He laughs easily.

He dominates a meeting with three extraordinary tools: eyes, hands and voice. The eyes go into action first. They are an intense dark brown. During conversation they will lock onto a listener and not let go until the listener gives some sign of acknowledgment, agreement—or flinches. The eyes are neither harsh nor kind. They are big and strong and sometimes quick, too.

The hands have a variety of specific functions. The right often holds the steel-rimmed glasses, occasionally manipulating them when Gorbachev pauses to search for a word. The left hand talks. It can lecture, pointing with one finger, or declaim with the palm up, or thump with its edge on the table, karate style, but always quite gently. It is seldom still. Sometimes both hands work together, the fingers clasped, drumming the table for emphasis.

The voice is extraordinary, deep but also quite soft. Sometimes Gorbachev talks for several minutes in a near whisper, low and melodious. Then, without warning, his voice can cut across the room. It is not angry or bullying, just stronger than any other sound in the room. Occasionally the eyes, the hands and the voice reach peak power at the same time, and then it is clear why this man is General Secretary.

Resplendent in a well-tailored blue pinstripe suit, diagonally striped tie and gleaming white shirt, Gorbachev ushered the interviewers into a large, spare third-floor office lined with cream-colored silk wall coverings. On the walls hung portraits of Marx and Lenin. The center of action was a table flanked by 18 chairs, covered with green baize and amply supplied with plates of sweet pirozhki (bite-size pastries), mineral water, lemon soda and cut-glass vases filled with colored pencils. Extensively briefed by his aides, Gorbachev had brought along typewritten notes ruled in red, blue and green. He also brought an expert: seated next to him was Georgi Arbatov, Moscow's best-known Americanologist. Viktor Sukhodrev, who has served as the top-level Kremlin interpreter since the Khrushchev era, again acted in that role.

At the end of the extensive interview, Grunwald lightened the serious tone by inquiring whether Gorbachev's attractive wife Raisa would accompany the General Secretary to the summit talks in Geneva. Gorbachev said she would. "That's good," said Grunwald. "You know, the Western press is in love with her." The jocular answer was vintage Gorbachev: "Well, in that case, maybe I should reconsider."

Time originally submitted six written questions, and Gorbachev then agreed to supplement his written answers with oral ones to other questions. Herewith the slightly condensed transcripts of the written interview, followed by more than two hours of conversation with his American visitors, [whimps].

Sitting at Mr. Gorbachev's side is a gentleman who is on television all the time, Mr. Georgi Arbatov. I have met with him in his office in Moscow. I have been to the Soviet Union five times. I have seen him two of those five times. I have met him at cocktail parties in our Ambassador's house in Moscow. He sits there at the side. He is the head of the institute that studies the United States and Canada. His title is American chronologist by Time magazine. He is their top American chronologist or Americanologist. He sits right at the left of Gorbachev during this small interview that is tacked onto the answers to these written questions.

Here is the prolog. It is only about six paragraphs.

"Newly back from a vacation on the Crimean seashore, Mikhail Gorbachev looks well tanned, just a bit ruddy in the cheek. He conveys an image of robust health and naturally controlled energy. He is solid but not fat. He laughs easily."

□ 1930

Every one of us in this Chamber would love that little description. This is a lovable guy.

"He dominates a meeting with three extraordinary tools: His eyes, his hands, and his voice. The eyes go into action first." It sounds like fiction. Sounds like one of America's great detective writers, Dashiell Hammitt.

"The eyes go into action first. They are an intense dark brown." I guess if he had blue eyes, they would be described as piercing, crystal blue, like Paul Newman. By the way, Paul Newman was on the cover of this magazine a few months back. I do not think he got any better prolog than this.

"The eyes go into action first. They are an intense dark brown. During conversation, they will lock on to a listener and not let go until the listener gives some sign of acknowledgment, agreement—or flinches." Sounds like these five males from Time magazine flinched a lot.

"The eyes are neither harsh nor kind. They are big and strong, and sometimes quick, too." Like Bambi, I guess.

"The hands have a variety of specific functions. The right often holds the steel-rimmed glasses"—no plastic glass for Mikhail—"occasionally manipulating them when Gorbachev pauses to search for a word." No doubt as Georgi Arbatov whispers in his ear.

"The left hand talks. It can lecture, pointing with one finger, or declaim with the palm up, or thump with its edge on the table, karate style, but always quite gently. It is seldom still. Sometimes both hands work together, the fingers clasped, drumming the table for emphasis"—gently again, I am sure.

"The voice is extraordinary, deep but also quite soft." Deep, but soft.

"Sometimes Gorbachev talks for several minutes in a near whisper, low and melodious. Then, without warning, his voice can cut across the room. It is not angry or bullying, just stronger than any other sound in the room"—stronger than Grunwald, Cave, Duncan, Jackson, and Rosenthal, I assume.

"Occasionally the eyes, the hands, and the voice reach peak power at the same time, and then it is clear why this man is General Secretary of the Soviet Union." What a crescendo to see those eyes, hands, and voice all work together. Then comes the sartorial of the article.

"Resplendent in a well-tailored blue pinstripe suit, diagonally stripped tie and gleaming white shirt"—gleaming white shirt. Can you imagine that you would throw aside an article that

started off that President Reagan was resplendent in his brown suit or his pinstriped blue suit and was wearing a gleaming white shirt at a press conference?

It goes on. "Gorbachev ushered the interviewers into a large, spare third-floor office lined with cream-colored silk wall coverings"—they do not need somebody from the accent section or the style section. They do not need any chauvinism here, to hire some woman to analyze the tapestries in the room. These five men covered it well. It is cream-colored silk wall coverings.

"On the walls hung portraits of Marx and Lenin.

"The center of action was a table flanked by 18 chairs, covered with green baize and amply supplied with plates of sweet pirozhki (bite-size pastries)"—it points out in brackets—"mineral water, lemon soda, and cut-glass vases filled with colored pencils. Extensively briefed by his aides, Gorbachev had brought along typewritten notes ruled in red, blue and green." Now, I hope my staff will forgive me for carrying red, blue, and green felt pens to use for separate accent or emphasis.

"He also brought an expert: Seated next to him was Georgi Arbatov, Moscow's best-known Americanologist"—and I might add America's best-known Americanologist, who although he is a Communist and an important member of their Politburo, has been on American television as a regular.

"Victor Sukhodrev, who has served as the top-level Kremlin interpreter since the Khrushchev era, again acted in that role." Do not think that he is not a trusted person. He goes back to John F. Kennedy's days.

"At the end of the extensive interview, Grunwald lightened the serious tone by inquiring whether Gorbachev's attractive wife, Raisa, would accompany the General Secretary to the summit talks in Geneva. Gorbachev said she would. 'That's good,' said Grunwald."

Then he says, Grunwald, "You know, the western press is in love with her.

"The jocular answer was vintage Gorbachev"—remember, he smiles easily.

"Well, in that case," Mr. Gorbachev says, "maybe I should reconsider." Cannot have these press guys in love with his wife.

"Time originally submitted six written questions, and Gorbachev then agreed to supplement his written answers with oral ones to other questions. Here with the slightly condensed transcripts of the written interview, followed by more than 2 hours of conversation with his American visitors." Somebody scratched out "visitors" and wrote "whimps," and they spelled it right. They spelled it with an "H," because "whimp" is only short for "whimpering." It should always be spelled with an "H." You people who use the media coast to coast should know that. Some of you have started to spell it correctly.

I implore my colleagues, anyone who is interested in the Geneva talks coming up in November, to read this Time magazine article. Anyone who wants to write to my office, I will send you as many duplicated copies as we can.

Now let me continue with this first chart. I know it is very difficult to see even for Members on the House floor unless they are in the first few rows—this shows that since 1960 through the SALT I and SALT II exactly what the Soviets have done in building up their armaments, adding planes like the Backfire and the Black Jack, which will go into production soon, what they have done in increasing their submarine fleets, how they have achieved parity and gone way beyond it.

This second chart shows, on a red line at a 45-degree angle of growth, what the Soviets have accomplished under the SALT process just with longer range, what they call INF, for Intermediate Nuclear Forces weapons. These are things like our Pershings and their SS-20's.

They began their SS-20 deployment, in my first year in the Congress back in 1977. It was also Jimmy Carter's first year. Look at the Brezhnev statement in October 1979. "A balance of forces has taken shape in Europe." He claimed parity.

Then later on in October 1980, he said, "A balance now exists."

Then he said, a few months later, in February 1981, "There is approximate equality now." They are claiming it is across the board with all weapons systems.

Then in August 1982, Ustinov their former Minister of Defense, said, "Approximate parity of forces continues to exist today."

Tass quote says that in April 1983, "currently existing parity." By this time, they had gone so far beyond our worst scenario intelligence estimates of what they were doing with these SS-20's that now they have all of Europe under the gun with these missiles, but they proceed to organize one propaganda attempt after another to break up NATO, tear us away from our European allies. All this time, while they deployed hundreds of SS-20's, we deployed absolutely no new nuclear weapons and even retired over 2,000 nuclear warheads.

Gorbachev spoke in his interview with a Frenchman yesterday afternoon on the Ted Koppel Show about the long relationship of the Soviet Union with France. As BOB MICHEL pointed out in this well, remember that when the German Panzer divisions on May 10, 1940, ripped into France, Holland, and Belgium, they were allies of Joseph Stalin. That was after the 1939 Hitler-Stalin pact; so they have a great history with France all right. Ask the historians about Napoleon's fun in Russia.

So here is one chart showing you exactly how they abused the INF negotiations to move way past parity into a superior position.

On October 9, I will start at the beginning of the special order and go into more depth on these charts. Here is the U.S.S.R. and the U.S. ICBM launcher and reentry vehicles. Some of these huge missiles carry up to 10 different warheads; we suspect some Soviet ICBM's carry even more than that. There is no way for our best intelligence satellites to look inside the head of a missile that is already hidden in a silo and take their word or determine whether or not they are lying about how they have MIRV'ed the heads of their missiles.

Again, we cannot cheat because our lawyers in the Defense Department and the State Department go around and check how many warheads we have inside of our Minuteman III's, which have three warheads. Our Titans only have one warhead and it should be noted, they will be gone within a few months. The one we keep fighting about on this House floor, the Peacekeeper, that also has a MIRV'ed warhead; but we will never cheat on the 10 warheads it carries, because we have these lawyers who are going to keep us honest.

Here again you can see that with Soviet reentry vehicles, as opposed to just the lift system, the delivery system of the ICBM's, the RV's break off from the red line and go so far beyond the U.S. reentry vehicles. There is a projected 1988 figure where we are just beyond 3,000 and the Soviets have burst through the top of the chart way beyond 6,000 reentry vehicles.

The next chart could not be more clear. This combines our missiles and bombers. Most of our megatonnage is still on our B-52 bombers. I was there on June 29 for the delivery of our first active duty B-1. They will not be combat ready for another year, and then it will take us another series of years to deliver, not the 244 B-1's that Jimmy Carter killed, but only 100. We still rely on the 1955-G2 vintage B-52's.

So today I introduced a bill not to shut down the B-1 production lines until one of three things happen. The President certifies that the Soviet Union is in total compliance with all strategic arms agreements, the Stealth bomber is in production, or the original, programmed number of 244 aircraft is reached.

In 1962, there was a relative balance in combined systems. The U.S.S.R. is way under 1,000, we are under 2,000.

By 1972, when Nixon signed the ABM Treaty, the Soviet Union had almost caught us. But we allowed the Soviet Union under that treaty and the SALT process to continue their production. We had no new systems, except the B-1, planned for production.

All right, the next one. U.S. nuclear weapons stockpile. My colleagues on the other side of the aisle used to always use this as the determining factor of whether or not we had parity, whether or not they were ahead of us. If you look at these charts, and I know my colleagues, unless they are in the front row, really have difficulty reading this, the U.S. stockpile was one-third higher in 1967 than it is today, the U.S. nuclear weapons.

The total yield in power of all U.S. nuclear weapons has gone down. Look at that chart plummeting. Our high-water mark was in 1960. Current yield total, only one-quarter of our peak when John F. Kennedy discovered that there was no missile gap, the one that he had used so effectively against Richard Nixon in the fall of 1960.

Over 14 cases, look at that second chart, 14 cases of Soviet SALT negotiating deceptions; 120 cases of forgeries, active measures, and propaganda campaigns.

Soviet violations and circumventions, 1972 SALT-I Antiballistic Missile Treaty. I want to go over this again the evening of October 9 to set the scene for the briefing on this House floor of Soviet strategic advances.

The Soviet SAM testing in the ABM mode, the SAM 5, the SAM 10, the SAM 12; deployment of six ABM battle management radars; deployment of one ABM battle management radar in the interior of U.S.S.R., as I said earlier, they are not facing outward, at Abalakovo; that is two names, both of these classified earlier, I said Krasnoyarsh. Abalakovo is the same site.

Potential ICBM defense.

ABM camouflage and concealment. Falsification of ABM deactivation. Use of new test ranges without prior notification. Development of rapidly deployable mobile antiballistic missile No. 3. Testing of rapid refire ABM capability.

Just as with their ICBM, cold fire, which we did not have for years. When a Titan blows out of its hole, the hole is rendered obsolete. They have the cold fire capability where they spring up out of the hole and they have hidden in the woods a refire capability, other missiles to launch—violation of treaties.

□ 1945

Deployment of a nationwide ABM defense. Over 20 large radars, and so on, and so forth.

Presidentially confirmed violations of the SALT-I ABM Treaty. This is what President Reagan is trying to get out to Chris, to Sam, to Helen, and to Bill. This is what he is trying to get out to these fellows and ladies at these Presidential press conferences.

Six points. First, the siting, orientation, and capabilities of the Soviet Krasnoyarsk battle management radar violated the SALT-I Treaty.

Second, the ABM mode test of the Soviet surface, air missiles, and radars are a probable violation of SALT-I ABM Treaty.

Third, the mobility of the ABM-3 system. Potential violation of SALT-I ABM Treaty. Rapid relocation of the flat twin ABM-3 radar in violation of SALT-I ABM Treaty, and that all comes from the President's General Advisory Council on Arms Control [GAC] report.

Fifth, the Soviets may be developing and deploying a territorial ABM defense which would violate the SALT-I ABM Treaty.

Sixth, deliberate concealment activities, the impeding of verification, in violation of SALT-I ABM Treaty, and that is also from the GAC report.

Dr. Bill Graham, who was head of the GAC, is now about to be confirmed this week as the No. 2 man in NASA, a finer Ph.D. I have never seen serving his Government, trying to keep track of all of these violations.

Here are the Soviet violations and the circumventions of the 1970 SALT-I interim agreement on offensive weapons. Deployment of heavy SS-19 ICBM's as a replacement for the light 11's. That is when Henry Kissinger said, "I have been lied to for the last time by the Soviets." He felt personally betrayed on this violation.

Failure to deactivate old ICBM's on time, continuous falsification of those deactivation reports.

By the way, during the B-1 test program under President Carter, all four B-1's that were flying in the test program were counted against us, and not one of them had the capability of delivering bombs. We would have to cut up our B-52's down at Davis-Monthan Air Force Base out in the desert and spread the wings apart, cut the tail off, move it away, so that Soviet satellites could see our deactivated B-52's. They can read about it in Aviation Week. They can even call the legal offices of these counsels that I have told you about at the State Department and Defense Department and find out everything is going on with us. But meanwhile, they continuously falsify what they are doing in their deactivation reports.

Returning ICBM equipment to deactivated ICBM complexes. They return the equipment that is something they have already told us is deactivated.

Keeping 18 SS-9 ICBM's illegally operational at a ICBM test range. Let me explain that. They tell us, "Oh, this is only a test." We have Vandenberg Air Force Base where we test our ICBM crews in SAC, our Strategic Air Command, but we have never left silos in the ground at Vandenberg where we put an operational team on that ICBM and take it out of the test process and make it an operational missile capable of delivering an ICBM against the Soviet Union.

But they have these sites that are supposed to be test sites, and they are sitting there with active duty crews, ready to launch against the United States.

Deployment of III-X silos with a configuration similar to a missile launch silo.

Deliberate camouflage of ICBM testing, production, and deployment. They have reached a state of the art in camouflage unknown in any country in all history. The camouflage that I saw as a young boy arriving in California from New York over Douglas Aircraft in Santa Monica, huge fishnets that went for a mile, with all sorts of trees and designs painted on them, the way the Germans would hide their battleships in the fjords of Norway, nothing that we have ever seen in the history of the world reaches the level of sophistication of Soviet concealment at this point. Contrary to what several younger Members say on this side of the aisle in this House, or what Senator KENNEDY says in the other Chamber, our big bird KH-11 does not have the capability of the world's finest intelligence gathering satellite to work effectively through weather at night or through the sophisticated forms of camouflage the Soviets use.

Deliberate encryption of all missile telemetry. We have agreement to open up to one another's listening devices what is being said about these tests. They deliberately foul up or encrypt codes so cleverly that we half the time cannot find out what they are doing. We have to use our intelligence skills to the state of the art level to attempt to break this encryption.

Concealment of submarine-launched ballistic missiles, sub construction, the berthing, the berthing tunnels, dummy subs. This was classified only a few years ago. Literally blowing up big rubber submarines. The way that we found this out once is that one of them lost some air and the wind bent it in two, so here is a sub broken in two, and then we knew it was a big, yellow, rubber duckie that they are trying to confuse us with to give us a false count. All of this is supposed to be open because we have treaties on this.

Constructing over 68 strategic submarines, when only 62 were allowed, for a total of 981 submarine-launched

ballistic missiles capable on those 68 subs.

Violation of Brezhnev's pledge not to build mobile intercontinental ballistic missiles, another promise given to Henry Kissinger.

Deploying SS-11 ICBM's at SS-11 medium-range ballistic missile sites.

Keeping 1,300 to several thousand old ICBM's stockpiled for both covert, soft launch and rapid silo reload for refire. I guess when your country is as economically strapped as the Soviet Union, you throw absolutely nothing away.

The final chart, at least tonight: Presidentially confirmed—confirmed—Soviet violations by the SALT-I interim agreement, three of them.

Deployment of heavy SS-19 and medium SS-17's to replace the light SS-11's. That was a circumvention defeating the object and purpose of SALT-I.

Second, deployment of modern submarines exceeding the limit of 740 ballistic missile submarine launchers, without dismantling other ICBM or other submarine-launched ballistic launchers. That violated also the SALT-I interim agreement.

And third, deliberate concealment activities that hurt the verification, and this was in violation of the SALT-I interim agreement also.

So I would like to conclude now by submitting for the RECORD some further reports at this point that will help my colleagues and others who are interested to try to get a handle on these issues as we move forward to November 19, when the President for the first time, because he accurately said the Soviet leaders kept dying on him, it is not President Reagan's fault that it has taken 5 years to get a Soviet leader healthy enough for him to meet. When the President meets with Gorbachev on November 19, in a media phantasmagoria we may never see again in all of reported history. More sight, sound, and motion from this November event in that famous city of Geneva, Switzerland, will be pumped around the world to every corner of Asia, Africa, down to the small, little country of Belize, which now has satellite capability from the United States. More people will be watching this event than any Super Bowl, than any signing of any armistice treaty. No event in history will have ever been covered like this, and it behooves every free-voting American who has a capability to make judgments on these issues that no poor Soviet citizen has, that not any one of the Russians or other 130-some ethnic groups throughout their 15 so-called republics have this right, nor do any of the 1 billion 200 million people in China. Those Americans who have the right to vote should exercise that treasured right, and they should also vote with some sort of knowledge about these issues of war and peace and the verification problems and the cheating that goes on, and they should also please, I say in closing, read this puff-piece of Mikhail Gorbachev in the September 9 issue of Time magazine.

I look forward to coming back with another special order on the night of October 9 at the close of business.

The report follows:

SOVIET STRATEGIC FORCE DEVELOPMENTS

(Testimony Before a Joint Session of the Subcommittee on Strategic and Theater Nuclear Forces of the Senate Armed Services Committee and the Defense Subcommittee of the Senate Committee on Appropriations, June 26, 1985, by Robert M. Gates, Chairman, National Intelligence Council, and Deputy Director for Intelligence Central Intelligence Agency; Lawrence K. Gershwin, National Intelligence Officer for Strategic Programs, National Intelligence Council)

I. INTRODUCTION

By the mid-1990s, nearly all of the Soviets' currently deployed intercontinental nuclear attack forces—land, and sea-based ballistic missiles and heavy bombers—will be replaced by new and improved systems. New mobile intercontinental ballistic missiles (ICBMs) and a variety of cruise missiles are about to enter the force. The number of deployed strategic force warheads will increase by a few thousand over the next five years, with the potential for greater expansion in the 1990s. We are concerned about the Soviets' longstanding commitment to strategic defense, including an extensive program to protect their leadership, their potential to deploy widespread defenses against ballistic missiles, and their extensive efforts in directed-energy weapons technologies, particularly high-energy lasers. Their vigorous effort in stategic force research, development, and deployment is not new, but is the result of an unswerving commitment for the past two decades to build up and improve their strategic force capabilities.

Soviet leaders are attempting to prepare their military forces for the possibility that they will actually have to fight a nuclear war. They have seriously addressed many of the problems of conducting military operations in a nuclear war, thereby improving their ability to deal with the many contingencies of such a conflict.

We judge that the Soviets would plan to conduct a military campaign that would seek to end a nuclear war on their terms—by neutralizing the ability of U.S. intercontinental and theater nuclear forces to intefere with Soviet capabilities to prevail in a conflict in Eurasia.

II. STRATEGIC OFFENSIVE FORCES

The most notable recent trend in offensive forces is the construction of bases for mobile strategic missiles—SS-20 intermediate-range ballistic missiles (IRBMs) and new ICBMs:

During 1984, the Soviets embarked on an unprecedented program for constructing new SS-20 bases, starting more new bases than in any previous year.

The Soviets have made major strides in preparing for the deployment of their two new mobile ICBMs—the road-mobile SS-X-25 and the rail-mobile SS-X-24. The Soviets' commitment to deploy mobile ICBMs represents a major resource decision; such systems require substantially more support infrastructure than do silo-based systems, and thus are much more costly to operate and maintain.

All elements of Soviet strategic offensive forces will be extensively modernized by the mid-1990s, as the result of programs that have been in train for many years. While the Soviets will continue to rely on fixed, silo-based ICBMs, mobile ICBMs will be deployed in large numbers (see figure 1), and major improvements will be made to the sea-based and bomber forces. The major changes in the force will include:

An improved capability against hardened targets. The Soviets already have enough hard-target-capable ICBM reentry vehicles today to attack all US ICBM silos and launch control centers and will have larger numbers of hard-target-capable RVs in the future. In such an attack today, they would stand a good chance of destroying minuteman silos. The projected accuracy improvements for the new heavy ICBM we expect the Soviets to deploy in the late 1980s would result in a substantial increase in this damage capability.

Significantly better survivability from improvements in the submarine-launched ballistic missile (SLBM) force—through quieter submarines and longer range missiles—and deployment of mobile ICBMs. Today, a large part of the Soviet silo-based ICBM force would survive an attack by US forces. However, with the increasing vulnerability of Soviet ICBM silos in the next ten years if more accurate US missiles are deployed, the Soviets will increasingly depend on the survivability of their mobile ICBM and SLBM forces.

A substantial increase in the number of deliverable warheads for the bomber force as a result of the deployment of new bombers with long-range, land-attack cruise missiles.

ICBMS

Chart 1 shows new Soviet strategic ballistic missiles, land- and sea-based, and submarines—those recently deployed or now in testing and those we expect to see tested over the next five years.

The ICBM force, as shown in figure 2, will have been almost entirely replaced with new systems by the mid-1990s:

The Soviets are preparing to deploy the SS-X-24 ICBM in silos in 1986 and on rail-mobile launchers in 1987. We expect SS-X-24-class ICMBs equipped with 10 multiple independently targetable reentry vehicles (MIRVs) to replace the MIRVed SS-17 and SS-19 silo-based ICBMs, which carry fewer warheads.

The Soviets have started to retire older silo-based single-RV SS-11s as they prepare to deploy the single-RV road-mobile SS-X-25. We expect the SS-X-25 to be operational by late 1985.

We expect at least three new ICBMs will be flight-tested in the 1986-90 time period:

A new silo-based heavy ICBM, to replace the SS-18.

A new version of the SS-X-24.

A new version of the mobile SS-X-25, which could have a MIRVed payload option.

SS-20'S

The SS-20 force of intermediate-range ballistic missiles is expected to expand to over 450 deployed launchers by 1987, as a result of an extensive program of constructing new bases. More new bases were started in 1984 than in any previous year. The total would have been considerably higher if the Soviets had not deactivated SS-20 bases in the central USSR to convert to SS-X-25

ICBM bases. A follow-on to the SS-20, which also carries three warheads and is probably designed to improve lethality, began flight-testing in 1984.

SLBM'S

An extensive modernization program will result in replacement of the entire MIRVed Soviet SLBM force and deployment of much better nuclear-powered ballistic missile submarines (SSBNs). The major changes, as shown in figure 3, will include:

Deployment of Delta-IV and additional Typhoon SSBNs. These boats have improvements that will contribute to their survivability. In addition, a new class of submarines is likely to enter the force in the early 1990s.

Deployment of the new SS-NX-23 SLBM beginning in late 1985 or early 1986 on Delta-IVs and on Delta-IIIs. The increased range of the SS-NX-23, relative to that of the SS-N-18 missile currently on Delta-IIIs, will make SS-NX-23-equipped SSBNs more survivable because they will be able to operate closer to Soviet shores, where the Soviet Navy can better protect them.

A replacement for the SS-N-20 on Typhoon SSBNs will probably be flight-tested in late 1985 or 1986, and a missile in the SS-NX-23 class will probably be tested later in the 1980s.

HEAVY BOMBERS

Chart 2 shows new Soviet strategic bombers and a variety of new long-range, land-attack cruise missiles.

The Soviet heavy bomber force is undergoing its first major modernization since the 1960s; by the mid-1990s, as shown in figure 4, most of the older bombers will have been replaced. The heavy bomber force will have a greater role in intercontinental attack:

The AS-15 air-launched cruise missile (ALCM) became operational on newly produced Bear H aircraft in 1984. By using newly produced aircraft of an old design, the Soviets were able to deploy ALCMs at least four years earlier than if they had waited for the new Blackjack bomber.

We project Blackjack will be operational in 1988 or 1989, carrying both ALCMs and bombs.

CRUISE MISSILES

The ALCM is the first in a series of deployments of long-range, land-attack cruise missiles. Over the next 10 years, we expect them to deploy 2,000 to 3,000 nuclear-armed ALCMs, sea-launched cruise missiles (SLCMs), and ground-launched cruise missiles (GLCMs). The deployment of cruise missiles provides the Soviets with new multidirectional capabilities against US targets.

GROWTH OF INTERCONTINENTAL ATTACK FORCES

The projected growth in the number of deployed warheads on Soviet intercontinental attack forces, under various assumptions, is shown in figure 5:

The force currently consists of over 9,000 deployed warheads on some 2,500 deployed ballistic missile launchers and heavy bombers. Most warheads are in the ICBM force.

Warheads are increasing: new Soviet Typhoon and Delta-IV submarines, Bear H bombers, and SS-X-24 ICBMs will carry many more warheads than the systems they are replacing.

By 1990, if the Soviets continue to have about 2,500 missile launchers and heavy bombers and if they are within the quantitative sublimits of SALT II, the deployed warheads will grow to over 12,000.

The 1983 Soviet proposal at the strategic arms reduction talks (START) would also result in an expansion in the number of warheads, although under its limits the Soviets would have about 1,000 fewer by 1990 than under SALT II limits.

The effect of the 1983 US START proposal would be to reverse this trend and, by the 1990s, lead to substantial reductions.

While the Soviets would not necessarily expand their intercontinental attack forces beyond some 12,000 to 13,000 warheads in the absence of arms control constraints, they clearly have the capability for significant further expansion, to between 16,000 and 21,000 deployed warheads by the mid-1990s. The lower figure represents a continuation of recent trends in deployment rates; the upper figure is not a maximum effort but would require a substantially greater commitment of resources.

The Soviets will face important decisions in the next few years, as they proceed with flight-testing the ballistic missiles which are scheduled to begin deployment in the late 1980s and early 1990s. (See Chart 1) Specifically, they have technical options to test new ICBMs in such a way as to conform with, or exceed, the limitations on characteristics and improvements in the unratified SALT II Treaty.

III. STRATEGIC DEFENSE

Soviet active and passive strategic defenses, while unable to prevent large-scale damage from a major attack, are intended to provide a degree of protection for the leadership, military, and military-related facilities necessary for wartime operations. The Soviets will significantly improve the capabilities of their strategic defenses over the next 10 years, as a number of new types of weapons are introduced and many of the older systems retired. Significant developments include the following:

BALLISTIC MISSILE DEFENSE

The Soviets have actively engaged in antiballistic missile (ABM) research, development, and deployment programs for many years.

When completed by about 1987, the improved Moscow ABM system will consist of 100 silo-based high acceleration missiles and modified Galosh interceptors, providing an improved intercept capability against small-scale attacks on key targets around Moscow.

By the end of the decade, when a new network of large phased-array radars (including the Krasnoyarsk radar) is expected to be fully operational, the Soviets will have a much improved capability for ballistic missile early warning, attack assessment, and accurate target tracking. These radars will be technically capable of providing battle management support to a widespread ABM system, but there are uncertainties about whether the Soviets would rely on these radars to support a widespread ABM deployment.

The SA-X-12 system, to be deployed in the Soviet ground forces in 1985-86, can engage conventional aircraft, cruise missiles, and tactical ballistic missiles. It could have capabilities to intercept some types of US strategic ballistic missile RVs. Its technical capabilities bring to the forefront the problem that improving technology is blurring the distinction between air defense and ABM systems. This problem will be further complicated as newer, more complex air defense missile systems are developed.

We are particularly concerned that the Soviets' continuing development efforts give them the potential for widespread ABM deployments. The Soviets have the major components for an ABM system that could be used for widespread ABM deployments well in excess of ABM Treaty limits. The components include radars, an above ground launcher, and the high acceleration missile that will be deployed around Moscow. The potential exists for the production lines associated with the upgrade of the Moscow ABM system to be used to support a widespread deployment. We judge they could undertake rapidly paced ABM deployments to strengthen the defenses at Moscow and cover key targets in the western USSR, and to extend protection to key targets east of the Urals, by the early 1990s. In contemplating such a deployment, however, the Soviets will have to weigh the military advantages they would see in such defenses, against the disadvantages of such a move, particularly the responses by the United States and its Allies.

AIR DEFENSE

Deployment of new low-altitude-capable strategic air defense systems will increase. (See figure 6.) The Soviets are continuing to deploy the new SA-10 all-altitude surface-to-air missile (SAM), are deploying new aircraft with much better capabilities against low-flying targets, and will deploy the Mainstay airborne warning and control system (AWACS) aircraft in 1985. Penetration of Soviet air defenses by currently deployed bombers would be more difficult as improved systems are deployed. These defenses, however, would be considerably less effective against US cruise missiles. Against a combined attack of penetrating bombers and cruise missiles, Soviet air defenses during the next 10 years probably would not be capable of inflicting sufficient losses to prevent large-scale damage to the USSR. We judge, however, that the Soviets will be able to provide an increasingly capable air defense for many key leadership, control, and military and industrial installations essential to wartime operations.

ANTISUBMARINE WARFARE

The Soviets still lack effective means to locate US ballistic missile submarines at sea. We expect them to continue to pursue vigorously all antisubmarine warfare (ASW) technologies as potential solutions to the problems of countering US SSBNs and defending their own SSBNs against US attack submarines. We are concerned about the energetic Soviet ASW research and technology efforts. However, we do not believe there is a realistic possibility that the Soviets will be able to deploy in the 1990s a system that could pose any significant threat to US SSBNs on patrol.

LEADERSHIP PROTECTION

The Soviets have a large program to provide protection for their leadership. We judge that, with as little as a few hours' warning, a large percentage of the wartime management structure would survive the initial effects of a large-scale US nuclear attack. We estimate there are at least 800, perhaps as many as 1,500, relocation facilities for leaders at the national and regional levels. Deep underground facilities for the top national leadership might enable the top leadership to survive—a key objective of their wartime management plans.

IV. COMMAND AND CONTROL CONSIDERATIONS

While significant improvements in the capabilities of both Soviet and US strategic offensive forces will occur throughout the next 10 years, sizable forces on both sides would survive large-scale nuclear strikes. The Soviets' confidence in their capabilities for global conflict and in their ability to

limit damage to the Soviet Union would be affected to a large extent by command and control considerations—the need for continuity in their own command and control capabilities, and their prospects for disrupting and destroying the ability of the United States and its Allies to command and to operate their forces.

Although US attacks could destroy many known fixed command, control, and communications facilities, the Soviets' emphasis in this area has resulted in their having many key hardened facilities and redundant means of communications; thus, it seems highly likely that the Soviets could maintain overall continuity of command and control, although it would probably be degraded and they could experience difficulty in maintaining endurance.

We believe the Soviets would launch continuing attacks on US and Allied Strategic command, control, and communications to try to prevent or impair the coordination of retailatory strikes, thereby easing the burden on Soviet strategic defenses, and impairing US and Allied abilities to marshal military and civilian resources to reconstitute forces. While the Soviets would devote substantial efforts to this mission, they probably are not confident that they could accomplish these objectives.

V. SPACE PROGRAM

The vigorous Soviet space program is predominantly military in nature. More than 70 percent of Soviet space missions are for military purposes only, with much of the rest serving a dual military-civil function. The Soviets view space as an integral part of their overall offensive and defensive force structure, not as a separate arena or as a sanctuary. While the Soviets seek to be able to deny enemy use of space in wartime, current Soviet antisatellite capabilities are limited and fall short of meeting this apparent requirement. Today, in addition to the dedicated nonnuclear orbital interceptor, other systems—the nuclear Galosh ABM interceptor and two ground-based high-energy lasers—have the potential to destroy or interfere with some satellites in near-Earth orbit, but the potential threat to satellites in higher orbit is limited. It is likely that the Soviets would attempt to destroy or interfere with US satellites during an intense conventional conflict, and in the initial stages of a nuclear war. These capabilities, however, would not survive a nuclear attack. Some improvements in Soviet antisatellite capabilities are expected.

VI. DIRECTED-ENERGY AND HYPERVELOCITY KINETIC-ENERGY WEAPONS

Directed-energy and kinetic-energy weapons potentially could be developed for several strategic weapons applications—antisatellite (ASAT), air defense, battlefield use, and, in the longer term, ballistic missile defense (BMD).

There is strong evidence of Soviet efforts to develop high-energy laser weapons, and these efforts have been taking place, in some cases, since the 1960s:

We estimate a laser weapon program of the magnitude of the Soviet effort would cost roughly $1 billion per year if carried out in the United States.

Two facilities at the Saryshagan test range are assessed to have high-energy lasers with the potential to function as ASAT weapons.

We are concerned about a large Soviet program to develop ground-based laser weapons for terminal defense against reentry vehicles. There are major uncertainties, however, concerning the feasibility and practicality of using ground-based lasers for BMD. We expect the Soviets to test the feasibility of such a system during the 1980s, probably using one of the high-energy laser facilities at Saryshagan. An operational system could not be deployed until many years later, probably not until after the year 2000.

The Soviets appear to be developing two high-energy laser weapons with potential strategic air defense applications—ground-based and naval point defense.

The Soviets are continuing to develop an airborne laser.

Soviet research includes a project to develop high-energy laser weapons for use in space. A prototype high-energy, space-based laser ASAT weapon could be tested in low orbit in the early 1990s. Even if testing were successful, such a system probably could not be operational before the mid-1990s.

The Soviets are also conducting research under military sponsorship for the purpose of acquiring the ability to develop particle beam weapons (PBWs). We believe the Soviets will eventually attempt to build a space-based PBW, but the technical requirements are so severe that we estimate there is a low probability they will test a prototype before the year 2000.

The Soviets are strong in the technologies appropriate for radio frequency (RF) weapons, which could be used to interfere with or destroy components of missiles or satellites, and we judge they are probably capable of developing a prototype RF weapon system.

We are concerned that Soviet directed-energy programs may have proceeded to the point where they could construct operational ground-based ASAT weapons.

The Soviets have expended significant resources since the 1960s in R&D on technoligies with potential applications for hypervelocity kinetic-energy weapons.

VII. RESOURCES FOR PROJECTED DEVELOPMENTS AND ARMS CONTROL CONSIDERATIONS

Strategic offensive and defensive forces account for about one-fifth of total defense spending—about one-tenth each. The Soviets are increasing their resource commitments to their already formidable strategic forces research, development, and deployment programs. We estimate that total investment and operating expenditures for projected Soviet strategic offensive forces (intercontinental attack and intermediate range) and strategic defensive forces (assuming no widespread ABM deployments) will result in a growth in total Soviet strategic force expenditures of between 5 and 7 percent a year over the next five years. (The rate would be 7 to 10 percent if widespread ABM defenses were deployed.)

A growth rate of 5 to 7 percent a year for strategic programs, combined with the projected growth rate for nonstrategic programs of about 3 percent, would lead to a growth in total defense spending of between 3 and 4 percent per year—at the same time that we foresee sluggish growth in the Soviet economy for the rest of the decade. Increasing the share of the GNP devoted to defense will confront the Soviets with the difficult choice of reducing the growth in investment, which is critical to modernizing the industrial base, or curtailing growth in consumption, which is an important factor in the Soviet drive to improve labor productivity.

Despite serious economic problems since the mid-1970s, Soviet military procurement has been at high annual levels; in particular, the Soviets have continued to procure large quantities of new strategic weapons. Since the mid-1970s, for example, the Soviets fielded their MIRVed ICBM force, and then improved it; deployed the MIRVed SLBM force on new SSBNs; and deployed their mobile SS-20 force. In recent years the Soviets have increased their resource commitments to emerging new systems, particularly with respect to the deployment of costly mobile missile systems.

While Soviet economic problems are severe, we see no signs that the Soviets feel compelled to forgo important strategic programs or that they will make substantial concessions in arms control in order to relieve economic pressures. Soviet force decisions and arms control decisions are likely to continue to be driven by calculations of political-strategic benefits and the dynamism of weapons technology. We judge that strategic forces will continue to command the highest resource priorities and therefore would be affected less by economic problems than any other element of the Soviet military. We believe, however, that, as a result of the stark economic realities, decisions involving the rate of strategic force modernization probably will be influenced by economic factors more now than in the past and some deployment programs could be stretched out.

We believe the Soviets are determined to prevent any erosion of the military gains the USSR has made over the past decade. They recognize that new U.S. strategic systems being deployed or under development will increase the threat to the survivability of their silo-based ICBM force, complicate their ASW efforts, and present their air defense forces with increasingly complex problems. By their actions and propaganda, the Soviets have demonstrated they are very concerned about the US Strategic Defense Initiative (SDI) and its focus on advanced technology. In their view, it could force them to redirect their offensive ballistic missile development programs to reduce vulnerabilities or could stimulate a costly, open-ended high-technology competition for which they probably are concerned that the United States can outpace their own ongoing efforts. They are probably also concerned that SDI will lead to a sustained US effort in strategic defenses.

Soviet leaders view arms control policy as an important factor in advancing their strategy of achieving strategic advantage. They have been willing to negotiate restraints on force improvements and deployments when it served their interests. Moscow has long believed that arms control must first and foremost protect the capabilities of Soviet military forces relative to their opponents. The Soviets seek to limit US force modernization through both the arms control process and any resulting agreements. A salient feature of Soviet arms control policy will be its emphasis on trying to limit US ballistic missile defense and space warfare capabilities. The Soviets will try to use arms control discussions as a means of delaying or undercutting the US SDI program.

□ 1955

GATT, TRADE POLICY AND CAMDEN WIRE CO.

(Mr. HORTON asked and was given permission to extend his remarks at

this point in the RECORD and to include extraneous matter.)

Mr. HORTON. Mr. Speaker, we are hearing much today about trade, and about our Nation's ability to compete in the international marketplace. My position is clear and has been for many years; American companies and industries ought to be competing under the same terms as our foreign competitors in the U.S. market and abroad. This is not the situation today.

The General Agreement on Trade and Tariffs [GATT] was negotiated just after World War II—at a time when Europe and Japan were all but devastated by the ravages of war. GATT is the rule book of international trade. The United States conceded much in this rule book so that these nations might rebuild their industrial bases. Their industries have been rebuilt; their economies are strong; their trade surpluses with the United States are enormous. Our trade deficit is outrageous.

There have been two rounds of trade talks since World War II within the limits of GATT—the Kennedy Round in the early 1960's and the Tokyo Round in the late 1970's. GATT itself has never been renegotiated because it requires agreement among all signatory nations before renegotiation can be conducted.

The trade advantage enjoyed by our trading partners is seriously affecting broad sectors of our economy. Americans are losing jobs by the millions. Entire industries have fallen. The erosion continues.

The Northeast-Midwest Congressional Coalition, on which I serve as cochairman, is currently developing a broad trade policy to address a number of issues. I hope to have an omnibus bill to present to my colleagues in the near future.

Mr. Speaker, trade problems are a major and growing concern of all Americans. Trade inequities are threatening jobs, companies and industries everywhere. These must be addressed. Just last week, Mr. Sam Lanzafame, who is the president and chief executive officer of Camden Wire in Camden, NY, flew to Washington for the sole purpose of personally delivering to me a letter from his employees. The letter, which I will insert in the RECORD today, illustrates their concern over unfair trade practices and the threat these pose to this company and this industry.

Camden Wire is an outstanding company; its employees are dedicated, hard working American citizens. I have been through the plant personally and can attest to the company's commitment to continual upgrading of its operations to ensure state-of-the-art manufacturing. Camden Wire enjoys a strong position in the market. Yet this company is starting to see an increase in foreign copper wire sold in this country. These employees have seen too many industries fall as imports have been allowed to increase unchallenged by those responsible for our trade laws and enforcement of these laws. These employees just saw 60 of their friends and fellow workers lose their jobs—permanently.

The employees of Camden Wire aren't pushing a panic button; they aren't seeking advantages over anyone and are willing to, and can, compete on equal terms with any copper wire manufacturer in the world. They want to be sure that the rules are the same; they don't want foreign products in this country that are subsidized. They seek equity. I will be investigating this industry in the weeks and months ahead and will seek and appreciate the support of my colleagues should a time arise where action is needed. At this time, however, I want to share the concerns of these employees—my constituents—with my colleagues in the House. Their concern is indicative of a nationwide problem, and a nationwide concern. I hope we don't lose our focus on trade, and I will do all I can to see that we move forward to enactment of a sweeping and omnibus trade policy.

Following is the letter signed by more than 500 Camden Wire employees:

DEAR CONGRESSMAN HORTON: We the employees of the Camden Wire Company would like to bring to your attention our concern over the amount of foreign made copper wire products that are being imported into the United States.

Our company is a progressive company and we have recognized the need for change. Camden Wire has invested heavily in new equipment and new techniques to improve productivity and make us more competitive. In addition, we have all made sacrifices to strengthen our company. We have been hurt by having to say farewell to fellow workers who have lost their jobs. We feel we have done our part as President Reagan has asked.

However, we do not want the loss of jobs at Camden Wire to be a common occurrence. Please help us in our fight against foreign competition. We ask that you vote no on any legislation that would give a foreign manufacturer an advantage over an American company. We ask that you assist our management in obtaining any available funds to help ease the burden placed upon our fellow workers who have lost their jobs. Finally, we ask that you bring a message to President Reagan on our behalf that foreign made products are hurting the welfare of the Camden Wire Company and are hurting the welfare of the United States of America.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. SLAUGHTER) to revise and extend their remarks and include extraneous materials.)

Mr. PARRIS, for 60 minutes, on October 3.

Mr. BURTON of Indiana, for 30 minutes today.

(The following Members (at the request of Mr. HATCHER) to revise and extend their remarks and include extraneous materials.)

Mr. JONES of Oklahoma, for 5 minutes, today.

Mr. PEPPER, for 5 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. STOKES, for 5 minutes, today.

Mr. BROWN of California, for 5 minutes, today.

(The following Member (at the request of Mr. JONES) to revise and extend his remarks and include extraneous materials.)

Mr. SHELBY, for 5 minutes, today.

(The following Member (at the request of Mr. DORNAN of California) to revise and extend his remarks and include extraneous materials.)

Mr. DORNAN of California, for 60 minutes, on October 9.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. BOULTER, following the vote on rollcall No. 328, in the Committee of the Whole, today.

Mr. STALLINGS, following the vote on rollcall No. 326 in the House, today.

(The following Members (at the request of Mr. SLAUGHTER) and to include extraneous matter.)

Mr. GILMAN in three instances.
Mr. BLAZ.
Mr. KEMP in two instances.
Mr. DENNY SMITH.
Mr. DANNEMEYER in two instances.
Ms. SNOWE.
Mr. GALLO.
Mr. BEREUTER.
Mr. GREEN in two instances.
Mr. GINGRICH.
Mr. MCKERNAN.

(The following Members (at the request of Mr. HATCHER) and to include extraneous matter:)

Mr. TRAFICANT.
Mr. TORRES.
Mr. GEJDENSON.
Mr. FORD of Michigan in two instances.
Mr. MARKEY in three instances.
Mr. BERMAN.
Mr. HAMILTON.
Mr. PEPPER.
Mr. KOLTER in two instances.
Mr. FORD of Tennessee.
Mr. GUARINI.
Mr. DICKS.
Mr. THOMAS of Georgia.
Mr. STOKES.
Mr. FLORIO.
Mr. WIRTH in two instances.
Mr. TORRICELLI.
Mr. FEIGHAN

ADJOURNMENT

Mr. DORNAN of California. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 7 o'clock and 55 minutes p.m.) the House adjourned until tomorrow, Thursday, October 3, 1985, at 10 o'clock a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

2073. A letter from the Director, Defense Security Assistance Agency, transmitting information concerning the Department of the Navy's proposal letter of offer to the United Kingdom for defense articles estimated to cost $50 million or more, pursuant to 10 U.S.C. 133b (96 Stat. 1288); to the Committee on Armed Services.

2074. A letter from the Auditor, District of Columbia, transmitting a report entitled, "Review of Marshall Heights Street Improvement Program," pursuant to Public Law 93-198, section 455(d); to the Committee on the District of Columbia.

2075. A letter from the Assistant Secretary of State for Legislative and Intergovernmental Affairs, transmitting notification of a proposed manufacturing license agreement for the production in Malaysia of .22 caliber firearms (Transmittal No. MC-29-85), pursuant to 22 U.S.C. 2776(4); to the Committee on Foreign Affairs.

2076. A letter from the Director, Defense Security Assistance Agency, transmitting the Department of the Navy's proposed letter of offer to the United Kingdom for defense articles and services estimated to cost $80 million, pursuant to 22 U.S.C. 2776(b); to the Committee on Foreign Affairs.

2077. A letter from the Director, Defense Security Assistance Agency, transmitting the Department of the Army's proposed letter of offer to the Netherlands for defense articles and services estimated to cost $32 million, pursuant to 22 U.S.C. 2776(b); to the Committee on Foreign Affairs.

2078. A letter from the Assistant Secretary of State for Legislative and Intergovernmental Affairs, transmitting a copy of the original report of political contributions for Robert L. Barry, of New Hampshire, a career member of the Senior Foreign Service, Class of Career Minister, for the rank of Ambassador during the tenure of his service as U.S. Representative to the Conference on Confidence and Security Building Measures and Disarmament in Europe, pursuant to 22 U.S.C. 3944(b)(2); to the Committee on Foreign Affairs.

2079. A letter from the Secretary of the Treasury, transmitting a report on Federal-State-local fiscal relations, pursuant to Public Law 98-185, section 10(c); to the Committee on Government Operations.

2080. A letter from the Secretary of Labor, transmitting a draft of proposed legislation to provide for a Deputy Secretary of Labor, an Assistant Secretary of Labor for Administration and Management, three additional Assistant Secretaries of Labor; and for other purposes; jointly, to the Committees on Education and Labor and Post Office and Civil Service.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. HAWKINS: Committee on Education and Labor. H.R. 1523. A bill to amend the Education of the Handicapped Act to authorize the award of reasonable attorneys' fees to certain prevailing parties, to clarify the effect of the Education of the Handicapped Act on rights, procedures, and remedies under other laws relating to the prohibition of discrimination, and for other purposes; with an amendment (Rept. 99-296). Referred to the Committee of the Whole House on the State of the Union.

Mr. UDALL: Committee on Interior and Insular Affairs. H.R. 3443. A bill to designate the Closed Basin Conveyance Channel of the Closed Basin Division, San Luis Valley Project, Colorado as the "Franklin Eddy Canal" (Rept. 99-297). Referred to the House Calendar.

Mr. UDALL: Committee on Interior and Insular Affairs. S. 1349. A bill to provide for the use and distribution of funds awarded in docket 363 to the Mdewakanton and Wahpekute Eastern or Mississippi Sioux before the U.S. Court of Claims and Claims Court. (Rept. 99-298). Referred to the Committee of the Whole House on the State of the Union.

Mr. BROOKS: Committee on Government Operations. Report on aviation security: Are our airports safe? (Rept. 99-299). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BRUCE (for himself, Mr. ATKINS, Mr. BIAGGI, Mr. DYMALLY, Mr. ECKART of Ohio, Mr. HAYES, Mr. OWENS, and Mr. PERKINS):

H.R. 3476. A bill to create a program to encourage the involvement of postsecondary education institutions in activities furthering economic growth and productivity; to the Committee on Education and Labor.

By Mr. BURTON of Indiana (for himself, Mr. SILJANDER, Mr. KEMP, Mr. HYDE, Mr. DORNAN of California, Mr. DELAY, and Mr. DANNEMEYER):

H.R. 3477. A bill to provide for assistance to the noncommunist resistance forces in Mozambique and to prohibit economic and military assistance to the People's Republic of Mozambique; to the Committee on Foreign Affairs.

By Mr. DELLUMS:

H.R. 3478. A bill to provide for improvements in the local planning process in the District of Columbia and for the transfer of certain local planning activities to the government of the District of Columbia, to increase the rate of compensation payable to citizen members of the National Capital Planning Commission, and to establish the responsibilities of such commission relating to demolitions; to the Committee on the District of Columbia.

By Mr. ENGLISH:

H.R. 3479. A bill to amend the Tariff Act of 1980 to increase measures to combat smuggling by vessels, vehicles, and aircraft, and for other purposes; jointly, to the Committees on Ways and Means, and Public Works and Transportation.

By Mr. FUQUA:

H.R. 3480. A bill to amend title 5, United States Code, to authorize alternative personnel management systems for scientific and technical personnel in the Federal Government, and for other purposes; to the Committee on Post Office and Civil Service.

By. Mr. HARTNETT:

H.R. 3481. A bill to prohibit the importation into the customs territory of the United States of high-carbon ferrochromium from South Africa; to the Committee on Ways and Means.

By Mr. MITCHELL:

H.R. 3482. A bill to amend the Small Business Act to clarify and expand the Capitol Ownership Development Program and for other purposes; to the Committee on Small Business.

H.R. 3483. A bill to provide increased opportunities for small business concerns to participate in procurements made by legislative and independent agencies of the United States and for other purposes; to the Committee on Small Business.

By Mr. MITCHELL (for himself, Mr. MCDADE, Mr. ADDABBO, Mr. GONZALEZ, Mr. BEDELL, Mr. NOWAK, Mr. LUKEN, Mr. SKELTON, Mr. STENHOLM, Mr. MAVROULES, Mr. HATCHER, Mr. WYDEN, Mr. ECKART of Ohio, Mr. SAVAGE, Mr. ROEMER, Mr. SISISKY, Mr. TORRES, Mr. COOPER, Mr. OLIN, Mr. RAY, Mr. HAYES, Mrs. LONG, Mr. CHAPMAN, Mr. ROBINSON, Mr. CONTE, Mr. BROOMFIELD, Mr. IRELAND, Mr. HILER, Mr. WEBER, Mr. DREIER of California, Mr. KOLBE, Mr. COBEY, Mr. COBLE, Mr. DIOGUARDI, Mrs. MEYERS of Kansas, Mr. GALLO, and Mr. GROTBERG):

H.R. 3484. A bill to amend the Small Business Investment Act of 1958 to create the Corporation for Small Business Investment and to transfer certain functions of the Small Business Administration to the Corporation; to the Committee on Small Business.

By Mr. PEPPER:

H.R. 3485. A bill to provide for the accreditation of courses of study at foreign medical schools and to prohibit payment under Federal law for physicians' services furnished by physicians who are graduates of unaccredited courses of study; jointly, to the Committees on Ways and Means, and Energy and Commerce.

By Mr. REGULA (for himself, and Mr. TAUKE):

H.R. 3486. A bill to amend title VII of the Public Health Service Act and title IV of the Higher Education Act of 1965 to prohibit the guaranteeing of loans and similar assistance for certain students attending medical school abroad and to amend title XVIII of the Social Security Act to prohibit payments for direct medical education costs to hospitals that have too many foreign medical graduates in their residency training programs; jointly, to the Committees on Ways and Means, Energy and Commerce, and Education and Labor.

By Mr. ROBINSON:

H.R. 3487. A bill to amend the Fair Labor Standards Act of 1938 and the Tariff Act of 1930 to promote fair trade based on a fair wage; jointly, to the Committees on Education and Labor, and Ways and Means.

By Mr. SEIBERLING:

H.R. 3488. A bill to amend the Agricultural Marketing Act of 1946 to require the Secretary of Agriculture to make nutritional content a criterion in the classification of agricultural products; to the Committee on Agriculture.

By Mr. JONES of Oklahoma (for himself, Mr. SYNAR, Mr. WATKINS, Mr. MCCURDY, Mr. EDWARDS of Oklahoma, and Mr. ENGLISH):

H.R. 3489. A bill to amend the Fair Labor Standards Act of 1938 to authorize the provision of compensatory time in lieu of overtime compensation for employees of State, political subdivisions of States, and interstate governmental agencies and for other purposes; to the Committee on Education and Labor.

By Mr. DORNAN of California:

H.R. 3490. A bill to authorize the Secretary of the Air Force, subject to certain conditions, to contract for the purchase of additional B-1B bomber aircraft to complete the B-1B bomber aircraft acquisition program; to the Committee on Armed Services.

By Mr. FORD of Michigan:

H.J. Res. 407. Joint resolution designating the 12-month period ending on October 28, 1986, as the "Centennial Year of Liberty in the United States"; to the Committee on Post Office and Civil Service.

By Mr. GUARINI:

HJ. Res. 408. Joint resolution to require the President to issue a proclamation which designates the week beginning February 2, 1986, as "National Crime Prevention Week"; to the Committee on Post Office and Civil Service.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII,

Mr. BENNETT introduced a bill (H.R. 3491) for the relief of Thomas Wilson; to the Committee on the Judiciary.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 472: Mr. LIGHTFOOT, Mr. FAWELL, Mr. ECKERT of New York, and Mr. CHANDLER.

H.R. 526: Mrs. VUCANOVICH, Mr. BARNES, Mr. CONTE, and Mr. MOAKLEY.

H.R. 585: Mr. WOLF.

H.R. 696: Mr. ZSCHAU and Mr. GLICKMAN.

H.R. 776: Mr. WILLIAMS.

H.R. 780: Mr. DORGAN of North Dakota.

H.R. 947: Mr. MARKEY.

H.R. 1036: Mr. TOWNS, Mr. ORTIZ, Mr. MOODY, Mr. WHEAT, Mr. MRAZEK, Mr. ACKERMAN, Mr. BEDELL, Mr. SUNIA, Mr. ROSE, Mr. MAVROULES, and Mr. SKELTON.

H.R. 1059: Mr. SENSENBRENNER, Mr. DERRICK, Mr. MOORE, and Mr. WIRTH.

H.R. 1069: Mr. DIOGUARDI.

H.R. 1318: Mrs. LLOYD.

H.R. 1769: Mr. CARPER.

H.R. 1918: Mr. BORSKI, Mr. CAMPBELL, Ms. KAPTUR, Mr. PORTER, Mr. TOWNS, Mr. TRAFICANT, Mr. WEISS, and Mr. WIRTH.

H.R. 1926: Mr. GEJDENSON.

H.R. 2164: Mr. LIGHTFOOT, Mr. MCEWEN, and Mr. DIOGUARDI.

H.R. 2443: Mr. MARKEY, Mr. WOLPE, Mr. MACKAY, Mr. MARTINEZ, Mr. SMITH of New Jersey, Mr. LAFALCE, Mr. LEACH of Iowa, Mr. MOODY, Mr. LEATH of Texas, Mr. ACKERMAN, Mr. DANIEL, Mrs. BURTON of California, Mr. JENKINS, Mrs. LLOYD, Mr. STALLINGS, Mr. TRAFICANT, Mr. ROYBAL, Mr. TORRICELLI, Mr. DURBIN, Mr. MORRISON of Connecticut, Mr. KASTENMEIER, Mr. SCHEUER, Mr. MORRISON of Washington, Mr. HAWKINS, Mr. HUCKABY, Mr. JONES of North Carolina, Mr. FUQUA, Mr. OBERSTAR, Mr. NOWAK, Mr. COLEMAN of Texas, Mr. ROE, and Mr. SENSENBRENNER.

H.R. 2539: Mr. HAMILTON and Mr. SMITH of Florida.

H.R. 2591: Mr. DENNY SMITH, Mr. BLAZ, Mr. PANETTA, Mr. PASHAYAN, and Mr. GROTBERG.

H.R. 2661: Mr. MATSUI.

H.R. 2700: Mr. LELAND, Mr. MCKINNEY, Mr. HOWARD, Mr. WHEAT, Mr. WEISS, Mr. SOLOMON, Mr. DELLUMS, and Mr. ROE.

H.R. 2833: Mr. LEACH of Iowa, Mr. MURTHA, Mr. FRANK, Mr. RANGEL, Mr. LEVINE of California, Mr. BERMAN, Mr. WEISS, and Mr. TRAFICANT.

H.R. 2907: Mr. OWENS, Mr. STOKES, Mr. WISE, Mr. EDWARDS of California, Mr. KILDEE, Mr. FOWLER, Mr. HEFNER, Mr. WIRTH, Mr. DELLUMS, Mr. GRAY of Pennsylvania, Mr. CLAY, Mr. GARCIA, Mr. HEFTEL of Hawaii, Mrs. COLLINS, Mr. ROYBAL, Mr. AKAKA, Mr. ACKERMAN, Mr. VALENTINE, Mr. BUSTAMANTE, Mr. DE LUGO, Mr. FUQUA, Mr. DOWDY of Mississippi, Mr. RICHARDSON, and Mr. BENNETT.

H.R. 2957: Mr. CONTE, Mr. FUSTER, Mr. GINGRICH, Mr. WIRTH, Mr. BERMAN, and Mr. BOSCO.

H.R. 2958: Mr. CONTE, Mr. FUSTER, Mr. GINGRICH, Mr. WIRTH, Mr. BERMAN, and Mr. BOSCO.

H.R. 2983: Mr. DAVIS, Mr. LEVIN of Michigan, and Mr. BROOMFIELD.

H.R. 3099: Mr. BARNES.

H.R. 3132: Mr. ATKINS, Mr. ST GERMAIN, Mrs. SCHNEIDER, Mr. PEPPER, Mr. HEFTEL of Hawaii, Mr. SABO, Mr. SOLARZ, Mrs. MARTIN of Illinois, Mr. JACOBS, and Mr. DE LUGO.

H.R. 3147: Mr. LENT and Mrs. BENTLEY.

H.R. 3202: Mr. ROGERS, Mrs. BYRON, Mr. CHANDLER, Mr. HEFNER, and Mr. GORDON.

H.R. 3263: Mr. HEFTEL of Hawaii, Mr. MARTINEZ, Mr. HAYES, Mr. PERKINS, and Mr. ATKINS.

H.R. 3281: Mr. HEFTEL of Hawaii.

H.R. 3292: Mr. DIOGUARDI, Ms. KAPTUR, Mr. SENSENBRENNER, Mr. BADHAM, and Mr. ECKART of Ohio.

H.R. 3438: Mrs. SCHNEIDER, and Mr. LEATH of Texas.

H.J. Res. 126: Mr. PASHAYAN, Mr. NELSON of Florida, Mr. ROWLAND of Georgia, Mr. SHARP, and Mr. LIVINGSTON.

H.J. Res. 151: Mr. MCCLOSKEY and Mr. LOWRY of Washington.

H.J. Res. 172: Mr. MINETA, Mr. DE LA GARZA, Mr. GREGG, Mr. WOLF, Mr. VALENTINE, Mr. FUSTER, Mr. PORTER, Mr. MCEWEN, Mr. BATES, Mr. COYNE, Mr. HAWKINS, Mr. GONZALEZ, Mr. BURTON of Indiana, Mr. KILDEE, Mr. HUTTO. Mr. GINGRICH, Mr. LOWRY of Washington, Mr. ROGERS, Mr. YATRON, Mr. GRAY of Pennsylvania, Mr. STAGGERS, Mr. MORRISON of Connecticut, Mr. LATTA, Mr. CLINGER, Mr. BILIRAKIS, Mr. SOLOMON, Mr. GOODLING, and Mrs. SMITH of Nebraska.

H.J. Res. 244: Mr. AKAKA, Mr. MRAZEK, Mr. FEIGHAN, Mr. RANGEL, Mr. SIKORSKI, Mr. ROE, Mr. SABO, Mr. MARTINEZ, Mr. GUARINI, and Mr. BARNES.

H.J. Res. 288: Mr. MORRISON of Washington, Mr. HATCHER, Mr. HYDE, Mr. MILLER of Ohio, Mr. BEVILL, Mr. TAUKE, and Mr. CRAIG.

H.J. Res. 313: Mr. HEFNER, Mr. MURTHA, Mr. CHAPPELL, Mr. LATTA, Mr. TAUZIN, Mr. MCGRATH, Mr. DYSON, Mr. VALENTINE, Mr. OLIN, Mr. GREEN, Mr. HOWARD, Mrs. ROUKEMA, Mr. REGULA, Mrs. MEYERS of Kansas, and Mr. FLIPPO.

H.J. Res. 322: Mr. BEILENSON, Mr. FUSTER, Mr. HUNTER, Mr. KRAMER, Mr. MADIGAN, and Mr. MCCAIN.

H. Res. 268: Mrs. LONG, Mr. RANGEL, Mr. PEPPER, Mr. COBLE, Mr. BIAGGI, Mrs. BOXER, Mr. LEHMAN of California, Mr. SEIBERLING, Mr. EDWARDS of California, Mr. BROWN of California, Mr. LANTOS, Mr. WHITLEY, Mr. BARNARD, Mr. HUGHES, Mr. KEMP, Mr. DELAY, Mr. PRICE, Mr. JACOBS, Mr. WIRTH, Mr. ATKINS, Mr. WOLF, Mr. ANDERSON, Mr. YOUNG of Alaska, Mr. HATCHER, Mr. REID, Mr. WHITTAKER, Mr. DANNEMEYER, Mr. KINDNESS, and Mr. SCHUMER.

DELETIONS OF SPONSORS FROM PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, sponsors were deleted from public bills and resolutions as follows:

H.R. 1523: Mr. RAHALL.

H.J. Res. 90: Mr. WHITEHURST.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 1409

By Mr. WHITEHURST:

—Page 54, line 13, strike out "Secretary of Defense" and insert in lieu thereof "Secretary of Defense or Secretary of Transportation with respect to the Coast Guard when it is not operating as a service in the Navy".

Page 54, after line 17, insert the following:

(b) AUTHORITY OF SECRETARY OF TRANSPORTATION.—Section 2775 of such title is amended—

(1) in subsections (a) and (b), by inserting after "the Secretary of Defense" the following: "and the Secretary of Transportation when the Coast Guard is not operating as a service in the Navy"; and

(2) in subsection (d), by inserting after "or defense agency concerned" the following: ", or the operating expenses account of the Coast Guard, as appropriate".

Page 55, line 7, insert after "Defense" the following: ", and the Secretary of Transportation when the Coast Guard is not operating as a service in the Navy,".

Page 54, line 18, strike out "(b)" and insert in lieu thereof "(c)".

Page 55, line 21, strike out "(c)" and insert in lieu thereof "(d)".

EXTENSIONS OF REMARKS

FEDERAL PENSIONS

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 2, 1985

Mr. HAMILTON. Mr. Speaker, I would like to insert my Washington Report for Wednesday, October 2, 1985, into the CONGRESSIONAL RECORD:

FEDERAL PENSIONS

Like other employers, the U.S. government has a duty to offer its employees pension programs that provide for security after retirement or disability. Military and civilian pensions have been valuable in attracting and retaining quality personnel in public service. However, their price has grown to over $40 billion, 5% of the federal budget. Pensions have become the feature of federal employment mentioned most often to me by Hoosiers, and an area of federal spending in which they are increasingly interested.

FEDERAL RETIREMENT SYSTEM

The Civil Service Retirement System (CSRS) allows retirement without benefit penalty at age 55 for employees with 30 years of service. CSRS provides automatic annual cost-of-living-adjustments (COLA) equal to changes in the Consumer Price Index (CPI). The system is funded by employees, who pay 7% of their gross annual pay, by matching contributions from employing agencies, by interest from CSRS trust fund assets, and by direct revenues from the U.S. Treasury. Revenues in 1984 totaled $36 billion, including $4.4 billion paid by employees, and about $22 billion was paid in benefits.

Ballooning costs have led to criticism of the CSRS. The main charge is that the system is overly generous. A study commissioned by Congress and conducted by the Hay Group, a respected private consulting firm, recently found that, in the long term, average federal retirement benefits exceed those in the private sector. Also, private sector employees wait until ages 62 or 65 before retiring with full benefits, and receive COLAs averaging only one-third of the CPI. A second criticism is that the system is too costly: CSRS payments are 25% of payroll, but private sector pension plans take only 18%. Critics also predict future insolvency of the system. The pension's unfunded liability—the amount the government is obligated to pay present and eligible retirees—is $528 billion and grows by $1 billion a month.

Supporters of CSRS point out that when total compensation—both pay and benefits—is compared, federal employees trail private sector workers by 7.2%, lower pay and other benefits more than cancelling the advantage in pensions. Further, few federal employees take advantage of early retirement, retiring on average at age 61, just below the private sector average age of 62. Defenders also note that the plan continues to meet its obligations. The funding gap cited by critics is merely an "accounting fiction" that assumes all current workers will draw pensions, when only a third will actually do so.

MILITARY RETIREMENT SYSTEMS

Members of the armed services can retire at any age after 20 years of service and draw half their final salaries. Pension payments begin right after retirement and are adjusted annually for increases in the cost of living. Servicemen do not contribute to their retirement plan, although they do contribute to social security. The projected cost of the system in 1986 is $18.2 billion.

Like the CSRS, the military pension is criticized for its price tag and generosity. Since 1975, cost increases have far outpaced inflation, tripling in just ten years. Pension payments now account for 55% of total military payroll. The automatic COLAs, the absence of any contribution by military personnel to their own retirement, and the availability of early retirement with immediate and full annuity are frequently cited as causing the increase.

Military pensions also seem to cause the military to lose experienced personnel to early retirement. The average age of retirement is 43 for officers and 40 for enlisted personnel. Military retirees can collect half their final salaries in pension benefits and also earn salaries in the private sector. At age 65 they can draw social security with no reduction in military benefits. The Defense Department says it needs big pensions to attract and retain qualified people, and that military personnel deserve extra benefits for undertaking the risk of war. But far from encouraging experienced personnel to remain in the military, current benefits are a strong incentive to leave the service after 20 years.

REFORM EFFORTS

In 1984, Congress set up an interim plan to supplement federal employee participation in social security while it studied ways to replace the current pension system. New government workers make full contributions to social security, and pay 1.3% to CSRS. The interim plan ends on December 31, 1985. Unless a new plan is developed or the temporary system continued, federal employees hired after January 1, 1984, will have to pay 7.05% of their salaries to social security and another 7% to CSRS.

One reform proposal would create a new pension plan built upon social security for workers hired after January 1, 1984. Savings in the plan would come from raising from 55 to 62 the age at which full retirement benefits could be received. Further savings would come from cutting COLAs to 2% below the CPI and basing retirement benefits on an average of the highest five years of salary, rather than on the highest three. The plan includes a capital accumulation plan (CAP), not offered in CSRS, to which employees could contribute up to 10% of pay, matched by a 5% employer contribution. With the CAP, benefits under this proposal would actually exceed those of CSRS for retirees age 62 and older.

Reforms in military pensions have also been undertaken. A bill now being considered would cut from $18.2 billion to $14.2 billion the sum paid into the military retirement trust fund in 1986. The proposal stipulates that savings can be made only by changing the amount of retirement benefits paid to future enlistees, forcing the Defense Department to recommend permanent changes in the military pension system and to report to Congress how it will achieve the $4 billion savings.

Although it is unclear what changes will be made in the pension systems, the issue cannot be avoided for long. Congress must look for reforms that restrian cost increases but retain features that attract skilled people to public service and encourage experienced workers to remain.

HURRICANE DAMAGE IN APALACHICOLA BAY

HON. DON FUQUA

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 2, 1985

Mr. FUQUA. Mr. Speaker, the people of Franklin and Wakulla Counties suffered immense damage as a result of Hurricane Elena. Apalachicola Bay is famous throughout the world for its oysters and it may be 2 years or more before they can be harvested again. This is a most serious economic blow to the thousands of people who depend on the oysters for their livelihood.

I wrote to President Reagan last week to urge that steps be taken to expedite Federal relief efforts to these counties which have already been designated as major disaster areas. I have received far too many complaints of excess bureaucracy and paperwork and these people need the assistance of their Government and they need it now.

Recently, the New York Times ran an article explaining the situation facing the people on Apalachicola Bay and I insert this article into the RECORD at this point and want to call to the attention of my colleagues the situation in Franklin and Wakulla Counties.

FLORIDA OYSTERS AND A HARDY LIVELIHOOD LEFT DEVASTATED AFTER HURRICANE ELENA

(By Jon Nordheimer)

APALACHICOLA, FLA.—For more than a century the oyster was the pride of bountiful Apalachicola Bay and a handy symbol of the hardy men who harvested the mollusks from the 6,000 acres of beds lying in shallow waters protected by offshore barrier islands.

In recent years the oystermen presented a tough, doughty exterior as they went about their bone-weary work out on the bay, hand-tonging oysters from the bottom. They clung tenaciously to old ways in a world that gripped them with viselike pressure to change.

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member of the Senate on the floor.

Boldface type indicates words inserted or appended, rather than spoken, by a Member of the House on the floor.

51-059 O-86-8 (Pt. 19)

They resisted plans to speed up the development of St. George Island, one of the barrier islands, fearing that the construction of resorts would pollute the bay and damage the oyster beds.

When they talked among themselves about the future on the flyblown docks of Eastpoint and Apalachicola, where mounds of sunbleached shells piled high outside the corrugated shucking sheds, they seemed vulnerable but never yielding.

Now the forces of nature have done what the developers could not.

DEVASTATION OF HURRICANE

Hurricane Elena, which brushed Apalachicola, with 95-mile-an-hour winds at the beginning of September, created conditions that killed up to 90 percent of the oysters in the bay. Experts say it will take two years or longer before oysters will again be ready for commercial harvesting.

"Might be eight to 10 years before things get back to the way they was," observed Curtis Gilbert, a third-generation oysterman. Mr. Gilbert, a medium-size man 30 years old with the thick arms of one who has worked since the age of 12 out on the bay hauling oysters from the water with 12-foot-long tongs, was standing in line inside the gymnasium of the Brown Elementary School here, waiting to sign forms for Federal disaster relief.

There are some 1,000 men like Mr. Gilbert who work the oyster beds in Apalachicola Bay, and 3,000 others who depend in one way or another on the oyster for a living. When the hurricane's sustained northeast winds drove a carpet of mud and silt across the beds, suffocating the oysters, the men's livelihoods died with the shellfish.

"I went out a few days after the storm," Mr. Gilbert recalled mournfully. "There was nothing but mounds of sand where there used to be oysters."

Loss of the oysters, the mainstay of the $20 million seafood industry derived from the 200-square-mile system of bays nourished by the Apalachicola River, was the biggest blow the storm delivered to Florida. The state escaped the full force of the hurricane as it stalled in the Gulf of Mexico off the coast before reversing itself and backtracking to a landfill in Louisiana.

Still, storm damage in Florida totaled $75 million, according to Tom Lewis Jr., Secretary of the Florida Department of Community Affairs.

"The damage is worse than I thought it would be, considering Elena only gave us a peck on the cheek," Mr. Lewis said. "I hate to think of the disaster that a good solid kiss would have meant."

Beach erosion and damage to waterfront properties were concentrated farther to the south, north of St. Petersburg, he said. "The beach at Indian Rocks is now a sandbar out in the Gulf," he added.

NEW BUILDING GUIDELINES

Redevelopment of that area is presenting thorny issues to a state that is attempting to slow down or end construction along the coast. The Legislature has created guidelines that beginning next year will prevent owners of storm-damaged homes from rebuilding unless they conform with higher standards of construction, such as elevating the structure and assuring that it can withstand winds of 140 miles an hour.

Franklin County, which embraces Apalachicola Bay, was already one of the poorest in the state before Elena struck. With fewer than 6,000 residents, many of them poorly educated and living on the hard edge of poverty, there are few choices open to workers other than taking up the time-honored but difficult task of harvesting oysters.

In recent years a controversy flared over a move by outside investors to build a 386-room hotel, a tennis complex, a marina and 381 condominium units on the western end of St. George Island. The project was seen as a step to create a resort playground similar to Hilton Head, a successful development on a South Carolina barrier island. Oystermen joined with environmentalists to oppose the application, but major portions of it were approved this year, and the fight continues over whether the developers will be granted the right to dig a marina.

St. George, connected to the mainland by a 4.4-mile bridge and causeway link, already has more than 400 dwellings, mostly vacation homes, and some 300 permanent residents. The hurricane washed out part of the causeway and for two weeks residents and schoolchildren used a ferry to reach the mainland until the damage was repaired.

Backers of the project contended it would help bring economic diversity to the area and that the plans contained enough safeguards to protect the bay from pollutants.

Tens of millions of dollars has been spent by the state and the Federal Government to protect Apalachicola Bay and its estuary, with the result that it is one of the cleanest big-river systems in the United States.

The bay's shallowness (its average depth is less than seven feet), low-salinity levels and other elements combine to make it one of the most productive oyster breeding grounds anywhere, according to Robert J. Livingston, director of the Center for Aquatic Research and Resource Management at Florida State University. Dr. Livingston is considered a leading expert on the bay and its oysters.

IRONY OF NATURAL DISASTER

"A striking irony of this is that a lot of time and money has been spent protecting this resource from man and now a natural disaster has wiped out oyster production," he observed.

The storm also struck at the end of the spawning season, which means that regeneration will not begin on a large scale until the end of next summer, he said.

"In the short term it will be very hard on the people who depend on the bay for their livelihood, but the bay's going to come back," he added. "It's just a matter of time."

Too long a time for oystermen like Curtis Gilbert. "If I get the chance, I'm clearing out," he said. "This is the end as far as I'm concerned," he added in a pause in the processing of his application for unemployment assistance. He held his 2-year-old son, Lee, on a knee as he waited on makeshift bleachers set up in the school gym.

"Maybe it's too late for me to get out, but not for him," he continued, indicating his son with a nod of his head. "It's too hard a life. There has to be something more for him than tonging oysters all his life."

AN OPEN LETTER TO THE CONGRESS OF THE UNITED STATES

HON. ELDON RUDD

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 2, 1985

Mr. RUDD. Mr. Speaker, the budget resolution adopted in August is filled with smoke and mirrors. The House and Senate Budget Committees report its savings at differing levels—$57.5 billion and $55.5 billion respectively—contrasted with the Congressional Budget Office's estimate of only $39 billion in fiscal year 1986.

Regardless of which of these projections you believe, however, it's clear we haven't gone far enough because deficits will still be in the range of $200 billion annually.

Difficult choices are ahead of us. A constituent of mine, John Young, of Phoenix, AZ, recently wrote an open letter to Congress with some thought-provoking remarks about deficit spending and the need for decisive action by Congress. I ask unanimous consent that Mr. Young's letter be printed in the RECORD at this point for my colleague's review.

An Open Letter to the Congress of the United States:

Most of us out here in the real world know what is wrong with the federal budget and how to fix it. We also know how the deficit got so large and we are pretty certain it will continue to grow.

We are also certain those of you in congress know all of these things too, but you probably are not really that serious about putting things in order. You will raise the total debt ceiling to two trillion dollars. You are currently playing political football with a 50 billion dollar deficit reduction bill in the shadow of a 200 billion dollar per year mountain of red ink. This is going to be a real fix of the old system, right? Wrong.

The debt is a direct result of years of promising us something for nothing—free lunches so to speak, and delivering on those promises. You also got us into a couple of wars along the way, wasted huge sums of money, lost the wars and seriously demorlaized us as an added benefit. The end result of this huge debt will be inflation, then depression and economic and social chaos.

"If it ain't broke, don't fix it" does not apply here. It is broke and in desperate need of fixing. We know that the budget can be balanced by a planned and systematic reduction in spending, by insisting on getting fair value for that spending, by letting private enterprise take over all of the things the government does poorly (mail delivery would be a good place to begin), and last of all by collecting taxes on a fair and equal basis through the least complicated flat tax system conceivable.

You have to recognize the difference between a hand and a hand out, between wants and needs. All programs that serve any real purpose should be immediately put on a needs test basis. We believe each person should be given the freedom to work out his own destiny. Freedom is more important than security. We must be allowed to succeed and fail. You've probably forgotten, but the word is "free" enterprise.

The only legitimate purposes of government, as established by the Constitution, are protection against foreign enemies (invasion) maintenance of law and order domestically (putting down insurrection and riots), and ensuring justice (enforcing contracts).

Now here's the hard part! You have to tell us there will be no more free lunches; no subsidies for not working or producing, no cost-plus contracts, no fact-finding junkets (that's a tough one), no more gain with no pain. And, from now on, everyone pays his fair share. The word "rights" should be hy-

phenated to become rights-responsibilities. You must also pledge never to begin the free lunch promises oever again by providing a balanced budget amendment to the Constitution. That's going to be really tough!

"But," you say, "my re-election will be in jeopardy." If re-election is that important to you, then you probably shouldn't be there in the first place. After all, you are our elected representatives, the caretakers of our country, serving in the congress on our behalf.

We really don't think you will do it. You will keep talking, playing politics, pointing fingers, and blaming everyone and everything. You should have mirrors mounted on your desks for the finger pointing exercises. And, if you don't do it, the consequences will be the greatly diminished capacity and eventually the demise of a once proud, strong and respected country.

If there is *any* justice in all of this, it will lie in the fact that your children and their children will have to bear the consequences right along side of our's. The ball is now in your court. Drop it this time and the game is over.

Respectfully,

JOHN YOUNG,
Young Builders, Inc.

AN INTERVIEW WITH MAX KAMPELMAN ON AN INSIDE LOOK AT GENEVA

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 2, 1985

Mr. KEMP. Mr. Speaker, with the resumption of the latest round of arms control negotiations in Geneva, the West has been treated to a barrage of rhetoric from the Soviets about their purported arms control efforts. There is little doubt that the Soviets are intent on raising expectations in anticipation of the November meeting between Gorbachev and President Reagan. They would like that meeting to be dominated by arms control posturing, and thus avoid such hard questions as human rights violations, the continuing Soviet occupation of Afghanistan, Soviet violations of past arms control agreements, and Soviet support of international terrorism and subversion in many parts of the world.

Meanwhile, our dedicated arms control negotiating team, under the outstanding leadership of Ambassador Max Kampelman, is returning to the table, day after day, patiently and diligently working to advance U.S. goals to reduce the levels of destabilizing offensive weapons and to advance prospects for a more stable strategic environment that will protect the peace.

In an exclusive interview with White House correspondent Trude Feldman, Ambassador Kampelman strips aside some of the rhetoric that characterizes Soviet public statements. Arms control negotiations, he says, like other areas of interaction with the Soviet Union, are plodding ordeals. They require patience and a clear grasp of strategy. Fortunately for the United States, Max Kampelman has a generous measure of both.

Mr. Speaker, I insert Trude Feldman's enlightening interview with the President's Ambassador to the arms talks in the RECORD:

[From the Evening Sun, Sept. 18, 1985]

CONFESSIONS OF AN ARMS CONTROL NEGOTIATOR: PATIENCE IS THE KEY

(By Trude B. Feldman)

The third round of formal talks on arms control begins tomorrow in Geneva, and the Soviet and American delegations are braced for difficult and prolonged sessions.

The negotiators are bound by confidentiality from giving interviews on details of their talks. However, Max M. Kampelman, head of the U.S. delegation, did agree to tell what it's like to negotiate with the Soviets on issues of war and peace.

"It is the greatest challenge of my life, albeit the most difficult and grueling," Kampelman said in an exclusive interview. "I am direct and firm about the positions I take and I do not mislead. I need to be tenacious if the Soviets are to take me seriously."

He said the negotiating process is vital to managing relations with the Soviet Union, and that the managing function can be as important as the particular solution to a specific problem. "It isn't simply two people talking to each other," he said. "I'm trying to see what, if anything, can reduce tensions. The Soviets are well-trained people with much experience. I, of course, treat them like human beings. They are."

Last January, President Reagan asked Kampelman to lead the three-track negotiating team, which includes former Senator John Tower of Texas, who handles negotiations on strategic nuclear arms, and Maynard W. Glitman, a career foreign service officer, who is responsible for intermediate range nuclear forces. Kampelman's responsibility is to oversee negotiations on defense and space weapons.

He said despite personal and professional sacrifices he took the assignment because he appreciates the urgency of the mission and the enormity the responsibility. "I am public service-oriented," he said, "and this is a chance to do my best to help avoid war without losing our values."

Prior to this current assignment, Kampelman was appointed by President Carter, and reappointed by President Reagan, as ambassador and head of the U.S. Delegation to the Conference on Security and Cooperation in Europe. The three-year conference in Madrid led to the only significant agreement between Reagan and the Soviet Union. (It strengthened the humanitarian provisions of the Helsinki Final Act of 1975).

Secretary of State George Shultz said Kampelman had "demonstrated anew the value of patience, firmness and the maintenance of Western unity" in East West negotiations.

The Madrid sessions, Kampelman said, taught him an enormous amount of negotiating strategy. In particular he learned that patience is the key factor.

Kampelman said that the Soviets generally do not get involved on making substantial or serious concessions until the end of negotiations, because they hope we'll make concessions without a requirement to match them. He added that they want to test our strength and support before they are prepared to set forth concessions. They know that in the past our allies and our Congress have, on occasion, led us to make unilateral concessions.

A practicing attorney for 30 years, Kampelman noted that negotiating with the Soviets has similarities to practicing law. "One needs extensive preparation and one needs to analyze possible arguments of the other side," he said. We must try to figure out what's in the best interest of the other side, and what are their objectives. Then we must explore whether their interests and objectives overlap with ours. That means we must think through, and be firm about our interests and objectives. To the extent they overlap, that's what we try to emphasize."

He said it is important not to let personalities interfere with issues and interests. "We want to persuade them that we want an agreement—if we really want an agreement. But, if we're over-eager to reach an agreement, we're at a disadvantage because we could lose sight of our interests *just* for the sake of a piece of paper," he said. "And the other side would then see our eagerness and expect us to make concessions. The one fundamental difference between a business negotiation and negotiating with the Soviets is that in dealing with the Soviets the issue is much more complex."

Aside from the fact that there is a question of war and peace involved, the U.S. has fundamental differences with the Soviet Union—different cultures and values. While we believe in freedom and democracy, the Soviets believe in authority, and our individual perceptions are that we have differing national interest, Kampelman explained.

Moreover, there is mistrust one with the other and this realization is so basic that it can't permit the U.S. to think about negotiations as if the U.S. is doing business as usual.

Kampelman was asked if the Russian position is predictable in that there is no difference who is on the Soviet negotiating team. He responded that the individual selected to negotiate for the Soviets is not as important as he might be in private negotiation because the decisions are made in Moscow on the fundamental issues, and the instructions sent are precise and circumscribed. The negotiator is then asked to try to achieve those goals within those circumscribed instructions.

After accepting the job of chief of the U.S. delegation to Geneva, and prior to the opening of the first round of talks last March, Kampelman attended numerous briefings with experts in various fields. He spent 80 percent of his time in preparation.

In Geneva, no two days are alike. Kampelman is on the job 12 hours a day. His schedule includes constant reading and studying, countless briefings and long periods of negotiating with his Soviet counterparts. He sometimes sees them socially and tries to further explore how to expand "substantive understanding."

Kampelman visited the Soviet Union on eight occasions, and as a student and a teacher he studied the Soviets system. He is well acquainted with how it functions. He sees no signs, as yet, of a change in policy, but expects that the November summit with Mikhail Gorbachev and President Reagan will be "mutually beneficial."

Kampelman is in frequent touch with the President, Shultz and National Security Adviser Robert C. McFarlane, and each give him much flexibility. He finds the President to be "well informed and intensely interested" in his progress. And because the administration place a high priority on the negotiations, Kampelman said that priority "further instills in us a strong determination to do all we can" to reach an agreement.

Kampelman, 64, explains that he was raised to believe in the Golden Rule, in the fatherhood of God and in the brotherhood of man. He looks upon these religious principles as the essence of the Judeo-Christian contribution to civilization. "These values do motivate me now in the Geneva negotiations," he told me.

His credo—that democracy is the political expression of the Judaeo-Christian ethic—stands him in good stead during the complex and arduous negotiations. As an educator, he looks upon the political process in which he is now engaged as a unique opportunity to educate the body politic. As a diplomat, he is motivated with a genuine concern to advance human dignity and the integrity of self for all peoples.

"There is much satisfaction in engaging in a process where so much is at stake for all of us," he said. "The dignity of the human being must be paramount."

Anticipating the third round of talks, Kampelman is neither pessimistic nor optimistic. "I try to be realistic," he said. "It takes two to negotiate. I know what the U.S. is prepared to do. But, as yet, I don't know what the Soviets are prepared to do."

Declining to speculate as to the length of the total negotiating period, he said the issues are so pressing, complicated and monumental, that no one is able to predict a time frame.

"We must be prepared to stay at the negotiating table for at least one day longer than the Russians are prepared to stay," he concludes. "Patience is the name of the game."

ARE WEAPONS LABORATORIES TRYING TO TORPEDO A CTB?

HON. EDWARD J. MARKEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 2, 1985

Mr. MARKEY. Mr. Speaker, in a forthcoming issue of the Bulletin of the Atomic Scientists, Hugh DeWitt, a physicist at the Lawrence Livermore National Laboratory, and Gerald Marsh, a physicist at the IIT Research Institute in Chicago, shed some light on the ongoing argument over the necessity of conducting reliability testing of nuclear warheads—an argument that plays a central role in the current CTB debate.

As you know, expert supporters of a comprehensive test ban have long maintained that it is not necessary for the United States to conduct explosive tests in order to assure itself of the reliability of the nuclear stockpile. Expert opponents of a CTB—many of them from the national weapons labs—argue that explosive testing is absolutely essential.

DeWitt and Marsh suggest that claims by the weapons labs that the current nuclear warhead stockpile was designed assuming that testing would always continue can be accurate only if the labs were deliberately designing warheads that required continued reliability testing. They note that pursuit of such a policy would run counter to "the widespread agreement, even among many weapons designers, that weapons can be designed so that they don't need repeated nuclear testing."

According to the article, former Atomic Energy Commission Chairman Glenn Seaborg has indicated that during his tenure in office (1961–71), the nuclear weapons labs had the responsibility of designing weapons which could be remanufactured in the future without future tests. Seaborg has stressed that during these years weapons were designed under the assumption that there would be a CTB. Weapons reliability was assured by a careful program of maintenance and replacement. But last June, Paul Brown, the Assistant Associate Director for arms control at the Lawrence Livermore National Laboratory, delivered a briefing in which he claimed that "The designs we put into stockpile were done on the assumption that nuclear testing would continue."

If Brown's assertion is accurate, DeWitt and Marsh argue, one must ask whether the national labs, the Department of Energy, or the Department of Defense have now reversed the longstanding national policy favoring eventual negotiation of comprehensive test ban, and preparation for such agreement to go into effect. For Brown's statement to be accurate, sometime after 1971, the weapons labs would have had to begun designing nuclear warheads so that testing was necessary and as if it would always be possible.

But if Brown's statement is inaccurate, the Directors of the Livermore and Los Alamos Laboratories may be incorrect in suggesting that "continued nuclear testing is absolutely essential to ensure the reliability of our nuclear weapons." If this is the case, one must ask whether the nuclear weapons bureaucracy has been misleading Congress and the American people.

The authors suggest that this is precisely what is happening, citing physicist Richard Garwin's finding that reliability testing of the existing stockpile is not needed—so long as nonexplosive testing of the stockpile continues, and bombmakers are able to remanufacture weapons components using the original specifications. The authors conclude that "There may be a cost penalty and some inconvenience in maintaining stockpile reliability by means of exact remanufacture of weapons design that were proof-tested many years previously, but this seems a small price to pay for the possibility of obtaining a nuclear test ban agreement."

Mr. Speaker, at this point I would like to insert into the RECORD a copy of the DeWitt-Marsh article.

The article follows:

[From the Bulletin of the Atomic Scientists, November 1965]

WEAPONS DESIGN POLICY IMPEDES TEST BAN

(By Hugh E. DeWitt and Gerald E. Marsh)

The two letters accompanying this article take opposing positions on a central issue in the debate on a comprehensive nuclear test ban agreement: is continued nuclear testing necessary to ensure the reliability of the U.S. nuclear stockpile? Hans Bethe and cosigners say it is not; Roger Batzel and Donald Kerr, speaking for the nuclear weapons design laboratories, claim that continued testing is "absolutely essential."

The debate is a replay of one which occurred seven years ago, with similar positions being argued by some of the same adversaries. What makes this debate difficult to understand—and may account for its recurrence—is that either side's argument can be valid, depending on the underlying assumptions. The generally overlooked fact is that the weapons laboratories are now operating under the deliberate assumption that continued nuclear testing will always be possible and are designing weapons accordingly.

This policy is being pursued by the laboratories despite the widespread agreement, even among many weapons designers, that weapons can be designed so that they do not need repeated nuclear testing. Indeed, it is apparent that the current weapons design approach represents a reversal of the policy in effect at least until 1971.

Glenn Seaborg, who served as chairman of the Atomic Energy Commission from 1961 to 1971, stresses that during that period nuclear weapons were designed with the assumption that there would eventually be a comprehensive test ban.[1] Therefore the laboratories had the responsibility of designing weapons which could be duplicated in coming years without requiring further nuclear tests.

It is clear that at some point after 1971, the weapons design policy was deliberately changed. Last June Paul Brown, the assistant associate director for arms control at the Livermore Laboratory, started the current policy to participants in a classified colloquium: "The designs we put into stockpile were done on the assumption that nuclear testing would continue."[2] Brown's description of the policy has been confirmed by the Department of Energy.[3]

With this policy governing weapons design work, the laboratories have produced very sophisticated and efficient designs that are, according to Batzel and Kerr, so delicate that the reliability of remanufactured copies cannot be guaranteed without nuclear tests—a policy which in their eyes precludes the United States from ever acceding to a nuclear test ban agreement.

It is unlikely that the United States would agree to any form of test ban accord unless the U.S. nuclear stockpile was believed to be reliable for many years to come, since the perceived need for a nuclear deterrent may persist for sometime. With the signing of the Limited Test Ban Treaty in 1963, however, the United States and the Soviet Union assumed the obligation to work toward an agreement to end all nuclear testing, and official U.S. policy apparently directed the laboratories to prepare for such a test ban.

Yet, by the summer of 1978, the policy—or the weapons laboratories' understanding of the policy—had changed. When negotiations toward a comprehensive test ban treaty seemed likely to succeed, three weapons experts—Norris Bradbury, Richard Garwin, and Carson Mark—wrote to President Carter explaining why, in their view, the U.S. nuclear stockpile could be maintained reliably without continued nuclear testing.[4] Their letter provoked a strong re-

[1] Michael Heylin, "Soviet Moratorium Raises Test Ban Issues," Chemical and Engineering News (Aug. 12, 1985), p. 27.

[2] Paul Brown, from a colloquium to the Defense Systems Department of the Livermore Laboratory, June 25, 1985.

[3] Heylin, op. cit.

[4] Letter to President Jimmy Carter from Norris Bradbury, Richard Garwin, and Carson Mark, Aug. 15, 1978 in House Armed Services Committee Report No. 95-89, "Effect of Comprehensive Test Ban Treaty on United States National Security Interests," Aug. 14, 15, 1978. Appendix 3, p. 181.

action from the Livermore and Los Alamos weapons design laboratories, and directors Batzel and Harold Agnew—then head of Los Alamos—met with the president to plead the case against the proposed treaty. Their arguments were evidently persuasive, and no further progress was made toward a treaty during the Carter Administration.[5]

While the weapons design policy obviously changed, it is not clear who was responsible for that decision. The chain of command, however, is somewhat clearer. At the bottom, the nuclear weapons design laboratories enjoy a great deal of autonomy and influence but do not have the authority to establish a policy. Nor does the University of California, which manages both laboratories under contract with the Department of Energy. The Energy Department's office of the assistant secretary for defense programs, to which the laboratories report, bears much responsibility for the present nuclear design policy. In addition, the Defense Department must have the authority to place some requirements on designs. Although the Defense Nuclear Agency maintains custody of the stockpile, policy matters are decided at a higher level in the Defense structure, most likely in the office of the assistant secretary of defense for international security, a position currently held by Richard Perle.

Seaborg, and the signers of the 1985 letter to Congressman Fascell are not the only experts who believe that it is possible to design nuclear weapons that can be reliably remanufactured in the years following a test ban.

In 1983, Ray Kidder, a senior scientist at Lawrence Livermore, stated: " I believe that robust nuclear weapons can be designed without excessive penalty in performance. That is, once designed, built, and proof-tested, their continued operability in stockpile can be assured with appropriate inspection, correction, and remanufacture programs without requiring further nuclear tests." [6] This statement of principle was extended to *current* nuclear weapons designs by Richard Garwin in a prior exchange with Batzel.[7]

The weapons laboratory directors, on the other hand, cite a number of reasons why they think a test ban would eventually result in unreliable weapons:

The inability to modernize and correct minor design errors;

Subtle changes in available materials over a period of many years;

Subtle changes in manufacturing processes;

The loss of experienced personnel to oversee stockpile maintenance; and

The need to proof-test weapons remanufactured from proven designs.

To judge the importance of these arguments, particularly the last one, it must be understood that nuclear weapons in the stockpile have a shelf life of only 10 to 20 years because of chemical corrosion. When the stockpile weapons are no longer deemed reliable, they must be replaced.

In the absence of a comprehensive test ban, U.S. policy has been to replace retired weapons with new designs which require nuclear testing for their development. Since the work of the design laboratories has never been seriously hindered by arms control agreements nuclear weapons technology can advance considerably during a weapon's shelf life. Consequently, the stockpile has been continually modernized.

A nuclear test ban would drastically change this policy. Old weapons would have to be replaced with remanufactured copies of proven designs, and the weapons laboratories would be expected to certify their reliability; hence the concerns about the availability of specified materials, experienced personnel, and so forth.

There may be a cost penalty and some inconvenience in maintaining stockpile reliability by means of exact remanufacture of weapons design that were proof-tested many years previously, but this seems a small price to pay for the possibility of obtaining a nuclear test ban agreement.

A more important point in the Batzel-Kerr letter is the claim that even weapons remanufactured from proven designs cannot be certified as reliable without occasional nuclear testing. This contention is maintained—in a manner that transcends logic—despite their acceptance of the point made by Bethe and others that such limited testing cannot establish a statistically meaningful measure of stockpile reliability.

Batzel and Kerr suggest the possibility of a Soviet advantage developing a few years after a test ban agreement, if the Soviets relied on robust designs that did not require further nuclear testing, while U.S. designs did in fact require periodic testing. If U.S. weapons labs were instructed to develop robust designs, this kind of asymmetry would be avoided.

Another kind of Soviet advantage, they suggest, might develop from cheating by conducting underground explosions in large cavities or by testing in deep space. On the latter point, we would challenge Batzel and Kerr to propose a realistic method of instrumenting and conducting clandestine nuclear tests in deep space.

The possibility of cheating on underground tests depends very much on the state of verification technology—particularly seismic methods. Lynn Sykes, a seismologist at Columbia University, has stated in testimony to the House Foreign Affairs Committee that with proper seismic arrays, even explosions decoupled (muffled) in cavities could be detected down to one kiloton.[8] And as the accompanying figure shows, very few U.S. weapons tests since 1980 have been below two kilotons; the large peak is between 10 and 15 kilotons. Seismic data from Soviet tests show a similar pattern.[9] Thus a threshold test ban agreement that forbade explosions over one or two kilotons would effectively prevent further testing in the range that currently seems to have the greatest military significance.

Since it is unlikely that additional strategic nuclear weapons could be developed under a low-yield threshold treaty, such a ban should be considered as a serious alternative to a comprehensive test ban. As for the dubious argument that yields below one kiloton—which may be nonverifiable with current seismic technology—would have military significance, no asymmetry could develop because both sides would be allowed to conduct such tests. A low-yield treaty is a realistic alternative to a comprehensive test ban treaty and would stand a real chance of being concluded even in the current political climate.

E.B. WHITE

HON. OLYMPIA J. SNOWE

OF MAINE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 2, 1985

Ms. SNOWE. Mr. Speaker, in the foreward to his "Essays" in 1977, E.B. White wrote that an essayist is one who "can pull on any sort of shirt, be any sort of person, according to his mood or his subject matter—philosopher, scold, jester, raconteur, confidant, pundit, devil's advocate, enthusiast." With the passing of this great craftsman yesterday, we have lost all of those and more.

While E.B. White's death finally stilled a voice that had spoken to America since the 1920's, he has left behind a rich landscape of essays, letters, stories, and poems which will attract readers for generations yet to come. As J. Russell Wiggins, a longtime friend of White's and now head of the Ellsworth American, said, "He left a lot of himself around us." White's writing reflected the concerns of everyday life in our country, yet managed to impart the perspective and outlook, uniquely his, of a man who was thinking about things just a bit more clearly than the rest of us.

The style of E.B. White's prose, in many ways, had it mirror in the lives along the Maine coast which he had adopted as his home: Clear and clean, pointed and concise, indulging in little nonsense but always maintaining a soft touch of humor. As Henry Mitchell writes in this morning's Washington Post:

E.B. White took pains not to be grand and all for naught; he wound up grand for all his avoidance of grandeur, and the more he avoided noble and elevated style the more convinced his readers were that he was noble—a word not always trotted out for writers of short and casual pieces.

Mr. Speaker, generations have tried, usually without success, to live up to the dictum expressed by William Strunk and championed by E.B. White: "Omit needless words." The words of E.B. White will never be omitted by that standard. I would only like to express, for myself and for his neighbors in the State of Maine, a great sorrow for his death, but a profound gratefulness for his life and noble works.

Mr. Speaker, I insert the following articles in full in the RECORD:

WHAT E.B. WHITE HAD TO SAY

ELLSWORTH, ME.—E.B. (Andy) White, who died Tuesday morning at his home in North Brooklin, was a many-sided man who cherished the companionship of neighboring farmers, fishermen, carpenters and craftsmen and that of scholars and statesmen. He was one of America's foremost essayists, the distinguished editor of The New Yorker and author of many books.

Some of the secrets of his writing success can be found in "The Elements of Style," on which he and William Strunk collaborated. The first edition of that book ran to 2 million copies, and there have been many subsequent editions. That single work has made a great contribution to the written word, but it did not disclose the real secret of his great success as a writer. The secret of his writing—whether it was in "Charlotte's Web" or in his commentaries on national and foreign affairs—was that he had something to say, and that he had an urge to say it.

In a conversation in the last few weeks of his life he said, sorrowfully, "I have so much to tell and so little time to tell it."

He left in his published works a veritable monument to his industrious response to the impulse to write. He had something to say—something he felt his fellow man ought to hear, and he was committed to saying it with the utmost care, with precision, with accuracy and so devised as to achieve the exact effect for which he was striving. His conversation like his writing was filled with wisdom, wit and humor. He viewed life seriously but delighted in its lighter side. He loved the association with good friends and old companions. He was curiously shy and retiring, refusing all manner of invitations to public appearances (even, or perhaps especially, those devised to honor him). He shrunk from interviews to which he seldom consented.

A notable aspect of his writing and thinking was in his individuality and originality. He fit no mold. Many American intellectuals have strongly disliked big cities. He wrote about them with great perception and genuine affection. At the same time, he loved rural life, delighting in the behavior of domestic farm animals and wild creatures, intrigued by his bantam chickens, his Wyandotte laying hens, geese, sheep and dogs. He brought his two natures together in the portraits of Brooklin village life he wrote for The New Yorker.

He will be greatly missed by the people of this community, among whom he has lived for many years, and by many in the wider world beyond it about which and for which he has written; but fortunately he has left much of himself in the books, essays, editorials and poems that will continue to delight his readers, young and old, throughout the land.

[From the Washington Post, Oct. 2, 1985]

THE MAN BEHIND THE MASTERY

E.B. WHITE: THE ELEGANT, UNMISTAKABLE VOICE OF THE ESSAYIST

(By Henry Mitchell)

E.B. White, who died yesterday at 86, took pains not to be grand and all for naught; he wound up grand for all his avoidances of grandeur, and the more he avoided noble and elevated style the more convinced his readers were that he was noble—a word not always trotted out for writers of short and casual pieces.

He joined The New Yorker in 1926 (it was founded in 1925) and his work was often unsigned, as in his "Talk of the Town" sketches. His work was better than that of most others at the magazine, and readers soon started pawing through the pages for traces of E.B. White and were commonly rewarded.

But he did not assume superstar status and while there was, of course, a slight letdown when one passed from him to other writers equally full of comment, still his writing was a garland for the team, you might say, rather than a spotlight so blinding that the others looked poor.

He has been called the best American essayist of the century, though most of his readers possibly have wondered who the competition was supposed to be.

His work was civil and polite; he either had no gift of vitriol or else never felt any. He was commonly funny, never in the high breathtaking way of an Aristophanes and never in the sparkling knock-'em-dead manner of the century's favorite one-line wits.

He gave the impression of getting through the day like an ordinary hard-pressed man trying to remember the hour of a meeting and the need to pick up dog food before the store closed, but then retiring for a time to think what the hell is *this* all about.

He achieved answers, and one of them was not to get carried away with words, to seem to feel more than he felt, and not to feel (in writing) in the first place without thinking it over a spell.

The trouble with many potentially nice writers is that once they think about things they either conclude (often correctly, no doubt) they have nothing to say and therefore write nothing, or they bull it through anyway to the temporary dazzlement of the easily dazzled, but not to the sustenance or delight of the civilized.

Nobody who only met and talked with White through a long and golden day at his house in Maine has any real idea of his life, however gratifying to see the deep courtesy and affection shown his wife of many years and his near-adoration of a rather grim and almost certainly brain-damaged terrier named Jones who despised the world and everything in it except his master whom he had conveniently converted to slavery. To love an unlovable dog suggests depths of commitment worth remarking.

White was a lyrical man in the sense that if wonder is lacking it is impossible to write at all, but because he was polite and therefore restrained and because he descended from respectable people who had an iron vase on the lawn and doubtless thought well of Emerson, he distrusted a too-easy loveliness and mush in general, first, because he wished to be honest all the way through and not to paint things sweeter than those things are, and second, because he had sufficient technical competence to notice that rhapsodies defeat the lofty effect aimed at.

He was not sentimental, or his work was not. He liked taking care of sheep partly because he simply loved animals, partly because he loved the bondage animals incur—lambs are invariably born at disgusting cold seasons and during prolonged and inconvenient hours—and partly, one may guess, because he liked to think of himself as a new Hesiod, bound through the night by the requirements of the beasts and through the day by the routine of the farmer's lot. He did not fool himself he was a plain farmer or did the hard work of a farmer, but he took extraordinary care to keep in touch with the cycling of the sun and the reality of growth and death.

Things must have welled up in him not just sometimes but most of the time. He had a powerful sense of life's sweetness and took the risk (a risk for a writer) of letting it show. He liked to set the stage by opening one of his pieces in a matter-of-fact way, forecasting in only the most tenuous way how the piece would end:

"To perceive Christmas through its wrapping becomes more difficult with every year."

He speaks of those ear trumpets hunters can buy to hear the otherwise inaudible and distant music of the hounds, and says something of the kind would help us hear Christmas. But, alarmed this might seem a little too sweet, he follows it:

"We rode down in an escalator the other morning . . ." just to show you he does not avoid commonplace things or ugly words like escalators. Then he dares an emotional charge again, but damps it down at once, but goes on to prepare for the climax by orderly reasoning and useful but not blinding images. He remains conversational, casual, letting the effect of brooding build up very gradually, alluding to rabbit tracks, rocket travel, packages of energy and so on, to show you this is only ordinary thought and ordinary stuff. Then the thing he has with difficulty been holding back and is now ready to let fly:

"This week many will be reminded that no explosion of atoms generates so hopeful a light as the reflection of a star seen appreciatively in a pasture pond. It is there we perceive Christmas—and the sheep quiet and the world waiting."

Intellectually it may make no great sense; Christmas is not perceived by anything in any pond, but what he really wants to get to is "and the sheep quiet and the world waiting," and by the time he gets you to it there are few readers whose throats have not got tense.

One of his funny masterful wrenching sketches concerned a wimp's visit to a psychiatrist, during which he felt nervous, afraid, a general incompetent mess. He was out on the street and something magical happens; he sees trees on the street and focuses on the second one from the corner. White wants to say what the Damascus Road is like, and how the soul can leap from a dingy cave to the high clear ether in a bound, but he will show it, not talk about it. He will show it funny, pathetic, stupid—he will sketch us as we are most of the time. He will also show the transcendent minute in which the wimp looks at the ordinary tree of a city street, and after the nonsense of his psychiatric session and its attendant confusion and garble about what he really wants, he looks at the tree:

"I want the second tree from the corner, just as it stands," he said, answering an imaginary question from an imaginary physician. And he felt a slow pride in realizing that what he wanted none could bestow, and that what he had, none could take away. He felt content to be sick, unembarrassed at being afraid; and in the jungle of his fear he glimpsed them before the flashy tail feathers of the bird courage."

Then he winds up with a paragraph of funny letdown. Only not before attempting and achieving in a mere handful of paragraphs a stunning salute to the soul of man in a way that makes nobody wince at the bush, and in a way that makes anybody proud to be a poor bifurcated simian and immortal diamond.

Never mind the "classic" children's books so lavishly praised, and rightly praised. Turn to "The Second Tree From the Corner," a good start and a good finish to the man or to any man.

Virgil reported on the kingdom of the dead and Socrates, too modest to claim any knowledge of it, yet looked forward to speaking there with the heroes, arguing the sweet day long. They wrestle (Virgil assures us) on the yellow sands in sport. And there are the sons of Teucros, they are not without beauty.

White's sad and grateful readers may in their own vision see that wrestling on that yellow sand today. Dear Lord, if it isn't E.B. White and his dachshund Fred, the one so interested in the farm pigs, the one so full of mischief (White used to go visit his grave) and with whom White could not romp for all these recent years. Look at them going at it. They are not without beauty.

[From the Bangor Daily News]

E.B. WHITE

Wherever English is written and read, yesterday will be recalled with sadness. On Tuesday, E.B. White, author, editor, and Maine resident died at the age of 86 at his home in North Brooklin.

White was the embodiment of the writer's art. With a few words, each carefully chosen, he could enchant, entertain, persuade. The complete craftsman, he could speak to the high-brow New Yorker readership or regale a family with the seemingly simple tale of a spider and her compassion for a pig.

White's Charlotte, like her creator, has a special sensitivity and may have had the gift of genius. He wove his words like a web but he also had the instinct for structure and hard work.

Many writers try to borrow his style. The few who succeed at the craft earn his lesson of discipline.

Wherever English is written and read, there is sadness, but also a debt to E.B. White.

SECRETARY OF ENERGY: OCS IS VITAL TO NATIONAL SECURITY

HON. WILLIAM E. DANNEMEYER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 2, 1985

Mr. DANNEMEYER. Mr. Speaker, with the issue of energy development off the coast of California a major item in the news and the likelihood that it will reach the House floor in some context this year, I wanted to draw my colleagues' attention to the statement submitted for the record by Energy Secretary John Herrington at a recent subcommittee hearing of the Merchant Marine and Fisheries Committee.

Secretary Herrington is in an excellent position to speak to the merits of the OCS issue. As Secretary of Energy, he is responsible for assuring our energy security through appropriate policy recommendations and administration of our basic energy programs. In addition, as a native Californian he is sensitive to the environmental concerns of those along the coast. Given these credentials, the House should give great weight to the Secretary's conclusions that OCS development can be carried out "with full environmental safety" and that OCS resources are essential to national security.

While the Energy Secretary submitted an excellent full statement, I ask permission to insert a summary which appeared in the September 23, 1985, edition of the Oil Daily.

TIMELY OCS DEVELOPMENT VITAL TO NATIONAL SECURITY

(By John S. Herrington)

Timely development of oil and gas resources on federally managed areas of the outer continental shelf (OSC) is essential to realize the objectives of energy stability, security, and strength.

OSC production has been an important source of our energy supplies in recent years and has the potential to contribute substantially to America's future energy needs.

In light of recent forecasts indicating increased import levels of crude oil and refined products in the 1990s, we need to develop the OSC resources to both reduce dependence on foreign imports and to increase our energy security.

In 1984, state and federal offshore production provided more than 14 percent of all domestic crude oil and condensate production, averaging about 1.27 million barrels of oil a day (469 million barrels a year).

In the same year, offshore production provided more than 28 percent of all domestic natural gas production averaging about 14.2 billion cubic feet a day (5.18 trillion cubic feet a year).

CALIFORNIA POTENTIAL

The only federal offshore areas that are currently productive are in the Gulf of Mexico and in the Pacific Ocean off southern California.

These regions have combined proven reserves of 3.5 billion barrels of oil and 38.5 trillion cubic feet of natural gas. This is equal to about 12 percent of the total proved U.S. oil reserves and 19 percent of the total proved U.S. natural gas reserves.

The California section of the Pacific OCS has the potential to become a particularly important source of our future oil and gas production.

In 1984, more than half of all new oil field discoveries for the U.S. were found in California—95 percent of these discoveries were made offshore. These new fields were discovered in the Santa Maria Basin and the Santa Barbara Channel.

By the early 1990s, U.S. oil firms developing deposits in the Santa Maria Basin and the Santa Barbara Channel areas project production of 300,000 to 500,000 barrels of oil per day, with the potential for total production of up to 2 billion barrels of oil.

From 1980 to 1984, dry natural gas production offshore California has almost tripled. During the same period, total U.S. production of natural gas declined.

Between 1980 and 1984, proven oil reserves offshore California have more than doubled.

Estimates of undiscovered resources in the Pacific region of the OCS also indicate that this can be a very promising area. The Minerals Management Service (MMS) of the Department of the Interior recently estimated undiscovered economically recoverable oil and gas resources totalling 2.2 billion barrels of oil and 4.7 trillion cubic feet of gas for the Pacific OCS region.

The American Petroleum Institute also estimated undiscovered *oil* resources in the Pacific OCS. According to their estimates, additional resources totalling 5 billion barrels of oil could be discovered and produced.

LEASING NEEDED

It is important to note, however, that these are only estimates of recoverable resources. We will not know how much oil and gas is ultimately recoverable or how quickly it can be economically produced without leasing tracts and allowing private exploration and development to continue, subject to careful review of environmental and safety concerns.

Timely development of OCS resources is particularly important in light of the long lead times that are often required to find and produce oil and gas once a tract has been leased.

On average, it requires two years to obtain the appropriate permits to begin drilling once a lease has been awarded. Several more years may pass before actual delivery of oil or gas can occur.

For example, frontier areas may require up to 15 years for exploration, production, and delivery. In central and northern California, delivery would be delayed not only by the extensive permitting process, which may take five or more years in California, but also by the necessity of developing an appropriate infrastructure to support development operations.

The U.S. is now in its fourth year of moratoria on offshore oil and gas exploration. We are very concerned that the nation will soon enter into its fifth year of a ban on OCS development in certain areas.

MORATORIA HURT

By preventing timely production of available low-cost domestic energy resources in the OCS, moratoria on OCS development cause U.S. consumers to pay more for oil and natural gas, increase our nation's dependence on imported oil and natural gas, reduce our energy security, and lower our economic growth.

OCS moratoria do not serve the long-term interests of the American public, nor do they strike an appropriate balance between timely development of public resources and environmental protection.

The current moratoria on OCS leasing reduce both current and future production of domestic oil and gas resources. Because less domestic oil and gas is available to meet domestic demand, demand for oil and gas from foreign producers increases.

This increased demand for foreign oil in turn creates pressures for increases in the world oil price. It also encourages increased domestic consumption of insecure energy supplies.

Because an OCS moratorium shifts energy production from domestic companies to foreign companies, it also reduces domestic economic growth.

Offshore oil and gas development stimulates regional economies through the creation of jobs, the expansion of local and regional tax bases, and the demand for goods and services required by OCS workers and equipment.

These effects extend beyond the region where development is taking place, since oil and gas drilling and production requires a broad variety of support to provide equipment and other services to the companies developing a lease.

PROTECT ENVIRONMENT

Let me emphasize that I appreciate the environmental qualities of the California coast as well as anyone. I was raised near the adjoining beaches and have used these areas for recreation for many years.

Certainly, steps must be taken to assure environmental protection; however, we have learned that offshore drilling can be conducted with full environmental safety.

The decision on how to proceed in the development of OCS lands is extremely important for America's energy future. We believe the preferable way to proceed is through

the balanced planning process of the OCS Lands Act Amendments.

The decision Congress makes on whether to continue current moratoria on OCS development needs to balance all of the important considerations outlined here. I commend Interior Secretary Donald Hodel for his efforts to achieve consensus on these issues.

I believe that these are issues that require carefully reasoned decisions. We can best accomplish this by lifting current moratoria and pursuing reasoned course of OCS development through the planning mechanisms currently in place.

CYPRUS

HON. DAN LUNGREN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 1, 1985

Mr. LUNGREN. Mr. Speaker, I would like to thank my distinguished colleague from Ohio, Mr FEIGHAN, for holding this special order this evening. Clearly his efforts are representative of America's resolve to see progress toward a fair, negotiated settlement in Cyprus.

Today, as we mark the 25th anniversary of independence for the Republic of Cyprus, we must also understand that the Greek people and many of Greek extraction residing here in the United States agonize over the fact that Cyprus is subject to division.

Mr. Speaker, we in the United States must continue our willingness to assist the parties in the search for a settlement. President Reagan has made clear his opposition to actions which forestall or prejudice progress.

In this light, the current efforts by United Nations Secretary General Javier Perez de Cuellar appears to be an important first step in the search for progress toward a Cyprus settlement. Although failure to reach a settlement occurred earlier this year, the point is that we should not squander the progress that has been made. Pursuit of a negotiated settlement must continue. The talks must continue. Clearly, the prospects for peace are better than they have been in recent years.

I hold out hopes for improvement of relations between Greece and Turkey, and it seems that the more favorable atmosphere may make it easier for the two sides to address areas of tension. A negotiated settlement of Cyprus would be an important beginning.

Mr. Speaker, I again want to thank Mr. FEIGHAN for his initiative this evening.

AN INDEPENDENT CYPRUS

HON. MERVYN M. DYMALLY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 1, 1985

Mr. DYMALLY. Mr. Speaker, we mark today the 25th anniversary of the independence of Cyprus, but we cannot celebrate this day. With a Turkish Army still occupying 40 percent of the most productive part of the island, we know that Cyprus is not truly independent. Could we as Americans celebrate the Fourth of July if 40 percent of the United States, more than the entire area east of the Mississippi, were occupied by a foreign army?

Usually the problem is to safeguard the rights of the minority, but in Cyprus we haved a tyranny of the minority. Here only 18 percent of the population of Turkish Cypriots, backed by 25,000 Turkish troops, not only holds 40 percent of the best land but also demands the power of the veto over 82 percent of the population, the Greek Cypriots. Could we Americans celebrate our Fourth of July if 18 percent of our people had the power to stop our Government from functioning?

This year, the 40th anniversary of the founding of the United Nations, Cyprus provides a test case for the U.N. principle of solving problems peacefully and according to international law, and not be the use of armed force. We should reaffirm our support for the U.N. principle of respect for independence, sovereignty and territorial integrity as it applies to Cyprus, and ask our State Department to work toward a solution based on past U.N. resolutions and the recent proposals of the Secretary General.

Although the United Nations can provide the framework for a just and peaceful settlement, it does not have the influence to bring about a solution on Cyprus. Only our determined effort can break the current impasse. Only we have sufficient leverage with Turkey to move the situation off dead center.

Unfortunately, our Government so far has given preference to the military importance of Turkey in the area. Only if we focus on the potential benefits to be derived from a stable and independent Cyprus will there be progress.

A stable and independent Cyprus could bring improvement in Greek-Turkish relations and lessen tensions in the Middle East. It could also be a neutral meeting place for East and West, Christians, Moslems, and Jews. Cyprus could be tomorrow what Switzerland is today. This would give us, as Americans and as citizens of the world, cause to celebrate October 1 as Cyprus independence day.

401(k) RETIREMENT SAVINGS PROGRAMS MUST BE RETAINED AND STRENGTHENED

HON. ROD CHANDLER

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 2, 1985

Mr. CHANDLER. Mr. Speaker, at a time when Americans are living longer and retiring younger, I am deeply concerned that a very popular and effective retirement savings program—401(k) plans—is being seriously jeopardized or, at worst, may be eliminated entirely.

Last November the Treasury Department suggested that 401(k) plans be eliminated; in May, the President recommended they be retained but at a substantially reduced limit, with debilitating coverage rules, and that they not be made available to nonprofit groups. In August, the Treasury Secretary again reversed the administration's position and proposed the complete elimination of 401(k) plans. Finally, the staff of the Joint Committee on Taxation has recently proposed to the Ways and Means Committee the retention of 401(k) but at even more reduced levels, with a dollar for dollar offset for contributions to individual retirement accounts.

Mr. Speaker, we must actively encourage private initiatives for retirement, yet the administration and the Joint Taxation Committee seem to be headed in the opposite direction. We must provide incentives for individual preparation for retirement and strengthening 401(k) plans is one positive step in that direction.

Just what is a 401(k) plan? Cash-or-deferred arrangements [CODA's] enable participating employees to make pretax contributions in lieu of salary. These contributions, matched by the employer in 80 percent of 401(k) plans, are typically placed in a profit-sharing or stock bonus plan where they grow tax free until the worker receives a taxable distribution or payment. Some plans permit workers access to funds prior to retirement or termination of employment, either by borrowing or by withdrawing money in special hardship situations.

Although authorized by the 1978 Revenue Act and effective in January 1980, the IRS did not issue necessary regulations governing 401(k)'s until November 1981; final regulations have yet to be issued.

Nonetheless, 401(k) plans have grown at a dramatic rate in just 3 years.

Mr. Speaker, our colleagues should consider the following facts:

About 20 million American workers have 401(k) plans available where they work. When spouses and dependents are considered, a substantial percentage of all Americans are eligible to benefit from these plans. It is estimated that nearly 10 million workers are currently participating.

Tough nondiscrimination standards have always prevented 401(k) plans from operating substantially for the benefit of the highly compensated. Indeed, participation in 401(k) plans by workers earning less than $20,000 is three times greater than their IRA participation.

Many participating employees have no other significant savings besides their 401(k) account. Nearly one-third of the 56 million workers covered by an employer-sponsored retirement plan have little or no savings beyond the assets in those plans.

Retirement savings encouraged through programs like 401(k) plans will help reduce financial demands on all levels of government when participants retire.

Mr. Speaker, I urge our colleagues—and most particularly those 36 who serve on the Ways and Means Committee—to reflect carefully on the significant antisavings

nature of the administration's and the Joint Tax Committee's proposal to eliminate or undermine 401(k) plans and to join with me and others in working to encourage greater individual savings initiatives.

INDIA AND THE UNITED STATES

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 2, 1985

Mr. GARCIA. Mr. Speaker, today is Mahatmi Ghandi's birthday and the Indian American Forum for Political Education [IAFPE] celebrated it by hosting a luncheon for Congress on Capitol Hill. I would like to take a moment both to thank the IAFPE for their kind gesture, and to use this occasion to insert in the RECORD a letter from Paul Kreisberg of the Council on Foreign Relations which describes a report published by the Council on Indo-United States relations.

Although the letter and the report were sent prior to Prime Minister Gandhi's visit to the United States earlier this year, they are still useful in assessing our relationship with India. Part of the work of the IAFPE has been not only to promote the concerns of the Indian American community in the United States but to foster better relations between the United States and India. I believe that the council's report as pointed out by Mr. Kreisberg's letter complements the work of the IAFPE. I, therefore, submit that letter for my colleague's perusal.

The letter follows:

COUNCIL ON
FOREIGN RELATIONS, INC.,
New York, NY, May 31, 1985.

In anticipation of Prime Minister Rajiv Gandhi's upcoming meeting with President Reagan following his visit last week with Gorbachev in Moscow, and in light of other new developments such as the agreement to permit the transfer of high technology from the U.S. to India, I think you will find the enclosed report on Indo-U.S. relations especially timely. It may be of particular help in placing the present state of relations between the two countries in proper perspective.

A product of two extended meetings between groups of Americans and Indians (one in 1982 and the other last year) the report provides insights into the attitudes of both sides, which—in part because the discussions were originally not intended for publication—are freer of official policy postures than is usually the case in such exchanges.

Although the conferences both occurred while Indira Gandhi was Prime Minister, it is striking that most of the Indian views expressed still remain—even after nearly three years in the case of the first conference—both relevant and up to date, and the concerns of Americans, I believe, remain equally valid.

The new government of Rajiv Gandhi is in the process of implementing some of the policy actions which many of the participants in the conferences thought would be wise while reaffirming some other policies that American participants saw as creating unease in the United States.

Whatever the results of those policy moves, the conclusion that can be drawn from the conferences and subsequent events is that many of the comments on national purpose and interest—both Indian and American—recounted in this report represent fundamental social, cultural, political, and strategic points of view, which are likely to affect the way in which India and the U.S. see the world and each other for a considerable time to come.

Among the major broad themes that emerged in both conferences are the following:

India is determined to pursue an independent foreign policy, based on an understanding of non-alignment that has national, regional, and international aspects, all of which relate to an Indian effort to avoid being drawn into involvement in conflicts and tensions between the Great Powers.

This contrasts with the U.S. view that the United States and the Soviet Union cannot be judged as equal in the justice of their policies or their intentions, and third countries like India cannot always balance in the middle.

Most Americans believe that the Soviet Union has had a major responsibility in creating international tension, including in Third World areas, though many Americans also acknowledge that the causes of such tension are more complex and diffuse than they may once have believed.

Indians believe that the overriding causes of Third World tensions are domestic social, economic, and political forces which the superpowers at times exacerbate but do not create. At the same time, they see the developed countries, particularly the United States, as bearing responsibility for many of the economic woes currently afflicting the Third World.

Many Americans see the U.S. as increasingly and legitimately concerned about its own economic problems in a world in which American economic predominance is no longer what it once was. The U.S. has consequently been less willing to support international financial and economic assistance programs for developing countries at levels it did before. It has focused increasing policy attenton on private investment and credits, trade, and technology transfers as basic instruments for encouraging greater self-reliance in the development of poorer countries.

Indians, on the other hand, still believe that increased international concessional aid is critical for development needs. They are reluctant to see India become too heavily dependent on private financial transfers. Although there was greater willingness expressed at both the conferences, and more recently in Indian Government policies, to stimulate trade and foreign investment in India from the U.S., India believes these must be heavily supplemented by continuing aid flows.

Indian concern about Pakistan as a potential source of danger to Indian security and about Islamic fundamentalism as a threat to secularism in India remains strong. Indians believe the U.S. does not give sufficient attention to these Indian concerns and to the impact of U.S. actions on stability in the subcontinent as it evolves its policy toward the region.

Even those Americans who sympathize with Indian concerns believe that India often does not give sufficient weight to broader strategic considerations involving Soviet policies relating to Afghanistan, Southwest Asia, and the Indian Ocean, which directly affect U.S. interests.

Nevertheless, Americans appear to have greater understanding now than in the past of the complex Indian relationship with the Soviet Union and appreciate that India is not a Soviet satellite.

But the Indo-Soviet relationship remains a difficult issue for many Americans just as the complex U.S. relationship with China remains a source of suspicion and unease for many Indians.

The ability to communicate easily in English, common strong commitment to democratic institutions, and intellectual empathy and admiration among Indian elites for American technology and some aspects of American culture constitute important cultural links between Indians and Americans.

These also, however, often hide even more fundamental differences in cultural and religious traditions and patterns of thought in the two societies. Communication, exchange, and education help ease these differences, but the differences are likely to remain as obstacles to broad understanding for some time.

Above all, the conclusion that can be drawn from these discussions is that the importance of India and the U.S. for each other is likely to grow, not diminish, in the years ahead.

Sincerely,

PAUL H. KREISBERG.

QUICKENING CHANGE IN SOUTH AFRICA

HON. EDWARD J. MARKEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 2, 1985

Mr. MARKEY. Mr. Speaker, as time passes since the President's announcement of limited sanctions against the country of South Africa, and the turmoil, strife, and unrest that occurs there temporarily fades from the front pages of the news, I think it is important to remember the basic miscarriage of justice that is being perpetrated on the majority of the population in that country.

This miscarriage of justice is continuing to contribute to an extremely volatile situation in South Africa. The sanctions that President Reagan imposed are ineffectual at best, and simply because the condition in South Africa is not in the news does not mean by any stretch of the imagination that it has gone away. Indeed, it is a pressure cooker that grows worse each day. I urge my colleagues to read the accompanying article by Peter Grothe, professor of international policy studies at the Monterey Institute of International Studies. This article illuminates the desperate situation faced by all South Africans, and the potential for devastating conflict and conflagration there.

QUICKENING CHANGE IN SOUTH AFRICA

(By Peter Grothe)

MONTEREY, CALIF.—A visitor returning to South Africa after an absence of five years is reminded of the story of the old fellow who heard the clock strike 13 and said, "It's never been this late before."

When I was in South Africa in 1980, giving guest lectures at universities, a highly respected Western diplomat told me that the most likely model for change in South

Africa was not Mount St. Helens but rather a boiling caldron.

In his view, then, a large and sudden eruption was unlikely. What he expected instead was limited black violence that would be met by repression from the Government, followed by limited accommodation and then a period of relative quiet. A series of such cycles of violence, repression and limited accommodation would, he thought, take place over a period of years until fundamental change had been accomplished.

At the time, I found this prediction plausible. It may still be, but my recent trip suggested that the Mount St. Helens metaphor is perhaps more appropriate today than it was five years ago.

The returning visitor finds nine significant differences between South Africa in 1980 and 1985.

First, unlike five years ago, blacks now feel a genuine sense of power and a decreasing reluctance to use it. Many blacks recognize that the South African Army and police are the strongest in Africa and that, in a violent confrontation, blacks would come out the losers. Nevertheless, many militant young blacks are ready for violence—including violence in white areas. Perhaps more important, the power to withhold one's labor and to boycott white stores gives blacks enormous economic clout, and they are now aware of it.

Second, the perceptual gap between ruling Afrikaners and blacks has widened. Whites point with pride to abolition of some of the worst aspects of apartheid—many of the better hotels and restaurants have been integrated, for instance, the mixed-marriage law has been abolished and many blacks are being promoted to middle-level jobs. Many Afrikaners speak about the enormous significance of these changes and the sacrifices they have made. The black view was summed up by one resident of Soweto: "Man, that's nothing but cosmetics. I'll only be satisfied when I get the vote."

Blacks and Afrikaners also have different timetables for change. Members of the Government talk about gradual, long-range solutions. The patience of the blacks is wearing thin. They want one man, one vote—and they want it now. The Rev. Beyers Naude, the general secretary of the South African Council of Churches, told me, "My fellow whites have no idea of the deep sense of outrage in the black townships."

Third, five years ago the economy was strong. Now it is in turmoil. Many white business leaders, terrified by economic alarm signals and by the specter of foreign banks refusing to roll over their short-term loans, have urged the Government to release Nelson Mandela, negotiate with the banned African National Congress and immediately dismantle the apartheid system. This would have been unheard-of even six months ago.

Fourth, Afrikaners—once called "the white tribe of Africa"—are no longer unified. A significant and vocal minority has bolted the ruling National Party and formed their own ultraright group, the Conservative Party. Many observers see this faction, which argues against all concessions to blacks, as a constraint on President P.W. Botha's announced intentions of reform.

Fifth, there have been perceptible shifts in the attitudes of many whites in the last five years. The Afrikaner students I met seemed to be troubled and searching. Most seemed to hold views more liberal than those of their parents' generation. English-speaking students, who have traditionally held more liberal views than Afrikaners, have gone even further. Many of them now seem willing "to put their bodies on the line," as they did last month when hundreds of demonstrating Cape Town University students were whipped and tear-gassed by police. Further, many more English-speaking whites are now considering emigration. One English-speaking businessman told me: "More than half of my friends are planning to leave the country."

Sixth, there are growing fissures among blacks. Militant young blacks are becoming increasingly impatient with the moderate views of their parents' generation and with moderate leaders like the Zulu chief, Gatsha Buthelezi, and Bishop Desmond Tutu. Meanwhile, the Government continues to jail or ban moderate black leaders who want peaceful change, causing young militants to ask: "Look, the Government arrests the peaceful moderates. What option is there other than violence?"

Seventh, although President Botha denies it, it is quite clear that white South Africans are much more sensitive to outside political and economic pressures then used to be the case. Talks with many whites and a perusal of the press leave no doubt about this, and it would suggest that President Reagan's tranquilizing notion that the Botha Government has substantially solved its problems makes for the wrong strategy at the wrong time.

Eighth, blacks are experiencing what the American historian Crane Brinton once called "the revolution of rising expectations." When Rhodesia became Zimbabwe, South Africa became the last white domino on the continent. President Botha said to whites, "Adapt or die." Those and other events have given blacks the expectation that the complete dismantling of apartheid is within reach—not for their grandchildren's generation, but for them.

Finally, in the fall of 1980, President Jimmy Carter was extremely unpopular with South African whites and extremely popular with blacks. In sharp contrast, Ronald Reagan is extremely popular with whites and arguably the most unpopular President in American history with blacks.

What conclusions can one draw? No one can accurately predict the future, and the caldron may continue to simmer, more or less quietly, for some time to come. Yet most of the trends I noticed suggested to me that a volcanic eruption becomes more and more likely with every passing month.

In Alan Paton's classic novel, "Cry, The Beloved Country," a black South African clergyman says about whites. "I have one great fear in my heart—that one day when they are turned to loving, they will find that we are turned to hating." It strikes me now as a sadly accurate prophecy.

GAS DECONTROL CAN AID U.S. SECURITY

HON. WILLIAM E. DANNEMEYER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 2, 1985

Mr. DANNEMEYER. Mr. Speaker, there is now a chill in the air as summer turns to fall and that means old man winter cannot be far behind. Unlike past winters, though, it is unlikely that our consumers will experience either supply shortages or increased rates for heating oil or natural gas to heat their homes.

Natural gas ratepayers will see falling to stable rates in their monthly bills because of the competition which has been injected into the industry with the partial deregulation of wellhead prices, which took effect on January 1 of this year. Prices have gone down since then, not up as advocates of re-regulation had predicted.

More, however, must be done if we are to bring about the efficiencies which will bring greater price and supply benefits to our consumers. We need to remove the remaining price contols. Mr. RICHARDSON and I, joined by a bipartisan coalition of a majority of the Subcommittee on Fossil and Synthetic Fuels, introduced H.R. 2734 on June 11, 1985.

Energy Secretary Herrington recently spoke to the Kansas Independent Oil and Gas Association. A summary of his prepared remarks appeared in the Oil Daily. His speech sets forth the persuasive case for natural gas deregulation and even more flexibility for the industry. I insert it at this point in the RECORD:

COMPREHENSIVE GAS DECONTROL CAN AID U.S. SECURITY

(By John S. Herrington)

Natural gas, which accounts for about one-third of all domestically produced energy, is the only primary fuel whose prices remain under federal controls.

The presence of these controls has slowed the ability of gas to respond to market conditions, constrained competition between gas and other fuels, and distorted the economic decisions of gas producers and consumers.

These distortions have resulted in significant costs to the U.S. economy. The Reagan administration continues to support elimination of price controls on natural gas.

On Jan. 1, 1985, wellhead price controls were removed from about 50 percent of domestic natural gas supplies. Partial decontrol has increased competition and introduced greater price flexibility into the natural gas market.

Although partial price decontrol has yielded some benefits, the remaining price controls on old gas and the complex regulatory system imposed on the industry will continue to distort the domestic natural gas market and reduce the supply of gas available at competitive prices.

These controls and regulations have allowed some pipeline companies to refuse to transport gas for producers and consumers even though excess capacity is readily available. This has contributed to the artificially high prices and the large volumes of unmarketed gas of the past several years.

TOTAL DECONTROL VITAL

In his State of the Union address, the president reiterated his support for the full deregulation of all natural gas supplies. We believe that comprehensive deregulation of the natural gas market would provide large economic benefits to natural gas consumers and the U.S. economy.

It is our hope that the evidence of increasing competition and stable or declining prices since partial decontrol became effective will generate a climate of widespread support for comprehensive deregulation.

One important by-product is that comprehensive deregulation would increase the re-

covery of low-cost gas supplies by 27 trillion to 48 trillion cubic feet. This would translate into an increase of about 1 tcf in the amount of natural gas produced in this country each year.

If price controls remain in effect, these supplies would stay in the ground forever. It is important that we take whatever actions are necessary to ensure that these supplies are produced whenever economical. Production of our recoverable, low-cost supplies will benefit domestic producers, consumers and the economy as a whole.

IMPACT ON IMPORTS

Decontrol of all domestic gas prices will increase our energy security, not only because it will allow us to produce more low-cost gas, but because of the effect it will have on natural gas and oil imports.

As many of you have seen recently in the markets where your gas is sold, competition from domestic supplies has reduced both the amount of gas we import and the price we pay for gas imports.

We are confident that comprehensive deregulation would allow domestic producers to compete even more effectively with imports of gas as well as oil.

We estimate that over the next 10 years, comprehensive deregulation would reduce our payments for gas imports by over $7 billion, and would reduce the amount of oil we import by over 360,000 barrels a day.

Natural gas cannot make its full contribution to our nation's energy security until all domestic gas supplies are decontrolled. But price decontrol is not enough. We also have to find a way to ensure that producers can get their gas to market.

Pipeline companies are now able to shut-in low-cost gas supplies because regulations have allowed them to restrict access to available transportation capacity and thus prevent competition for shut-in supplies.

Regulation has also allowed pipeline companies to keep their core market customers from switching to lower-cost gas producers. We must work to eliminate this type of inappropriate interference in the marketplace by the government.

FERC'S PROPOSALS

Recently the Federal Energy Regulatory Commission proposed a number of changes in existing regulations to promote greater competition among pipeline companies.

The most important aspect of the commission's proposal is the removal of inefficient and discriminatory restrictions on access to available transportation capacity.

The Department of Energy strongly supports the commission's efforts to foster competition in the gas market and has encouraged the commission to allow open access to all producers and consumers.

The adoption of these changes to existing regulations would enhance competition by allowing all consumers access to the least costly sources of supply.

We do not believe that these actions to enhance competition need affect the validity of existing gas supply contracts, and have strongly emphasized to FERC that we do not support actions that would upset such contracts.

Finally, the administration also supports repeal of restraints on oil and gas consumption in the Fuel Use Act. The Fuel Use Act imposes strict prohibitions against the use of gas by certain new electric generation facilities.

Given today's economics, most utilities will prefer to use coal in new baseload facilities. But changes in relative coal and gas prices could make the prohibition very costly. We believe that energy consumers should always be able to utilize the lowest-cost form of energy.

REASONS FOR OPPOSING H.R. 1562

HON. DENNY SMITH

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 2, 1985

Mr. DENNY SMITH. Mr Speaker, earlier this year, I signed on as a cosponsor to H.R. 1562, the Textile and Apparel Trade Enforcement Act of 1985. After a great deal of consideration, I have decided that I can no longer support this piece of legislation. House rules prevent me from removing my name as a cosponsor at this time, but I would like to explain my reasons for now opposing this bill.

There is no doubt in anyone's mind about the severity of the trade imbalance in this country. As I'm sure everyone knows, we are now a debtor nation for the first time since 1914. Action has to be taken to correct this problem, but as the trade imbalance grows, I have become convinced that H.R. 1562 will not solve it.

The textile and apparel industry is going through the same difficulties that the timber industry in my part of the country has been facing for the past several years. High interest rates, increased competition from abroad, decreased demand for domestic production and an overvalued dollar were all reasons that unemployment in Oregon reached into double figures in the early eighties and have not come down to the national average of 7 percent.

When I signed on to H.R. 1562 in April, I did so to send two signals, one to our trading partners, and one to the administration.

The message to our trading partners is simple. Fairness. We want no more, and we expect no less. It is not fair that countries like Canada can support the timber industry in such a way that their companies can compete in the U.S. markets at far below our own costs in this country. It is not fair that our Pacific Rim trading partners not only subsidize their industries, but they also close their markets so that U.S. companies cannot get in to them for open and honest competition. It is not fair that our European allies rely heavily upon the United States to help defend them from the Warsaw Pact countries, yet they do not agree with our efforts to open up new and expand old trade relationships with them.

Here in the United States, H.R. 1562, and similar measures, were introduced because the Reagan administration was not perceived as doing its part to protect our interests within the world trade community. Trade-related jobs were being lost from Portland, ME, to Portland, OR. Jobs were being lost in textile mills, lumber yards, auto plants and steel industries. Something had to be done to correct these problems.

H.R. 1562 seemed to be the bill that could get that message across to our trading partners and the administration.

It worked.

Since April, and especially during the August district work period, many of our constituents have written to us about the effects of our current trade deficit. It moved up in the awareness of the media and the general public. This mood also struck a chord with those that we wanted to reach the most, President Reagan and our trading partners.

Our trading partners, most notably Japan, are taking steps to open their markets to our goods and services; 51 of the 90 members of the General Agreement on Tariffs and Trade [GATT] petitioned for a new round of talks to deal with service industries. These talks began on September 30. The Canadian Government has just appointed their representatives to a new round of bilateral talks on trade which are scheduled to begin sometime in the near future.

One of the major causes of the trade imbalance is the high value of the dollar. Clyde Farnsworth, in his September 24 article in the New York Times, quoted administration officials as saying that the elimination of unfair trade practices would only reduce the trade deficit by 10 to 20 percent.

The finance officials from the five major industrial nations gathered in New York last week and took the first steps in decreasing the inflated value of the U.S. dollar. In addition, the Japanese have offered to help drive down the value of the dollar by liberalizing financial and capital markets.

The administration is also taking steps to solve this problem. The President has proposed a fund of $300 million to the Export-Import Bank. This $300 million could lead up to $1 billion in mixed credit loans to targeted buyers.

The President also decided to change section 301 grievance procedures. These changes will not only hurry up the process, but it will now be easier to prove unfair trade practices against individual companies as well as countries.

These are all positive steps in the right direction. These are not steps that will bring about immediate results. We have to realize that there is always a lag time, sometimes several months, before we start seeing the benefits of these actions. It will require patience on our parts here in the Congress.

The problem with many of the trade bills that we are now asked to consider here in the Congress is that they could be counterproductive if passed. The sponsors of H.R. 1562 ask us to restrict trade in the name of free trade. It is important to realize that the subject of world trade is extremely complicated, and no country is totally innocent in its practice. While we advocate free trade, we also have some 200 to 300 quotas and tariffs already in place on commodities from steel to autos to agriculture to textiles.

As a representative from the Pacific Northwest, I can honestly say that I understand the feelings of my colleagues who have constituents who have lost jobs in their districts due to the trade situation. I know that there is a lot of pressure to pass bills such as H.R. 1562.

But bills like H.R. 1562 are nothing more than stopgap measures. They will bring immediate relief to some within certain industries in particular regions of the country, but may well harm the well being of other industries at the same time. If relief does not address the root causes of the problem, it will be temporary at best.

Those of us in trade dependent regions and industries would also feel an immediate adverse effect through protectionist measures—but it will not be temporary, and it could be devastating. It will be retaliatory. It will come from countries that will no longer buy the lumber from our mills, or the wheat from our farms. It will be the people who work in places like the Port of Portland who will lose import and export business. It will be the retail workers, often at the low end of the wage scales, who will be laid off. It will be the consumers of the United States who will have to pick up the increased costs of goods and services.

There are other actions that we can take, both at home and here in the Congress, that would send just as strong a message but not hurt us in the long run. We can start by making sure that we buy American goods whenever possible. We know that American-made goods are just as good as any produced in the world.

We, in the Congress, can also do our part by reducing the value of the dollar. The best way to do that is by cutting Government spending. Our Federal deficit is the single most important factor in the value of the dollar. As long as we come back each year and spend more than we did the year before, it seems wrong for us to then turn on our trading partners for taking advantage of our profligate ways.

Let's make sure that we are patient through this. More importantly, let's make sure that we aren't bringing a lot of this on ourselves. H.R. 1562 will lead to more problems, not solve the ones we now have.

CORPORATION FOR SMALL BUSINESS INVESTMENT CHARTER ACT

HON. PARREN J. MITCHELL

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 2, 1985

Mr. MITCHELL. Mr. Speaker, today I am introducing, with the cosponsorship of 36 of my colleagues on the Small Business Committee, legislation to amend the Small Business Investment Act of 1958 to create the Corporation for Small Business Investment [COSBI], and to transfer the investment programs currently administered by the Small Business Administration [SBA] to the Corporation.

This new institution would be a Government-sponsored, private Corporation designed to provide access to the private capital markets for small business investment companies [SBIC's] and minority small business investment companies [MESBIC's] so that they, in turn, can provide a stable and continuing flow of venture capital to small and minority small business.

The SBIC and MESBIC Programs have compiled an outstanding record in providing growth capital to small and minority businesses. Over the past 36 years, SBIC's and MESBIC's have invested more than $6 billion in over 70,000 small firms, thereby providing benefits to the American economy in terms of job creation, business ownership by minority persons, innovative products and generation of new tax revenues.

Despite their success, however, the stability of these programs is threatened by persistent Federal deficits and the necessity to carefully allocate scarce Federal resources. We can all agree on the important economic dividends small business provides for our economy. The challenge is to establish a workable system which gives these vital small firms continued access to private sources of growth capital, while minimizing cost to the taxpayer.

The legislation being introduced today would achieve these objectives. The bill would establish a Corporation for Small Business Investment to serve as a financial intermediary to the private capital markets for SBIC's and MESBIC's. With an assured source of capital, SBIC's and MESBIC's can make a continuing stream of investments in small firms in search of growth capital. While COSBI will be a congressionally sponsored corporation, it would operate as a private-sector company, capitalized and managed by the SBIC and MESBIC industries.

Once COSBI is operating, continued authorizations for Federal guarantees of SBIC debentures will no longer be necessary and annual appropriations to support SBIC and MESBIC investment activities also should disappear.

It is my hope that this legislation will be found to represent a unique and creative solution to the problem small business continually faces in trying to secure long-term investment capital. It is endorsed by the SBIC and MESBIC industries, as well as by many of the leading small business organizations.

The Small Business Committee will commence hearings on the bill next month. It is my expectation that they will justify pursuit and refinement of this concept. If so, we should have a bill ready for consideration by the full House early next year.

FEDERAL SCIENCE AND TECHNOLOGY REVITALIZATION ACT OF 1985

HON. DON FUQUA

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 2, 1985

Mr. FUQUA. Mr. Speaker, today I am introducing the Federal Science and Technology Revitalization Act, which would establish an alternative personnel management system for scientific and technical people in the Federal Government. This is something I have been interested in for a long time, and I am hopeful that the proposal I am introducing will be able to help improve the quality of Government-operated Federal laboratories by encouraging the recruiting and retention of highly qualified scientific and technical individuals.

The major provisions of the bill will:

Permit agencies to include scientific and technical personnel in the new personnel management systems;

Simplify job evaluation and remove covered positions from the position classification requirements of 5 U.S.C., chapter 51;

Provide flexibility to develop salary structures which ensure a competitive position in the labor market and which reflect the hiring and pay policies needed to attract, retain, and motivate a highly qualified scientific and technical work force;

Base pay increases on performance, not longevity;

Allow waiver of the pay cap for up to 5 percent of specially qualified scientific and technical personnel;

Provide for performance and special awards and remove the pay cap for lump-sum awards; and

Create a Senior Scientific and Technical Personnel Service.

No employee's basic pay would be reduced as a result of being included under an alternative personnel management system.

In May 1983, the Federal Laboratory Review Panel of the White House Science Council, chaired by David Packard, reported that Federal laboratories have several serious deficiencies and, consequently, a number of the laboratories do not meet the quality and productivity standards that can be expected of them.

Specifically, the panel reported that salaries at Federal laboratories are noncompetitive with the private sector at entry and senior levels. In addition, it found that Federal laboratories must deal with a personnel management system that is cumbersome and has little flexibility. As a result, there exists what the panel referred to as an alarming "inability of many Federal laboratories—especially those under Civil Service constraints—to attract, retain, and motivate qualified scientists and engineers * * *" "[T]his situation," warned the panel, "limits the productivity of the laboratories * * * [and,] [i]f not corrected, * * * will seriously threaten their vitality." For, as the Panel observed in its report, "[t]he key to a laboratory's success is a high quality and properly motivated scientific staff."

The panel concluded that "administrative and legislative actions should be initiated * * * to create, at Government-operated laboratories, a scientific/technical personnel system that is independent of current Civil Service personnel systems."

The bill is the legislative attempt to deal with these very real problems. The bill has

been drafted to provide authority for agencies to construct alternative personnel systems which are appropriate to the scientific and technical personnel employed by the Federal Government. The legislative does not attempt to define the specific agency personnel systems beyond establishing some general guidelines. It is believed that this approach will provide the Government the greatest flexibility in dealing with a very complex problem. My own experience, gained from both my constituent service, and committee work, is that the requirements for NASA and Department of Agriculture labs may be very different, but attracting and retaining quality personnel is absolutely essential for the space program and for emerging fields in agriculture.

In spirit, the model legislation is very similar to the demonstration project section (5 U.S.C. 4703) of the Civil Service Reform Act of 1978. The model legislation provides the Office of Personnel Management [OPM] and the agencies the authority to develop alternative personnel systems for scientific and technical personnel at Federal laboratories and, under appropriate conditions, outside of Federal laboratories. These systems can be tailored to the peculiar needs of a given agency or of a given laboratory. It is anticipated that any changes in agency personnel systems would be accomplished, over time, within existing budget resources and be the basis for improving the use of those resources.

CONGRESSIONAL TENNIS TOURNAMENT BENEFITS D.C. AREA YOUTH

HON. NORMAN D. DICKS

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 2, 1985

Mr. DICKS. Mr. Speaker, on Tuesday, October 8, many of my colleagues will join me in support of New England Life's Congressional Tennis Tournament to benefit the Washington Area Tennis Patrons Foundation, a nonprofit, charitable organization committed to fostering youth tennis in the Capital area.

For over 27 years, the tennis patrons have raised funds that are used to motivate, educate, train and supervise youngsters in tennis skills, teamplay, sportsmanship and an opportunity to have fun.

As Arthur Ashe said of the patron's program, "The accent here is on learning."

The patrons have been responsible for a number of special events and programs, among them: The Washington Tennis Center; the National Junior Tennis League of Washington, Maryland and Virginia; the Middle Atlantic Junior Grand Prix Tournament Series; instructional programs for the mentally and physically handicapped, junior outdoor and indoor tournaments; college scholarships and Summer Campership Program; travel assistance to national tournaments; and other developmental programs.

On October 8 Members from both sides of the aisle and both the House and Senate will compete in a special tournament to benefit this important activity. The congressional tournament and the mixed doubles finals to be held in the month, will cap this year's effort by NEL as the prime mover of a very worthy program.

New England Life, with its extensive community service program in Boston and its sponsorship of young people's tennis programs in Washington, epitomizes corporate good citizenship.

I commend as well, the WATP Foundation for its continual interest in helping the young people of the Washington area with enthusiasm and dedication.

MILTON H. WOODSIDE, JR.

HON. ROBERT LINDSAY THOMAS

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 2, 1985

Mr. THOMAS of Georgia. Mr. Speaker, for all of our concern in this Chamber with bills, amendments, and resolutions, the truth is that the Congress is about people. It is about our efforts to help the citizens of this Nation have a better life through the fulfillment of the promise of the dream that was born in America more than 200 years ago.

I want to join today with my friend and predecessor in office, the Honorable Bo Ginn, to call to the attention of the House the fact that one of the men who has helped us in the Congress in that work for some 13 years is leaving Federal service this month. His name is Milton H. Woodside, Jr., a young man whom I and thousands of others know as Woody.

Woody joined the staff of the U.S. Congress in 1973 in the service of Bo Ginn in Washington, and then assumed the duties of opening and managing his congressional office in Brunswick, GA. I had the good fortune to have Woody agree to continue to work in that office when I assumed the duties of Congressman for the First District of Georgia when Bo retired from congressional service in 1982.

On Friday of this week, Bo and I will join with many others in a special salute to Woody as he accepts the challenging new job as executive director of the Brunswick-Golden Isles Chamber of Commerce.

I have given a great deal of thought as to how I can best describe to the House the kind of contribution that Woody has made to the people of the First District, the State of Georgia, and the United States. But this is a time when words fail.

I could tell of the literally thousands of projects that Woody has worked on in our State, from the selection of Glynn County as the site for the Federl Law Enforcement Training Center, to the development of our deepwater seaport in Brunswick, to the establishment of the Kings Bay Submarine Base, to the economic growth of communities throughout the coastal area of Georgia. I could tell about the many times I have relied upon his counsel on issues of every magnitude.

But the truth is that the official record, as impressive as it is, does not tell the full story. The real story about Woody is about people. Woody has a heart as big as this country, and he has devoted his time and his talents to helping his fellow citizens. We could fill this Chamber a dozen times over with the people who have called on him, as my representative, for help of all kinds.

Whether it has been to assist a family whose child is in desperate need of health care they cannot afford, or a promising young student who needs financial aid to attend college, or an elderly citizen whose Social Security check has been lost—no matter what the problem, Woody has been there to help. His lovely wife Ellen could testify to the fact that their telephone rings at home at all hours with calls from citizens seeking his aid. And I can testify to the fact that he is immediately on the phone to me to mobilize the resources of the Congress to help a constituent.

In short, Woody is the kind of staff assistant who has been the essential link between me as Congressman and the people who I have the privilege to serve. My tribute to him is from my heart, but he can have no greater tribute than the long and honorable record of service he has given to the Congress and his fellow citizens.

Mr. Speaker, I would like to conclude my own remarks by placing into the RECORD at this point some comments which I have invited my predecessor in office, the Honorable Bo Ginn, to provide.

REMARKS OF HON. BO GINN

Milton H. Woodside, Jr., or Woody, as he is affectionately known by his countless friends, is very special to my family and I.

Woody came into our lives during my frist campaign for Congress in 1972, and he quickly became an integral part of our family. Because of his loyalty, enthusiasm and integrity, he earned our everlasting love and respect.

His dedicated service to me and my distinguished successor, Lindsay Thomas, and to the citizens of the First Congressional District, has been invaluable.

Woody joined my staff in Washington, and then he took on the job of opening my District office in Glynn County. This was an especially challenging task because Glynn County, one of the most important counties in our state, had just been included in the boundaries of the First District.

In a very short time, Woody became a welcome neighbor and partner in the growth of Glynn County. More than that, Glynn County came to realize that he is a young man of honor who takes his commitment to public service very seriously. He proved that Congress is an institution made up of people who care about this country.

As Woody leaves government service to enter the private sector, he can do so with the satisfaction that his efforts will long be remembered. The people of Glynn County and Georgia can take satisfaction in the knowledge that in his new duties with the Brunswick-Golden Isles Chamber of Commerce, he will continue to serve his community with the same high standards and dedication that have been his hallmark as a Congressional employee.

My family joins me in extending warmest thanks and personal best wishes to Woody and Ellen and to Mary Gould and Jay. I am proud to have had Woody work on my staff in the Congress, but more than that, I am proud to call him my friend.

RESETTLING REFUGEES FROM SOUTHEAST ASIA AND LATIN AMERICA

HON. CHARLES PASHAYAN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 2, 1985

Mr. PASHAYAN. Mr. Speaker, the Office of Management and Budget [OMB] is engaged in a confrontation with the Congress over the spending of funds to assist county and State governments in resettling refugees from Southeast Asia and Latin America.

Although the refugees are in the United States owing to Federal policies, some officials of the administration seem determined to reduce financial aid to the counties and States to which the refugees have migrated. But the Comptroller General has determined that the action amounts to an illegal impoundment of funds.

At issue is the funding appropriated by Congress for the Refugee and Entrant Targeted Assistance Program. Monday, a Federal judge ordered the administration to release all the funds made available by the Congress during 1985 for the program.

In what amounts to a further effort to interfere with the will of the Congress, OMB has asked the judge to clarify his order to them to provide the much-needed funding to the needy county and State governments.

Mr. Speaker, I call upon the President to direct the OMB to respond to the legislation passed by the Congress, to repsond to repeated orders from the Comptroller General, to respond to the orders of a Federal judge, to respond to the needs of county and local governments, and, most of all, to respond to the plight of innocent people who find themselves refugees in our land directly because of policies of a Federal Government that now seems unwilling to care for them.

A GREAT SALUTE

HON. WILLIAM D. FORD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 2, 1985

Mr. FORD of Michigan. Mr. Speaker, it is not by chance or happenstance that the Congress of the United States chartered the American Legion because the representatives of a grateful citizenry recognized the indispensable role our veterans have played in the rich and remarkable drama of the American experience.

As a member of the Legion myself, it is a special personal honor and distinction to join in saluting the 40th anniversary of the Garden City, MI, Post 396 of the American Legion. This post has worked diligently during the past four decades to present an exemplary model of all that is worthy in the tenants of the American Legion. It has been mindful of the trust we must all advance in caring for our veterans and their families. It has continued to advocate the best aspects of our rich tradition of service to our country in a time of peril.

Members of the Garden City Post are to be lauded for their individual contributions to the many successful projects their post has undertaken during the last 40 years. Michigan's 15th Congressional District is especially enhanced by this post of the American Legion and I know I speak for all my constituents in extending this special form of recognition on this happy and significant occasion.

NATIONAL CRIME PREVENTION WEEK

HON. FRANK J. GUARINI

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 2, 1985

Mr. GUARINI. Mr. Speaker, I am introducing legislation to call my colleagues' attention to the importance of crime prevention measures in America today. My bill would designate the week beginning with February 2, 1986 as National Crime Prevention Week.

The incidence of crime has reached epidemic proportions throughout urban and rural areas alike. Recent FBI statistics show that in America there is a murder every 28 minutes, a rape every 6 minutes, a robbery every 65 seconds, and a aggravated assult every 46 seconds. This amounts to one violent crime every 25 seconds. In the theft category there is a burglary every 11 seconds, a larceny every 5 seconds and an auto theft every 31 seconds. This amounts to one property crime every 31 seconds. The presence of crime in our country is detrimental to the general welfare of society, and many people have responded by learning how to prevent crime.

Citizens have joined with law enforcement agencies to form various crime prevention programs, including neighborhood vigilance organizations. National Crime Prevention Week would draw national attention to this united effort for combating crime. As a valuable tool in the fight for safety in our communities, neighbors have joined in groups of concerned residents committed to being aware of suspicious activities in their area. The major emphasis of this program is the quick and efficient reporting of unusual occurrences to the authorities. In this way the citizen works together with the police to stop crime.

It is our duty as elected officials to invoke the leadership entrusted to us, and focus public attention on the importance of crime prevention and citizen action. National Crime Prevention Week is a primary tool for educating a beleaguered American public on the importance of fighting crime.

People need to be aware that cooperation with each other and the police can be the most effective deterrent to the disturbing number of violent crimes and thefts. There have been too many cases of crime witnesses passively standing by as a helpless victim becomes another statistic. Fear and ignorance have kept many of America's citizens prisoners by criminals who prey upon their inaction. As more and more people learn that they can become a formidable deterrent to crime by adopting effective prevention measures, the frightening statistics which currently plague our society will diminish.

It is now time to reestablish an environment in which Americans may live and work free of the fear of crime. National Crime Prevention Week will provide the focus which law enforcement agencies, private businesses, and all citizens need to join in the fight against crime. It is our privilege to provide the people of this country with a unique forum for heightening our awareness of crime. Mr. Chairman, I respectfully urge my colleagues' support for this timely legislation.

TRIBUTE TO ELMIRA GONZALEZ

HON. ESTEBAN EDWARD TORRES

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 2, 1985

Mr. TORRES. Mr. Speaker, I would like to bring to the attention of my colleagues an individual that has worked tirelessly on behalf of the southern California business community.

Elmira Gonzalez is retiring from her position as director of minority business development for the Atlantic Richfield Co. [ARCO]. She has distinguished herself as an outstanding advocate for minority participation with corporate America.

She pioneered the notion of "Corporate Responsibility," making ARCO an example of how the minority business community and corporate America can best develop a mutually beneficial partnership.

Because of Ms. Gonzalez' commitment to serving her community, she has been the recipient of many awards and honors.

The list of Ms. Gonzalez' achievements is much too long to recount in this RECORD. I would, however, like to mention just some of her accomplishments. In 1975, she was awarded the East Los Angeles Community Union's Women's Achievement Award, in 1983 the California Association of Minority American Contractors Individual Award. Also in 1984 she earned the YMCA Business and Community Involvement Award, in 1985 the Caminos Magazine Hispanic of the Year Award for Outstanding Service in the Community, the United Hispanic College Fund Corporate Executive of the Year Award, and the National Association of Women Business Owners Individual Award.

Elmira Gonzalez leaves all of us a legacy of commitment, dedication, and accomplishments. I share the pride her husband

Bob and her two sons must feel for her work in the community and her efforts in improving business opportunities for all Americans.

I am personally grateful to Elmira Gonzalez for the oustanding job she has done at ARCO.

Mr. Speaker, I ask that my colleagues join me and Ms. Gonzalez' family in congratulating her on a job well done and wishing her an active and satisfying retirement.

ALPHA DELTA KAPPA WEEK

HON. SAM GEJDENSON

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 2, 1985

Mr. GEJDENSON. Mr. Speaker, I would like to draw my colleagues' attention to a very special international celebration of women educators to be held during the week of October 13–19. This week has been designated to honor the Alpha Delta Kappa Sorority of women educators by the sorority's international headquarters.

The goals of this international organization are to give recognition to outstanding educators, to promote a fraternal friendship among educators on a worldwide scale, to develop standards of excellence for educational and charitable projects and engage in activities which will enrich society.

My constituents in the Norwich Chapter of Alpha Delta Kappa have served the citizens of Norwich and all of eastern Connecticut for many years. The chapter's activities include enabling children to attend camp, donating books to the pediatrics ward at Backus Hospital in Norwich, providing scholarships to the Norwich free academy art classes, and remembering retired teachers in convalescent homes.

I am most pleased and proud to represent the fine women educators in Alpha Delta Kappa. I am confident that they will continue to enrich the quality of our schools and communities for years to come.

NUTRITION CONTENT SHOULD BE IMPORTANT IN GRADING OF FOOD PRODUCTS

HON. JOHN F. SEIBERLING

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 2, 1985

Mr. SEIBERLING. Mr. Speaker, today I have introduced legislation which would require that the U.S. Department of Agriculture consider the nutritional content of food products in its agricultural grading system.

Under the provisions of the Agriculture Marketing Act of 1946, the Secretary of Agriculture has developed a grading and classification system for agricultural products. Unfortunately, the grading system emphasizes the cosmetic features of food products, and totally ignores the nutritional value of foods. For example, under the current classification system, a "grade A" apple may have a perfect appearance but have very little nutritional value. Another apple may have a few blemishes on its skin, but be a much better buy for the consumer because it has a high nutritional content. I think that the American consumer wants and needs to know about the nutritional content of agricultural products. And I think we should change the current grading system so that the USDA is required to provide nutritional information to consumers.

My bill is very simple. The Agricultural Marketing Act of 1946 requires that the Secretary of Agriculture must "inspect, certify, and identify" the "class, quality, quantity and condition of agricultural products." My bill simply adds the phrase, "nutritional content" to this list. Although the act lists as one of its purposes "that dietary and nutritional standards be improved," the USDA regulations do not currently provide for the consideration of the nutritional content of food products in the USDA grading and classification system. The act also lists as one of its purposes that "consumers may be able to obtain the quality product they desire." I think that by requiring USDA to consider the nutritional value of agricultural products, the purposes of the Agricultural Marketing Act will be better served. I urge my colleagues to support this measure.

POPE HONORS "APOSTLE OF GUAM AND MARIANAS"

HON. BEN GARRIDO BLAZ

OF GUAM

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 2, 1985

Mr. BLAZ. Mr. Speaker, this Sunday, His Holiness Pope John Paul II will confer a great honor on the American Territory of Guam and the Commonwealth of the Northern Marianas. In a ceremony at St. Peter's Basilica in Vatican City, the pontiff will proclaim the Venerable Father Luis Diego de San Vitores, Blessed Diego, Apostle of the Marianas.

More than 300 faithful will attend the October 6 ceremony, including the Archbishop of Agana, the Most Rev. Felixberto C. Flores; and the Most Rev. Anthony S. Apuron, auxiliary bishop of Agana; as well as the Most Rev. Thomas Camacho, bishop of Chalan Kanoa. Archbiship John R. Quinn and Auxiliary Bishop Daniel Walsh, representing the Archdiocese of San Francisco, will attend. Also joining the delegation are the heads of Guam's three branches of government: Gov. Ricardo J. Bordallo, Speaker Carl T.C. Gutierrez, and Judge Paul J. Abbate, a deacon of the Archdiocese of Agana.

The beatification of Father San Vitores is a milestone for the people of Guam and the Marianas who have prayed and worked for many years to have this holy man canonized a saint. His beatification brings sainthood one giant step closer.

This is a tremendous honor for the United States because it recognizes the historic importance of San Vitores' work and elevates toward sainthood a man from an American community. Father San Vitores, who brought the Catholic faith to Guam and the Marianas more than 300 years ago, was martyred on April 2, 1672, while evangelizing the Marianas.

The beatification of Father San Vitores also highlights the Hispanic aspect of our history and tradition, which is woven through the fabric of our culture. Our deep religious faith and devotion as well as our novenas, rosaries, religious processions, and fiestas exemplify this heritage.

Today the Marianas are predominantly Catholic and our spiritual community is flourishing. There are two dioceses, including the Archdiocese of Agana, scores of churches and more than 100,000 faithful. Our three bishops as well as numerous priests and religious are from Guam and the Marianas.

MALDEN, MA, WILL CELBRATE ITS 100TH BIRTHDAY

HON. EDWARD J. MARKEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 2, 1985

Mr. MARKEY. Mr. Speaker, on October 18, 1985, the YMCA in my hometown, Malden, MA, will celebrate its 100th birthday. Like thousands of YMCA's in this country, the Malden Y has provided wonderful programs to people of all ages and income. Over the years the Y has offered such diverse activities as physical and health education and training, aquatic instruction, group and club activities, parent-child programs, camping, and counseling. But the Y is much more than just recreational programs. In its early history the YMCA engaged in a variety of community services, always lending its facilities and personnel to the general public. These services included visitations of the sick, distribution of coal to the poor, the clothing of destitute children, and the provision of holiday dinners to the homeless. Today, the Malden Y continues this tradition by providng day care and outreach programs to hundreds of people.

I am sure my colleagues join with me in wishing Director Robert Perry and the Y's 40 employees and volunteers a very special anniversary.

A SALUTE TO MR. NICK NICKLAS

HON. JOE KOLTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 2, 1985

Mr. KOLTER. Mr. Speaker, today I rise to salute a constituent of the Fourth District of Pennsylvania, Mr. Nick Nicklas of Aliquippa.

Since 1928, Mr. Nicklas has been a dedicated volunteer to the promotion of traffic safety. Born in 1911, Mr. Nicklas earned his living being employed by the Babcock & Wilcox Co. and the Jones & Laughlin Co., but he contributed much more to his community. I am proud to share with my colleagues his list of accomplishments, especially in traffic safety.

Appointed county traffic inspector by the Beaver County Commissioners during the years of 1936 through 1958, he was chairman of the Beaver County Better Traffic Committee since 1936, and has been special consultant to the Federal Health and Safety Council since 1945.

Director of the Beaver County Crusade for Safety since 1948, he was winner of the Alfred P. Sloan Award—radio's highest award—and winner of 11 first place awards by the National Safety Council in the radio category.

Since 1956, Mr. Nicklas has been host of "Traffic Beat" on radio stations WBVP and WPIT since 1956, and has been an executive board member of the Citizen's Advisory Committee of the Governor's Traffic Safety Council since 1973. He is also chairman of the Safety and Health Committee and Blue Ribbon Committee of Beaver County.

The achievements of Mr. Nicklas have benefited the people of Beaver County. His commitment has resulted in increased public awarenes of traffic safety, and I am honored to list the accomplishments of Mr. Nick Nicklas before the U.S. House of Representatives.

PERSONAL EXPLANATION

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 2, 1985

Mr. GILMAN. Mr. Speaker, I regret that I was unavoidably absent on Thursday evening, September 26, 1985, preventing me from casting my vote on the amendment offered by the gentleman from Wisconsin [Mr. OBEY], establishing a mandatory Supply Management Dairy Program. Had I been present I would have voted "nay" on rollcall No. 320.

MICHAEL GOLAND

HON. HOWARD L. BERMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 2, 1985

Mr. BERMAN. Mr. Speaker, I rise today to pay tribute to a truly outstanding individual, Michael Goland. I ask my colleagues to join me in honoring this exceptional member of my community. Mr. Goland will be honored for his community service at a special dinner, in October, celebrating the 20th anniversary of Israel Today and the formation of the Joshua Foundation.

An honor graduate of the University of Southern California, Michael Goland entered the self-service storage business in 1973 and has from these modest beginnings built this business into a multi-State enterprise which makes him one of the largest owner-operators of mini-warehouse facilities in the country. At the present time, Mr. Goland's mini-warehouse operations consist of 43 facilities located in California, Indiana, Texas, Colorado, and Georgia.

Throughout his career as a businessman Mr. Goland has always shown a willingness and desire to give generously of his valuable time to aid organizations or causes important to his community. While directing a thriving business he has found time to become the founder and primary benefactor of the Bayit project. He served on the Herzl School Board and the Group Services Committee of the Jewish Federation Council. In addition, Michael was a prime mover of the dramatic rescue of Ethiopian Jews from the Sudan known as Operation Joshua.

It is my pleasure and honor to join with my colleagues and Israel Today and the Joshua Foundation to pay tribute to Michael Goland, a successful businessman, humanitarian, and an invaluable resource to the community.

COURT ORDERS REFUGEE AID RELEASED TO STATES

HON. RICHARD H. LEHMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 2, 1985

Mr. LEHMAN of California. Mr. Speaker, today, U.S. District Court Judge Robert P. Aguillar signed a written order directing the Office of Management and Budget to release refugee funds illegally impounded by this administration.

The significance of this order is that it clearly refutes the interpretation by OMB of the judge's oral order on Monday of this week that the funds were not to be released to State governments. OMB had engaged in another semantic game and misinterpreted a court order, just as they have misinterpreted the will of Congress, to suit policy objectives contrary to the laws we have made. For the benefit of all interested parties, I am inserting a copy of the judge's order of today so there can be no mistake of the intent of the court that 21 States should immediately receive their rightful portion of $11.5 million in refugee aid this administration has unlawfully withheld.

United States District Court

Northern District of California

[No. C 85-20593 RPA]

TEMPORARY RESTRAINING ORDER AND ORDER TO SHOW CAUSE WHY PRELIMINARY INJUNCTION SHOULD NOT BE ISSUED

DON EDWARDS, RICHARD H. LEHMAN, SALA BURTON, HOWARD BERMAN, ROBERT T. MATSUI, VIC FAZIO, COUNTY OF SANTA CLARA, LAO FAMILY COMMUNITY, INC., BACH VIET ASSOCIATION, INC., AND TENG KHANG, ON BEHALF OF HIMSELF AND ALL OTHERS SIMILARLY SITUATED, PLAINTIFFS, *vs.* MARGARET HECKLER, AS SECRETARY OF THE UNITED STATES DEPARTMENT OF HEALTH AND HUMAN SERVICES, JAMES BAKER, AS SECRETARY OF THE UNITED STATES DEPARTMENT OF TREASURY, AND JOSEPH WRIGHT, AS ACTING DIRECTOR OF THE OFFICE OF MANAGEMENT AND BUDGET, DEFENDANTS.

Plaintiffs have moved for a temporary restraining order pursuant to Federal Rules of Civil Procedure 65. Defendants have filed a memorandum in opposition. The parties have appeared through their respective attorneys. After reading and considering the relevant papers and hearing oral arguments, the Court finds and orders as follows.

This case arises from a conflict between the legislative and executive branches of government over the interpretation of an appropriations bill. This Court finds that it has jurisdiction over this matter through the right of judicial review and further finds that all plaintiffs have standing to bring this action.

Good cause appearing therefor, the Court makes the following findings:

1. Plaintiffs have shown probable success on the merits;

2. Plaintiffs have shown possible irreparable harm;

3. Plaintiffs have shown that the balance of hardships tips decidedly in their favor.

Plaintiffs have shown probable success on the merits by establishing the intent of Congress to make available for obligation the full amount of $89,026,000. This finding is based on the following considerations:

1. the decision of the Comptroller General, dated June 28, 1985, attached to plaintiffs' Memorandum of Points and Authorities in Support of a Motion for a Temporary Restraining order and/or a Preliminary Injunction, as plaintiffs' Exhibit D;

2. the letter of the Comptroller General, dated Septembet 26, 1985, attached as plaintiffs' Exhibit H;

3. the letter from Secretary Heckler to Congressman Edwards, dated July 26, 1985, attached as plaintifs' Exhibit F; and,

4. an examination of the legislative history of the appropriations statute, Fiscal Year 1985 Continuing Resolution.

The plaintiffs have shown irreparable harm because of the lack of any alternate remedy at this late date for any person to enforce the Continuing Resolution. Congress' powers, pursuant to 2 U.S.C. § 683, have been nullified because the fiscal year will end prior to the expiration of the statutory period set forth in § 683, and the disputed funds will revert to the General Fund of the U.S. Treasury. Similarly, the Comptroller General cannot seek the relief authorized by 2 U.S.C. § 687 because the disputed funds will revert to the General Fund of the U.S. Treasury at the end of the fiscal year, prior to the expiration of the statutory period set forth in § 687. Finally, individual plaintiffs will be injured as a result of the unavailability of funds and will be

unable to receive the employment training mandated by the Refugee Targeted Assistance Program.

The plaintiffs have shown that the balance of hardships tips decidedly in their favor. There is a lack of any other available remedies, and the funds are necessary to effectuate the legislative intent of the Continuing Resolution to assist the absorption of the continuing influx of refugees in the United States.

It is therefore ordered that defendants are hereby enjoined to make available for obligation the full sums ($89,026,000) appropriated by Congress for the Refugee Targeted Resistance Program in Fiscal Year 1985.

It is further ordered that defendants shall take all steps necessary to ensure that the full sums ($89,026,000) appropriated by Congress for the Refugee Targeted Assistance Program in Fiscal Year 1985 are released forthwith and do not revert to the General Fund of the U.S. Treasury at the end of the Fiscal Year 1985.

It is further ordered that defendants are hereby enjoined to obligate and disburse immediately the full sums ($89,026,000) appropriated by Congress for the Refugee Targeted Assistance Program in Fiscal Year 1985 to the recipient/grantee states and/or state agencies, in accordance with 45 C.F.R. §§ 400.4 anf 400.5 and the Refugee Targeted Assistance Program.

It is further ordered that defendants and each of them appear before this Court on October 25, 1985, at 9:00 a.m., or as soon thereafter as the matter can be heard, in Courtroom 1, before the Honorable Robert P. Aguilar, United States District Judge and show cause then and there why a preliminary injunction should not issue in the form and with the terms contained in this Temporary Restraining Order.

A true copy of this Temporary Restraining Order shall immediately be served upon defendants by serving their counsel. Defendants shall personally serve upon counsel for plaintiffs all papers in opposition to this Order to Show Cause no later than 10:00 a.m. on October 11, 1985. Plaintiff shall personally serve upon counsel for defendants any papers in reply to defendants' opposition no later than 10:00 a.m. on October 18, 1985.

This Temporary Restraining Order shall remain in full force and effect through October 25, 1985, pursuant to the consent of all parties, or until further order of this Court, after which time it shall be void in accordance with Rule 65 of the Federal Rules of Civil Procedure.

It is so ordered.

Dated: October 2, 1985.

ROBERT P. AGUILAR,
United States District Judge.

A PROPER ROLE FOR GOVERNMENT IN AGRICULTURE

HON. TIMOTHY E. WIRTH

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 2, 1985

Mr. WIRTH. Mr. Speaker, as we debate the farm bill, our colleagues will gain important perspective from the following comments drafted by Dr. John R. Stulp, Jr., of Lamar, CO.

In this clear and thoughtful presentation, John argues with feeling for strong Federal action to help stabilize this vital sector of our economy and society.

I commend this short but forceful piece to my colleagues:

A PROPER ROLE FOR GOVERNMENT IN AGRICULTURE

Agriculture is in trouble! The changes that occur in agriculture in the next few years will not only change agriculture as we know it today but the repercussions on how these changes come about will have effects throughout this nation and around the world.

Everyone thinks he "knows" something about agriculture, and this is a part of the problem. Just because grandpa had a farm doesn't mean a person is as knowledgeable as he may think. Agriculture is a highly-capitalized, high-risk, quickly changing, unique facet in our economy.

Excessive surpluses are often cited as the reason for low prices. Often the cause of surpluses is the low price? As prices decrease, the only way an adequate cash flow can be generated is to produce more of the low-priced commodity. Lower commodity prices will lower production only when enough producers go broke.

Past farm programs are quickly faulted as the cause. Nonsense. The *administration* of past programs is where the fault lies. Past administrations, Democratic and Republican, have usually administered farm programs at minimal levels.

Farmers have usually outfigured the experts at USDA and participated in programs only when production problems or low market prices caused farm programs to look attractive enough to participate in.

It seems the actions of this and previous administrations have been aimed at causing farm programs to be ineffective, misunderstood, and designed to fail.

Beware of those who gallantly say "Agriculture would be better off if the Government would get completely out." *There is a proper role of government that we must obtain.* Any civilized government that neglects a proper role in agriculture is doomed to failure. People who are hungry do not respond to any form of govenrment.

So, like it or not, govenment has been and always will be involved in agriculture. The present administration only seeks to remove itself from the financial responsibility of agriculture.

Without financial responsibility in agriculture, the government would be free to use agricultural products as its pleases in embargoes, trade wars, etc.

The crisis in agriculture is immediate—it is already too late for some. Most agriculture producers who depend on production agriculture are losing equity and their debt will only increase. A significant percentage of the production base of this country is in financial trouble. The Farm Credit System is now admitting major financial problems and requesting outside assistance.

What is the solution? *Money*—money infused into agriculture in the form of profitable prices for agricultural products.

More credit—not unless it is accompanied by a means of repaying that credit. We cannot borrow ourselves out of debt! Only with profitable values for production can credit be repaid.

Lower interest rates—this would help very much, but even 1% interest rates won't bale agriculture out if the ability to repay principal and interest is not returned to the producer in the value received for his product!

The free market—this is a mystical term that unknowing, misinformed, well meaning politicians like to throw up as the solution to the financial problem of agriculture. Where do you find the profit to retire debt in free market prices that compete with the treasuries of the European Common Market, Australian and Canadian Grain Boards or the Government of Argentina?

How can American producers compete on a free market basis when by laws they are regulated on their cost of production for such inputs as minimum wages, Workmen's Compensation Insurance, OSHA regulations, EPA regulations, FDA regulations, IRS imputed interest rates, and on and on.

Are the Americans on the assembly lines that manufacture the tractors, trucks, and implements that agriculture uses willing to reduce their salaries and standard of living to the point that American farmers can compete in this world free market?

There are several methods of infusing money into agriculture and responsible government programs will have to be a part of any solution. Past government programs have been very successful when measured by the percentage of income Americans pay for the food they eat. American spend less of their incomes for food than any country on earth.

By doubling the price of wheat the producer receives, the housewife purchasing a loaf would only have to pay 3 to 4 cents more!

Subsidy programs, direct payment programs, land retirement incentives, minimum price legislation, mandatory programs, loan programs, export credit programs, etc. all have some merit. A combination of these and other programs can put the necessary profits back into agriculture. But it will take more than sympathy; it will take action on the part of responsible elected representatives that will put some profit and money back into agriculture now—not in 3 or 4 years but now—the sooner the better.

USHER'S CLUB OF ELLWOOD CITY

HON. JOE KOLTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 2, 1985

Mr. KOLTER. Mr. Speaker, today I rise to pay tribute to the Usher's Club of Ellwood City, PA.

The Usher's Club, a youth organization of Lincoln High School, in recognition of its many accomplishments and service to the community, has been awarded the International Youth Year Award from the U.S. Secretary of Education. The club was nominated for the award by Assistant Principal George Reese. Jeff Prokovich, last year's president, was presented with the award on Thursday, September 26. With your permission Mr. Speaker, I would like to take this opportunity to share with my colleagues some information about the Usher's Club.

The Usher's Club was formed 14 years ago by Mr. Donald Hollerman, the current club sponsor and teacher at the high school, because he saw the need for a service organization in the school. The club has since been dedicated to school and community involvement. The club includes a co-ed

membership of 76 students—civic-minded student leaders who enjoy responsibility.

The organization logged over 2,580 hours of community and school service and donated over $2,118 to worthy causes, including a donation to a family who lost their home in a fire. The projects that the Usher's Club have taken on include ushering at events held in the high school auditorium, operating concession stands at football games, holding March of Dimes canister drives, and setting up American Red Cross blood bank donating centers.

Through their hard work and perserverance the Usher's Club has demonstrated its dedication to the values of charitableness and civic responsibility. This organization is certainly an exemplary model and inspiration for today's youth. It is surely an honor to inform and acknowledge the accomplishments of such an admirable constituent group as the Usher's Club of my district, before the U.S. House of Representatives.

Thank you.

FEDERAL EMPLOYEES' BENEFITS IMPROVEMENT ACT OF 1985

HON. FRANK R. WOLF

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 2, 1985

Mr. WOLF. Mr. Speaker, I rise in support of the legislation offered by the gentlelady from Ohio. As an original sponsor of this initiative allowing retirees from the Federal Government and former spouses of Government employees to participate in an announced health benefit rebate program, I want to recognize and commend my colleague's diligence and work on this bill. I also want to commend the work of the subcommittee's staff director, Jerry Klepner, for his work on this important bill.

Earlier this summer, Blue Cross and Blue Shield announced its plans to provide a rebate to its Federal subscribers. Through a technical oversight in the drafting of the statute, only active employees are now eligible for this planning refund. I introduced H.R. 3031 which was designed to correct this oversight.

In evaluating this issue and the best course of action to take to correct this matter, the professional staff of the House Post Office and Civil Service Committee identified several areas of weakness in the Federal Employee Health Benefits Program [FEHBP] which also needed attention to ensure the efficient and equitable implementation of the rebate program.

Several amendments to my original bill have been made and I am in general support of recognizing the need for a mandatory open season annually, a statement of support for mental health benefit coverage and providing benefits for underserved health areas. I believe this bill represents a well-balanced approach to some necessary reforms in the health benefit system for Federal employees and I urge my colleagues' support of H.R. 3384.

WHAT E.B. WHITE HAD TO SAY

HON. JOHN R. McKERNAN, JR.

OF MAINE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 2, 1985

Mr. McKERNAN. Mr. Speaker, E.B. White, distinguished author and essayist, noted editor and storyteller, died yesterday morning at his home in North Brooklin, ME.

It is with great sadness that I note his passing, for there have been few individuals whose eloquence and gift for writing matched E.B. White's.

I ask that the following column from the Washington Post, written by Mr. James Russell Wiggins, a former editor of the Post and now publisher of the Ellsworth American (Maine), be printed in the RECORD. As Mr. Wiggins notes, those of us in this Chamber, our children, and our children's children, will still have the benefit of what E.B. White had to say.

WHAT E.B. WHITE HAD TO SAY

(By James Russell Wiggins)

ELLSWORTH, ME.—E.B. (Andy) White, who died Tuesday morning at his home in North Brooklin, was a many-sided man who cherished the companionship of neighboring farmers, fishermen, carpenters and craftsmen and that of scholars and statesmen. He was one of America's foremost essayists, the distinguished editor of The New Yorker and author of many books.

Some of the secrets of his writing success can be found in "The Elements of Style," on which he and William Strunk collaborated. The first edition of that book ran to 2 million copies, and there have been many subsequent editions. That single work has made a great contribution to the written word, but it did not disclose the real secret of his great success as a writer. The secret of his writing—whether it was in "Charlotte's Web" or in his commentaries on national and foreign affairs—was that he had something to say, and that he had an urge to say it.

In a conversation in the last few weeks of his life he said, sorrowfully, "I have so much to tell and so little time to tell it."

He left in his published works a veritable monument to his industrious response to the impulse to write. He had something to say—something he felt his fellow man ought to hear, and he was committed to saying it with the utmost care, with precision, with accuracy and so devised as to achieve the exact effect for which he was striving. His conversation like his writing was filled with wisdom, wit and humor. He viewed life seriously but delighted in its lighter side. He loved the association with good friends and old companions. He was curiously shy and retiring, refusing all manner of invitations to public appearances (even, or perhaps especially, those devised to honor him). He shrunk from interviews to which he seldom consented.

A notable aspect of his writing and thinking was in his individuality and orginality. He fit no mold. Many American intellectuals have strongly disliked big cities. He wrote about them with great perception and genuine affection. At the same time, he loved rural life delighting in the behavior of domestic farm animals and wild creatures, intrigued by his bantam chickens, his Wyandotte laying hens, geese, sheep and dogs. He brought his two natures together in the portraits of Brooklin village life he wrote for The New Yorker.

He will be greatly missed by the people of this community, among whom he has lived for many years, and by many in the wider world beyond it about which and for which he has written; but fortunately he has left much of himself in the books, essays, editorials and poems that will continue to delight his readers, young and old, throughout the land.

CONGRATULATIONS TO BARBARA EASTERLING

HON. EDWARD F. FEIGHAN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 2, 1985

Mr. FEIGHAN. Mr. Speaker, I would like to take this opportunity to congratulate Barbara Easterling, a northeastern Ohio native, on her election as executive vice president of the Communications Workers of America. Ms. Easterling's election to the union's executive board makes her the first woman in America to win a national elected position in a major trade union. Her rise to this position is based on years of dedication, enthusiasm, and commitment, working her way up through the union ranks. Her election is an example of a trade unionist who marshaled her qualities and abilities to rise to the top.

Barbara Easterling has been a union leader and a community activist for over three decades. She served for many years as a shop steward, vice president, and acting president of CWA Local 4302 in Akron, OH, and joined the union's staff as a CWA representative in Ohio and Michigan. In 1974, she became the first woman elected to the board of the Ohio AFL-CIO. Currently, she is serving her third term as vice president of the State federation.

In addition, Ms. Easterling served on advisory committees to the University of Akron and the Akron Public Schools System, and was the labor chair of the United Fund drive. Today, she also serves as an alternate on the national executive board of the Coalition on Labor Union Women.

Her service to the CWA was interrupted for a time while she served as labor division chief in the Ohio Department of Labor under Gov. John Gilligan. There, she helped to write landmark labor legislation and secured over $100,000 in back pay for wages illegally withheld from minors.

Barbara Easterling's commitment to service, and her willingess to tackle tough jobs, have made a major contribution to the CWA and the working people of northeast Ohio. On behalf of all her friends in the Greater Cleveland area and throughout northeast Ohio, I am happy to congratulate her on her election and to wish her well in the years ahead.

THE WORKMEN'S CIRCLE

HON. BILL GREEN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 2, 1985

Mr. GREEN. Mr. Speaker, 85 years ago, in my district, which encompasses the Lower East Side, a group of Jewish immigrants, workers in the sweatshops, imbued with a social conscience and with the pioneering spirit of their new homeland, formed a unique fraternal order: the Workmen's Circle. It was a self-help organization in the truest sense but with innovations. Although the members came from many Eastern European lands which had known oppression from which they had fled, their common bond was the Yiddish language. A fledgling newspaper, the Jewish Daily Forward, became their conduit. And the International Ladies' Garment Workers' Union and the United Hebrew Trades, born at the same time, became their connection to the American trade union movement. Within a short period of time they created their own medical centers, built a sanitorium in Liberty, NY, because tuberculosis was then rampant in the sweatshops and built labor lyceums which became havens for Jewish cultural pursuits and where a network of secular Yiddish-language schools was born that soon extended across the Nation. The Workmen's Circle has been in the forefront of the antitotalitarian movement fighting communistic erosion of the democratic institutions and was the spearhead of the drive against Hitler when its leadership in 1933 sparked the anti-Nazi boycott movement. Together with its allies in the trade union movement in those years it created the Jewish Labor Committee to rescue Jewish and non-Jewish labor leaders from the threat of rising nazism. Historians will find that the Workmen's Circle leadership, true to its pioneering heritage, was among the first to spotlight the plight of Soviet Jewry just as it had been the first to spotlight the beginnings of the Holocaust when few, even then, refused to believe its predictable disaster.

On Sunday afternoon, October 13, at town hall, Mayor Edward I. Koch will lead the tributes at the 85th Anniversary Jubilee of the Workmen's Circle. I want to add my own tribute to that of President Reagan, ILGWU President Sol "Chick" Chaikin, among others, for this trail-blazing, innovative, Jewish labor-fraternal-cultural order, which has not only served its own family members but has continued to serve communities throughout the United States. Its objectives are another indication of how Jewish immigrants have contributed and, through their children and grandchildren who have picked up the torch continue to thank, not just serve, the American community for its opportunities.

I am privileged to also give you the text here of President Reagan's letter of greeting to them on their 85th anniversary:

THE WHITE HOUSE,
Washington, July 12, 1985.

I am pleased to have this opportunity to extend warmest greetings and congratulations to the members of the Workmen's Circle and all others who join you in celebrating the 85th anniversary of your esteemed organization.

Throughout this century the Workmen's Circle and its members have represented and promoted the finest values of our Republic. Your organization has had a great and positive influence on many throughout the nation. I know firsthand of your commitment to the working man and to the traditions of your ancient faith and culture. Yours is the spirit of tolerance and democracy that has made our people a model for others. Because of your example, I have every confidence that our country and its ideals will continue to flourish and grow.

Nancy joins me in sending our best wishes for your anniversary celebrations and for the future of the Workmen's Circle, a great American institution.

RONALD REAGAN.

NEBRASKA'S EXCELLENT SCHOOLS

HON. DOUG BEREUTER

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 2, 1985

Mr. BEREUTER. Mr. Speaker, most of the news coming from Nebraska these days is dominated by gloomy stories of a troubled farm economy. This Member, therefore, is honored and proud to extend congratulatons to three genuine success stories in the first district of Nebraska—the recipients of the Excellence in Education Awards, Tri-County School of the DeWitt Nebraska area, Norris Middle School of the Firsh Nebraska area and Norfolk Senior High School in Norfolk.

The Department of Education examined public schools across the country with a discerning eye, looking for clear academic goals, opportunities for meaningful student participation, teacher leadership and rewards and incentives for teachers, administrative leadership, and community involvement and support, among other criteria. The Department analyzed student performance on standard achievement tests and minimum competency tests; numbers of students going on to post-secondary schools, military service, or permanent, full-time jobs; and student success and school awards in academic and vocational competitions. Through this rigorous process, the Nation's outstanding schools were identified, and 270 of them were awarded the Department of Education's highest accolade.

In any time, this Member would extend congratulations to these outstanding institutions. But the success of these schools, located in the heart of the agricultural crisis, tells us much about the students, teachers, administrators, and parents in these communities. These successful schools suggest that determination, optimism, and the will to prevail and grow still characterizes rural America. If one views the school as a microcosm of society, much can be learned about the spiritual health and values of rural Nebraska. While we currently agonize about the future of Federal farm programs and debate their fine points on the House floor, let us also celebrate the excellence and hope that successful schools in involved communities do represent.

HARP EXEMPLIFIES MUNICIPAL EXCELLENCE

HON. DEAN A. GALLO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 2, 1985

Mr. GALLO. Mr. Speaker, local governments are the backbone of our American system, operating closest to the people and providing government services of greatest importance to the people.

As a former local elected official myself, I know the challenges faced by those men and women who make local government their careers—municipal managers.

Working with mayors and members of town councils or committees, managers must coordinate a hundred projects at one time, understanding the needs of the community and the wishes of the elected officials who employ that person.

It can be a very thankless job, but for a skilled municipal manager the rewards of accomplishment can be great.

For almost 29 years, Livingston Township in Essex County, NJ, has been blessed with the services of just such a township manager.

Robert H. Harp came to Livingston from North Adams, MA, in January 1957. At age 35, Bob already had extensive experience in municipal government, having served as assistant manager in Yonkers, NY, before going to North Adams.

Now, as he prepares for a well-earned retirement, Bob can look back on a long list of major accomplishments achieved by the township of Livingston during his watch.

Bob's length of service in Livingston makes him the longest continually serving municipal manager in the State. He has served faithfully under Republican and Democratic administrations.

As a major force behind the process of rational municipal planning in Livingston, Bob can be proud of Livingston's record as a community that has been consistent in its commitment to rational growth and development.

Bob has taken part in a process of development for Livingston that has allowed that community to meet the challenges of growth through rational development.

Livingston has a fine system of parks and recreational facilities.

Livingston has an up-to-date water distribution system and a strong commitment to water pollution control.

Livingston's modern municipal facilities include a townhall and police station, a new fire house and additions to two other fire houses, and a new library, all devel-

oped during Bob's time of service as township manager.

Bob has encouraged a new generation of young people who have chosen a career in public administration through internships and his private efforts to develop scholarship programs.

In 1981, Bob was recognized by his colleagues, receiving the excellence in public management award from the New Jersey Municipal Management Association.

We wish Bob all of the best, and congratulate him for giving all of his best to the township of Livingston.

THE 11TH ANNUAL CHRISTOPHER COLUMBUS DINNER

HON. JOE KOLTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 2, 1985

Mr. KOLTER. Mr. Speaker, I want to bring to the attention of my colleagues in the House of Representatives the 11th Annual Christopher Columbus Dinner at the New Englander in New Castle, PA.

This forthcoming event is on October 13, 1985, and will be celebrated with much honor and thanksgiving. The purpose of the dinner is to honor Christopher Columbus as well as the mothers, fathers, and grandparents who came to the United States from Italy. Their sacrifice has made it possible for children to have a better life.

I would like to commend Pete "Figo" Carvella, the chairman, and the rest of the Columbus Day Committee for their efforts and dedication in putting on such a great event. Much of the money raised at the dinner will be used to help local charities. The Columbus Day Committee's activities make New Castle, and our Nation, a better place to live.

NEW TECHNOLOGY TO END TOXIC WASTE

HON. JAMES J. FLORIO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 2, 1985

Mr. FLORIO. Mr. Speaker, last week the Senate passed Superfund legislation to renew the effort begun 5 years ago to rid our Nation of toxic wastes. While I have several reservations about the Senate bill, I congratulate its recognition of a new direction in toxic waste cleanup. For the first time, the Superfund will offer opportunities for new and innovative technologies to be tested and proven for use of Superfund sites.

I am proud that we in the House of Representatives have taken the lead in charting this new course. My friend and colleague, Representative ROBERT G. TORRICELLI of New Jersey, introduced legislation to require the EPA to demonstrate new technologies. In an article that appeared in the Wall Street Journal on September 26, Mr. TORRICELLI makes a strong case for this legislation, and I would like to share it with my colleagues.

LET'S DESTROY TOXIC WASTE, NOT JUST MOVE IT AROUND

(By Robert G. Torricelli)

Five years ago, Congress approved the superfund program in order to rid our nation of toxic wastes. An expanded $7.5 billion Superfund program scheduled for final Senate approval today recognizes the limits of that original effort. The unfortunate truth is that America's 20,000 toxic-waste sites are not being cleaned up. Hazardous dumps have merely been moved from one location to another, often creating new toxic sites in the process.

The Superfund program promotes the storage of contaminated materials, not their permanent destruction. Despite the great intentions and accomplishments of the program, the result has been a lethal shell game that threatens to indefinitely prolong America's toxic legacy.

The Office of Technology Assessment recently reported that as many as one-half of the storage facilities currently under construction could themselves become Superfund dump sites in the near future. Some 87% of the repositories now in use are in danger of leaking their toxic contents into the environment. If the Superfund program continues unchanged, the government will squander millions in federal dollars on the same sites every decade and leave our children with a life-threatening inheritance.

America does have an alternative: the development and implementation of innovative technologies to safely and permanently destroy toxic waste. The same profit motive that led some to create these hazardous materials is today leading many entrepreneurs into a billion-dollar market for their destruction. Meeting this challenge, however, requires a new partnership between government and private industry.

Numerous alternative clean-up technologies have already been developed. The Office of Technology Assessment cited 26 systems or products that could effectively and permanently destroy toxic sites. Some alternatives include:

Chemical Detoxification—Rather than resorting to underground storage, chemical treatments can break down toxins into less-toxic or even nontoxic compounds. Some of these new compounds can be safely used in industry.

Biodegradation—Natural and synthetic bacteria can be applied to contaminated soil or water and actually ingest the toxic chemicals. Biological treatment of waste water has already proved to be effective and tests have shown that such organisms can destroy certain toxic wastes.

Encapsulation—A synthetic compound chemically bonds with and physically encapsulates both organic and inorganic toxic chemicals. Polluted soil or water is converted into an inert state, surpassing toxicity standards set by the Enviromental Protection Agency. This process has been used successfully in Japan for more than 15 years in decontaminating rivers, lakes and industrial sites.

Supercritical Water Oxidation—This process neutralizes organic wastes into nontoxic substances such as water, salt and carbon dioxide. Oxidation has proved to be 99.99% efficient in destroying a wide range of environmental hazards such as PCBs and dioxin.

Tragically, the full development and implementation of these and other emerging toxic treatments in the U.S. has been hindred by bureaucratic indifference and shortsighted planning. Despite the serious interest of private industry in finding a final solution, the federal government has failed to provide the incentives and means to test and apply new techniques. As Joel Hirschhorn of the Office of Technology Assessment told the House Science and Technology Committee earlier this year: "EPA has [made] a very small effort to evaluate and approve new technologies. It does not develop the methodology to evaluate new technologies . . . and it simply really does not go out of its way to help companies with new technologies prove their effectiveness."

Measured in only annual terms, storage will always seem to be less expensive than the destruction of toxic waste. But the time has come for us to realize that the long-term expense and growing hazard of constantly shuffling toxic storage sites poses monumental costs, both to the federal budget and human health. Reclaiming America's neighborhoods and workplaces requires a bold shift in national policy.

An amendment by Sen. Daniel P. Moynihan (D., N.Y.) to the Superfund bill being voted on today would order the EPA to offer samples of Superfund site materials to companies developing alternative technologies, begin 10 pilot demonstration projects, and provide clear guidelines for testing, demonstrating and licensing new clean-up systems. I am offering an identical amendment in the House. Without these measures, companies willing to help clean up our environment may soon give up their efforts.

The dangers of toxic pollution are not confined to the U.S. What is unique about the American problem is our near-total reliance on storage rather than on destruction as a remedy.

Japan and some European nations have made great strides in the use of new technologies, including some from the U.S. In the 1960's, Japan was the most polluted nation in the world. Its hazardous-waste crisis far exceeded America's. Government initiative and private imagination produced a cleaner environment by creating alternatives to toxic storage.

In adopting the original Superfund program, Congress first recognized the vast danger of our hazardous-waste problem. Now we must use all the means at hand to end the problem of toxic wastes, and not just transfer it to our children.

RETIREMENT LUNCHEON HONORING JOSEPH J. SQUILLACE

HON. ROBERT G. TORRICELLI

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 2, 1985

Mr. TORRICELLI. Mr. Speaker, I rise today to honor Joseph J. Squillace, who has recently retired as city manager of the city of Hackensack. Joe Squillace and Hackensack are synonomous.

Mr. Squillace's career in the city began as a health officer in 1948. He advanced from that position to deputy city manager and then to city manager on October 5, 1964. He has held that position in Hackensack for 20 years.

Mr. Squillace served in the military in the 1940's and was a most distinguished soldier. He came back to Hackensack, and

with his lovely wife, Eleanor, raised their two sons, John and Ronald. He has been active in many organizations, but most especially the Rotary, the Boy Scouts of America, and serves as director of the board of the Hackensack Medical Center.

Joe has been a moving force in the growth and development of the city and his considerable talents as city manager are known throughout our State.

I am pleased to have this opportunity to wish him success in his future endeavors and thank him for his dedication to our city. I thus rise to honor him today.

INNOVATION IN THE BEEF INDUSTRY

HON. TIMOTHY E. WIRTH

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 2, 1985

Mr. WIRTH. Mr. Speaker, the importance of the beef industry in America is well known. In a long, innovative, and often romantic history, the industry has faced and overcome innumerable challenges.

And innovation still characterizes the industry, as reflected in the following article about Monfort of Colorado. I commend this piece to my colleagues, especially in this time when the farm bill is before both Chambers of Congress.

The article follows:

[From the Rocky Mountain News, Sept. 29, 1985]

BEEF PRODUCTS WITH SEX APPEAL

(By Thomas Schilling)

GREELEY.—Researchers at Monfort of Colorado Inc.'s headquarters here are searching for beef products with sex appeal in preparation for the company's first foray into the nation's supermarkets.

The company wants to find more stable sources of profits after spending 20 years buying, feeding and butchering cattle, then selling their carcasses to beef wholesalers—a business that garnered $1.5 billion in sales and $15 million in profits last year.

At its $12 million, processing plant in Hastings, Neb., the company is using state-of-the-art equipment to prepare deli meats and, eventually, such frozen entrees as sauerbraten, medallions of tenderloin in Burgundy sauce and fajitas.

During an era when beef and red meat are depicted as unhealthful, Monfort of Colorado's entry into the consumer markets gives the stagnated beef industry a new weapon in its battle against the more aggressive poultry producers.

Besides squaring off with chicken nuggets and turkey patties, Monfort of Colorado—a company with no mass-marketing expertise—will be competing against such giants as the Campbell Soup Co. and Oscar Meyer.

"We have always thought of ourselves as a commodity company, sort of like an auto plant in reverse," said Kenneth Monfort, president and chief executive officer. "But we think there is an opportunity in these new products."

The new products—which eventually will account for up to 10 percent of Monfort of Colorado's income—will offer a more stable source of profits, less sensitive to the swings of the commodity markets than the carcass business that the company has relied upon for so long, Monfort said.

"There is more profit in processing the products," said Glenn Schmidt, a Colorado State University agriculture professor who is advising the company's researchers.

But it's a big step for a company that's never mass marketed a product and has little identity among consumers. Packages of the new Monfort Gold deli meats are in area supermarkets, some grocers said.

But consumer attitudes toward meat complicate Monfort of Colorado's effort. Research indicating that fatty foods such as red meat may cause cancer and other health problems has driven many consumers away from beef and to poultry.

Monfort makes no secret of his skepticism. "Will we go into this in a big way? I don't know," he said. "Part of it is getting me emotionally ready to do some of the things."

Despite Monfort's pessimism, his company is being hailed in the beef industry for taking a few tentative steps toward offering consumers new beef products.

Beef producers have been somewhat slow in adjusting to consumer trends, and some analysts believe that's reflected in the declining beef consumption. From a high of 99.5 pounds per person in 1977, consumption declined to 77.4 pounds last year.

"They have been selling the same cuts—steaks and roasts—for years," said Roger Berglund, spokesman for the National Cattlemen's Association.

Most consumers are looking for foods that can be prepared quickly, usually within 30 minutes, Schmidt said. That convenience is lacking in many traditional beef cuts. A chuck roast, for example, may take several hours to cook, Berglund said.

"The consuming public is changing," said Schmidt, "and prepared cooked products fit into those changes."

So far, it's been the new poultry products that have captured the consumer's imagination.

While beef declined, poultry consumption rose from 53.2 pounds per person in 1978 to 65.6 pounds last year—an increase of 25 percent.

Much of that success can be attributed to innovative products such as chicken and turkey patties, nuggets, delicatessen items and a growing number of frozen entrees. Beef can use the same techniques to increase its sales, say analysts.

"I do think that to be competitive, they have got to come up with some convenience-oriented products," said Mikki Dorsey, editor of the Lempert Report, a food marketing journal. "And they can do it—just look at what the frankfurter industry did by putting stuffings like cheese or chili inside the frankfurters. Their sales were way down, and it helped bring them back."

Monfort and others in the beef industry are defensive about their products, claiming that all of the beef produced is sold, despite turkey patties.

However, beef prices are far lower than they were a decade ago and Monfort of Colorado's researchers and marketers see the chicken nuggets, turkey patties and their ilk as the enemy.

"We're trying to compete with poultry," said Rhonda Miller, director of research and development. "We're trying to get dollars back from chicken and turkey."

Monfort of Colorado's first foray into the consumer market has been in deli markets, offering 12-ounce packages of such precooked products as corned-beef brisket, roast beef and pastrami. The company already had been selling beef products to supermarkets for deli counters and had supplied individual steaks and other beef and lamb cuts to restaurants for many years.

The initial response to Monfort's prepackaged meats has been restrained except in upper-income, white-collar neighborhoods, say grocers and the company's marketers. But if the products are properly marketed, they say, they will sell well.

"We think it will be a slow sales builder, but it's definitely a product whose time has come," said Jeffery Stroh, a spokesman for Safeway, which has offered Monfort Gold in its Denver-area stores since midsummer.

"The products look real promising," agreed Jan Loutzenhiser, vice president of manufacturing and distribution for King Scoopers, which already sells Monfort Gold corned beef and will begin offering more products this week.

But research at Monfort of Colorado doesn't stop at the deli counter. A list of potential products on the desk of Robert Parris, vice president of sales, includes 21 new entrees ranging from common plates such as roasted prime rib to exotic offering such as seared lamb-kabobs.

"We have some ideas for some more exotic offerings," said Parris. "They have a lot of sex appeal."

But in the eyes of some hardcore beef-and-potato fans, one of Miller's projects may have gone too far when it employed a seaweed extract to enhance a beef classic—the steak.

The company used the seaweed byproduct as a gel to hold together shredded beef molded into a steak as part of the effort to make beef products more visually appealing, Miller said. Because the seaweed extract binds the meat together without being frozen, it allow, the steak to display a fresh, red color when placed in supermarket meat counters, said Miller.

The seaweed steak still is in the research stage, she said.

Monfort has his reasons for being skeptical about his company's entrance into the consumer arena. The company has no consumer marketing experience, its name is not well-known by shoppers and it faces stiff competition from Campbell Soup Co., Armour Foods and Oscar Meyer, all of which are developing beef products.

"I think the market is ripe—but there will still be product failures," agreed Schmidt. "You have to enter this business carefully."

Although he controls one of the nation's largest beef empires, Monfort remembers the bad times in 1980 when the company suffered a $23 million loss. He intends to move carefully into a market that appears profitable but is filled with risk.

"In 1980, our company got into serious financial trouble," said Monfort. "I will be carefully now not to do things that we can't afford to do."

KILDEE PAYS TRIBUTE TO MR. AND MRS. HENRY KRAUS

HON. DALE E. KILDEE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 2, 1985

Mr. KILDEE. Mr. Speaker, I would like to bring to the attention of my colleagues and the Nation a recognition ceremony

that will be held Tuesday, October 8, in Flint, MI, honoring Mr. and Mrs. Henry Kraus. Mr. Kraus is the only participant in the Flint Sitdown Strike of 1936–37 to chronicle one of the most pivotal labor disputes in American history. "The Many and the Few" recounts this dramatic story. Mrs. Kraus played a key role as well during the strike as one of the chief organizers of workers, especially women. Mr. and Mrs. Kraus were major contributors in helping to forge the early foundation of the UAW.

Mr. Speaker, the foundation which Mr. and Mrs. Kraus helped lay in 1936–37 resulted in the formation of a solid UAW organization. The UAW has been a stabilizing force in our national economy and a bulwark of our democratic society. The gains that the UAW has been able to achieve have brought benefits, direct and indirect, to the public as a whole. Over the past 50 years, the UAW has played an important role in the elevation of the American standard of living. The benefits which the UAW negotiated for workers are now widespread in the economy and enjoyed by millions of their fellow citizens. It is often not remembered that many benefits we now take for granted never existed on any meaningful scale until the UAW, fellow unions, and labor's supporters in legislative halls, won them for working people.

Mr. and Mrs. Kraus are the embodiment of the UAW heritage. I am honored to have had an opportunity to know this couple who have so greatly distinguished themselves through helping others.

ROY GOODMAN

HON. BILL GREEN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 2, 1985

Mr. GREEN. Mr. Speaker, tonight hundreds of New Yorkers of all political persuasions will join State Senator Roy M. Goodman to celebrate his 20 years of continuous public service.

The tribute to Senator Goodman has been well earned, for his 20 years have been of great benefit to New York State and New York City. Senator Goodman's leadership, as chairman of the City Charter Revision Commission, gave New York City a new charter which greatly increased the access of the ordinary citizen to the political process. For his role in Albany he has been described as "the statesman of the State senate." Earlier, as city finance administrator, he modernized the city's archaic tax collection processes. As Republican county chairman he has been an outstanding party leader, and I can personally testify how much that has meant to my campaigns.

While my official duties here in Washington will keep me from joining the senator in New York this evening, I do want to join his many admirers in wishing him many more years of productive public service.

THE 100TH ANNIVERSARY OF ST. FRANCIS CHURCH PARISH

HON. DOUGLAS APPLEGATE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 2, 1985

Mr. APPLEGATE. Mr. Speaker, I rise today to inform the House of Representatives of a significant event in my congressional district now ongoing; 1985 marks the 100th anniversary of the St. Francis Church parish in Toronto, OH. The milestone is being commemorated during this week, from September 29 until October 6, 1985.

As in most communities, churches often serves as the centerpiece of activity and this was certainly the case in the beginning days of St. Francis parish. When this area was still known as Sloan's Station, St. Francis was a mission belonging to the Columbus, OH, diocese, which was administered from Steubenville, OH. On weekdays, religious services were held in private homes and public halls; but on Sundays, the parishioners had to travel across the Ohio River to West Virginia to attend church.

After doing this for several years, some 35 families petitioned the bishop of Columbus to send a priest to Toronto for the purpose of organizing a parish. It was at this time in 1885, that Rev. Thomas F. Delaney was appointed and served as the first resident pastor. It was during Father Delaney's pastorate that plans were made for a new church which was finally completed in April 1887. The building was formally dedicated on October 25, 1887.

The parish continued to grow in every way as the 1900's began, despite several fires and attacks of vandalism, and a parochial school was added. Also, there were renovations and additions made to the original structure. A rectory and convent were constructed as well. By 1917, the congregation numbered over 240 families. The majority of these were Irish, but there were also about 60 Slovak and Polish families and many Italian, German, Hungarian, and Croatian families as well. This well reflects the ethic makeup of the community itself, even today.

As time went on, the parish continued to be a mainstay in the community and is proud of the tremendous growth that is has enjoyed over the years to the present time. It is said that the strength of any organization lies in its membership, and this certainly applies to St. Francis parish. The church should be proud of its congregation and the congregation of its church.

Mr. Speaker, on behalf of the U.S. House of Representatives, I want to commend St. Francis parish on their 100th anniversary and extend best wishes for many more anniversaries in the future.

EX-OFFICIAL RAPS LOAN STANDARDS ON FARM CREDIT

HON. JIM ROSS LIGHTFOOT

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 2, 1985

Mr. LIGHTFOOT. Mr. Speaker, to date, much has been said, and altogether too much left unsaid about the farm credit system. Farmers caught in the squeeze between weather, trying economic conditions and an election-bent Congress are being kicked from another direction—the farm credit system.

In my job as a farm editor prior to coming to Congress, I was quite concerned with the shape of things in the farm credit system. Those fears have been borne out in the ensuing months.

James Allen Flannery, a highly respected reporter with the Omaha World Herald, has been researching and reporting on the farm credit system and its impact on rural America.

Because the information on and within the system is sensitive and closely guarded, it is not an easy task to get people to speak freely about the system.

However, Mr. Flannery has persisted in gathering sound information from borrowers, current and ex-employees of the farm credit system and others affected by the actions of the system.

As a former farm editor and Member of Congress vitally interested in what is happening within the farm credit system, I strongly urge anyone with an interest in agriculture to read Mr. Flannery's article of Sunday, September 29. It clearly brings to the forefront what has gone on and is going on with the system.

I commend Mr. Flannery for his objective reporting of this issue and encourage him to pursue what, in my opinion, will be one of the most important stories of these times.

The article follows:

EX-OFFICIAL RAPS LOAN STANDARDS ON FARM CREDIT

(By James Allen Flannery)

Donald Hovendick says he was forced to resign 17 months ago as president of the Federal Intermediate Credit Bank of Omaha after disagreeing with the governing board on how to handle mounting financial problems.

Hovendick declined to discuss the nature of the disagreement. But six people close to the bank say Hovendick was pressured to resign after refusing to adopt what he regarded as severe new credit standards for farm borrowers.

Farm Credit System documents indicate the standards called for borrowers with widely varying financial problems to be evaluated as if all faced foreclosure. Anticipated foreclosure costs were to be added to borrowers' existing debts.

The standards—adopted a month after Hovendick's April 1984 departure—helped push some farmers out of business and contributed to worsening conditions for the bank's affiliated production Credit Associations, say the six people. They are all

former or current Farm Credit System officials and asked not to be identified.

Prompted by PCA loan losses, the Federal intermediate Credit Bank of Omaha is seeking up to $340 million worth of aid from the Farm Credit System.

Several former officials interviewed and they believe the new standards have contributed to the growth in volume of nonperforming PCA loans in the district.

Non-performing loans totaled $303.1 million on June 30, compared with $158.8 million at the end of 1984. A June * * * figure was unavailable.

The critics' * * * are disputed by William Hoffman, a deputy governor of the Farm Credit Administration, and by John Harling, who was named president of the combined Farm Credit Banks of Omaha after Hovendick's departure.

"The standards—in and of themselves—did not force anybody out of farming," Harling said. Declining land values and prices were the culprits, he said.

'SURVIVAL PLANS'

Harling said the new standards have helped detect potential problems for borrowers in time to develop "survival plans" to keep them in business.

He and Hoffman said the standards also give a more realistic picture of how much money a PCA can realize if a foreclosure actually occurs.

Harling said the new standards originated with the Farm Credit Administration, a federal agency that monitors the Farm Credit System, which is a cooperative network that holds about 35 percent of the nation's $212 billion farm debt.

The system has 12 districts, one of which is based in Omaha and covers Nebraska, Iowa, South Dakota and Wyoming.

Hovendick, 58, was president of the Federal Intermediate Credit Bank of Omaha for 12 years and a past recipient of the prestigious. Ak-Sar-Ben Agricultural Achievement Award. He said he was not fired by his governing board.

"But if I had persisted two or three more weeks, I would have been fired," Hovendick said. "I didn't have the muscle to prevail.

MERGER PROPOSED

For example, he said, he could not persuade the Farm Credit Administration to adopt a plan he developed in late 1983 for merging some PCAs in the district.

If the plan had been approved, he said, the failures last year of PCAs in Valentine and O'Neill, Neb., might have been avoided.

Now, the district is seeking to merge all 37 PCAs and 31 federal land bank associations into two districtwide associations. Farm borrowers are scheduled to vote on the proposal in November.

Jim Peterson of Underwood, Iowa, chairman of a seven-member board that sets policy for the Omaha district of the Farm Credit System, confirmed that Hovendick resisted the new credit standards and was pressured to resign.

Peterson said the board also was concerned about the quality of supervision of PCAs and the quality of PCA management under Hovendick.

"There were significant deficiencies in management of some PCAs that had been tolerated over a longer period than they should have been," Peterson said.

MOUNTING PRESSURE

Hovendick, who granted an interview for the first time since his resignation, said that in 34 years with the Farm Credit System, "I was right part of the time, and I was not right part of the time."

Peterson said the governing board consulted with the Farm Credit Administration about problems in the Omaha district. But he disagreed with a contention by some critics that the federal agency had pressured the board.

A former PCA president said pressure had been mounting for some time.

He pointed to a Nov. 22, 1982, memo sent to Hovendick and 11 others then serving as intermediate credit bank presidents from Larry Edwards, a deputy governor of the Farm Credit Administration.

Edwards said in the memo that the Farm Credit Administration would consider requests by PCAs to exceed existing loan limits in light of several factors.

Among them, the memo said, was "the (intermediate credit) bank's perspective on whether (the PCA board and management) need to be removed."

'ADVERSARY' POSITION

If a change was deemed necessary, the memo said, the Farm Credit Administration would want to know "the bank's plans for achieving this transition to a new board and/or management."

A January 1985 memo circulated among Omaha district PCAs said they should not consider compromising with problem-ridden borrowers unless the compromise "results in the greatest net return to the association and the (federal intermediate credit) bank."

Nebraska Attorney General Robert Spire said last week he was concerned by what he regarded as increasing evidence that Farm Credit System leaders were taking an adversarial position toward farmers and ranchers who are member-borrowers.

"The Farm Credit System was designed to help farmers and treat farmers on a preferential basis," Spire said. "Instead, we see a hard-line approach."

Spire, who had a law office for 30 years in the Farm Credit Banks of Omaha building, is one of 11 state attorneys general demanding that system leaders change various practices as a condition for gaining federal assistance.

The new credit standards were ordered for Omaha-district PCAs in a May 21, 1984, memo from the Federal Intermediate Credit Bank of Omaha.

The memo directed all PCA presidents within the district to evaluate "adversely classified loans"—or loans with moderate to severe problems—in terms of "standards for real estate liquidation."

The memo directed loan officers to add expenses anticipated during foreclosure proceedings—including one year's worth of future interest on real estate debt and one year's future taxes—to a borrower's existing debt.

Although the standards could be waived for problem-ridden borrowers who pledged to improve their operations, application of the standards troubled a number of people within the system, the six current and former officials said.

"Some of us felt we were adding liabilities that had not even occurred yet," said a one-time senior Farm Credit Banks of Omaha official.

"Many of the people to which the standards were applied were not facing foreclosure," said another one-time senior official.

PRECARIOUS POSITION

Applying the standards helped plunge some farmers with debts already approximating assets into an even more precarious position, the officials said.

To illustrate, one official cited an example of a farm borrower with total debts of $100,000, including obligations on land being purchased.

The farmer fails to pay all his annual expenses, which include $13,500 in interest payments on the land as well as property taxes.

The farmer ends the year with a net worth of $10,000.

Applying the new standards adds another $13,500 in interest and taxes to the farmer's debt—leaving him with a negative net worth of $3,500.

Thus, the six critics say, the farmer moves from a borderline position to a loss.

PCA's have been harmed, critics say, because they have had to move money out of reserves to cover these losses. That, in turn, has resulted in increases in interest rates to replenish reserves, they said.

LOYAL TO SYSTEM

Harling said it was possible that the new standards resulted in an increase in loan losses. But, he said, it is hard to distinguish losses that have occurred that way from those attributable to declining land and commodity prices.

Other borrowers whose repayment problems were not as severe also saw their loans deteriorate in quality, the six critics said.

"A pretty good operator in less than perfect shape could have this formula applied and be borderline or in a loss position," one former official said.

Hovendick, now a private consultant in Omaha, said he remained loyal to the system and sympathized with Harling and other leaders.

"But I still disagree with some of the things being done," he said.

"I don't know how much of the emergency (facing the system) is on the books and how much is anticipated," Hovendick said.

"It is my belief the system probably has the resources by itself to survive if there are no further declines in the agricultural economy. But if things get worse, the system could dissolve in front of all of us."

OMB DRAGS ITS FEET ON RELEASE OF REFUGEE ASSISTANCE TO THE STATES

HON. C.W. BILL YOUNG

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 2, 1985

Mr. YOUNG of Florida. Mr. Speaker, the Office of Management and Budget once again is circumventing congressional intent by dragging its feet on the release of $11.5 million in refugee assistance funds to the States.

Providing for refugee assistance is a Federal responsibility, but many State and local governments, such as those in Florida, have had to shoulder a large portion of refugee costs. As a member of the Appropriations Subcommittee which funds refugee programs, I have opposed past attempts by OMB to shirk its payments to the States.

The General Accounting Office has ruled that OMB's latest effort to withhold targeted assistance funds is an illegal impoundment. These funds, to be allocated to 20 States and the District of Columbia, would have lapsed yesterday because they were

not expended before the end of the fiscal year. But a California Federal judge imposed a temporary injunction against OMB preventing the money from reverting to the Federal Treasury.

Unfortunately, despite congressional intent, a GAO ruling, and a Federal judge's injunction, OMB still refuses to release the $11.5 million in refugee assistance owed to the States. It's my hope OMB will cease its delaying tactics and meet its Federal obligation to reimburse our State and local governments for the costs they have incurred due to the influx of refugees to our Nation.

IN CLEVELAND, THE HEART OF ROCK-N-ROLL, IS THE BEAT

HON. MARY ROSE OAKAR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 2, 1985

Ms. OAKAR. Mr. Speaker, today I rise in support of the Greater Cleveland Growth Association in their efforts to establish the "Rock-N-Roll Hall of Fame and Museum" in Cleveland, OH.

I would also like to salute Mr. Ahmet Ertegun, a legendary figure in the recording field and the chairman of Atlantic Records. Mr. Ertegun is serving as chairman of the Rock and Roll Hall of Fame Foundation, with a board of directors who are also luminaries in this industry: Walter Yetnikoff, president of CBS Records Group; Seymour Stein, president of Sire Records; Jann Wenner, editor and publisher of Rolling Stone; Allen Grubman, Esq., of Grubman, Indursky & Schindler; Neshui Ertegun, president of WEA International; Clive Davis, president of Arista Records; Robert Stigwood, chairman of Stigwood Group Co.; Guentler Hensler, president of Polygram Records; Jerry Moss, chairman of A&M Records; Bob Summer, president of RCA Records; Bhaskar Menon, chairman of EMI-Capitol Records; Bob Krasnow, chairman of Elecktra-Asylum Records; Bob Pittman, chief operating officer of MTV; David Geffen, president of Geffen Records; Irv Azoff, president of MCA Records; David Btaun, Esq., Wyman, Bautzer, Kuchel & Silbert; Bill Graham, president of Bill Graham Productions: Mo Ostin, chairman of Warner Brothers Records; John Hammond, consultant producer of CBS Records: and Quincy Jones, president of Quincy Jones Productions.

Mr. Chairman, I would like to pledge my support, as a Representative of downtown Cleveland, for the establishment of the "Rock-N-Roll Hall of Fame and Museum" in my district.

Cleveland, OH, has for many years enjoyed the reputation as one of the leading cultural capitals in the United States. The Cleveland Orchestra is world reknown, as is the Cleveland Museum of Art, which houses, among its other outstanding collections, one of the greatest Asian art collections in the world. The Cleveland Ballet is one of the few great companies in the world to have its own permanent performing theatre, located in the historic Playhouse Square area.

Cleveland is also home to many fine repertory theatres, including The Cleveland Playhouse, which has served as an important training ground for actors such as Joel Gray, Paul Newman, and Margaret Hamilton, and the nationally known black repertory theatre, Karamu House.

Yet, few people know that Cleveland has been a leader in the commercial radio and recording industry. Many of Cleveland's leading disc jockeys of the 1950's, which included Alan Freed, Norm N. Nite, and Bill Randall, revolutionized the A.M. radio format. They were among the first to play rock-n-roll and rhythm and blues recorded by black performers. Previously, this music was only given air time by radio stations if it was performed and recorded by white artists. Therefore, the function performed by these rock-n-roll DJ's was significant not only to the recording industry but to the American public as a whole.

Since the 1950's, rock-n-roll, (a phrase coined by Cleveland disc jockey Alan Freed), has indeed been alive and well in Cleveland, OH.

Mr. Speaker, Cleveland and the entire northeast Ohio area continue to be one of the most important marketing areas of the recording industry. Cleveland continues to be a major "break out" market for rock-n-roll artists. For example, the first concert of Elvis Presley's held north of the Mason-Dixon Line was in Cleveland, OH. David Bowie broke first in the Cleveland market in the 1970's. More recently, much of Bruce Springsteen's early success was from Cleveland audiences and record buyers.

Mr. Speaker, I believe that in an era of resurgence of nationalism and pride in being Americans, we also give a place of prominence to an art form that is truly American. Our music is listened to and emulated by millions of people around the world. It is a thing that unites us as one people, one world. American rock-n-roll, in all its various forms, has influenced other types of music, the visual arts, style and fashion, and dance. It has even given birth to its own universal language. Rock-n-roll music is our unique American art form in which we can indeed be proud and share with the rest of the world.

Mr. Speaker, symbols of contemporary culture are often overlooked by traditional museums and galleries in this country. The "Rock-N-Roll Hall of Fame and Museum" would be a valuable asset in celebration of contemporary and American culture.

The city of Cleveland is enjoying a major revitalization, in terms of construction and investment with regard to projects from the public and private sectors. The city of Cleveland, with its unique lakefront location, has a history of support for major cultural institutions, and particularly a unique and historical relationship with the recording industry. Its long time promotion and support of rock-n-roll artists, make it a prime location for the "Rock-N-Roll Hall of Fame and Museum."

Mr. Speaker, I enthusiastically support the concept of a "Rock-N-Roll Hall of Fame and Museum", both as a Member of Congress who represents the city of Cleveland, and as a Member who is very active in sponsoring and supporting legislation relative to the arts, humanities, and museums in this country. This museum would be a valuable cultural and educational asset to the city of Cleveland and to the Nation as a whole.

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Thursday, October 3, 1985, may be found in the Daily Digest of today's RECORD.

MEETINGS SCHEDULED

OCTOBER 4

9:30 a.m.

Finance

To continue hearings on the President's tax reform proposal.

SD-215

*Joint Economic

To hold hearings on the employment/unemployment situation for September.

SD-628

10:00 a.m.

Energy and Natural Resources

Public Lands, Reserved Water and Resource Conservation Subcommittee

To hold hearings on certain land conveyance measures, including S. 304, S. 360, S. 446, S. 565, S. 567, S. 829, S. 1503, S. 1625, and S. 1690.

SD-366

Governmental Affairs

Civil Service, Post Office, and General Services Subcommittee

To hold oversight hearings on the implementation of the Randolph-Sheppard Act of 1936.

SD-342

OCTOBER 7

10:00 a.m.
Labor and Human Resources
To hold hearings on alternative programs for troubled youth.
SD-430

OCTOBER 8

9:30 a.m.
Energy and Natural Resources
Energy Research and Development Subcommittee
To hold joint hearings with the Committee on Environment and Public Works' Subcommittee on Nuclear Regulation on S. 1517, to provide continued financial and technical assistance of the Department of Energy to the regional low-level waste compact regions, and to revise the guidelines and procedures for the establishment and use of regional disposal facilities for low-level radioactive waste, and S. 1578, to improve procedures for the implementation of compacts providing for the establishment and operation of regional disposal facilities for low-level radioactive waste.
SD-366

Environment and Public Works
Nuclear Regulation Subcommittee
To hold joint hearings with the Committee on Energy and Natural Resources' Subcommittee on Energy Research and Development on S. 1517, to provide continued financial and technical assistance of the Department of Energy to the regional low-level waste compact regions, and to revise the guidelines and procedures for the establishment and use of regional disposal facilities for low-level radioactive waste, and S. 1578, to improve procedures for the implementation of compacts providing for the establishment and operation of regional disposal facilities for low-level radioactive waste.
SD-366

Judiciary
To hold hearings on S. 238, to reform procedures for collateral review of criminal judgments.
SD-226

10:00 a.m.
*Commerce, Science, and Transportation
To resume hearings on S. 1310, the Clean Campaign Act.
SR-253

Foreign Relations
To hold closed hearings to discuss a nuclear agreement between the United States and the Peoples' Republic of China.
S-116, Capitol

Judiciary
Constitution Subcommittee
To hold hearings on S. 1580, to revise federally mandated attorneys' fees applicable to civil, criminal, and administrative proceedings involving the United States and civil proceedings involving State and local governments.
SD-628

Joint Economic
Monetary and Fiscal Policy Subcommittee
To hold oversight hearings on proposals to balance the Federal budget.
SD-562

OCTOBER 9

9:00 a.m.
Labor and Human Resources
Business meeting, to mark up S. 1570, to exempt State and local governments from certain maximum hours provisions of the Fair Labor Standards Act, as a result of the impact of the Supreme Court's decision in Garcia versus San Antonio Metropolitan Transit Authority on cities, and other pending calendar business.
SD-430

9:30 a.m.
Commerce, Science, and Transportation
To hold hearings on Robert Elsner, of Alaska, and Karen Pryor, of Washington, each to be a Member of the Marine Mammal Commission.
SR-253

Finance
To resume hearings on the President's tax reform proposal.
SD-215

Foreign Relations
To continue hearings on a nuclear agreement between the United States and the Peoples' Republic of China.
SD-419

*Labor and Human Resources
To hold hearings to examine certain barriers to health care.
SD-430

Select on Intelligence
To resume closed hearings on the development of a national intelligence strategy (Phase II).
SH-219

10:00 a.m.
Commerce, Science, and Transportation
To hold oversight hearings in conjunction with the National Ocean Policy Study on Pelagic driftnets.
SR-253

Energy and Natural Resources
Business meeting, to consider pending calendar business.
SD-366

Environment and Public Works
Business meeting, to consider the nominations of Jennifer Joy Manson, of Virginia, to be Assistant Administrator for External Affairs, and Lawrence J. Jensen, of Virginia, to be Assistant Administrator for Water, both of the Environmental Protection Agency, and Orson G. Swindle, III, to be Assistant Secretary of Commerce for Economic Development, and other pending calendar business.
SD-406

Judiciary
To hold hearings on S. 1140, to preserve and promote wholesale and retail competition in the retail gasoline market and to protect the motoring safety of the American public.
SD-226

Judiciary
Courts Subcommittee
To hold hearings on S. 704, to establish an Intercircuit Panel of the United States Courts of Appeals to decide cases referred by the Supreme Court.
SD-106

2:00 p.m.
Judiciary
To hold hearings on pending nominations.
SD-226

OCTOBER 10

9:30 a.m.
Energy and Natural Resources
Public Lands, Reserved Water and Resource Conservation Subcommittee
To hold hearings on S.J. Res. 187, to designate Patrick Henry's last home and burial place, in Virginia, as a National Memorial to Patrick Henry, S. 1596 and H.R. 2776, bills to direct the Secretary of the Interior to convey title to the Robert F. Kennedy Memorial Stadium to the District of Columbia, and S. 1116, to authorize funds for financial assistance and grants to the Bethune Museum and Archives in the District of Columbia.
SD-366

Finance
To continue hearings on the President's tax reform proposal.
SD-215

Foreign Relations
To hold hearings to discuss the proposed U.S. arms sale to the Kingdom of Jordan.
SD-419

10:00 a.m.
Commerce, Science, and Transportation
Merchant Marine Subcommittee
To hold hearings on fishing vessel safety and insurance.
SD-562

Judiciary
Business meeting, to consider pending calendar business.
SD-226

Labor and Human Resources
To hold hearings on mandatory nutritional labeling.
SD-430

Labor and Human Resources
Education, Arts, and Humanities Subcommittee
To resume hearings on proposed legislation authorizing funds for programs of the Higher Education Act.
SR-385

10:30 a.m.
Commerce, Science, and Transportation
Business, Trade, and Tourism Subcommittee
To hold hearings on the promotion of domestic tourism.
SR-253

4:00 p.m.
Select on Intelligence
Closed briefing on worldwide intelligence matters.
SH-219

4:30 p.m.
Select on Intelligence
Closed briefing on the Philippines.
SH-219

OCTOBER 16

9:30 a.m.
Labor and Human Resources
Business meeting, to consider pending calendar business.
SD-430

Select on Intelligence
To resume closed hearings on the development of a national intelligence strategy (Phase II).
SH-219

10:00
Energy and Natural Resources
Business meeting, to consider pending calendar business.
SD-366

Select on Indian Affairs
To hold hearings on the nomination of Ross O. Swimmer, of Oklahoma, to be an Assistant Secretary of the Interior.
SR-325

10:30 a.m.
Foreign Relations
To hold hearings to discuss certain trade barriers to U.S. exports.
SD-419

OCTOBER 17

9:30 a.m.
Governmental Affairs
Permanent Subcommittee on Investigations
To hold hearings on espionage activities in the United States.
SD-342

10:00 a.m.
Foreign Relations
To hold hearings on the nominations of Alan L. Keyes, of Maryland, to be an Assistant Secretary of State, Robert G. Houdek, of Illinois, to be Ambassador to the Republic of Uganda, and Natale H. Bellocchi, of New York, to be Ambassador to the Republic of Botswana.
SD-419

Labor and Human Resources
Education, Arts, and Humanities Subcommittee
To hold hearings to examine measures to discourage students from dropping out of high school.
SD-430

Labor and Human Resources
Aging Subcommittee
To hold hearings on pension accrual and the older worker.
SD-628

4:00 p.m.
Select on Intelligence
Closed briefing on intelligence matters.
SH-219

OCTOBER 18

9:00 a.m.
Energy and Natural Resources
Energy Regulation and Conservation Subcommittee
To hold oversight hearings on innovative approaches in industrial energy efficiency.
SD-366

OCTOBER 21

9:30 a.m.
Commerce, Science, and Transportation
Surface Transportation Subcommittee
To hold oversight hearings on the implementation of the Household Goods Transportation Act (P.L. 96-454), and the Bus Regulatory Reform Act (P.L. 97-261).
SR-253

OCTOBER 22

9:30 a.m.
Environment and Public Works
Nuclear Regulation Subcommittee
To hold hearings on S. 445 and S. 1225, bills to revise certain provisions of the Atomic Energy Act of 1954 regarding liability for nuclear incidents.
SD-406

Governmental Affairs
Permanent Subcommittee on Investigations
To resume hearings on espionage activities in the United States.
SD-342

Labor and Human Resources
Employment and Productivity Subcommittee
To hold hearings on the impact of trade on employment and productivity.
SD-430

2:00 p.m.
Governmental Affairs
Intergovernmental Relations Subcommittee
To hold hearings to review innovative State and local programs to expand student and parental choice in elementary and secondary education and on Federal policies to provide such innovation.
SD-342

OCTOBER 23

9:30 a.m.
Environment and Public Works
Nuclear Regulation Subcommittee
To continue hearings on S. 445 and S. 1225, bills to revise certain provisions of the Atomic Energy Act of 1954 regarding liability for nuclear incidents.
SD-406

Labor and Human Resources
Business meeting, to consider pending calendar business.
SD-430

10:00 a.m.
Energy and Natural Resources
Business meeting, to consider pending calendar business.
SD-366

OCTOBER 24

9:00 a.m.
Veterans' Affairs
Business meeting, to mark up proposed legislation to provide a cost-of-living increase for fiscal year 1986 in the rates of veterans disability compensation and dependency and indemnity compensation for surviving spouses and children.
SR-418

10:00 a.m.
Governmental Affairs
Permanent Subcommittee on Investigations
To hold hearings on the role of the entertainment industry in deglamorizing drug use.
SD-342

Labor and Human Resources
Education, Arts, and Humanities Subcommittee
To resume hearings on proposed legislation authorizing funds for programs of the Higher Education Act.
SD-430

4:00 p.m.
Select on Intelligence
Closed briefing on worldwide intelligence matters.
SH-219

4:30 p.m.
Select on Intelligence
Closed briefing on intelligence matters.
SH-219

OCTOBER 28

9:30 a.m.
Finance
Health Subcommittee
To hold hearings on S. 1551, to provide for administrative appeals and judicial review under Part B of Medicare, and to review the beneficiary and provider appeals provisions under Part A and B of the Medicare program.
SD -215

OCOBTER 29

9:30 a.m.
Labor and Human Resources
Handicapped Subcommittee
To hold hearings on the Tenth Anniversary of the Education for All Handicapped Children Act (P.L. 94-142).
SD-430

10:00 a.m.
Governmental Affairs
Permanent Subcommittee on Investigations
To hold hearings on the Federal enforcement of the Bank Secrecy Act (title 31 of the U.S. Code).
SD-342

OCTOBER 30

9:30 a.m.
Labor and Human Resources
To resume hearings to examine certain barriers to health care.
SD-430

10:00 a.m.
Energy and Natural Resources
Business meeting, to consider pending calendar business.
SD-366

Labor and Human Resources
Children, Family, Drugs, and Alcoholism Subcommittee
To hold hearings on the effects of domestic violence.
SD-628

OCTOBER 31

10:00 a.m.
Governmental Affairs
Intergovernmental Relations Subcommittee
To hold hearings on S. 1209, to establish the National Commission to Prevent Infant Mortality.
SD-342

Labor and Human Resources
Employment and Productivity Subcommittee
To resume hearings on the impact of trade on employment and productivity.
SD-430

Small Business
To hold oversight hearings on activities of the Small Business Administration's Office of Veterans Affairs.
SR-428A

4:00 p.m.
Select on Intelligence
Closed briefing on intelligence matters.
SH-219

NOVEMBER 6

9:30 a.m.
Labor and Human Resources
To hold hearings on nutrition and fitness in public health.
SD-430

NOVEMBER 7

9:30 a.m.
Commerce, Science, and Transportation
Science, Technology, and Space Subcommittee
To hold hearings on insurance and space commercialization.
SR-253

NOVEMBER 12

9:30 a.m.
Labor and Human Resources
Employment and Productivity Subcommittee
To resume hearings on the impact of trade on employment and productivity.
SD-430

NOVEMBER 14

10:00 a.m.
Governmental Affairs
Intergovernmental Relations Subcommittee
To hold oversight hearings on regulatory activities of the Office of Management and Budget.
SD-342

CANCELLATIONS

OCTOBER 3

10:00 a.m.
Governmental Affairs
To hold hearings on the President's management initiatives and related measures.
SD-342

SENATE—*Monday, October 3, 1985*

(Legislative day of Monday, September 30, 1985)

The Senate met at 10:30 a.m., on the expiration of the recess, and was called to order by the President pro tempore [Mr. THURMOND].

The PRESIDENT pro tempore. Our prayer will be offered by the Reverend Adam Lewis, rector, Christ Church Christiana Hundred, Greenville, DE. He is sponsored by Senator WILLIAM ROTH, Jr., and he is Senator ROTH's pastor.

PRAYER

The Reverend Adam Lewis, rector, Christ Church Christiana Hundred, Greenville, DE, offered the following prayer:

Almighty God, in this hour we offer prayers for all people and nations who on this Earth do dwell and most especially for the United States of America.

We pray for the Members of this Senate, that Thou wouldst be pleased to direct and prosper all their consultations to the advancement of the safety, honor, and welfare of Thy people; that their endeavors may be so ordered as to provide the best and surest foundations for peace, justice, and the pursuit of happiness.

We further beseech Thee O God that as a nation we may prove ourselves mindful of Thy favor. Bless this land with honorable industry; instill in us a sincere desire for peace on Earth and good will to men and women of every kindred and tongue. Save us from violence, discord, and confusion; from pride, arrogancy, and every evil way. Endue with wisdom those to whom in Thy name we have entrusted the authority of this Government that they may be obedient to Thy law and that we as a people may show forth Thy praise among all nations.

Finally, we pray for our fellow men and women who are hungry, destitute, and homeless. By Thy mercy, lift up the poor, those who are cast down and the innocent who suffer. Open our eyes, our minds, and our hearts to the less fortunate and by Thy grace may we have wisdom to relieve the sorrow of pain throughout the world.

Grant these petitions for Thy sake and for Thy glory, O God. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The distinguished majority leader is recognized.

Mr. DOLE. Mr. President, I yield to the distinguished Senator from Delaware.

TRIBUTE TO THE REVEREND ADAM LEWIS

Mr. ROTH. I thank the distinguished majority leader.

I would like to take this opportunity to express my deep appreciation to Reverend Lewis for being with us here today and offering such a thoughtful prayer.

In the 2 short years that he has guided and carefully tended our church at home, Reverend Lewis has distinguished himself both as a deeply spiritual man and one of the most articulate, thought-provoking rectors our congregation has ever had. I greatly appreciate his taking the time to open the Senate today. And I would also like to welcome his lovely wife, Linda, who is sitting in the family gallery. We look forward to seeing more of them, and I wish them well and Godspeed.

Mr. DOLE addressed the Chair.

The PRESIDING OFFICER (Mr. ARMSTRONG). The distinguished majority leader.

Mr. DOLE. Mr. President, I thank my distinguished colleague from Delaware for those comments, and I share the views which the Senator expressed.

SCHEDULE

Mr. DOLE. Under the standing order, the leaders have 10 minutes each, followed by special orders for the following Senators: CHAFEE, MURKOWSKI, COHEN, DOLE, SIMPSON, ARMSTRONG, GOLDWATER, NUNN, and PROXMIRE for not to exceed 15 minutes each.

I ask unanimous consent that the special orders in favor of Senators DOLE, SIMPSON, and ARMSTRONG for today be under the control of the Senator from Maine [Mr. COHEN].

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Following special orders, there will be routine morning business not to extend beyond the hour of 12 noon with Senators permitted to speak therein for not more than 5 minutes. That time limit may by necessity have to be extended if everyone uses his special order. But in any event, at about 12 noon we hope to turn to the consideration of House Joint Resolution 372, the debt limit extension.

Rollcall votes can be expected during today's session but will not occur after the hour of 3 p.m. today. We could also turn to any other legislative matters or any matters on the Executive Calendar that might not require rollcall votes after 3 o'clock—hopefully, even beyond 3 o'clock. If there are discussions with reference to any amendment or amendments on the debt ceiling, we can have some debate after 3 o'clock.

A number of our colleagues have made long-time commitments—about an equal number on each side—to be absent after 3 p.m. today.

We will have a Friday session. It would be my hope we could come in early tomorrow morning. If we can limit the number of amendments on the debt ceiling extension on each side, then I see no reason we cannot complete action on the debt ceiling extension fairly early tomorrow afternoon. We would then recess until Monday at which time if we complete action on the debt ceiling extension we would move to the reconciliation bill. Senator DOMENICI and Senator CHILES, I understand, are prepared to do that. That could consume Monday, Tuesday, Wednesday, and Thursday of next week. If not, as I indicated last night, it would be my intention to return to the Micronesia bill and the pending textile amendment unless we can work out some other arrangement because that will then interfere with the consideration of the farm bill. I hope that between now and next week those interested in the textile amendment and the Micronesia bill can all get together to resolve the problem and compromise the textile bill. It is obviously in some difficulty with 42 votes to table the amendment. I would think those who are strong supporters of the textile bill might want to review the proposed modifications to that amendment if in fact they intend to finally succeed. But in any event, that will be up to the distinguished Senators from South Carolina, Senator THURMOND and Senator HOLLINGS; and Senator HELMS and others who have taken the lead in this particular amendment.

I will confer with the distinguished minority leader as soon as I have additional information on the debt ceiling extension and what I feel may be the number of amendments to be offered on this side.

I reserve the balance of my time.

RECOGNITION OF THE MINORITY LEADER

The PRESIDING OFFICER. Under the previous order, the minority leader is recognized.

THE DEBT LIMIT EXTENSION

Mr. BYRD. Mr. President, in listening to the distinguished majority leader, I wish to say that once the situation is clear on the other side as to the number and nature of amendments that may be called up to the debt limit extension, I feel that on this side we may be able to reach a decision as to how many amendments we may have to offer.

I hope that we will not have many amendments. I hope we can confine them to the area of the budget deficit.

The distinguished majority leader and I have discussed this more than once. I think each of us would have been happier if no amendments were going to be offered and none adopted. But that does not seem to be the way the stream is flowing. Monday night is the deadline. I hope the distinguished majority leader could perhaps, before the day is over, tell us what the Monday situation will be.

Mr. President, I am not sanguine about the prospects of finishing action on this bill tomorrow. I am not expressing an attitude of reluctance to see it passed. I would be happy to see it passed tomorrow. But in view of the event that if it is not adopted on Friday, and in view of the fact that we will not have a session on Saturday, I think it would be of benefit to all of us, including the distinguished majority leader, to determine whether or not we can really get the debt limit legislation passed Monday, which will necessitate rollcall votes, or whether or not there is indeed a likelihood that it might go over until Tuesday for final action.

I am not suggesting that we go over until Tuesday, but I think that is a real possibility. If the Senate is still on the debt limit Monday, it might require some rollcalls prior to the usual threshold on Mondays, 4 or 5 o'clock.

I would be happy to engage in a conversation with the majority leader as to how we might do that by Monday.

Mr. DOLE. Or maybe even by Friday.

Mr. BYRD. I hope so, but I have a feeling that Monday is probably going to be the day.
